There are extensive ironworks in the State, and flour-milling, manufactures of paper and pulp, trunks and bags, glass, and many other articles are prosperous. According to the Federal census of manufactures in 1914 there were in the State 5,508 manufacturing establishments, with an aggregate capital of 261,501,000 dollars, employing 9,164 salaried officials and 102,820 wage-earners; wages amount annually to 44,873,000 dollars: the cost of raw materials used amounted to 155,320,000 dollars, and the value of the output was 264,039,000 dollars. Statistics of the more important industries for 1910 are given in *THE STATESMAN'S YEAR-BOOK* for 1916, p. 625.

In 1918 there were 4,693 miles of steam railway in the State; and 440 miles of electric railway (1920). The telegraph and telephone companies had 12,090 miles of line.

The Federal Reserve Bank for the Fifth District is located at Richmond.

There are British Vice-Consuls at Newport News, Norfolk, and Richmond.

WASHINGTON.

Government.—Washington, formerly part of Oregon, was created a Territory in 1853, and was admitted into the Union as a State on February 22, 1889. The Legislature consists of a Senate and a House of Representatives, the latter composed of not less than 63 nor more than 99 members (actually 97 in 1917), the number of Senators being not more than half nor less than one-third of that of members of the House of Representatives (actually 41 in 1917). The membership of both Houses is apportioned anew every 10 years according to the results of the Federal decennial census. Senators are elected for 4 years, half their number retiring every 2 years; members of the House of Representatives are elected for 2 years.

Qualified as voters are (with some exceptions) all citizens 21 years of age who have lived in the State 1 year, in the county 90 days, in the city, town, ward, or precinct where they vote 30 days, and who can read and speak English.

Governor.—Louis F. Hart, 1921-1925 (6,000 dollars).

Secretary of State.—J. Grant Hinkle.

To the United States Congress the State sends 2 Senators and (since 1911) 5 Representatives.

The State contains 39 counties. The State capital is Olympia.

Area, Population, Instruction.—Area, 69,127 square miles, of which 2,291 square miles is water area. Census population on January 1, 1921, 1,356,621.

Years	Population	Per sq. mile	Years	Population	Per sq. mile
1880	75,116	1.1	1910	1,141,990	17.1
1900	518,103	7.8	1920	1,356,621	20.3

In 1920 there were 734,701 males and 621,920 females.

In 1920 the population by sex and birth was:—

—	White	Negro	Asiatic	Indian	Total
Male . . .	711,693	3,957	14,499	4,552	734,701
Female . . .	608,034	2,926	6,401	4,509	621,920
Total 1920	1,319,777	6,883	20,900	9,061	1,356,621

The foreign-born white population in 1920 numbered 250,055, constituting 18·4 per cent. of the total population.

There are 18 Indian reservations with a total area (1920) of 2,655 square miles, the largest being The Colville, which contains 1,051,488 acres; and a total population (1920) of 11,114.

The principal cities are Seattle, with a population, according to the census of 1920, of 315,652 inhabitants; Tacoma, 96,965; Spokane, 104,437; Bellingham, 25,570; Everett, 27,614; Walla Walla, 15,503; North Yakima, 18,539; Aberdeen, 15,337; Vancouver, 12,637; and Hoquiam, 10,058. Olympia, the State capital, has about 10,000. Of the total population in 1920, 55·2 per cent. was urban.

The prevailing forms of religion in the State are Catholic, Methodist, Presbyterian, Lutheran, Baptist, and Congregationalist. In the public schools formal religious teaching, or regular reading from the Bible, is not permitted, but moral training is given and moral principles inculcated. Education is given free, and compulsory for children from 8 to 16 years of age. In 1920, the 2,159 schools had 7,113 teachers and were attended by 247,688 children (elementary schools), and the 281 high schools had 1,795 teachers and 42,419 pupils. In 1920 three State normal schools had 168 teachers and 1,000 students. The total expenditure for the school year 1920 was 22,414,510 dollars.

The University of Washington, founded 1861, near Seattle, had, in 1919, 210 professors and teachers and 2,457 students; and the University of Puget Sound founded in 1903 at Tacoma had 16 professors and teachers and 265 students. The State College at Pullman for science and agriculture, founded 1892, had 125 professors or teachers and 1,957 students. Gonzaga College (R.C.), founded 1887, at Spokane, has 50 professors and 500 students; Whitman College (Cong.), founded 1866, at Walla Walla, has 25 professors and 310 students.

Finance, Defence.—For the two years ending September 30, 1920, the revenue and expenditure were as follows:—

	Dollars.
Balance in hand, Oct. 1, 1918	5,370,696
Receipts, 1918-20	43,240,706
Total	48,611,402
Disbursements, 1918-20	42,953,824
Balance, September 30, 1920	5,657,578

The assessed valuation of real property in 1919 amounted to 722,761,254 dollars, and of personal property to 179,764,087 dollars. In 1918 the valuation was of railway roads, 339,557,287 dollars; electric railways, 37,607,325 dollars; telegraph, 776,219 dollars. The outstanding bonded debt was paid off in 1911.

The Federal Government has large dry docks and naval dépôt at Bremerton, on Puget Sound. Garrisons of the regular army are maintained at Spokane, Seattle, Vancouver, and three coast defence points at the entrance to Puget Sound and one at Bremerton Navy Yard.

Production and Industry.—Agriculture is successfully pursued in the State, not least in the arid region east of the Cascade Mountains, where there are extensive systems of irrigation.

In 1920 there were 66,288 farms with an acreage of 13,244,720, of which 7,129,247 acres or 53.8 per cent. was improved land. The total value of all farm property in 1920 was 1,057,429,848 dollars, and the value of all production 227,212,008 dollars. The wheat yield in 1921 was 54,662,000 bushels; barley, 2,797,000 bushels; oats, 10,500,000 bushels; corn, 2,400,000 bushels. In Pacific coast region, as well as in the eastern counties, fruit of various sorts is produced in vast quantities. On January 1st, 1921, the domestic animals were 284,000 horses, 20,000 mules, 216,000 milch cows, 290,000 other cattle, 645,000 sheep, 267,000 swine. The wool-clip in 1920 amounted to 5,490,000 pounds of wool. The fruit-growing area has doubled within the last two years, and fruit-canning has become an industry in the State. The timber wealth of the State has an area (1917) of 9,942,544 acres.

Coal is mined in large quantities : 3,348,214 tons in 1920. Other mineral products are gold, silver, and copper. The quarries yielded granite, sandstone, marble, and limestone. Cement is produced. Lead and zinc are worked; antimony, arsenic, molybdenum, tungsten, and platinum are found.

In 1914 the manufacturing industries had 3,829 establishments with an aggregate capital of 277,715,262 dollars; they employed 7,734 salaried officials and 67,205 wage-earners; they used raw material costing 131,852,710 dollars, and gave an output valued at 245,326,456 dollars. They are connected chiefly with the products of the forests, agriculture, grazing, fisheries, and mining. The most important industries are given in THE STATESMAN'S YEAR-BOOK for 1916, p. 628.

The railways within the State had, in 1917, 7,412 miles (main track), besides electric railway (1,069 miles in 1918). The principal railways operating in the State are the Northern Pacific Railway Company and subsidiary companies, Great Northern Railway Company, Oregon-Washington Railroad and Navigation Company, the Bellingham and Northern Railway, the Columbia and Puget Sound Railroad Company, the Tacoma Eastern Railroad Company and the Spokane and British Columbia Railroad Company; the Chicago, Milwaukee, and St. Paul Railway; the Union Pacific, and the North Coast Railways each have a terminus at Seattle.

Steamers ply on the Columbia and other rivers. Several lines of steamers sail regularly to ports on the Pacific coast, to Japan and China, the Philippines, and other eastern countries, and to Europe. At the Puget Sound ports the traffic facilities, both railway and shipping, are being multiplied.

In the year ending June 30, 1919, there were in the State 1 mutual savings bank with 19,857 depositors with 19,757,000 dollars to their credit, being 491.36 dollars to each depositor.

There are British Vice-Consuls at Port Townsend, Gray's Harbour, Port Angeles, Seattle and Tacoma.

WEST VIRGINIA

Government.—In 1862, after the State of Virginia had seceded from the Union, the electors of the western portion ratified an ordinance providing for the formation of a new State, which was admitted into the Union on December 31, 1862, under the name of West Virginia, and whose first government began on June 20, 1863.

The Legislature consists of the Senate and the House of Delegates. The right to vote is given to every citizen (with necessary exceptions) 21 years of age and resident in the State one year and in the county sixty days prior to the election. The Senate is composed of 30 members elected for a term of four years in such a manner that half the Senate is renewed biennially. The House of Delegates consists of 94 members elected biennially.

Governor.—E. F. Morgan, 1921–25. (10,000 dollars.)

Secretary of State.—Houston G. Young.

The State is represented in the Federal Congress by two Senators elected by popular vote for 6 years and six Representatives chosen for 2 years, for the election of whom the State is divided into six congressional districts.

For local administration the State is divided into 55 counties. The State Capital is Charleston.

Area, Population, Instruction.—Area, 24,170 square miles, of which 148 square miles is water area. The population, according to the census of 1920, is 1,463,610.

Year	Population		Year	Population	
	Total	Per sq. mile		Total	Per sq. mile
1890	762,794	31·8	1910	1,221,119	50·8
1900	958,800	39·9	1920	1,463,610	60·5

In 1920 the population by sex and race was :—

—	White	Negro	Asiatic	Indian	Total
Male . . .	715,869	47,129	98	4	763,100
Female . . .	661,366	39,216	16	3	700,601
Total . . .	1,377,235	86,345	114	7	1,463,701

Of the total population in 1920, 61,906 were born in foreign countries and of these 3,798 came from Germany, 1,459 from Ireland, 14,147 from Italy, and 3,433 from England. Urban population was 25·2 per cent. of the whole. In 1920 the population of the principal cities was: Wheeling, 56,208; Huntington, 50,177; Charleston, 39,608; Parkersburg, 20,050.

The most numerous denominations are Methodists, Baptists, Roman Catholics, and Presbyterians. Most of the denominations have colleges within the State.

Elementary education is free for all from 6 to 21 years of age, and school attendance for 20 weeks annually is compulsory for all children between the ages of 8 and 14 years. The public or free schools are non-sectarian. A rigid code of moral instruction is enforced, but no sectarian teaching is permitted. In 1920 the 6,956 public elementary schools had 341,977 enrolled pupils and 10,978 teachers, and 172 public high schools had 1,129 teachers and 18,512 pupils in 1920. The 6 public normal schools had 123 teachers and 2,262 students in 1917. Expenditure on education in 1920, 13,142,470 dollars.

The West Virginia University, founded in 1868, at Morgantown offers higher instruction free to all residents of the State, and at nominal fees to those from other States. In 1921 it had 160 instructors and 25 assistants, and 1,976 students (exclusive of summer school and short course students). Bethany College (1841), under the control of the Christian Church, has 27 instructors and 400 students. West Virginia Wesleyan College (1890), a Methodist institution, has 31 instructors and 410 students.

On January 1, 1910, the number of paupers in almshouses was 808, being 66.2 per 100,000 of the population, and in 1920 the number of prisoners in penal institutions was 849.

Finance.—The State Fund revenue and expenditure for the year ending June 30, 1920, were as follows :—

	Dollars
Balance, July 1, 1919	2,218,091
Receipts, 1919-20	19,901,931
Total	22,120,022
Disbursements, 1919-20	19,570,122
Balance, June 30, 1920	2,549,900

The total bonded indebtedness of the State was 13,500,000 dollars on January 1, 1920.

The assessed value of real property in 1921 was 801,235,500 dollars, and of personal property, 424,292,082 dollars, and of public utility property, 354,066,817 dollars.

Production and Industry.—In 1920 the State had 87,289 farms with an area of 9,569,790 acres. The total value of all farm property in 1920 was 496,439,617 dollars. The chief agricultural products in 1921 were wheat, 3,125,000 bushels, Indian corn, 20,128,000 bushels, oats, 4,620,000 bushels, hay, 870,000 tons, and potatoes, 4,080,000 bushels. The area under tobacco was 8,000 acres; the yield amounted to 6,000,000 pounds, valued at 1,440,000 dollars. Apples, peaches, plums, and grapes are grown. On January 1, 1921, the domestic animals were 184,000 horses, 13,000 mules, 245,000 milch cows, 366,000 other cattle, 728,000 sheep, and 425,000 swine. In 1920, the wool-clip from 640,000 sheep produced 3,200,000 pounds of wool.

West Virginia has extensive mining and quarrying industries, besides great resources in petroleum and natural gas. The State ranks second for mineral production in the United States. The coal area extends over 17,280 square miles, and 78,125,000 tons were mined in 1920. The quarries yield sandstone and limestone.

In the State there are important leather industries. According to the census of manufactures of 1914, there were in West Virginia 2,749 manufacturing establishments with an aggregate capital of 175,995,000 dollars, employing 5,716 salaried officials, and 71,078 wage-earners; wages in the year amounted to 43,784,000 dollars. The cost of the raw material used was 110,033,000 dollars, and the value of the output was 193,512,000 dollars. The statistics of the more important industries in 1910 are given in *THE STATESMAN'S YEAR-BOOK* for 1916, p. 632.

In 1917 there were within the State 4,012 miles of railway, besides 660 miles of electric railway track (1919). The more important railway systems are the Pennsylvania, the Baltimore and Ohio, the Chesapeake and Ohio, the Kanawha and Michigan, the Western Maryland, the Coal and Coke, the Norfolk and Western, the Virginian, and the Monongahela Valley. The coal-fields in the west are well opened up by the Ohio and its tributaries, which provide some of the cheapest means of coal carriage in the world.

On June 30, 1920, the amount of savings deposits in the State banks and trust companies was 32,977,166 dollars.

WISCONSIN.

Government.—Wisconsin was admitted into the Union on May 29, 1848. The legislative power is vested in a Senate and Assembly. The Senate consists of 33 members elected for a term of four years, one-half (16 or 17 alternately) of the members being elected each two years. The Assembly consists of 100 members, elected for a term of two years, all of the members being elected at the same time.

All qualified electors in the district to be represented who have resided one year within the State, except members of Congress and office holders under the United States, are eligible to the Legislature. Wisconsin has universal suffrage for all citizens over 21 years of age. There is no property or educational qualification.

Wisconsin is represented in Congress by 2 Senators and 11 Representatives.

Governor.—John J. Blaine, 1921–23 (5,000 dollars).

Secretary of State.—Elmer Hall.

The State Capital is Madison; 1920 census population, 38,878.

Area and Population.—Area, 56,066 square miles, of which 810 square miles is water, exclusive of 2,378 square miles of Lake Superior and 7,500 square miles of Lake Michigan.

Census population on January 1, 1920, 2,631,839.

The population at the date of each of the Federal censuses was:—

Year	White	Coloured	Total	Per square mile
1890	1,680,828	12,502	1,693,330	30.6
1900	2,057,911	11,131	2,069,042	37.4
1910	2,820,555	13,305	2,333,860	42.2
1920	2,616,938	15,129	2,632,067	46.9

In 1920 the population by sex and race was:—

	White	Negro	Asiatic	Indian	Total
Male . . .	1,348,522	2,963	5,231		1,356,718
Female . . .	1,268,416	2,236	4,697		1,275,349
Total . . .	2,616,938	5,201	9,928	9,611	2,632,067

The foreign-born population in 1920 numbered 460,128, of whom 19,331 were Canadian, 10,834 English, 151,250 German, 7,809 Irish, 45,433 Norwegian, 22,896 Swedish, and 11,187 Italian. The Indian Reservations are (1920) 423 square miles in extent and have a population of 10,319 Indians.

According to the census of January 1, 1920, the population of the cities was as follows:—

Cities	Pop.	Cities	Pop.	Cities	Pop.
Milwaukee . .	457,147	Sheboygan . .	30,955	Janesville . .	18,293
Racine . . .	58,593	Lacrosse . . .	30,363	Manitowoc . .	17,563
Kenosha . . .	40,472	Fond du Lac .	23,427	West Allis . .	13,765
Superior . . .	39,624	Beloit	21,284	Marinette . . .	13,610
Madison . . .	38,378	Eau Claire . .	20,880	Waukesha . . .	12,558
Oshkosh . . .	33,162	Appleton . . .	19,561	Stevens Point .	11,370
Green Bay . .	31,017	Wausau	18,661	Ashland	11,334

Of the total population in 1920, 47.3 per cent. was urban.

The chief religious bodies are: Roman Catholic, Lutheran, Methodist, Congregationalist, Baptist, Presbyterian, Christian Science, Unitarian, and Seventh Day Adventist.

Education.—School attendance is compulsory for all children between the ages of 7 and 14 years, in cities for the entire school year, and in towns and villages for 6 months a year. Where industrial or continuation schools are established, children between 14 and 17 who are regularly employed must attend such schools 8 hours per week. In 1919-20 the elementary schools had 14,122 teachers, and 405,467 enrolled pupils, the 373 public high schools had 3,179 teachers and 59,776 pupils. The 9 State normal schools had 347 teachers and 3,773 students.

The University of Wisconsin at Madison was established in 1848. It had, in 1920, 886 professors and instructors and 10,155 (including the summer session of 1919) students. Instruction by correspondence was introduced in 1911, and in 1919-20 gave instruction to 15,554 students. A score of private colleges and academies have from 12 to 80 professors and instructors, with from 150 to 2,000 students.

Expenditure on education in 1919-20, for elementary and secondary schools 21,385,791 dollars; for normal schools, 1,220,885 dollars; and for the University, 3,979,743 dollars.

Charity.—On June 30, 1920, the State had fifteen charitable and penal institutions with inmates as follows: State hospital for the insane, 661; Northern hospital for the insane, 611; school for the deaf, 159; school for the blind, 131; industrial school for boys, 451; State prison, 749; State public school, 257; home for feeble-minded, 1,060; Southern home for feeble-minded and epileptic, 83; State reformatory, 274; State tuberculosis sanatorium, 174; Central State hospital for the insane, 105; Tomahawk Lake Camp (tubercular), 20; industrial school for girls, 239. Total inmate population, June 30, 1920, 4,974, with 2,514 on parole. For the year ending June 30, 1920, the cost of maintenance of the State institutions was 1,951,327 dollars, in addition to which the State paid 690,143 dollars towards the maintenance of county asylums for chronic insane.

Finance.—For the year ended June 30, 1920, the receipts and disbursements of the State Government were to the following amounts:—

	Dollars
Balance June 30, 1919	7,558,647
Receipts for year, 1919-20	52,083,559
Total	59,642,206
Disbursements for year 1919-20	48,047,486
Balance June 30, 1920	11,594,720

On June 30, 1920, the bonded debt of the State amounted to 2,160,291 dollars.

On September 30, 1920, the assessed valuation of all property in the State was 4,570,698,530 dollars, of which 3,565,811,448 was on real estate and 1,004,887,082 on personal property.

Production, Industry, Communications.—Wisconsin is very largely an agricultural State. In 1920 the farms numbered 189,167, with a total area of 22,745,000 acres, of which 13,248,000 acres were improved land. There are over 2,000 new settlers annually. The chief crops are wheat, maize and other cereals, potatoes, sugar-beets, grasses, fruit and tobacco. The yield of maize in 1921 was 97,482,000 bushels; of wheat, 2,812,000 bushels; of oats, 63,958,000 bushels; of barley, 10,642,000 bushels, rye and buckwheat being also grown. The yield of potatoes was 21,420,000 bushels; of hay, 4,136,000 tons. The area under tobacco (1921) was 48,000 acres; the yield was 61,488,000 pounds. Fruits (large and small) are extensively cultivated. On January 1, 1921, the live-stock consisted of 674,000 horses, 3,000 mules, 1,828,000 milch cows, 1,478,000 other cattle, 632,000 sheep, and 2,236,000 swine. The wool-clip in 1920 amounted to 3,360,000 pounds of wool.

Zinc is the chief mineral product. Others are iron ore, pig-iron, granite, limestone and sandstone, natural rock cement, graphite, and mineral waters.

In 1914, when the last industrial census was taken, Wisconsin was the tenth state in the value of manufactured products. At that time there were 9,104 manufacturing establishments, with 194,310 wage earners, 754,287,000 dollars capital employed, 112,193,000 dollars paid in wages and 417,415,000 for materials. The value of the manufactured product was 695,172,000.

On Jan. 1, 1921, there were 23,000 employers under the Workmen's Compensation Act, with 400,000 employees, while the value of the manufactured product in 1920 exceeded 1,700,000,000 dollars.

The statistics of the leading industries of the State during 1910 are given in THE STATESMAN'S YEAR-BOOK for 1916, p. 635.

At the lake ports the shipments consist of grain and flour, coal, lumber, ore and (at Manitowoc, Milwaukee, Racine and Shetoygan) manufactured articles. There is, besides, at Milwaukee, a heavy passenger traffic.

In 1918 there were 7,775 miles of railroads operated in the State besides 847 miles of electric railway track. The leading railway lines are the Chicago and North-western, the Chicago, Milwaukee and St. Paul, the Chicago, St. Paul, Minneapolis and Omaha and Minneapolis, St. Paul and Sault Ste. Marie. In 1919 there were 494 telephone companies with 144,097 miles of wire and 338,110 subscribers.

There are in the State 77,280 miles of road of all classes, of which 20,000 miles are improved by gravel, macadam, or other surface. There are 7,500 miles on the State trunk highway system on which from 7,000,000 to 10,000,000 dollars is spent annually for permanent construction.

On Jan. 1, 1921, there were 147 national banks with 22,495,000 dollars capital and 9,894,000 surplus, with 355,627,000 dollars in resources. On November 15, 1920, there were 836 State banks with 32,070,700 dollars capital, 11,251,654 dollars surplus, and 520,502,972 dollars in resources.

WYOMING.

Government.—Wyoming was admitted into the Union on July 10, 1890. The Legislature consists of a Senate of 25 members, elected for four years (about one-half retiring every two years), and a House of Representatives of 54 members elected for two years.

The suffrage extends to all citizens, male and female, who can read, and who are registered as voters and have resided in the State one year and in the county 60 days next preceding the election.

Governor.—Robert D. Carey, 1921–1925 (6,000 dollars).

Secretary of State.—William E. Chaplin.

The capital is Cheyenne.

Area, Population, Instruction.—Area, 97,914 square miles, of which 320 square miles is water. Of the total, about 3,300 square miles are comprised within the Yellowstone National Park, which since 1872 has been reserved for public uses.

Census population on January 1, 1920, 194,402.

The Federal census results since 1890 show the population to have been as follows:—

Years	Population	Per sq. mile	Years	Population	Per sq. mile
1890	62,555	0·6	1910	145,965	1·5
1900	92,531	0·9	1920	194,402	2·0

In 1920 the population according to sex and race was:—

—	White	Negro	Asiatic	Indian	Total
Male	107,501	863	1,330	715	110,359
Female. . . .	82,645	512	258	623	84,043
Total	190,146	1,375	1,538	1,343	194,402

In 1915 the foreign-born population numbered 23,575. In 1920 the foreign-born population numbered 25,255, of whom 2,292 were Germans, 2,505 English, 1,438 Canadians, 1,236 Greek, 956 Irish, 1,948 Italians, 1,439 Scotch, and 2,042 Swedish.

The Indian Reservation within the State has (1920) an area of 2,901 square miles, and a population of 1,748.

Of the total population in 1920, 29·5 per cent. was urban. The largest towns are Cheyenne (capital) with 13,829 inhabitants, according to the census of 1920; Casper, with 11,447; Sheridan, with 9,175; Rock Springs, with 6,456.

The religious bodies with the most numerous membership are the Roman Catholic, Mormon, Protestant Episcopal, Methodists, and Presbyterians.

In October, 1920, the 1,477 public schools had 150 male and 1,800 female teachers, and 43,077 enrolled pupils (21,376 boys and 21,701 girls); the 88 high schools had 282 teachers and 4,476 pupils (1,841 boys and 2,635 girls). Teachers are trained in the normal school which is carried on in connection with the University of Wyoming, at Laramie. This University was founded in 1887 and in 1918-19 had 56 professors and instructors and 913 students. Expenditure on education in the school year 1919-20 was 4,173,828 dollars.

On January 1, 1910, the number of paupers in almshouses was 19, being 13 per 100,000 of the population. The number of prisoners in penal institutions in 1918 was 336; the number of boys in the Industrial Institute was 55.

Finance.—The cash receipts and disbursements of the State (exclusive of trust funds) for the fiscal year ending September 30, 1920, are given as follows:—

	Dollars
Balance, October 1, 1919	2,058,894
Receipts for 1919-20	11,383,652
Total	13,442,546
Disbursements 1919-20	7,963,351
Balance, Sept. 30, 1920	5,479,195

In 1920 the bonded debt amounted to 1,935,000 dollars, and the assessed value of property in the State in 1919 to 298,538,152 dollars.

Production and Industry.—Wyoming is semi-arid and agriculture is carried on by irrigation and by "dry farming." Irrigation is being carried out on a large scale. In 1920 there were 15,611 farms. The total value of all farm property in 1910 was 167,189,081 dollars. Such crops as are grown consist of vegetables, cereals, and fruits. About one half the State is well fitted for grazing and for sheep runs. The wool clip (1920) yielded 28,422,000 pounds of wool. The domestic animals on January 1st, 1921, were 189,000 horses, 80,000 milch cows and 720,000 other cattle, 3,040,000 sheep, and 57,000 swine.

In 1917, 8,366,643 acres in the State were covered with timber. The State has numerous fish hatcheries which stock the streams with trout.

Wyoming is largely a coal producing State. The output of coal in 1920 amounted to 8,928,571 long tons. Other mineral products are copper, gold, and gypsum. The quarries yield limestone and sandstone, besides phosphate rock. The output of petroleum was 16,500,000 barrels in 1920.

Manufactures are mostly confined to production for local consumption. In 1914 (according to Federal census results), the State had 337 industrial establishments; the capital invested in manufacturing industries was 29,270,000 dollars, the wage-earners numbered 2,989, the materials used cost 5,559,000 dollars, and the output amounted to 11,223,000 dollars. The chief manufactured products in 1910 were cars made or repaired, 2,336,678 dollars; lumber and timber products, 751,249 dollars; flour and grist, 746,299 dollars; butter, 268,862 dollars.

Wyoming has no navigable rivers. In 1917, the railways in the State had a length of 1,924 miles, the Union Pacific, the Chicago, Burlington and Quincy, and the Chicago and North-Western railways being the principal lines. There are also 22 miles of electric railway.

The system of stage route transportation is still common.

On June 30, 1919, there were in the State 3 savings banks whose deposits amounted to 1,633,003 dollars, number of depositors, 3,348.

OUTLYING TERRITORIES.

ALASKA.

Government.—Alaska was purchased by the United States from Russia under the treaty of March 30, 1867, the purchase price having been 7,200,000 dollars. The Governor is appointed by the President of the United States for 4 years, and is assisted by a Surveyor-General, who is *ex-officio* Secretary of the Territory, and other officials.

By Act of Congress approved August 24, 1912, Alaska became a Territory, with a legislative assembly consisting of 8 senators and 16 representatives. Congress reserved to itself the right to legislate on certain subjects, so that the Territory is now governed conjointly by Congress at Washington and by its local legislative assembly. The first session of the legislature convened at Juneau, the capital, on March 3, 1913, and continued in session 60 days. Regular sessions are held biennially. Special sessions may be called by the governor.

Governor—Scott C. Bone, 1921–25 (7,000 dollars).

Area and Population.—The area of the territory is 590,884 square miles, and the census population from 1890 to 1920 is shown as follows:—

Year	Population	Per sq. mile	Year	Population	Per sq. mile
1890	32,052	0.05	1910	64,356	0.1
1900	63,592	0.1	1920	54,899	0.1

Of the population in 1900, 30,507 (27,307 male) were white; 29,536 natives (Indians, Eskimo, Aleuts, &c.); 3,116 Chinese; 265 Japanese; 158 Negroes.

In 1910, of the total population, 36,347 were whites, and the others Indian or other coloured. About 20,000 people, employed in mines, canneries, and railway construction, spend a few months a year in Alaska, but these are not included in the enumeration.

The largest town is Juneau, the seat of Government, which had (census of 1920) a population of 3,126; the second largest is Ketchikan with a population of 2,900; other towns are Anchorage, 1,856; Sitka, 1,175; Fairbanks, 1,155; Cordova, 955; Douglas, 919; Peterburg, 879; Nome, 852; Wrangel, 821; and Seward, 652. There are altogether 16 incorporated towns.

Instruction, Justice.—In Alaska many religious missions are at work, representing very diverse denominations: Russian Orthodox, Roman Catholic, Episcopalian, Presbyterian, Methodist, Baptist, Congregational and others.

For the fiscal year ended June 30, 1921, there were 67 schools in Alaska with 4,482 enrolled pupils and 165 teachers. Total cost of instruction, 371,535 dollars.

For the administration of justice the territory is constituted as a judicial district with 4 subdivisions and 4 courts.

Finance.—In the territory of Alaska there is no provision for taxation of real or personal property, except in municipalities where real estate and personal property may be taxed 2 per cent. for municipal purposes only. The

revenues are derived from licenses to conduct businesses, a long list of which, with the cost of the respective licences, is prescribed by law.

For the year ended December 31, 1920, the revenue and expenditure were as follows:—

	Dollars.
Balance January 1, 1920	414,343
Receipts, 1920	571,943
Total	986,286
Disbursements, 1920	670,114
Balance December 31, 1920	316,172

The Territory has no funded debt.

Production, Industry.—In some parts of the territory the climate during the brief summer is not unsuitable for agricultural operations. There are agricultural experimental stations which are giving valuable demonstrations. In 1910 there were 222 farms with a total area of 42,544 acres, of which 2,659 acres was improved land. Total value of all farm property in 1910 was 1,468,402 dollars. Reindeer have been introduced from Siberia, and the industry is thriving. There are now about 210,000 reindeer in the country.

There are considerable timber resources, mostly of the spruce, hemlock and red and yellow cedar sort. The National forests in Alaska (June 30, 1920) had an area of 20,579,740 acres. In 1919 there were 147 industrial establishments, employing a total of 77,316 persons (6,575 wage-earners), having a capital of 64,949,000 dollars. The pulp manufacturing industry is becoming established, spruce being suitable for the purpose and abounding in large quantities.

The chief industries are seal and salmon fisheries, and mining. The sea fisheries of the Pribilof Islands are under the charge of the Federal Department of Commerce. In 1921 the seal herd contained 552,718 animals.

The salmon fisheries are very valuable, and Government has provided for their preservation by securing legislative enactments for the construction and maintenance of hatcheries. The catch of salmon in 1920 totalled 65,080,539 (58,172,665 in 1919), and was valued at 36,641,836 dollars. In 1920 there were 146 salmon canneries, employing 24,423 men. The capital invested was 62,550,727 dollars. Halibut, cod, herring, and whales are also caught, the herring and whales for the manufacture of oil and manure. In the fisheries in 1920 there were employed 27,482 persons, 639 vessels and 7,587 boats. Total value of fish products in 1920, 41,492,124 dollars.

Gold is worked in South-East Alaska, where a low-grade ore is found; in the interior on the Yukon river; and at Nome and other places on the west coast. The output of gold in 1920 was 380,034 fine ounces, valued at 7,856,000 dollars; of silver 792,751 fine ounces, valued at 804,745 dollars; and of copper, 71,000,000 pounds, valued at 12,960,106 dollars. From 1880, when gold first began to be mined in Alaska, until 1920, 15,419,956 fine ounces have been produced, valued at 310,800,234 dollars. Tin ore deposits near Cape Prince of Wales are of a high grade; lead is produced; coal is worked; petroleum, gypsum, and marble are found. Total value of mineral output in 1919, 19,620,913 dollars; in 1920, 23,308,757 dollars.

Commerce and Communications.—The value of the domestic merchandise shipped from the United States to Alaska in the year ending December 31, 1920, amounted to 38,418,473 dollars, and from Alaska to the United States 69,911,422 dollars, besides gold ore and bullion. In the calendar year 1920, 1,191 vessels of 450,034 tons entered the ports of Alaska in domestic trade, and 1,620 of 467,300 tons cleared. The chief ports of shipment of the United States to Alaska are on Puget Sound.

There is a railway of 112 miles from Skagway to the town of White Horse (in the Canadian Yukon region); thence transport is by coach or, in summer, by steamer. The Copper River and North Western Railway completed its line (standard gauge) from Cordova to Kennecott, a distance of 197 miles, in 1911. In 1915 the route for the Alaska railroad was decided upon, to run from Seward to Fairbanks, a distance of 471 miles (509 miles with branches). Of this 431 miles are already being used. The Alaskan towns are connected with the United States and with Canada by telegraph. There are about 131 post-offices and good mail services in the territory.

HAWAII

The Hawaiian Islands lie in the North Pacific Ocean, between 18° 54' and 20° 14' north latitude, and 154° 48' and 160° 13' west longitude. They are about 2,020 miles south-west of San Francisco, and are in the line of steamer travel between Victoria, B.C., and Australia and New Zealand.

Government.—The Hawaiian or Sandwich Islands formed during the greater part of the nineteenth century an independent kingdom, but in 1893 the reigning Queen, Liliuokalani (died November 11, 1917), was deposed and a provisional government formed; in 1894 a Republic was proclaimed, and in accordance with a resolution of Congress of July 7, 1898, the Islands were on August 12, 1898, formally annexed to the United States. On June 14, 1900, they were constituted as the Territory of Hawaii. The Organic Act has since been amended several times. There is a Legislature of two Houses, a Senate of 15 members elected for four years, and a House of Representatives of 30 members elected for two years. Sessions, limited to 60 days, are held biennially. The Governor and Secretary are appointed for four years by the President of the United States.

AREA AND POPULATION—RELIGION, INSTRUCTION, ETC. 653

Governor.—W. R. Farrington, 1921–1925 (10,000 dollars).

Secretary.—Raymond C. Brown.

The Territory is represented in Congress by a delegate elected biennially.

Area and Population.—The total area of the islands is 6,449 square miles. The principal islands of the group are Hawaii, 4,015; Maui, 728; Oahu, 598; Kauai, 547; Molokai, 261; Lanai, 139; Niihau, 97; Kahoolawe, 69. According to the census taken on April 15, 1910, the total population of the islands numbered 191,909, an increase of 37,908, or 24.61 per cent. since 1900. The average number of persons to the square mile in 1910 was 29.75. The Capital, Honolulu, in the Island of Oahu, had 83,327 inhabitants on January 1, 1920.

Population on January 1, 1920 (U.S. Census), 255,912.

The estimated number of Hawaiians on June 30, 1921, was 21,907, and 17,847 part-Hawaiians. There are estimated to be 22,378 Chinese, 114,879 Japanese, 25,257 Portuguese, 23,971 Filipinos, 5,491 Porto Ricans, 1,848 Spanish, 37,409 Americans, British, German, and Russian, 5,327 Korean, 570 all others. Total estimated, 275,884.

Religion and Instruction.—Nearly all the natives are Christians. There is an Anglican bishop at Honolulu; also a Roman Catholic bishop, and ministers of various denominations.

Elementary education has always been free. The language in general use in schools is English. In 1920, there were 174 public schools with 1,362 teachers and 41,151 enrolled pupils; also 59 private schools with 402 teachers and 7,573 enrolled pupils. Of the pupils in public schools in 1920, 7,850 were Hawaiian or part-Hawaiian, 5,251 Portuguese, 24,965 Asiatics, 1,236 Anglo-Saxon. In Hawaii there are, besides, a normal and training school, a reformatory industrial school for boys and one for girls; also a Territorial University.

Justice.—Hawaii has a supreme court, circuit courts, district courts and a land registration court. The circuit judges sit also as juvenile courts. The judges of the supreme and circuit courts are appointed by the United States President; the district magistrates by the Chief Justice of Hawaii. There is also a United States District Court, the judges of which are appointed by the President.

Finance, Defence.—Revenue is derived mainly from taxation of real and personal property, income and inheritance taxes, licences, land sales and leases, waterworks and road, school and poll taxes. For the year ending June 30, 1921, the receipts and disbursements were to the following amounts:—

	Dollars	Dollars
Balance June 30, 1920	3,177,147	
Receipts, 1920–21	9,553,450	
Transfers from other accounts	598,547	
		13,329,144
Expenditures	8,338,041	
Transfers to other accounts	598,546	
		8,936,587
Net cash, June 30, 1921		4,392,557

On June 30, 1921, the bonded debt amounted to 12,600,000 dollars. In 1921 the assessed value of property was 286,557,532 dollars, a decrease of 419,260 dollars over the previous year.

On June 30, 1921, the Hawaiian National Guard contained 1,050 men, and 39 officers. The Federal Government, with a view to the protection of the Pacific coast and the control of the Panama Canal, has expended money for the construction of extensive military works at Pearl Harbour, about 7 miles from Honolulu, and at Honolulu and other places on the island of Oahu. The dry dock at Pearl Harbour (Oahu) naval station was officially opened on August 21, 1919.

Production and Commerce.—The islands are to a great extent mountainous and volcanic, but the soil is highly fertile and productive. In 1920 there were 5,284 farms with an acreage of 2,702,245, of which 435,242 acres were improved land. Total value of all farm property in 1920 was 151,129,085 dollars. Sugar and pine-apples are the staple industries, while coffee, honey, hides, sisal, bananas, rice, wool, tobacco, and cotton are also exported. In 1920 the sugar exported amounted to nearly 600,000 tons. The sugar plantations are extensively supplied with irrigation canals. The forest reserves in the Territory now number 47, aggregating 817,109 acres, and other reserves are contemplated. At the close of the year there were 984 domestic corporations in operation, with a total capital of 207,034,998 dollars.

For the year ended March 31, 1921, the imports amounted to 90,301,260 dollars, and the exports to 180,720,242 dollars. The shipments of merchandise from the United States to Hawaii for the year ending June 30, 1921, amounted to 77,739,381 dollars, and those from Hawaii to the United States to 177,173,234 dollars, of which 144,517,041 dollars was for sugar, 28,527,603 dollars for fruits, 424,381 dollars for coffee, and 259,769 dollars for rice. The imports from the United Kingdom in the same period totalled 265,191 dollars, and the exports to the United Kingdom, 928,312 dollars.

Shipping and Communications.—The harbour of Honolulu has been enlarged and dredged to a depth that will admit the largest steamers afloat. At Hilo Bay, on the east side of Hawaii Island, the construction of a breakwater has now been completed, Hilo being an important place for the shipment of sugar. At Kahului, the principal port on the Island of Maui, the construction of a breakwater has been completed and dredging of the harbour has been finished. Many lighthouses have been constructed in recent years.

Several lines of steamers connect the islands with the United States, Canada, Australia, the Philippines, China, and Japan. In the fiscal year ending June 30, 1921, 1,001 vessels of 6,008,689 tons entered ports of the islands. An inter-island steam navigation company with 12 small steamers provides communication between the different islands. There are about 969 miles of railway in the islands, including 667 miles of plantation railways. There are telephones on the islands of Oahu, Maui, Hawaii, Kauai, and Molokai. Honolulu is lighted by electricity and has lines of electric tramways. Wireless telegraphy is in operation between the islands for commercial purposes and for communication with vessels at sea and with the Pacific coast, and also with Japan. Hawaii is connected by cable with both shores of the Pacific.

British Consul for the Territory of Hawaii.—W. M. Royds.

PORTO RICO.

Government.—Porto Rico, by the treaty of December 10, 1898, was ceded by Spain to the United States. Its constitution is determined by the 'Organic Act' of Congress (1917), known as the 'Jones Act,' the main features of which are the granting of American Citizenship to the people of Porto Rico, the separation of the legislative and executive functions, extension of the appointive judiciary system and an elective senate. Porto Rico has representative government, the franchise being restricted to citizens of the United States twenty-one years of age or over, residence (one year) and such additional qualifications as may be prescribed by the Legislature of Porto Rico, but no property qualification may be imposed. The executive power resides in a Governor appointed by the President of the United States. The legislative functions are vested in a legislature which consists of two elective houses: the Senate, composed of 19 members (2 from each of the 7 senatorial districts and 5 senators at large), and the House of Representatives, composed of 39 members (1 from each of the 35 representative districts and 4 elected at large). Porto Rico is represented in Congress by a Resident Commissioner to the United States elected by the people for a term of four years.

There are six heads of departments, who form a Council to the Governor, known as the Executive Council. The essential features of the United States civil service have been incorporated into a local law by the Legislature. The judiciary comprises an Attorney General and staff and a United States court appointed by the President; a Supreme Court of 5 members also appointed by the President; 8 District Courts appointed by the Governor; and 36 municipal courts, the judges and officials of which, as well as the 55 justices of the peace, are appointed by the Governor.

Governor.—E. Mont Reily (10,000 dollars).

Executive Secretary.—Ramón Siaca Pacheco.

Area, Population and Instruction.—The Island has an area of 3,606 square miles. The population in 1920 was 1,299,809 or 377.8 per sq. mile. During the decade elapsed since the census of 1910, the total population increased by 16.3 per cent. The distribution of the population according to colour, in 1920, was as follows:—White, 948,709; black, 49,246; mulatto, 301,816; Chinese, 32; Japanese, 4; all other (Philippino and Hindu), 2. The corresponding figures for 1910 were: White, 732,555; black, 50,245; mulatto, 335,192; Chinese, 12; Japanese, 8. During the decade the white population increased by 29.5 per cent., while the black population decreased by 2 per cent., and the mulatto by 10 per cent.

Chief towns, San Juan, 70,707 inhabitants (1920); Ponce, 41,561; Mayaguez, 19,069. Of the working population, 63 per cent. are engaged in agriculture, fisheries, and mining; 21 per cent. in domestic and personal service; 8 per cent. in manufacturing industries; 8 per cent. in trade and transportation. In 1920 the percentage of illiteracy was 55.0.

In 1899 the school system was reorganised and education was made compulsory. In 1920 there were 3,166 class-rooms in 1,911 school-buildings, with 193,269 pupils enrolled; and a well-distributed system of night schools and kindergartens. There are also a number of private schools. The University of Porto Rico, established in Rio Piedras, 7 miles from San Juan, is open to both men and women.

Finance.—Revenues are derived from customs and excise, from the general property tax, a collateral inheritance tax, taxes on incomes, on insurance companies and from various licences and fees. Receipts and disbursements for the year ending June 30, 1921:—

	Dollars.
Balance, July 1, 1920	1,056,414
Receipts, 1920-21	11,849,638
Total	12,906,052
Disbursements, 1920-21	11,551,654
Balance, July 1, 1921	1,354,398

The assessed value of property on June 30, 1920, was 286,461,677 dollars. The total outstanding bonded indebtedness is 12,146,000 dollars.

The police force consists of about 700 men, and the military force of about 3,000.

Production, Industry and Commerce.—The cultivated land in 1920 was divided into 41,078 holdings, having a total area of 2,022,404 acres, of which 1,303,547 acres was improved land. Total value of all farm property in 1920 was 151,283,818 dollars. The chief products of the island are sugar, tobacco, coffee, pineapples, grape fruit, oranges, and other tropical fruits, sea island cotton, textile fibres, bat guano, phosphate, and vegetables, and the principal industries are manufactures of cigars, cigarettes, hats, embroideries, drawn-work, &c. Sugar crops for 3 years: 1919, 406,002 tons; 1920, 435,070 tons; 1921, 490,000 tons. Sugar exported in 1921 amounted to 403,407 tons, valued at 72,440,924 dollars, being over 60 per cent. of all products exported. In 1921, 152,323,916 cigars and 780,962 cigarettes were exported. Over 14,000,000 pounds of leaf and scrap tobacco, valued at 13,568,249 dollars, were exported in 1921. Coffee decreased from 32,776,754 pounds, valued at 9,034,028 dollars in 1920, to 26,731,648 pounds, valued at 5,352,924 dollars, in 1921. Orange exports amounted to

447,426 dollars; fresh pineapples to 574,640 dollars; canned pineapples to 99,247 dollars; grape fruit, a comparatively new product (7,586 dollars in 1907), amounted to 2,019,557 dollars, while coconuts amounted to 690,895 dollars. In 1920 there were 619 industrial establishments in Porto Rico, employing 18,454 persons (15,985 wage-earners), having a total capital of 84,151,310 dollars, with an output valued at 85,506,834 dollars. There is no established mining enterprise, but gold, silver, iron, copper, bismuth, tin, mercury, platinum and nickel are found in the island. There are very productive salt works.

In 1921 the imports into Porto Rico amounted to 105,479,703 dollars; the domestic exports to foreign countries amounted to 8,890,348 dollars. Shipments of United States merchandise to Porto Rico, 97,074,399 dollars; of foreign merchandise 8,405,304 dollars. Shipments from Porto Rico to United States, value 103,388,227 dollars.

Shipping and Communications.—In 1920-21, 1,936 American and foreign vessels of 5,347,723 tons entered Porto Rico from the United States and foreign countries. The harbour of San Juan, the chief port, and naval station proper, is being improved to have an entrance 600 yards wide and 30 feet deep.

There are over 1,100 miles of road in the Island, and about 339 miles of railway. The railway system connects towns on the west coast and now almost encircles the Island, and penetrates the interior. A line is operated from Rio Piedras to Caguas inland. Extensions of existing lines are being undertaken, and a new line across the Island, with many branches, is projected. There are 1,848 miles of postal (government) telephone and telegraph wire. There are 91 post offices, and 67 telegraph stations.

The Porto Rican island of Vieques, 13 miles to the east, is about 21 miles long and 6 miles broad, and has about 10,000 inhabitants, who grow sugar and rear cattle. Like Porto Rico, the island of Vieques is fertile and healthy.

The island of Culebra, between Porto Rico and St. Thomas, has a good harbour.

Acting British Consul.—Arthur H. Noble.

VIRGIN ISLANDS OF THE UNITED STATES.

Government.—The Virgin Islands of the United States, formerly known as the Danish West Indies, were purchased by the United States from Denmark, for 25,000,000 dollars, in a treaty ratified by Denmark December 22, 1916, ratified by the President of the United States January 16,

1917, and proclaimed January 25, 1917. Under an Act of Congress, approved March 3, 1917, known as the Organic Act, all military, civil, and judicial powers necessary to govern the islands were vested in a Governor, appointed by the President of the United States, by and with the advice of the Senate; and all laws, in so far as compatible with the changed sovereignty, as set forth in the Danish code of laws dated April 6, 1906, were continued in force and effect until Congress shall provide otherwise. Tax and Customs laws were likewise to remain in effect. Danish citizens residing in the islands at the time the treaty was entered into were permitted to retain their Danish citizenship by making declaration before a court of record to preserve such citizenship, in default of which they were held to have renounced it, and to have accepted citizenship in the United States. The islands comprise two municipalities, viz.: the Municipality of St. Thomas and St. John, and the Municipality of St. Croix. The legislative functions are vested in the Colonial Council of each Municipality, that of St. Croix being composed of 13 members elected by popular elections and of 5 members appointed by the Governor; and that of St. Thomas and St. John consisting of 11 elected members and 4 appointed by the Governor. The members serve for 4 years. The right of franchise is vested in every man of unblemished character who has resided in the islands for 5 years, who has attained the age of 25 years, and has an income of at least 1,500 francs a year.

There are six heads of Departments, who, with naval aides, form the Governor's cabinet. These comprise the Government Secretary's Office, the Departments of Health, Judiciary, Public Works, Education, Supply, Police and Fire, located in St. Thomas. The Despatching Secretary is the Government's representative in St. Croix. There is one judge in each municipality, as well as a Government Attorney.

Governor.—Summer E. W. Kittelle.

Government Secretary.—Lieutenant C. C. Timmons, Supply Corps, U.S. Navy.

Area, Population and Instruction.—The Virgin Islands group comprises in the main the Islands of St. Thomas, St. Croix, and St. John. The total area is 132 square miles and the population, according to the census of November 1, 1917, 26,051. The acreage of the islands, respectively, is 18,080, 53,913, and 12,780. They lie about 60 miles due east of Porto Rico, between the Atlantic Ocean and Caribbean Sea. The populations, respectively, are 10,191, 14,901, and 959. The islands contain 3 towns—Charlotte Amalie, on the island of St. Thomas, with a population of 7,747; and Christiansted and Frederiksted, on the island of St. Croix, with populations of 4,574 and 3,144 respectively. Education is compulsory. In St. Thomas there are 8 public and 7 private and parochial schools, 1,884 pupils and 61 teachers; and in St. John there are 4 public schools with an enrolment of 144 pupils and 9 teachers. In St. Croix there are 9 public schools and 7 private and parochial schools. Total enrolment, 2,108 with 68 teachers. Junior high schools have been established in all of the three towns, and night schools opened in Christiansted and Frederiksted. Manual training schools will be established in the near future.

Finance.—Revenues are derived from customs, income tax, ground and building tax, trade tax, &c. Estimated revenues for fiscal year ending June 30, 1921: 1,409,868 francs. The annual deficit in the operation of the government is met by appropriations by the Congress of the United States. Danish currency is legal tender.

Production and Industry.—The farms on the islands extend to 69,892 acres. Of the 430 farms, 102 were worked by white farmers and 270 by negroes. There are 85 industrial establishments in the islands. St. Thomas is the leading port in the Virgin Islands with coaling and oil-fuelling stations. The Island of St. John is noted for its bay oil, and St. Thomas for the finished product of bay rum. St. Croix's chief industries are agricultural—mainly cane-raising and cattle. A stock farm and a tobacco-stripping factory have recently been established in St. Thomas.

Communication.—The Quebec Steamship Co. maintains a regular fortnightly passenger and freight service from New York to St. Thomas, St. Croix and lower islands. The Clyde Steamship Co. (Raporel Line) operates a semi-monthly freight service from New York to St. Thomas, St. Croix and Leeward Islands. The New York and Porto Rico Steamship Co. and the Red "D" line operate regular service from New York to San Juan, Porto Rico, whence schooner service may be had to ports in the Virgin Islands. Each Municipality has a post office and a cable office and telephone systems. The Naval Station, St. Thomas, operates a powerful radio station.

PHILIPPINE ISLANDS.

These islands, ceded by Spain to the United States by the treaty of peace concluded between the United States and Spain on April 11, 1899, form the largest island group of the Malay Archipelago, and extend almost due north and south from Formosa to Borneo and the Moluccas, embracing an extent of 16° of latitude and 9° of longitude.

Governor-General.—Major-General Wood, appointed February, 1921.

Government.—The government of the Philippine Islands is administered through three separate and co-ordinate departments, namely, the executive, the legislative, and the judicial.

The Governor-General is the chief executive of the Islands, and represents the sovereign power of the United States. He is appointed by the President of the United States, by and with the advice and consent of the Senate. Under him are the secretaries of six executive departments, the Department of the Interior, the Department of Public Instruction, the Department of Finance, the Department of Justice, the Department of Agriculture and Natural Resources, and the Department of Commerce and Communications. With the exception of the Vice-Governor, who is appointed in the same way as the Governor-General, and who at the same time is Secretary of Public Instruction, all the secretaries are Filipinos.

The Philippine legislative body is made up of two houses, the Senate and the House of Representatives. There are in all ninety-one representatives and twenty-four senators, representing the forty-eight provinces of the archipelago, all of whom are elected by popular vote, with the exception of nine representatives and two senators, who are appointed by the Governor-General to represent Agusan, Bukidnon, Cotabato, Davao, Lanao, Zamboanga, Sulu, Nueva Viscaya, and the Mountain Provinces.

A Council of State, created by Executive Order subsequent to the enactment of the present Organic Act, commonly known as the Jones Law, forms the connecting link between the executive and the legislative branches of the insular government, and represents the people's counsel in the administration of the government. The Council of State is composed of the Governor-

General, as President, the Presidents of both houses of the Legislature, and the Secretaries of the Departments.

The provincial and municipal governments are supervised by the Department of the Interior through the Executive Bureau and the Bureau of Non-Christian Tribes, the former exercising authority over the thirty-six regular organised provinces, and the latter over the twelve so-called special provinces. The chief executive of each province is a provincial governor. He and two other members form the provincial board, which constitutes the legislative branch of the provincial government. All these three offices are filled by popular vote, while in the special provinces, with the exception of Mindoro, Palawan, and Batanes, the provincial governors are appointed officials. The municipal president is the chief executive of each town or municipality, and the local legislative branch consists of a municipal council of from eight to eighteen councillors, depending upon the size of the municipality. The president, the vice-president, and the councillors are all elected by popular vote.

Area and Population.—The group is composed of 7,083 islands, of which 2,441 are named and 4,642 are not. The total area is 114,400 square miles. The eleven most important islands are Luzon, with an area of 40,814 square miles; Mindanao, 36,906 square miles; Samar, 5,124 square miles; Negros, 4,903 square miles; Palawan, 4,500 square miles; Panay, 4,448 square miles; Mindoro, 3,794 square miles; Leyte, 2,799 square miles; Cebu, 1,695 square miles; Bohol, 1,534 square miles; and Masbate, 1,255 square miles.

The total population, according to the Philippine Census of 1918, is 10,350,730, chiefly of Malay race, 91·5 per cent. of whom are Christians, and only 886,999, or 8·5 per cent., are Moros and Pagans, though these are fast taking advantage of the all-pervading system of public schools. The population of Manila, the capital and the leading commercial and industrial centre, is 283,613, of whom 257,356 are Filipinos, 17,856 Chinese, 1,611 Japanese, 3,124 Americans, 1,955 Spaniards, 635 English, 236 Germans, 160 French, 95 Swiss, and the rest of other nationalities.

Other towns with their estimated present population, including suburbs, are: Iloilo on Panay, 48,000; Cebu on Cebu, 46,000; Laoag, 46,000; Albay, 43,000; Vigan, 18,000; Naga, 12,000 (all on Luzon); and Zamboanga on Mindanao, 30,000. Baguio, in the Mountain Province, is the summer capital, corresponding to Simla in India.

Justice and Defence.—For the administration of justice there are: A supreme court, with a chief justice (a Filipino) and eight associate justices (three Filipinos); 26 judicial districts, each with a judge of first instance, except the ninth district, which has four judges, the same covering the city of Manila, the municipal courts of Manila and Baguio. There is also one justice of the peace and one auxiliary justice for each organised municipality and for such other towns or places as may be determined by resolution of the Philippine Senate.

Public order is maintained through the municipal police and the Philippines Constabulary. The strength of the Constabulary at the close of 1918 was 360 officers and 5,708 enlisted men, distributed throughout the Archipelago. The United States maintains in the Philippine Islands a force of about 5,600 troops of the U.S. Army, and about 8,700 Philippine Scouts.

In March, 1917, an Act was passed to establish a militia which should consist of every able-bodied male citizen of the Philippine Islands between the ages of 18 and 45.

Religion.—The dominant religion of the islands is the Roman Catholic (7,815,242 adherents). In 1901 an independent Filipino Church was founded. The religious dogmas promulgated and followed by this new sect are practically identical with those observed by the Church of Rome. The Independent Filipino Church has 1,361,740 followers. Several Protestant denominations have extensive organisations and have many communicants (118,845). The inhabitants of Mindanao and Sulu are to a large extent Mohammedans, and there are pagan tribes (now numbering about 300,000) in some of the more remote regions.

Education.—Education in the Philippines is free, secular, and co-educational, its principal aim being the spread of literacy on the basis of a common language, the English. In 1919–20 there was an annual enrolment of 791,626 pupils in the public schools. The annual expenditure on education is about 5,000,000 dollars. A number of special schools, some particularly intended for the benefit of the non-Christian populations, are maintained by the insular Government. For higher education there is the State-supported University of the Philippines; the total number of students in 1918–19 was 1,341 in the collegiate departments and 1,972 in the other departments. There are also 262 private schools of all grades, with a total of 28,838 pupils and 1,229 teachers. The University of Santo Tomas, founded in 1611, is conducted by the Dominican order.

On December 31, 1917, there were 21 newspapers and periodicals published in English, 15 in English-Spanish 22 in Spanish, 9 in Spanish-native dialects, 25 in native dialects, 2 in Chinese, 3 in English-native dialects, and 1 in English-Spanish-native dialects.

Finance.—The revenues and expenditures of the central government for six fiscal years were:—

—	1916	1917	1918	1919	1920 ¹	1921 ¹
	Dollars	Dollars	Dollars	Dollars	Dollars	Dollars
Revenues	22,852,427	83,007,493	98,387,749	78,019,153	73,694,016	84,289,932
Expenditure	20,453,406	70,073,314	91,890,064	55,215,272	57,210,230	83,549,778

¹ Estimated.

The total debt service in 1921 amounted to 3,459,281 dollars.

Production and Industry.—The principal products are rice, Manila hemp, coconut, sugar cane, corn, tobacco and maguey. The total area cultivated to these crops during 1919–20 was 7,513,305 acres, the largest single crop being rice (3,453,847 acres). The total production of rice in 1919–20 was 2,533,623,664 litres.

Agriculture is still in a somewhat primitive condition, although rapid steps are being made in its improvement, through different branches of the government. Modern sugar centrals have been installed in the largest sugar producing regions. The abacá (Manila hemp) industry has been greatly benefited through a government system of inspection and grading. A fibre grading law has been in force since January, 1915, by which the grades of Philippine fibres, especially abacá and maguey, have been standardised. Nine large modern coconut oil factories are in successful operation.

The Islands possess about 40,000 square miles of forests furnishing chiefly

timber, but also gums and resins, great quantities of rattan and bamboo, tan and dye barks and dye woods.

The Philippines is rich in mineral wealth, as shown by the reports of new discoveries of mineral deposits. The most important mineral deposits found in the Islands are gold, iron, silver, copper, and coal. Other minerals of non-metallic nature capable of great development are clay, stone, limestone, lime, asbestos, gypsum, gas, petroleum, sulphur, asphalt, alum, manganese, gems and precious stones, salt, and mineral waters.

On account of the abundance of suitable local materials for hat-making and the excellent prices offered for Philippine hats, the manufacture of hats is a profitable industry. In 1919, 540,332 hats, valued at 1,470,026 pesos, were exported, chiefly to the United States, United Kingdom, Italy, and France. Philippine hats are made from native materials, such as bamboo, buri, sabutan, and pandan.

Commerce.—The values of imports and exports for fiscal years ending June 30 are stated as follows in U.S. dollars:—

	1916	1917	1918	1919	1920
Imports .	45,973,625	51,983,278	83,763,290	107,774,000	149,438,213
Exports .	61,464,031	71,715,375	114,576,393	113,118,000	151,123,856

In the calendar year ending December 31, 1919, the commerce was mainly distributed as follows:—

Country	Imports (Pesos)	Exports (Pesos)	Country	Imports (Pesos)	Exports (Pesos)
United States .	150,982,829	113,305,384	Switzerland .	1,266,707	81,213
Hawaii . . .	4,057,758	526,437	Belgium . . .	113	915,277
Guam	14,848	183,286	Germany . . .	733,822	—
Japan	23,218,231	14,066,855	Canada	51,426	430,013
United Kingdom .	5,081,506	32,029,743	Japanese China .	198,711	247,020
China	14,310,425	7,574,430	Italy	111,050	226,054
Netherlands . .	209,245	17,003,786	British Africa .	138,303	7,094
Hong Kong . . .	486,550	14,396,440	Norway	36,810	800
France	3,170,845	8,252,953	Denmark . . .	36,667	—
Australasia . .	9,055,765	1,613,089	Austria-Hungary	391	—
French E. Indies	8,028,757	2,427,675	Sweden	11	—
Spain	1,872,254	7,855,881	Other countries	43,964	801,131
Dutch E. Indies	7,690,649	551,379			
British E. Indies	3,994,714	3,597,378			
Siam	2,495,633	141,834	Total	237,278,104	226,235,652

Shipping and Communications.—The greatest bulk of overseas shipments is made from the port of Manila, although other smaller port also have direct connections with foreign ports. The most important of these are Iloilo, Cebu, and Zamboanga. More than 400 inter-island vessels are now operated in the coastwise trade of the Philippines. During 1919, 740 foreign vessels, with an aggregate net tonnage of 1,711,981, entered the Islands, while 719 vessels, with an aggregate net tonnage of 1,705,869 were cleared for foreign ports.

On December 31, 1917, there were in operation, 818 post-offices, 318 money-order offices, 5,471 miles of insular telegraph lines, and 986 miles of

cable, with 315 telegraph and cable offices. At the same time there were 388 postal savings banks in operation, with 68,860 accounts. The amount of deposits in the banks on December 31, 1917, was 4,242,179 pesos (Philippine currency). Of the depositors 60,795 were Filipinos.

When the United States entered the islands in 1898 there was but a single line of narrow gauge track running between Manila and Dagupan, a distance of about 120 miles. Additions have been made to this until the total length of lines in operation at the close of the calendar year, 1920, was 778 miles. The lines are owned by two companies, the Manila Railroad Company, now taken over by the Government, and by the Philippine Railway Company, which the Government is about to take over. Total length of roads (December 31, 1920), 6,200 miles. Besides the foregoing roads there were 1,941 miles of trails passable for horses only.

Banking and Coinage.—There are eight banks doing business in the Islands: the International Banking Corporation, Hong-Kong and Shanghai Banking Corporation, Chartered Bank of India, Australia, and China, the Bank of the Philippine Islands, formerly the Banco Español Filipino, the Philippine National Bank, the Yokohama Specie Bank, the Pangasinan Bank, and the Monte de Piedad. The Philippine National Bank was inaugurated, under a special charter granted by the Philippine Legislature, on May 2, 1916, with an authorised capital of 10,000,000 dollars, of which 5,050,000 dollars was subscribed by the Government. On July 1, 1916, the Bank was declared the sole Government depository.

The coins used in the Philippine Islands are of the following denominations: Peso, one-half peso, peseta (20 centavos), media peseta (10 centavos), five centavo, one centavo, and one-half centavo. Treasury certificates and bank notes are issued in one, two, five, ten, twenty, fifty, one-hundred, two-hundred, and five-hundred peso denominations. The Philippine peso is equivalent to fifty cents. of the United States money. The maintenance of the parity of the peso with the gold is provided for by the Currency Reserve Fund Act of May 6, 1918. The new peso now coined contains twenty grams of silver, .800 fine; the fifty-centavo piece contains ten grams of silver, .750 fine; the twenty-centavo piece, four grams of silver, .750 fine; and the ten-centavo piece, two grams of silver, .750 fine. The Philippine coins have been until lately coined in the United States, but recently the Mint of the Philippine Islands, located in Manila, was established for this purpose.

British Consul-General.—Thomas Harrington.

Vice-Consul at Iloilo.—Harold Walford.

Vice-Consul at Cebu.—Guy Walford.

GUAM.

The Island of Guam, situated at the southern extremity of the Mariana Archipelago, in latitude 13° 26' N, longitude 144° 43' E, is the largest island of that group. It was ceded by Spain to the United States by the Treaty of Paris (December 10, 1898). It is under the jurisdiction of the Navy Department of the United States, and has been designated as a Naval Station for the purposes of government and protection. A garrison of marines and a shore naval force are maintained here. Guam is a saluting port.

The length of the island is 32 miles, the breadth from 4 to 10 miles and the area about 225 square miles. Agaña, the seat of Government, is

about 8 miles from the anchorage in Apra Harbour. The port of entry is Piti. The number of inhabitants (exclusive of the military establishment) on June 30, 1920, was 14,246, of whom 13,698 were classed as 'natives.' The birth-rate was 43·4, and the death-rate 12·4 per 1,000. The native language is Chamorro, but Spanish and English are also spoken.

The Governor of the island, a naval officer appointed by the President, takes precedence over and is entitled to the honours due to an Admiral. The Governor is also the Military Commander of the island, Commandant of the naval station, and combines the functions of the executive, legislative and judicial power of the Government. The judiciary system comprises one police court, an Island Court, a Court of Equity, a Higher Court of Equity, and one Court of Appeal. The Spanish Colonial laws, modified when necessary by executive general orders of the Governor, are still in force.

Elementary education is compulsory. There are 2,239 pupils registered, 1,894 of whom are of school age (7 to 12). English, handicrafts and agriculture are taught.

There is a Government radio station on the island, which is in cable telegraphic communication with all parts of the world. There is a monthly mail service per west bound U.S. army and navy transports, from San Francisco, via Honolulu, and to Manila.

The port is closed to foreign vessels of war and commerce except in special cases. Permission to visit the island must be obtained of the Navy Department in each case.

The products of the island are maize, copra, rice, sweet potatoes, coffee, cocoa, and sugar, besides valuable timber. There are about 4,000 head of cattle, including 900 water buffaloes. The imports into the island in the year ending June 30, 1920, amounted to 408,263 dollars, and the exports to 34,132 dollars.

The official currency is that of the United States.

Governor.—I. C. Wettengel, Captain U.S. Navy (appointed May 27, 1920).

SAMOAN ISLANDS.

(AMERICAN SAMOA.)

The Dutch were the first to visit the Samoan Islands, in 1722; French explorers followed in 1768 and 1787. In 1791 a British war vessel visited the islands.

The history of American Samoa commenced in the year 1872 when the harbour of Pago Pago, in Tutuila, was ceded to the United States for a naval and coaling station. In 1878 this cession was confirmed and rights of freedom of trade and extra-territorial jurisdiction in Samoa were granted. On June 14, 1889, the conference between the representatives of the United States, Germany, and Great Britain was held at Berlin, resulting in the treaty recognising the Samoan Islands as neutral territory, with an independent government, the natives being allowed to follow their own laws and customs, while for civil and criminal causes, in which foreigners were concerned, there was established a Supreme Court of Justice, in which an American citizen was the presiding judge. This arrangement continued till 1898, when disturbances regarding the right of succession to the office of king arose. In 1899 the kingship was

abolished, and, by the Tripartite Treaty of November 14 of that year, accepted in February 13, 1900, by the United States, Great Britain and Germany renounced in favour of the United States all rights over the island of Tutuila and the other islands of the Samoan group east of 171 degrees of longitude west of Greenwich, the islands to the west of that meridian being assigned to Germany.

The Island of Tutuila, 70 miles from Apia, has an area of about 77 square miles, with a population of 6,185 (3,166 males and 3,019 females), according to the 1920 census. Tau and the other islets (Ofu and Olosega) of the Manua group have a united area of about 25 square miles with a population of 1,873 (926 males and 947 females). According to the 1920 census American Samoa thus contained 8,324 inhabitants (including 266 Europeans of the United States Naval Service) on January 1, 1920 (4,092 males and 3,966 females). Tutuila is mountainous, luxuriantly wooded and fertile. The harbour at Pagopago, which penetrates the south coast like a fiord, is the only good harbour in Samoa. It is a United States naval station under a Commandant, the Government having acquired there a land area of about 40 acres.

The Commandant is also the Governor of American Samoa by commission from the President of the United States. He appoints officers and frames laws or ordinances, but native customs (not inconsistent with United States laws) are not changed without the consent of the people.

The islands are organised in three political divisions corresponding to the old Samoan political units:—1, the Eastern District of Tutuila, with the islet of Aunu'u; 2, the Western district of Tutuila; and 3, the District of Manua, composed of Tau and the neighbouring islets. In each District there is a native governor, under whom are native chiefs in the counties, these having the control of village chiefs. Judicial power is vested in village courts, in five judicial district courts, and in a high court.

There are no public lands in American Samoa. Nearly all the land is owned by natives. The soil is fertile; the fruits comprise orange, grape fruit, lime, and citron. Copra is abundant and is of excellent quality.

There are four religious missions at work: The London Missionary Society (established in 1830), the Roman Catholic (French) mission, the Mormon mission, and the Wesleyan mission. Besides the sectarian schools, there are eighteen public schools, at all of which the English language is taught. This permits children between the ages of 6 and 14 to attend one of the schools near their village. These schools are maintained by the Island Government.

The natives pay their taxes in cash, on the 15th of December of each year, after the budget for the ensuing year has been prepared and approved. The annual output of copra is approximately 1,500 tons. There is a native guard (Fitaftas) of about 85, including the 22 members of the native band, trained by a drill sergeant and a bandmaster of the U.S. navy. The chief island products, besides copra, are taro, breadfruit, yams, cocoanuts, pineapples, oranges, and bananas. Copra is the only article exported. Imports: 1918, 179,769 dollars; 1919, 182,959 dollars; 1920, 235,293 dollars. Exports: 1918, 178,676 dollars; 1919, 90,421 dollars; 1920, 98,213 dollars.

About 50 miles of public roads have been constructed. There is a United States Naval high-powered radio station located on the island of Tutuila, which has daily communication with New Zealand, Australia, Honolulu, the United States, and the islands of the Pacific. This radio station is open to commercial traffic. The fast mail steamers of the Oceanic Steamship Company touch here on their regular trips between the United States, Hawaii and Australia.

PART THE THIRD

OTHER COUNTRIES

ABYSSINIA.

(ETHIOPIA.)

THE ancient Empire of Abyssinia, or 'Ethiopia,' includes the Kingdoms of Tigré, with Lasta, in the north-east; Amhara, with Gojam, in the west and centre; Shoa in the south; besides territories and dependencies as far as Kaffa in the south and Harar in the south-east, with considerable portions of the Galla and Somali Lands. The following are the provinces into which the country is divided:—(1) Harar and Dependencies; (2) Wollo; (3) Kassa and Magi; (4) Gore; (5) Tigré; (6) Damot and Gojam; (7) Equatorial Provinces; (8) Gondar; (9) Jimma. The whole area is 350,000 sq. miles, with an estimated population of over 8 millions. For treaties relating to the boundaries of Abyssinia see THE STATESMAN'S YEAR-BOOK for 1907, p. 667. An agreement was reached in December, 1907, for the delimitation of the frontier towards British East Africa. The frontier follows the Dawa up to Ursulli, whence it runs mainly westwards, passing the south end of Lake Stephanie, and, after crossing the north-eastern branch of Lake Rudolf, runs mainly northwards and terminates at 6° N. 35° E. This frontier, however, is not yet finally delimited and accepted by the Abyssinians.

Government.

By the convention of Addis Abbaba of October 26, 1896, between Italy and King Menelik, the independence of Abyssinia was recognised.

Under an Agreement signed December 13, 1906, on behalf of Great Britain, France, and Italy, the three Powers undertake to respect and endeavour to preserve the integrity of Abyssinia; to act so that industrial concessions granted in the interest of one of them may not injure the others; to abstain from intervention in Abyssinian internal affairs; to concert together for the safeguarding of their respective interests in territories bordering on Abyssinia; and they make agreements concerning railway construction in Abyssinia and equal treatment in trade and transit for their nationals.

After the overthrow of Theodore, King of Amhara, by the British in 1868, the suzerain power passed to Prince Kassai of Tigré, who assumed the old title of Nigusa Nagasth ('King of Kings'), and was crowned in 1872 as Johannes II., Emperor of Ethiopia. After the death of this potentate in 1889, Menelik II., King of Shoa (born 1842), G.C.B., G.C.M.G., became the supreme ruler of Abyssinia. Menelik died in December, 1913, and was succeeded by Lij Yasu, born in 1896, son of his second daughter, Waizeru Shoa Rögga and Ras Mikael, the chief of the Wollo Gallas.

On September 27, 1916, Lij Yasu was deposed by public proclamation, and **Waizeru Zauditu**, another daughter of Menelik, born 1876, was nominated Empress, and Ras **Taffari**, G.C.M.G., proclaimed heir to the throne. The Empress was crowned at Addis Abbaba on February 11, 1917. To a great extent the exercise of power is in the hands of Ras Taffari.

The political institutions are essentially of a feudal character, analogous to those of early mediæval Europe. There is a vague State Council consisting of the most important *rases*, under whom, for administrative purposes, are governors of districts and provinces and chiefs of villages. In August, 1919, Cabinet Government was introduced after over a year's personal administration by the Regent, but has since again fallen into disuse. Slavery is an acknowledged institution.

The Abyssinian Army in the field consists of two main parts. The standing army composes the nucleus, and the remainder of the forces are drawn from the chiefs and their retainers summoned in time of war, a sort of militia. Besides the above, a varying number of irregulars may join the army on the outbreak of war. The standing army, instituted by Menelik, forms in effect the paid standing garrison of each province, and might amount altogether to something under 100,000 men. Both they and the militia amounting to perhaps another 200,000 men, are very loosely organised, and have very little in the shape of transport or modern equipment. Practically every man is armed with a rifle, and often with shield and sword as well.

Population.

The population, which is of Semitic origin, consists of four groups—the Gallas and Somalis, in the south and south-west, the Shoans in the centre, the Tigrians in the north, and the Danákil in the east. The Gallas, who are for the most part Mohammedans, comprise one-half of the entire population, and are a pastoral and agricultural people. The Shoans, who are Christians, number 1,500,000 and furnish the ruling class. Everyone is a soldier, and the present ruler depends upon them to maintain her sovereignty. The Tigrians are a lighter coloured people and show their Semitic descent. They formerly furnished the rulers of Ethiopia. The Danákil are Mohammedans, and on account of the inaccessibility of their country preserve a sort of independence, merely paying an annual sum to the Emperor as a tribute. There are also some Negroes (in the South-West), but their number is being rapidly reduced by slave-raiding, and the Falashas (of Jewish religion), in the N.E. centre with a number of non-natives (Indians, Arabs, Greeks, Armenians, and a few Europeans) in the towns.

Except Harar, and perhaps in the north, there are no towns in Abyssinia in our sense of the word—not even Addis Abbaba, which consists of villages and suburbs scattered round the Palace, and is about three miles in diameter. The most important towns, politically and commercially, are: Gondar, capital of Amhara, 3,000; Adua, capital of Tigré, 5,000; Axum, ancient capital of Ethiopia, and still the seat of the Abuna, 5,000; Antalo, former capital of Tigré, 1,000; Ankober, former capital of Shoa, 2,000; Addis Abbaba, present capital of Abyssinia, and Shoa 40,000–50,000 (with a foreign population of about 1,500, of whom about 1,000 are British Indian and British Arab subjects, Greeks and Armenians); Debra-Tabor (Mount Tabor), Mágdala, and Makallé; Gore, Saiyu, Nekempti, Saméré, 3,000–4,000, and Sokoto, 1,500, important trading centres; Mahdera-Mariam (Mary's Rest), 4,000. The population of Harar is estimated at 50,000, of whom about 300 are Europeans; at Diré Dawa there are a considerable number of Europeans. Gambela, in Western Abyssinia, is a trading station leased to the Sudan Government. It is an important outlet for the trade in the West. A service of steamers is maintained from June to November with Khartum.

Religion and Instruction.

Since the conversion of the Abyssinians to Christianity in the fourth century they have remained members of the Alexandrian Church. The Abuna, or head bishop, is always a Copt, appointed and consecrated by the Coptic Patriarch of Alexandria, but his influence is controlled by the Echehghoh, a native ecclesiastical dignity, who presides over the spirituality, numbering about 100,000 ecclesiastics. Both Copts and Abyssinians are monophysites, rejecting the decrees of the Council of Chalcedon (A.D. 451).

Education has hitherto been restricted to the teaching of the secular and regular clergy, but in October, 1907, an edict was issued enjoining compulsory education on all male children over the age of 12. This is, however, a dead letter. There are schools at Addis Abbaba and Harar. The attendances are most irregular, and the institution is unpopular as yet with the ignorant people.

Justice is administered by the provincial governors, and *shums*, or petty chiefs, with the right of appeal to the Emperor. The legal system is said to be based on the Justinian Code. Foreigners are subject to the jurisdiction of a special mixed court or to their own consular Courts according to circumstances.

Agriculture.

The chief industries are pastoral and agricultural. Cattle, sheep, and goats are numerous. The horses of the country are small but hardy; mules are bred everywhere, being used as pack animals; donkeys are also small and serve for baggage animals. The soil belongs theoretically to the Negus; the idea of landed property scarcely exists among the populace, and agriculture is therefore backward. Cotton, the sugar-cane, date-palm, coffee, and vine might thrive well in many districts, but are nowhere extensively cultivated. The production of Harari coffee (long berry Mocha) is on the increase. Besides this, which is cultivated, there grows more especially in southern and western Abyssinia a wild coffee plant, yielding a berry known as Abyssinian coffee, which grows in extensive forests. The supply is said to be unlimited. The native produce includes hides and skins, barley, millet (*dhurra*), wheat, *gesho* (which serves as a substitute for hops), and tobacco, but not in sufficient quantities for export. Manufacturing industries are also in a backward state. The forests abound in valuable trees and rubber. Iron is abundant in some districts and is manufactured into spears, knives, hatchets, &c. Placer gold mining and washing are carried on in many districts; coal is mined in the Shoa province, but is not of commercial importance; silver, copper, and sulphur have been found.

Commerce.

The principal artery of trade is the French Ethiopian railroad, but caravans also do a large trade in the interior. The chief trade routes besides the railway are the following:—(1) Khartum-Gambella, Khartum-Gallabat, and Khartum-Roseires (Sudan); (2) Mombasa-Nairobi-Moyale (British East Africa); (3) Bulhar-Ogaden (British Somaliland); (4) Massawa-Asmara-Gondar, Assab-Dessie (Italian Eritrea); (5) Mogadishu-Lugh-Dolo-Arusi (Italian Somaliland).

The exports consisted mainly of hides and skins, coffee, wax, ivory, civet, and native butter. The imports comprised grey shirting (*abu jedid*), cotton goods, provisions, liquors, railway material, sugar, and petroleum. The imports are chiefly from England, France, India, Italy, and the United States. The total trade between Abyssinia and Great Britain for 5 years (according to Board of Trade returns) was as follows:—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Abyssinia.	—	—	28,947	8,98	4,600
Exports to Abyssinia	8,883	12,780	10,869	81,886	54,207

Abyssinia has commercial treaties with Great Britain (1897) for 'most favoured nations treatment'; with Italy (1897) terminable on six months' notice; with the United States (1908) for 10 years, then subject to one year's notice; with Germany and Austria-Hungary (1905) for 10 years, then subject to one year's notice; with France (1908) for 10 years, and then subject to a year's notice.

Communications.

Roads in Abyssinia are mere tracks, and transport is effected by means of mules, pack-horses, donkeys, and, in some places, camels. In the capital and its vicinity a few miles of metalled road have been constructed. In 1896 the Franco-Ethiopian Railway Co. was formed for the construction of a line from Jibuti in French Somaliland, which reached the capital in 1917. The line is of metre gauge, with a total length of 495 miles. Trains run twice weekly in each direction, covering the distance in three days, but running by day only. The railway is under French management, and depends financially on a subvention from the French government.

There are telegraph lines (1,056 miles) connecting Addis Abbaba with Harar, with Sidamo, with Jibuti in French Somaliland, and with Massawa in Eritrea. Telephone lines connect Addis Abbaba with Harar, also with Gore and Gambela (in the west), Jimma and Sharada (south-west), Dessie (north), and Debra Tabor and Gojam, and with Ankober, and Asmara with Adua and Barromeida.

Money and Credit.

The Bank of Abyssinia, with authorised capital of 500,000*l.* and paid-up capital of 125,000*l.*, has its head office at Addis Abbaba and agencies at Harar, Diré Dawa, Gore, Gambela and Dessie. By its constitution the Governor of the National Bank of Egypt is its President, and its governing body sits at Cairo. The amount of the bank-note issue on December 31, 1920, was 214,765 dollars, of which 155,215 dollars were in circulation and 59,550 dollars at the bank.

The current coin of Abyssinia is the Maria Theresa dollar, but the Menelik dollar is the standard coin. This coin, the *talari*, or dollar, worth about 2*s.*, weighs 28.075 grammes, .835 fine. It has nominally the same value as the Maria Theresa dollar, but in the capital is disliked, and in some places is not taken at all. Other silver coins are the half, quarter, and sixteenth (girsh or piastre) of a *talari*, and there is also a copper coin, the *besa* (= one-hundredth of a dollar). Various articles, however, are used as medium of exchange; bars of salt are regularly accepted as money all over the country, in two sizes, and at a fluctuating rate according to supply and cost of transport. Cartridges are also currency, although there is a dead-letter edict against them; and in most places barter prevails.

The metric system of weights and measures is used to a certain extent in the capital and district bordering the railway line. The principal native weights and measures, which are also used in trade with foreigners, are as follows:

Weights and Measures.

WEIGHTS.

Oket = weight of Maria Theresa/Menekik dollar = 28,067 grammes, approximately 1 oz. avoirdupois.

Natr = 30 okets, approximately 1 lb. 14 ozs. avoirdupois.

Farasula = 20 natrs, approximately 37½ lbs.

Kantar = 100 lbs.

1 *Waggia* (for ivory) = 480 dollars weight.

1 „ (for rubber) = 640 dollars weight.

LINEAL MEASURES.

Kinnd = French Coudée (length of forearm and hand) = cubit = 50 centimetres = $19\frac{1}{4}$ inches.

Kkalad = 130 kinnds = 65 metres = $213\frac{1}{2}$ feet, say 71 yards.

LAND MEASURE.

The measure is a *Gasha*, which varies according to the quality of the land, and ranges between 15 *kkalads* by 25 *kkalads*, and 7 *kkalads* by 11 *kkalads*, the latter equalling roughly 80 acres.

GRAIN MEASURES.

10 *kounna* = 1 *ladan*.

2 *ladan* = 1 *dawala* = 80 kilos.

MEASURE FOR HONEY AND CIVET.

10 *wanche* (horn cups) = 1 *goundo* = about 3 litres.

CUBIC MEASURE.

Does not exist, the cubic contents of an object being expressed by detailing its length, breadth and height as near as circumstances permit.

LIQUID MEASURES.

These apparently do not exist as Abyssinian measures, the litre being usually adopted.

Diplomatic Representatives.

1. OF ABYSSINIA IN GREAT BRITAIN.

None.

2. OF GREAT BRITAIN IN ABYSSINIA.

Minister.—Claud Russell (appointed Sept. 20, 1920).

Consul.—Major J. H. Dodds, C.M.G.

There is a Consul also at Harar, Gondar, Gore, Mega, and Maji.

AFGHÁNISTÁN.

AFGHÁNISTÁN is a country of Asia lying between parallels 29° and 38° 20' of north latitude, and 61° and 72° of east longitude, with a long narrow strip extending to 75° east longitude (Wákhán). On the north-east, the boundary follows a line running generally westward from a fixed point near one of the peaks of the Sarikol Range to Lake Victoria, thence along the line of that branch of the Oxus which issues from the lake, and so, following the course of the Oxus, to Khamiab. From Khamiab, the line runs in a south-westerly direction to Zulfikár, on the river Hari-Rúd, and thence by Kál-i-Kalla to Hashtadan, thence to the south, between Hashtadan and Siah Koh, north of Bandan, the boundary is undefined. The Sistam lake and the Helmund river form the boundary between Siah Koh and Band-i-Seistan, and thence the boundary runs south in a straight line to Koh-i-Malik Siah, where the frontiers of Persia, Afghánistán and Baluchistan meet. Here the boundary turns round and runs generally eastwardly to the Khwája Amran range. The eastern and southern boundaries of Afghánistán long remained uncertain, but the basis of a delimitation was settled, in 1893, at a conference between the Amir Abdur Rahmán and Sir Mortimer Durand, and the boundary agreed upon, with the exception of the Asmar section, has since been demarcated. The Amir agreed that Chitral, Bajaur and Swát should be included within the British sphere of political influence, while he himself was to retain Asmar and the Kunar valley above it, as far as Arnawai; also the tract of Birmal, west of Waziristán. In the

subsequent demarcation, Káfiristán was included within the countries, under Afghán control, and is garrisoned by the Amír's troops. Between March, 1903, and May, 1905, the boundary towards Persia was demarcated from Koh-i-Malik Siah to the Helmund, and thence to Siah Koh. In July, 1905, Sir Henry McMahon announced his award concerning disputed water rights over the Helmund river, but the award has not yet been ratified by the Persian Government. The Kháibar boundary was demarcated by Mr. J. L. Maffey in 1919.

On November 22, 1921, a treaty between Great Britain and Afghánistán was signed at Kabul, in accordance with which Great Britain recognises the complete independence of Afghánistán, and agrees to an interchange of diplomatic representatives; while Afghánistán accepts the existing Anglo-Afghán frontier as demarcated in 1919. The Afghán government may import munitions of war through India. The treaty is for a period of three years.

For earlier British relations with Afghánistán, see THE STATESMAN'S YEAR-BOOK for 1916, pp. 662-3.

Amanullah Khán, the reigning Amír, the third son of Amír Habiullah Khán by his principal wife, Úlva Hazrat, was born on June 1, 1892, and succeeded on the assassination of his father, February 20, 1919. A son and heir was born to the Amír on June 5, 1921. The Amír has five brothers:—Inayatulla Khán (born Oct. 20, 1888), Hayatulla Khán (born Dec. 29, 1888), Kabirulla Khán (born Oct. 4, 1895), Asadulla Jan (born May 23, 1910), and Obedulla Khan (born Nov. 18, 1915). Uncles of the Amír are:—Aminulla Khán (born Oct. 12, 1885), Muhammad Umar Khán (born Sept. 16, 1889), and Ghulám Ali Khán (born Sept. 3, 1890).

The government of Afghánistán is monarchical under one hereditary prince, whose power varies with his own character, skill, and fortune. The dominions are politically divided into the four provinces of Kábul, Turkistán, Herat, and Kandahár, Badakhshán being now under Turkistán. Each province is under a *hákím* or governor (called Naib-ul-Hukuma), under whom subordinate officials dispense justice and collect taxes. Spoliation, exaction, and embezzlement are not infrequent.

Area and Population.—The extreme breadth of Afghánistán from north-east to south-west is about 700 miles; its length from the Herát frontier to the Kháibar Pass, about 600 miles; the area is about 245,000 square miles. The surrounding countries are, on the north, Russian territory and Bokhara on the west, Persia; on the south, the British Political Agency of Baluchistán and, on the east, the mountain tribes scattered along the north-western frontier of India, and included within the sphere of British influence in the North-Western Frontier Province. There are five larger and two smaller provinces, in addition to the Province of Kábul, each under a Governor, and each possessing its own army.

Population about 6,380,500, the dominant race being the Afghans, of whom the leading tribes are the Durrani and the Ghilzáis, who amount to about 2,200,000 souls; then follow other Afghans, and the Tájiks, Hazáras, and Aimáks, and Uzbaks. The languages spoken are Persian and Pushtoo. The predominant religion is Islam.

The two largest towns are Kabul, the capital (population about 150,000), and Jalálábád. Other large towns are Kandahár (population 31,500) and Herát (population 20,000).

There are nine newspapers published in the country, 4 in Kábul, 2 in Kandahar, 1 in Jalálábád, 1 in Herat, and 1 in Chaharikar.

Justice.—Justice in criminal cases is administered by Government officials, in civil cases by a *Kazi*, or judge, who follows the law of the Koran.

The present Amîr has instituted a Ministry of Justice to supervise the administration of justice. A Code of Criminal Procedure has also been instituted (June 18, 1921).

Finance.—The revenue of Afghânistân is subject to considerable fluctuations. The Government share of the produce recoverable is said to vary from one-third to one-tenth, according to the advantages of irrigation. The total revenue is estimated at between 12 and 13 million rupees, but this estimate is probably too low.

The late Amîr received a subsidy from the Indian Government of Rs. 18,50,000 a year, in accordance with the treaty of 1893. But in accordance with paragraph 3 of the Peace Treaty of August 8, 1919, the arrears of the late Amîr's subsidy have been confiscated and no subsidy is at present being granted to the Amîr.

Defence.—In addition to his regular army the Amîr's military forces are largely supplemented by local levies of horse and foot. The mounted levies are simply the retainers of great chiefs, or of the latter's wealthier vassals. The foot levies are now permanently embodied, and as irregulars form an auxiliary to the regular infantry. The mountain batteries are believed to be serviceable. As engineers, the Hazâra 'sappers,' who are regularly enrolled, are excellent workmen. The Afghân army is said to number 98,000 men, including 18,000 cavalry and 356 guns. The real military strength of Afghânistân lies in the rugged and inhospitable nature of the country, the absence of good roads, and in the capacity and aptitude of its inhabitants for guerilla warfare, which have been greatly enhanced of recent years by the wholesale importation of rifles and ammunition from the Gulf.

Production.—Although the greater part of Afghânistân is more or less mountainous, and a good deal of the country is too dry and rocky for successful cultivation, yet there are many fertile plains and valleys, which, with the assistance of irrigation from small rivers or wells, yield very satisfactory crops of fruit, vegetables, and cereals. There are four classes of cultivators—1st, proprietors, who cultivate their own land; 2nd, tenants, who hire it for a rent in money or for a fixed proportion of the produce; 3rd, *bazgars*, who are the same as the *métayers* in France; and 4th, hired labourers. There are two harvests in the year in most parts of Afghânistân. One of these is sown in the end of autumn and reaped in summer, and consists of wheat, barley, *Ervum Lens*, and *Cicer arietinum*, with some peas and beans. The other harvest is sown in the end of spring and reaped in autumn. It consists of rice, millet, arzna (*Panicum italicum*), Indian corn, &c. The castor-oil plant, madder, and the assafetida plant abound. Fruit, viz. the apple, pear, almond, peach, quince, apricot, plum, cherry, pomegranate, grape, fig, mulberry, is produced in profuse abundance. They form the principal food of a large class of the people throughout the year, both in the fresh and preserved state, and in the latter condition are exported in great quantities.

An extremely curious variety of fat-tailed sheep is native to Afghânistân. It is characterised by the immense weight and size of its tail, caused by development of masses of fat, forming stores of nourishment which are drawn upon during the winter months, when fodder is scarce. These sheep furnish the principal meat diet of the inhabitants, and the grease of the tail is a substitute for butter. The wool and skins not only provide material for warm apparel, but also furnish the country's main article of export.

Northern Afghânistân is reputed to be tolerably rich in copper, and

lead is found in many parts. Iron of excellent quality comes from Bajaur (outside Afghánistán), and the Farmúli district (or Birmal), and a gold mine is being worked under the supervision of a British mining expert at Kandahár; gold in small quantities is also brought from the Laghmán Hills and Kunar. Badakhshán was famous for its precious stones, especially lapis lazuli.

Silks, felts, carpets, articles from camels' and goats' hair, are some of the principal industries. At Kábul, soap, cloth, boots, and some other articles are manufactured for local consumption, but chiefly for the army. The sheepskin coat, or *postén*, manufacture is one of the important industries. The government factories and workshops at Kábul have as their partial object public education in mechanical methods and appliances, and as a feature of such work classes are organised in different industries.

Trade.—No accurate registration of the trade of Afghánistán has yet been obtained. The trans-frontier trade between India and Afghánistán (according to Indian statistics) was as follows in five years ending March 31:

—	1916-17	1917-18	1918-19	1919-20	1920-21
	£	£	£	£	£
Imports into India	1,144,000	1,147,000	1,194,000	1,975,000	1,543,200
Exports into Afghanistan	1,150,000	1,258,000	2,020,000	1,607,000	1,328,500

Of the exports from India to Afghánistán the chief items are cotton goods, indigo and other dyeing materials, sugar, hardware, leather and silver treasure. The imports into India include timber, fruits and vegetables, grain and pulse, ghi and other provisions, asafoetida and other drugs, spices, wool, silk, cattle, hides, and tobacco.

Communications.—Afghánistán is not a member of the International Postal Union, so that the sending of letters or parcels to the country is attended with some uncertainty and inconvenience. Letters, etc., from all parts of the world have to be sent, at present, to the Political Agent, Kháibar, Landi Kotal, who arranges to forward them to the Afghan border. Letters are despatched by runners twice a week; they require three days for delivery. Bulky packages and boxes are forwarded by the Afghan trade agent in Peshawar.

The trade routes of Afghánistán are as follows:—From Persia by Meshed to Herát; from Bokhára by Merv to Herát; from Bokhára by Karshi, Balkh, and Khulm to Kábul; from East Turkistán by Badakhshan and Kandahár to Kábul; from India by the Kháibar road to Kábul; from India by the Gomál Pass to Ghazní and Kelat-i-Ghilzai; from Chaman, the terminus of the North-Western Railway beyond Quetta, to Kandahár and thence to Kábul or Herát.

There are no railways in the country. The Kháibar and Bolan roads are fit for light wheeled traffic as far as Kábul and Kandahár respectively. There is no wheeled carriage, except artillery, proper to the country, and merchandise is still transported on camel or pony back. There are practically no navigable rivers in Afghánistán, and timber is the only article of commerce conveyed by water, floated down stream in rafts. Telephonic communication exists between Dakka, Jalálábád and Kábul, a distance of 136 miles, and between Kábul and Kandahár. A telephone line will, it is understood, shortly be constructed between Kandahár and Herát.

Money and Currency.—The Kabuli rupee is the usual currency, though Government demands are often paid in kind. Currency notes of

local manufacture in denominations of 1, 5, 25, 50, and 100 rupees, were introduced in July, 1920.

The Amír's mint at Kábul was for some years under the supervision of a European. The current coins in Kabul are Dinár, Paísa, Sháhí, Sannár or Misqálí, 'Abbásí, Qarán, Rupee and Tumán. Dinár and Tumán are legendary coins intended for purposes of calculation only. Paísa and Sháhí are copper coins, and Misqálí, 'Abbásí, Qarán and Rupee are silver coins.

10 Dinár	= 1 Paísa or Taka.	1½ 'Abbásí	= 1 Qurán.
5 Paísa	= 1 Sháhí.	2 Qarán	= 1 Rupee.
2 Sháhí	= 1 Sannár, Saddínár or Misqálí	20 Rupees	= 1 Tumán.
2 Sannár	= 1 'Abbási.		

One Kabuli rupee is equal to about eightpence at the normal rate of exchange between Afghánistán and India.

Diplomatic Representatives.

1. OF AFGHÁNISTÁN IN GREAT BRITAIN.

Minister.—Abdul Hadi (appointed January 21, 1922.)

2. OF GREAT BRITAIN IN AFGHÁNISTÁN.

Minister.—Major F. H. Humphreys, C.I.E. (appointed January 21, 1922).

Counsellor.—R. R. Maonachie.

Military Attaché.—Major Fraser.

ALBANIA.

(SKYPANIE.)

THE geographical district known as Albania was made up of the Turkish Provinces of Scutari and of Yanina, and of the parts of the Ottoman vilayets of Kossovo and Monastir,* which bordered upon those Provinces. The Albanians are divided into two principal groups—the Ghegs, who live in the north, and the Tosks, who live in the south.

Little is known of their early history. From 1431, when the Turks captured Yanina, the Albanians remained under Turkish rule, except for two brief periods of independence, first between 1443 and 1477, under the Gheg Chieftain George Castriot, and again in the eighteenth century, under the Tosk, Ali of Tepedelen. In 1880 the short-lived Albanian League was founded, making an unsuccessful effort to obtain independence.

The Albanians have an hereditary aristocracy, and a more or less well-defined feudal system. Whilst in the north they are divided into clans or tribes, in the south the people look for guidance to a system of beys or chiefs, whose power is very considerable. The Albanian language is held by most authorities to be of Aryan origin. The dialects employed in the north and in the south are somewhat different.

The independence of Albania was proclaimed at Valona on November 28, 1912, and on December 20, 1912, the London Ambassadorial Conference agreed to the principle of Albanian autonomy. Subsequently that Conference approximately decided the frontiers of the new country, and agreed that a European Prince be nominated to rule it.* Prince William of Wied, having accepted the crown of the new country from an Albanian deputation, which offered it to him at Neuwied, on February 21, 1914, arrived at Durazzo on March 7, 1914. The Government of the country was vested in the hands of the Prince, supported and advised by an International Commission of Control, the creation of which was agreed to by the Ambassadorial Conference in July, 1913.

After the outbreak of the European war in the latter days of July, 1914, the Prince and nearly all the members of the International Commission left Albania, which fell again into a state of anarchy. An attempt was made by Essad Pasha Topdani, who had been expelled from the country in May but who returned in September, after the departure of the Prince of Wied, to establish a military government with its seat at Durazzo, but the effort failed (October 5, 1914). Disorder continued, and eventually the Austrians overran Albania, capturing San Giovanni di Medua on January 25, 1916, and Durazzo on February 28, 1916. On June 3, 1917, the general in charge of the Italian forces proclaimed Albania an independent country, and a provisional Government was set up at Durazzo. Several cabinets have since ruled the country, the latest being that of Djaffer Ypi, which was formed on December 22, 1921. There is a Diet of 77 members, elected February, 1921. At the head of the State is the Council of Regents, composed of a representative of each of the religious bodies in the country. At the end of December, 1921, the Regents were as follows:

Bektashi Moslem.—Omer Pasha Vriوني.

Sunni Moslem.—Refik Toptani.

Catholic.—Antoine Pistuli.

Greek Church.—Sotir Peci.

Albania was admitted a member of the League of Nations on December 17, 1920.

offices, and has the right of presentation to bishoprics; he is responsible with the Ministry for the acts of the executive; both President and Vice-President must be Roman Catholics, Argentine by birth, and cannot be re-elected, unless a period of six years intervenes.

President of the Republic.—Señor Hipólito Irigoyen. Assumed office, October 12, 1916.

Vice-President.—Señor Dr. Benito Villanueva.

The Ministry, appointed by and acting under the orders of the President, consists of eight Secretaries of State—namely, of the Interior, Foreign Affairs, Finance, War, Justice and Public Instruction, Agriculture, Marine, and Public Works.

The President has a salary of 96,000 dollars paper, and 28,800 dollars paper for official expenses; the Vice-President 36,000 dollars paper as his salary, and 24,000 dollars for official expenses, and each of the eight ministers 39,600 dollars per annum.

LOCAL GOVERNMENT.

The Constitution, with certain small exceptions, is identical with that of the United States. Such matters as affect the Republic as a whole are under the superintendence of the Central Government. The Republic is divided into 14 provinces, 10 territories and 1 federal district (Buenos Aires). The governors of the various provinces are invested with very extensive powers, and in their constitutional functions are independent of the central executive. They are elected by the people of each province for a term varying between three and four years. The provinces elect their own legislatures, and have complete control over their own affairs. The territories are under the supervision of governors appointed by the President. In Buenos Aires municipal government is exercised by a Mayor appointed by the President with the approval of the Senate. He is assisted by a deliberative council elected by tax-paying inhabitants. The deliberative council votes on measures relating to city finance, works, and general administration, and its decisions are carried out by the Mayor. Other municipalities have constitutions of a similar character.

Area and Population.

The Argentine Republic consists of fourteen provinces, ten territories and one federal district, containing the land area and population shown below:—

Federal District, Provinces and Territories ¹	Area: English sq. miles	Population Jan. 1, 1921	Population Census 1914	Pop. per sq. mile 1914
<i>Federal District.</i>				
Buenos Aires (the Federal Capital)	•72	1,676,041	1,575,814	21,886•30
Martin Garcia Island . . .	—	—	783	—

Formosa	41,402	21,880	19,281	0.46
Chaco (Resistencia)	52,741	52,258	46,274	0.87
La Pampa (Santa Rosa) . . .	56,320	124,294	101,338	1.79
Neuquén	40,530	33,574	28,866	0.71
Río Negro (Viedma)	79,805	47,693	42,242	0.52
Chubut (Rawson)	93,427	28,813	23,065	0.24
Santa Cruz (Gallegos)	109,142	11,603	9,948	0.09
Tierra del Fuego (Ushuaia)	8,299	2,559	2,504	0.30
Los Andes (San Antonio de Los Cobres)	34,740	2,671	2,487	0.07
Total	1,153,119	8,698,516	7,885,237	6.83

¹ The Capitals are given in brackets. Where no name appears in brackets, the capital bears the same name as the province or territory.

Of the total in 1914, 4,227,023 were males and 3,658,214 females. Of the population on January 1, 1918, 4,440,367 were males and 3,838,792 females.

The movement of population for four years is given as follows:—

	Marriages	Births	Deaths	Immigrants	Emigrants
1917	41,306	276,355	130,622	51,665	83,996
1918	48,579	271,980	146,775	50,662	59,908
1919	—	—	—	69,879	67,710
1920	—	—	—	188,683	148,907

In the years 1857–1920 the number of immigrants by sea was 5,121,958. By the Constitution of the Republic, all children of foreigners born in the country are Argentine.

Population of the capital, Buenos Aires, on June 1, 1914 (census), was 1,575,814 (on December 31, 1920, it was estimated at 1,674,000); Rosario (Santa Fé), 222,592; Córdoba, 104,894 (on November 30, 1918, 156,000); La Plata, 90,436; Avellaneda, 46,277; Tucumán, 91,216; Bahía Blanca, 44,143; Santa Fé, 59,574; Mendoza, 58,790; Paraná, 36,089; Salta, 28,436;

Lomas de Zamora, 22,231 ; Río Cuarto, 18,421 ; Corrientes, 28,681 ; Quilmes, 19,311 ; Concordia, 20,107 ; Mar del Plata, 27,611 ; Santiago del Estero, 23,479 ; Chivilcoy, 23,241 ; Rosistencia, 8,387 ; Mercedes (San Luis), 18,256 ; Tandil, 15,784 ; Junín, 21,172 ; Bell-ville, 8,732 ; Gualaguaychú, 17,880 ; Pergamino, 20,549 ; San Juan, 16,631 ; Catamarca, 13,262 ; Posadas, 10,128 ; La Rioja, 8,245 ; Jujuy, 7,622.

Religion and Instruction.

There is no State religion, though the Roman Catholic religion is supported by the State ; all other creeds are tolerated and freedom of conscience prevails. There are 1 archbishop (Buenos Aires) and 10 suffragan bishops. For the clergy there are 8 seminaries. In 1888 civil marriage was established in the Republic.

Primary education is free (subsidised by the General and Provincial Governments), secular and compulsory for children from 6 to 14 years of age. Population of school age (1920), 1,756,053, of whom 1,076,045 attended school. Of the total population over 7 years of age, 35·1 per cent. were illiterate. There were (1919) 9,268 primary public schools, 7,801 being public and 1,285 private, with 1,190,231 pupils and 36,615 teachers. The secondary or preparatory education is controlled by the general Government, which maintains 42 national colleges with 11,022 pupils and 1,244 teachers. Side by side with the Government colleges there are also 33 private institutions of the same grade, with 2,959 pupils and 398 teachers. There are 82 normal schools with 14,202 pupils and 1,843 teachers ; 37 for special instruction (commercial, industrial, artistic, also for the blind, &c.) with 11,081 pupils and 1,034 teachers. There are national universities at Córdoba (founded 1613), with 1,603 students in 1920 ; Buenos Aires (founded 1821), with 10,404 students ; La Plata (founded 1905), with 2,979 students ; and the National University of the Litoral, in Rosario (founded in 1920) ; and provincial universities at Santa Fé and Tucumán (founded 1912), and the university of Cuyo (founded in 1921) for the provinces of Mendoza, San Juan and San Luis. There is a well-equipped national observatory at Córdoba, and another at La Plata, museums at Buenos Aires and La Plata, and a national meteorological bureau at Buenos Aires.

For 1920 the Government budgeted for education : 38,798,656 paper dollars on primary education ; 8,274,720 dollars on secondary ; 5,381,424 dollars on technical and commercial education ; 10,931,864 dollars on normal schools, and 7,464,158 dollars on university education ; miscellaneous, 1,034,512 paper dollars ; total, 71,885,335 dollars.

In Argentina there are 520 newspapers published, 493 in Spanish, 4 in Italian, 5 in German, 5 in English, and others in Scandinavian, French, Basque, Russian.

Justice.

Justice is administered by Federal and by Provincial Courts. The former deal only with cases of a national character, or in which different provinces or inhabitants of different provinces are parties. The Federal Courts are the Supreme Courts, with 5 judges at Buenos Aires ; 5 Appeal Courts, one with 5 judges at Buenos Aires, and with 3 each at La Plata, Paraná, Córdoba, and Rosario (Santa Fe), and courts of first instance in each of the provinces and territories. Each province has its own judicial system, with a Supreme Court (generally so-called) and several minor courts. Trial by jury is established by the Constitution for criminal cases, but never practised.

Finance.¹

1918	26,000,459	36,789,515 •	1921 ²	—	43,960,336

¹ All accounts are kept in paper currency, the paper dollar = 1s. 9½d., under conversion law.

² Budget estimate.

The main items of revenue and expenditure in the budget for 1920 were as follows :—

Revenue	Dollars Paper	Expenditure	Dollars Paper
Imports	127,000,000	Congress	15,274,260
Exports	100,000,000	Interior	50,479,426
Tobacco	43,000,000	Foreign Affairs and	
Stamps	28,000,000	Worship	4,941,074
Patents	7,000,000	Finance	18,246,600
Alcohol	12,400,000	Public Debt	124,306,484
		Justice and Education	88,280,385
		Army	44,146,857
		Navy	36,459,120
		Agriculture	10,515,860
		Public Works	14,364,836
		Pensions, &c.	17,641,284
		Public Works	35,516,900
		Subsidies	13,195,968
Total (including all revenue)	459,574,694 (41,779,517½.)	Grand total	459,171,586 (41,742,871½.)

The external debt at the end of 1919 was 625,062,882 paper pesos, and the internal debt was 660,183,109 paper pesos, making a total of 1,285,245,991 paper pesos. The floating debt on December 31, 1921, was 636,817,477 paper pesos.

In 1916 the total wealth of the country was estimated at 32,656 million dollars paper (2,850,920,000½.), including 10,623 million dollars paper the value of agricultural land ; 6,800 million dollars the value of urban land ; 3,375 million dollars the value of the railways ; 3,203 million dollars the value of cattle.

Defence.

ARMY.

The army of the Argentine Republic is a National Militia, service in which is compulsory for all citizens from their 20th to their 45th year. For the first 10 years the men belong to the 'active' army, or first line. After completing 10 years in the first line, the men pass to the National Guard and serve in it for another 10 years, finishing their service with 5 years in the Territorial Guard. The period of continuous service, or training in the ranks, is for 1 year. The reservists can be called out for training periodically.

The territory of the Republic is divided into 5 military districts, each of which provides on mobilisation a complete division of the first line, and also a reserve division, irrespective of the National Guard and Territorial

troops. The strength of the 'active' divisions on mobilisation is about 20,000 men each. The 'active' army comprises:—Infantry, 20 regiments of 2 battalions of 2 companies; 1 railway battalion of 4 companies; 4 independent companies; cavalry, 12 regiments of 3 squadrons; 1 gendarmerie regiment of 3 squadrons; 1 independent squadron and 2 machine-gun squadrons; artillery, 5 regiments field artillery of 2 groups of 2 batteries; 2 groups mountain of 2 batteries; 2 groups of 2 horse batteries; 1 siege battery; engineers, 5 battalions of 4 companies.

The total peace establishment of the army is about 1,750 officers and 18,000 men. There is a trained reserve numbering 300,000 men, of whom 150,000 men are of the first line, and 150,000 of the special reserve. The territorial reserve, the formation of which is not yet complete, numbers 82,000 men.

The weapon of the Argentine infantry is at present the Mauser magazine rifle. The cavalry have a carbine of the same system. The artillery are armed with a Krupp 7.5 cm. Q.F. gun.

The estimated military budget for the year 1921 was 3,000,000*l*.

1894	LIGHT CRUISER Buenos Aires	4,500	—	—	2 8 in., 4 6 in., 6 4.7 in. .	—	17,000	24

* There are also the old cruiser *Nueve de Julio*, and several small gunboats and torpedo gunboats, 7 destroyers, 8 torpedo boats, and some training and miscellaneous craft. The two Dreadnoughts and a few destroyers and other small craft are the only modern units in the Argentine Fleet. The pre-Dreadnoughts have little value. A programme was laid before the Argentine Senate proposing considerable additions to the Fleet, but it has received no effect, and only certain transports have been built.

Naval budget, 1920, 36,459,120 paper pesos.

The personnel of the navy includes 337 officers, 130 engineers, and 27 electrical engineers. The total personnel is about 9,100 men (these numbers include about 5,000 conscripts), who have to serve two years. There is a corps of coast artillery of 450 men, a naval school, a school of mechanics, a school for artillery, and a school for torpedo practice.

Production and Industry.

Argentina has an area of about 699,278,300 acres, of which about 250,000,000 acres may be used for agriculture, 250,000,000 acres for cattle raising, 96,250,000 acres are woodland, and the remainder, 103,028,300 acres, are mountain, lake, river, or arid regions. Of the cultivable portion, about 10,000,000 acres require irrigation. In the territories the Federal Government has wide tracts of land amounting to 237,768,000 acres suitable in general for pastoral colonisation, and these lands are conditionally offered free, or for sale or on lease.

The Argentine census of June 1, 1914, showed 1,074,964 real-estate owners in the Republic, classified as follows:—Argentiniens, 673,409; Italians, 203,500; Spaniards, 104,339; French, 22,105; Uruguayans, 13,973; Russians, 9,687; Austrians, 8,666; Ottomans, 7,709; Swiss, 4,730; Germans, 4,711; English, 4,344; others, 17,791.

The total area under cultivation in 1919-20 was 62,500,000 acres. The area and produce of principal crops are shown as follows:—

	Acreage			Produce (Metric Tons)		
	1918-19	1919-20	1920-21	1918-19	1919-20	1920-21
Wheat . .	17,175,000	15,132,500	15,004,306	4,670,288	5,828,000	5,015,000
Oats . .	3,015,000	1,327,500	2,061,315	490,056	829,000	835,000
Maize . .	9,800,000	8,180,000	—	5,066,150	6,571,000	5,853,000
Flax . .	3,456,625	3,563,000	3,482,817	781,740	1,067,830	1,082,000

The total grain exported for three years, in metric tons, is shown as follows:—

Year	Wheat	Maize	Linseed	Oats
1918	2,996,408	664,683	391,382	542,097
1919	3,286,260	2,485,466	855,455	333,243
1920	5,029,958	4,387,736	1,614,840	410,537

Cotton, sugar, wine, and tobacco are grown. The sugar industry is making great progress. The quantity of sugar manufactured was 126,580 metric tons in 1918, 292,972 metric tons in 1919, and 209,653 in 1920. In 1919 there were 99,876,260 gallons of wine produced in Argentina, and 113,028,630 gallons in 1920.

In 1920 the number of animals within the Republic was estimated at: cattle, 27,392,126 (25,866,763 in 1914); horses, 9,366,455 (8,323,815 in 1914); mules, 565,069; asses, 260,157; sheep, 45,303,419 (43,225,452 in 1914); goats, 4,670,130; pigs, 3,227,346. The Province of Buenos Aires contains over 43 per cent. of the sheep within the Republic.

In the provinces of Buenos Aires, Santa Fé, and Entre Rios, agricultural lands to the extent of 463,000 acres have been acquired by the Jewish Colonisation Association. Of this land 158,000 acres are under cultivation. Some 30,000 square miles of State lands are to be cultivated as follows: in Misiones, 429,057 hectares; in Chaco, 1,453,750 hectares; in Formosa,

822,050 hectares ; in Chubut (Patagonia), 3,397,100 hectares ; in Santa Cruz, 1,540,000 hectares : and in Tierra del Fuego, 5,000 hectares.

In 1920 (the last industrial census) there were 48,779 factories in Argentina, employing a total of 410,201 persons. The total capital was 1,787,662,295 pesos. Chief among these industries were : food production, 18,983 establishments, with capital of 763,772,611 pesos ; clothing and toilet articles, 100,178,372 establishments with a capital of 160,326,029 pesos ; building companies, 8,582 establishments, with a capital of 216,182,262 pesos ; furniture, wheels, &c., 4,441 establishments, with a capital of 62,638,495 pesos ; and metallurgy and related industries, 3,275 establishments, with capital amounting to 107,620,033 pesos.

Mining is of no great importance. Gold, silver, and copper are worked in Catamarca, and gold and copper in San Juan and La Rioja. Gold is also mined in the south-western territories. Coal has been discovered in Santa Cruz. There are no Government statistics as to mineral output, excepting only the output of petroleum at the Comodoro Rivadavia wells, which is as follows : in 1919, 196,190 tons ; in 1920, 243,745 tons ; and in 1921, 277,807 tons.

Shipping and Navigation.

On January 1, 1918, the registered shipping consisted of 183 steamers over 100 tons, of 155,132 tons,

The aggregate movement of vessels at all Argentine ports was as follows :

Years	Entered		Cleared	
	Number of vessels	Tons	Number of vessels	Tons
1917	44,345	16,428,586	44,088	16,446,837

1919	86,356	17,043,869	35,956	16,790,842

Internal Communications.

The first railway concession dates from 1854. In 1857 there were 6 miles of railway. Railways open, January 1, 1921, 22,590 miles, of which 3,816 miles (18 per cent.) belong to the State. The capital invested in Argentine railways amounts to 1,254,795,500 gold dollars. In 1920 Argentine railways transported 82,286,000 passengers, and carried 44,323,000 tons of cargo. Gross receipts were 226,866,000 gold dollars; working expenses, 174,738,000 gold dollars.

Number of post offices in 1920, 3,619 (in 1919, 3,592); number of pieces of mail matter received in 1920, 552,298,654 (475,072,740 in 1919); despatched in 1920, 654,742,971 (538,449,413 in 1919); total, 1920, 1,207,041,625 (1,013,522,153 in 1919). National telegraph lines, 25,167 miles in 1919, provincial railway and private lines bringing the total up to 52,070 miles with 152,644 miles of wire. Number of telegrams despatched, 1920, 7,394,418; number received, 1920, 7,141,448; total, 1920, 14,535,866 (14,167,720 in 1919). Number of telephone offices in Argentina on January 1, 1920, 957; length of line, 25,459 miles.

There are 12 stations for wireless telegraphy. All ships with a crew of over 50 and touching at Argentine ports are compelled by law to be equipped with wireless telegraphy.

In 1912 a bill was passed for the canalization of the Upper Uruguay; the work was to be carried out by Argentina in conjunction with Brazil and Uruguay. A ferry-boat service has also been established between Paraguay and Argentina at Posadas and Encarnacion.

Money and Credit.

The 'Banco de la Nación Argentina,' which was established in 1891 with a capital of 4,400,000*l.*, and which now has a capital of 11,000,000*l.*, has a limited authority to lend money to the National Government, the loans to which must not exceed 20 per cent. of its capital. According to the latest census (1915) there are 143 banks within the Republic, 118 Argentine and 25 foreign. The deposits of the chief commercial banks on December 31, 1920, totalled 10,763,550 gold pesos and 3,505,378,343 pesos currency.

In 1899 a conversion law was approved by Congress fixing the value of the paper dollar at 44 cents gold. On September 30, 1921, the Conversion Office, the Bank of the Argentine Nation, and the Argentine Legations abroad had a stock of 480,600,127 gold pesos. At the same date there were in circulation notes to the value of 1,362,563,974 paper pesos. The gold cover was thus 80.16 per cent. of the paper circulation.

On January 31, 1921, the amount of coined gold in Argentina was 466,476,793 pesos.

On April 5, 1915, a national postal savings bank (Caja Nacional de Ahorro Postal) was incorporated. On December 31, 1920, it had 413,116 depositors with total deposits amounting to 25,600,502 paper dollars.

Money, Weights, and Measures.

The monetary system of the Republic is theoretically on a gold standard the unit being the *peso oro* (gold dollar) which weighs 1.6129 grammes of gold $\frac{9}{10}$ fine. The *Peso* which is divided into 100 *centavos*, is of the value of $4\frac{1}{4}$ s. According to the monetary law of November 5, 1881, five and two-and-a-half gold peso pieces are coined. The 5-dollar gold piece (the *Argentino*) weighs 8.0645 grammes, .900 fine, and therefore contains 7.25805 grammes of fine gold. One pound sterling = 5.04 gold dollars.

Gold is not in circulation. The money in circulation is chiefly paper (*peso papel*). The paper dollar, being convertible at '44 gold dollar is worth 1s. 8½d. (11'45 to the £).

Since January 1, 1887, the use of the French metric system is compulsory.

Diplomatic Representatives.

1. OF THE ARGENTINE REPUBLIC IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary.—Dr. José Evaristo Uriburu. Appointed April 7, 1921.

Counsellors.—Luis H. Dominguez and Paulino Llambi Campbell.

Secretary.—Carlos Miguens.

Naval Attaché.—Leon L. Scasso.

Financial Secretary.—Carlos M. Dominguez.

Consul-General in London.—Dr. Sergio García Uriburu.

There are Consular representatives at Aberdeen, Belfast, Bristol, Cardiff, Dublin, Glasgow, Hull, Liverpool, Manchester, Newcastle, Newport, Southampton, Swansea.

2. OF GREAT BRITAIN IN THE ARGENTINE REPUBLIC.

Envoy and Minister.—Sir James William Ronald Macleay, K.C.M.G. (appointed November 11, 1919)

First Secretary.—E. J. Hope-Vere.

Third Secretary.—H. Dobinson.

Naval Attaché.—Commander Charles L. Backhouse, R.N.

Commercial Secretaries.—Harry O. Chalkley and E. C. Buxton.

Consul-General (at Buenos Aires).—H. W. Wilson, O.B.E.

There is a Consul at Rosario, and Vice-Consuls at Bahia Blanca, La Plata, Tucuman, Santa Fé, and Villa Constitución.

AUSTRIA.

(DIE REPUBLIK ÖSTERREICH.)

Constitution and Government.

The Republic of Austria was proclaimed on November 12, 1918. The Government was taken in hand by a National Assembly which appointed a temporary cabinet and proceeded to pass laws. On February 16, 1919, the National Constitutional Assembly, consisting of only one Chamber, was duly elected on the basis of universal and proportional suffrage, where every Austrian subject, male and female, has a vote if 20 years of age, and is eligible if 29 years of age. On the same basis the elections for the first Parliament were held (October, 1920), and these resulted in the following parties being returned—Christian Socialists, 82; Social Democrats, 66; German Nationalists, 20; Peasants' Party, 6; Workers' Party, 1.

The Constitution, which was adopted October 1, 1920, and came into force on November 10, 1920, provides for a President, chosen by the two Houses assembled for a joint session; his term is for 4 years, and he may be re-elected once only; for an Assembly (*Nationalrat*), elected by popular vote for 4 years; and for a First Chamber (*Bundesrat*), chosen by the Provincial Diets in proportion to their population (at present the members number 46). The powers of the Bundesrat are advisory. Austria is declared to be a Democratic Republic composed of the seven provinces and the city of Vienna. All special privileges are abolished, and equal rights granted to all citizens.

President of the Republic.—Dr. Michael Hainisch. Born 1858. Elected December 9, 1920.

The Ministry, constituted on June 21, 1921, and reconstructed on February 1, 1922, is as follows:—

State Chancellor.—Johann Schober (Administrative Official).

Vice-Chancellor and Minister of Education.—Walter Breisky (Christian Socialist).

Minister of Social Insurance.—Dr. Franz Pauer (Christian Socialist).

Minister of Agriculture and Minister of Foreign Affairs.—Baron Hohen.

Minister of Finance.—Dr. Alfred Gurtler (Christian Socialist).

Minister of Justice.—Dr. Rudolf Paltauf (Administrative Official).

Minister of Commerce and Industry, and Food Controller.—Dr. Alfred Grünberger (Christian Socialist)

Minister of the Interior. The State Chancellor.

Minister of Railways.—Dr. Karl Prosa (Administrative Official).

Minister of Defence.—Major Josef Wächter (Administrative Official).

The national flag consists of three horizontal stripes, the top and bottom being red and the centre white,

LOCAL GOVERNMENT.

The Republic of Austria comprises 8 provinces, viz., Lower Austria, Upper Austria, Salzburg, Styria, Carinthia, Tyrol, Vorarlberg, and the City of Vienna, which holds a special position in regard to local Government. *Burgenland* (Western Hungary) is also to fall to Austria. There is in every province a Provincial Assembly (*Landesversammlung*), consisting likewise of one chamber which is elected on the basis of the same suffrage as the Constitutional National Assembly. The cultivation of the soil, the educational, ecclesiastical, and charitable institutions, as also public works, chiefly fall within the competence of the provinces. At the head of the Provincial Assembly is the Provincial Committee (*Landesausschuss*) elected by the Provincial Assembly.

Every commune has a council to deliberate and decide its affairs, of which the members are mostly elected for 5 years. The council elects from its midst the head of the commune (burgomaster) and a committee for the administration of the affairs and execution of its resolutions. All who are 20 years of age have a vote, while for the passive suffrage the attained age of 24-29 years is required.

Area and Population.

For the boundaries of Austria according to the Treaty of St. Germain, signed on September 10, 1919, see THE STATESMAN'S YEAR-BOOK for 1920, pp. 674-5.

The area and population (census taken on January 31, 1920) of Austria are shown as follows:—

Provinces	Area, English square miles	Population (Census 1920)			Percentage of Population 1920	Population per square mile 1920
		Males	Females	Total		
Vienna	107	851,302	990,024	1,841,326	30·03	17·209
Lower Austria (excl. Vienna) . . .	7,462	709,110	748,225	1,457,335	23·77	195
Upper Austria . . .	4,628	415,920	442,875	858,795	14·01	186
Salzburg	2,763	104,054	110,146	214,200	3·49	78
Styria	6,327	464,744	488,940	953,684	15·55	151
Carinthia ¹	3,684	176,816	189,743	366,559	5·98	100
Tyrol	4,790	149,207	157,097	306,304	5·00	64
Vorarlberg	1,005	64,547	68,665	133,212	2·17	138
Total	30,766	2,935,730	3,195,715	6,131,445	—	199

¹ Including the plebiscite district which on October 13, 1920, decided for adhesion to Austria.

According to the Treaty of Trianon, Hungary should have handed back Burgenland (Western Hungary) to Austria. But the Hungarians at first refused to do so, and eventually an agreement was signed at Venice between Austria and Hungary for a plebiscite to be taken in Oedenburg. This was done on December 17, 1921, and showed that 15,343 votes were cast for Hungary and 8,277 for Austria. The Conference of Ambassadors agreed that Hungary should, on January 1, 1922, take over Oedenburg. The rest of Burgenland goes to Austria.

The area of Western Hungary is 1,684 square miles, with an estimated population of some 345,082.

Compared with the total population in 1910, the total for 1920 shows a loss of 240,079, or 3·8 per cent. The male population has decreased by 205,068 or 6·53 per cent. as compared with 1910.

PRINCIPAL TOWNS.

* The population of the principal towns of Austria on January 31, 1920, was as follows:—Vienna, 1,841,326; Graz, 157,644; Linz, 94,072; Innsbruck, 55,650; Salzburg, 36,749; Wiener Neustadt, 35,362; Klagenfurt, 26,147; St. Pölten, 23,117; Villach, 16,466; Baden, 14,000; and Steyr, 20,227.

In 1919: births, 87,594; marriages, 75,555; deaths, 124,352; divorces, 4,171.

Religion.

Religious liberty is one of the fundamental laws of the Republic, and the principle is embodied in the Treaty of St. Germain (article 63). In 1910 there were 5,979,667 Catholics (94·11 per cent.), 165,007 Protestants (2·60 per cent.), 189,758 Jews (2·99 per cent.), and 19,021 'others' (0·30 per cent.). The Catholic Church has 2 archbishoprics and 4 bishoprics.

Instruction.

The educational organisation of Austria comprises: (1) Elementary schools; (2) middle schools; (3) high schools; (4) schools for special subjects; and (5) universities and colleges.

Attendance is compulsory at the elementary schools from 6 to 14 in Austria generally, but there are far-reaching facilities for exemption for pupils of 12 years and upwards. The cost of elementary education is borne in the first instance by the communes and provinces. In 1919 there were in the Republic 4,761 public and private elementary schools, with 26,929 teachers and 903,218 pupils.

Secondary education is provided in the Gymnasia Realschulen and Mädchenlyzeen (Girls' Middle Schools). These institutions are maintained by the State, the provinces, the towns, or private individuals. Of the first there were (1918-19) 73 with 20,948 pupils; of the second 38 with 14,118 pupils; and of the third 26 with 5,122 pupils.

Austria has three universities maintained by the State, viz., Vienna (in 1918-19, 812 teachers and 10,515 students), Graz (215 teachers and 1,952 students), and Innsbruck (159 teachers and 1510 students); and there are also two technical high schools at Vienna (215 teachers and 4,309 students) and Graz (76 teachers and 840 students).

There are two theological high schools (Fakultäten), of which one is Roman Catholic (at Salzburg) and one Protestant (at Vienna), and 16 other theological colleges, of which 14 are Roman Catholic, 1 Armenian Catholic, and 1 Jewish, with a total of 279 students. In 1919 there were also 35 training colleges for teachers, with 788 lecturers and 4,900 students.

Justice and Crime.

The Supreme Court of Justice (Oberster Gerichtshof) in Vienna is the highest court in the land. Besides there are 3 higher provincial courts (Oberlandesgerichte), 17 provincial and district courts (Landes- und Kreisgerichte), and, in connection with these, the jury courts (Geschworenengerichte) and the Schöffengerichte, which are courts composed of professional and non-professional judges. There are likewise 256 county courts (Bezirksgerichte), and 2 special courts for commercial affairs, 4 for industry, 1 constitutional court, 1 administrative court, and 1 electoral court.

Pauperism.

Funds for poor relief are derived from endowments, voluntary contributions, the third of the property left by intestate secular priests, and certain percentages on the proceeds of voluntary sales. In some provinces the poor funds are augmented from other sources, *e.g.* theatre money (Spectakelgelder), hunting licences, dog certificates, and in some large towns percentages on legacies over a fixed amount. Those who are wholly or partially unfit for work may be provided for in such manner as the commune judges propose. Besides poor-houses and money relief, there exists in many provinces the practice of assigning the poor—in respect of board and lodging—to each of the resident householders in fixed succession (Einlegesystem).

The law for unemployment insurance bears date March 24, 1920. Under the Act one-third of the cost of unemployment insurance is to be borne by the State, and two-thirds by employers and workers. Benefits under the scheme are not granted for more than 12 weeks.

Finance.

The budgets for 1921-22 and 1920-21 provided revenue and expenditure as follows in kronen :—

	1921-22	1920-21
Revenue	93,325,000,000	29,483,312,300
Expenditure	258,229,000,000	70,600,818,900
Deficit	164,904,000,000	41,117,506,600

The following are some of the details of the budgets for 1920-21 and 1921-22 in thousands of kronen :—

Revenue	Thousands of kronen		Expenditure	Thousands of kronen	
	Budget 1920-21	Budget 1921-22		Budget 1920-21	Budget 1921-22
Tax revenue	5,170,569	20,343,700	Interest on debt	8,524,540	9,901,500
Non-tax revenue	9,892,603	83,998,027	Army and Navy	2,076,721	4,787,821
Customs	3,043,650	32,854,000	Railway expenditure	11,651,643	65,483,241
Railways	5,521,589	46,767,339	Telegraphs, tele- phones, Post, and Post Office		
Telegraphs, tele- phones, Post, and Post Office			Savings Bank	978,617	14,712,740
Savings Bank	1,712,157	14,356,887			
Land	232,789	1,500,754			
Deficit	41,117,500	37,770,398			

The share of the Republic of the old debt of Austria-Hungary is not yet definitely fixed. On June 30, 1921, it was estimated at 53,200 million kronen, with an annual interest of 1,918 million kronen. The debt of the new Republic on that date amounted to 116,693 million kronen, with an annual charge of 6,680 million kronen.

Defence.

1. ARMY.

The break-up of the Austro-Hungarian Empire at the end of the war brought with it the collapse of the military system of that country. At the end of 1918 all was in confusion, but towards the end of January, 1919, the Austrian Government created a Defence Force (*Volkwehr*). By August, 1920, the approximate strength of the *Volkwehr* was 34,000 men.

By the terms of the Treaty of St. Germain, universal compulsory military service is abolished in Austria, and the total number of military forces in the Austrian Army is limited to 30,000 men, including officers and depot troops.

Austria is permitted at her own discretion to organise this number of troops either in divisions or in mixed brigades. If the divisional organisation is chosen, the maximum strength of an infantry division is to be 414 officers and 10,780 men, the minimum strength 300 officers and 8,000 men. The maximum strength of a cavalry division is to be 259 officers and 5,380 men, and the minimum 180 officers and 3,650 men.

If the mixed brigade organisation is chosen, the maximum strength of a brigade is to be 198 officers and 5,350 men, and the minimum 140 officers and 4,250 men. The future Austrian Army may therefore be organised into two infantry divisions and one cavalry division at the higher establishment or three infantry divisions and one cavalry at the lower establishment, or into six mixed brigades. The latter organisation has been chosen. The maximum authorised armaments and stocks of munitions are per 1,000 men:—

Rifles or carbines	1,550	500	rounds of ammunition per arm.
Machine guns	15	10,000	" " " "
Trench mortars, light	2	1,000	" " " "
" " medium		500	" " " "
Guns	3	1,000	" " " "
Howitzers			" " " "

All officers must be regulars. Officers now serving retained in the army must serve to the age of 40. Officers newly appointed must serve on the active list for 20 consecutive years.

The period of enlistment for non-commissioned officers and privates must be for a total period of not less than 12 consecutive years, including at least six years with the colours. The proportion of officers and men discharged for any reason before the expiration of their term of enlistment must not exceed one-twentieth of the total strength. All measures of mobilisation are forbidden.

The number of gendarmes, customs officers, foresters, and members of police forces must not exceed the number employed in a similar capacity in 1913. Educational establishments and all sporting and other clubs are forbidden to occupy themselves with any military matters. Within two months of the final ratification of the Treaty the air forces of Austria are to be demobilised. The armed forces of Austria therefore do not include any military or naval air forces. The manufacture, importation, and exportation of aircraft, and parts of aircraft, are forbidden.

In the new army the Government has organised six infantry regiments for Vienna and Lower Austria; six *Alpenjäger* regiments for Upper Austria, Styria, Carinthia, Salzburg, and Tyrol; two infantry battalions for *Burgenland*; one *jäger* battalion for Salzburg; and one *jäger* battalion for Vorarlberg. There are besides six cycle battalions, six squadrons of cavalry, seven artillery and six technical units.

2. NAVY.

As Austria now has no seaboard, the former Austro-Hungarian fleet has ceased to exist. The only war vessels remaining to Austria are four patrol-boats.

Production and Industry.

Agriculture forms the main occupation of the country. In 1920 the total acreage sown amounted to 4,088,196 acres (4,084,267 acres in 1919). Of the total in 1920, 2,126,174 acres were in Lower Austria and 928,744 acres in Upper Austria. The chief products are shown as follows for two years:—

Crop	1920		1921	
	Acreage	Yield (metric tons)	Acreage	Yield (metric tons)
Wheat . . .	370,592	147,623	378,000	211,000
Rye . . .	710,618	255,179	758,060	398,000
Barley . . .	238,859	95,633	267,000	143,000
Oats . . .	626,772	231,871	—	—
Potatoes . .	290,004	669,478	—	—
Turnips . . .	101,559	584,285	—	—

The foodstuffs produced do not suffice for the population. Forests abound and timber forms an appreciable asset of Austria. The number of animals in 1919 were: horses, 243,000; cows, 911,000; oxen, 214,000; bulls, 55,000; and calves, 539,000.

The country has not been deprived of all her minerals; in 1920 the production of lignite was 2,408,865 tons, and of anthracite, 132,864 tons. There were 18 anthracite mines worked in 1920, and 75 lignite mines. The output of iron ore was 435,062 tons in 1920, and of pig iron 100,035 tons. Some copper, zinc, lead, and salt are also produced.

Of important industries, piano-making, the manufacture of motor-cars, and textiles still remain in Austria to a certain extent.

Commerce.

The Austrian official trade returns furnish figures for the weight of the volume of trade but not for its value.

Imports in 1920: 6,061,071 metric tons; exports: 1,317,580 metric tons.

Principal Imports: Grain, flour and rice, 610,450 tons; coal and fuel, 416,447 tons; wines, 101,325 tons; stone and building material, 93,810 tons; raw cotton, 11,972 tons; rubber, 1,350 tons; textiles, 11,900 tons; glass, 16,439 tons; iron goods, 36,175 tons.

Principal Exports: Timber, 360,134 tons; ores, 126,854 tons; fruit, 22,050 tons; sugar-beet, 23,860 tons; paper-goods, 24,428 tons; furniture, 24,400 tons; chemicals, 45,460 tons.

The trade in 1920 was distributed among principal countries as follows:

Country	Imports	Exports	Country	Imports	Exports
	1000 Tons	1000 Tons		1000 Tons	1000 Tons
Czechoslovakia .	2,374	326	Yugo-Slavia .	212	48
Germany . . .	2,220	224	Hun. arv . . .	194	107
Poland . . .	347	51	Great Britain .	14,457	4,825
United States . .	237	20	Switzerland . .	64	98
Italy . . .	216	366			

Recent British statistics of commerce (published by the Board of Trade) show that in the trade between Great Britain and Austria-Hungary the imports for 1921 amounted to 700,859*l.*, and the exports to 1,728,177*l.*

Internal Communications.

The following are railway statistics of Austria in 1920: State lines and private companies' lines worked by the State, 2,670 miles; private companies' lines worked by themselves, 1,268 miles; state lines worked by private companies, 1·3 miles, making a total of 3,940 miles.

Banking and Credit.

According to the Treaty of St. Germain the Austro-Hungarian Bank is to be liquidated. The condition of the Bank as on September 15, 1921, showed that its notes in circulation amounted to 61,322,645,897 kronen, against which it held bullion to the value of 11,837,636 kronen.

Money, Weights and Measures.

The Austrian standard coin (gold) is the krone, which has been coined in denominations of 100, 20, and 10. Of silver coins there were 5, 2, and 1 krone pieces. The krone = 100 heller. Hardly any coins are, however, at present in use; the currency is for the most part paper, including even 20-heller pieces.

Diplomatic Representatives.

1. OF AUSTRIA IN GREAT BRITAIN.

Minister Plenipotentiary.—Georg Franckenstein. Appointed October 6, 1920.

Counsellor of Legation.—Adolf Kunz.

Press Attaché.—Dr. Maximilian Bach.

Attaché.—Walter Braunl.

Delegate of Austrian Clearing House.—Dr. Felix Weiser.

2. OF GREAT BRITAIN IN AUSTRIA.

Minister Plenipotentiary.—The Hon. Aretas Akers-Douglas. Appointed November 25, 1921.

First Secretary.—E. A. Keeling.

Third Secretary.—P. B. B. Nicholls.

Commercial Secretary.—O. S. Phillpotts, O.B.E.

Consul at Vienna.—H. H. Cassells.

BELGIUM.

(ROYAUME DE BELGIQUE.)

Reigning King.

Albert, born April 8, 1875, son of the late Prince Philippe de Saxe-Coburg and Gotha and of Flanders (died November 17, 1905), and of the late Princess Marie de Hohenzollern-Sigmaringen (died Nov. 27, 1912); married Oct. 2, 1900, to Princess *Elizabeth of Bavaria*; succeeded his uncle Leopold II., Dec. 17, 1909.

Children of the King.—(1) Prince *Leopold*, Duke of Brabant, born Nov. 3, 1901. (2) Prince *Charles*, Count of Flanders, born Oct. 10, 1903. (3) Princess *Marie-José*, born Aug. 4, 1906.

Sisters of the King.—(1) Princess *Henriette*, born Nov. 30, 1870; married Feb. 12, 1896, to Prince Emmanuel of Orleans, Duke of Vendôme. (2) Princess *Josephine*, born Oct. 18, 1872; married May 28, 1904, to Prince Charles of Hohenzollern.

Aunt of the King.—Princess *Charlotte*, sister of Leopold II., born June 7, 1840; married July 27, 1857, to Archduke Maximilian of Austria, elected Emperor of Mexico July 10, 1863; widow June 19, 1867.

King Albert has a civil list of 3,300,000 francs.

The Kingdom of Belgium formed itself into an independent State in 1830, having from 1815 been a part of the Netherlands. The secession was decreed on October 4, 1830, by a Provisional Government, established in consequence of a revolution which broke out at Brussels, on August 25, 1830. A National Congress elected Prince Leopold of Saxe-Coburg King of the Belgians on June 4, 1831; he ascended the throne July 21, 1831. On his death in 1865 he was succeeded by his son, Leopold II., who reigned until 1909.

By the Treaty of London, Nov. 15, 1831, the neutrality of Belgium was guaranteed by Austria, Russia, Great Britain and Prussia. It was not until after the signing of the Treaty of London, April 19, 1839, which established peace between King Leopold I. and the King of the Netherlands, that all the States of Europe recognised the Kingdom of Belgium. In the Treaty of Versailles (June 28, 1919), it is stated that as the treaties of 1839 'no longer conform to the requirements of the situation,' these are abrogated and will be replaced by other treaties.

Constitution and Government.

According to the Constitution of 1831 Belgium is 'a constitutional, representative, and hereditary monarchy.' The legislative power is vested in the King, the Senate, and the Chamber of Representatives. The royal succession is in the direct male line in the order of primogeniture. By marriage without the King's consent, however, the right of succession is forfeited, but may be restored by the King with the consent of the two Chambers. No act of the King can have effect unless countersigned by one of his Ministers, who thus becomes responsible for it. The King convokes, prorogues, and dissolves the Chambers. In default of male heirs, the King may nominate his successor with the consent of the Chambers. If the successor be under eighteen years of age, the two Chambers meet together for the purpose of nominating a regent during the minority.

Those sections of the Belgian Constitution which regulate the organisa-

tion of the legislative power were revised in October 1921. For both Senate and Chamber all elections are held on the principle of universal suffrage.

The Senate consists of members elected for four years, partly directly and partly indirectly. The number elected directly is equal to half the number of members of the Chamber of Representatives, and is proportioned to the population of each province. The constituent body is similar to that which elects deputies to the Chamber, except that the minimum age of electors is fixed at twenty-one years. In the election of members both of the Senate and Chamber of Representatives directly, the principle of proportional representation of parties was introduced by Law of December 29, 1899. Senators elected indirectly are chosen by the provincial councils, three for each province on the basis of one for 200,000 inhabitants; and an additional Senator for 125,000 inhabitants over and above the first 200,000. Senators are elected by the Senate itself in the proportion of half of the preceding category (actually twenty). No one, during two years preceding the election, must have been a member of the council appointing him. All senators must be at least forty years of age. Sons of the King, or failing these, Belgian princes of the reigning branch of the Royal Family are by right Senators at the age of eighteen, but have no voice in the deliberations till the age of twenty-five years.

The members of the Chamber of Representatives are all elected directly by the electoral body. Their number at present, 186 (law of May 2, 1912), is proportioned to the population, and cannot exceed one for every 40,000 inhabitants. They sit for four years. Deputies must be not less than twenty-five years of age, and resident in Belgium. Each deputy has an annual indemnity of 12,000 francs, and a free pass all the year over Government and Companies' railways between his residence and the place of Session.

The Senate and Chamber meet annually in the month of November, and must sit for at least forty days; but the King has the power of convoking them on extraordinary occasions, and of dissolving them either simultaneously or separately. In the latter case a new election must take place within forty days, and a meeting of the Chambers within two months. An adjournment cannot be made for a period exceeding one month without the consent of the Chambers. Money bills and bills relating to the contingent for the army originate in the Chamber of Representatives.

Parties in the Chamber 1921 :—Catholics, 80; Socialists, 67; Liberals, 33; miscellaneous, 6.

Parties in the Senate 1921 :—Catholics, 73; Liberals, 28; Socialists, 52.

The Executive Government consists of 12 departments, under the following Ministers (appointed December 14, 1921) :—

Prime Minister and Minister of Finance.—Georges Theunis.

Minister of Economic Affairs.—Aloys Van de Vyvere (Catholic).

Minister of Foreign Affairs.—Henri Jaspar (Catholic).

Minister of Education.—M. Hubert (Liberal).

Minister of Interior.—M. Berryer (Catholic).

Minister of Agriculture and of Public Works.—Baron A. Ruzette (Catholic).

Minister of National Defence.—Albert Devèze (Liberal).

Minister of Justice.—M. Masson (Liberal).

Minister of the Colonies.—Louis Franck (Liberal).

Minister of Industry, Food Supply, and Labour.—M. Moyersoon (Catholic).

Minister of Railways, Marine, Posts and Telegraphs.—Xavier Neujean (Liberal).

Besides the above responsible heads of departments, there are a number of 'Ministres d'État,' without portfolio, called on special occasions by the sovereign.

Local Government.

The provinces and communes (2,638 in 1920) of Belgium have a large amount of autonomous government. The laws governing provincial and communal elections are being altered at present (May, 1921).

In regard to the communal electorate, the law of April 15, 1920, definitely lays it down that all Belgians over 21 years of age without distinction of sex, who have been domiciled for at least six months, have the right to vote. Proportional representation is applied to the communal elections, and communal councils are to be renewed every six years. In each commune there is a college composed of the burgomaster, president, and a certain number of aldermen, corresponding almost to the permanent deputation of the Provincial Council, and both are the organs of the central administration.

Area and Population.

Belgium (including the districts of Eupen and Malmédy) has an area of 30,414 square kilometres, or 11,744 English square miles. The following table shows the population at various dates :—

Census Years	Population	Total Increase	Increase per cent. per annum	Census Years	Population	Total Increase	Increase per cent. per annum
1876	5,336,185	508,352	1·05	1900	6,693,548	624,227	1·03
1880	5,520,009	183,824	0·85	1910	7,423,784	730,236	1·09
1890	6,069,321	549,312	0·99	1920 ¹	7,684,272	260,488	0·26

¹ Estimated.

Area and population of provinces :—

Provinces	Area : Eng. sq. miles	Population		Population per sq. mile, 1920
		Census Dec. 31, 1910	Estimated Dec. 31, 1920	
Antwerp (Anvers)	1,093	968,677	1,060,322	970
Brabant	1,268	1,469,677	1,567,259	1,237
Flanders	West	1,249	874,135	710
	East	1,158	1,120,335	1,056
Hainaut	1,437	1,232,867	1,231,720	857

Eupen and Malmédy ¹	371	—	64,520	173
Total	11,744	7,423,784	7,684,272	670

¹ Ceded to Belgium by the Treaty of Versailles.

In 1910 there were 3,680,790 males and 3,742,994 females, or 98 males for every 100 females. In 1920 there were (excluding Eupen and Malmédy)

3,770,105 males, 3,849,647 females. Of the population in 1910 (exclusive of children under 2 years of age), 2,833,334 spoke French only, 3,220,662 Flemish only, 31,415 German only, 871,288 French and Flemish, 74,993 French and German, 8,652 Flemish and German, and 52,547 spoke all three languages.

Vital statistics for 4 years :—

—	Marriages	Births	Deaths	Increase or decrease of births over deaths
1917	32,974	16,675	124,824	- 38,149
1918	43,558	8,056	157,340	- 72,284
1919	97,084	128,236	112,986	+ 15,250
1920	106,514	163,738	102,303	+ 61,435

Divorces in 1919, 623 ; in 1920, 2,195.

Emigration in 1920, 53,307, of whom 47,857 departed for European countries ; emigration 1921, 56,727. Immigration in 1920, 44,304, of whom 41,568 came from European countries.

The most important towns, with population on December 31, 1920 :—

Brussels and suburbs ¹	684,870	Bruges	54,308	Alost	36,160
Antwerp (Anvers)	333,882	Ostend	48,073	Tournai	35,542
Ghent (Gand)	165,910	Verviers	43,027	St. Nicolas	34,651
Liège	165,117	Louvain	39,450	Namur	32,274
Mechlin (Malines)	60,118	Seraing	36,954	Charleroi	28,864
		Courtrai	36,767	Junet	28,124

¹ The suburbs comprise 8 distinct communes, viz., Anderlecht, Etterbeek, Ixelles, Laeken, Molenbeek St. Jean, St. Gilles, St. Josse-ten-Noode, Schaerbeek.

Religion.

Of the inhabitants professing a religion the majority is Roman Catholic. But no inquisition on the profession or faith is now made at the censuses, and therefore, the last available figures, those of 1891, are the only clue to the numbers of the three dominant faiths. According to these there were :— Protestants and Anglicans 27,900 ; Jews, 13,200. There are, however, statistics concerning the clergy, and according to these there were in 1920 :— Roman Catholic higher clergy 85 ; inferior clergy, 5,946 ; Protestant pastors, 21 ; Jews (rabbis and ministers) 15. The State does not interfere in any way with the internal affairs of either Catholic or Protestant Churches. There is full religious liberty, and part of the income of the ministers of all denominations is paid from the national treasury.

In 1920 there were six Roman Catholic dioceses, 204 deaneries, 3,679 Catholic churches and chapels, 6 large and 11 small seminaries.

The Protestant (Evangelical) Church is under a synod.

Instruction.

Of the four universities Ghent and Liège are State institutions, Brussels and Louvain free. In 1919-20 Brussels had 1,644 students ; Ghent, 1,006 ; Liège, 2,656 ; and Louvain, 2,783.

Attached to the universities were various special technical schools, with 3,034 students in 1919-20. There were also 6 commercial high schools ; the Royal Academy of Fine Arts at Antwerp, a polytechnic at Mons, a state

agricultural institute at Gembloux, a Colonial school at Antwerp, and a state veterinary school at Cureghem, schools of design, and four royal conservatoires at Brussels, Liège, Ghent, and Antwerp. Public schools (Dec. 31), 1920:—23 Royal Athenæums and colleges, with 7,962 pupils; 1 provincial college, with 328 pupils; 4 municipal colleges, with 1,364 pupils; 8 private colleges, with 1,462 pupils. The next grades of schools are the middle-class schools, of which there were 97 with 25,903 male pupils, and 48 with 13,638 female pupils. For elementary education there were 7,959 primary schools, with 960,819 pupils; 3,366 infant schools with 205,418 pupils; and 4,193 adult schools with 174,044 pupils. Of normal schools there are 24 for training secondary teachers and 75 for training elementary teachers.

There are many private or free schools—infant, primary, and adult schools mostly under ecclesiastical care. No statistics are available for these. They are all subject to inspection by the State.

Each commune must have at least one primary school. The cost of primary instruction devolves on the communes, with subsidies from the State and provinces.

The proportion of the population (deduction made of children of less than 8 years), who could not read or write at the census of 1910 was 13·1 per cent.; in 1900 was 19·1 per cent.; in 1890, 25·0 per cent.; in 1880, 30·26 per cent. In 1913, of the 67,396 young men called out for military service, 4,207, or 9·24 per cent., could neither read nor write; in 1900 the corresponding percentage was 10·10; and in 1890, 15·92.

Justice and Crime.

Judges are appointed for life. There is one Court of Cassation, three Courts of Appeal, and Assize Courts for criminal cases. There are 26 judicial districts, each with a Court of first instance. In each of the 227 cantons is a justice and judge of the peace. There are, besides, various special tribunals. There is trial by jury.

Pauperism.

Apart from private charity, the poor are assisted by the communes through the agency of the *bureaux de bienfaisance* whose duty it is to provide outdoor relief, and by the governing bodies of the *hospices civils*. Provisions of a national character have been made for looking after war orphans and men disabled in the war. Certain other establishments, either State or provincial, provide for the needs of deaf-mutes and the blind, and of children who are placed under the control of the courts. Provision is also made for repressing begging and providing shelter for the homeless.

Finance.

Budget estimates for 4 years :—

	1919	1920	1921	1922
	Francs	Francs	Francs	Francs
Revenue . . .	805,345,000	1,819,113,000	4,329,405,000	2,573,178,913
Expenditure . . .	1,105,400,396	2,763,096,000	4,791,970,000	3,468,143,961

The ordinary estimates for 1921 are shown as follows (in thousands of francs) :—

Revenue	1000 Francs	Expenditure	1000 Francs*
Income tax	305,000	Public debt	890,160
Supertax	140,000	National Defence	525,093
Customs	194,965	Education, Arts and Science	261,579
Excise	183,080	Industry and Labour	150,738
Public Domains	304,150	Finance	112,644
Capital Revenues	72,536	Justice	102,574
Repayments	231,103	Public Works	91,616
Special receipts	642,500	Interior	34,688
Total (including all items)	2,101,443	Total (including all items)	2,310,685
Railways, Posts and Tele- phones	1,077,562	Railways, Posts and Tele- phones	1,284,365
Food Supplies	1,150,400	Food Supplies	1,196,920
Grand Total	4,329,405	Grand Total	4,791,970

Extraordinary receipts in 1921 amounted to 26,550,000 francs, (in 1922 to 2,600,000 francs), and extraordinary expenditure to 964,010,893 francs (in 1922 to 886,293,527 francs).

On December 31, 1920, the Belgian public debt amounted to 25,236,941,690 Belgian francs and foreign money calculated at par (29,277,873,049 francs, calculated at the rate of exchange on December 31, 1920). This debt is made up as follows:—*A.* Consolidated Debt: (1) Internal, 7,746,826,938 francs; (2) External, 554,291,377 francs (1,391,885,893 francs at the rate of exchange). *B.* Floating Debt: (1) Internal, 7,536,650,700 francs; (2) External, 601,449,933 francs (1,657,467,661 francs at the rate of exchange); of which 180,323,000 francs (407,013,750 francs) are from British credits; 23,466,705 francs (52,967,574 francs) for the purchase of horses and mules, besides 9,712,500 francs (29,953,125 francs), due to the Government of Canada; and 151,525,290 francs (467,300,485 francs) due to the Government of the United States. *C.* Indirect Debt: 807,724,251 francs. *D.* Claims of 5 p.c. War Losses, 1,187,879,800 francs. *E.* Advances from the Allied Powers since the Armistice, 1,302,118,690 francs (3,449,437,805 francs), of which 191,754,080 francs (432,825,266 francs) are from England, 191,305,866 francs (182,266,664 francs) are from France, and 919,058,743 francs (2,834,355,874 francs) from the United States. *F.* Advances from the National Bank (withdrawal of German money), 5,500,000,000 francs. The debt charge is 1,216,787,601 francs.

Defence.

ARMY.

According to the Military Law passed in 1913, the Belgian Army is recruited by means of annual calls to the Colours and by voluntary enlistments. Military service is compulsory for those called to the Colours.

The occupation of Belgium by the Germans having prevented the normal recruitment of the classes of 1914–1919, a special 1919 class has been formed composed of the young men of those classes, with liberal exemptions for the families of those who have suffered heavily during the war.

The young men of the contingent serve for 15 months in the infantry, fortress artillery and engineers; for 21 months in the field artillery; and for 24 months in the cavalry. With the calling up of the 1920 class a return was made to normal process of recruitment. Service in the reserve, which follows on service in the active army, is for 5 years.

The Law provides for the calling out of the reserve only in the event of war or if the country is threatened. The 11th 12th and 13th Classes are not to be mobilised except in case of absolute necessity and are to be employed in the defence of fortified places and in the non-combatant services. Reservists of the active army are subject to recalls to the Colours of 4, 6, or 8 weeks, according to the branch of the service to which they belong. These recalls take place during the 2nd, 3rd, or 4th year of service.

The strength of the army with the Colours at the end of 1920, was 100,000. Of these 1 infantry division and 1 cavalry regiment formed part of the Allied Army of Occupation on the Rhine.

The field army consists of 6 divisions and of 1 cavalry division. The divisions are composed each of 3 regiments of infantry of 3 battalions, and 4 groups of 3 batteries of field artillery; of 1 regiment of cavalry, divisional cyclists, field telegraph and searchlight units, engineer companies, and a divisional transport corps.

The cavalry division normally consists of 3 brigades of 2 regiments, 2 battalions cyclists, machine gun sections, 1 group horse artillery, field telegraph units, pioneer pontoon cyclists, and a divisional transport corps.

The Grand General Staff, in addition, has at its disposal 1 brigade of 3 regiments of heavy artillery, trench mortars, aviation, aerostation, telegraph bridging equipment, railway and engineer units.

NAVY.

The nucleus of a small force exists in the ex-British sloop *Zinna*, three torpedo boats, and two small submarines abandoned by the Germans at Zeebrugge.

Production and Industry.

I. AGRICULTURE.

In each province there is an official Agricultural Commission, delegates from which, along with specialists, form a supreme council of agriculture.

Of the total area in 1920, 2,945,104 hectares, 1,340,415 are under cultivation, 519,781 under forest, 107,977 fallow or uncultivated, the rest roads, marshes, rivers, &c.

The following figures show the yield of the chief crops for three years:—

Crop	Acreage			Produce in cwts.		
	1913	1919	1920	1913	1919	1920
Wheat . .	398,735	346 685	309,427	8,039,010	5,665,657	5,592,758
Barley . .	85,082	79,315	91,427	1,836,166	1,479,643	1,894,390
Oats . .	679,235	567,573	642,705	13,921,890	7,825,334	9,831,042
Rye . .	648,727	529,513	529,515	11,411,898	7,259,856	9,730,056
Potatoes.	379,677	392,633	370,127	3,200,932 ¹	2,825,544 ¹	2,256,518 ¹
Beet (sugar)	181,047	167,235	132,645	1,391,917 ¹	1,094,937 ¹	1,438,355 ¹
Tobacco .	10,005	17,278	7,152	178,738	313,293	152,917

¹ Tons.

On December 31, 1920, there were 205,152 horses, 1,487,361 horned cattle, and 976,643 pigs.

II. MINING AND METALS AND OTHER INDUSTRIES.

Of the more important industries the following may be mentioned; artificial silk, motor cars, glass, iron and steel, lace (particularly hand-made lace), linen, and gloves.

Coal production (in metric tons):—

Year	Coal	Briquettes	Coke	Workpeople
1915	14,177,500	1,490,100	514,600	124,460
1916	16,862,870	1,935,820	792,350	127,146
1917	14,931,340	981,930	676,040	112,686
1918	13,825,780	1,140,600	522,210	112,767
1919	18,482,880	2,547,890	756,890	136,375
1920	22,413,530	2,922,000	1,800,000	167,924

Number of coal mines in 1920, 125. Number of workers below ground, 110,116; above ground, 49,828; total, 159,944.

The following table summarises the production of iron and steel and crude zinc for 1913, 1919, and 1920, quantities being given in metric tons (1 metric ton = 2,204·6 lbs.):

Products	1913	1919	1920
	Tons	Tons	Tons
Pig-iron	2,484,690	250,570	1,128,318
Wrought iron	304,350	68,895	197,032
Steel	2,466,630	333,560	1,233,952
Wrought steel	1,409,460	214,340	1,071,856
Crude zinc	204,220	19,860	82,960

In 1920 the pig-iron was valued at 564,259,000 francs the wrought-steel at 810,000,000 francs, and the zinc at 149,000,000 francs. In 1920 there were produced 16,040 tons of lead; in 1918, 20,630 tons; in 1919, 4,225 tons.

In 1912 there were 88 sugar manufactories, produce 280,602 tons of raw sugar; 21 refineries, output 119,125 tons; 125 distilleries, output 83,160 kilolitres of alcohol at 50° G.-L. In 1920 there were 56 sugar factories, for which 112,500 acres of beet were sown.

Commerce.

SPECIAL COMMERCE.

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1913	183,345,000	143,073,000	1920	511,544,600	348,099,160
1919	209,831,155	92,017,989	1921	402,057,400	285,893,080

The imports and exports for 1920 were made up as follows:—

	Imports		Ex. ports	
	Metric tons	1000 Francs	Metric tons	1000 Francs
Live animals	36,463	137,673	9,013	50,500

Switzerland	133,713	87,700	353,337	305,253

In 1920 the principal articles imported from Belgium (according to Board of Trade returns) were :—worsted yarn, 3,248,954*l.* ; glass and glass ware, 3,283,675*l.* ; hops, 1,805,927*l.* The principal exports to Belgium were :—oil seed, 305,329*l.* ; soap, 233,798*l.* ; cottons, 4,625,850*l.* ; iron and steel manufactures, 6,328,922*l.*

The total trade between England and Belgium for 5 years was as follows :—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Belgium to U.K.	332,622	200,928	9,240,930	44,925,208	32,957,953
Exports to Belgium from U.K.	235,398	77,317	47,980,507	49,037,764	19,651,917

Shipping and Navigation.

On January 1, 1920, the Belgian merchant fleet was composed of 193 ships, among which were 183 steamers, 2 sailing vessels, and 8 sailing vessels with auxiliary motors. Of these 193 vessels, 186 had their home ports at Antwerp, three at Ostend, two at Bruges, and two at Ghent. Not counting six ships which had not been registered on January 1, 1921, the tonnage of the merchant fleet amounted to 335,201 of which steamers com-

INTERNAL COMMUNICATIONS—MONEY AND CREDIT 711

prised 329,468 tons ; sailing vessels, 2,187 tons (including the school ship *V. Avenir* of 2,074 tons) ; and sailing ships with auxiliary motors, 5,546 tons.

There existed 33 Belgian shipping companies at the beginning of 1921, of which the most important were the Lloyd Royal Belge with 58 ships, the Adolf Deeppe with 23 ships, and the Belgian Maritime Association with 23 ships, which it managed for the account of the Belgian Government.

The navigation at Belgian ports was as follows :—Number of vessels entered, 1919, 4,820 ; tonnage, 5,245,048 ; 1920, 7,698 ; tonnage, 10,852,341. Of the tonnage entering 10,419,051 tons were entered at Antwerp. Number of vessels cleared, 1919, 4,714 ; tonnage, 4,794,423 ; 1920, 7,620.

The vessels entered and cleared in 1920 were as follows :—

Nationality	Entered Number		Cleared Number	
	1919	1920	1919	1920
Belgian	564	949	546	918
British	2,200	4,081	2,160	4,081
Norwegian	—	525	—	518

Internal Communications.

The total length of the roads in Belgium (1919) was as follows :—State roads, 5,187 miles ; provincial roads, 964 miles ; conceded roads, 26 miles ; total, 6,177 miles. The majority of the roads are paved with stone.

The total length of navigable waterways (rivers and canals) in 1919 was 1,231 miles.

The length of railways (1919) :—State lines, 2,759 miles ; private lines, 184 miles ; light railways, 1,706 miles ; total, 4,649 miles. It is proposed to electrify the railway system of the country.

In 1919 the Post Office in Belgium handled 257,087,253 private letters, 50,056,650 official letters, 117,079,755 post-cards, 130,836,628 printed matter, and 168,867,933 newspapers.

On December 31, 1919, there were 1,766 post offices in Belgium. The gross revenue of the Post Office in the year 1919 amounted to 35,259,264 francs, and the expenditure to 39,091,906 francs.

The telegraphs in Belgium carried 18,455,300¹ despatches, private and official, in the year 1919. In 1919 the total length of public telegraph lines was 3,579 miles, and the length of wires 15,160 miles, exclusive of railways and canal telegraphs. There were in 1919, 2,295 telegraph offices. Receipts in 1919 (telegraphs and telephones), 17,804,000 francs, expenses (telegraphs and telephones), 49,617,175 francs.

In 1919 there were 279 urban telephone systems with 18,465 miles of wire ; total number of conversations, 25,493,000 in 1919.

Money and Credit.

No gold has been minted since 1882 (save only 5,000,000 francs struck in 1914), and no silver 5-franc pieces since 1876. The Germans (1915-18) ordered the striking of zinc 5, 10, 25, and 50 centime-pieces, for a total amount of 18,280,099 francs.

¹ Including 10,661,200 telegrams sent in the administrations of the railway system.

The one bank of emission in Belgium is the National Bank, instituted 1850. By law of March 26, 1900, its constitution was modified, and its duration extended to January 1, 1929. Its capital and reserve amounted in 1921 to 100,175,360 francs. It is the cashier of the State, and is authorised to carry on the usual banking operations. Its situation on September 29, 1921, was (in thousands of francs):—

Gold	266,582	Loans to State	5,500,000
Silver	39,730	Notes in circulation	6,212,237
Foreign bills	20,396	Treasury bills	458,912
Belgian bills	467,973	Private bills	362,325

There are joint-stock and private banks, also agricultural banks, credit unions, and popular banks.

Money, Weights, and Measures.

The *Franc* Par value 25·2214 to £1 sterling
Belgium belongs to the Latin Monetary Union.
The weights and measures are those of the metric system.

Diplomatic Representatives.

1. OF BELGIUM IN GREAT BRITAIN.

Ambassador.—Baron Moncheur, G.C.V.O. ; appointed October, 1917.

Counsellor of Legation.—Pol Le Tellier.

Secretaries.—Prince Reginald de Croy, O.B.E., and Robert van de Kerchove d'Hallebast.

Military Attaché.—Col. R. Maton, C.B., C.V.O.

Air Attaché.—Lt.-Aviateur Chevalier Willy Coppens, D.S.O., M.C.

Chancellor.—Hadelin Rothé.

Consul-General in London.—E. Pollet.

2. OF GREAT BRITAIN IN BELGIUM.

Ambassador.—The Right Hon. Sir George Grahame, K.C.M.G., K.C.V.O., appointed July 20, 1920.

Counsellor.—Eric Phipps, C.M.G.

Secretaries.—Hon. T. A. Spring-Rice and A. Holman.

Commercial Secretaries.—R. F. H. Duke and B. P. Sullivan.

Military Attaché.—Brigadier-General Lyon, C.M.G., D.S.O.

There is a Consul-General at Antwerp, and Vice-Consuls at Brussels, Bruges, Ghent, Liège, and Antwerp.

BELGIAN CONGO

(CONGO BELGE.)

Constitution and Government.—The Congo Independent State was founded in 1885 by Leopold II., King of the Belgians, and the State was placed under his sovereignty.

The annexation of the State to Belgium was provided for by treaty of November 28, 1907, which was approved by the chambers of the Belgian Legislature in August and by the King on October 18, 1908. The Minister for the Colonies is appointed by the King, and is a member of the Council of Ministers. He is President of the Colonial Council, consisting of 15 members, 8 of whom are appointed by the King, and 3 chosen by the Senate and 3 by the Chamber of Representatives. One of those appointed by the King, and one chosen by the Legislative Chambers, retire annually, but may be re-appointed. The King is represented in the Colony by a Governor-General, assisted by several vice-Governors-General. The budget is presented annually to the Chambers, and voted by them; the financial accounts have to be verified by the Court of Accounts. An annual report on the Congo Administration has to be presented to the Chambers along with the budget.

The Annexation has been recognised by all the Powers.

Governor-General.—Maurice Lippens (appointed January 25, 1921).

The precise boundaries of the Congo Colony were defined by the neutrality declarations of August, 1885, and December, 1894, and by treaties with Germany, Great Britain, France, and Portugal.

The territory is divided into twenty-two administrative districts (March 28, 1912):—Lower Congo, Middle Congo, Kwango, Sankuru, Kasai, Lake Leopold II., Equator, Lulonga, Bangala, Ubangi, Lower Uele, Upper Uele, Ituri, Stanleyville, Aruwimi, Lova, Kivu, Maniema, Lomani, Tanganyika—Moero, Lulua, and Upper Luapula. The last four districts form the Province of Katanga, with its capital at Elisabethville; the first five districts form the Province of Congo-Kasai, with Léopoldville as its capital the five next districts form the Province of Equator, with its capital at Coquilhatville, and the remaining eight districts form the Eastern Province, with its capital at Stanleyville. The capital of the Colony is Boma; in December 1921 it was announced that Kinshasa was to be the capital in the future. At the head of each Province there is a vice-governor, and at the head of each district a commissioner. Each district is divided into territories of which there are 179 in the whole country. In 1920 there were altogether more than 225 posts and stations at which 2,038 European officials were employed.

The districts of Ruanda and Urundi (formerly in German East Africa) have been ceded to Belgium as mandatory of the League of Nations. Area about 19,000 square miles. Ruanda is populated by two races—the Wa-tusi and the Wa-hutu. Both districts are rich in cattle. In order to obtain a practicable route for a railway which shall join the Tanganyika Territory to Uganda, the eastern strip of the Province of Ruanda and a small part of Urundi are transferred to Great Britain. The projected line will form a link on the Cape to Cairo railway.

Area and Population.—The area of the Colony is estimated at 909,654 square miles, with a population of Bantu origin officially estimated at 11 millions. The European population in January, 1921, numbered 8,221. Of these, 4,721 were Belgians, 979 English, 293 Americans, 647 Portuguese,

35 Italians, 47 Russians, 69 Swedish, 209 French, 230 Dutch, 85 Swiss, 319 Greeks, 32 Luxemburgers, 33 Danish, 14 Norwegians and 20 Spaniards.

The native languages comprise many dialects, every tribe having its own. Kiswahili is the language spoken by the natives who have been under Arab influence. Bangala is the commercial language on the Upper Congo; Fiote is used on the Lower Congo.

Religion and Instruction.—The religion of the natives consists of a gross fetichism, but mission work is actively carried on. There are 149 mission stations, with 1,150 missionaries, of whom 650 are Catholic and 500 Protestant. In education they co-operate with the Government, which has formed colonies where children are collected and taught. Several educational bodies direct under control of the Government establishments for general and professional training, especially at Boma, Leopoldville, Lusambo, Kabinda, Stanleyville, Buta and Elisabethville. In 1920 the Government grant for education to the missionaries amounted to 887,100 francs, while the total expenditure on education was 1,297,880 francs.

Justice.—There are 7 courts of first instance, 15 county courts, and 2 courts of appeal (one at Boma and the other at Elisabethville). In all these courts, the function of magistrate is exercised by doctors in the law. In the lower courts only, and moreover occasionally, the doctors in the law acting as judges, may be replaced by a district official. Every administrator of a territory is invested with judicial powers comparable to those of a justice of the peace.

Finance.—Estimates of revenue and expenditure for five years in pounds sterling :—

—	1918	1919	1920	1921	1922
	£	£	£	£	£
Revenue	1,692,180	1,953,534	2,227,466	2,700,425	2,810,530
Expenditure	1,974,219	2,081,955	2,422,154	3,304,422	3,549,658

For 1921 the receipts and expenditure were estimated as follows :—

Receipts	Francs	Expenditure	Francs
Customs	17,523,081	Administration	43,615,619
Direct taxes	17,500,000	Public debt	7,455,070
Taxes on ivory	1,800,000	Army	13,711,720
Mines	16,292,400	Navy	1,430,008
Agricultural receipts	556,000	Religion and Education	1,729,680
Total (including all items)	67,510,635 (2,700,435 <i>l.</i>)	Total (including all items)	82,610,525 (3,304,421 <i>l.</i>)

Debt 1919, 349,847,446 francs.

Defence.—The Colony possesses a force of native troops amounting to about 15,000 men. They are all infantry and are organised in 30 independent companies. The force is recruited by voluntary enlistment. The officers and non-commissioned officers (365) are Europeans, for the most part Belgians. The term of service is seven years, and the recruits are

trained in four camps of instruction before being drafted to their companies. The Territorial police number about 6,000 men.

Production.—The chief products in the order of their importance are rubber, palm-nuts and palm-oil, white copal and cocoa. Ivory is also abundant. Coffee grows freely, and the cultivation of cocoa is successful. Rice, cotton, and tobacco are grown in a great number of the native villages. Plantations of rubber, cacao, and coffee have been established by the Government and by private enterprise. Cattle thrive satisfactorily in all districts where there is no tsetse fly, notably in the highlands of Katanga and Kivu. Mining flourishes, the chief minerals being gold, diamonds, and copper. Other minerals are known to exist—coal, iron, tin and manganese—but as yet these have not been obtained in paying quantities. The gold mines in 1920 employed 7,882 natives; the output was 3,324 kilos. The most important mines in the Congo are the copper mines near Kambove, operated by the Union Minière. The total output in 1920 was 18,924 tons of copper. The exportation of diamonds in 1920 amounted to 274,103 carats.

Commerce and Shipping.—The value of the commerce for five years was as follows :—

Years	Imports		Exports	
	Special	General	Special	General
	£	£	£	£
1916	2,150,633	2,749,591	5,197,264	5,897,708
1917	1,412,054	1,793,555	6,573,103	7,397,926
1918	1,504,190	2,014,301	4,473,754	4,934,461
1919	3,427,240	3,679,885	8,165,800	9,135,652
1920	9,501,390	—	12,609,820	—

The chief imports for 1918 and 1919 and exports for 1920 were :—

	Imports			Exports	
	1919	1918		1920	
	Francs	Francs		Kilogs.	Francs
Arms, ammunition, &c.	835,227	15,113	Rubber . .	1,121,679	5,396,397
Steamers and ships	256,871	1,027,326	Ivory . .	336,118	35,860,093
Machinery . .	12,664,749	892,021	Palm-nuts . .	39,457,261	58,988,605
Wines, spirits, beer	4,628,500	2,608,049	Palm-oil . .	7,624,111	18,511,341
Provisions . .	12,563,059	1,421,670	Copal . .	13,249,514	40,305,021
Cottons . .	16,868,789	10,223,131	Gold, crude . .	3,324	24,088,430
			Copper, ore and crude . .	24,222,555	82,356,687

Of the special imports (1919) the value of 33,082,548 francs came from Great Britain, 1,881,869 francs from France, 2,597,138 francs from Angola, 7,691,134 francs from Rhodesia, 13,246,061 francs from the Union of South Africa, 16,756,038 francs from the United States. Of the special exports 37,857,676 kilos, valued at 90,225,476 francs went to Great Britain; 761,250 kilos, valued at 1,325,028 francs, to the United States; 7,047,446 kilos, valued at 10,317,296 francs, to France; 2,598,668 kilos, valued at 9,903,331 francs, to Rhodesia, and 3,548,576 kilos, valued at 4,062,345 francs, to Angola.

According to the Board of Trade Returns the imports into the United Kingdom from the Belgian Congo in 1921 amounted to the value of 712,887*l.*; and the exports of British produce and manufactures to the Belgian Congo to 501,141*l.*

At the port of Boma in 1920 of sea-going vessels there entered 53 of 160,374 tons, and cleared 38 vessels of 109,492 tons. The other two ports are Banana and Matadi. In the coasting trade there entered 114 vessels of 10,549 tons, and cleared 113 vessels of 10,523 tons.

The administration possesses 17 steamers on the Lower Congo, and 46 on the Upper Congo. There are also about 51 private steamers on the Upper Congo.

Internal Communications.—The Congo is navigable for 93 miles from its mouth to Matadi, and on this section 15 steamers belonging to the State ply. Above this, for over 200 miles, are numerous rapids, which render the river unnavigable as far as Stanley Pool (Léopoldville). Above the Pool there are about 1,068 miles of navigable water, as far as Stanley Falls, while several of the great tributaries are navigable over a considerable extent of their course. Above the Stanley Falls the Congo is called Lualaba and is navigable for 585 miles, from Ponthierville to Kindu and from Kongolo to Bukama (Katanga).

There are 5,609 miles of road partly suitable for motors. The total length of railways on January 1, 1921, was 2,663 miles. Principal lines:—The Matadi-Léopoldville line, 248 miles; the Mayumbe railway (Boma to Tshela), 90 miles; the Stanleyville-Ponthierville line, 78 miles; the Kindu-Kongolo line, 220 miles; the Kabalo-Albertville line, 170 miles; the Bukama to the Rhodesian frontier *via* Elisabethville, 451 miles; the Katanga branch line to Lubumbashi, 1 mile; to Mikola, 9 miles. Two sections of the Cape-to-Cairo railway are included in the system. The distance from Elisabethville, Katanga, on the Cape-to-Cairo Railway, to Cape Town is about 2,300 miles.

An important development in 1911 was the construction of a pipe line from Matadi to Léopoldville, 246 miles long, for the purpose of transporting crude oil for the use of river steamers. It has a diameter of 4 inches, with 8 pumping stations capable of delivering 50,000 tons of oil at Léopoldville, the terminus. The concession is for 50 years, at the expiration of which period all the pipe lines, with the material, except the vessels and stores of petroleum, will pass into the hands of the Congo Government.

The length of the Congo-Tanganyika Lake Railway is 169 miles. It was completed in March, 1915, and links up the whole of the Upper Congo with the railway from Dar-es-Salaam to Ujiji.

From Léopoldville a public transport service on the Upper Congo and its tributaries has been organised by the Government and several companies, 59 steamers and barges being employed for this purpose.

Transport service of couriers by aviation is established between Kinshasa and Stanleyville, and serves the intermediate localities of Kwamouth, Lukolela, Bolobo, Gombe, Coquilhatville, Mobeka, Lisala, Bumba and Basoko. The service is carried out in three days, and there is a service twice a month—after the arrival at Kinshasa of the mail from Europe.

In 1919 there were 50 post, telegraph and telephone offices. There are in addition 23 special telegraph offices, and there are 24 centres where there is a telephone wire. In 1920 in the internal service 1,029,340 letters, papers, &c., were transmitted; and in the external, 1,630,512 were handled. The Congo is included in the Postal Union. Telegraph lines connect Banana with Coquilhatville, 800 miles; Boma with Tshela, 85 miles; Stanleyville and

Ponthierville, 79 miles; Kasongo and Uvira (Lake Tanganyika), 265 miles; Kindu and Kongolo, 219 miles; Kabalo and Lake Tanganyika, 169 miles; and Sakania and Bukama 448 miles. Total length, 2,085 miles. There are at present 15 stations of wireless telegraphy in the Belgian Congo—at Banana, Boma, Kinshasa, Coquilhatville, Basankusu, Umangi, Basoko, Stanleyville, Kindu, Kongolo, Albertville, Kikondja, Elisabethville, Lusambo, Bunia, and Buta. All these posts communicate with each other. It is hoped to establish a direct communication between Brussels and Boma.

Four banks are in existence: the 'Banque du Congo Belge,' and the 'Banque Commerciale du Congo,' both with branches in all the commercial centres; the Banco Nacional Ultra-marino, and the Standard Bank.

According to a Law of October 18, 1908, gold and silver money current in Belgium is also current in the Congo. A royal decree can fix the date when silver money current in the Congo State will not be current in Belgium; and the king may issue money of special alloy which must not be current in Belgium. According to this, a royal decree of April 14, 1909, diminished the silver money of the Congo State. The Paris Conference of March 25, 1920, authorised the Belgian Government to strike for use in the Colony pieces of 50 centimes and a franc in inferior metal which are not accepted in Belgium and the other members of the Latin Union. These coins of special alloy are of 1, 2, 5, 10, and 20 centimes. The 1 and 2 centimes are of pure copper, the others are alloy of nickel and copper. The alloyed pieces are pierced by a circular hole. By an arrangement of July 7, 1911, the Banque de Congo Belge is authorised to issue notes payable and bearer. The notes are of the nominal value of 1, 5, 20, 100 and 1,000 francs.

The Metric System was introduced by law on August 17, 1910.

British Consul.—A. J. Wallach (at Boma).

There is a British Vice-Consul at Elisabethville.

BHUTÁN.

A STATE in the Eastern Hímálayas, between 26° 45' and 28° N. latitude, and between 89° and 92° E. longitude, bordered on the north and east by Tibet, on the west by the Tibetan district of Chumbí and by Sikkim, and on the south by British India. Extreme length from east to west 190 miles; extreme breadth 90 miles. Area about 20,000 square miles; population estimated at 250,000.

The original inhabitants of Bhután, the Tephús, were subjugated about two centuries ago by a band of military colonists from Tibet. In 1774 the East India Company concluded a treaty with the ruler of Bhután, but since then repeated outrages on British subjects committed by the Bhután hill men

have led from time to time to punitive measures, usually ending in the temporary or permanent annexation of various *duars* or submontane tracts with passes leading to the hills. In November 1864 the eleven western or Bengal *duars* were thus annexed. Under a treaty signed in November, 1865, the Bhután Government was granted a subsidy of Rs. 50,000 a year on condition of good behaviour. By an amending treaty concluded in January, 1910, the British Government undertook to exercise no interference in the internal administration of Bhután. On its part the Bhutanese Government agreed to be guided by the advice of the British Government in regard to its external relations. The treaty also provided for the increase of the subsidy to Rs. 1,00,000.

The form of Government in Bhután, which existed from the middle of the sixteenth century until 1907, consisted of a dual control by the clergy and the laity as represented by Dharma and Deb Rájás. In 1907 the Deb Rájá, who was also Dharma Rájá, resigned his position, and the Tongsa Penlop, **Sir Ugyen Wangchuk**, G.C.I.E., K.C.S.I., was elected as the first hereditary Maharaja of Bhután.

Chief fortresses or castles : Punakhá, the winter capital, a place of great natural strength ; Tásichozong (Tashichödzong), the summer capital, Páro, Angduphorang (Wangdupotang), Tongsa, Taka, and Biagha.

The people are nominally Buddhists, but their religious exercises consist chiefly in the propitiation of evil spirits and the recitation of sentences from the Tibetan Scriptures. Tásichozong (Tashichödzong), the chief monastery in Bhután, contains 300 priests.

Beyond the guards for the defence of the various castles, there is nothing like a standing army.

The chief productions are rice, Indian corn, millet, lac, wax, different kinds of cloth, musk, ponies, chowries, and silk. The State is now beginning to realise the necessity of encouraging foreign capital for industrial enterprises such as mines, tea gardens, and the working of its extensive and valuable forests. Muzzle-loading guns and swords of highly-tempered steel are manufactured.

Trade with India was as follows :—

—	1916-17	1917-18	1918-19	1919-20	1920-21
	£	£	£	£	£
Exports to India .	89,000	129,000	60,000	22,400	34,900
Imports from India .	70,000	98,000	45,000	76,100	117,300

BOLIVIA.

(REPÚBLICA BOLIVIANA.)

Constitution and Government.

THE Constitution of the Republic of Bolivia (so named in 1825) bears date October 28, 1880. By its provisions the executive power is vested in a President, elected for a term of four years by direct popular vote, and not eligible for re-election; there is a Congress of two chambers, called the Senate and the Chamber of Deputies. The suffrage is possessed by all who can read and write. There are 16 Senators (2 for each Department) elected for six years and 70 Deputies elected for four years. Both Senators and Deputies are elected by direct vote of the people. Of the Senators one-third retire every two years; of the Deputies one-half retire every two years. Senators receive a salary of 750 bolivianos (60*l*.) per month during the sittings, which, as a rule, last for 60 days, but may be extended to 90 days, and Deputies receive £3 for each day they attend. Extraordinary sessions may be held for special purposes. There are a President, two Vice-Presidents and a ministry, divided into six departments—of Foreign Relations and Worship; Finance, Government and Justice; Public Works and Industry; War and Colonisation; and Education and Agriculture.

President of the Republic.—Dr. Bautista Saavedra, elected for the term 1921–25 (73,705 bolivianos).

The supreme political, administrative, and military authority in each department is vested in a prefect. The Republic is divided into 8 departments, 3 territories, 72 provinces, 681 cantons administered respectively by prefects, sub-prefects, and corregidores. Prefects and sub-prefects are appointed by the President of the Republic; corregidores and alcaldes are appointed annually by the prefects of the provinces. The capital of each department has its municipal council; the subdivisions have municipal boards, and the still smaller subdivisions have municipal agents. The territories in the north-west of the Republic and in the Chaco and Oriente are governed by three officials, called *delegados nacionales*.

The following table shows area and population of the different political divisions (the capitals of each are given in brackets):—

Departments and Territories	Area : square miles	Census 1900	Estimated 1915	Per square mile 1915
La Paz (La Paz)	40,686	445,616	726,357	9.60
Cochabamba (Cochabamba)	25,288	328,163	534,901	19.33
Potosí (Potosí)	45,031	325,615	530,748	7.70
Santa-Cruz (Santa-Cruz)	144,941	209,592	341,640	1.70
Chuquisaca (Sucre)	36,132	204,484	333,226	1.03
Tarija (Tarija)	31,567	102,887	164,704	1.68
Oruro (Oruro)	20,657	86,081	140,891	5.25
El Beni (Trinidad)	95,354	32,180	52,450	3.60
El Chaco (Villa Montes)	46,561	—	13,085	82.5
Colonial Territories (Riberalta)	27,938	10,000	51,963	3.09
Total	514,155	1,744,568	2,889,970	3.88

The Indian population in 1900 was 920,864, or 50·9 per cent. of the whole; the mixed was 486,018, or 26·7 per cent.; the white was 231,088, or 12·7 per cent.; the negro, 3,945, or 0·21 per cent.; and the unclassified, 170,936, or 9·4 per cent. Of the population not under 7 years of age, 564,000 were engaged in agriculture; 399,037 in the industries; 55,521 in commerce; 49,647 in the liberal professions; 36,285 in domestic service; 12,625 in mining, and 3,106 in artistic professions. The foreign population numbered 7,425, of whom 2,072 were Peruvian. The admission and settlement of immigrants are facilitated under the regulations published in March, 1906.

The boundary disputes of Bolivia with Brazil and with Chile were settled by treaties of November, 1903 and October, 1904. That with Peru was settled by direct negotiations between Bolivia and Peru (1911-12); that with Paraguay, which has been the subject of long negotiations, is as yet without result.

The estimated population (1918) of La Paz (the actual seat of Government) is 107,252; Cochabamba, 31,014; Potosí, 29,795; Sucre (the capital), 29,686; Tarija, 11,644; Oruro, 31,360; Santa Cruz, 25,807; Trinidad, 6,096; Riberalta, 3,200; Villa Montes, 1,000.

Religion, Instruction, and Justice.

The Roman Catholic is the recognised religion of the State; the exercise of other forms of worship is permitted. The religious orders have 17 convents (9 for males and 8 for females); the male members number about 230, the female 280; there are about 567 secular clergy. In 1900 the non-Catholic population numbered 24,245. The Church is under an archbishop (resident in Sucre) and 3 bishops (La Paz, Cochabamba, and Santa Cruz). The maintenance of the Church costs the State 121,108 bolivianos a year, 23,820 bolivianos being devoted to the propagation of the faith among the Indians. By a law of March 19, 1912, all marriages must be celebrated by the civil authorities.

Primary instruction, free and obligatory, is under the care of the municipalities and the State. In 1918 (including industrial, parish, and private schools) there were 450 elementary schools with 3,960 teachers and 54,192 pupils. For secondary instruction there were 21 colleges (14 national), 5 clerical institutions, and 5 private lyceos with, in all, 180 teachers and 2,598 pupils. For superior instruction there are 19 establishments with 78 professors and 1,291 students. At Sucre and La Paz are the only two universities which possess more than one faculty; at both degrees may be obtained in law, medicine, and theology; at La Paz there is also a faculty of commerce. In some departmental capitals are schools of commerce; at La Paz the national conservatory, the school of applied arts, the military college, and the school of war for officers, the latter founded in 1917; at Cochabamba the school of arts and offices and another of commerce and of surveying land; at Potosí the institute of languages; at Oruro the national school of mining and engineering. At some places are rural schools for natives, and a normal college for training teachers of Indians at La Paz, and the superior normal institute for teachers in secondary schools. There is a normal school for training teachers generally at Sucre, and had 157 students in 1915. In all departmental capitals there are public libraries; at La Paz there is a museum, and at La Paz, Oruro and Potosí are mineralogical museums. The State spent 3,020,672 bolivianos in 1918 for educational purposes.

The judicial power resides in the Supreme Court, in superior district courts, and in the courts of local justices. The Supreme Court sitting in the Capital of the Republic has 7 judges; the district courts (one in each department

except El Beni, which has a 'Inez superior') have each 5 judges; local tribunals have judges of party, of instruction and parish alcaldes. Public justice is directed by an Attorney-General and by district and local attorneys. The administration of justice is free.

Finance.

The revenue of Bolivia is derived mainly from customs duties, spirit duties, tin, silver, gold, wolfram, antimony and other minerals, rubber export, patents, and stamps. From Jan. 1, 1912, onward, a tax of 3 per cent. is imposed on the liquidated profits of all mineral enterprises the gross value of whose 'production and exportation' exceeds 8,000*l.* yearly. The chief branches of expenditure are finance, war, and public works. The ordinary revenue and expenditure for 6 years (budget estimates) were as follows (125 bolivianos = 1*l.*):

—	Revenue	Expenditure	—	Revenue	Expenditure
	£	£		£	£
1915	1,358,864	1,716,315	1919	2,506,301	3,077,748
1916	1,282,760	1,805,867	1920	3,957,638	4,280,887
1918	2,606,959	2,891,620	1921	—	3,751,008

The public debt of Bolivia on September 30, 1921, amounted to 68,615,502 bolivianos, of which 9,749,467 bolivianos were external debt, 33,721,221 bolivianos internal debt, and 25,144,812 bolivianos floating debt.

Defence.

The territory of the Republic is divided into 3 military districts, the Northern, the Central, and the Southern, and 3 'military commands' formed of the departments Santa Cruz, El Beni, Tarija, and the Territories.

The law of December 15, 1915, provides for a permanent force of 3,577 men. Military service is compulsory for all males from the 19th to the 50th year. The army is a militia, with a total service in the first line of 6 years, of which about 1 year is spent in the ranks. For the next 6 years (from the age of 25 to 30) the Bolivian soldier belongs to the 'ordinary reserve.' After this the men pass to the 'extraordinary reserve' for 10 years, and finally complete their service by 10 years in the Territorial Guard.

The permanent army consists of 4 infantry regiments, two of 500 men each, and two of 800 men; a cavalry regiment 500 strong; a mountain artillery regiment of 300 men; a field artillery regiment of the same strength one with 4 batteries of the Schneider-Canet system; making a total of 4,187, including officers, officials and men.

In addition to the above troops there are small bodies of infantry of from 100 to 200 men (called *columnas*) at the chief towns of departments, which can be expanded to battalions, if necessary. There also exist other units, for garrisoning the North, the North West, the South West, and the East, consisting of 300 men each.

The infantry armament is the Mauser (Bolivian Model) rifle of 1898.

Production and Industry.

The extensive and undeveloped region of Bolivia lying east of the Andes comprises about three-quarters of the entire area. It is estimated that about 4,940,000 acres are under cultivation, but agriculture is in a backward condition. Irrigation by means of artesian wells is being attempted in some

regions. Wheat, maize, barley, beans, potatoes, are produced mostly for local consumption, and coffee, coca, quina, &c., are exported to Chile and Argentina. Cocoa and coffee are grown on the slopes of La Paz and Cochabamba; coffee and other products are grown in El Beni and Santa Cruz. Rubber is produced on 40,642,000 acres in the National Territories, and in the Departments of El Beni and Santa Cruz, and parts of La Paz and Cochabamba. Bolivia ranks as the second rubber-exporting country of South America, coming next to Brazil. The quantity exported in 1918 was 4,287 metric tons. The public lands of the State have an area of about 245,000 square miles, of which 104,000 square miles are reserved for special colonisation.

The mineral wealth of Bolivia includes silver, copper, tin, lead, zinc, antimony, bismuth, wolfram, gold, and borate of lime. Bolivia produces one quarter of the total tin output of the world, standing next to the Malay Peninsula in the production of this metal. Large deposits of common salt are found near Lake Poopó and in the South of Bolivia. In 1911 large tracts of land were taken up for the production of petroleum, especially near Calacoto, on the Arica-La Paz railway. In the east of the Republic there is said to be a part of an immense oilfield, stretching from near the Orinoco to the Argentine Republic.

Commerce.

Bolivia having no seaport, imports and exports pass chiefly through Arica, Mollendo, Antofagasta, and the river-ports of Suarez on the Paraguay, Montes on the Iténez, Villa Bella on the Madeira, and Bahía or Cobija on the Upper Acre. The Argentine route through Salta is now little used; the route now runs from La Quiraca, traversing the province Jujuy to Tucuman and Rosario. The chief imports are provisions, hardware, wines, and spirits, cotton, woollen, linen and silk goods, and ready-made clothes. The chief exports are silver, tin, and rubber. There is scarcely any food export. The value of imports and exports for five years are given as follows (12·5 bolivianos = 1 £):-

—	1915	1916	1917	1918	1919
	£	£	£	£	£
Imports . . .	1,805,965	2,487,857	2,678,466	2,723,744	4,824,671
Exports . . .	7,616,828	8,118,684	12,619,844	14,211,116	11,225,799

The values of imports (dutiable and duty-free) are determined according to the appraisement in force; those of exports, by declarations of the exporters, based on current prices at the place and time. Customs receipts in 1918: 16,151,025 bolivianos.

Of the exports the United Kingdom took 49 per cent. in 1919, the United States 41 per cent., and the remaining 10 per cent. was distributed between France, Chile, and other countries. The United Kingdom took 70 per cent. of the tin exports.

Total trade between U.K. and Bolivia (Board of Trade figures) for 5 years:—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Bolivia to U.K.	2,382,749	3,596,887	3,442,491	1,930,979	866,144
Exports to Bolivia from U.K. .	461,204	882,039	550,665	747,400	489,866

In July, 1912, a Commercial Treaty was ratified between Great Britain and Bolivia. (Signed August, 1911.)

Communications.

In 1921 the total length of line open in Bolivia was 1,401 miles, including the new line, opened in July, 1917, from Oruro to Cochabamba. Under construction 256 miles. The principal line is the Antofagasta and Bolivian Railway, from Antofagasta, on the Pacific coast, to Ollague, thence to Oruro, thence to Viacha, thence to La Paz (735 miles). Under the Bolivian-Chilian treaty of October 24, 1904, the Arica-La Paz line (271 miles, of which 143 miles are in Bolivia) was built from La Paz via Lluta with Taregra and to Corocoro. The Bolivian section was handed over to the government of Bolivia on May 3, 1913. The Pan-American Railroad follows the shore line of Lake Titicaca from Guaqui to Viacha, and thence to the Argentine border by way of Uyuni, Tupiza, and La Quiaca, a total distance in Bolivia of 529 miles, of which 361 are already in operation.

Traffic on Lake Titicaca and on the Bolivian rivers is carried on by steamers, which belong to private owners.

There are about 2,304 miles of cart roads connecting the more important towns.

In Bolivia there were 427 post offices in 1919, number of pieces of mail handled, 6,649,967. The postal expenses amounted to 595,942 and the receipts to 280,593 bolivianos.

There are about 4,000 miles of telegraph lines. All the departmental capitals are connected by telegraph. There is telegraphic communication with foreign countries by the lines of the Central and South American Telegraph Company; the Southern railway telegraph lines of Peru; the West Coast of America Telegraph Company; and also by way of Tupiza and Buenos Aires. Wireless telegraphic stations are being erected at La Paz, Villa Bella, Cobija, Trinidad, Santa Cruz, Puerto Suarez, Guayaramerin, Cachuela Esperanza. Cost of administration, 803,678 bolivianos; receipts, 363,585.

On January 1, 1916, Bolivia had 21,747 telephones.

Money, Weights, and Measures.

The net earnings of the Banco de la Nacion (State bank) in 1919 were 2,944,749 bolivianos. After its fusion with the Industrial Bank, the capital of the National Bank is 17,631,225 bolivianos.

On September 14, 1906, a monetary law was passed providing for the adoption of a gold standard. The unit of account is the gold peso of one-fifth of a pound sterling weighing 1.5976 grams, .916 fine, thus containing 1.464466 grams of fine gold. There are two gold coins struck, British and Peruvian pounds and half pounds; there is no Bolivian gold yet in circulation. Silver coins, .900 fine, are pieces of 50 and 20 centavos. Nickel coins, pieces of 10 and 5 centavos. Gold is legal tender to any amount and English and Peruvian gold coins of corresponding value have legal currency, the rate of exchange being fixed at 12.5 bolivianos = 1£. Silver is legal tender up to 10 pesos, and nickel up to 1 peso. Silver and nickel coins are being minted. In 1909 silver coin to the value of 1,000,000 bolivianos (50 and 20 centavo pieces) were coined for Bolivia at Birmingham. There are also paper notes of 5, 10, 20, 50 and 100 Bolivianos. By a new law the banknote issue is confided to the Banco de la Nacion Boliviana.

The bank named is by the same law authorised to raise its capital to 4,000,000*l*, and may issue notes up to 150 per cent. of its capital. 30 per cent. of the note issue must be covered in gold, and, after 1918, the percentage is to rise 2 per cent. annually up to 50 per cent. On December 31, 1919, the notes in circulation of all the banks were to the value of 26,942,094 bolivianos, the gold reserve against this being 60·7 per cent. of the total.

The metric system of weights and measures is used by the administration and prescribed by law, but the old Spanish system is also employed. The quintal is equal to 101½ lbs.

Diplomatic and Consular Representatives.

1. OF BOLIVIA IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary.—Vacant (March 1922).

Charge d'Affaires.—Mamerto Urriolagoitia.

Attachés.—Antenor Patino and Juan Ramon Rivero.

2. OF GREAT BRITAIN IN BOLIVIA.

Envoy and Minister.—W. E. O'Reilly.

There are Consular representatives at La Paz, Oruro, Sucre, Santa Cruz, Uyuni, Cochabamba, Concepcion de Velasco, and Potosi.

BRAZIL.

(ESTADOS UNIDOS DO BRAZIL.)

Constitution and Government.

BRAZIL was discovered on April 21, 1500, by the Portuguese, Admiral Pedro Alvares Cabral, and thus became a Portuguese settlement. On the French invasion of Portugal, in 1807, the Portuguese Royal family fled to Brazil; on December 16, 1815, the colony was declared 'a Kingdom.' The Portuguese Court having returned to Europe in 1821, a national congress assembled at Rio de Janeiro, and on May 13, 1822, Dom Pedro, eldest surviving son of King João VI. of Portugal, was chosen 'Perpetual Defender' of Brazil. He proclaimed the independence of the country on September 7, 1822, and was chosen 'Constitutional Emperor and Perpetual Defender' on October 12 following. In 1831 he abdicated the crown in favour of his only son, Dom Pedro II. (born 1825, died 1891), who reigned as Emperor until November 15, 1889, when by a revolution he was dethroned, and he and his family exiled, and Brazil declared a Republic under the title of the United States of Brazil. The decree of banishment against the ex-Imperial family was repealed on August 6, 1920.

According to the constitution adopted by the National Congress on February 24, 1891, the Brazilian nation is constituted as the United States of Brazil. At present the Union consists of twenty States, one National Territory (purchased in 1902), and one Federal District. Each of the old Provinces forms a State, administered at its own expense without interference from the Federal Government save for defence, for the maintenance of order, and for the execution of the Federal laws. Fiscal arrangements in such matters as import duties, stamps, rates of postage, and bank-note circulation belong to the Union; but export duties are the property of the various States.

The legislative authority is exercised by the National Congress with the sanction of the President of the Republic. Congress consists of the Chamber of Deputies and the Senate. It meets annually on the 3rd of May, without being convoked, unless another day be fixed by law, and sits four months, but may be prorogued or convoked extraordinarily. No member of Congress, after his election, can contract with the executive power or accept any commission or paid office, except such as are diplomatic or military or imposed by law. If,

in ordinary circumstances, the acceptance of diplomatic or military office would cause the loss of the legislative services of a member, the permission of the Chamber is required. Nor can any member of Congress take part in the administration of any company which receives a subsidy from the Federal Government. Deputies and Senators are paid, and neither can be Ministers of State, and retain at the same time their seats in Congress. Deputies must have been Brazilian citizens for four years. Senators must be over thirty-five years of age and must have been citizens for six years.

The Chamber of Deputies consists of 212 members elected for three years by direct vote (providing for the representation of the minority), in a proportion not greater than one to every 70,000 of population as shown by a decennial census, but so that no State will have less than four representatives. It has the initiative in legislation relating to taxation, and in proceedings against the President of the Republic and Secretaries of State.

Senators, 63 in number, are chosen by direct vote, three for each State, and for the Federal district, for nine years, and the Senate is renewed to the extent of one-third every three years. The Vice-President of the Republic is President of the Senate.

The executive authority is exercised by the President of the Republic. He must be a native of Brazil, over thirty-five years of age. His term of office is four years, and he is not eligible for the succeeding term. The President and the Vice-President are elected by the people directly, by an absolute majority of votes. The election is held on the 1st of March in the last year of each presidential period in accordance with forms prescribed by law. No candidate must be related by blood or marriage, in the first or second degree, to the actual president or vice-president, or to either who has ceased to be so within six months.

The President appoints and dismisses ministers, is in supreme command of the army and navy, and, within certain limits, has the power to declare war and make peace. He (with the consent of Congress) appoints the members of the Supreme Federal Tribunal and the diplomatic ministers. No minister can appear in Congress, but must communicate by letter, or in conference with commissions of the Chambers. Ministers are not responsible to Congress or the Courts for advice given to the President of the Republic.

The franchise extends to all citizens not under twenty-one years of age, duly enrolled, except beggars, 'illiterates,' soldiers actually serving, and members of monastic orders, &c., under vows of obedience.

President of the Republic.—Dr. Epitácio da Silva Pessoa, born in 1865, elected April 13, 1919. Term of office expires November 15, 1922.

President Elect (1922-26).—Arturo Bernardes.

There are 7 Secretaries of State at the head of the following Departments:—

1. Finance, 2. Justice, Interior and Public Instruction, 3. War, 4. Marine, 5. Foreign Affairs, 6. Communications and Public Works, 7. Agriculture, Industry, and Commerce.

I. LOCAL GOVERNMENT.

Each State must be organised under the republican form of government, and must have its administrative, legislative, and judicial authorities distinct and independent. The governors and members of the legislatures must be elective; the magistrates must not be elective nor removable from office save by judicial sentence. The Federal executive cannot intervene directly in the local government of the States. Each State is governed by its own Constitution and laws which must agree with the constitutional principles of

the Union. In cases of the infringement of the principles of the Federal constitution by the constitutions, laws or authorities of any State, the Federal Government, after due process of Federal law, has the power to interfere even by force of arms, if necessary. The Federal District is administered by a council elected by the citizens of the District, the municipal executive authority being exercised by a Prefect appointed for four years by the President of the Republic. In 1912 there were in Brazil 1,233 municipalities, 705 townships (*ciudades*), 528 villages (*villas*), and 3,629 districts.

Area and Population.

Following are the census returns of 1900 and the preliminary returns of the census held in September, 1920 (capitals of States in brackets):—

States	Area: sq. miles	Population		
		1900 (Census)	1920 (Census)	Per sq. mile 1920
Alagoas (Maceió) . . .	22,577	649,273	990,278	43.8
Amazonas (Manáos) . . .	731,363	249,756	499,448	0.6
Bahia (San Salvador) . . .	164,601	2,117,956	3,372,901	20.4
Ceará (Fortaleza) . . .	40,241	849,127	1,436,309	35.6
Espirito Santo (Victoria) . . .	17,308	209,783	479,188	21.9
Goyaz (Goyaz) . . .	288,462	255,284	528,879	1.8
Maranhão (St. Luiz). . .	177,515	499,308	853,050	4.0
Matto Grosso (Cuyabá) . . .	532,210	118,025	274,138	0.5
Minas Geraes (Bello Horizonte) . . .	221,894	3,594,471	5,788,837	26.5
Pará (Belém) . . .	443,789	445,356	992,290	2.2
Parahyba (Parahyba) . . .	28,846	490,784	785,344	27.2
Paraná (Curytiba) . . .	93,269	327,136	674,113	7.2
Pernambuco (Recife) . . .	49,560	1,178,150	1,975,441	39.8
Piauhý (Therezina) . . .	116,494	334,328	548,250	4.7
Rio de Janeiro (Nictheroy)	26,627	926,035	1,501,969	56.4
Rio Grande do Norte (Natal). . .	22,189	274,317	552,071	25.3
Rio Grande do Sul (Porto Alegre). . .	91,310	1,149,070	2,138,831	23.4
Santa Catharina (Florian- opolis) . . .	20,785	320,289	633,462	30.4
São Paulo (S. Paulo) . . .	112,278	2,282,279	4,823,100	42.0
Sergipe (Aracajú) . . .	15,089	356,264	535,094	35.4
Federal District . . .	431	691,565	1,157,873	2,686.5
Acre Territory . . .	58,672	—	104,430	1.7
Total . . .	3,275,510	17,318,556	30,645,296	9.3

In 1900 the population consisted of 8,831,002 males and 8,487,554 females. Some 600,000 Indians are to be found in the Amazon area.

The Acre Territory has an area of 58,672 sq. miles. For this territory Brazil paid to Bolivia 2,000,000*l.* in 1902. In 1909 the Territory petitioned to be received into the Brazilian Union as a State.

In 1913 the population of Rio de Janeiro was estimated at 975,818; [1,157,873 census 1920]; São Paulo, 450,000 (504,300 in 1919); Bahia, 348,130;

Pernambuco, 216,484; Belem, 275,167; Porto Alegre, 150,843; Manaus, 80,931; Nitheroy, 86,726; Fortaleza, 70,000; Maceió, 68,000; São Luiz, 57,709; Parahyba, 32,000.

The site for the Federal Capital has been selected in the State of Goyaz, on a table-land between Pyrenopolis, Santa Luzia, and Formosa.

The number of immigrants between 1820 and 1920 was 3,647,301. The number of immigrants into Brazil in 1920 was 71,206, of whom 33,883 were Portuguese; 9,136 Spaniards; 10,005 Italians; 4,120 Germans.

A boundary treaty with Colombia was signed on April 24, 1907; with Peru on September 8, 1909; and with Uruguay on May 7, 1913.

Religion.

The connection between Church and State has been abolished, and absolute equality declared among all forms of religion. The Government left to the Church all religious buildings and their properties and income. All churches are perfectly free; religious orders are allowed and are prosperous. All but about 100,000 of the population are Catholics.

There is a Cardinal whose seat is at Rio de Janeiro and who acts as an Archbishop, an archbishop at Bahia, one at Rio de Janeiro, one at San Paulo, one at Pará, and one at Mariana (Minas). There are 25 suffragan bishops. For instruction of the clergy there are 13 seminaries.

Instruction.

Education is free but not compulsory, except in several municipalities in S. Paulo, which insist on compulsory education (*e.g.* Ribeirão Preto). The Union Government undertakes to provide, in part, for higher or university instruction within the Union, but there are institutions of this nature maintained, some by the States, and some by private associations; while primary and training schools are maintained and supervised, either by the States or by the municipalities. There is one university in Brazil, the University of Rio de Janeiro, founded on September 7, 1920; and there are 25 faculties which confer degrees. In Rio de Janeiro are also the military college, the preparatory school of tactics, and the naval school. In Porto Alegre and Barbacena there are also preparatory military colleges. At the Capital are maintained by the Federal Government a school for the blind and another for the deaf and dumb. The Federal Government maintains also a School of Arts and a National Institute of Music in the Capital, there being similar academies of music in the States of Maranhão, Pará, São Paulo, and several in the State of Rio de Janeiro. In Manaus, Bahia, and Curitiba there are schools of Fine Arts. There are engineering polytechnics at Rio de Janeiro, São Paulo, and Porto Alegre, and one mining school at Ouro Preto. There are, besides, 28 industrial schools, 11 agricultural and 9 commercial institutions for tuition. There are faculties of law at Recife, São Paulo, Ceará, Goyaz, Pará, Bahia, Bello Horizonte, Porto Alegre, and Rio de Janeiro (2); faculties of medicine at Rio de Janeiro, São Paulo, Curitiba, Bahia, and Porto Alegre; colleges of pharmacy at Ouro Preto, Belem, Juiz de Fora, Porto Alegre, and São Paulo; schools of odontology at Rio de Janeiro, Bello Horizonte, Porto Alegre and also attached to the colleges of medicine and pharmacy; engineering colleges at Rio, Ouro Preto, Bahia, Recife, Porto Alegre, and São Paulo; and since 1916 a school of Economics and Politics (Escola de Altos Estudos) in Rio de Janeiro.

There were in 1914 in the various States, 12,744 primary schools with 700,120 pupils and 20,590 teachers. Of the total number 85 were Federal government schools, 6,985 State Government schools, and 2,647 municipal schools. There were also 327 secondary schools with 30,258 pupils, and

151 professional schools with 19,294 pupils. For teachers' diplomas there are 29 colleges. In recent years public instruction has made great progress.

Brazil has many public libraries. The National Library in Rio contains more than 400,000 books and manuscripts. There is also a National Museum, an Academy of Fine Art, and a Botanical Garden.

Justice and Crime.

There is a supreme Federal court of Justice at Rio de Janeiro; and Federal judges in each State. Justice is administered in the States in accordance with State law, by State courts, but in Rio de Janeiro Federal Justice is administered. Judges are appointed for life. There are also municipal magistrates and justices of the peace, who are elected for four years, and whose chief function is to settle cases up to a certain amount.

A new Civil Code came into force on January 1, 1917. Among the most important subjects covered by the code are those referring to legal capacity; the registration of births, marriages, and deaths; juristic persons and organisations; domicile; real and personal property; homestead (a new institution in Brazilian law); legal acts; domestic relations; copyright (which was formerly very deficient); mortgages; contracts; wills and the administration of estates. Extensive commentaries are being prepared by eminent jurists on this important piece of legislation.

Finance.

Revenue and expenditure (gold milreis=2s. 3d.; paper milreis =1s. 4d). Import duties form the principal source of revenue.

—	Revenue		Expenditure	
	(Gold) £	(Paper) £	(Gold) £	(Paper) £
1917	7,452,634	24,565,997	12,302,093	34,961,351
1918	11,502,190	25,399,720	9,679,702	30,246,485
1919	9,000,789	26,776,800	4,260,712	34,269,933
1920 ¹	13,272,549	34,283,810	8,041,369	39,971,905
1921 & 1922 ¹	11,475,563	41,314,066	8,614,000	47,442,666

¹ Estimates.

The principal items of revenue and expenditure for 1921 and 1922 were estimated as follows:—

Revenue	Gold milreis	Paper milreis	Expenditure	Gold milreis	Paper milreis
Import duties, etc.	96,935,000	92,800,000	Ministry of Justice and Internal Affairs	3,177,000	69,875,000
Consumption taxes.	—	171,740,000	Ministry of Foreign Affairs	4,577,000	2,088,000
Circulation taxes	50,000	106,500,000	Ministry of Marine	200,000	61,057,000
Industrial revenue	2,900,000	141,751,000	Ministry of War	1,700,000	121,918,000
Extraordinary revenue	2,020,000	49,721,000	Ministry of Agri- culture	963,000	39,189,000
			Ministry of Trans- portation and Public Works	14,867	251,151
			Ministry of Fi- nance	43,868,000	156,818,000
Total (all sources)	102,005,000	624,761,000	Total expenditure	75,680,000	711,640,000

The consolidated foreign debt of Brazil on December 31, 1920, amounted to 1,03,035,534*l.* and 322,249,500 francs. The consolidated internal debt amounted (December 31, 1920) to 1,113,484 contos of reis. The currency in circulation amounted to 1,729,061,000 milreis; the conversion fund to 20,922,410 milreis gold; the guarantee fund to 48,391,020 milreis gold; and unredeemed bills and notes to 14,632,500 milreis gold and paper. On December 31, 1919, the total currency was 1,749,974,000 milreis.

The internal and foreign debt of each of the States of Brazil for 1919 was as follows:—

State	Internal Debt	Foreign Debt	State	Internal Debt	Foreign Debt
	£	£		£	£
Alagoas	600	500,000	Paraná	15,150	2,334,625
Amazonas	34,583	6,955,420	Pernambuco	20,466	3,669,322
Bahia	37,668	5,254,933	Piauí	516	—
Ceará	2,864	570,500	Rio de Janeiro	22,779	4,936,500
Espírito Santo	6,808	1,752,618	Rio Grande do Norte	760	394,006
Federal District	129,225	15,139,280	Rio Grande do Sul	37,172	—
Goyaz	—	—	Santa Catharina	4,780	2,512,869
Maranhão	2,546	715,436	São Paulo	76,297	6,132,037
Matto Grosso	1,820	—	Sergipe	3,885	—
Minas Geraes	60,141	7,401,220			
Pará	7,773	2,932,774	Total	27,170,709	61,201,540
Parahyba	—	—			

To this must be added the debts of the municipalities, amounting to 11,229,573*l.* The total indebtedness of Brazil is thus 276,575,178*l.*, made up as follows:—Federal foreign debt, 116,169,571*l.*; Federal internal debt, 60,803,785*l.*; foreign debts of States, 61,201,540*l.*; internal debts of States, 27,170,709*l.*; debts of municipalities, 11,229,573*l.*

On July 24, 1912, a bill was introduced into the Senate, making it necessary for the States to obtain the Federal authorization before contracting any loans.

Defence.

Under the military law of January, 1908, reformed in 1915, military service is obligatory on every Brazilian from 21 years of age to 44. The terms of service are 9 years in the army 'first line' (1 or 2 in the ranks, the rest in the reserve), and 14 years in the 'army second line' (7 in the National Guard and 7 in the reserve of the same). The reservists are called up for training annually for 4 weeks, besides which there is rifle practice once a month. The men in the territorial army also have an annual training of 2 to 4 weeks. The army consists of 13 regiments of infantry each of 3 battalions, and 21 battalions of rifles, of 15 regiments of cavalry of 4 squadrons, 10 regiments of field artillery of 6 batteries each with 4 guns, 6 horse artillery batteries, 5 howitzer groups of 2 batteries, 6 mountain batteries, 5 battalions of engineers, 1 railway battery, 27 batteries coast artillery, 3 companies of independent infantry, and 10 companies of machine guns. The country is divided into 7 military regions; the active army into 5 divisions, each of 2 brigades infantry, 1 brigade artillery, 1 regiment cavalry, 1 battalion engineers, 1 battalion transport, etc. There are also 3 cavalry brigades, all stationed in the south near the frontiers of the three southern republics. A cavalry brigade consists of from 2 to 3 regiments. The total peace strength is at present 54,000 (3,627 officers). Mobilisation would yield about 120,000. The gendarmerie is 26,000 strong, capable of expansion to 130,000. Infantry are armed with the Mauser rifle, the field

and horse artillery have a Krupp 12 pr., which is being replaced by French guns

Ships of the Brazilian navy are as follows:—

Laid down	Name	Displacement	Armour		Principal Armament	Torpedo Tubes	H.-P.	Nominal speed
			Belt	Gun				
1907	DREADNOUGHTS. (Minas Geraes . . .)	19,281	9	12	12—12in., 22 4·7in.	—	23,500	21
	(São Paulo . . .)							
1898	COAST DEFENCE SHIPS. (Deodoro . . .)	3,200	14	8	2 9·2in., 4 4·7in.	—	3,400	14
	(Floriano . . .)							
1907	PROTECTED CRUISERS. (Bahia . . .)	3,500	—	—	10 4·7in.	—	18,000	20
	(Rio Grande do Sul . . .)							
1895	Barroso . . .	3,450	—	—	6 6in., 4 4·7in.	2	7,500	20

There are 2 river monitors (*Maranhão* and *Pernambuco*), 4 river gunboats, 10 Yarrow destroyers, 1 first-class torpedo boat, a mine layer, 3 submarines, and a submarine salvage vessel. Five destroyers and three large submarines are preparing. Six ex-German destroyers were allotted to Brazil to be disarmed and used for police purposes.

There are three naval arsenals—at Rio de Janeiro, Pará, and Ladario de Matto Grosso (this latter a river arsenal). It is announced that the arsenal in the Isla das Cobras at Rio will be proceeded with. The navy numbered in 1918, 693 officers, 1,009 petty officers, and 8,445 seamen

Production and Industry.

Brazil is an agricultural country, though only a small fraction of its soil has been brought under culture. Agricultural industries are encouraged by the State governments. Coffee is the chief product cultivated, and after that sugar, tobacco, and cotton, maté (Paraguay tea), indiarubber, timber, cocoa, and nuts. The four states of São Paulo, Rio de Janeiro, Espírito Santo, and Minas Geraes, the combined areas of which cover about one-eighth of the entire area of the Republic, are the principal districts for coffee growing. Four-fifths of the coffee of the world comes from these parts; more than half of the world's supply from São Paulo alone. The average annual crop of Brazil may be estimated at about 12 million sacks (1 sack = 132 pounds). For 1921-22 the estimated produce was 8,030,000 bags. India-rubber is the other great natural product of the country. About one-half of the world's supply comes from Brazil, the principal rubber-growing districts being Manaos, and Pará. In 1917, the rubber crop was 41,500 tons (36,500 tons in 1916). In 1917 the production of cotton was 75,000 tons, and in 1919 it was estimated at 119,500 tons. Cocoa is produced in many States (60,000 tons in 1918), but chiefly in Espírito Santo, and Bahia, where also the tobacco industry flourishes. The annual production of tobacco is 50,000,000 kilos. The average annual production of sugar may be taken as 300,000 tons (526,116 tons for 1921-22). In 1918 the production of maize was 5,000,000 metric tons.

The census of cattle for 1920 showed that there were in Brazil 30,705,400 cattle; 18,399,000 swine; 10,633,000 sheep; 10,048,570 goats; 7,239,690 horses; 3,207,940 mules.

Both the forests and mines of Brazil are important. There has been a lumber development in the last few years, and pine has become an important export (152,000 metric tons in 1918). The mines, with certain reservations, belong to the proprietors of the soil. Coal deposits exist in Rio Grande do Sul, Santa Catharina, Paraná, and São Paulo, much of the coal being of inferior quality. Gold is found; diamond districts are Diamantina, Grão Mogol, Chapada Diamantina, Bagagem, Goyaz, Matto Grosso, and other States. Petroleum also exists in workable quantities. Manganese ores are worked in Rio de Janeiro and Minas Geraes (export in 1920: 453,737,000 kilos.). The greater part of the world's supply of monazite comes from Brazil. Other mineral exports are mica and talc, copper ore, platinum, rock crystal, agate, but all of these are found in small quantities.

The most important manufacturing industry in Brazil is cotton weaving, which in the past 25 years has developed to such an extent that all but the finer grades are made in this country, and the importation of cotton goods from Europe is decreasing. There were in 1921 242 cotton factories with 1,521,300 spindles and 108,960 workmen, having a capital invested in them of 337,700 milreis, and an output valued at 442,000 milreis. The manufacture of silk is also being encouraged; the Federal Government grants premiums to silk cocoon producers. There are 13 silk mills, 35 woollen mills, and 16 jute mills in Brazil. There were 2,056 tobacco factories in Brazil in 1916. In Pernambuco there are 47 sugar factories, in Campos (Rio de Janeiro) 40, in Bahia 12, and in other parts of Brazil 15. In Rio de Janeiro flour milling is important, wheat being imported chiefly from the Argentine and Uruguayan Republics, but the imports of wheat flour are very large, mostly from the Argentine Republic and the United States. Brewing, being protected, is prosperous. Altogether there are 11,335 factories in Brazil, with a capital of 665,676,000 milreis, an annual output of 741,536,000 milreis, and 151,841 employees. Efforts are being made to establish a fishing industry.

In the southern States of Brazil there are prosperous German, Russian, and Italian colonies. The colonies maintained by the Union are the nineteen following:—Affonso Penna (founded in 1908), in the State of Espírito Santo; Visconde de Maua (1908) and Itatiaya (1908) in the State of Rio de Janeiro; João Pinheiro (1910) and Inconfidentes (1910) in that of Minas Geraes; Bandeirantes (1908) and Monção (1910) in that of S. Paulo; Ivahy (1907), Tayo (1908), Iraty (1908), Vera-Guarany (1909), Senador Correia (1907), Jesuino Marcondes (1907), Cruz Machado (1910), Apucarana (1912), and Yapo (1913), in Paraná; Anitapolis (1908), Senador Esteves Junior (1910) and Rio Branco (1913), in Santa Catharina. On December 31, 1918, the population of the Federal Colonies was 37,535, including 3,172 Germans, 12,209 Brazilians, and 22,154 of other nationalities.

Commerce.

Imports and exports (excluding specie) conversions at current rates varying from 11½d. to 16d. per milreis (paper):—

	1916	1917	1918	1919	1920
	£	£	£	£	£
Imports . . .	40,369,436	44,509,646	52,816,883	78,177,000	125,005,000
Exports . . .	56,462,103	63,031,161	61,167,975	130,035,600	107,521,000

Principal exports in 1919 and 1920 were (metric ton = 2,204·6 lbs.):—

—	Quantities 1919	Quantities 1920	Value 1919	Value 1920
			£	£
Coffee (Sacks)	12,963,000.	11,523,000	72,607,000	52,817,000
Rubber (Metric tons)	33,252	23,531	6,240,000	3,712,000
Tobacco "	43,280	31,460	4,357,000	2,406,000
Sugar "	69,429	109,141	3,714,000	6,147,000
Yerba Maté (Tea) (Metric tons)	90,200	90,686	3,201,000	2,978,000
Cocoa (Metric tons)	62,584	54,419	5,602,000	3,821,000
Cotton "	12,153	24,696	2,437,000	5,502,000
Leather "	56,790	37,265	6,027,000	4,021,000
Hides "	5,166	9,966	3,072,000	2,990,000
Frozen and chilled meat . . .	549,094	63,600	3,592,000	4,299,000

The distribution of the imports and exports in 1919 and 1920 was as follows:—

From or to	Imports		Exports	
	1919	1920	1919	1920
	£	£	£	£
United Kingdom	12,737,231	27,274,778	9,433,666	8,759,393
Germany	201,033	5,875,913	701,497	6,184,210
United States	37,422,752	51,939,093	54,079,947	44,987,187
France	2,967,405	6,847,672	27,267,743	12,850,008
Portugal	2,364,542	2,614,180	693,138	2,049,369
Austria	4,646	64,920	444,963	53,286
Belgium	110,132	2,207,116	4,740,757	2,884,406
Argentina	12,032,250	10,544,889	5,836,881	7,093,995
Uruguay	1,741,645	1,681,969	5,708,210	4,778,021
Holland	314,190	639,853	4,090,386	3,011,097
Italy	1,067,111	3,079,707	3,821,439	7,826,860

The chief articles of commerce between the United Kingdom and Brazil (Board of Trade statistics) in two years were:—

Imports into U.K. from Brazil	1919	1920	Exports from U.K. to Brazil	1919	1920
	£	£		£	£
Rubber	1,997,385	1,795,904	Coal, cinders, &c. . . .	503,706	726,671
Raw cotton	480,381	3,434,648	Cottons and yarn	1,928,588	4,096,977
Coffee	1,703,689	715,607	Machinery	714,872	1,661,309

Total trade between United Kingdom and Brazil (according to Board of Trade returns) for 5 years:—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Brazil into U.K.	9,985,235	8,849,481	10,821,100	12,025,378	5,866,332
Exports to Brazil from U.K. .	7,185,841	8,845,911	10,741,686	24,289,414	10,483,721

Shipping and Navigation.

* In 1920 there entered the ports of Brazil 24,829 steam and sailing vessels of 24,941,829 tons, and cleared 24,736 steam and sailing vessels of 24,769,904 tons.

The merchant navy in 1919 consisted of 588 steamers of 433,000 tons net, and 55 sailing vessels of 17,920 tons net. All coasting and river vessels must be Brazilian. The coast has a length of 4,106 miles. The Brazilian Lloyd, for coasting trade, maintains a monthly service between Rio de Janeiro and New York, and has also inaugurated a service between Liverpool, Portugal and Brazil.

Inland waterways mostly rivers, are open to navigation over some 40,300 miles. By means of its waterways Brazil is connected with the neighbouring States.

Internal Communications.

Railway history in Brazil begins in 1854 with 89 miles. Brazil possessed on December 31, 1920, railways of a total length of 17,847 miles open for traffic. Of this total 9,455 miles of railway were the property of the Union (3,980 miles are administered directly and the rest are farmed out); 6,231 miles were privately owned; and 1,527 miles belonged to the States. The individual States which possess the greatest railway mileage are São Paulo, with 4,160 miles; Minas Geraes with 4,139 miles; Rio de Janeiro and Federal District with 2,057 miles; Rio Grande do Sul with 1,708 miles; and Pernambuco with 1,300 miles. The Central Brazil Railway (1,563 miles) is the principal railway in Brazil, and is owned by the State. The entire system joins up the railways of Brazil with those of Uruguay, Argentina and Paraguay.

The telegraph system of the country is under control of the Government. In 1919 there were 54,536 miles of line, including 26,100 miles of Government property, 17,159 miles of railway property and 11,267 miles of submarine cables. There were 850 telegraph offices. The number of messages was 5,350,606. Receipts in 1917, 864,917; expenditure, 963,363.

The Post Office carried (1917) a total of 31,577,090 letters, and 77,344,613 pieces of printed matter. Altogether the post office in 1917 despatched 4,586,187 sacks of mail, received 3,825,710, and handled in transit 2,754,987. There were 3,696 post-offices in 1920. Receipts in 1917, 12,800 contos; expenditure, 21,132 contos.

There were 56,760 telephones in the country in 1917; total length of wires, 252,318 miles in 1918. A wireless system is now in process of completion. Fifteen new stations were erected along the Amazon and Paraguay rivers, and 5 on the coast.

A decree was issued in 1913 adopting the standard time and longitude of Greenwich (instead of that of Rio de Janeiro) as from January 1, 1914.

Money and Credit.

The *Caixa de Conversão* was founded in 1906, and up to May, 1910, it received gold in exchange for notes at the rate of 1s. 3d. per milreis. It then suspended operations, having in deposit at that date 20,000,000l., the maximum fixed by law. On January 23, 1911, it recommenced operations, Congress having fixed the maximum deposit at 60,000,000l. at the exchange of 1s. 4d. per milreis. On March 1, 1921, it had gold to the value of 62,538,352 milreis.

At the end of December, 1920, the activities of the banks of Brazil totalled 9,791,536 contos of reis (end of 1919, 8,109,558 contos of reis).

Money, Weights, and Measures.

MONEY.

The unit is 1 real (*pl.* reis); bronze coins, 20 and 40 reis (100 reis = 1*gd.*); nickel coins, 100, 200, and 400 reis (400 reis = 6½*d.*); silver, 500, 1,000, and 2,000 reis. The *Milreis* (1,000 *Reis*) is of the par value of 2*s.* 2·934*d.* (practically 27*d.*). 1,000,000 reis is called A conto of reis.

The paper currency is of the following denominations: 1,000 reis, 2,000 reis, 5,000 reis, 10,000 reis, 20,000 reis, 50,000 reis, 100,000 reis, 200,000 reis, 500,000 reis, and 1,000,000 reis.

WEIGHTS AND MEASURES.

The French metric system, which became compulsory in 1872, was adopted in 1862, and has been used since in all official departments. But the ancient measures are still partly employed in certain rural districts of the interior. They are:—

The <i>Libra</i>	.	.	.	=	1·012 lbs. avoirdupois.
„ <i>Arroba</i>	.	.	.	=	32·38 „ „
„ <i>Quintal</i>	.	.	.	=	129·54 „ „
„ <i>Alqueire</i> (of Rio)	.	.	.	=	1 imperial bushel.
„ <i>Oitava</i>	.	.	.	=	55·34 grains.

Diplomatic and Consular Representatives.

1. OF BRAZIL IN GREAT BRITAIN.

Ambassador.—Domicio da Gama (appointed September 21, 1919).

First Secretary.—Luiz Avelino Gurgel de Amaral.

Second Secretaries.—Carlos Moniz Gordilho and Antonio Camillo de Oliveira.

Archivist.—George R. Moore.

Honorary Attaché.—Fenelon Alcoforado.

Naval Attaché.—Commander Augusto Burlamaqui.

Commercial Attaché.—Julio Barboza Carneiro.

Consul-General in Liverpool.—Dario Freire.

Consul-General in London.—J. M. de Campos Paradedá.

There are Consular representatives at Belfast, Birmingham, Bristol, Cardiff, Cork, Cowes, Dover, Dublin, Dundee, Falmouth, Glasgow, Hull, Leeds, Leith, Manchester, Milford Haven, Newcastle, Plymouth, Portsmouth, Sheffield, Southampton.

2. OF GREAT BRITAIN IN BRAZIL.

Ambassador.—The Rt. Hon. Sir John Tilley, K.C.M.G., C.B., appointed December 12, 1920.

Secretaries.—J. H. Leche, O.B.E., and G. H. Thomson.

Commercial Secretaries.—Ernest Hambloch and E. Compton.

Naval Attaché.—Commander C. L. Backhouse.

There are Consular representatives at Rio de Janeiro (C.G.), Bahia, Pará, Pernambuco, Rio Grande do Sul, Santos, Ceará, Maceió, Maranhão, Porto Alegre, Manáos, São Paulo, Corumba, Morro Velho, Victoria, Aracaju, Ilheus, and other towns.

BULGARIA.

(BULGARIYA.)

Reigning King (Czar).

Boris III., eldest son of Ferdinand of Saxe-Coburg and Gotha, and the late Marie Louise (died January 31, 1899), eldest daughter of Duke Robert of Parma, born January 30, 1894, succeeded to the throne on the abdication of his father, October 3, 1918.

Brother and Sisters of the King.—(1) Prince *Cyril*, born November 17, 1895; (2) Princess *Eudoxia*, born January 17, 1898; and (3) Princess *Nadejda*, born January 30, 1899.

According to the Constitution the Sovereign must profess the Orthodox religion, and must reside permanently in the country. The royal title is hereditary.

According to the budget of 1921-22, the civil list is fixed at 1,800,000 leva (francs), besides 1,500,000 leva for the maintenance of palaces, &c.

Constitution and Government.

The Principality of Bulgaria was created by the Treaty of Berlin, signed July 13, 1878. It was ordered by the Treaty that Bulgaria should be constituted an autonomous and tributary Principality under the suzerainty of His Imperial Majesty the Sultan with a Christian Government and a national militia. The Prince of Bulgaria should be freely elected by the population and confirmed by the Sublime Porte, with the consent of the Powers. On October 5, 1908, Bulgaria declared her independence. The difficulty as to compensation to the Turkish Government in respect of railway claims was

arranged by an understanding between the Turkish Government and the Oriental Railways Company, and the Powers recognised Bulgarian independence, and the title of 'King of the Bulgarians' assumed by Prince Ferdinand.

Eastern Rumelia (since its union with Bulgaria also known as Southern Bulgaria) was created by the Treaty of Berlin, signed July 13, 1878. It was to remain under the direct political and military authority of the Sultan, under conditions of administrative autonomy, with a Governor-General nominated by the Porte. On September 18, 1885, the Government was overthrown by a revolution, and the union of the province with Bulgaria proclaimed. On April 6, 1886, the Sultan agreed that the government of Eastern Rumelia should be confided to the (then) Prince of Bulgaria as Governor-General.

On September 30, 1912, Bulgaria allied with Serbia, Greece and Montenegro commenced war on Turkey (First Balkan War), which was ended by the Treaty of London on May 30, 1913, by which Turkey ceded to the Allies all its European territory west of a line drawn from Midia on the Black Sea to Enos on the Aegean, and also Crete.

The Balkan League broke up almost immediately after the signing of the Treaty of London, owing to disagreements among the allies as to the division of the territory ceded to them, and on June 29, 1913, war broke out among the allies (Second Balkan War). On July 10, 1913, Rumania intervened to impose peace on the allies and to exact for herself from Bulgaria an extension of her frontier. Peace came finally on August 10 (July 26 old style), 1913, by the Treaty of Bukarest, between Bulgaria on the one hand, and Rumania, Serbia, Greece and Montenegro on the other.

For frontier arrangements agreed to by the Treaty of Bukarest and the Turko-Bulgarian Treaty, *see* THE STATESMAN'S YEAR-BOOK for 1915, p. 759, and the maps in THE STATESMAN'S YEAR-BOOK for 1914.

By the Constitution of 1879, amended May, 1893, and June, 1911, the legislative authority was vested in a single Chamber, called the Sobranye or National Assembly, composed of 227 members. The members of it are elected by universal manhood suffrage at the rate of one member to every 20,000 of the population. Every member receives 150 leva (about 10s.) a day (including Sundays and holidays) during the session. All over 30 years of age who can read and write (except the clergy, soldiers on active service, persons deprived of civil rights, &c.) are eligible as representatives. The duration of the Assembly is four years, but it may be dissolved at any time by the King, when new elections must take place within two months. Laws passed by the Sobranye require the assent of the King. Questions concerning the acquisition or cession of territory, changes in the constitution, a vacancy on the throne, or the appointment of a regent have to be decided by a Grand Sobranye, elected for the special purpose in a manner similar to that in which the ordinary Sobranye is elected, but with double the number of members. Proportional representation was adopted in 1909.

Parties in the Sobranye (elected March 28, 1920):—Agrarians, 110; Communists, 49; Socialists, 8; Democrats, 24; Liberals, 6; Radicals, 8; Progressives, 8; Nationalists, 14.

The executive power is vested in a Council of Ministers nominated by the King. The present cabinet, after the latest remodelling on January 11, 1922, is composed as follows:—

Premier and Minister for Foreign Affairs.—Alexander Stambuliski.

Minister of the Interior.—Raiko Daskaloff.

Minister of Justice.—Peter Yaneff.

Minister of Commerce.—Alexander Radoloff.

Minister of Finance.—Marko Tourlakoff.

Minister of Public Works.—Tzanko Bakaloff-Tzerkovsky.

Minister of Posts and Railways.—Christo Manoloff.

Minister of Education.—Stoyan Omartchevsky.

Minister of Agriculture.—Alexander Oboff.

Minister of War.—Constantin Thomoff.

For local administration the country is divided into a number of Departments, each under a Prefect assisted by a Departmental Council and aided by several sub-prefects. Each community has its Kmet or mayor and its Council.

Area and Population.

The area of Bulgaria (1921) is 105,329 square kilometres, or 40,656 English square miles, and the population, according to a census taken on December 31, 1920, was 4,861,439 (2,434,940 males and 2,426,499 females), as against 4,337,513 (2,206,685 males and 2,130,828 females) in 1910.

By the Peace Treaty of Neuilly, signed on November 27, 1919, Bulgaria ceded Thrace to Greece and the Strumnitza line and a strip of territory on the north-west frontier to Serbia. Bulgaria was deprived of its Aegean littoral, but an efficient economic outlet to the same sea was provided to her by the Treaty.

Population of districts, according to census of December 31, 1920 :—

District.	Population	District.	Population
1. Bourgas	429,856	10. Pléven	396,765
2. Varna	203,572	11. Roussé	304,657
3. Vidin	278,658	12. Sofia	533,290
4. Vratza	376,675	13. Stara Zagora . .	550,668
5. Kustendil	229,930	14. Tirnovo	471,334
6. Mastanly	113,991	15. Choumen	323,011
7. Pachmanly	64,372		
8. Petritch	155,598	Total	4,861,439
9. Plovdiv	489,063		

The capital is the city of Sofia, with a population (census, 1920) of 154,431. The other principal towns, with population in 1920, are Philippopolis (Plovdiv), 63,418; Varna, 50,819; Ruschuk, 41,574; Slivno (Sliven), 28,695; Plevna (Pleven), 27,779; Stara Zagora, 25,491; Choumen, 23,975; Burgas, 22,272; Jambol, 19,921; Hascovo, 19,458; Pazardjik, 19,452; Vidin, 17,722; Vratza, 16,014; Kustendil, 15,086.

The movement of population (the latest available) in four years has been :

Years	Marriages	Living Births	Still-births	Deaths	Surplus of Births
1915	27,920	174,232	1,251	86,259	87,973
1916	8,704	89,741	562	87,546	2,195
1917	18,478	69,905	382	88,387	- 13,482
1918	71,643	92,350	338	127,233	- 34,883

Religion and Instruction.

The national faith is that of the Orthodox Greek Church, though, in 1870, in consequence of its demand for and acceptance of religious autonomy, the Bulgarian Church was declared by the Patriarch of Constantinople to be

outside the Orthodox Communion. The Church is governed by the Synod of Bishops. There are 11 Dioceses, viz., Sofia, Plovdiv, Stara Zagora, Sliven, Varna, Roussé, Tirnovo, Vratza, Lovetch, Vidin and Névrokoff, in addition to 4 in Macedonia and 1 in Thrace (suspended at present). The clergy, both Orthodox and of other religious bodies, are paid by the State and also receive fees for services at burials, marriages, &c.

There is a university at Sofia, with four faculties—History and Philology, Physics and Mathematics, Medicine, and Law.

Elementary education is obligatory and free for children between the ages of 7 and 14.

The following are statistics of various classes of State schools in Bulgaria for 1919-20.

Schools	Number	Teachers		Attendance	
		Male	Female	Male	Female
Elementary { National	3,601	5,141	5,675	290,890	214,394
{ Private .	1,382	1,686	157	97,654	29,227
Progymnasia { National	396	1,010	1,607	52,857	23,352
{ Private .	35	97	28	1,379	585
Incomplete { National	33	270	283	9,838	7,079
gymnasia { Private .	9	10	16	584	448
Complete { National	47	852	457	18,146	11,831
gymnasia { Private .	3	10	20	126	357

There are besides 33 institutions for special instruction with 363 instructors and an attendance of 4,219 males and 2,994 females; and 3 institutes for abnormal children.

Private schools are supported by religious communities, societies, and by missionaries.

Of the recruits who could neither read nor write, there were: in 1913, 17.76 per cent.; in 1914, 17.99 per cent.; and in 1915, 16.97 per cent.

Justice.

The lowest Court is that of the Justices of the Peace, who possess jurisdiction in minor civil and criminal cases. The Departmental Court, or Court of First Instance, is competent to pronounce sentence of death and penal servitude, and also acts as a Court of Appeal. Above these are three Courts of Appeal, sitting at Sofia, Philippopolis and Ruschuk. The highest tribunal is the Court of Cassation, sitting at Sofia, and composed of 12 judges.

Finance.

The estimated revenue and expenditure of Bulgaria for 5 years were as follows (25 leva = £1; the average rate during 1921 was about 600-700 leva):—

—	1917	1918	1919-20	1920-21	1921-22
	£	£	£	£	£
Revenue . . .	17,519,134	19,244,000	33,605,900	104,541,200 ¹	3,701,200 ²
Expenditure . . .	17,519,134	19,176,560	—	158,187,397	3,547,481

¹ At the nominal rate of exchange.

² At actual rate of exchange

Revenue and expenditure for 1921-22 :—

Revenue	Leva	Expenditure	Leva
Direct taxes . . .	349,500,000	Civil List . . .	15,492,880
Indirect taxes . . .	814,000,000	Audit Office . . .	5,158,040
State monopolies . . .	280,000,000	Public Debt . . .	677,197,063

State property . . .	332,290,000	" Finance . . .	116,548,710
Various . . .	252,300,000	" Justice . . .	62,011,040
		" War . . .	528,632,240
		" Commerce . . .	252,189,005
		" Agriculture . . .	74,583,400
		" Public Wks. . .	196,975,560
		" Railways, Post and Telegraphs . . .	377,851,440
Total . . .	2,590,840,000	Total . . .	2,693,237,083

On May 31, 1921, the total debt of Bulgaria was given as follows: Foreign debt: 3,209,035,035 francs and 24,967,047 leva (consolidated, 2,792,936,732 francs; non-consolidated, 416,098,333 francs and 24,967,047 leva). Internal debt: 3,399,190,966 leva (consolidated, 82,155,600 leva; non-consolidated, 3,317,035,396 leva).

Defence.

The pre-war peace strength of the Bulgarian army was about 3,900 officers and 56,000 other ranks. Its war strength was approximately 500,000 men.

Under the terms of the Treaty of Neuilly of November 27, 1919, the total military forces of Bulgaria must not in the future exceed 20,000 men, enrolled by voluntary system. The obligatory military service is abolished. All measures of mobilisation are prohibited and, in order to prevent the formation of a reserve, service in the ranks is to be for a minimum period of 12 years. Officers serving at the time when the treaty was signed must undertake to serve at least till the age of 40 and newly appointed officers serve for at least 20 years.

A frontier guard of 3,000 men voluntarily enlisted is permitted, and in addition the number of armed gendarmes, police, customs officials and forest guards must not exceed 10,000.

The maximum authorised armaments and munition supplies are :—

	Per 1000 men.	Munitions per arm.
Rifles or carbines . . .	1,150	500 rounds
Machine guns . . .	15	10,000 "
Trench mortars, light . . .	2	1,000 "
" heavy . . .	2	500 "
Guns or howitzers . . .	3	1,000 "

No military or naval aircraft are permitted.

The manufacture of arms, munitions and war material is only to be

carried out at one factory under State control. The importation and exportation of arms, and munitions is prohibited.

The Bulgarian Government has failed to obtain the authorised forces by voluntary enlistment; the total number voluntarily enlisted up to September, 1921, being only 3,500. The Bulgarian Government represented to the Allied Powers that this number was insufficient to maintain internal order, and in September, 1921, was authorised by the Council of Ambassadors to retain temporarily 13,000 frontier guards and gendarmes on a conscript basis in addition to the 3,500 men voluntarily enlisted.

Under the terms of the treaty Bulgaria has surrendered all warships and submarines, but is permitted to maintain on the Danube and along her coast 4 torpedo boats and 6 motor boats, all without torpedoes and torpedo apparatus, for police and fishing duties.

Production and Industry.

Agriculture is the chief occupation of the people. Land is held in absolute freehold by the owners and there is a land tax. The communes hold pasture-land and wood-land in perpetuity and pay no rent, and over such lands the members of the communes have grazing and wood-cutting rights.

About two-thirds of the population are engaged in agriculture, most of them being small proprietors holding from one to six acres. The methods of cultivation are primitive, but machinery is being gradually introduced.

The cultivated area of Bulgaria is 3,716,070 hectares, or 9,290,175 acres.

The area and yield of cereals for 2 years is given as follows:—

Cereals	1920		1921	
	Area	Yield	Area	Yield
	Acres	Tons	Acres	Tons
Wheat	2,208,292	816,437	2,388,832	1,156,927
Rye	469,040	153,827	494,622	213,112
Meslin	240,017	86,933	281,572	145,746
Barley	560,935	205,765	557,022	288,283
Oats	349,245	101,657	411,965	163,607
Spelt	24,650	7,159	23,052	9,161
Millet	32,510	10,367	27,645	12,210
Maize	1,423,715	529,638	1,434,197	873,440
Rice	6,557	3,087	7,095	4,583
Total	5,314,961	1,914,870	5,626,002	2,867,069

Fruit grows in abundance, especially in the neighbourhood of Kustendil; 87,855 acres are under vines, yielding 75,910 tons of grapes and 8,698,822 gallons of wine; under tobacco were 96,475 acres, yielding 29,304 tons; under cotton 3,137 acres, producing 1,714 quintals. There is also considerable silkworm culture.

In 1917 there were in Bulgaria 7,340,904 sheep, 924,554 goats, 1,885,620 head of cattle and buffaloes.

Industry is not much developed, though the State encourages industrial enterprise. In 1920 there were 486 industrial concerns aided by the State, 196 of which were connected with the preparation of foodstuffs.

Mining development has been slow. The country is rich in coal; there are three State mines (at Pernik, Bobovodo and Maritza), and several

privately owned mines. The coal mines at Pernik, worked by the Government, produced in 1920, 670,342 tons. Total coal production in 1920, 748,035 tons. Iron is found in large quantities; gold, silver, lead, manganese, and copper also exist in the country.

Commerce.

Imports and exports for 5 years :—

—	1915	1916	1917	1919	1920
	£	£	£	£	£
Imports . . .	2,939,798	3,577,121	6,739,661	33,557,649	88,553,209
Exports . . .	4,376,623	3,831,834	11,556,256	22,090,138	65,719,956

The following table shows the trade by principal countries for 2 years :—

Imports		Exports	
Country		Country	
	1919		1919
	Leva		Leva
U. Kingdom . . .	104,819,723	U. Kingdom . . .	21,273,518
Austria . . .	191,971	Austria-Hungary . . .	17,605,926
Belgium . . .	3,360	Belgium . . .	140,000
Germany . . .	302,564	France . . .	21,401,045
France . . .	5,779,772	Germany . . .	20,913,152

Imports from Bulgaria into U.K.	800	—	12,701	206,395	140,679
Exports to Bulgaria from U.K.	—	—	828,308	611,231	—

Shipping and Communications.

* The number of vessels entered at the Black Sea ports of Bulgaria in 1920 was 2,112 of 833,162 tons; number of vessels cleared, 2,097 of 823,099 tons. At the Danube ports there entered, in 1920, 2,724 vessels of 278,353 tons; and cleared, 2,706 vessels of 277,675 tons.

On March 31, 1921, there were in Bulgaria 2,088 miles of good roads, 2,637 miles of fair roads, and 1,851 miles of bad roads. Total: 6,576 miles of road.

In 1921, Bulgaria had 1,368 miles of railway of ordinary gauge and 214 miles of narrow gauge; total, 1,581 miles. All the lines belong to the State, which works them. Railways connect Sofia with the general European system.

There were, in 1920, 223 post and telegraph offices (99 urban and 124 rural), and 207 telegraph offices, making a total of 430 offices. Total correspondence handled in 1921, 26,727,766 letters, 24,899,662 postcards, 2,618,703 printed packets; postal revenue, 16,139 995 leva; expenditure, 26,873,819 leva. Length of telegraph line in 1920, 3,456 miles; of wire, 9,936 miles.

Money and Credit.

There is a National Bank of Bulgaria, with headquarters at Sofia and branches in the different towns of Bulgaria; its capital is 100,000,000 leva, provided by the State, and it has authority to issue both gold notes and silver notes. There is a State Agricultural Bank for making advances on personal security.

Deposits in the Postal Savings Bank of Bulgaria during 1921 amounted to 98,357,219 leva, and withdrawals to 115,869,943 leva. The balance in hand on January 1, 1922, was 287,036,952 leva.

There are a few Bulgarian gold coins, of the value of 100, 20, and 10 leva (francs), but the gold circulation is supplied by foreign 10 and 20 franc pieces. There are silver coins of $\frac{1}{2}$ lev, and 1 lev, 2, and 5 leva (francs); nickel coins of 2 $\frac{1}{2}$, 5, 10, and 20 stotinki (centimes); the notes of the National Bank circulate at par.

The metric system is in general use. On April 1, 1916, the Gregorian Calendar came into force in Bulgaria.

Diplomatic and Consular Representatives.

1. OF BULGARIA IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary.—Dimitri Stancioff. Appointed October 25, 1920.

Counsellor.—Pantcho Doreff.

Secretaries.—Stoyan Petrow-Tchomakoff and Dimitri Mamartcheff.

Attaché.—Boris Athanassoff.

2. OF GREAT BRITAIN IN BULGARIA.

Envoy Extraordinary and Minister Plenipotentiary.—Hon. William Augustus Forbes Erskine, C.M.G. Appointed October 1, 1921.

Secretaries.—F. J. R. Rodd and D. Mackillop.

Military Attaché.—Colonel A. W. F. Baird, C.B., &c.

Naval Attaché.—Commander W. N. Diggle, C.M.G.

Vice-Consul.—B. J. Gilliat-Smith.

There are Consular representatives at Sofia, Varna, Bourgas, Philippopolis and Rustchuck.

CHILE.

(REPÚBLICA DE CHILE.)

Constitution and Government.

THE Republic of Chile threw off allegiance to the Crown of Spain by the declaration of independence of September 18, 1810, finally freeing itself from Spanish rule in 1818. The Constitution voted by the representatives of the nation on May 25, 1833, with a few subsequent amendments, establishes three powers in the State—the legislative, the executive, and the judicial. The legislative power is vested in the National Congress, consisting of the Senate and the Chamber of Deputies. The Senate is composed of 37 members popularly elected by provinces for the term of six years, in the proportion of one Senator for every three Deputies; while the Chamber of Deputies composed of 118 members chosen directly by departments for a period of three years, consists of one representative for every 30,000 of the population, or a fraction not less than 15,000; the present number of deputies was determined in 1910 on the basis of the census results of 1907. Both bodies are chosen by the same electors. Electors must be 21 years of age, and able to read and write. The executive is exercised by the President of the Republic elected for a term of five years, by indirect vote, the people nominating, by ballot, delegates who appoint the President. A retiring President is not re-eligible. In legislation the President has a modified veto; a bill returned to the chambers with the President's objections may, by a two-thirds vote of the members present (a majority of the members being present), be sustained and become law. The day of a Presidential election is June 25 of the last of the five years of a Presidency.

President of the Republic.—Señor Don Arturo Alessandri. Born December 21, 1869. Assumed office December 23, 1920.

The salary of the President is fixed at 1,384*l.*, with 923*l.* for expenses.

The President is assisted in his executive functions by a Council of State of five members nominated by the President, and six members chosen by the Congress, and a Cabinet or Ministry divided into six departments, viz., Interior, Foreign Affairs, Justice and Public Instruction, Finance, Defence, Industry, Public Works and Railways.

LOCAL GOVERNMENT.

For the purposes of local government the Republic is divided into Provinces, presided over by *Intendentes*; and the Provinces into Departments, with *Gobernadores* as chief officers. The Departments constitute one or more municipal districts each with a council or municipality of 9 members, inhabitants popularly elected for three years. The police of Santiago and of the capitals of departments is organised and regulated by the President of the Republic at the charge of the national treasury.

Area and Population.

The Republic is divided into 23 provinces, subdivided into 82 departments, and 1 territory (Magallanes). Departments and territories are subdivided into 905 sub-delegations and 3,229 districts.

In 1884 the provinces of Tarapacá and Tacna were ceded to Chile by Peru. The cession of Tacna was originally for ten years, at the end of

which period a *plébiscite* of the province would decide to which country it should belong. As the *plébiscite* has not yet been taken, the provinces are still occupied by Chile.

Area and population of the provinces on January 1, 1920 (census figures) :—

Provinces	Area : Sq. Miles	Popula- tion 1920	Pop. per sq. Mile	Provinces	Area : Sq. Miles	Popula- tion 1920	Pop. per sq. Mile
Tacna .	8,999	38,912	4.51	Ñuble .	3,498	170,425	57.91
Tarapacá .	16,689	100,553	8.21	Concepción .	3,313	247,611	83.85
Antofagasta	46,408	172,330	5.07	Arauco .	2,180	60,233	85.07
Atacama .	30,711	48,415	2.08	Biobío .	5,353	107,072	20.06
Coquimbo .	14,098	160,256	13.67	Malleco .	3,303	121,429	42.13
Aconcagua	5,406	116,914	21.44	Cantín .	6,381	193,628	26.26
Valparaíso	1,775	320,388	200.20	Valdivia	8,991	175,141	21.83
Santiago .	5,893	685,358	108.61	Llanquihué .	34,773	137,206	4.49
O'Higgins	2,168	118,591	59.95	Chiloé .	6,979	110,331	14.35
Colchagua	3,851	166,342	42.54	Magallanes			
Curicó .	3,045	108,148	38.24	territory .	65,355	28,960	0.53
Talca .	3,864	133,937	33.93				
Maule .	2,812	113,231	39.28				
Linares .	3,969	110,284	32.71	Total .	289,829	3,754,723	13.93

Many islands to the north, west, and south belong to Chile. The coast-line is about 2,485 miles in length.

In 1885 the population numbered 2,527,320, in 1895, 2,712,145. In 1920 (last census), 3,754,723 (1,866,751 males and 1,887,972 females). Estimated population December, 1921, 3,792,241.

The population of the principal towns in 1920 (census figures) was :— Santiago, 507,296; Valparaíso, 182,242; Concepción, 66,074; Iquique, 37,421; Talca, 36,079; Chillán, 30,881; Antofagasta, 51,531; Viña del Mar, 33,441; Curicó, 15,579; Temuco, 28,546; Serena, 15,240; Talcaguano, 22,084; Valdivia, 26,854. The great majority of the population is of European origin. The indigenous inhabitants are of three branches, the *Fuegians*, mostly nomadic, living in or near Tierra del Fuego; the *Araucans* (101,118) in the valleys or on the western slopes of the Andes; the *Changos*, who inhabit the northern coast region and work as labourers.

Births, marriages, and deaths, exclusive of still-births :—

Year	Total Births	Illegitimate Births	Marriages	Deaths	Surplus of Births
1917	149,161	58,334	21,379	107,199	41,962
1918	145,871	55,832	21,614	108,667	37,204
1919	144,980	55,706	21,471	137,538	7,442
1920	146,725	55,326	24,932	115,426	31,797
1921 ¹	135,918	—	22,673	114,578	21,340

¹ From January to November.

Illegitimate births in 1920 were 377, and legitimate births 623 per thousand of the population. Immigration is small, but is encouraged by the Government.

Religion.

The Roman Catholic religion is maintained by the State, but according to the Constitution all religions are respected and protected. There is one archbishop (Santiago), three bishops, and four vicars apostolic. There were in 1920, 347 parishes in the Republic, 619 churches, and 774 chapels.

Instruction.

Education is gratuitous and at the cost of the State, and since August 26, 1920, compulsory. At the 1907 census, 40 per cent. of the population were illiterate. Professional and secondary instruction is provided in the Universities (one belonging to the State, The University of Chile, the other The Catholic University) and the National Institute of Santiago, and in the lyceums and colleges established in the capitals of provinces, and in some departments. In the State University the branches included are theology, law, and political science, medicine and pharmacy, physical and mathematical sciences, philosophy, literature, and the fine arts. In 1920, in the State University there were 4,502 matriculated students and 358 teachers. In 1920, the Catholic University had 614 students. An Industrial University was opened at Valparaiso (Universidad Industrial de Valparaiso), and another at Concepcion (University of Concepcion) in 1920. There were in 1920, 3,214 public primary schools with 346,386 pupils, and 7,361 teachers; and 429 private primary schools with 991 teachers and 54,875 pupils; 15 public normal schools with 2,206 pupils and 434 teachers; 153 public and 139 private secondary schools with 32,880 and 20,006 pupils respectively; 11 public commercial schools with 176 teachers and 2,990 pupils. There are besides agricultural schools, schools of mines, and professional schools. Other educational institutions are the Paedagogic Institute, the National Conservatory of Music, the National Observatory School of Arts and Trades, Institute for Deaf Mutes, School for the Blind, and public museums. The cost of maintaining the public primary schools in 1920 was 952,577 $\frac{1}{2}$., that of the national normal schools, 193,582 $\frac{1}{2}$., and that of the Government secondary schools, 437,500 $\frac{1}{2}$. The National Library contains 286,330 volumes.

There were in 1920, 911 newspapers and journals published in Chile, including 101 dailies and 313 weeklies.

Justice, Crime, Pauperism.

There are, in addition to a High Court of Justice in the capital, seven Courts of Appeal distributed over the Republic, Tribunals of First Instance in the departmental capitals, and subordinate courts in the districts. On January 1, 1921, there were 2 central prisons with 1,202 inmates (all men), 20 penitentiaries with 1,056 (963 men and 93 women), 82 prisons, and 18 houses of correction for women with 6,641 inmates, and 3 reformatory schools, with 344 inmates (197 boys and 147 girls).

The police number 10,738 (836 officers).

At 114 hospitals in Chile in 1918 there were admitted 140,039 patients.

Finance.

In recent years the revenue and expenditure (ordinary and extraordinary) were as follows :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1916	13,891,101	12,142,096	1919	9,380,829	13,760,581
1917	16,020,596	14,423,554	1920 ¹	20,545,054	33,264,484
1918	18,743,250	16,621,210	1921 ¹	24,096,225	27,153,937

¹ Estimates.

The following table gives the main items of the Budget for 1921 :—

Revenue			
	Gold pesos		Paper pesos
Nitrate export dues (65 million quintals) . . .	101,075,000	Customs and bond . . .	50,000,000
Iodine and borax, export dues . . .	1,500,000	Surcharge of 50 per cent. . .	25,000,000
Consular dues . . .	3,000,000	Dues on postal packets . . .	2,500,000
Treasury revenue . . .	2,000,000	Despatch of cases . . .	2,000,000
Interest on Municipal loans . . .	1,407,000	Stamp tax . . .	18,000,000
		Posts and telegraphs . . .	12,800,000
		Tobacco tax . . .	9,000,000
		New tobacco tax . . .	9,000,000
		Wine, beer and spirits tax . . .	7,000,000
		Property tax . . .	20,000,000
		Death duties . . .	2,000,000
		New death duties . . .	1,600,000
		Bank tax . . .	2,500,000
		Drainage contribution . . .	2,000,000
		Insurance companies' tax . . .	1,000,000
		Rent of land in Tierra del Fuego . . .	1,400,000
		Charter of ships . . .	1,000,000
		Mint revenue . . .	2,500,000
		Drinking water contribution . . .	6,266,900
		Arica-La Paz Railway . . .	6,299,000
		Treasury revenue . . .	7,000,000
Total (including all items) . . .	110,432,000	Total (including all items) . . .	189,765,900

Particulars as to main items of expenditure are as follows :—

Departments	Paper pesos	Gold pesos	Departments	Paper pesos	Gold pesos
Interior . . .	73,224,310	176,732	Navy . . .	32,497,738	4,082,045
Foreign Relations, etc. . .	2,759,933	2,085,769	Industry and Public Works . . .	24,870,265	82,549
Justice . . .	12,306,275	—	Railways . . .	6,805,383	1,833
Public Instruction . . .	46,414,388	239,560			
Treasury . . .	35,437,212	48,648,192 [*]	Total (all items) . . .	281,607,860	49,154,835
War . . .	61,009,887	886,162			

On December 31, 1920, the foreign debt amounted to 378,009,760 gold pesos (28,350,732*l.*) and the internal debt to 95,149,690 paper pesos.

On June 30, 1921, the value of the 10,370 national properties was 377,477,427 pesos currency.

Defence.

The Chilean Army is a national militia in which all able-bodied citizens are obliged to serve. Liability extends from the 18th to the 45th year, inclusive. Recruits are called up in their 20th year, and are trained for one year. Afterwards they serve for 9 years in the reserve of the active army, after which they belong till the completion of their 45th year to the second reserve. The latter is organised as a second-line army.

Chile is divided into 4 zones or military districts, each of which furnishes a complete division on mobilisation. There are 49 battalions of infantry, 1 regiment of railway workers, 1 battalion of telegraphers, 8 regiments of cavalry, 2 batteries of horse artillery, 32 batteries of field artillery, 8 batteries of mountain artillery, 2 battalions of fortress artillery, 8 battalions of engineers and 1 company for aerial service. The total strength of the active army in 1920 was 1,996 officers and 21,180 men.

The infantry are armed with the Chilean Mauser rifle (1895), calibre 7 mm., and the cavalry with a carbine of similar pattern and lance. The field artillery are armed with Q. F. Krupp guns.

In December, 1918, an Air Force was formed under British instruction, with a nucleus of 14 seaplanes and 80 aeroplanes purchased in Great Britain. Military budget for 1921 was 2,615,731*l*.

The principal vessels of the Chilean fleet are as follows :—

Name	Launched	Displacement, Tons	Extreme Armouring, Inches	Main Armament	Torpedo Tubes	Indicated Horse-Power	Normal Speed
<i>Dreadnought</i>							
Almirante Latorre	1913	23,000	9	10 14-in. ; 14 6-in.	4	37,000	23
<i>Pre-Dreadnought.</i>

Chacabuco	1898	4,300	—	2 8-in. ; 10 4·7 in.	5	15,000	24·0

The *Almirante Latorre* served in the British Fleet during the war as the *Canada*. Four powerful destroyers built for Chile, which were taken over for the British service, have also been incorporated in the Chilean Navy. They were constructed at Cowes in 1914 ; 1,700 tons, 31·5 knots, 4 tubes, 2 4·7-in. and three smaller guns. Six submarines, H1 to H6 (450–520 tons, 800 h.p., 15–18 knots, length 150 feet), were transferred from the British to the Chilean Navy in 1917. In addition, there are 10 older destroyers and 3 torpedo boats.

Agriculture and Industry.

There are three zones in Chile—the arid zone in the north, the agricultural zone in the centre, and the forest zone in the south. Agriculture and mining

are the principal occupations. Total area of agricultural land is 42,183,663 acres; of forest area, 9,495,483 acres; of fruit trees, 276,704 acres; of meadows, 18,393,252 acres. Number of farms in 1920, 95,071. Chile produces annually large quantities of cereals, besides excellent wine, fruit, and vegetables. The principal crops of the harvest for 3 years are shown as follows:—

	Acreage			Produce in Cwts.		
	1917-18	1918-19	1919-20	1917-18	1918-19	1919-20
Wheat	1,312,327	1,235,400	1,192,722	12,584,606	11,459,500	10,840,782
Barley	98,803	110,500	127,325	1,438,024	1,590,775	1,607,448
Oats	80,054	51,000	65,190	922,176	586,600	751,802
Maize	65,905	58,635	62,662	734,472	652,500	734,546

¹ Tons.

² Gallons of wine.

For 1920-21 production (in quintals) was given as follows:—Wheat, 6,257,062; barley, 1,172,388; oats, 394,114.

On December 31, 1919, the live stock of Chile comprised 391,718 horses, 36,439 asses, 51,411 mules, 2,163,141 cattle, 4,500,196 sheep, 459,606 goats, 42,019 alpacas, and 292,431 pigs.

Dairy farms and the production of butter and cheese are on the increase. In Patagonia and Tierra del Fuego large tracts of country are devoted to sheep-farming. Extensive natural forests are found, the largest being found in the provinces of Valdivia (1,885,406 acres), Llanquihue (1,406,024 acres), and Chiloé (1,188,572 acres). The wealth of the country, however, consists chiefly in its minerals, especially in the northern provinces of Atacama and Tarapaca.

The metals obtained were gold, silver, copper (Chile is the world's second largest producer of copper), cobalt, and manganese; the non-metallic substances being coal, nitrate, borate, salt, sulphur, and guano. Iron-ore deposits are found in the provinces of Atacama and of Coquimbo, estimated at over 1,000,000,000 tons. All the coal mines of Chile are situated south of Valparaiso. Production in 1919, 1,485,491 tons.

Nitrate of soda, or 'salitre,' is not only Chile's most important article of export but the chief source of governmental revenue derived from export taxes. It is found in the section of the desert of Atacama, known locally as the 'pampa salitrera,' a territory comprising an area of some 500 miles in length, lying between latitude 15° and 26° south, and situated at an elevation above sea level of from 2,000 to 6,000 feet. This zone is divided into districts known as the pampas of Tarapaca, Tocopilla, Antofagasta, Aguas Blancas, and Taltal respectively. Production and exportation of nitrate in recent years are stated as follows:—

Years	Production	Exported	Years	Production	Exported
	Metric tons	Metric tons		Metric tons	Metric tons
1910	2,465,415	2,335,941	1918	2,859,803	2,919,177
1915	1,755,291	2,023,294	1919	1,703,240	803,961
1917	8,001,082	2,776,289	1920	2,606,571	2,870,869

In 1919 Chile had 2,871 manufacturing establishments, using raw materials to the value of 517,832,812 gold pesos, which were manufactured into merchandise to the value of 905,151,651 gold pesos. The number of workmen employed was 71,464.

Commerce.

Imports and exports (including re-exports) (special trade, including bullion and specie) :—

—	1916	1917	1918	1919	1920
	£	£	£	£	£

Oats . . .	24,128	573,925	Apparel . . .	5,902	98,482

Total trade between Chile and United Kingdom for 5 years :—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Chile to U.K. .	13,222,619	19,330,993	7,344,655	12,942,932	6,563,839
Exports to Chile from U.K. .	4,638,361	6,381,624	4,779,259	9,661,998	5,154,314

Shipping and Navigation.

The commercial navy of Chile consisted, in 1920, of 114 steamers of 51,815 tons net and 25 sailing vessels of 9,925 tons net. The shipping entered and cleared at the ports of Chile in 1920 was as follows :—Entered, 14,666 vessels of 14,925,601 tons ; cleared, 14,792 vessels of 15,001,446 tons. Of the total entered, 1408 steamers of 4,213,564 tons, and of those that cleared, 1,380 of 4,167,538 tons, were British.

Communications.

In 1920 there were in Chile 22,046 miles of public road, and 850 miles of navigable river, and 497 miles of navigable lakes.

The Longitudinal Railway of Chile, traversing the Republic from north to south over a distance of 2,862 miles, is (1920) a government-owned line, embracing with its spurs and the Arica to La Paz Railway (271 miles) an extent of 3,133 miles. There are also 2,270 miles of privately owned lines, making a total of 5,403 miles. Electrification of the railways has been commenced (1921) on the line between Valparaiso and Santiago, a distance of 117 miles.

The 966 post-offices in 1920 dispatched 104,492,991 postal packets, of which 5,342,994 were sent abroad. These included 4,874,032 letters for abroad, 35,386,953 home letters.

The length of telegraph lines at the end of 1920 was 16,353 miles of line (9,866 miles of Government line) and 18,572 miles of wire (Government telegraphs alone). In 1920 there were 619 telegraph offices ; 12,057,380 messages were sent. The length of telephone line was 52,284 miles, and of wire 96,160 miles (1920). Number of subscribers, 24,493.

Work has progressed on the several wireless stations now under construction along this coast, which with those now completed will form a chain composed of Arica, Antofagasta, Coquimbo, Valparaiso, Talcahuano, Valdivia, Puerto Montt, and Punta Arenas. A wireless station is also being erected on the Juan Fernandez Islands, about 400 miles west and south of Valparaiso. Total number of stations in 1919, 32.

Money and Credit.

In 1912 a law was promulgated establishing a Bank of Issue (Caja de Emision). By means of this the banks can issue certain quantities of paper

money in exchange for an equivalent gold deposit, at the rate of 12*d.* per peso at first and 18*d.* per peso subsequently.

There are a number of joint-stock banks of issue with agencies in Chile. Their joint capital amounted on December 31, 1920, to 296,388,784 paper pesos and 2,451,022 gold pesos, and their reserve funds to 116,294,381 paper pesos and 20,589,105 gold pesos. The largest of the banks is the Bank of Chile with a paid-up capital of 60,000,000 pesos. The banks are required to guarantee their note issue by depositing gold, Government notes, or securities in the Treasury. There are also land banks which issue scrip payable to bearer and bearing interest, and lend money secured as a first charge on landed property and repayable at fixed periods. Two institutions specialise in savings accounts, the National Savings Bank of Chile, and the Savings Bank of Santiago. At the National Savings Bank of Chile (*Caja Nacional de Ahorros*) the number of deposit accounts on December 31, 1920, was 678,534 and the deposits amounted to 146,622,862 pesos. At the Savings Bank of Santiago there were 307,158 deposit accounts, and the deposits amounted to 56,476,636 pesos.

The currency is mostly paper; the time fixed for the conversion of legal tender paper money was deferred till December 31, 1921. On December 31, 1920, the conversion funds in hand amounted to 114,110,600 gold pesos, made up as follows:—In England, 23,991,881 pesos, and Chilean gold in bars to the value of 90,118,719 pesos.

Money, Weights, and Measures.

According to the Act of 1895, the coinage of Chile is as follows:—Gold coins are 20, 10, 5 peso pieces, called respectively *Condor*, *Doblon*, and *Escudo*. The 10-peso gold piece weighs 5·99103 grammes·916 fine and therefore contains 5·49178 grammes of fine gold. Silver coins are the *peso*, weighing 9 grammes, 0·720 fine, and the fifth, tenth, and twentieth of a peso. Bronze coins (95 of copper to 4 of tin and 1 of zinc) are the *centavo* and 2½-, 2-, and ½-centavo pieces. The monetary unit is the twentieth part of a condor or the (uncoined) gold peso, of the value of 1*s.* 6*d.* Its use is obligatory in transactions with the Customs Department of the Government; it serves, too, as the basis of perhaps the larger half of the trade in imported merchandise, though the actual gold coin is not in these cases usually tendered. Coins minted in 1913:—2,656,280 pesos gold. (No later mintage.) A forced paper currency is in general use, the paper peso varying considerably in relative value, and representing (1920) about 12·067*d.* Total paper money issued and in circulation on November 30, 1921, 313,545,453 pesos.

The metric system has been legally established in Chile since 1865, but the old Spanish weights and measures are still in use to some extent.

On August 31, 1918, Greenwich time was adopted in Chile in place of Chilean time.

Diplomatic and Consular Representatives.

1. OF CHILE IN GREAT BRITAIN.

Envoy and Minister.—Agustin Edwards (February 21, 1911).

First Secretaries.—Manuel Salinas and Jorge Silva.

Second Secretary.—Raul Valdevieso.

Financial Adviser.—Luis Waddington.

Juridical Adviser.—Alejandro Alvarez.

Naval Attaché.—Commander Carlos A. Jouanne.

Military Attaché.—Major Juan Negrete.

Attachés.—Julio Bittencourt, Augustin R. Edwards, and Santiago Monk.

Commercial Attaché.—Jorge Buchanan.

Consul-General in London.—Adolfo Ortuzar.

There are Consular representatives at Belfast, Cardiff, Dublin, Edinburgh, Glasgow, Hull, Liverpool (C.G.), Nottingham, Queenstown, Sheffield, Southampton and many other places.

2. OF GREAT BRITAIN IN CHILE.

Envoy and Minister.—J. C. T. Vaughan, C.M.G., M.V.O. (1918).

Secretary.—C. H. Bateman.

Commercial Secretary.—W. F. Vaughan Scott.

Naval Attaché.—Lieut.-Commander Lloyd Hirst, R.N.

British Consul-General at Valparaíso.—J. M. MacLeod, C.M.G.

There are Consular representatives at Coquimbo (C.), Antofagasta (C.), Arica (V.C.), Caldera, Coronel, Iquique (C.), Lota, Junín (V.C.), Pisagua (V.C.), Punta Arenas (V.C.), Talcahuano (V.C.), Tocopilla, Tomé and other centres.

CHINA.

(CHUNG-HUA MIN-KUO, *i. e.* REPUBLIC OF CHINA.)

Government.

ON February 12, 1912, China, one of the oldest of Monarchies, became a Republic.

The Chinese Imperial family was of Manchu origin, dating from 1644, and was styled *Ta Ch'ing Ch'ao* ('Great Pure Dynasty'). The last Emperor, P'u-yi, was the tenth of the line; but the official genealogy is carried back six generations earlier than the real founder, and P'u-yi's will be the sixteenth name in the canonised series of Ta Ch'ing Emperors. He was born on February 11, 1906, succeeded his uncle the Emperor Kuang-Hsi on November 14, 1908, and abdicated on February 12, 1912. He retains the title of Emperor of the Manchu Imperial House, but with his death the title and the Government subsidy of the House will cease. For account of the Revolution of 1911, see STATESMAN'S YEAR-BOOK for 1912, pp. 699-701, and for later developments, see STATESMAN'S YEAR-BOOK for 1919, pp. 740-41.

The Government, according to the Provisional Constitution of Nanking, 1911, is composed of a President, a Vice-President, and a bi-cameral legislature consisting of a Senate (*Tsan Yi Yuan*) of 264 members and a House of Representatives (*Chung Yi Yuan*) of 596 members.

But the Central Government is still unable to rule the country completely. As a matter of fact, powerful military governors (*Tuchuns*) have established themselves in several provinces and are practically independent of the Government in Peking. They maintain their power by the strength of their armies and, as there is no national army in China, the Government cannot enforce its will, even in securing its own revenues. A modern feature of this militaristic control is the rise to power of Super-Tuchuns who are the real masters of groups of Tuchuns and who dictate their demands to the Government.

President.—Hsu-Shih-ch'ang, born in Honan, 1853, elected President, August 10, 1918. Inaugurated October 10, 1918.

The office of Vice-President is still vacant (since August 1917).

Executive authority is provisionally vested in a Premier nominated by the President and a Cabinet of nine Ministers nominated by the Premier.

All appointments require the sanction of both Houses of Parliament. But since the overthrow of the An-fu (Anwher-Fukien) party, which held the reins of power from August 1918 to August 1920, Parliamentary government has lapsed owing to the failure of the elections. A Presidential Mandate is now tacitly recognised as an act of ratification—witness the Sino-German Commercial Treaty, concluded on May 20, 1921.

The Cabinet, reorganised on December 24, 1921, is composed as follows:—

Premier.—Liang Shih-yi.

Minister of the Interior.—Kao Ling-wei.

Minister of Foreign Affairs.—W. W. Yen.

Minister of Agriculture and Commerce.—Chi Yao-shan.

Minister of Education.—Huang Yen-peï.

Minister of Communications.—Yeh Kung-cho.

Minister of War.—Pao Kwei-ching

Minister of the Navy.—Li Ting-hsin.

Minister of Justice.—Wang Chung-Hui.

Minister of Finance.—Chang Hu.

A number of Foreign Advisers have been appointed to the Government. There are also many foreigners in the Government employ in the various departments.

A Southern Government has been established at Canton by the Kuomintang (People's Party). Its members form the remnant of the original Republican Parliament, which was dissolved in June 1917 by President Li Yuan-hung. Its chief promoter, Dr. Sun Yat-sen, who was the first (Provisional) President of the Republic, was elected "President of the Republic of China" by this Government on April 7, 1921, and he assumed office on May 5, 1921.

The Southern Government claims that it has the allegiance of all the Southern provinces, but its rule is planted only in Kwangtung and Kwangsi.

The principal members of the Sun Government are:

Minister of Foreign Affairs.—Wu Ting-fang.

Minister of Finance.—Tang Shao-yi.

Minister of Interior and of War.—Chen Chiung-ming.

Minister of the Navy.—Tang Ting-Kwang.

Chief of General Staff.—Li Lieh-chun.

Chen Chiung-ming is also Governor of Kwangtung and Commander-in-Chief of the Kwangtung forces.

The Republic has adopted a new flag on which the old yellow dragon has been replaced by five stripes—crimson, yellow, blue, white and black—to denote the five races comprised in the Chinese people, Chinese, Manchu, Mongol, Turki (Mohammedan natives of Chinese Turkestan), and Tibetan.

LOCAL GOVERNMENT.

Under the monarchy each of the 22 provinces was ruled by a Viceroy placed over one, two, or three provinces, or by a Governor over a single province, either under a Viceroy or depending directly on the Central Government. There were thus 9 Viceroys and 3 Governors equal in rank to Viceroys. Each province was subdivided into prefectures ruled by prefects and each prefecture into districts, each with a district magistrate. Two or more prefectures were united into a *tao*, or circuit, the official at the head of which being called a *Taotai*. Each town and village had also its unofficial governing body of 'gentry.' An Edict of July 22, 1908, instituted Provincial Assemblies, and the first meetings were held on

October 14, 1909. The reforms of the late dynasty also instituted representative legislative assemblies in districts, towns and villages.

At present many of the Provinces under the rule of their Military Governors or *Tutuks*, who in nearly every instance was a native of the province, are fast slipping from the control of the Central Government.

Area and Population.

The following table gives a statement of the area and population of the Chinese Republic according to figures published in the Government Gazette, February 27, 1911. In 1912, Mr. W. W. Rockhill, formerly American Minister at Peking—a recognised authority—after careful inquiry, came to the conclusion that “this document, though showing complete ignorance of the methods now nearly universally followed in vital statistical reports, throws considerable light on the question of China’s population, and seems entitled to more confidence than the enumerations which have heretofore appeared.” He believed that the population of China, Manchuria and Chinese Turkestan, *i.e.*, the Chinese Republic exclusive of Tibet and Mongolia, appeared to be in round numbers 325,000,000, new information having confirmed the opinion reached by him in former studies of the same subject that the population of China “is much smaller than we have been led to believe, and that in the last century it has been increasing very slowly if at all.”

The 18 Provinces of China Proper	Area: English square miles	Population (Estimated)	Capital
Chihli	115,800	22,970,000	Tientsin
Shantung	55,970	25,810,000	Tsi-nan
Shansi	81,830	9,420,000	T'ai-yuan
Honan	67,940	22,375,000	K'ai-feng
Kiangsu	38,600	15,380,000	Nanking
Anhui	54,810	14,075,000	Anking
Kiangsi	69,480	16,255,000	Nanch'ang
Chékiang	36,670	13,950,000	Hangchow
Fukien	46,320	8,560,000	Foochow
Hupei	71,410	21,260,000	Wuchang
Hunan	83,380	20,580,000	Ch'angsha
Shensi	75,270	6,725,000	Sian
Kansu	125,450	3,810,000	Lanchow
Szechwan	218,480	54,500,000	Ch'engtu
Kwangtung	99,970	23,700,000	Canton
Kwangsi	77,200	5,425,000	Nan-ning
Kweichow	67,160	9,245,000	Kuei-yang
Yunnan	146,680	8,053,000	Yunnan
Total	1,532,420	302,110,000	
<i>New Dominion:—</i>			
Sinkiang	550,340	2,000,000	Ili
<i>Dependencies:—</i>			
Manchuria	363,610	—	—
Fengtien	—	5,830,000	Mukden
Kirin	—	5,350,000	Kirin
Heilungkiang	—	1,560,000	Tsitsihar
		12,740,000	Heilung(Hsien)
Mongolia	1,367,600	1,800,000	Urga ¹
Tibet	463,200	2,000,000	Lhasa ²
Grand Total	3,913,560	320,650,000	

¹ The seat of the Bogdo Khan.

² The seat of the Dalai Lama.

Estimates prepared by the Chinese Maritime Customs in 1920 give the much larger total of 440,934,000, with 19,290,000 for Manchuria. In 1919 the Chinese Post Office estimated the total population of China and the Outer Territories at 427,679,214, and in 1920 the figure was given at 436,094,954. The latter record, which is the work of provincial officials, is given hereunder for purposes of comparison :

Peking (Metropolitan area)	4,014,519	Kiangsi	24,466,800
Chihli	30,172,692	Kiangsu	28,283,864
Shansi	11,114,961	Shanghai	5,550,200
Honan	30,831,909	Anhui	19,832,665
Shensi	9,465,558	Chekiang	22,043,300
Kansu	5,927,997	Fukien	13,157,791
Sinkiang	2,519,579	Kwangtung	37,167,701
Manchuria	22,083,434	Kwangsi	12,258,335
Shantung	30,803,245	Yunnan	9,839,180
Szechwan	49,782,810	Kweichow	11,216,400
Hupeh	27,167,244		
Hunan	28,443,279	Total	436,094,953

Not included in the above (no data available) :—(1) One Hsien and Mongolia in Peking district ; (2) one Hsien in Manchuria district ; and (3) Tibet.

The Island of Formosa was ceded to Japan in accordance with the terms of the Treaty of Shimonoseki ratified and exchanged at Chefoo on the 8th of May, 1895. The formal transfer of the Island was effected on the 2nd of June, 1895.

In November, 1897, the Germans seized the coast of Kiaochow Bay in Shantung, and in March, 1898, compelled China to execute a 99 years' lease of the territory on both sides of the Bay together with a grant of railway, mining and other rights generally referred to as Germany's 'economic privileges' in Shantung. On the outbreak of war Japan delivered an ultimatum to Germany demanding the surrender of the leased territory of Kiaochow 'with a view to eventual restoration of the same to China.' Germany ignored this demand and Kiaochow was invaded by Japanese and British forces, and after a feeble resistance the German forces garrisoning the port of Tsingtao, which lies within the leased territory, capitulated on November 7, 1914. The Japanese assumed possession of all administrative authority previously exercised by the Germans in the leased territory, and, in spite of Chinese protest, seized the railway line connecting Tsingtao with Tsinan, the capital of the Province, guarded it with Japanese troops, and extended their authority to certain Chinese cities lying outside the leased territory. At the Peace Conference, Japan claimed to retain possession of the leased territory of Kiaochow and to succeed to all Germany's economic privileges in Shantung on the ground of conquest, whereas China asked the Conference for a settlement which would secure her the direct restitution of the leased territory and the cancellation of Germany's economic privileges. Japan, however, obtained recognition of her claim in Articles 156-8 of the Treaty of Versailles. China has not signed this Treaty, and at first refused to negotiate with Japan on the matter. But at the Washington Conference on the Limitation of Armaments and on Pacific and Far Eastern Questions, held from November 12, 1921, to February 6, 1922, China announced her intention of bringing the Shantung Question before the Conference. She agreed to discuss it with the Japanese Delegates in 'direct conversations' with, however, two representatives of Great Britain and two of the United States as unofficial 'observers' present throughout the 'conversations.' An agreement was arrived at and the treaty was signed at Washington, providing for the following main features: (1) the return of the leased territory by Japan; (2) the handing over to China of all public property with due compensation to Japan; and (3) the sale by Japan to China of the Tsingtao-

Tsinan Railway. Under the terms of agreements the payment for the line is to be in 15-year Chinese Government Treasury Notes to the amount of 53,406,141 gold marks, redeemable after 5 years with 6 months' notice. Pending the redemption of the Treasury Notes China will appoint, for so long a period as any part of the Notes shall remain unredeemed, a Japanese subject to be Traffic Manager and another Japanese subject to be Chief Accountant, both Japanese employees to be under the direction, control and supervision of the Chinese managing director, and removable for cause.

By agreement with the Chinese Government, dated March 27, 1898, Russia took possession of Port Arthur and Talienwan (called Dalny by Russia and Dairen by Japan) and their adjacent territories and waters, on lease for the term of 25 years, with option of extension by mutual agreement. In 1900, in consequence of the 'Boxer' uprising, Russia occupied Manchuria. Japan, after long and unsuccessful efforts to induce Russia to withdraw, broke off diplomatic relations, and on February 8, 1904, commenced hostilities. The war, in the course of which Japan proved victorious both on land and at sea, was brought to an end by the Treaty of Portsmouth signed September 5, 1905. Under this Treaty Russia and Japan agreed to evacuate Manchuria, except the territory affected by the lease of Kwantung (or the Liao-tung Peninsula), where Japan succeeds to the leasehold and other rights of Russia. The exclusive administration of Manchuria (with the exception mentioned) was to be restored to China. By treaty of December 22, 1905, China agreed to the transfer to Japan from Russia of the lease of the Liao-tung Peninsula and the control of the railway from Port Arthur to Ch'ang-chun (Kwan-ch'engtzu), and conceded to Japan the right to construct a railway from Antung to Mukden, and agreed to open 16 Manchurian ports and cities to foreign commerce. For the Japanese demands on China, made on January 18, 1915, see THE STATESMAN'S YEAR-BOOK for 1920, p. 738. At the Washington Conference China brought up in Committee, for review and revision, the Sino-Japanese Treaties of 1915, treaties resulting from the Twenty-one Demands. Japan refused to admit the validity of China's claim but made some concessions in a statement read before the committee and later read into the records of the Conference. Japan was ready to abandon her preferential rights in the supply of advisers and instructors to be employed by China in Manchuria, and to open, for the activity of the International Consortium, rights of railroad construction in Manchuria and Eastern Inner Mongolia. While taking note of Japan's concessions, China was not satisfied and made the express reservation that she would seek a later opportunity to open the question thus shelved.

In July, 1910, a convention was signed between Russia and Japan agreeing to co-operate to maintain the 'status quo' in Manchuria in accordance with the treaties and conventions already made. For such period as Russia should hold Port Arthur, Great Britain was, by agreement with China, April 2, 1898, to hold Wei-Hai-Wei in the province of Shan-tung. For defensive purposes Great Britain on June 9, 1898, obtained a 99 years' lease of territory on the mainland opposite the island of Hong Kong.

The Chinese Government granted to the French in April, 1898, a 99 years' lease of the Bay of Kwang-Chou-Wan, on the coast of the peninsula, between Hong Kong and the Island of Hainan, and in November, 1899, the possession of the two islands commanding the entrance of the bay. This territory has been placed under the authority of the Governor-General of French Indo-China.

In one of the plenary sessions of the Washington Conference the offer to return Wei-Hai-Wei to China, on similar conditions as those accompanying

the return of Shantung, was made by Great Britain and accepted by China. France gave a similar promise with regard to the restitution of Kwang-Chou-Wan. It is expected that negotiations necessary to the execution of the British offer and the French promise will be initiated and completed in a short time.

Peking, the capital of China, has a population of 924,334, including about four thousand foreigners. According to the Census of the Metropolitan Police Administration, taken in October, 1921, the population of Peking and its suburbs is close on 1,300,000. The population of the principal Chinese ports is given as follows for 1919 by the Chinese Post Office:— Aigun, 21,962; Sansing, 36,325; Harbin, 365,000; Antung, 57,699; Newchwang, 82,100; Chinwangtao, 5,000; Tientsin, 838,629; Chefoo, 54,500; Chungking, 1,011,597; Wanh sien, 751,834; Changsha, 1,271,903; Ichang, 448,509; Shasi, 105,000; Hankow, 289,804; Kiukiang, 330,616; Wuhu, 235,550; Nanking, 902,441; Chinkiang, 477,591; Shanghai, 1,538,500; Soochow, 1,027,091; Hangchow, 729,948; Ningpo, 2,172,320; Wenchow, 1,738,994; Santuao, 8,000; Foochow, 1,491,143; Amoy, 400,000; Swatow, 85,000; Canton, 1,367,000; Kongmoon, 75,000; Samshui, 188,860; Kiungchow, 586,870; Pakhoi, 20,000; Wuchow, 348,220; Nanning, 300,000; Lungchow, 200,000; Mengtsz, 81,453; Szemao, 22,069; Tengyueh, 150,822. Figures for Dairen (1918, 97,231) and Tsingtau (1921, 308,738) are obtained from the Japanese Census.

According to the estimate of the Customs authorities, in 1920 the total number of foreigners resident in China was 326,969, made up as follows:—

American	7,269	French	2,753 ¹	Portuguese	2,282
Austrian	24	German	1,013	Russian	144,413
Belgian	592	Hungarian	8	Spanish	285
Brazilian	10	Italian	504	Swedish	464
British	11,082	Japanese	153,918	Non-Treaty Powers	132
Danish	545	Mexican	1		
Dutch	401	Norwegian	373	Total	326,069

¹ Including 591 protégés.

There are now 20 Treaty Powers in China, as follows: Russia (1689), Great Britain (1842), United States (1844), France (1844), Belgium (1845), Sweden (1847), Portugal (1862), Denmark (1863), Netherlands (1863), Spain (1864), Italy (1866), Japan (1871), Peru (1874), Brazil (1881), Mexico (1899), Chile (1915), Switzerland (1918), Bolivia (1920), Persia (1920), and Germany (1921). Austria-Hungary (1869) was also included before the war. Of these powers, Germany, Bolivia, and Persia have renounced the privilege of consular jurisdiction in their treaties. The Russian Soviet government also waived the claim in a declaration dated March 26, 1920.

At the Washington Conference the nine participating powers (the United States of America, Belgium, the British Empire, China, France, Italy, Japan, the Netherlands and Portugal) adopted "a policy designed to stabilise conditions in the Far East, to safeguard the rights and interests of China, and to promote intercourse between China and the other powers upon the basis of equality of opportunity." The so-called nine-power treaty was signed to give effect to the above principles. This treaty, together with its annexes, supplementary notes and other auxiliary instruments, provided for the following main points:

(1) The powers undertake to subscribe to a mutually self-denying covenant regarding the acquisition of special rights in China which would tend towards creating spheres of influence, and China herself declared that she would not alienate any part of her territory to any foreign power; (2) No discrimination in the railroad service, either in passenger or freight traffic, was to be

allowed in China, either by China herself or by foreign governments or individuals operating railroads in China. Any such discrimination and any other commercial practice inimical to the principles of the Open Door should be referred to the Board of Reference for investigation and report, the constitution of said Board to be decided upon by the "Special Conference" on Chinese Customs Tariff referred to below; and (3) All treaties and agreements between China and the other powers and all contracts and agreements between China and private individuals and corporations of foreign countries were to be registered and made public.

Religion.

Three religions are acknowledged by the Chinese as indigenous and adopted, viz. Confucianism, Buddhism, and Taoism.

With the exception of the practice of ancestral worship, which is everywhere observed throughout the Republic, and was fully commended by Confucius, Confucianism has little outward ceremonial. The study and contemplation and attempted performance of the moral precepts of the ancients constitute the duties of a Confucianist. No ecclesiastical hierarchy is maintained at the public expense, nor any priesthood attached to the Confucian religion. A proposal to make Confucianism the State religion of China was negatived in both 1912 and 1917 by the Constitutional Committee who, however, agreed that Confucianism shall be the basis of the Ethical teaching in National Education.

Buddhism and Taoism present a very gorgeous and elaborate ritual in China, Taoism — originally a pure philosophy—having abjectly copied Buddhist ceremonial on the arrival of Buddhism 1,800 years ago. Most Chinese (not Mahometans or Christians) profess and practise all three religions. The bulk of the people, however, are Buddhist.

Mohammedans are found in every province of China, being most numerous in Kansu, Sinkiang, Shansi, Shensi, Chihli, and Yunnan. From evidence collected in 1909 Mr. M. Broomhall estimated that the Moslem population of China numbers between 5,000,000 and 10,000,000.

Roman Catholicism has had a footing in China for more than three centuries. At the end of 1926 it numbered 52 Bishops (China proper 44), Manchuria 3, Mongolia 4, Tibet 1), 1,365 European priests, 963 Chinese priests, and 1,994,483 native Christians.

Protestant Missions date from 1807. In 1920 they were served by a foreign force numbering 6,636, including 464 missionary (116 being women) and 462 Chinese physicians (55 women), 1,270 ordained ministers, and 206 foreign nurses. Native Christians numbered 618,601 (345,854 communicants). Attached to Protestant Missions in 1920 were 27 colleges of university standing, 256 middle schools, and 581 higher elementary schools. Under Christian instruction were 189,794 pupils. Foreign Protestant Medical Missionaries at 333 hospitals and 241 dispensaries attended during the year by 142,294 in-patients.

The Russian Orthodox Mission dates from 1685, when the Chinese conquered Albazin fortress on the river Amur, taking 45 Russians prisoners and bringing them to Peking. One was a priest, Father Maximus Leontieff. Until 1860 the members of the Mission acted as the official representatives of the Russian Government. In 1920 the Mission, which is under a Bishop resident in Peking, consisted of a monastery, a hermitage, a nunnery, 5 convents, and 32 churches, and numbered 5,700 baptised Chinese adherents and 20,000 Russians.

Most of the aboriginal hill-tribes are still nature-worshippers, and ethnically are distinct from the prevailing Mongoloid population. There is also a colony of Chinese Jews in K'ai-fêng, capital of Honan.

Instruction.

For many centuries education of a purely Chinese type was general, and led through an intricate system of public examinations to all classes of employment under the State. Being confined in its scope to the study of Chinese classical literature, this form of education was gradually undermined by the influence of increasing intercourse with other countries, until it was completely swept away by a Decree of September 3, 1905, abolishing the historic system of examinations.

Since 1905 an enormous impetus has been given to the new educational movement, schools for the teaching of 'western learning' springing up in every town throughout large portions of the Republic.

According to the statistics of the first educational survey of the whole country, published in 1907, the total number of schools and colleges was estimated at slightly over 37,000, and of students, 1,013,000. As soon as the Republic was established, the educational movement received fresh impetus. The Ministry of Education was reorganised, and three new departments were created for the purpose of directing Universal Technical and Social Education. The first of these departments includes normal schools for the training of teachers, middle schools, primary schools, and industrial schools; the second includes universities, technical schools, and the enrolment of students to study in foreign countries; the third includes public libraries, museums and popular lecture halls, for the special benefit of those who are either illiterate or unable to attend ordinary schools.

Normal schools are divided into ordinary normal and higher normal schools. The latter are established and maintained by the Central Government. At present they number six, and are situated in Peking, Wuchang, Nanking, Canton, Ch'engtu, and Mukden. In Peking there is also a Girls' High Normal School. Ordinary schools are established by provincial authorities, and number over 180.

Middle schools are established by provincial governments, their total now being over 460.

There are two kinds of primary schools: the higher and the lower. The former are established by district governments, and are intended as intermediaries between the lower primary schools and the middle schools. The total for the whole country is over 7,000 for boys and 600 for girls, or an aggregate of nearly 8,000. The latter—also called Citizen Schools—are established by local government boards, although in recent years a good number have been founded with private funds. The total number is 110,000 for boys, and 3,000 for girls. Adding the 8,000 higher primary schools, the aggregate number of primary schools is over 120,000.

In 1915 the Ministry of Education enacted certain regulations governing primary education. According to the programme of the Ministry, compulsory universal education should have been in force in 1921, but the unfavourable internal condition of the country and the financial stringency of the Government have considerably delayed the consummation of the plan.

There are two grades of industrial schools, one known as the A grade, and the other as the B grade. The former receives pupils from the higher primary schools, and the latter receives those who complete their course in the lower schools. Both have departments offering courses in agriculture, commerce,

shipping, vocational training for women, and supplementary education for industrial workers. The latest statistics concerning these schools, issued in 1918, gives the figures as follows: Agricultural Schools, 269; Schools of Technology, 38; Schools of Commerce, 80; Industrial Schools, 2; Girls' Vocational Schools, 21; Industrial Teachers' Training Schools, 3. Total 413.

In China the Ministry of Education prescribes two principal departments for Universities, namely, arts and sciences. The first includes law and commerce; and the latter, medicine, agriculture, and engineering. At present there are three Government-established Universities, namely, the National University at Peking, the Peiyang University at Tientsin, and the Shansi University at Taiyuanfu. With the object of co-ordinating their work, and thus obviating unnecessary repetition, the Peking and Peiyang Universities have agreed to an arrangement by which the former has transferred its engineering department to the latter, and has taken charge of the law departments of both institutions.

In addition to the above there are also four Universities supported by private funds, namely, the Chung Kuo, Ming Kuo, and Ch'ao Yang Universities in Peking, and the Chung Hua University in Wuchang. The Amoy University and the South-Eastern and South-Western Universities are among those that are being established with private funds.

Technical colleges are divided into law schools, medical schools, schools of pharmacy, agricultural schools, engineering schools, commercial schools, schools of languages, and so forth. They may be established either by the Central or Provincial Governments, or by private endowment. If established by the Central Government, they are controlled by the Ministry of Education, is in the case of the following: the Law College, the College of Agriculture, the College of Engineering, the College of Commerce, the College of Medicine, and the School of Fine Arts in Peking. One law college has been established by each Provincial Government, and in addition there are 6 agricultural schools, 6 engineering schools, 4 schools of medicine, and 3 colleges of languages. As for those established by private funds, and sanctioned by the Ministry of Education, they number 26 in all, and are law, mining, commercial, and engineering schools. The number of students at all technical schools and colleges in 1918 was 32,273 at 531 institutions.

At present there are in the whole country 185 libraries, 286 popular libraries, 1,890 popular lecture halls, and 733 travelling lecture groups.

At the 1920 Conference of the Provincial Education Associations, co-education was recommended, but the Ministry only approved of its adoption in primary schools, technical colleges, and Universities.

The Chiao Tung (Communications) University, under the aegis of the Ministry of Communications, was opened on July 21, 1921. It was established to unify and improve the technical education afforded by the Railway Administration College at Peking, the College of Civil Engineering at Tongshan, the College of Electrical and Mechanical Engineering at Shanghai, and the Postal and Telegraphic College at Peking. It is hoped to model the training of China's future engineers on the best standards prevailing in modern Universities.

The National University of Peking was established in 1898, and completely reorganised in 1917 under the Chancellorship of Tsai Yuan-pei, an eminent Chinese educationist and scholar. There are now five groups of studies, which consist of courses in mathematics, physics, chemistry, geology, philosophy, Chinese and European literature, history, economics, political science and international law. In addition, the University has a post-graduate department for research work in the pure sciences. In February, 1920, five women students were admitted for the first time. There are now

250 professors and teachers, and about 3,000 students. Under Chancellor Tsai's leadership, the aim of the University is to maintain the best traditions of Chinese culture whilst providing facilities for the teaching of the best that Western education has to offer.

The Peking Union Medical College was founded early in 1906 for the training of Chinese medical students. The American Board of Commissioners for Foreign Missions (Congregational), the Board of Foreign Missions of the Presbyterian Church in the United States of America, and the London Missionary Society, and, later, the Peking University (Methodist), the Society for the Propagation of the Gospel (Anglican), and the Medical Missionary Association of London all co-operated in the development of the Medical College and maintained it until 1915.

On July 1, 1915, the China Medical Board of the Rockefeller Foundation assumed the full support of the Union Medical College, having previously acquired the property of the College. Early in 1916 the Trustees secured a provisional charter from the Regents of the University of the State of New York, and in accordance with this charter leased from the China Medical Board the property of the Medical School in Peking.

The period from 1915 to 1921 was one of reconstruction, both of the physical plant and of the organisation of the teaching staff. The period witnessed the opening of the Pre-Medical School in 1917, of the Medical School in 1919, and of the Training School for Nurses in 1920. The entire new plant, including the new hospital, was occupied by September 1921.

The College buildings are known as *Yü Wang Fu*, and comprise approximately ten acres of land. There are fourteen buildings in all, in which there is every modern facility for instruction in the various branches of medicine.

There are numerous Protestant and Catholic mission schools, colleges and universities at Shanghai and other ports, where the English and French languages and lower branches of Western science are taught.

The engagement of America to return to China the surplus of her indemnity of 1900, amounting to 1,756,900*l.*, produced an undertaking from China to spend this amount in preparing and sending students to the United States there to receive their education. More than seven hundred students, including forty women, have already been sent. A special institution, Tsing Hua College, has been established near Peking to train students for this purpose. A modern university for Chinese with British professors has been successfully established in Hongkong, and attracts students from many parts of China. In Japan, on January 1, 1920, there were 1,241 Chinese students receiving support from the Chinese Government, 168 in Europe, and 175 in the United States. Of other Chinese students there are 190 in the United Kingdom and 1,600 in the United States.

The development of modern education in China is indicated by the following figures:—

	Schools	Scholars
1913-14 . .	109,448	3,643,206
1914-15 . .	122,236	4,075,338
1915-16 . .	129,739	4,294,251
1918-19 . .	134,000	4,500,000

Experiments have been made in universal education. In the capital city of the province of Kirin compulsory education has been in operation during the last few years, and the same has been successfully maintained throughout Shansi, the 'Model Province.'

Chinese education received a remarkable fillip by the invention of a phonetic script system, which was adopted by the Conference for the Standardization of Pronunciation held in 1913, and which has since received official recognition. This script has three functions; as an instrument to unify the spoken dialects, to help the study of Chinese characters, and to educate the illiterate. It is now being taught in the Primary and Higher Primary Schools.

Eighty Chinese newspapers are published in Shanghai, more than 100 in Peking and Tientsin, while every capital city in the interior has several daily journals. Altogether there are over 1,000 daily, weekly, or monthly journals in China. Since 1917 intellectual China has been swept by a new "Literary Revolution," and periodicals and much literature are now being published in the simpler spoken language in preference to the erudite, classical medium.

Foreign residents in China are served by a number of excellent papers in English, published in Peking, Tientsin, Shanghai and Hankow. There are three French and several Japanese daily papers and also a number of Chinese papers which are subsidised by, and express the opinions of, other nationalities. Peking has three English daily papers and one French. Two of the English papers are controlled by Chinese and the other is edited in the Japanese interest.

Justice.

Under the old system justice was badly administered. Extraction of confession by torture, bribery, and extortion, were essential features of judicial administration. All Treaty Powers therefore claimed the right of extra-territorial jurisdiction over their own nationals in China. Most of the Treaty Powers still retain this right, and will only relinquish it "when they are satisfied that the state of the Chinese laws, their method of administration, and other considerations warrant them in so doing." At the Washington Conference China asked for the abandonment by the powers of their extra-territorial rights in China immediately or "as soon as circumstances will permit." A resolution was passed wherein the powers endorsed her demand "in principle" and agreed to send a Commission of Jurists to investigate into the status of legal reform, the general practice of extra-territoriality as found in China, and the necessary steps for its modification or gradual removal. The Commission of Jurists was to be organised three months after the coming into effect of the so-called nine-power treaty, to complete its work and report to the respective governments within a year of the Commission's organization.

A provisional Criminal Code was drawn up in the closing year of the Tsing dynasty, and proclaimed on March 10, 1912, the first year of the Republic. The code was framed after the Continental system, and adopts the most modern legislation in regard to conditional release and postponement of punishments. There are special provisions for the treatment of youthful offenders and insane persons. As regards the power of inflicting penalties, the arbitrary use of power by the court is guarded against by fixing a maximum and minimum, and sentence for each case. A second draft of this code, which awaits the formal sanction of Parliament, was completed in 1919. Texts in both English and French have also been published. Altogether, three codes have been drawn up and revised—the Code of Civil Procedure, the Criminal Code, and the Code of Criminal Procedure. The Civil Code and the Commercial Code are in process of revision, and therefore in these respects the decisions of the Courts derive

their sources from the Unwritten Law (custom and precedents), the Written Law (the rudimentary and fragmentary Civil law in the old Manchu code) and special laws enforced since the establishment of the Republic, such as the Mining Ordinance, the Copyright Ordinance, the Commercial Association Ordinance, the Traders' Ordinance, and various laws relating to properties), and the legal principles of other countries. The work of drawing up and revising the new Codes is undertaken by the Law Codification and Compilation Commission.

There are at present 44 high courts and procuratorates, 46 branch high courts and procuratorates, and 102 district courts and procuratorates, with the Supreme Court and the Procuratorate-General at the head of all. The Supreme Court of China may be likened to the House of Lords or the Judicial Committee of the Privy Council of Great Britain. As its name implies, it is the highest tribunal in the land. It was reorganised in 1912 into two divisions—Criminal and Civil. As its work increased—due to a better appreciation of legal processes on the part of the people—the divisions were increased to six—four Civil divisions and two Criminal divisions. In each division there is a presiding Judge with four other judges. Between 2,000 and 3,000 cases are handled every year, and Case Law is being rapidly evolved.

Great Britain and the United States have special courts in China, the one, His Majesty's Supreme Court for China at Shanghai (established 1865), and the other, the United States Court for China (established 1906).

The first trial by jury in the annals of China took place on March 23, 1912.

Progress in the matter of prisons has likewise been rapid. There are 48 modern prisons, the administration of which follows the lines adopted in all foreign prisons. Fifteen of these are "model" prisons.

Finance.

The following budget statements represent official estimates :

Year	Revenue	Expenditure	Deficit
	Kuping Taels	Kuping Taels	Kuping Taels
1912	297,000,000	576,520,000	279,520,000
	Dollars	Dollars	Dollars
1913	333,948,482	642,237,070	308,288,584
1916	472,838,584	472,838,584	—
1919	490,419,786	495,762,888	5,343,102

There was no budget in 1920.

The collection of the revenue on the Chinese foreign trade and the administration of the lights on the coast of China are under the management of the Chinese Maritime Customs, an institution, founded by Sir Robert Hart, which has a large staff of Foreign and Chinese subordinates, the various nationalities of the Foreign employees bearing approximate relation in number to the amount of trade of their respective countries. By agreement, dated February 13, 1898, China undertook that the post of Inspector-General must be held by a British subject so long as British Foreign Trade predominates. By Decree of May 9, 1906, the customs service, hitherto supervised by the Board of Foreign Affairs, was placed under the control of two Chinese high officials, forming a new department known as the *Shui Wu Ch'ü*, or Revenue Council. Since November, 1901,

the Native Customs at the Treaty Ports, hypothecated for the service of the Boxer indemnity, have been under the Maritime Customs.

All Customs Revenue is paid into Foreign Banks designated for the purpose by the Bankers' Commission, who allot therefrom the payments for the service of Foreign loans secured on the Customs Revenue and the Boxer Indemnity, which is also secured on the Customs.

Following China's declaration of war against the Central European Powers, the Treaty States agreed to a revision of the tariff in order to bring it up to an effective five per cent. *ad valorem*. A commission was appointed by the Chinese Government to meet with representatives of the Treaty States in Shanghai to agree to and fix Customs import duties. A decision was reached in the autumn of 1918, under which duties were fixed at specific rates calculated on a basis of five per cent. of prices ruling during the period from 1912 to 1916 inclusive. In addition, the Entente Powers agreed to postpone payment of "Boxer indemnities" for five years, dating from Dec. 1, 1917. A new tariff treaty was signed by China and the other participating powers in the Washington Conference, providing for the immediate revision of the Chinese import tariff schedule so as to make the 5 per cent. import duty effective (that is, to make the specific duty in the schedule correspond to 5 per cent. of the current prices of imports). Periodic revision of the schedule thus revised was also provided for. In the same treaty the powers authorised the calling of a "Special Conference" on the Chinese tariff, to meet at Shanghai three months after the coming into effect of the treaty. This Special Conference was authorised to levy a surtax of two and one-half per cent. on imports, and an additional surtax of another two and one-half per cent. on certain articles of luxury, thus making the total import duty of ordinary merchandise seven and one-half per cent. and of certain articles of luxury ten per cent. Prior to the abolition of Likin the old transit due of two and one-half per cent. was to be retained. The reduction of import duty in favour of goods coming into China overland was abolished, and a uniform customs rate applied to both land and maritime trade. The questions of the Likin and of ultimate tariff autonomy for China were also to be taken up by the Special Conference.

On November 22, 1912, an Audit Bureau was established, charged with auditing the expenditures and revenues of the Central and Provincial Governments. The Maritime Customs and the Salt Gabelle are the only two sources of revenue for which exact figures are so far available. By the terms of the Re-organisation Loan Agreement of 1913, the Chinese Government agreed to take immediate steps for the re-organisation, with the assistance of foreigners, of the system of collection of the salt revenues. A Central Salt Administration was established in Peking under the control of the Minister of Finance, with a Chief Inspectorate under a Chinese Chief Inspector and a foreign Associate Chief Inspector, who exercise the chief authority for the superintendence of the issue of licence and the compilation of reports and returns of revenue.

The Salt Revenue for three years was:—1918, 71,589,603 dollars; 1919, 80,636,503 dollars; and 1920, 79,064,103 dollars.

The customs receipts for 4 years were (in Haikwan taels):—

Year	Foreign Trade	Home Trade	Total	Total	Exchange
	Taels	Taels	Taels	£	Pence
1918	29,599,509	6,745,536	36,345,045	9,606,828	63½
1919	38,262,983	7,746,177	46,009,160	14,569,567	76
1920	42,363,101	7,451,784	49,819,885	16,800,000	81½
1921	—	—	54,500,000	10,772,265	47½

In the Budget for 1918-19 the whole public debt is estimated at 1,886,641,457 dollars, of which 1,644,931,600 dollars is foreign indebtedness. The domestic loans were consolidated in 1921.

Defence.

ARMY.

The task of creating an army on modern lines was undertaken during the Sino-Japanese War in 1894, when Judge Hu Yün-mei, a provincial treasurer, was instructed to raise a combatant force. This force was taken over and renamed the New Imperial Army in 1895 by Yuan Shih-kai, who came from Korea, where he was Chinese Resident, to act as Director-General of the force. There were 8,000 men—infantry, cavalry, artillery, and pioneers—in this army in the early days of its existence, and they were trained under German instructors at Hsiaoohan, which lies between Tientsin and Taku, and which was the old camping-place of the troops that Li Hung-chang brought up in the '60's after fighting the Taiping rebels. The new army was concentrated at Hsiaoohan till 1899, when Yuan Shih-kai was made Governor of Shantung. He took the troops with him to his new province and they remained there till their Director-General was made Viceroy of Chihli in 1902. By 1904 the force had grown to 6 divisions of 12,000 men each, with headquarters at Paotingfu. From the inception of the New Imperial Army in 1894-95, military schools for officer cadets were attached to every arm of the service. In 1905 it was proposed that governors of provinces should hold only one position. Yuan's enemies promptly took advantage of the new regulation to relieve him of the control of the army he had trained.

Up to the time of the revolution in 1911, the training, drill, and discipline were excellent, but after the outbreak of the revolution, the discipline of the army was lost.

Added to the regular divisions of the army list are numerous bodies of irregulars, and these are directly controlled by independent *Tuchuns* and commanders, who, however, look to the Government for the payment of their forces. At present there are between 1,400,000 and 1,800,000 men under arms. Larger estimates fail to take into account the number of "paper troops" in China. *Tuchuns* over-estimate their armies in order to extort money out of the Government ostensibly to pay them, but more often to augment the private wealth of the commanders.

There is no conscription in China, though the system was adopted, without, however, being carried into effect.

Various schemes of disbandment and disarmament have been brought up from time to time, but they have all fallen to the ground because of the dissension in the provinces and the lack of money to pay off the surplus troops. The nearest approach to a national army might be said to be the troops under the command of General Wu Pei-fu. General Wu is commander of the Chihli forces which own allegiance to General Tsao Kum, *Tuchun* of Chihli; but he is endeavouring to lay a new foundation of a national army. His troops are trained in the modern practice of war.

The great obstacle in the centralisation of the military system is the continual quarrelling of the factions, which retards the development of a modern national army.

Military aeronautics commenced in China with the opening of a school at Nanyuan (near Peking) in 1913, the employment of French instructors and the purchase of a fleet of machines of the Caudron type. Much development was promised, but civil war—when powerful *Tuchuns* appropriated several machines—nipped progress on national lines in the bud.

NAVY.

* The largest vessel is the protected cruiser *Hai Chi*, of 4,300 tons displacement and 24 knots, carrying a main armament of 2 8-in. guns, 10 4'7-in. guns and 5 above-water torpedo tubes. There are also three 3,000-ton cruisers, *Hai Yung*, *Hai Shew*, and *Hai Chen*, each of 19·5 knots speed, carrying armaments of 3 6-in. and 8 4'1-in. guns, together with 3 torpedo tubes. All the above vessels were acquired during the years 1897 and 1898. In addition are 12 steel gunboats, 20 smaller river and other gunboats, 2 transports, 3 destroyers, 9 torpedo-boats, and 2 training cruisers and ships.

The following cruisers, especially adapted for the training of cadets, were added to the fleet:—The *Ying Swei* and the *Chao Ho*, both built in England (1911), each having a displacement of about 2,600 tons and a contract speed of 20 knots. The main armaments consist of 2 6-in. and 4 4-in. guns. There are, in addition, 10 first-class torpedo boats and several light-draught river gun-boats.

The *Hai Chi* and 7 other boats have been retained by the Canton Government.

There are no naval bases of any importance. Existing dockyards are: Foochow, Taku, Kianguan (Shanghai), and Whampoo (Canton). The revolution checked an intended reorganisation of the navy, and its present situation is doubtful. It has very little fighting value, but experience proves that the Chinese bluejacket with training and discipline can rank with any bluejacket in the world.

The fleet consists of about 40,000 tons with a *personnel* of some 8,000 officers and men.

Production and Industry.

Agriculture.—China is essentially an agricultural country, and the land is all freehold held by families on the payment of an annual tax. The holdings are in general small; the implements used are primitive; irrigation is common. Chinese agriculture is intensive rather than extensive. Rotation of crops is practised. Horticulture is a favourite pursuit, and fruit trees are grown in great variety. Indeed the Chinese are gardeners rather than farmers. Vegetable culture has reached a high state of perfection. Wheat, barley, maize, and millet and other cereals, with peas and beans, are chiefly cultivated in the north, rice, sugar, and indigo in the south. Treaties forbid the export of grain with the exception of wheat, soya beans, kiao-liang, indian corn, buckwheat, and barley from Manchuria. An embargo may be applied in case of a famine in China.

Cotton is grown widely even as far north as the southern part of Chihli, the chief area of production being the Yangtse valley. According to the Customs Trade Reports for 1919, next to India and the United States China is already the third largest cotton producer in the world. According to the estimate of the China Cotton Association the 1920 yield was 6,696,612 piculs.

Tea is cultivated exclusively in the west and south, in Fukien, Hupoh, Hunan, Kiangsi, Chekiang, Anhui, Kwangtung, and Szechuen. Tea area in 1917 was 520,470 acres. The exportation of tea (especially black leaf), owing to the competition of Ceylon and Indian teas, has steadily declined during recent years, falling from 1,576,136 piculs in 1908 to 1,305,906 piculs in 1920. The stoppage of the Russian portion of the trade has accelerated the decline in recent years.

Silk culture is one of the most successful industries of China, about 27 per

cent. of the world's supply of raw silk is from China. In 1919 there were produced 73,078,709 piculs, valued at 139,624,755 dollars.

Pigs are raised everywhere in China, and pig's bristles have become an important article of export. China abounds in wild game.

Manufacture.—An important feature in the development of the Chinese industries is the erection of cotton and wool mills, and of silk filatures in Shanghai, Canton and elsewhere, while native looms are found in most dwellings. In 1921 there were 17 silk filatures, 57 cotton mills, and 4 woollen mills. The active cotton spindles in China in 1921 numbered 1,747,312. At the large centres flour and rice mills are beginning to supersede native methods of treating wheat and rice. Flour milling is making rapid strides in China. In 1921 there were about 125 modern mills, 21 of which were situated in Shanghai. The daily output of the Shanghai mill is 100,000 50-lb. bags. Wusih is the next milling centre of importance. Manchuria possesses 50 flour mills. At Hanyang, near Hankow, are large Chinese iron-works, supplied with ore from mines at Ta-yeh, about 60 miles distant. These works are able to turn out about 300 steel rails a day. There are also 445 glass factories.

Mining.—Most of the 18 provinces and the 3 provinces of Manchuria contain coal, and China may be regarded as one of the first coal countries of the world. The coal-fields cover an area of 133,513 acres and the average annual coal output is estimated at 19,000,000 tons, nearly 8,000,000 of which are from modern mines. Iron ores are abundant in the anthracite field of Shansi, where the iron industry is the oldest in the world, in Chihli, in Shantung and other provinces, and iron (found in conjunction with coal) is worked in Manchuria. Three hundred million tons of ore are estimated to be in Shansi; the reserve of other deposits amounts to about 300 million tons. The annual production of iron ore is about 1,500,000 tons. The Tayeh iron deposits, near Hankow, are among the richest in the world. They have an ore reserve of 35,000,000 tons. On the Upper Yangtse and in Shensi province petroleum is being worked there are 91 wells in the country. Copper ore is plentiful in Yunnan where the copper-mining industry has long existed; Yunnan Province is one of the richest copper districts in the world. Tin is the most important mineral export; about 10,000 tons are produced annually. It is mined in Yunnan, and through Mengtze it reaches Hong Kong, whence it is shipped to foreign countries. In antimony China occupies a unique position; since 1908 the country has produced more than 60 per cent. of the world's total production. More than 90 per cent. comes from Hunan; the annual output is about 28,316 tons. The annual output of gold is 71,582 ounces; of silver, 107,155 ounces; of lead, 13,527 tons; of copper, 10,963 tons. Mining for wolfram is being carried on at Swatow, and in the north-western part of Chihli Province; molybdenum ore has been found at Yungtai-hsien, in Fukien; bismuth has also been worked.

Commerce.

Foreign trade of China (exclusive of bullion):—

—	1916	1917	1918	1919	1920

¹ By land frontier.

The imports into China from Hong Kong come originally from, and the exports from China to that colony are further carried on to, Great Britain, France, America, Australia, India, the Straits, and other countries.

The share of the British Empire in the foreign trade of China in 1920 was 18·64 per cent., of Japan 28·14 per cent., and of the United States 16·10 per cent.

The chief imports and exports for 2 years were as follows in HK. Taels :—

Imports	1919	1920	Exports	1919	1920
	HK. Taels	HK. Taels		HK. Taels	HK. Taels
Opium	246,220	200,162	Yellow beans	28,775,023	22,359,182
Cotton goods	209,786,327	246,813,429	Beancake	44,173,118	41,959,107
Woolen goods	3,614,055	4,790,512	Raw Cotton	30,253,447	9,224,512
Metals	56,609,117	61,565,157	Bean Oil	21,060,878	14,794,624
Rice	8,300,291	5,362,455	Silk, raw & manuf'd . . .	138,101,953	102,458,374
Cigarettes	20,963,449	24,029,585	Cow and buffalo hides . .	10,361,381	8,215,379
Coal	12,517,418	14,374,579	Tin	8,428,133	11,098,167
Fish	11,194,610	13,305,690	Tea	22,398,436	8,873,185

Of the tea in 1920, 12,747,600 lbs. were exported to Hong Kong, 4,838,266 lbs. to the United Kingdom, 3,803,733 lbs. to France, and 9,512,400 lbs. to the United States. The total export of tea to foreign countries has been as follows :—1895, 248,757,333; 1905, 182,573,064; 1915, 237,647,066; 1919, 92,020,666 lbs.; 1920, 40,737,467 lbs.

In addition to her overseas trade China has an extensive coast and river trade, in which under "Inland Waters Steam Navigation Regulations," steamers under foreign flag are allowed to participate. In 1920 1,719 vessels were registered, of which 381 were foreign, and 1,338 Chinese.

Most treaties with China contain provision for most-favoured nation treatment. Dairen is the customs port for all the leased territory and has out-stations at Kinchow, Pulantien, Pitzewo, and Port Arthur. It has also supplanted Newchwang as the premier port of Manchuria.

In recent years the quantities and value of the imports of tea into the United Kingdom from China, including Hong Kong and Macao, were (according to the Board of Trade returns) :—

Year	Quantities	Value	Year	Quantities	Value
	lbs.	£		lbs.	£
1915	86,776,821	1,546,320	1918	1,587,053	262,820
1916	19,877,195	930,180	1919	26,755,017	1,989,474
1917	8,397,403	460,605	1920	15,928,282	1,106,298

Other important articles of import into, and of export from, Great Britain from and to China (according to the Board of Trade returns) in two years were:—

Imports	1919	1920	Exports	1919	1920
	£	£		£	£
Raw and waste silk . . .	1,712,170	2,238,648	Cottons . . .	13,106,305	34,130,389
Egg yolk . . .	6,181,793	5,835,876	Iron, wrought, &c. . .	1,431,243	4,619,834
Bristles . . .	798,225	1,389,363	Woolleens . . .	1,585,389	3,756,288
Wool and camels' hair	796,169	652,729	Machinery . . .	592,699	2,081,217

Total trade between United Kingdom and China for 5 years:—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from China into U.K.	8,497,356	9,672,380	23,052,935	26,898,466	11,269,376
Exports to China from U.K. .	10,624,359	11,855,296	20,969,747	43,577,342	26,001,309

Shipping and Navigation.

During 1920, 210,609 vessels of 104,266,695 tons entered and cleared Chinese ports. Of these 5,547 of 4,718,251 tons, were American; 39,543 of 40,315,707 tons, British; 603 of 852,979 tons, French; 316 of 195,900 tons, Italian; 25,152 of 28,191,592 tons, Japanese; 2,466 of 933,556 tons, Russian; and 135,377 of 27,653,309 tons, Chinese. Of the total tonnage in 1920, 121,338 were steamers with a tonnage of 99,642,210, and 89,271 were sailing vessels with a tonnage of 4,624,485.

The nationality of the vessels (direct foreign trade) was mainly as follows:—

Nationality 1920	Entrances		Clearances	
	No.	Tons	No.	Tons
British	4,242	4,761,060	4,151	4,542,606
American	818	1,616,197	820	1,587,737
French	225	334,041	233	323,687
Italian	24	88,402	23	85,629
Japanese	4,065	4,974,957	4,000	4,948,979
Portuguese	274	48,160	273	47,715
Russian	264	117,636	245	107,678
Chinese	21,503	2,277,364	20,107	2,195,650
Total (all Nationalities)	31,667	14,584,856	30,181	14,268,271

Internal Communications.

China is traversed in all directions by numerous roads, and, though few are paved or metalled, and most are badly kept, a vast internal trade is carried on partly over them, but chiefly by means of numerous canals and navigable rivers. The China Famine Relief Organisation of the American Red Cross, which closed its operations on June 30, 1921, reported that it had laid out 985 miles of road and completed 648 miles.

Chinese railway history began in 1876 when the Woosung line, built by foreign enterprise, was opened. At present there are over 7,000 miles of railway open to traffic in China (including 1,857 miles in Manchuria),

of which about 1,300 miles have been constructed by British enterprise and British capital. There are 2,000 miles under construction. The surplus for the year 1919 of the Chinese Government railways was 36,449,392 dollars.

The principal railways in China, beginning with the north, are:—(1) South Manchuria Railway, from Changchun to Dairen, 693 miles [see also under Manchuria]; (2) Peking-Mukden line, from Mukden to Peking, 604 miles; (3) Peking-Suiyuan Railway, from Peking to Kalgan, Tatung Fu, Fengchen and Suiyuan, 403 miles; (4) Peking-Hankow Railway, Peking to Hankow, 814 miles; (5) Lung Hai Railway, from Hsuehowfu to Kwan Yin Tang (in Honan Province), 359 miles; (6) Shanghai-Nanking Railway, from Shanghai to Nanking, 203 miles; (7) Tientsin-Pukow Railway, from Tientsin to Pukow, on the Yangtze river, opposite Nanking, 686 miles; (8) Shanghai-Hangchow-Ningpo Railway, from Shanghai to Hangchow, 164 miles; (9) Hupeh-Hunan Railway, from Wuchang to Yochow, 252 miles; and (10) the Chinese Eastern Railway running eastward from Manchuli through Northern Manchuria to Suifeñho (Russian name, Pogranichnaya), the last station in Chinese territory, where it joins the Ussuri Railway, and then runs due east to Vladivostok. This line was built by the Russians, and under an agreement dated October 2, 1920, is operated by Russians and Chinese, assisted by an Allied Technical Board pending the withdrawal of Allied Troops from Siberia. It runs for 1,100 miles in Chinese territory. The gauge is the Russian standard of 5 feet, whilst that of all the other railways is 4 feet 8½ inches.

The 1919 Report of the Government railways showed that 6,410,847 kilometres of line were operated by the Government, also that the provincial and private railways were 773 kilometres in length, giving the total length subject to the control of the Ministry of Communications at 7,183,847 kilometres. There are 3,780 kilometres of concessioned railways, making a grand total of 10,963,847 kilometres, or 6,813 miles.

Efforts are being made to inaugurate Commercial Aviation services throughout the country.

China has a fairly well developed telegraph service. Telegraphs connect all the principal cities of the Empire, and there are lines to all the neighbouring countries. The telegraph lines have a length of nearly 50,000 miles. The administration is now completely under Government control. Wireless Telegraph Stations have been installed at Kalgan, Peking, Hankow, Nanking, and Shanghai and Canton. On August 27, 1918, the Chinese Government contracted with the Marconi Wireless Co. for the purchase of 200 wireless telephones for the use of the Chinese army, each to have a radius of 40 miles. On October 9, the Government again contracted with the Marconi Co. for the erection of three powerful wireless stations at Kashgar, Urumchi, and Lanchowfu, a total span of over 3,000 miles, to connect with a smaller station at Sianfu which will act as auxiliary to the land lines. Later it was decided to abandon Lanchowfu in favour of Urga, which is only about 800 miles from Peking. The station was completed in September, 1920. The plant has a range of 1,000 miles. Work on the other two stations will commence when the political situation clears. On May 24, 1919, the Ministry of War contracted with the Marconi Co. for the formation of the Chinese National Wireless Telegraph Company.

On February 21, 1918, the Ministry of Navy contracted with the Mitsui Co. (Japanese) for the erection of a high power wireless installation in China. In January, 1921, an agreement was signed between the Ministry of Communications and the American Federal Wireless Telephone and Telegraph Corporation for the erection of a high power wireless station at Shanghai and medium power stations at Peking, Canton, Hankow and Harbin.

Telephones are in use in the main cities of China, and the Chinese Government is planning a loop system of long-distance telephone communication.

The postal work of China, formerly carried out by the Government Courier service and the native posting agencies, was gradually taken in hand by the Chinese Imperial Post Office, begun in 1897 under the management of the Maritime Customs. By Edict of November 6, 1906, the control of the Postal Service was transferred to the Ministry of Communications, and the transfer was actually effected in July, 1911. The work of the Post Office extends over the 18 Provinces of China proper, the New Dominion and Manchuria, which have been divided into postal districts, or sub-districts. The Postal Service with Tibet has been suspended. In 1920 there were 10,469 post offices open, and the number of letters posted was 272,437,135; of postcards 38,413,500; of newspapers and printed matter, 80,528,000; of commercial papers, 625,400; of samples of merchandise, 468,200; and of official correspondence, 4,795,600; grand total of 400,886,935. The number of parcels posted in 1920 was 4,216,220, an increase of 665,115 over the total for 1919. The revenue of the post office in 1920 was 12,679,122 dollars, and the expenditure 10,467,053 dollars, leaving a surplus of 2,212,069 dollars. On December 31, 1920, the postal staff numbered about 114 foreigners and 30,424 Chinese. China in 1914 joined the postal union.

At the Washington Conference it was agreed that all foreign post offices in China, except those in leased territories, are to be closed and withdrawn on or before January 1, 1923.

Money and Credit.

Banking is a new institution in China. Its inception dates from the close of the Tai-ping rebellion in the 'sixties, when the rapid expansion of trade in Shanghai created a demand for credit facilities. But the modern system of banking was introduced as late as 1902, in which year the Board of Finance established the Ta Ching Bank, with a capital of 4,000,000 Kuping Taels, which was soon raised to 10,000,000 Kuping Taels. Prompted by the success of the Ta Ching Bank, the Board of Posts, Railways, and Telegraphs launched in 1905 a scheme to organise a bank for the control of the finances of the Railways, Telegraphs, Posts and Navigations, and the management of an issue of national loan bonds for the redemption of the Peking-Hankow Railways, and this scheme finally culminated in the establishment of the Bank of Communications in 1906. The year 1905 marked also the beginning of commercial banks in China. The Chekiang Railway Company, which was then a private company, founded the National Commercial Bank in Hangchow, with a capital of 1,000,000 dollars, half of which was subscribed by the Railway itself, and the other half by its stockholders. In the same year was formed the Commercial Bank of China, in the following year, the Ningpo Commercial Bank, and in 1910 the Commercial Guarantee Bank of Chihli. In 1911 the Manchu régime collapsed, and with it the Ta Ching Bank. However, it was speedily reorganised as the Bank of China. From 1914 onwards the establishment of new banks proceeded at a rapid pace, and there are now about 120 banks with over 300 branch offices. The first six months of 1921 saw the inauguration of no fewer than 34 banks. The total capitalisation of Chinese banks approaches 350,000,000 dollars.

Of these banks, the Bank of China is the largest, having about 100 branches and sub-branches, and an authorised capital of 60,000,000 dollars, and a paid-up capital of 12,279,800 dollars. Next in order comes the Bank of Communications, whose capital has reached 15,000,000 dollars, 6,500,000 dollars

of which are paid-up. It has about 70 branches, 3 being in Singapore, Tokio, and Hongkong. The Chinese Government holds shares valuing 5,000,000 dollars in the Bank of China, and 2,500,000 dollars in the Bank of Communications. The Bank of China declared a net profit in 1920 of 4,206,000 dollars, an increase of 740,000 dollars over the figure for 1919.

Other prominent banks are: National Industrial Bank of China, capital 20,000,000 dollars (1919); Commercial Guarantee Bank of Chihli, capital 6,000,000 dollars (1910); Kinchong Commercial Bank, capital 5,000,000 dollars (1917); Sing Hwa Savings Bank, capital 5,000,000 dollars (1914); Bank of Canton, capital 6,329,984 dollars (1912).

Siño-foreign banking institutions are numerous, having grown rapidly during 1921. In 1918 the Exchange Bank of China was established with Siño-Japanese capital. It has a subscribed capital of 10,000,000 yen. The Siño-Italian Bank, the Siño-French Bank, the Sino-Scandinavian Bank, and numerous Siño-Japanese institutions were inaugurated in 1921. A bank which has obtained an influence in financial circles is the Chinese American Bank of Commerce. It was established by American and Chinese capitalists, with equal interests, under a special charter issued on April 12, 1920, by the Chinese Government. This bank has an authorised capital of 10,000,000 gold dollars, of which 5,000,000 gold dollars are paid-up. It obtained a note-issuing power on August 1, 1921.

Many banks are being established for the explicit purpose of financing industrial undertakings. One of these is the China and South Seas Bank (1921), which is financed by overseas Chinese. It has an authorised capital of 20,000,000 dollars, and a paid-up capital of 5,000,000 dollars. Branches have been established throughout the Far East.

The Peking Bankers' Association was established in October, 1917, by 8 banks. It entered into possession of its headquarters in Peking on January 1, 1921. The object of the Association, which now embraces all the principal native banks, is to encourage public enterprise in the banking community. The member banks have gradually formed themselves—albeit very loosely—into a Lending Group, or Consortium. Up to the end of 1921 they had negotiated two loans with the Government: the Six Million Dollar Car Loan (January 15, 1921), and the Shanghai Mint Loan (March 3, 1921), of 2,500,000 dollars.

On January 18, 1921, Great Britain, the United States, Japan, and France formally notified China of the formation of a new International Banking Consortium.

Post savings banks at 11 district head offices were opened on July 1, 1919, and by December 31, 1919, the number had increased to 81. During these 6 months 154,051 dollars were deposited by 5,441 depositors, and 46,535 dollars were withdrawn. The total number of savings banks at the end of 1920 was 219, but remarkable progress was made in 1921, and there are now nearly 400. The total deposits up to December 31, 1920, amounted to 1,286,655 dollars, and 649,497 dollars were withdrawn.

Money, Weights, and Measures.

MONEY.

The currency of China is on a silver basis, and consists of taels, dollars, copper cash, and bank notes. The *tael* is really a weight of silver (about an ounce) of a certain degree of fineness. Theoretically it is divided into 10 *mace*; 1 *mace* = 10 *candareens*; and 1 *candareen* = 10 *cash*. The *tael* varies in different parts of the country, the principal taels being (1) the *haikwan* or customs *tael* (in 1920 it was equal in value to 81½*d.*), (2) the *K'up'ing* or

treasury tael, (3) the *Tsaoping* or Shanghai tael, and (4) the Canton tael. A tael may be worth from 800 to 1,800 *cash*. Different taels are in use in every province in the country.

There is unparalleled currency confusion. It is recognised by the Chinese Government that currency reform is the most pressing need of the country. In the treaty of September 5, 1902, China agreed with Great Britain to take the necessary steps to provide a uniform national coinage which should be legal tender for all purposes throughout the Empire, and an Imperial Decree was issued in October 1903, commanding the introduction of a uniform tael currency, of which the unit must be a silver tael coin of '98 touch weighing 1 K'up'ing or Treasury-scale tael or ounce. This decree was cancelled by a further decree of May 25, 1910, establishing the silver dollar (*yuan*) of '90 touch and weighing '72 Treasury-weight tael as the unit of currency. The touch and weight of the silver subsidiary coins (50c., 20c., 25c., and 10c.) was also definitely specified, while provision was made for further subsidiary coins (5c. nickel, 2c., 1c., $\frac{1}{2}$ c., and $\frac{1}{10}$ c. copper) of touch and weight to be laid down later. The minting of these silver coins has begun, but as they are at a discount in every province other than the one in which they are minted, confusion has been rendered more confounded. There are ten different varieties of dollars in circulation. Although the law of May, 1910, was intended to bring the provincial mints under the control of the Central Government, the Governors have effected a serious depreciation of silver and copper money by their indiscriminate minting of subsidiary coins.

The K'up'ing tael weighs 575·642039 grains, somewhat less than the Haikwan tael, which weighs 581·47 grains. A decree for uniform weights and measures was issued on Oct. 9, 1907, whereby the K'up'ing or Treasury scale was made the standard weight.

The standardisation of the dollar is now being taken in hand. The Peking Bankers' Association, which might be regarded as the unofficial fiduciary adviser to the Government, loaned the Government 2,500,000 dollars on March 3, 1921, with the object of erecting and equipping an independent mint to coin a standard dollar. The establishment of the mint is in the hands of the Chinese bankers until such time as the Government redeems the notes it issued as security for the loan. The Shanghai mint would seem to foreshadow the entire abolition of the tael as a unit of currency and the substitution of a uniform Chinese silver dollar which will be currency throughout China. It is also designed to force the provincial mints to raise the standard of coinage.

WEIGHT.

10 <i>Ssü</i>	.	.	= 1 <i>Hu</i> .
10 <i>Hu</i>	.	.	= 1 <i>Hao</i> .
10 <i>Hao</i>	.	.	= 1 <i>Li</i> (nominal cash).
10 <i>Li</i>	.	.	= 1 <i>Fên</i> (Candareen).
10 <i>Fên</i>	.	.	= 1 <i>Ch'ien</i> (Mace).
10 <i>Ch'ien</i>	.	.	= 1 <i>Liang</i> (Tael) = $1\frac{1}{2}$ oz. avoirdupois by treaty.
16 <i>Liang</i>	.	.	= 1 <i>Chin</i> (Catty) = $1\frac{1}{4}$ lbs. " "
100 <i>Chin</i>	.	.	= 1 <i>Tan</i> (Picul) = $133\frac{1}{3}$ lbs. " "

CAPACITY.

10 <i>Ko</i>	.	.	= 1 <i>Sheng</i> .
10 <i>Sheng</i>	.	.	= 1 <i>Tou</i> (holding from $6\frac{1}{2}$ to 10 <i>Kin</i> of rice and measuring from 1·13 to 1·63 gallon). Commodities, even liquids, such as oil, spirits, &c., are commonly bought and sold by weight.

LENGTH.

- 10 *Fen* . . . = 1 *Ts'un* (inch).
- 10 *Ts'un* . . . = 1 *Ch'ih* (foot) = 14·1 English inches by treaty.
- 10 *Ch'ih* . . . = 1 *Chang* = 2 fathoms
- 1 *Li* . . . = approximately one-third of a mile.

In the tariff settled by treaty between Great Britain and China, the *Ch'ih* of 14 $\frac{1}{16}$ English inches has been adopted as the legal standard. The standards of weight and length vary all over the Republic, the *Ch'ih*, for example, ranging from 9 to 16 English inches, and the *Chang* (= 10 *Ch'ih*) in proportion; but at the treaty ports the use of the foreign treaty standard of *Ch'ih* and *Chang* is becoming common.

Diplomatic Representatives.

1. OF CHINA IN GREAT BRITAIN.

Envoy and Minister.—Vi Kynin Wellington Koo. Appointed Sept. 29, 1920.

Counsellors of Legation.—Chao-Hsin Chu and Sir John McLeavy Brown, C.M.G.

Second Secretary.—Wen-Cheng Chen.

Third Secretaries.—Tsu Lieh Sun, Wei-Cheng Chen, and Ting Hsu.

Attachés.—Yung-Ching Yang and Kenyon Vanlee Dzung.

Naval Attaché.—Commander Chen Shao-Kwan, D.S.O. (absent).

Chancellor.—Yu-Chuan Tsao.

Consul-General in London.—Lo Chang (January, 1919).

2. OF GREAT BRITAIN IN CHINA.

Envoy and Minister.—Sir Beilby F. Alston, K.C.M.G., C.B. Appointed March 1, 1920.

Counsellor of Legation.—R. H. Clive, C.M.G.

Second Secretary.—G. E. Hubbard.

Third Secretary.—J. B. Carson, M.C.

Naval Attaché.—Captain John P. R. Marriott, R.N., C.M.G.

Military Attaché.—Lt.-Col. H. B. H. Orpen-Palmer, D.S.O.

Chinese Counsellor.—S. Barton, C.M.G.

Commercial Counsellor.—H. H. Fox, C.M.G. (at Shanghai).

Commercial Secretary.—H. J. Brett.

Judge.—His Honour Skinner Turner (at Shanghai).

There are British Consular representatives at Peking, Amoy, Canton (C.G.), Changsha, Chefoo, Cheng-tu (C.G.), Chinkiang, Chung-king, Foo-chow, Hang-chow, Hankow (C.G.), Harbin, Ichang, Kiukiang, Kiungchow, Mukden (C.G.), Newchwang, Nanking, Shanghai (C.G.), Swatow, Teng-Yueh, Tien-tsin (C.G.), Wuchow, Wuhu, Yunnan-fu (C.G.), Ningpo, Kashgar (C.G.), Tsinanfu, and Tsingtao.

Chinese Outer Territories.

Manchuria.

Manchuria, lying between the province of Chihli and the Amur river, and extending from the Hingan mountains eastwards to Korea and the Ussuri river, has an area of about 363,610 square miles and a population probably of about 20,000,000, but variously estimated at from 5,750,000 to 29,400,000. It consists of 3 provinces, Sheng-King or Feng-tien (area, 56,000 sq. miles; pop. 10,312,241), capital Mukden; Kirin (105,000 sq. miles;

pop. 6,000,000), capital Kirin; and Heilung-chiang or the Amur province (203,000 sq. miles: pop. 1,500,000) with Tsitsihar (Heilung Hsien) (population 30,000) for its capital. The system of government of each of the three provinces is exactly the same as that of the provinces in China Proper. They are ruled by governors appointed by the Chinese Government. The population given above for Fengtien provinces is from an official Chinese statement of November, 1908, which also gives the agricultural population as 2,520,145, and the cultivated area as 4,333,333 acres, but these figures must be taken with reserve. The chief towns are Mukden, the capital, with about 158,132 inhabitants; Newchwang (82,100) standing about 30 miles up the Liao river, at the mouth of which is the port of Ying-k'ou (60,000) often called Newchwang. Besides Newchwang, Mukden, An-tung (57,699), Tatung-kou, Tiehling (28,492), Tungchiangtzu (7,299), and Fakumen, (19,432) are open to commerce. Other important towns are Hsin-min-fu (20,000), Liao-yang (40,000), Feng-hwang-cheng (25,000), and Taonanfu, a town rapidly risen to importance, on the border of Eastern Mongolia. In Kirin province is the town of Chang-chun (Kwangchengtze), with 80,000 inhabitants. It is proposed to establish a university in Manchuria.

There is no longer a Manchu population in Manchuria. A few scattered communities alone remain. Within quite recent years Manchuria has been colonised by Chinese from the Northern Provinces of China and the immigration still continues by road and sea. Owing to the enormous development of the soya-bean industry (cultivated on some 5,000,000 acres) and the improved railway facilities, Manchuria has grown more rapidly in wealth than any other part of China. Manchuria is primarily an agricultural country, its soil is one of the richest in the world. In 1921 it was estimated by the Dairen Chamber of Commerce that 22,744,505 acres of land were cultivated by 19,461,100 people. Beans, millet, wheat and rice are the principal crops. The wheat yield of Manchuria is in the region of seven to eight million piculs annually, but as the cultivation of wheat is ideally suited to the agricultural conditions, the potentialities are enormous. Formerly the yield was all exported, but of late years the flour industry has been growing with the increase in the wheat production. The Russians first introduced flour milling into the country, and they were quickly followed by the Japanese and Chinese. There are now some 50 mills in Manchuria, which turn out about 15,000,000 sacks annually. Extensive forests also abound. Industry is developing. Manchuria is rich in minerals, such as coal, iron, gold, silver, lead and asbestos.

The Russian lease of Port Arthur and Talien-wan (called Dalny by the Russians and Dairen by the Japanese), and the southern extremity of the Liao-tung peninsula and the South Manchuria Railway were transferred to Japan by the Portsmouth Peace Conference, September 5, 1905. On December 22, 1905, China gave official recognition to this transfer and granted Japan the right to extend the railway from Mukden to Antung at the mouth of the Yalu river, where it connects with the Korean railway. In 1912 a branch line (78 miles) from Changchun, the northern terminus of the Japanese South Manchuria Railway to Kirin, constructed by joint Japanese and Chinese enterprise, was opened to traffic. The total length of the South Manchuria Railway is 693 miles (Dairen to Changchun, main line, 438 miles; branch to Port Arthur, 29 miles; branch to Newchwang, 14 miles; Fushun coal mines, 31 miles; branch to Yentai, 10 miles; and Mukden to Antung, 171 miles). On August 1, 1917, the whole of the railway system of Korea (some 1000 miles in length) passed under the management of the South Manchuria Railway, giving the latter a through line under its own management from Fusan, the Korean port

nearest Japan, to Changchun, where connection with the railway system to Harbin and thence to Petrograd is effected. Besides the South Manchuria Railway, Manchuria is traversed by the Chinese Eastern Railway and the Chinese Government Railways. The Japanese have 215 post offices and the Chinese 335. Telegraph and telephone systems are as follows: Telegraphs, length of lines, 617 miles; length of wires, 6,372 miles. Telephones, length of lines, 1,116 miles; length of wires, 38,538 miles.

In 1920, the direct foreign imports of Manchuria amounted to 40,984,513⁷., and the direct foreign exports to 49,523,134⁷. Vessels entered and cleared at Dairen in 1920, 5,200 of 5,509,314 tons.

Tibet.

Tibet, extending from the Pamir region eastwards between the Himalaya, and Kwen-lun mountains to the frontiers of China, has an area of 463,200 square miles with a population estimated at between 1,500,000 and 6,000,000. Probably 2,000,000 is near the mark. The only census ever taken was by the Chinese in 1737 and showed a population of 316,300 lamas (monks) and 635,950 laity. Lhasa, the capital, has from 15,000 to 20,000 inhabitants. The country being bleak and mountainous and strangers having been jealously excluded, wide regions are still unexplored.

Chinese authority was in the past represented by two *Ambans* who had charge, respectively, of foreign and military affairs. There were three Chinese commandants of troops at Lhasa, Shigatse, and Dingri where the permanent military force of about 4,600, provided by China, were mostly quartered. There were a few other Chinese officials, but the civil and religious administration of the country was left almost entirely to Tibetans. The head of the government is the Dalai Lama, who resides at the Po-ta-la (or palace) near Lhasa. He acts through a minister or regent appointed from among the chief Tibetan Lamas and assisted by five ministers. Early in 1908 the territory of Western Szechuen and the adjoining territory of Eastern Tibet were united into a new "special administrative area," Hsi-Kan, with Batang, re-named Baanfu, as capital.

The prevailing religion is Lamaism, a corrupt form of Buddhism, but along with it there exists the Bon, or Shamanistic, faith. In some places agriculture is carried on, barley and other cereals as well as pulse and vegetables being grown. In some favoured regions fruits, including peaches and even grapes, are produced. In other places the pursuits are pastoral, the domestic animals being sheep and yak (often crossed with Indian cattle), while in some regions there are buffaloes, pigs, and camels. Wool-spinning, weaving, and knitting are common, and there are many hands skilful in making images and other decorations for religious edifices. The chief minerals worked are gold, borax, and salt. There is a large trade with China and considerable traffic across the Indian frontier.

The trade between India and Tibet has to be carried through lofty passes between 14,000 and 18,000 feet high, most of which are practically impassable during seasons of heavy rain and snow. Sheep and also crosses between yaks and ordinary cattle are used as beasts of burden. The most important route into Tibet from India is from Siliguri, near Darjeeling in northern Bengal, and across the small Frontier State of Sikkim to Gyantse and Yatung in Tibet, the two leading trade marts authorised by the existing Convention. The other chief means of access to Tibet are from Almora in the northern part of the United Provinces, and from Simla over the Simla-Tibet road to Gartok in western Tibet, which is at about 14,200 feet elevation above the sea. From Almora to Gartok the direction is almost due north,

and from Simla to Gartok is almost due east. The trade between India and Tibet was as follows :—

—	1917-18	1918-19	1919-20	1920-21
	£	£	£	£
Imports into India ¹	430,000	460,000	438,000	313,400
Exports to Tibet ²	151,000	• 150,000	214,000	613,200

¹ Mainly raw wool.

² Largely cotton piece goods.

For the removal of hindrances to the Indian trade a treaty was made with China in 1890, supplemented by a second treaty in 1893, but the hindrances still remained. Consequently, in 1904, the Indian Government sent a mission with an escort to arrange matters directly with the Tibetan Government. The mission met with a good deal of armed opposition, but at length, on September 7, a convention was executed at Lhasa. The convention provides for the re-erection of boundary stones (alluding to former pastoral disputes) on the Sikkim frontier; for marts at Yatung, Gyantze, and Gartok for Tibetan and British merchants; for the demolition of forts on the trade routes; for a Tibetan commissioner to confer with British officials for the alteration of the objectionable features of the treaty of 1893; for the settlement of an equitable customs tariff; for the repair of the passes and the appointment of Tibetan and British officials at the trade marts. China paid an indemnity of 2,500,000 rupees (166,666*l.*), and the evacuation of the Chumbi valley by the British began in February, 1908. Further, no Tibetan territory may be sold, leased or mortgaged to any foreign Power, nor may Tibetan affairs, or Tibetan public works, be subject to foreign management or interference without the consent of the British. The adhesion of China to this convention was secured by an agreement signed at Peking on April 27, 1906. Under the Convention of August 31, 1907, Great Britain and Russia agree not to enter into negotiation with Tibet except through the Chinese Government, nor to send representatives to Lhasa. But this engagement does not affect the provisions of the British-Tibetan convention of September 7, 1904, ratified by China in 1906. Negotiations were begun at Simla in Sept. 1907, for the conclusion of Trade Regulations between India and Tibet, and were brought to a satisfactory conclusion in April, 1908.

The Revolution in China in 1911 was not without its effect on the Tibetans, who expelled the Chinese garrison. Subsequently an expedition was dispatched from Szechuan and Yunnan, but Great Britain protested and caused its withdrawal. In August, 1912, the British Minister in Peking presented a memorandum to the Chinese Government outlining the attitude of the British Government towards the Tibetan question. It held that the re-establishment of Chinese authority would constitute a violation of the Anglo-Chinese Treaty of 1906. Chinese suzerainty only was recognised, and Great Britain could not consent to the assertion of Chinese sovereignty over a state enjoying independent treaty relations with her. Ultimately a Tripartite Conference was opened at Simla in October, 1913. The Tibetan proposals included the independence of Tibet, the repudiation of the Anglo-Chinese Convention of 1906, and boundary rectifications; China insisted upon Tibet being an integral of Chinese territory, China engaging not to convert Tibet into a province, and asking Britain to give an undertaking not to annex Tibet, nor any portion of it. Britain suggested the creation of an Inner and Outer Tibet, the former being autonomous, and the latter under Chinese control. China declined to accept this arrangement,

and the Conference was dissolved without accomplishing anything. Since then the British Government has more than once offered to renew negotiations with the Chinese Government, but the latter has up to the present declined to do so.

Sin-Kiang, or the New Dominion, consists of Chinese Turkestan, Kulja, and Kashgaria, and comprises all Chinese dependencies lying between Mongolia on the north and Tibet on the south. It is now regarded as a separate province, its Civil Governor residing at Ili, the capital. Its area is estimated at about 550,340 square miles and population at about 1,200,000. The inhabitants are of various races, known as Turki (Kashgari, Kalmuk, Khirghiz, Taranchi, etc.), mostly Mohammedan and Chinese, who have of recent years greatly increased in numbers. The chief towns are Ili, Kashgar, Yarkand, Khotan, and Aksu. The country is administered under Chinese officials, residing at Ili, the subordinates being usually natives of the country. In regions about the Kashgar and Yarkand rivers the soil is fertile, irrigation is practised, and cereals, fruits and vegetables are grown. Other productions of the country are wool, cotton, and silk. Jade is worked, and in some districts gold is found. The whole territory is yearly increasing in population and prosperity.

British Consul-General at Kashgar.—Clarmont Percival Skrine (appointed January 1922.

Mongolia.

The vast and indefinite tract of country called **Mongolia** stretches from the Kinghan mountains on the east to the Tarbagatai mountains on the west, being intersected towards its western end by the Altai mountains and the Irtysh river. On the north it is bounded by Siberia and on the south by the outer Kan-su and other regions which are united into Sin-Kiang. The area of Mongolia is about 1,367,600 square miles, and its population about 2,600,000. A wide tract in the heart of this region is occupied by the Desert of Gobi which extends south-westwards into Chinese Turkestan. The inhabitants are nomadic Mongols and Kalmucks who range the desert with camels, horses, and sheep. Even in fertile districts they are little given to agriculture. But of recent years there has been a great extension of Chinese immigration, and a large area of what was known as Mongolia, extending from China proper and Manchuria to the Gobi Desert, is now indistinguishable from Chinese territory. Chinese settlers are gradually invading the Gobi Desert. Irrigation alone is needed. The chief town or centre of population is Urga, 170 miles due south of Khiakta, a frontier emporium for the caravan trade carried on with China across the Gobi Desert, goods being easily transported to the Siberian frontier town of Kiakhta, which stands about 100 miles from the south end of Lake Baikal. Chief exports were wool, skins and hides, furs, horns, &c. During the summer months a motor-car service for freight purposes crosses the Gobi desert, the journey between Kalgan and Urga occupying four days. It was inaugurated in 1917.

Shortly after the outbreak of the Chinese Revolution, Outer Mongolia declared its independence and proclaimed the Hutuktu (Living Buddha) as Emperor. Its autonomy was recognised by the Russian Government, and on November 3, 1912, a Convention and a Protocol were signed at Urga by the Russian Envoy and the Cabinet of the Hutuktu. By this Convention the Russian Government undertook to assist Mongolia to maintain the

autonomous *régime* she had established, to support her right to have a national army, and to admit neither the presence of Chinese troops on her soil nor the colonization by the Chinese of her territory. The Mongolian Sovereign and Government will assure to Russian subjects and Russian commerce as in the past the full enjoyment of their rights and privileges as enumerated in the Protocol, and it is clearly understood that no other foreign subjects in Mongolia shall be granted fuller rights than those accorded to Russian subjects.

On November 5, 1913, after prolonged negotiations, an agreement was reached in Peking between Russia and China, whereby Russia recognised Outer Mongolia as part of Chinese Territory under Chinese suzerainty, and China recognised the autonomy of Outer Mongolia. Both countries agreed not to send troops to Outer Mongolia other than as consular or official guards, and not to colonise its territory. Autonomous Outer Mongolia is defined as the territory formerly under the jurisdiction of the Chinese authorities at Kobdo, Uliasutai and Urga. Frontiers and other questions were settled at a tripartite conference between Mongolians, Chinese, and Russians, which were concluded in June, 1915.

In October, 1913, a war loan of 2,000,000 roubles was granted to the Mongolian Government by Russia. The advance was secured on certain revenues from districts near Kobdo, where Russian tax-collectors had already begun operations. In December, 1914, a Mongolian Bank was established. The capital has been fixed at 1,000,000 roubles, and the directorate of the bank is to be in Petrograd, with branches at Urga, Uliasutai, and Kobdo. The Mongolian Government is to receive 15 per cent. of the net annual profits, and will possess the right to purchase the bank upon the expiry of 50 years from the date of the commencement of operations.

In September, 1914, an agreement between Russia and the Urga Government was signed at Kiakhta with regard to railways in Mongolia. By the terms of the agreement Russia recognises the right of Mongolia to construct its own territorial railways, the plans for which are to be determined jointly by Russia and Mongolia. Russia is to lend its co-operation in finding capital for the railways. Mongolia engages to consult the Russian Government before granting any concession for domestic railways, so that the projected railways may not be "prejudicial to Russian economic and strategic interests." On the same date a concession was granted by Mongolia to the Russian Administration of Posts and Telegraphs for the construction of a telegraph line from the boundary of Mondii in the Irkutsk district to the Mongolian town of Uliasutai.

With the overthrow of the Romanoffs and the spread of Bolshevism the autonomy of Outer Mongolia availed little to protect the territory from the incursions of the Red forces. In November, 1919, the Urga Government petitioned Peking for the cancellation of its independence, and on 22nd of that month the Chinese Government formally declared null and void the Russo-Chinese and Russo-Mongolian agreements, as 'it was impossible to continue arrangements which had obviously lapsed owing to the dissolution of the Russian Empire, and which were a constant invitation to unrest.' On February 25, 1921, the Living Buddha, or Hutuktu, was forced to declare the independence of Outer Mongolia by Baron Ungern von Sternberg, who had invaded the territory at the head of an anti-Bolshevist army. Ungern used Urga as the base of operations against the Far Eastern Republic, whose forces eventually routed his army. Ungern was captured and handed over to the Soviet authorities, who executed him on September 15. China has opened negotiations for the restoration of the allegiance of Outer Mongolia. Inner Mongolia consists of three special districts or administrative areas, Jehol,

Chahar, and Suuiuan, each of which is governed by a Tartar-General appointed by the Chinese Government.

From March, 1915, Mongolia has a legal currency of its own. The Russian Government has granted to the Siberian Trading Bank the right to issue in Mongolia money coined in the Russian mint. On one side of the coins the value is impressed in the Russian language and a corresponding impression in Mongolian is on the reverse side. For exchange purposes the money will be equal to the Russian rouble (par value, 2s. 1½d.).

Buddhist Lamaism is the prevalent form of religion, the Lamas having their residence at Urga and other centres.

COLOMBIA.

(LA REPÚBLICA DE COLOMBIA.)

Constitution and Government.

THE Republic of Colombia, which in colonial days was called 'Vice-royalty of New Granada,' gained its independence of Spain in 1819, and was officially constituted December 27, 1819. Soon after it formed with Venezuela and Ecuador the State of 'Greater Colombia,' which continued for about ten years. It then split up into Venezuela, Ecuador, and the Republic of New Granada, on February 29, 1832. The Constitution of April 1, 1858, changed New Granada into a confederation of eight States, under the name of Confederation Granadina. On September 20, 1861, the convention of Bogotá brought out the confederation under the new name of United States of New Granada, with nine States. On May 8, 1863, an improved Constitution was formed, and the States took the name of the United States of Colombia. The revolution of 1885 brought about another change, and the National Council of Bogotá, composed of two delegates from each State, promulgated the Constitution of August 4, 1886. The sovereignty of the States was abolished, and they became simple departments, with governors appointed by the President of the Republic, though they have retained some of their old rights, such as the management of their own finances. At present there are 14 departments, 2 "Intendencias," and 7 commissaries.

The legislative power rests with a Congress of two Houses, called the Senate and the House of Representatives. The Senate contains 24 Senators elected indirectly by electors specially chosen for the purpose. The House of Representatives consists of 92 members elected by the people in 17 electoral circumscriptions (one for every 50,000 of population). Senators are elected for 4 years, Representatives for 2 years.

The President is elected by direct vote of the people for a term of 4 years, and is not eligible for re-election until 4 years afterwards; his salary is 18,000 gold dollars per annum. Congress elects, for a term of one year, two

substitutes, one of whom, failing the President during a presidential term, fills the vacancy.

President of the Republic.—General Jorge Holguin. Holds office to August 7, 1922.

President Elect.—General Pedro Nel Ospina. Elected February 10, 1922. Holds office from August 7, 1922, to August 7, 1926.

The ministries are those of the Interior, Foreign Affairs, Finance, Treasury, War, Public Instruction, Commerce and Agriculture, and Public Works.

Area and Population.

The area of the Republic is estimated at about 440,846 square miles. It has a coastline of about 3,100 miles, about equally divided between the Caribbean Sea and the Pacific Ocean. The area and population of the 14 departments, 3 intendencies and 6 commissaries was, according to the census of 1918 (October 14), as follows (the capitals in brackets):—

	Area sq. miles	Census Population, 1918			
		Males	Females	Indians	Total
<i>Departments.</i>					
Antioquia (Medellín).	22,752	396,780	426,446	—	823,226

On December 4, 1903, Panama asserted its independence and was formed into a separate Republic. On April 6, 1914, Colombia signed a treaty with the

United States, at Bogotá, agreeing to recognise the independence of Panama and receiving in return 25 million dollars (5 millions sterling) and certain rights in the Panama Canal zone. This Treaty was ratified by the United States Senate on April 20, 1921, and by the Colombian Congress on December 24, 1921. (*See* Introduction of THE STATESMAN'S YEAR-BOOK, 1915.) Most of the boundary line with Brazil is still undefined, and there are frontier difficulties with Peru. With Ecuador a boundary treaty was signed in 1917.

The capital, Bogotá (census population on July 15, 1918, 143,994; estimated population in 1921, 160,000), lies 8,600 feet above the sea. The chief commercial towns are Barranquilla (64,543), connected with the coast at Puerto Colombia by 17 miles of railway; Manizales (43,203); Cartagena (51,382); Medellín (79,146), a mining centre; Cali (45,825); Bucaramanga (24,919); Cúcuta (29,490), the last two being coffee centres.

Religion and Instruction.

The religion of the nation is Roman Catholicism. There are 4 Catholic archbishops, viz. of Bogotá, Cartagena, Medellín, and Popayán, the first having 4 suffragans and the other three 2 a-piece. One of the suffragan sees is Panamá, belonging to ecclesiastical province of Cartagena, and now also to the Republic of Panamá. Other forms of religion being permitted, so long as their exercise is 'not contrary to Christian morals nor to the law.'

There is a Ministry of Public Instruction which has the supreme direction of education throughout the Republic. Education is divided into primary, secondary, professional, artistic and industrial. In 1920 there were 5,317 primary schools with 337,315 pupils. Nearly all the schools for secondary education, maintained or assisted by the nation, are entrusted to religious corporations of the Catholic Church. In 1920 there were 73 secondary schools with 7,305 pupils; 28 professional schools with 2,784 pupils, and 35 art and trade schools with 1,606 pupils. There were also 27 normal schools with 1,231 pupils. The oldest University is that of Bogotá (founded 1572). This and the School of Mines at Medellín are national institutions. The other Universities are departmental. They are the Universities at Medellín (founded 1822), of Cartagena, of Popayan, and of Pasto. In 1917 these together had 2,488 students. For the working class there are many schools of arts and trades directed by the Salesian Fathers. There are other schools or colleges open under religious orders, and the school of fine arts has been reopened. Primary education is gratuitous but not compulsory. In 1920 the State spent 1,331,875 pesos on education.

The Republic possesses a national library, museum, and observatory at Bogotá.

Finance.

Revenue and expenditure for 6 years in gold pesos :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
1916 ¹	18,298,015	19,799,607	1919	34,364,595	84,235,862
1917	18,859,395	19,647,659	1920	29,526,313	29,095,461
1918	12,265,148	19,089,574	1921 ²	27,495,500	83,256,109

¹ 14 months.

² Estimates.

The budget estimates for the year ending December 31, 1921, were as follows:—

Revenue	Gold Pesos	Expenditure	Gold Pesos
Emerald Mines of Muzo	1,000,000	Ministry of Interior	9,219,745
Salt Tax	1,100,000	Ministry of Foreign Affairs	1,959,991
Railways	600,000	Ministry of Finance	793,145
Telegraphs	1,285,000	Ministry of War	4,290,915
Customs	14,000,000	Public Instruction	1,812,115
Consular Dues	1,200,000	National Debt Service	6,530,429
Stamps	1,150,000	Public Works	6,803,948
Consumers' Tax	1,020,000	Agriculture & Commerce	1,845,886
Total (including all revenues)	27,495,500	Total	33,256,109

The external debt on April 1, 1921, amounted to 4,048,540%, made up as follows:—Consolidated external debt of 1896, 1,665,600%; five per cent. Government bonds of 1906, specially secured on the Bogota-Sabana Railway (258,560%), six per cent. external gold loan of 1911 (257,740%), six per cent. external debt of 1913 (1,300,940%), Puerto Wilches Railway Bonds (428,580%) and Perier loan of 1913 (169,000%).

The consolidated internal debt on June 1, 1921, was 2,848,260 gold pesos, and the floating debt 11,104,428 pesos.

Defence.

Military service is compulsory, from 1 to 1½ years. The permanent army consists of 3 divisions of 2 brigades of 2 regiments of infantry; total 12 infantry regiments; 1 cavalry regiment of 4 squadrons; 1 artillery section; 1 engineer battalion; 1 transport battalion of 3 companies. The peace effective is about 6,000. In war time every fit Colombian is compelled to serve, and the war effective is about 50,000. The infantry are armed with rifles of the improved Remington pattern, with the French Gras rifle, and with the 88 pattern Mauser.

Colombia has no navy.

Production and Industry.

Only a small section of the country is under cultivation. Much of the soil is fertile, but of no present value, from want of means of communication and transport. Coffee is the staple product; exports 1920, 86,619,774 kilos., valued at 36,328,333 pesos. Tobacco is also grown; cotton is produced in Magdalena, Bolivar, Antioquia and Santander, and is beginning to be cultivated in Boyaca, Tolima, and Cundinamarca. Cotton area in 1918, 24,000 acres; production 2,750,000 lbs. Cocoa, sugar, vegetable ivory, tagua (or vegetable ivory nut), and dyewoods are produced, besides wheat, maize, plantains, &c. Banana cultivation is extending, and near Santa Marta a large amount of capital is invested in this industry. The rubber tree grows wild, and its cultivation has begun. Tolu balsam is cultivated, and copaiba trees are tapped but are not cultivated. Dye and cedar woods are abundant on the Magdalena river, but little or no wood of any sort is exported. The Panama hat industry is making great strides; some 86 per cent. of the hats manu-

factured are sent to the United States. The total number of factories in Colombia in 1915 was 121, in which 12,406,000 dollars were invested. The principal manufacturing centres are Bogotá, Medellín, Barranquilla, and Cartagena.

The country may be divided into five sections:—(1) The Caribbean coast country is tropical, little agriculture is engaged in (except the raising of bananas in Santa Marta) but some cotton, sugar, and tobacco is grown. The region is good cattle country. (2) The Department of Antioquia is mountainous, the climate tropical and temperate, according to altitude. This is an important coffee and cattle country, and the centre of the gold-mining industry. (3) The central plateau (Bogotá) has a temperate climate, the altitude being 8,000 feet. Agriculture and cattle raising are well suited to this region, and the coffee production is very large. (4) The Pacific coast section is mountainous, tropical and temperate according to altitude. It includes the Cauca River valley, especially adapted to agriculture and cattle raising. Among the products of the region are cacao, cattle, coffee, gold, and platinum. (5) The eastern section embraces the territory between the Magdalena River and the Venezuelan border and north of the Bogotá Plateau, it is mountainous, tropical, and heavily wooded. Its principal product is coffee.

Colombia is rich in minerals, and gold is found in all the departments. The mines are in Antioquia, Cauca, Bolívar, Tolima, and Narino. The number of gold mines known in Colombia is as follows: Antioquia 12,181, Narino 2,452, Caldas 2,610, Tolima 502, Cauca 641. Other minerals, more or less worked, are copper, lead, mercury, cinnabar (14 mines), manganese (7 mines), emeralds (32 mines), and platinum (first discovered in Colombia in 1735), which is found in abundance in the alluvial deposits of the Choco River and in the basins of the San Juan and Condoto Rivers. The emerald mines of Muzo and Coscuez belong to the Government. No statistics of their output are published, but they are said to yield 1,000,000 pesos worth of stones per annum. Nearly all the emeralds mined to-day come from Colombia. The Pradera iron works north-east of Bogotá have a capacity of 30 tons of pig iron daily, and manufacture wrought iron, sugar mills, castings, &c. In the immediate neighbourhood of the works are coal, iron, limestone, sand, manganese, and fireclay deposits, which render the locality highly favourable for the development of metallurgical industries. The salt mines at Zipaquirá, north of Bogotá, are a government monopoly and a great source of revenue, supplying most of the interior departments. The maritime departments use sea salt evaporated at the numerous natural salt pans along the coast. In several of the departments there are extensive deposits of coal and petroleum. On the coasts there are valuable pearl fisheries which the Government desires to concede for a term of years.

Commerce.

Imports and exports for 6 years :—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1915	3,568,070	6,815,825	1918	3,406,800	7,545,712
1916	5,784,505	6,830,855	1919	7,729,170	15,805,851
1917	4,922,880	6,878,534	1920	13,845,054	14,074,349

Trade by principal countries for 2 years in pesos gold :—

Imports	1918	1916	Exports	1918	1916
United States .	12,497,77	8,661,780	United States .	31,134,004	27,293,607
United Kingdom .	5,934,635	5,369,668	United Kingdom .	284,727	650,877
Spain . . .	1,121,490	—	Panama . . .	1,649,769	—

Italy . . .	482,181	468,411	Italy . . .	21,443	174,144

* The principal articles of export (1919) were, in gold pesos :—Coffee, 54,291,638 ; hides, 8,594,561 ; bananas, 2,215,369 ; gold, 123,681 ; silver, 57,983 ; platinum, 3,505,990.

About 67 per cent. of the coffee exported from Colombia goes to the United States ; cotton to Liverpool or Havre. The chief imports are food-stuffs (3,593,351 pesos in 1919), drugs (2,099,410 pesos in 1919), metals (8,664,176 pesos in 1919), and cotton goods (16,377,404 pesos in 1919).

The customs revenues in 1920 amounted to 17,478,955 pesos, as compared with 5,832,816 pesos in 1918.

Total trade between United Kingdom and Colombia for 5 years :—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Colombia into U.K.	420,178	41,709	581,093	2,688,661	2,850,177
Exports to Colombia from U.K. .	1,478,677	1,167,308	1,834,159	6,189,011	1,410,504

Shipping and Communications.

At Cartagena in 1918 there entered 263 vessels of 428,625 tons. Of these, 110 of 320,971 tons were American, and 26 of 66,242 tons British.

In Colombia there are 15 lines of railway (10 national, and 5 British companies), with a total length (1920) of 891 miles. Of the total, 466 miles have a gauge of 3 ft. ; the rest a metre gauge. The roads of Colombia are generally simple mule tracks, but the Government continues to improve the main roads, which can be used now by automobiles. There are many cart roads besides. Much of the inland traffic is by river, and the work of clearing and canalising the lower and upper Magdalena is being carried on. That river is navigable for 900 miles ; steamers ascend to La Dorada, 592 miles from Barranquilla. Tributaries supply 215 miles more of navigable water, and on these rivers 41 steamers, with a total tonnage of 7,696, regularly ply.

Postal facilities between Barranquilla and foreign countries are stated to be excellent, but as to internal services there are no recent statistics. In 1915, in the internal service there were 3,417,564 letters and post-cards transmitted, and 2,389,786 packets of printed matter, samples, and business papers. Parcels (1921), 75,675. Number of offices, 843. A British river-transport company has contracted with the Government to convey mails and passengers to and from the interior every three days. Other companies, British, German, and native, ply on the rivers.

There were 13,640 miles of Government telegraph lines in July, 1920 ; number of offices, 712 ; 46,709,066 telegrams were despatched in 1919.

Money, Weights, and Measures.

* Under the Law of June 12, 1907, the monetary unit is a gold dollar equal to one-fifth of a pound sterling and of proportionate weight, the fineness being the same. Gold coins are 2½, 5, and 10 dollars. Silver coins are (900 fine) the half-dollar, and 20 and 10 centavos. Nickel coins for 1, 2, and 5 pesos (centavos) are legal tender. There are also notes representing gold dollars of 1, 2, 5, and 10 dollars respectively. Colombia has a gold coinage, and minting has already begun at the Mints in Medellín and Bogotá. In December, 1916, a law was promulgated authorising the Government to coin gold pieces in the mints of Bogotá and Medellín free of charge. On June 30, 1921, the total currency of Colombia was given as follows:—gold coinage, 26,438,897 pesos; paper money (gold certificates), 10,160,931 pesos; silver coinage, 7,544,360 pesos; nickel coinage, 1,857,305 pesos; and bills of old issues not presented for exchange, 213,123 pesos, making a total of 46,214,616 pesos. Besides this sum in legal tender, there were also in circulation on June 30, 1921:—Treasury certificates, 3,250,838 pesos; bank certificates, 1,704,013 pesos; certificates of the mint of Medellín, 579,412 pesos; and bonds and national notes, 1,410,000 pesos; notes of the Banco de Pasto, 524 pesos; which, added to the legal specie, gives a general total of 53,159,405 pesos.

The metric system was introduced into the Republic in 1857. In custom-house business the kilogramme, equal to 2,204 avoirdupois pounds, is the standard. In ordinary commerce the arroba, of 25 Colombian pounds, or 12½ kilos; the quintal, of 100 Colombian pounds, or 50 kilos; and the carga, of 250 Colombian pounds, or 125 kilos, are generally used. The Colombian libra is equal to 1·102 pound avoirdupois. The Colombian vara, or 80 cm., is still in some cases the measure of length used for retailing purposes, but in liquid measure the French litre is the legal standard.

Diplomatic and Consular Representatives.

1. OF COLOMBIA IN GREAT BRITAIN.

Minister and Envoy.—Dr. Ignacio Gutiérrez-Ponce (January 13, 1915).

Counsellor.—Dr. Rafael Parga.

Secretary of Legation.—Alfonso Delgado.

Second Secretary.—Carlos A. Dávila.

Attaché.—Benjamin Casabianca.

Commercial Attaché.—Miguel Lopez Pumarejo.

Consul-General.—D. Joaquín Orrantía.

Director of Bureau of Information and Trade Propaganda.—J. Medina.

There are consuls or vice-consuls at Liverpool, Southampton, Birmingham, Cardiff, Dundee, Glasgow, Newcastle, and Manchester.

2. OF GREAT BRITAIN IN COLOMBIA.

Envoy, Minister and Consul-General.—Lord H. A. R. Hervey, Appointed 1919.

Naval Attaché.—Paymaster Lt.-Commander Lloyd Hirst, R.N.

There are vice-consuls at Barranquilla, Bogotá, Carthagena, Pasto, Medellín, and Santa Marta, and consular agents at Tumaco, Honda, and Buenaventura.

COSTA RICA.

(REPÚBLICA DE COSTA RICA.)

Constitution and Government.

THE Republic of Costa Rica, an independent State since the year 1821, and forming part from 1824 to 1829 of the Confederation of Central America, is governed under a Constitution promulgated on December 7, 1871, and modified very frequently since that date. Practically there was no constitution, but only dictatorships, between 1870 and 1882. The legislative power is vested in a Chamber of Representatives called the Constitutional Congress, and made up of 43 deputies, being one representative to every 8,000 inhabitants. By the Election Law of August 18, 1913, universal suffrage was adopted for all male citizens who are of age and able to support themselves, except those deprived of civil rights, criminals, bankrupts and the insane. Voting for President, Deputies and Municipal Councillors is public, direct and free. The members of the Chamber are elected for the term of four years, one-half retiring every two years. The executive authority is in the hands of a President, elected for the term of four years.

President of the Republic.—Don Julio Acosta, elected on December 7, 1919; assumed office May 8, 1920, for a period of 4 years, under the Constitution of 1871.

The administration normally is carried on by six Secretaries of State, who are appointed by, and responsible to, the President. They are the Secretaries respectively of the Interior and Police; of Foreign Affairs, Justice, and Public Worship; of Public Instruction; of War and Marine; of Finance and Commerce; and a Secretary of Public Works.

Area and Population.

The area of the Republic is estimated at 23,000 English square miles, divided into seven provinces, San José, Alajuela, Heredia, Cartago, Guanacaste, Puntarenas, and Limon. The last Census was taken in 1892. According to the estimate for December 31, 1920, the population was 468,373, made up as follows:—

Province	Population	Province	Population
San José	141,342	Guanacaste	45,148
Alajuela	113,039	Puntarenas	23,784
Heredia	47,715	Limon	23,777
Cartago	73,568	Total	468,373

There are about 3,500 aborigines (Indians).

The vital statistics for three years were as follows:—

	Marriages	Births	Deaths	Increase	Immigration	Emigration
1918	1,827	18,412	14,034	4,378	1,857	2,157
1919	1,748	16,796	12,069	4,727	2,810	3,233
1920	2,725	18,066	13,420	4,646	6,040	5,280

Of the total births in 1919, 51 per cent. were males and 49 per cent. females, and 75 per cent. legitimate and 25 per cent. illegitimate.

The population of European descent, many of them pure Spanish blood, dwell mostly around the capital, the city of San José (population, 1920, 38,930, with suburbs, 51,395), and in the towns of Alajuela (11,908), Cartago (17,402), Heredia (13,885), Liberia (2,596), Puntarenas (5,100), and Limón (10,231). There are some 18,000 coloured British West Indians, mostly in Limón Province, on the banana farms.

For the purpose of public health the country has been divided into 26 districts, superintended by medical men paid by the national Treasury. The Rockefeller Institute has established a branch in Costa Rica to combat ankilostomiasis, and the Medical Officer in charge is giving most valuable advice and work to the Costa Rican authorities.

Religion and Instruction.

The Roman Catholic is the religion of the State, but there is entirely religious liberty under the Constitution. The Archbishop of Costa Rica was consecrated in August, 1921, and he has under him the Bishop of Alajuela.

Elementary instruction is compulsory and free. Elementary schools are provided and maintained by local school councils, while the national government pays the teachers, besides making subventions in aid of local funds. In 1920, there were open 411 elementary schools; the teachers numbered 1348, and the enrolled pupils 32,836, the average attendance being 28,810. For secondary instruction there are at San José a lyceum for boys with 450 pupils in 1920, and a college for girls with 428 pupils. A normal school established in 1915 at Heredia has 285 pupils. The towns of Cartago, Alajuela, and Heredia, have each a college. For professional instruction there is a Medical Faculty, and also schools of Law, Pharmacy, and Dentistry.

Spanish is the universal language of the country.

Justice.

Justice is administered by the Supreme Court of Justice, two Appeal Courts, and the Court of Cassation. There are also subordinate courts in the separate provinces, and local justices throughout the Republic. Capital punishment cannot be inflicted. In 1920 there were 8,379 convictions of misdemeanour, and 1,011 of crime.

Finance.

The revenue and expenditure for five years have been (in colones, worth about 12·33*d.* in 1920), as follows:—

—	1917	1918	1919	1920	1921 ¹
	£	£	£	£	£
Revenue . . .	656,397	700,948	1,187,446	1,707,577	1,575,120
Expenditure . . .	1,203,222	1,227,971	2,031,866	1,787,479	1,574,412

¹ Estimates.

The revenue is chiefly derived from direct taxation (land taxes), customs (719,412*l.* in 1920), liquors, and railways, posts, and telegraphs. The largest items of expenditure are finance, public instruction, and internal development.

The foreign debt of the Republic outstanding on December 31, 1920, was 2,911,595*l.*, made up of gold refunding bonds, 1911, of 2,000,000*l.* (1,586,660*l.* issued) and the French Loan of 1912, of 35,000,000 francs (33,421,500 francs outstanding). The internal debt on December 31, 1920, amounted to 3,215,481*l.*

Defence.

Costa Rica had an army, including reserve and national guard, of 52,208 officers and men. The active army numbered 38,946, and consisted of 3 brigades, 1 battalion, 3 companies, and 135 unclassified soldiers. The peace strength is 500 men, 5,000 in case of internal trouble, and the war strength is estimated at 50,000 militia, as every male between 18 and 50 may be required to serve. The Republic has also 1 motor launch on the Atlantic side and 1 on the Pacific side for Revenue purposes.

Production and Industry.

A considerable area of the country is high table-land, with a temperate climate, but the land along the coast is low, with tropical vegetation and a tropical climate. Agriculture is the principal industry. There are thousands of square miles of public lands in Costa Rica that have never been cleared, on which can be found quantities of virgin rosewood, cedar, mahogany, and other cabinet woods. The principal agricultural products are coffee (30,430,700 pounds was the production in 1920; quantity exported 13,998 metric tons valued at 917,420*l.*); and bananas, 95,400 acres (8,652,473 bunches valued at 827,988*l.* in 1920; 7,270,624 bunches valued at 695,753*l.* in 1919). There is a banana trade with New Orleans, New York, Boston, and the United Kingdom. Bee-keeping has been commenced; it is estimated that there are 3,000 hives in the Republic. The second industry of importance is that of gold and silver mining on the Pacific slope. Several districts are auriferous, and mining is carried on in the Abangarez, Barranca, and Aguacate districts. Deposits of manganese ore have been discovered in the Pacific province of Guanacaste. Maize, sugar-cane, rice, and potatoes are commonly cultivated. Some 2,700 acres are under tobacco. The distillation of spirits is a government monopoly. The live stock, in 1915, consisted of 347,475 cattle, 64,717 horses, 76,198 pigs, besides mules, sheep, and goats.

There are officially enumerated 3,296 factories and industries in the Republic, including coffee-drying establishments, starch, broom and wood-work factories. Electricity, derived from water power in the highlands, is widely used as motive power.

Commerce.

The value of imports into and exports from Costa Rica in 5 years (including coin and bullion) was as follows (in sterling 1 colon = 22*·*9*d.*):—

—	1916	1917	1918	1919	1920
	£	£	£	£	£
Imports . . .	1,420,199	1,203,277	768,641	1,696,776	8,645,873
Exports . . .	2,891,649	2,447,777	1,980,526	3,652,587	2,568,929

For 1918, 1919, and 1920 the value of the chief imports and exports was as follows:—

Imports	1918	1919	Exports	1919	1920
	£	£		£	£
Cotton goods . . .	94,075	62,752	Coffee . . .	2,402,277	917,420
Cattle . . .	94,600	53,293	Bananas . . .	693,753	827,938
Coffee bags . . .	23,077	49,112	Gold, silver, etc. .	151,093	200,754
Flour . . .	58,835	133,155	Cacao . . .	110,852	96,352
Lard . . .	3,156	5,643	Manganese ore . . .	61,816	20,078
Drugs . . .	16,686	30,053	Hardwoods . . .	55,339	75,163
Rice . . .	9,278	3,726	Sugar . . .	50,663	271,660
			Hides and skins . .	36,908	19,141

Of the import value in 1920, 1,899,864*l.* (52·11 per cent.) was from the United States, 518,088*l.* (4·21 per cent.) from the United Kingdom, 124,688*l.* (3·42 per cent.) from Spanish America, 489,276*l.* (13·42 per cent.) from Germany. Of the value exported, 1,822,440*l.* (71·08 per cent.) went to the United States, 532,784*l.* (20·78 per cent.) to the United Kingdom, and 124,607*l.* (4·86 per cent.) to Spanish America.

Total trade between the United Kingdom and Costa Rica (Board of Trade Returns) for 5 years:—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Costa Rica into U.K.	913,623	344,626	963,528	1,023,953	1,592,093
Exports to Costa Rica from U.K.	145,789	53,311	112,424	604,038	249,843

Shipping and Communications.

There are no official figures available as regards Costa Rican shipping. On the Atlantic coast there are several small sailing vessels and power launches, and on the Pacific coast some motor launches.

In 1920 there entered the ports of the Republic 532 vessels of 760,801 tons, and cleared 538 vessels of 763,753 tons. Limon is visited regularly by steamers of 4 shipping companies (2 British, 1 American, 1 Dutch) connecting it with ports of Europe and America. The steamers of the United Fruit Company are under the British flag. Two lines (1 British, 1 U.S.A., and also several small coasting "tramp" steamers between San Francisco and Canal Zone), visit the Pacific port of Puntarenas.

The railway system connects San José with the Atlantic port, and has been extended to connect the capital with the Pacific port. The length of railway is 402 miles—the Costa Rica Railway, 182 miles (main line and branches; San José to Limon, 103 miles); the Pacific Railway (State owned), 88 miles (San José to Punta Arenas, 73 miles), the Northern Railway, 65 miles, and the United Fruit Co. Railway, 67 miles. When the Railway system is completed, through rail communication will be established between Port Limon and the new port of Almirante in Panama. At San José there is an electric tramway of 8½ miles. In 1916 a road for motor traffic was completed between San José and Heredia, a distance of 7 miles. There is also a motor road between San José and Cartago, a distance of 13 miles. About 85 miles of motoring roads are now open.

In 1920 there were 301 post offices. The number of postal packets despatched and received was 3,944,504.

There were (1920) 1,840 miles of telegraph lines, with 122 telegraph offices. The number of messages in 1920 was 1,034,162. On December 31, 1920, there were 1,584 telephones; the telephone lines had a length of about 1,387 miles. Wireless telegraphy is working from Limon to Bocas del Toro (Panama) 60 miles, and to Bluefields, in Nicaragua, and to Colon, in Republic of Panama. Limon has a radius of 300 miles. The Government has a small wireless station at Colorado (mouth of R. San Juan, near Nicaraguan border).

Money, Weights, and Measures.

In October, 1914, the Banco Internacional de Costa Rica was established as a Government Bank of Issue. It is authorised to issue up to 19,000,000 colones in notes to bearer (guaranteed by Government 6 per cent. Bonds, un-issued balance of Costa Rica Gold Refunding Bonds of 1911, and other Government securities). There were three other banks of issue in Costa Rica, the Anglo-Costa Rican Bank (founded 1863) and the Bank of Costa Rica (1877), with a capital of 1,200,000 and 2,000,000 colones respectively, and the Mercantile Bank of Costa Rica (1908) with a capital of 1,500,000 colones, but their privileges were cancelled on March 31, 1921. The Mercantile Bank of the Americas of New York has purchased a controlling interest in the Mercantile Bank (October, 1919). A branch of the Royal Bank of Canada was opened in August, 1915. The actual note circulation on March 31, 1921, was 15,536,008 colones, for which there was a gold reserve of 2,530,411 colones. There were also, in addition, silver certificates to the extent of 3,272,250 colones.

On October 26, 1896, an Act was passed for the adoption of a gold standard, the monetary unit to be the gold *colon*, weighing 778 grammes, .900 fine (value about 22'9d.). The U.S. gold dollar is worth 2'15 colones and the English sovereign, 10'45 colones. The new silver coinage consists of fractions of the colon, viz., 50, 25, 10, and 5-cent pieces .500 fine silver, which are legal tender up to 10 colons, copper being legal tender up to 1 colon. The copper coins are 10 and 5 cent pieces. There are also 50 and 25 cent and 1 and 2 colon notes (silver certificates). Gold and silver coins have practically disappeared from circulation; copper coins in circulation amount to 246,223 colones.

The metric system is now in use; the following are the old weights and measures:—

The <i>Libra</i>	=1'014 lb. avoirdupois.
„ <i>Quintal</i>	=101'40 lbs. „
„ <i>Arroba</i>	=25'35 „
„ <i>Fanega</i>	=11 bushels (imperial bushel).

The old weights and measures of Spain are in use in the country districts but the introduction of the French metric system is legally established and in general use.

On January 15, 1921, the Republic adopted as its standard time that of the meridian 90 degrees west of Greenwich.

Diplomatic and Consular Representatives.

1. OF COSTA RICA IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary in London.—Vacant.

Acting Consul-General.—Percy G. Harrison, 58, Lombard Street, E.C.

There are Consular Representatives at Birmingham, Cardiff, Falmouth, Glasgow, Leeds, Liverpool, Manchester, Nottingham Southampton, Swansea.

2. OF GREAT BRITAIN IN COSTA RICA.

Envoy Extraordinary and Minister Plenipotentiary and Consul-General.
 —A. Percy Bennett, C.M.G.
Consul.—F. N. Cox.
Consul at Port Limon.—F. Gordon.

Statistical and other Books of Reference concerning Costa Rica.

CUBA.

Constitution and Government.

CUBA, except for a brief period of British occupancy in 1762, remained a Spanish possession from the date of its discovery by Columbus until December 10, 1898, when the sovereignty was relinquished under the terms of the Treaty of Paris which ended the armed intervention of the United States in the struggle of the Cubans against Spanish rule. Cuba thus became an independent State. A convention which assembled on November 5, 1900, drew up a constitution which was adopted February 21, 1901, under which the Island assumed a republican form of government, with a President, Vice-President, a Senate and a House of Representatives. A law was passed in Washington authorising the President of the United States to hand over the government to the Cuban people upon the undertaking that they should conclude no treaty with a foreign power that would endanger the independence of Cuba, that no debts should be contracted

for which the current revenue would not suffice, that the United States should have certain rights of intervention, and be granted the use of Naval Stations. On June 12, 1901; these conditions were accepted. On February 24, 1902, the election of the President and Vice-President took place, and the control of the Island was formally transferred to the national government on May 20. The coaling stations of Guantanamo Bay and Bahia Honda were leased to the United States for 2,000 dollars annually, on July 2, 1903. A reciprocal commercial treaty, December 27, 1903, further strengthened the ties between Cuba and the United States. After political disturbances, an American Commission formed a provisional government in August, 1906, which was continued until January 28, 1909, when the national government was resumed after the institution of electoral reforms.

President.—Dr. Alfredo Zayas. Born February 21, 1861. Inaugurated May 20, 1921; term expires May 20, 1925.

Vice-President.—General Francisco Carrillo.

There is a Cabinet consisting of the Secretaries of State, of Justice, of War and Marine, of the Interior, of Finance, of Agriculture, Commerce, and Labour, of Public Instruction, of Public Works, and of Sanitation and Charity.

The National Congress is made up of a Senate (24 members, 4 for each province) and a House of Representatives (118 members, 1 for every 25,000 of the inhabitants).

The country is divided in six provinces (*Provincias*) and 112 municipalities (*Municipios*). The province is ruled by a Governor elected indirectly by the people and a Council; and the Municipality by an Alcalde (Mayor), and by a municipal council elected by the people of the town.

Area and Population.

Cuba has an area of 44,215 square miles, with a population, according to the enumeration of November, 1919, of 2,889,004. The area, population, and density of population of each of the six provinces were as follows:—

Province	Area	Population in 1919	Pop. per sq. mile
	Square miles		
Havana	3,174	697,583	219.77
Pinar del Río	5,212	261,198	51.07
Matanzas	3,260	312,704	95.09
Santa Clara	8,266	657,697	79.95
Camagüey	10,076	228,913	22.71
Oriente	14,227	730,909	51.31
Total	44,215	2,889,004	65.34

The population in 1919 has increased 261,369 over that of 1916. The whites formed 74.3 and the coloured 25.7 of the total population.

In 1916, there were 56,086 births, 13,659 marriages, 40,943 deaths. The surplus of births over deaths was 15,143. In 1920 there were 340,241 immigrants, including 174,221 males, 163,949 females, and 2,071 children. Of the total, 94,294 were Spaniards.

The chief towns are Havana, 363,506; Cienfuegos, 95,865; Camagüey 98,193; Santiago de Cuba, 70,232; Guantánamo, 68,883; Matanzas, 62,638; Santa Clara, 63,151; Manzanillo, 56,570; Pinar del Río, 47,858; Sancti Spiritus, 58,843; Trinidad, 40,602; Cárdenas, 32,758.

Instruction.

Since the development of the Education Act of 1899, when the present system of elementary and secondary schools was introduced, education in Cuba has made rapid strides. Each municipality has a Board of Education, and Government schools are established in all towns and rural districts. Education is compulsory. In the interior regular circuits for special teachers who conduct classes in the higher subjects, travelling from school to school in succession, maintain a high standard of instruction in the rural districts. In 1919, 334,671 children were enrolled in the Government schools, which had 6,151 teachers. A wide system of kindergartens has been developed, and night schools for adults. In 1919, 223 new schools were established. In each province the Government maintains a special Institute for advanced education. Annexed to these Institutes are the normal schools for training teachers. Near Havana there is a special school with a staff drawn from English public schools, on which the school is modelled.

University instruction is given at the University of Havana (founded in 1721), which in November 1919 had 2,272 students, divided as follows:—Faculties of Liberal Arts and Science, 357; of Medicine and Pharmacy, 1,457 and of Law, 458.

Finance.

Revenue and expenditure (budget estimates) for 5 years:—

	1916-17	1917-18	1918-19	1920-21	1921-22
	£	£	£	£	£
Revenue . . .	8,365,718	9,335,938	12,892,000	20,827,417	18,228,000
Expenditure . .	8,052,581	8,830,640	10,878,973	20,827,417	16,070,982

The principal items of estimated income in 1921-22 were:—Customs Revenue, 9,750,000*l*. The principal items of estimated expenditure were:—War and Marine, 3,547,385*l*.; Instruction, 2,382,429*l*.

The debt of the Republic of Cuba on December 31, 1920, amounted to 88,306,100 dollars, made up as follows:—Foreign debt, 49,644,000 dollars, and internal debt, 38,662,100 dollars.

Defence.

The military age is between 21 and 28, and the army is composed of 16,569 men (610 officers and 75 cadets) in the land forces. The navy consists of 2 cruisers, 16 gunboats, 4 submarine chasers, and 3 small auxiliaries. The strength of the navy is 890 men, 130 officers, and 20 cadets.

Production and Industry.

The staple products of Cuba are tobacco and sugar, but coffee, cocoa, cereals, and potatoes are grown, and a considerable trade is done in fruits and minerals. In 1919-20 the tobacco manufactured in Cuba was valued at 2,373,966 dollars. In the year ending June 30, 1919, 135,290,443 cigars and 9,037,301 boxes of cigarettes were exported. In 1918-19 the sugar crop was 4,446,229 tons (valued at 457,305,858 dollars); in 1919-20 it was 3,735,425 tons (valued at 1,005,451,080 dollars). The total area of the sugar plantations is 1,384,812 acres. In 1919-20 there were 192 sugar mills. Rice growing has recently been started. The principal fruits exported were pineapples, bananas, citrus fruit, and coconuts. The

production of honey in 1919-20 amounted to 185,091,864 gallons, valued at 5,552,755 dollars.

Cuba's production of rum in 1919 was 11,489,718 gallons, valued at 4,944,632 dollars, and of alcohol, 5,778,147 gallons, valued at 2,815,458 dollars.

On December 31, 1918, the live stock in the island consisted of 3,965,600 head of cattle, 779,496 horses, and 64,570 mules.

Cuba has forest lands, many of which are in private ownership, but the forests belonging to the State have an area of about 1,250,000 acres. These forests contain valuable cabinet woods, such as mahogany and cedar, besides dye-woods, fibres, gums, resins, and oils. Cedar is used locally for cigar-boxes, and mahogany is exported. Many other hard woods are used for railway sleepers, carts, ploughs and other local purposes.

On June 30, 1920 the mining area of Cuba extended to 915,725 acres, and included iron (407,460 acres), copper (248,115 acres), oil (102,367 acres), manganese (42,125 acres), and asphalt (36,457 acres).

In 1920 there were in Cuba 314 commercial companies with a capital of 229,662,500 dollars.

Commerce.

The value of the imports and exports (including bullion and specie) for 5 years (1916-1917, ending June 30, and 1918-1920 calendar years) were as follows :—

—	1916	1917	1918	1919	1920
	£	£	£	£	£
Imports . . .	49,655,655	54,514,611	59,524,443	71,515,304	108,814,431
Exports . . .	71,814,270	73,369,102	82,665,050	114,582,074	213,784,585

The imports and exports were distributed as follows :—

Countries	Imports from		Exports to	
	1919	1920	1919	1920
	Dollars	Dollars	Dollars	Dollars
United States	272,192,946	321,627,449	439,633,936	642,148,034
Other American Countries	27,257,637	32,833,524	10,912,602	23,837,143
United Kingdom	8,746,505	15,060,680	82,521,328	126,451,511
Spain	15,911,198	19,824,512	8,243,963	10,860,776
France	9,905,719	13,607,288	23,041,878	26,544,432
Other European countries	3,257,488	6,332,231	6,646,679	19,109,608
Other countries	20,306,029	28,007,876	1,909,987	6,146,837
Total	357,576,522	437,293,560	572,910,373	855,138,341

The principal exports are sugar and tobacco. In 1919, sugar was exported to the value of 81,570,178*l.*, and tobacco to the value of 8,167,366*l.* The principal imports in 1919 were foodstuffs to the value of 23,170,848*l.*, tissues and manufactures, 8,314,337*l.*, machinery, 8,025,873*l.*, metals and metal manufactures, 4,479,747*l.*, and chemicals, 4,362,305*l.*

The custom revenues in 1917-18 amounted to 7,897,800*l.*, and in 1919 to 11,100,831*l.*

Total trade between Cuba and the United Kingdom (Board of Trade returns) for five years.—

	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Cuba into U.K.	17,770,637	22,519,576	17,882,831	26,184,400	6,425,427
Exports to Cuba from U.K.	2,012,667	1,964,736	1,983,027	7,349,917	1,890,708

Shipping and Communications.

In 1919, 89,436 vessels of 203,975,959 tons net entered and 88,789 vessels of 203,436,406 tons net cleared the ports of the Republic in the foreign trade. In the coastwise trade 14,684 vessels of 2,582,829 tons net entered, and 14,712 vessels of 2,584,211 tons net cleared. In 1919-20, 2,899 vessels cleared the port of Havana.

In Cuba there were, in 1919, 3,200 miles of railway—the United Railways of Havana, 705 miles; Cuba Railroad, 589 miles; Cuban Central Railway, 389 miles, and Western Railway of Havana, 147 miles. The lines now connect the principal towns and seaports from Pinar del Rio in the west, to Santiago de Cuba in the east. The larger sugar estates have private lines extending to 2,790 miles, connecting them with the main lines. Several important railway extensions are projected. There are 1,358 miles of cart roads open to traffic on April 1, 1921. There are (1920) 749 post and telegraph offices, and nine wireless stations operated by the Government.

Currency and Banking.

On November 7, 1914, a law was published authorising a new coinage issue in Cuba with a gold peso of 1·6718 grammes (1·5046 grammes fine) as the monetary unit. The gold coins are the 20, 10, 5, 4, 2 and 1 peso pieces; the 20, 10 and 5 pesos pieces are of the same weight and value as the corresponding United States gold coins. Silver is coined in pieces of 1 peso, 40 cents, 20 cents, and 10 cents, while nickel coins of 5, 2, and 1 cent pieces are also issued.

The coinage of gold is unlimited, but silver must not be minted to the value of more than 12,000,000 pesos. The extent of the nickel coinage is to be determined by the National Executive. The United States coinage will still remain legal tender.

The total amount of currency on December 31, 1920 was as follows:—gold, 23,786,750 dollars; silver, 8,413,140 dollars; and nickel, 1,449,560 dollars; making in all 33,649,450 dollars.

The National Bank of Cuba, at Havana, had assets on January 31, 1920, amounting to 145,579,273 pesos.

The metric system of weights and measures is in use.

Diplomatic and Consular Representatives.

1. OF CUBA IN GREAT BRITAIN.

Envoy and Minister.—General Carlos García Vélaz, K. B. E. (June 11, 1912).

First Secretary.—Dr. Rafael Rodríguez Altunaga.

Second Secretary.—Pedro Rodríguez Capote.

Acting Consul in London.—Julio Brodermann.

There is a Consul-General in Liverpool, and Consuls in Birmingham, Glasgow, Hull, and other towns.

2. OF GREAT BRITAIN IN CUBA.

Charge d' Affaires.—G. D. N. Haggard, O.B.E.

Naval Attaché.—Engineer-Com. H. A. Brown, R.N.

British Vice-Consuls at Havana.—G. F. Plant and C. A. Edmund.

There is a British Consul at Santiago, and Vice-Consuls at Cienfuegos, Camagüey, Antilla, Puerto Padre, and Cardenas.

CZECHOSLOVAKIA.

(ČESKOSLOVENSKÁ REPUBLIKA.)

THE term Czechoslovaks comprises two branches of the same Slav nation: the seven million Czechs (pronounced Tchechs) of Bohemia, Moravia, and Silesia, and the two million Slovaks of Slovakia, who speak a dialect of Czech.

As early as the fifth century the Czechoslovaks inhabited, as an independent nation, the territories of the ancient Kingdom of Bohemia. Christianity was introduced very early in Slovakia and Bohemia by the Slav

apostles, Cyril and Methodius, and the Czechs were among the early protagonists of Protestantism in Europe.

In 1526 the Czechs elected the Habsburgs to the throne of Bohemia, and the country thus became united through a common dynasty with Austria and Hungary. Soon after their accession to the throne the Habsburgs began to violate Bohemia's religious and national liberties, and this action eventually led to the Czech revolution of 1618 and the beginning of the 'Thirty Years' War. The Czech revolution was crushed completely at the White Mountain, near Prague, in 1620.

The literary revival of the Czech language, which commenced after the French Revolution, developed into a political movement in the 'forties, and since 1848 the Czechoslovaks have claimed the restitution of their ancient rights as an independent nation. The Czechoslovak State came into existence on October 28, 1918. On that day the *Národní Výbor* (National Council) took over the government of the Czechoslovak countries, including Bohemia, Moravia, Silesia, and Slovakia, which had hitherto belonged to the former Austro-Hungarian Monarchy. On November 14, 1918, the Czechoslovak National Assembly met in Prague, and formally declared the Czechoslovak State to be a Republic, with Professor T. G. Masaryk as its first President.

The Colours of the Republic are white, blue and red. The National Standard consists of an upper band of white and a lower band of red, between which a blue triangle is interposed.

The little Coat of Arms of the Republic is that of the former Kingdom of Bohemia, a red shield on which is a double-tailed silver lion rampant facing to the right, but the lion carries on his breast a little shield, on which is the coat-armour of Slovakia (a red shield with three blue mountains, on which stands a two-armed silver cross). On the coat-armour of middle size and on the great coat of arms there is in the centre the coat of arms of the former Kingdom of Bohemia, thereupon in all directions the shields of the other lands of the Republic.

Constitution and Government.—The Constitution of the Czechoslovak Republic was passed by the National Assembly on February 29, 1920.

According to the terms of the Constitution, the Czechoslovak State is a democratic Republic having an elected President at its head. The territory of the Republic forms a single and indivisible unity. The region of Carpathian Ruthenia will receive autonomy. The National Parliament, which constitutes the only legislative body for the whole of the Republic, is composed of a Chamber of Deputies elected for a period of six years and containing 300 members, and of a Senate comprising 150 members to be renewed every eight years. The two Chambers in joint congress will elect the President of the Republic for seven years, and the President, as head of the State, is supreme commander of the armed forces, and can declare war with the consent of Parliament. He appoints the higher officers and officials, exercises the right of reprieve, and is himself amenable to the laws only on a charge of high treason. He also appoints and recalls Ministers. The Constitution guarantees freedom of the press and of speech, and safeguards racial minorities, to whom it assures the maintenance of their schools.

The franchise for the Chamber of Deputies is open to all citizens, without distinction of sex, who are over 21, while all citizens over 30 are eligible for election. The franchise for the Senate is open to all citizens who are over 26; and all citizens over 45 are eligible for election. The electoral system is based on proportional representation.

The Constitution regulates the parliamentary elections on a 'closed scrutiny' basis, the votes being in favour of parties, not of candidates. The

allocation of electoral areas is as follows:—Bohemia, 9 (for Chamber of Deputies), 5 (for Senate); Moravia and Silesia, 6 and 3; Slovakia, 7 and 4; Carpathian Ruthenia, 1 and 1.

The number of administrative districts to be set up is as follows:—Bohemia, 9; Moravia and Silesia, 6; Slovakia, 6.

At the elections held in April 1920, the following parties were returned to Parliament:—

Senate:—Socialists, 67; National Parties, 75; Czechoslovaks, 102; Germans, 37; Magyars, 1; and the Christian-Social party, Magyar-German, 2.

Chamber of Deputies:—Socialists, 136; National Parties, 145; Czechoslovaks, 199; Germans, 72; Magyars, 1; Magyar-German parties, 9.

President.—Thomas G. Masaryk (born in 1850 in Hodonin, in Moravia). Elected May 28, 1920.

The Czechoslovak Government, appointed on September 26, 1921, consists of the following Ministers:—

Prime Minister.—Dr. Eduard Beneš.

Minister of Foreign Affairs.—Dr. Eduard Beneš.

Minister of the Interior.—Dr. Jan Černý.

Minister of Finance.—Augustin Novák.

Minister of Commerce.—Ladislav Novák.

Minister of Public Works.—Alvis Tučný.

Minister of Food Supplies.—Antonín Srba.

Minister of Railways.—Jan Sroemek.

Minister of Health.—Bohumil Vrbenský.

Minister of Social Welfare.—Gustav Habrman.

Minister of Justice.—Dr. Jan Dolonský.

Minister of Agriculture.—František Štaněk.

Minister of Education.—Dr. Vávro Šrobár.

Minister of National Defence.—František Udržal.

Minister of Posts and Telegraphs.—Antonín Srba.

Minister for the Unification of Laws.—Dr. Ivan Dérer.

Area and Population.—The Czechoslovak Republic consists of Bohemia, Moravia, Slovakia, Silesia, and Ruthenia (Sub-Carpathian Russia). Its frontiers have been defined by the Peace Treaties with Germany, Austria, and Hungary, with the exception of a few districts, notably the Teschen coal area, in which plebiscite was to decide its allegiance. The intention of holding plebiscite was, however, abandoned, and the Ambassadors' Conference, on July 28, 1920, divided the Teschen district between Czechoslovakia and Poland. The area and population of the various provinces, according to the census of 1921, are as follows:—

	Area in square kilometres	Area in English sq. miles	Population Feb. 15, 1921	Population per square kilometre
Bohemia ¹	52,052	20,106	6,664,932	128
Moravia ¹	22,304	8,615	2,660,737	119
Silesia ¹	4,426	1,707	670,937	152
Slovakia	49,015	18,933	2,993,479	61
Ruthenia	12,694	4,903	605,731	48
	140,485	54,264	13,595,816	97

¹ Including the small Austrian and German territories, which have been added by the Peace Treaty to Czechoslovakia.

Of the total population 6,000,000 are Czechs, 3,700,000 Germans, 1,700,000 Slovaks, 1,200,000 Magyars, 300,000 Ruthenians and 250,000 Poles.

The population of the principal towns in 1921 was :—

Prague	676,476	Ostrava	41,929	Kladno	19,104
Brno	221,422	Liberec	34,942	Pardubice	25,171
Plzen	88,447	Budejovice	43,961	Olomouc	56,941
Bratislava	93,829	Usti	39,815	Stiavnica	13,24
Kosice	52,699	Vitkovice	27,336	Nitra	19,107

Religion.—The majority of the population is Catholic. In 1921 the division of the population according to religion was :—Roman Catholics, 11,675,187 ; Greek Catholics, 592,699 ; Protestants, 929,203 ; Greek Orthodox, 3,051 ; Old Catholics, 17,120 ; Jews, 361,990.

In January, 1920, the reformed clergy of Czechoslovakia decided to withdraw from the jurisdiction of the Pope and to found a National Church.

Instruction.—Instruction is compulsory between the age of 6 and 14. The schools may be divided as follows : (1) National Schools (Elementary and Advanced Public Schools) ; (2) Secondary Latin and Technical Schools (Gymnasias and Real-Schools) ; (3) Universities and Higher Technical Schools ; and (4) Trade and Arts, Commercial, Mining and Agricultural, and other special schools. There are practically no illiterates except in Slovakia.

The following table contains the data for elementary and advanced schools (public and private) in Czechoslovakia at the beginning of the school-year 1920–21.

	Elementary Schools (public and private)			Advanced Schools (public and private)		
	No. of Schools	No. of Pupils (boys)	No. of Pupils (girls)	No. of Schools	No. of Pupils (boys)	No. of Pupils (girls)
Bohemia	6,184	483,560	491,576	845	86,294	76,534
Moravia	2,872	211,969	214,284	377	29,137	24,343
Silesia	567	52,931	52,676	77	5,612	5,762
Slovakia	3,319	185,838	184,013	102	8,466	12,383
Ruthenia	475	28,094	26,749	10	622	980
	13,417	962,392	969,298	1,411	130,131	124,002

Of the 13,417 elementary schools, 8,553 (63·75 per cent.) were Czechoslovak ; 3,410 (25·42 per cent.) German ; 419 (3·12 per cent.) Ruthenian ; 814 (6·07 per cent.) Magyar ; 87 (0·65 per cent.) Polish ; 4 (0·3 per cent.) Rumanian ; 1 French ; and 129 (0·76 per cent.) miscellaneous. Of the 1,411 advanced schools, 978 (69·3 per cent.) were Czechoslovak ; 8 (0·6 per cent.) Ruthenian ; 398 (28·2 per cent.) German ; 19 (1·4 per cent.) Magyar ; 3 (0·2 per cent.) Polish ; 5 (0·3 per cent.) miscellaneous schools.

During the school-year 1920–21, there were in Czechoslovakia 60 gymnasias, 105 real-gymnasias, 3 higher real-gymnasias, 30 reform real-gymnasias, 80 real-schools, 22 lycées for females, and 68 teachers' institutes, making a total of 368. In these schools were 97,329 pupils, of whom 22,397 were females. The public or state-aided schools of commerce were 269, in which were 29,990 pupils (10,672 females).

There are 4 universities in Czechoslovakia, and 4 technical high schools, with students as follows (1920) :—

Universities	Number of Students		Technical High Schools	Number of Student	
	Total	Females		Total	Females
Prague, Czech (1348)	8,770	1,562	Prague, Czech	6,821	193
Prague, German	8,668	394	Prague, German	2,250	45
Brno, Czech	957	69	Brno, Czech	1,572	105
Bratislava, Slovak	247	28	Brno, German	2,206	36

There are 5 faculties besides the University: An academy of law; a high veterinary academy; a mining academy; a high agricultural college; and an academy of arts.

Justice.—The courts of the Republic are :—The Supreme Court of Justice and Court of Cassation sitting in Brno; 4 High Courts of Justice (Prague, Brno, Bratislava, Kosice); 37 County Courts, besides the Commercial Court and the Penal Tribunal in Prague; 423 District Courts, besides 3 special district courts.

There are also special courts for commercial, industrial, revenue and other matters.

A special Administrative High Court decides matters in dispute affecting the administration, *e. g.*, appeals against illegal decisions and regulations made by State authorities; in cases of conflict between the central State authorities and the organs of the provincial local government; in cases of claims made against the State or the local administration which have been vetoed by the administrative authorities.

Finance.—Budget estimates for 1921 and 1922 in thousands of kronen :—

	1921			1922		
	Ordinary	Extra-ordinary	Total	Ordinary	Extra-ordinary	Total
Revenue	12,079,876	2,050,543	14,129,919	17,290,600	1,593,609	18,884,209
Expenditure	8,990,574	4,845,164	13,841,738	13,125,932	6,546,038	19,071,970

The main items of the Budget for 1922 are shown as follows :—

Revenue	Czechoslovak Crowns		Expenditure	Czechoslovak Crowns	
	Total	Extra-ordinary		Total	Extraordinary
Ministry of :—			Public Debt	2,080,669,448	419,660,178
Finance	10,511,406,250	948,778,571	Ministry of :—		
Posts and Telegraphs	962,930,500	25,083,000	National Defence	3,118,846,222	1,107,311,848
Railways	4,945,500,090	22,365,900	Education	1,129,071,228	782,405,301
Agriculture	526,119,492	1,446,077	Posts and Telegraphs	871,654,970	331,778,430
Public Works	804,966,732	57,382,196	Railways	4,660,257,600	1,352,132,960
			Public Works	1,028,309,869	426,682,774
			the Interior	557,483,530	297,821,300
			of Foreign Affairs	287,472,613	46,421,166
			for Recon-struction.	601,135,462	601,135,462

The debts of the new Republic fall into five categories—(1) debts resulting from the war; (2) Czechoslovakia's share of Austria-Hungary's pre-war debt; (3) tax of liberation, *i.e.*, contribution to the war expenses of the Allies; (4) internal debt; (5) loans of the new Republic.

Some particulars of these loans are (unofficially) given as follows:—I. Debts resulting from the War.—(a) To United States: (1) For food supplies. Interest at 5 per cent. No fixed period of repayment. 57,744,750 dollars. (2) For supplies purchased from American Liquidation Commission. Interest at 5 per cent. Repayable in 1922, 5,000,000 dollars; repayable in 1923, 5,000,000 dollars; repayable in 1924, 14,942,546 dollars. (3) For Czechoslovak army in Siberia. Interest at 5 per cent. No fixed date of repayment. Amount as yet not fixed. Estimate of minimum, 19,000,000 dollars. (4) For war materials purchased at Coblenz, 2,710,930 dollars. (b) To France: (1) For war materials. Interest at 5 per cent. Repayable July, 1921. 110,000,000 francs. (2) For maintenance of Czechoslovak legions in France, 25,051,473 francs. (c) To Italy: (1) For maintenance of Czechoslovak army in Italy, 180,000,000 lire. (2) For credit arranged for one year on April 1, 1920, 6,000,000 lire. (d) To Great Britain: For relief supplies. Interest at 5 per cent. 304,106*l*.

II. Share of Austria-Hungary's pre-war debt—1,200,000,000 gold francs and 4,800,000,000 crowns.

III. Tax of liberation.—750,000,000 francs.

IV. Internal debt.—4,800,000,000 crowns of the old Austro-Hungarian Rente, and 8,000,000,000 crowns of Austro-Hungarian bank-notes circulating in the Republic, making a total of 12,800,000,000 crowns.

V. Loans of the Republic.—(1) First liberty loan, 1,000,000,000 crowns; (2) second liberty loan (4 per cent. State loan), payable 1923–24, 983,022,000 crowns; (3) Loan of Government from the banks, 1,031,500,000 crowns; (4) premium $4\frac{1}{2}$ per cent. loan, payable 1926–60, amount not stated.

The total indebtedness of the State on December 31, 1920, is given as follows:—3,500,000,000 francs of foreign debt and 25,000,000,000 crowns as internal debt.

A Board of Audit and Control was constituted by an enactment of March 20, 1919. It is charged with the superintendence of State economy, the State property and the national debt. This Board has an equal standing with the Ministries and is independent of them. Its president is nominated, at the request of the Government, by the President of the Republic.

Defence.—The organisation of the Czechoslovak Army is only provisional. The system prevailing in the Austro-Hungarian army at the moment of the collapse of the Monarchy was temporarily adopted. In the first year of the Republic, within this framework and with the aid of voluntary formations as well as the co-operation of the Czechoslovak army serving abroad, in France, Italy and Russia, units were formed for the defence of the frontiers against invasion and for the maintenance of internal order. On March 19, 1920, Parliament adopted a Bill enacting universal military service for men between the ages of 20 and 50. Active military service is for 14 months. During mobilisation and war all citizens between the age of 17 and 60 are obliged to do all that is necessary for the defence of the country. This system may be temporary, for the Republic will later arrange a system of militia. In peacetime the army contains 150,000 men. This number may be reduced.

Production and Industry.—The Czechoslovak territory is one of the richest in Europe, both as regards natural resources and industrial

development. Agriculture is highly developed and intensive farming is carried on.

For the years 1920 and 1921, the area and the yield of the crops were as follows:—

Crops	Area (in hectares)		Yield (in metric tons)	
	1920	1921	1920	1921
Wheat	633,671	622,554	717,465	1,106,957
Rye	905,769	847,605	836,756	1,881,870
Barley	692,245	640,616	810,768	1,031,243
Oats	801,806	810,707	865,879	1,050,187
Potatoes	694,560	—	5,002,549	—
Sugar-beet	209,423	—	4,780,537	—

In 1920, 209,423 hectares were sown with beets, yielding 4,780,537 metric tons. The sugar-beet contains 17 to 20 per cent. of sugar and is the foundation of an enormous sugar industry. In 1918-19 there were 175 sugar factories in the country, which produced 648,111 metric tons of sugar. The export of sugar for 1920 amounted to 248,648 tons. Hops of excellent quality are also grown, both for export and beer production (Pilsener). In 1920 Czechoslovakia produced 5,266 tons of hops. The agricultural industries include also flourishing beer, spirit, malt and foodstuffs industries. In 1919-20 the country had 585 breweries producing 5,709,297 hectolitres of beer. In Bohemia, Moravia and Silesia there were, in 1919-20, 413 distilleries with an output of 27,512,262 hectolitres of spirits.

The number of live-stock, which has also been reduced by the war, was in 1920: Cattle, 4,213,454; horses, 581,257; pigs, 2,015,211; sheep, 975,889, and goats, 1,174,045.

Large quantities of fruit are exported. In 1920 the fruit crop yielded 369,420 tons of apples, 141,889 tons of pears, and 515,649 tons of stone fruit.

As regards forest wealth, Czechoslovakia ranks among the most richly wooded countries in Europe. The forests comprise 32 per cent. of the whole area (about 4,661,133 hectares). In Bohemia there are 1,569,965 hectares; in Moravia, 612,842 hectares; in Silesia, 154,324 hectares; in Slovakia, 1,658,635 hectares; and in Ruthenia (Podkarpatska Rus) 635,367 hectares. The annual yield is estimated at 565,024,000 cubic feet of timber.

The mineral production of the Czechoslovak Republic comprises both soft and hard coal (chief coalfields Brux-Komotau-Teplitz and Falkenau), iron, graphite, garnets. Gold, silver, copper and lead are found in the Carpathians, and rocksalt in Eastern Slovakia and Ruthenia. Coal production in 1920, 19,695,504 tons of lignite and 11,130,843 tons of hard coal. In 1919 there were 366 coal mines, employing 110,233 persons.

The number of factories in 1920 was 8,833. Of these, 1,999 were textile mills, 1,755 glass works and precious stone factories, 1,358 for food production, 674 for furniture and bent wood manufacture, 595 machine factories, 592 for metal manufacture, 297 paper mills, 458 chemical factories. Czechoslovakia holds eighth place in the world manufacture of cotton and sixth place among European countries. There are in the Republic approximately 3,600,000 spindles and about 120,000 looms.

Commerce.—Imports and exports for 2 years are shown as follows (in thousands of crowns):—

	1919	1920
Imports	6,555,418	16,383,532
Exports	5,323,621	16,189,865

For 1920 the imports amounted to 16,383,532,000 kronen, and the exports to 16,189,865,000 kronen. Weight of imports, 3,904,032 metric tons, and of exports, 6,902,221 metric tons.

Principal articles of import and export in 1920 :—

Imports	Metric Quintals	1,000 Crowns	Exports	Metric Quintals	1,000 Crowns
Cereals	2,469,984	1,927,825	Sugar	2,486,483	2,219,868
Cottons	692,050	3,213,964	Fruit	898,929	560,207
Woollen Goods	192,179	1,216,908	Glass	1,400,771	2,643,615
Silk	5,950	180,479	Iron	1,639,265	520,881
Leather	27,126	211,582	Timber, Coal, and Peat	51,842,608	1,872,518
Chemicals	1,951,923	329,277			
Timber, Coal, and Peat	13,196,028	516,446			

Imports and exports in 1920 were distributed among the principal countries as follows:—

Country of Origin or Destination	Imports		Exports	
	Metric Quintals	1,000 Crowns	Metric Quintals	1,000 Crowns
Belgium	831,462	737,300	79,934	53,610
France	246,545	434,005	1,958,185	1,507,717
Italy	523,430	659,607	1,739,052	948,958
Yugo-Slavia	313,090	225,733	635,720	577,149
Hungary	871,208	569,328	3,225,215	1,135,261
Holland	677,288	818,692	667,322	254,216
Germany	20,723,404	3,857,730	30,880,736	2,501,022
Poland	1,060,976	559,066	1,762,940	733,655
Austria	3,272,413	1,918,948	23,981,142	5,726,977
Rumania	546,606	359,099	348,111	338,604
Switzerland	159,498	301,809	916,612	508,509
Great Britain	323,247	582,911	258,910	402,250
United States of America	2,083,549	3,042,209	211,037	172,777
Other Countries	7,407,605	2,317,100	2,407,292	1,234,160
Total	39,070,321	16,383,532	69,022,209	16,189,865

Total trade between the United Kingdom and Czechoslovakia (according to Board of Trade returns):—

	1921
Imports from Czechoslovakia into U.K.	£ 5,698,683
Exports to Czechoslovakia from U.K.	1,312,128

Communications.—On January 1, 1920, there were 8,497 miles of railway line in the Republic, of which 5,105 miles are owned by the State and the remaining 3,320 miles privately owned, and 72 miles owned by foreign States. Of the State railways 801 miles are double-tracked, and of the privately owned lines 199 miles.

• The Peace Treaty vested the Czechoslovak State with the right to use certain wharves in the ports of Hamburg and Stettin. Of the waterways of the country, the Danube is the most important; its chief port is Bratislava (Pressburg). On the Elbe the two main ports are Usti (Aussig) and Decin (Teschen).

In 1921 there were 3,810 post offices and 2,228 telegraph offices, and 65,083 miles of telegraph wire; 6,993,626 telegrams were despatched. Number of letters handled, 15,000,000; number of parcels, 280,000. In 1921 there were 54,156 telephone stations and 123,200 miles of telephone wire.

Banking and Currency.—The main credit establishments of the country are the Raiffeisen Banks, the district agricultural credit banks, the municipal saving banks, and the civil credit banks, which deal with the savings of all classes of the population and satisfy their credit requirements. The financial system is supplemented by the Postal Money Order Office, which acts as intermediary in the payment of accounts, and has at its disposal all the post offices and the Clearing House at Prague. The banking department attached to the Ministry of Finance is at present also acting as a joint stock bank pending the carrying out of the legislative measures already agreed upon. There are also several district joint stock banks, such as the District Bank of Bohemia, the Agrarian Bank of Moravia, the Land Credit Establishment of Silesia, the Mortgage Bank of Bohemia, the Mortgage Bank of Moravia, and the Communal Credit Establishment of Silesia. These banks have the right to issue bonds representing advances which have been made to the Government, to municipalities, or private individuals, the security for which is guaranteed in the form of a mortgage or other lien upon landed property.

At the beginning of 1921 there were 36 commercial banks in Czechoslovakia, with a total paid-up share capital of 1,327,300,000 Czechoslovak crowns. Their reserve funds amounted to 607,838,000 crowns, while the total deposits of all kinds, including current accounts, represented 16,076,695,000 crowns. The combined assets of these banks aggregated 20,557,577,000 crowns.

A Czechoslovak Joint-Stock Bank will be organised with a capital of 75 million francs in gold, and 75 thousand shares of 1,000 francs each. Of these the State will take 25,000 shares. The Government will have no vote at the general meetings of the company. The name of the bank will be "Bank of the Czechoslovak Republic." The shareholders will be represented by the Board of Directors to which the general meeting will send six members elected for six years, while the Government will be represented by three members. The president of the Board of Directors will be nominated by the President of the Republic for the duration of six years.

It is proposed to replace the present Czechoslovak krone currency by franc currency in the ratio of 3 kronen = 1 franc.

The note circulation on July 1, 1921, amounted to 11,070,000,000 kronen.

Diplomatic Representatives.

1. OF CZECHOSLOVAKIA IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary.—Dr. Vojtech Mastný (appointed May, 1920).

Counsellor.—Jan Masaryk.

First Secretary.—F. Borek-Dohalský.

Second Secretaries.—Dr. Max Lobkovicz and Joseph A. Benes.

Attaché.—Ivan Laichter.

Commercial Attaché.—L. K. Neumann.

2. OF GREAT BRITAIN IN CZECHOSLOVAKIA.

Envoy Extraordinary and Minister Plenipotentiary.—Sir George Clerk, K.C.M.G., C.B. (appointed September 3, 1919).

Secretaries.—Hon. J. F. A. Cecil and A. F. Aveling, C.B.E.

Commercial Secretary.—R. H. B. Lockhart.

Military Attaché.—Lt.-Col. Sir T. Cunningham, Bart., D.S.O.

DANZIG.

(DER FREISTAAT DANZIG.)

By Article 102 of the Treaty of Versailles, the Principal Allied and Associated Powers undertook to establish the Town of Danzig with the surrounding territory as a Free City, to be placed under the protection of the League of Nations. The League of Nations also appoints a High Commissioner.

High Commissioner.—General Sir Richard Haking. Assumed office January 24, 1921.

The Treaty further provides that a Constitution shall be drawn up, and this shall be placed under the guarantee of the League of Nations. Pending the elections to the Constituent Assembly, a State Council of three was appointed by the High Commissioner (March 5, 1920). This Council was increased to nine (March 25, 1920), to include representatives of the various political parties in the future Free City.

The elections for the Constituent Assembly took place on May 16, 1920, and resulted in the following strength of the political parties:—German National People's Party, 34; Social Democrats, 19; Independents, 21; Centre Party, 17; German Democratic Party, 10; Free Economic Association Party, 12; and Polish Party, 7. The elections were universal, direct, equal, and secret on the basis of proportional representation, suffrage being granted to all men and women belonging to the State of Danzig, who had attained 20 years of age, and who had been domiciled within Danzig territory on or before January 10, 1920.

The proclamation of the Freedom of the City and adjacent territory, as well as the coming into force of the Danzig-Polish Treaty, took place on November 15, 1920. According to this Treaty Danzig and Poland form a single customs territory. A further Treaty between Danzig and Poland was signed on October 25, 1921, providing for joint economic administration. Since January 1, 1922, the Polish-German customs frontier extends to the sea, *i. e.*, Danzig is a unit in the Polish customs administration.

The Constitution (approved by the League of Nations on November 17, 1920) provides for a *Volkstag* or Diet of 120 members elected for 4 years, and a Senate. This consists of a President, as Chairman, a Vice-President, and 20 Senators, the President and 9 Senators in main office being elected by the *Volkstag* for 6 years, the Vice-President and the other 11 Senators for the duration of the *Volkstag*. Election is by majority of votes. Any citizen over 25 years of age is eligible. Senators in main office may not accept any other public or professional appointment. They are also not allowed to become directors of any trading concern. The President of the Senate directs and supervises the whole routine of the Administration. The Senate is the highest State authority, and its meetings are not public. Plebiscites take place if demanded by a 20th of the voters. Any alteration of the Constitution by the *Volkstag* can only be effected by a two-thirds majority, with at least two-thirds of the Deputies present.

After the approval of the Constitution, the Constituent Assembly proclaimed itself the Parliament of the Free City of Danzig, with powers to enact legislation until 1923.

Area and Population.—The area of the Free City of Danzig is about 709 square miles, and population 351,380 on October 8, 1919, of which about 7 per cent. are Poles.

The territory contains a total of 325 localities, of which 251 are rural communes, 69 estate districts, and 5 cities. In addition to Danzig, whose administrative district has a population of 194,953, the following localities are cities :—Zoppot, 18,397 inhabitants ; Marienburg-Kalthof, 1,791 ; Neuteich, 2,395 ; and Tiegenhof, 2,834. Several centres classed as rural communes or otherwise are considerably larger than most of the 'cities,' as appears from the following list :—Ohra, 12,347 ; Oliva, 11,706 ; Praust, 3,070 ; Emaus, 2,321 ; Bürgerwiesen, 2,324 ; Stutthof, 2,337 ; Brentau, Langenau, Steegen, Lichtepau, Liessau, and Schöneberg, between 1,000 and 2,000. The number of households in the territory is 82,798.

The Free City will have the following bathing resorts :—Zoppot, Oliva-Glettkau, Brösen, Neufahrwasser, Westerplatte, Weichselmünde, Heubude, Bohnsack, and Steegen.

The Free City has a total boundary line of 147 miles, of which 35 miles are on the sea. To the west the nearest Polish territory is but 5 miles from Danzig, as the crow flies.

Instruction.—In 1919 Danzig had the following municipal schools :—3 higher schools for boys, with 46 classes and 1,436 pupils ; 2 higher schools for girls, with 35 classes and 1,028 pupils ; 3 intermediate schools, with 44 classes, 46 teachers, and 1,858 pupils ; and 38 common schools, with 517 classes, 322 male and 218 female teachers, and 24,288 pupils.

The Technical High School had in the summer term of 1920 65 teachers and 864 students.

Finance.—For 1919 the Budget of Danzig balanced at 42,850,000 marks. The funded debt of the Free City on January 1, 1921, amounted to 43,034,647 marks.

Commerce and Shipping.—The total registered gross tonnage on January 1, 1921, was 82,886, comprising 26 steamships, 2 motor ships, and 2 sailing ships of over 50 tons burden each.

Shipping in 1918 : entered, 1,237 vessels of 455,127 tons ; and cleared, 1,223 vessels of 439,473 tons.

For centuries Danzig has been a well-known grain market and shipping point. Its advantageous geographical situation at the mouth of the Vistula, its vicinity to the great German, Polish, and Russian grain districts, and its foreign shipping connections have placed it at times in the first rank. Sugar is next in importance to grain, and lumber ranks third as the commodities dealt in at Danzig. For lumber Great Britain is Danzig's best customer.

Communications.—Danzig is connected with Poland by three main lines :—Danzig to Warsaw, 204 miles ; Danzig to Lodz, 263 miles ; and Danzig to Posen, 192 miles.

The metric system is the sole legal system of weights and measures in Danzig.

DENMARK.

(KONGERIGET DANMARK.)

Reigning King.

Christian X., born September 26, 1870; son of King Frederik VIII. and Queen Louisa; married April 26, 1898, to Princess *Alexandrine* of Mecklenburg; succeeded to the throne on the death of his father, May 14, 1912.

Children of the King.

- I. Prince Christian *Frederik*, born March 11, 1899.
- II. Prince Knud, born July 27, 1900.

Brothers and sisters of the King.

I. Prince *Carl*, born August 3, 1872; elected King of Norway, under the title of Haakon VII., November 1905; married July 22, 1896, to Princess Maud Alexandra of Great Britain; offspring Prince Alexander (now Crown Prince Olav of Norway), born July 2, 1903.

II. Prince *Harald*, born October 8, 1876; married April 28, 1909, to Princess Helena of Sonderburg-Glücksborg; offspring Princess Feodora, born July 3, 1910; Princess Caroline Mathilde, born April 27, 1912; Princess Alexandrine Louise, born December 12, 1914; Prince Gorm, born February 24, 1919.

III. Princess *Ingeborg*, born August 2, 1878; married August 27, 1897, to Prince Charles of Sweden.

IV. Princess *Thyra*, born March 14, 1880.

V. Prince *Gustav*, born March 4, 1887.

VI. Princess *Dagmar*, born May 23, 1890.

The crown of Denmark was elective from the earliest times. In 1448, after the death of the last male scion of the Princely House of Svend Estridsen the Danish Diet elected to the throne Christian I., Count of Oldenburg, in whose family the royal dignity remained for more than four centuries, although the crown was not rendered hereditary by right till the year 1660. The direct male line of the House of Oldenburg became extinct with the sixteenth king, Frederik VII., on November 15, 1863. In view of the death of the king without direct heirs, the Great Powers of Europe, 'taking into consideration that the maintenance of the integrity of the Danish Monarchy, as connected with the general interests of the balance of power in Europe, is of high importance to the preservation of peace,' signed a treaty at London on May 8, 1852, by the terms of which the succession to the crown of Denmark was made over to Prince Christian of Schleswig-Holstein-Sonderburg-Glücksburg, and to the direct male descendants of his union with the Princess Louise of Hesse Cassel, niece of King Christian VIII. of Denmark. In accordance with this treaty, a law concerning the succession to the Danish crown was adopted by the Diet, and obtained the royal sanction July 31, 1853.

King Christian X. has a civil list of 1,000,000 kroner. Annuities to other members of the royal house amount to 222,000 kroner.

Subjoined is a list of the Kings of Denmark, with the dates of their accession, from the time of election of Christian I. of Oldenburg:—

House of Oldenburg.

	A.D.		A.D.
Christian I.	1448	Christian V.	1670
Hans	1481	Frederik IV.	1699
Christian II.	1513	Christian VI.	1730
Frederik I.	1523	Frederik V.	1746
Christian III.	1533	Christian VII.	1766
Frederik II.	1559	Frederik VI.	1808
Christian IV.	1588	Christian VIII.	1839
Frederik III.	1648	Frederik VII.	1848

House of Schleswig-Holstein-Sonderburg-Glücksburg.

Christian IX., 1863. Frederik VIII., 1906. Christian X., 1912

Constitution and Government.

The present Constitution of Denmark is founded upon the 'Grundlov' (charter) of June 5, 1915, as amended on September 10, 1920. This may in many respects be said to be a further development along the lines laid down in the 'Grundlov' of June 5, 1849, the charter which introduced the Constitution in Denmark. The amendments of September 10, 1920, are mostly of a formal character, necessitated by the incorporation of parts of Slesvig in 1920.

According to the present 'Grundlov,' the legislative power lies with the King and the 'Rigsdag' (Diet) jointly. The executive power is vested in the King, who exercises his authority through the ministers. The judicial power is with the courts. The King must be a member of the Evangelical-Lutheran Church, the official Church of the State. The King has not the right of declaring war or signing peace without the consent of the 'Rigsdag.' The 'Rigsdag' is composed of two bodies: the 'Folketing' (House of Commons) and the 'Landsting' (Senate). All men and women 25 years of age and with a fixed place of abode possess the franchise and are eligible for election. The 'Folketing' is at present composed of 149 members; 117 members are elected by the method of proportional representation in 23 districts. In order to attain an equal representation of the different parties, 31 'Tillægsmandater' (additional seats) are divided among such parties not having obtained sufficient returns at the district elections. One member is elected for the Faroe Islands by simple majority. The term of the Legislature is four years, but the King has power to dissolve the 'Folketing' before the end of the four years. The members of the 'Landsting' are elected indirectly by the 'Folketing's' voters of 35 years of age in the following way. In every 'Folketing's' district electors in a number corresponding to the population are elected by the method of Proportional Representation. The whole country is divided into six 'Landsting's' districts. In each of these the electors elect a number of members of the 'Landsting,' between 10-12. In this way 56 members are elected; one is elected in the Faroe Islands. Moreover, there are 19 members elected by the former 'Landsting,' according to the system of Proportional Representation. The members of the 'Landsting' sit for a term of eight years. There are elections every fourth year for the half of those elected by the electors, while those elected by the 'Landsting' go out all at once after an eight years' term.

The members of the 'Rigsdag' receive 6,000 kr. or 8,000 kr. a year, according to whether their homes are in or outside the capital.

The Rigsdag must meet every year on the first Tuesday in October. To the Folketing all money bills must in the first instance be submitted by the Government. The Landsting, besides its legislative functions, has the duty of appointing from its midst every four years judges who, together with the ordinary members of the Høiesteret, form the Rigsret, a tribunal who can alone try parliamentary impeachments. The ministers have free access to both of the legislative assemblies, but can only vote in the chamber of which they are members.

The executive (appointed May 4, 1920), acting under the king as president, and called the State Council—Statsraadet—consists of the following ten departments:—

1 and 2. *The Presidency of the Council and Ministry of Finance.*—*M. Neergaard.*

3. *Ministry of Foreign Affairs.*—Harald Scavenius.
4. *Ministry of the Interior.*—M. Oluf Kragh.
5. *Ministry of Justice.*—M. Svenning Rytter.
6. *Ministry of Defence.*—M. Bernitsen
7. *Ministry of Public Instruction.*—M. Jacob Appel.
8. *Ministry of Ecclesiastical Affairs.*—M. Christensen.
9. *Ministry of Agriculture.*—M. Madsen Mygdal.
10. *Ministry of Transport.*—M. Slesbager.
11. *Ministry of Commerce and Navigation.*—M. Tyge Rothe.

The ministers are individually and collectively responsible for their acts, and if impeached, and found guilty, cannot be pardoned without the consent of the Folketing.

Landsting, elected September, 1920 :—32 Liberals, 22 Socialists, 13 Conservatives, and 8 Radicals.

Folketing, elected September, 1920 :—52 Liberals, 18 Radicals, 48 Socialists, 27 Conservatives, 3 Trade Party, and 1 Slesvig (German Party).

In the year 1920 there were incorporated into Denmark parts of Slesvig which voted for Denmark at the plebiscite held in accordance with the Versailles Treaty of June 28, 1919 (made effective Jan. 10, 1920). The Northern Zone voted on Feb. 10, 1920, and 75,431 votes were cast for Denmark, and 25,329 votes for Germany. The Southern Zone voted on March 14, 1920, and 12,800 votes were given for Denmark, and 51,724 votes for Germany. The new Slesvig territories were incorporated on July 9, 1920, being officially named 'Sønderjydske Landsdele' (South Jutland Provinces).

For administrative purposes Denmark is divided into 22 counties (Amter), each of which is administered by a Governor (Amtmand). Moreover, the county is a municipal division with a county council superintending the rural municipalities (about 1,300). There are 88 urban municipalities with a mayor and a town council. Rural as well as urban municipal councils are elected direct by universal suffrage and Proportional Representation. Copenhagen forms a district by itself, and has its own form of administration.

Area and Population.

According to the census held on Feb. 1, 1921, the area of Denmark is 16,609 square miles (43,017 square kilometres), and the population 3,267,831, including North Slesvig with 1,538 square miles (3,984 square kilometres) and 163,622 inhabitants.

The following table gives the area and population of Denmark in 1921:—

Divisions	Area 1921 English sq. m.	Population 1921	Population 1921 per sq. m.
City of Copenhagen (Kjöbenhavn) }	28	561,344	20,048
without suburbs }			
Islands in the Baltic }	5,133	1,208,008	235
Peninsula of Jutland }	11,443	1,498,479	131
Faeroe Islands }	540	21,364	40
Total }	17,144	3,289,195	192

The population (excluding the Faeroes) consisted of 1,591,628 males and 1,676,203 females in 1921. The total population at the census of 1921 was 3,267,831, showing an increase during 1916-21 of 1.22 per cent. per annum (excluding North Slesvig). In Denmark proper the town

population has increased from 1,209,975 in 1916 to 1,886,525 in 1921; while the rural population has increased from 1,711,287 in 1916 to 1,767,687 in 1921. The population is almost entirely Scandinavian; in 1911, of the inhabitants of Denmark proper, 96.66 per cent. were born in Denmark, 0.07 per cent. were born in the Colonies, 0.15 per cent. in Norway, 1.45 per cent. in Sweden, 0.97 per cent. in Sleswig, 0.47 per cent. in other parts of Germany, and 0.23 per cent. in other foreign countries. The foreign-born population was thus 3.27 per cent. of the whole.

The population of the capital, Copenhagen (Kjöbenhavn), in 1921 was 561,344, or with suburbs, 666,159; Aarhus, 74,256; Odense, 49,469; Aalborg, 71,613; Horsens, 27,588; Randers, 26,495.

The following table gives the total number of births, deaths, and marriages with the surplus of births over deaths, for three years:—

Years	Total Births (living)	Still Births	Marriages	Deaths	Surplus of Births over Deaths
1918	72,511	1,882	22,977	39,037	33,474
1919	68,714	1,723	25,073	39,589	29,125
1920	78,225	1,993	26,987	39,842	38,383

Of the births in 1918, 11.36 per cent. were illegitimate; in 1919, 10.43; in 1920, 11.70. In 1918 there were 1,098 divorces; in 1919, 1,294; in 1920, 1,197.

Emigrants, chiefly to the United States, in 1918, 793; in 1919, 3,341; and in 1920, 6,300.

Religion.

The established religion of Denmark is the Lutheran, which was introduced as early as 1536. The affairs of the National Church are under the superintendence of seven bishops, who have no political character. Complete religious toleration is extended to every sect, and no civil disabilities attach to Dissenters.

According to the census of 1911 there were 2,732,792 Protestants, 9,821 Roman Catholics (under a Vicar Apostolic resident in Copenhagen), 256 Greek Catholics, 5,164 Jews, 9,043 other or of no confession.

Instruction.

Elementary education has been widely diffused in Denmark since the beginning of the last century, and in 1814 it was made compulsory. The school age is from 7 to 14. In 1920 Denmark had 4,232 lower schools; of these 24 were maintained by the Government, 3,505 by the local communities and 703 were private institutions. The instruction in the public schools is mostly gratuitous. The number of pupils in the 4,232 schools was on December 31, 1920: 473,300. In 1921, 1,028 pupils were admitted to the university; of these 290 were girls. For higher instruction there are furthermore (1921): a veterinary and agricultural college at Copenhagen with 67 professors and teachers and 520 pupils; 230 technical schools with about 23,000 pupils; 21 training colleges for teachers with 1,600 pupils; 81 commercial schools with 14,000 pupils; 21 agricultural or horticultural schools and 58 *folkehøjskoler* or popular high schools (adult schools with about 9,400 pupils); a college of pharmacy (founded 1892) with 10 teachers and about 80 students; a school for dentists with 22 teachers and 140

pupils ; a Royal academy of arts (founded 1754) with 22 teachers and about 300 pupils ; a Polytechnic Institution (founded 1829) with 98 professors and teachers and about 1,400 students. The *folkehøjskoler* are all private, but to them and the agricultural schools the State annually makes a grant of about 1,160,000 kroner. The University of Copenhagen, founded in 1479, has 5 faculties, to all of which women are admitted on equal terms with men. It has about 100 professors and teachers, and about 3,200 students.

Pauperism and Old Age Pensions.

Ordinary *poor relief* is regulated by the law of April 9, 1891 (and its amendments) under which in 1918-19, 31,097 (2·7 per cent. of the population) were relieved at a cost of 34 million kroner.

Another law of 1891 concerning *Old Age Pensions* has been extended by enactments of 1902 and 1908 so as to provide for, and to regulate assistance granted to the aged poor. Recipients must be over 60 years of age, of good character, and must have, for the preceding 5 years, had their domicile in the country without receiving public charity. The assistance granted may be in money, or in kind, or by abode in a hospital. It must be sufficient for maintenance and for medical attendance in case of illness. The estimate of the poverty of the recipient does not include private assistance unless amounting to over 100 kroner (about 5l. 13s.) a year. The subvention is paid by the commune of domicile and half of it is refunded by the State. For the year ending March 31, 1920, 98,525 persons were relieved, of whom 77,630 were principals and 20,895 dependants. The total expenditure was 45,008,000 kroner, of which one half was expended by the State.

According to a law of 1913 assistance without the loss of civil rights is granted to children living with their widowed mothers. The expenditure (divided between the municipalities and the State) amounted in 1919-20 to 2,253,000 kroner.

Justice and Crime.

The lowest courts of justice in Denmark are those of the hundred or district magistrates (*herredsfogder* and *birkedommere*) and town judges (*byfogder*). From these courts an appeal lies to the superior court (*Overret*), or court of second instance (*Vestre Landsret*), in Viborg with 12 judges, *Ostre Landsret* in Copenhagen with 17 judges and *Søndre Landsret* in Sønderborg with 4 judges. The supreme court (*Højesteret*) or court of final appeal, with a chief justice, and 12 puisne judges, sits in Copenhagen. Judges under 65 years of age can be removed only by judicial sentence.

In 1918, 5,740 men and 826 women were convicted of crimes and delicts ; 40,329 persons were convicted of minor offences. On March 31, 1919, 1,229 men and 69 women were in the penitentiaries of Denmark.

Finance.

By the terms of the Constitution of Denmark the annual financial budget called the '*Finanslovsforslag*,' must be laid on the table of the Folketing at the beginning of each session. As to the annual financial accounts called '*Statsregnskab*,' the Constitutional Charter prescribes them to be examined by four paid revisers, two of whom are elected by the Folketing and two by the Landsting. Their report is submitted to both Chambers which, after due consideration, pass their resolution generally to the effect that they have no remarks to make on the balance-sheet.

The following shows the actual revenue and expenditure for the five years ending March 31 and the estimates for 1921-22 (18.16 kroner=1l.):—

Year	Revenue		Expenditure	
	Current	From State Capital	Current	For increase of State Capital
	£	£	£	£
1917-18	20,857,172	3,549,474	20,473,449	3,466,015
1918-19	25,675,467	9,967,195	34,208,447	2,282,767
1919-20	32,994,094	8,729,278	29,586,564	3,890,988
1920-21	27,702,715	8,643,397	30,842,010	11,402,440
1921-22 ¹	24,666,310	8,557,846	27,905,684	9,116,841

¹ Budget estimates.

The following is an abstract of the Budget for 1922-23 :—

Current revenue	Kroner	Current expenditure	Kroner
Balance of domain revenues	2,715,041	Civil list and appanages	1,222,000
Balance of State under-taking	1,899,514	Rigsdag	3,000,000
Interest on outstanding debt	7,540,642	Interest and expenses on State debt	47,163,725
Balance of funds, etc.	629,119	Council of State	656,615
Direct and indirect taxes	290,598,915	Ministry of Foreign Affairs	6,168,481
Balance of lotteries	2,447,510	Ministry of Ecclesiastical Affairs	4,488,935
Separate revenues	5,719,886	Ministry of Public Instruction	68,906,505
		Ministry of Justice	33,364,169
		Ministry of Interior	64,350,866
		Ministry of Agriculture	11,737,311
		Ministry of War	43,012,780
		Ministry of Marine	27,650,000
		Ministry of Finance	31,761,737
		Ministry of Public Works	5,617,232
		Ministry of Commerce and Navigation	4,991,310
		Pensions	14,998,300
Total revenue	307,749,599 (17,097,199l.)	Total expenditure	369,089,966 (20,504,998l.)

The actual expenditure of the Ministries of War and Marine respectively are shown for four years as follows :—

—	1917-18	1918-19	1919-20	1920-21
	Kroner	Kroner	Kroner	Kroner
Ministry of War	86,120,751	87,151,377	88,544,748	42,791,643
Ministry of Marine	30,377,041	38,874,971	25,873,081	32,443,592

An important feature in the administration of the finances of the kingdom is the maintenance of a reserve fund of a comparatively large amount. On March 31, 1918, it was 636,785l. ; 1919, 623,189l. ; 1920, 533,335l. ; 1921, 539,957l. The object of the reserve fund is to provide means at the disposal of the Government in the event of sudden occurrences.

The public debt of Denmark has been incurred in part by large annual deficits in former years, before the establishment of parliamentary government, and in part by railway undertakings and the construction of harbours,

lighthouses, and other works of public importance. The following table gives the national liabilities for six years :—

Year ending March 31	Capital of Debt	Year ending March 31	Capital of Debt
	£		£
1916	25,608,619	1919	43,361,483
1917	32,726,974	1920	51,458,894
1918	33,519,930	1921	59,703,200

The debt is divided into an internal and a foreign. The total foreign debt amounted in 1921 to 22,487,317*l.* The debt is at 3, 3½, 4, 5 and 8 per cent.

The investments of the State on March 31, 1921, including the reserve fund, the State railways, and the domains, amounted to 88,122,317*l.*

The revenue and expenditure and the property and debt of Copenhagen and of the provincial towns and places, rural communes and county communes were as follows (year ending March 31) :—

1920	Current Revenue	Current Expenditure	Property	Debt
	£1,000	£1,000	£1,000	£1,000
Copenhagen with Frederiksberg . . .	7,321	7,188	27,829	26,610
Provincial Towns and Places	3,926	3,639	16,338	12,674
Rural Communes . .	3,948	3,683	8,267	5,819
County Communes . .	1,492	1,580	2,620	2,317

Defence.

The Danish army is a *national militia*, resembling in some respects the Swiss army. Every able-bodied Danish subject is liable to serve in the army or navy, except the inhabitants of the Faroe Islands. Exemptions in Denmark are few, even clergymen having to serve.

Service commences at the age of 20 and lasts for 16 years. For the first 8 the men belong to the active army, and for the second 8 years to the extra, or territorial, reserve. At the time of joining, the recruits are continuously trained for 165 days in the infantry, 280 days in the field artillery, 1 year in the garrison artillery, and 200 days in the cavalry. The engineers have 7 months', and the train 2 months' continuous training. In the case of about one fourth of the men, their initial training is prolonged by periods ranging from 2½ to 8½ months, according to the arm of the service to which they belong. Subsequent training for all arms only takes place once or twice in the remaining six or seven years of army service, and then only for 25 or 30 days on each occasion.

The country is divided into two territorial commands; one including Copenhagen and the three Zealand divisions, the other comprising the troops in Funen and Jutland. There are 15 regiments of infantry, each of 3 or 4 battalions, and 2 battalions of Life Guards, making 52 battalions altogether: 4 regiments of cavalry, 2 regiments and 1 section of field artillery, totalling 20 four-gun batteries: 1 regiment of garrison artillery, 1 regiment of engineers and a small flying corps. The field army consists of 3 divisions and 5 independent regiments, with a strength of 53,000 rifles and 120 field guns. The effective strength of the active army is 60,000 men, and the additional force available on mobilization is 55,000 men.

There is a special corps of infantry, cavalry and artillery, for the island of Bornholm. The abolition of the Copenhagen defences on the land side was resolved in March, 1920.

Infantry and mounted troops are armed with the Krag-Jorgensen 8 mm. rifle or carbine, field artillery with a Krupp gun, firing a 14·88-pound shell.

About 11,500 recruits are trained annually. The military budget for 1921-22 was 40,000,000 kroner.

The Danish fleet is maintained for purposes of coast-defence. It consists of four monitors, *Peder Skram*, *Olfert Fischer*, *Herluf Trolle*, and *Niels Juels* each carrying a pair of 9·4-inch and 4 6-inch guns; a smaller monitor, *Skjold* (launched 1896), with one 9·4 and three 4·7-inch guns; 2 old cruisers, *Hejmdal* and *Gejser*, used for training purposes, 5 mine-layers, one sloop *Fylla* (ex-British *Asphodel*), 20 first-class torpedo boats; 14 submarines.

Production and Industry.

The soil of Denmark is greatly subdivided, owing partly to the state of the law, which interdicts the union of small farms into larger estates, but encourages, in various ways, the parcelling out of landed property, and leaves the tenant entire control of his land so long as the rent is paid.

Of the total area of Denmark 80 per cent. is productive; about one sixth of the unproductive area is peat bogs. Of the productive area 6 per cent. is forest, and of the remainder less than one half is arable, and the remainder pasture and meadows. The acreage and production of the chief crops for two years were as follows :—

Crops	Area		Production	
	1920	1921	1920	1921
	Acres	Acres	Tons	Tons
Wheat	179,804	219,652	201,100	278,000
Rye	559,972	558,795	336,400	288,000
Barley	626,060	628,148	538,000	562,000
Oats	1,090,632	1,111,579	737,300	693,000
Mixed grain . .	496,018	479,193	365,700	346,000
Potatoes	227,893	207,925	1,233,300	1,360,000

On July 15, 1921, there were in Denmark 597,988 horses, 2,590,903 head of cattle, 521,932 sheep, 1,429,908 swine, and 17,803,000 hens.

According to statistics collected on May 26, 1914, there were 82,442 industrial factories and shops in Denmark, employing altogether 346,000 persons, of whom 229,000 were skilled labourers. Of the total establishments 15,400 factories used mechanical power. In 1920 there were in Denmark 12 distilleries (Copenhagen 5), whose output of brandy reduced to 100° amounted to 3,420,000 litres. In 1920 there were produced 1,642,000 litres of excisable beer, and 1,020,000 litres small beer, not excisable. In the same year 152,740 tons of beet-sugar were produced at 9 sugar factories, and 55,520 tons of margarine were manufactured at 64 factories.

In the Danish fisheries the total value of the fish caught was, in 1917, 1,953,327*l.*; 1918, 2,818,868*l.*; 1919, 3,006,222*l.*; 1920, 2,850,167*l.* The fleet in 1920 consisted of 15,350 boats.

Commerce.

The following table shows the value, according to official returns, of the imports and general exports (excluding precious metal) for six years (18.16 kroner = 1*l.*):—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1916	75,411,000	72,716,000	1919	139,930,000	51,042,000
1917	60,136,000	59,136,000	1920	163,833,000	87,500,000
1918	52,500,000	41,277,000	1921	90,843,611	81,363,944

The exports of home produce in six years were, in sterling:—1916, 65,407,111*l.*; 1917, 65,463,000*l.*; 1918, 38,666,000*l.*; 1919, 41,299,000*l.*; 1920, 88,391,000*l.*; 1921, 76,854,000*l.*

In 1920 the general imports and exports, and the special imports and exports (imports for consumption and exports of Danish produce or manufacture) were as follows (18.16 kroner = 1*l.*):—

1920	Imports (General)	Imports (Special)	Exports (General)	Exports (Special)
	1,000 kroner	1,000 kroner	1,000 kroner	1,000 kroner
Food substances	423,922	356,676	1,294,312	1,221,055
Personal and domestic	460,539	371,900	143,019	27,069
Fuel	514,820	514,550	338	38
Fodder, manure, seeds	265,369	259,844	36,633	29,810
Raw products	612,313	569,181	232,395	142,851
Industrial products	848,850	793,245	211,303	140,828
Other goods	87,963	77,932	43,936	29,413
Total	3,243,776	2,943,328	1,961,936	1,591,064

The principal articles of import and export, with their respective values, were as follows:—

	1919				1920			
	Imports (General)	Imports (Special)	Exports (General)	Exports (Special)	Imports (General)	Imports (Special)	Exports (General)	Exports (Special)
	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner	1,000 Kroner
Colonial goods	186,615	166,466	42,638	18,227	153,102	132,371	63,456	39,722
Beverages	30,029	29,108	2,739	1,572	20,745	28,653	5,888	4,607
Textile manu- factures	441,993	388,960	77,169	6,598	380,566	299,831	120,069	14,709
Metals and hardware	261,951	246,157	44,838	24,599	351,832	326,466	66,385	35,527
Wood & manu- facture	120,160	118,449	11,592	9,209	121,687	118,415	14,089	9,349
Coal	225,543	225,246	371	—	418,837	418,638	221	—
Animals	4,914	4,813	27,124	26,998	11,072	11,021	114,853	114,800
Provisions, eggs, &c.	87,678	58,659	459,015	425,280	52,481	28,246	1,027,356	1,002,725
Cereals, &c.	121,351	121,031	16,371	15,404	126,666	114,452	33,766	20,819

The following table shows the distribution of Danish foreign trade :—

Countries	Imports (General).		Exports (General)	
	1919	1920	1919	1920
	Kroner	Kroner	Kroner	Kroner
Germany . . .	335,103,000	532,219,000	261,856,000	326,471,000
United Kingdom . . .	813,912,000	887,549,000	163,673,000	671,981,000
Sweden . . .	195,382,000	189,904,000	230,590,000	358,270,000
Norway . . .	48,050,000	73,460,000	187,163,000	184,400,000
United States . . .	599,206,000	753,666,000	28,724,000	90,719,000
Rest of America . . .	147,725,000	193,575,000	7,846,000	22,848,000
Holland . . .	47,925,000	111,743,000	9,471,000	19,570,000
France . . .	52,524,000	61,663,000	17,923,000	30,199,000
Danish Colonies . . .	25,511,000	14,291,000	23,554,000	35,695,000

The treaties of Commerce and Navigation between Great Britain and Denmark, made in 1661 and 1670 and confirmed in 1814, provide for the 'most favoured nation' treatment.

The quantities and the values of imports, whether subject to duty or duty-free, and of exports, always duty-free, are verified by the Customs authorities. The countries where the goods have been bought and to which they are sold are recorded. The general trade comprehends all imports and exports; the special trade only imports for consumption, and exports of home produce. Usually the Customs authorities easily ascertain whether imports and exports belong to the general or the special trade, but sometimes the amount of imports for home consumption is determined merely by the excess of imports over exports.

The chief imports into and domestic exports from the United Kingdom from and to Denmark in two years (Board of Trade Returns) were :—

Imports into U. K.	1919	1920	Exports to Denmark	1919	1920
	£	£		£	£
Butter . . .	3,947,835	11,762,845	Coal . . .	7,021,816	4,747,590
Eggs . . .	2,776,116	7,032,857	Cottons . . .	6,979,196	3,891,779
Bacon . . .	65,893	7,816,370	Woollen Goods . . .	6,360,977	4,546,025

Total trade (Board of Trade returns) between Denmark and the United Kingdom for 5 years :—

	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Denmark to U.K.	17,742,421	4,469,504	9,256,508	31,165,965	41,866,727
Exports to Denmark from U.K.	6,897,278	3,383,859	34,448,171	30,583,167	10,046,380

Shipping and Navigation.

On December 31, 1920, Denmark (without colonies) possessed 3,749 vessels of 592,724 registered tons in her mercantile marine, of which 571 of 392,020 tons were steamers. In 1920, 23,038 vessels of 3,269,268 tons cargo entered the Danish ports from foreign countries, and 23,944 vessels of 1,030,954 tons cleared.

Internal Communications.

Denmark proper (exclusive of Copenhagen) has (end of 1920) 4,713 miles of road, besides 23,654 miles of by-ways. There are (1920) railways of a total length of 2,662 English miles open for traffic in the kingdom. Of

this total, 1,283 English miles belong to the State. The total value of the State railways (road, buildings, cars, etc.) up to March 31, 1921, was 548,822,488 kroner. The railways have a gauge of 4 ft. 8½ inches, except 128 miles of which the gauge is 3 ft. 3¼ inches.

The Post Office in the year 1920-21 carried 242,175,349 letters and post-cards, and 204,883,813 samples and printed matter. There are 1,362 post-offices. The State telegraphs in 1920-21 carried 5,174,794 messages, of which 1,676,721 were internal. The length of State telegraph lines (March 31, 1921) was 2,258 English miles; number of offices 259. At the same date the railway telegraphs had 433 offices. On March 31, 1921, the length of telephonic wires of the State and the private companies was 552,266 English miles. In the year 1920-21 there were 386,175,551 telephonic conversations.

Money and Credit.

On July 31, 1921, the accounts of the National Bank balanced at 642,452,525 kroner. The assets included 214,288,012 kroner in bullion and specie. The liabilities included 544,550,000 kroner note issue, 27,000,000 kroner of capital, and 11,241,337 kroner reserve fund. In Denmark there are 196 other banks for commercial, agricultural, industrial, and other purposes. On March 31, 1920, there were 505 savings banks, with 1,552,959 depositors, and deposits amounting to 1,458,637,936 kroner, or about 940 kroner to each account.

The nominal value of the coin minted (including recoinage of worn pieces) in Denmark since 1873 is given as follows:—

Years ending March 31	Gold	Silver	Bronze	Total
	Kroner	Kroner	Kroner	Kroner
1873-1920	149,246,050	38,159,151	3,193,335	190,598,036
1921	—	4,003,395	296,971	4,300,366
Total (1873-1921) . . .	149,246,050	42,254,546	3,460,806	194,961,402

Money, Weights, and Measures.

The monetary unit, the *Krone* of 100 öre, is of the value of 1s. 1½d., or about 18 kroner to the pound sterling.

Gold coins are 20 and 10-kroner pieces. The 20-kroner piece weighs 8·870 grammes .900 fine, and thus contains 8·0645 grammes of fine gold.

The 2-kroner silver piece weighs 15 grammes .800 fine, and thus contains 12 grammes of fine silver. There are also 1 and 2 öre pieces of iron.

The standard of value is gold. Silver is legal tender up to 20 kroner.

The use of the metric system of weights and measures, under the law of May 4, 1907, became obligatory in Denmark in public offices on April 1, 1910, and generally on April 1, 1912.

Diplomatic and Consular Representatives.

1. OF DENMARK IN GREAT BRITAIN.

Envoy and Minister.—Count Preben Ferdinand Ahlefeldt-Laurvig (October 9, 1921).

Secretaries of Legation.—N. P. Arnstedt and Torben de Bille.

Naval Attaché.—Commander C. V. Evers.

Honorary Attaché.—Paul Baron Bertouch-Lehn.

Press Attaché.—C. E. Aargaard.

Consul-General and Commercial Adviser.—O. M. Rottböll.

Chancellor.—Carl Jacobsen.

There are Consuls at Belfast, Falmouth, Hull, Leith, Liverpool, London (C.G.), Manchester, Newcastle, and Vice-Consuls in several other towns.

2. OF GREAT BRITAIN IN DENMARK.

Envoy and Minister.—Earl Granville, G.C.V.O. Appointed November 11, 1921.

Secretaries.—R. C. Parr and R. G. Howe.

Commercial Secretary.—R. M. A. E. Turner.

Naval Attaché.—Captain J. Wolfe Murray, D.S.O.

Military Attaché.—Brigadier-General Lyon, C.M.G., D.S.O.

Honorary Attaché.—H. D. Creek.

There are Consuls at Copenhagen, Thorshavn (Faroe Islands), and 17 other towns.

Colonies.

Greenland is the only colonial possession of Denmark. Its area is 46,740 English sq. miles, and its population in 1911 numbered 13,449. The largest settlement in Greenland is Sydproven, which had (1911 census) a population of 789, and the smallest is Skansen, in North Greenland, with 46 inhabitants. The imports from Greenland into Denmark in 1920 amounted to 4,020,000 kroner, and the exports from Denmark to 3,229,000 kroner. The trade of Greenland is a State monopoly.

ICELAND.

(ÍSLAND.)

Reigning King.

Iceland is united with Denmark by a personal bond of union under the government of King **Christian X.** (*see* Denmark).

Between 930 and 1264 Iceland was an independent republic, but by the "Old Treaty" of 1263 the country recognised the rule of the King of Norway. In 1381, Iceland, together with Norway, came under the rule of the Danish Kings, but when Norway was separated from Denmark in 1814, Iceland remained under the rule of Denmark. Since December 1, 1918, it has been acknowledged as a sovereign State, and is united with Denmark only through the identity of the Sovereign.

King Christian X. has as King of Iceland a civil list of 60,000 kroner.

Constitution and Government.—By the Act of Union of November 30, 1918, Iceland is temporarily united with Denmark in certain affairs beyond the King's person.

According to the Act of Union, Denmark and Iceland are free, sovereign States, united by one King and by the agreement comprised in the Union Act. The order of succession is not to be altered without the assent of both States. In Iceland, Danish citizens enjoy the same rights as Icelandic citizens, and in Denmark the latter enjoy the same rights as Danish citizens. But citizens of either of the States are exempt from military service in the other. Danish goods and products in Iceland and Icelandic goods and products in Denmark are treated no less favourably than those of any other country. Denmark takes charge of the foreign affairs of Iceland, and if Iceland so desires it, special Icelandic attachés or experts on Icelandic conditions may be appointed to Danish embassies and consulates, the expenses arising out of such appointments to be borne by Iceland.

An advisory Danish-Icelandic committee of six members is to be appointed to review Bills of importance to both States, and also to prepare Bills aiming at co-operation between the two States. After December 31, 1940, the Danish Parliament and the Icelandic Legislature may demand negotiations to be opened concerning the revision of the Union Act.

Denmark has informed the Powers that, in conformity with the Union Act, she recognises Iceland as a sovereign State.

The present constitution of Iceland is embodied in the Charter of May 18, 1920. By the terms of this Charter the executive power belongs to the King, and is exercised by him through responsible ministers, while the legislative power rests conjointly with the King and the Parliament, which is called *Althing*. The *Althing* is composed of 42 members, of whom 36 are elected for the term of 4 years by universal suffrage in constituencies, each electing one or two representatives by simple majority, except the capital, where 4 members are elected by Proportional Representation. The remaining 6 members are elected for the term of 8 years by Proportional Representation for the whole country. The franchise is enjoyed by all Icelandic citizens (men and women) of good reputation (unless they are indebted for poor-relief) who are over 25 years of age and have resided in the country during the previous 5 years. All voters are eligible as candidates, save only the superior judges.

The *Althing* is divided into two Houses, the Upper House and the Lower House. The former is composed of 14 members, viz. the 6 members elected by Proportional Representation for the whole country, together with 8 members elected by the whole *Althing* in common sitting out of the members elected by universal suffrage. The remaining 28 members form the Lower House. The members of the *Althing* receive payment for their services besides travelling expenses; members residing in the capital are allowed 8 krónur (8s. 11d.) per day, and members residing outside the capital 10 krónur (11s. 1d.) per day. This payment has temporarily been raised by 94 per cent.

The *Althing* must meet on February 15 in every year, unless it is convoked by the King at an earlier date. The Budget Bills must first be laid by the Government before the Lower House, but all other Bills can be introduced in either of the Houses. If the Houses do not agree they assemble in a common sitting, and the final decision is given by a majority of two-thirds of the voters, with the exception of Budget Bills, where a simple majority is sufficient. The ministers have free access to both Houses, but can only vote in the House of which they are members.

The executive power is exercised under the King by a ministry divided into 3 departments. The ministry, appointed March 15, 1922, is as follows:—

President of the Council and Minister of Justice and of Ecclesiastical Affairs—Siggurdur Eggerz.

Minister of Trade and Communications—Klemens Jonsson.

Minister of Finance—Magnús Jonsson.

The ministers are responsible for their acts. They can be impeached by the *Althingi*, and in that case their cause will be decided by the *Landsdómur*, a special tribunal, which can only try parliamentary impeachments.

For administrative purposes Iceland is divided into 16 provinces (*syslur*), each governed by a chief executive functionary (*syslumadur*). Each province forms one or two municipal districts with a council superintending the rural municipalities (about 200). There are also 7 urban municipalities with a town council, independent of the provinces, and forming by themselves

administrative districts co-ordinate with the provinces. The municipal councils are elected direct by universal suffrage (men and women over 25 years of age), in urban municipalities by Proportional Representation, but in rural municipalities by simple majority.

Area and Population.—The following table gives the area and population of Iceland in 1920 (preliminary figures):—

Divisions.	Area, English sq. m.	Population, 1920.	Population, 1920, Per sq. m.
The South-West	4,125	34,480	8·4
The Western peninsula	3,658	13,384	3·7
The North	13,695	23,145	1·7
The East	5,954	9,991	1·7
The South	12,277	13,690	1·1
Total	39,709	94,690	2·4

The growth of the population has been as follows:—

Year.	Population.	Increase per cent. annually.	Year.	Population.	Increase per cent. annually.
1880	72,445	—	1910	85,183	0·91
1890	70,927	0·21	1920	94,690	1·07

In 1910 there were 41,105 males and 44,078 females. The conjugal condition was as follows;—

	Unmarried.	Married.	Widowed.	Divorced.
Males	27,444	11,921	1,528	212
Females	28,309	11,859	3,688	222

In 1910, 57,719 were domiciled in rural districts, and 27,464 in towns and villages (of over 300 inhabitants). The population is almost entirely Icelandic. In 1910 the foreign-born population numbered only 706, or 0·6 per cent. of the whole; 360 were born in Denmark, 194 in Norway, and 152 in other countries.

According to occupation the population of Iceland in 1910 was classified as follows:—

Immaterial production	2,602	Pensioners and capitalists	902
Agriculture	43,411	Relieved by public assistance	1,660
Fishing	15,890	Profession not stated	644
Industry	6,031		
Commerce and transport	3,940		
Day labourers and domestic servants	10,103	Total	85,183

The capital of Iceland, Reykjavík, had in 1920 a population of 17,976; other towns are Akureyri, 2,700, Vestmannaeyjar, 2,519, Hafnarfjörður, 2,310, Ísafjörður, 2,175, Siglufjörður, 1,112, Seydisfjörður, 866.

The following table gives the total number of births, deaths, and marriages, with the surplus of births over deaths, for three years :—

Years.	Marriages.	Total living Births.	Stillborn.	Deaths.	Surplus of Births over Deaths.
1917	547	2,420	55	1,087	1,388
1918	601	2,719	75	1,478	941
1919	623	2,360	62	1,174	1,186

Of the births in 1919, 11·2 per cent. were illegitimate (14·1 per cent. in 1918).

Emigrants, chiefly to Canada, 215 in 1912, 294 in 1913, 141 in 1914, and 7 in 1915.

Religion.—The national Church, and the only one endowed by the State, is Evangelical Lutheran. But there is complete religious liberty, and no civil disabilities are attached to those not of the national religion. The affairs of the national Church are under the superintendence of one bishop. At the census of 1910 only 288 were returned as Dissenters.

Instruction.—There is a University in Reykjavík, comprising 4 faculties (Theology, Medicine, Jurisprudence, and Philosophy). There is one grammar school, 3 public high schools, besides 2 ladies' schools, a school for elementary-school teachers, 2 schools of agriculture, a school of navigation, a commercial high school, and several other special schools. The elementary instruction is compulsory for a period of 5 years, the school age being from 10 to 14 years. Before the age of 10 the children are usually privately educated, at any rate in the country. In 1916-17 there were 465 elementary schools, with 353 teachers and 6,920 pupils. There are also several continuation schools for young people.

Pauperism and Old-Age Pensions.—Ordinary poor-relief is regulated by the law of November 10, 1905. Each community constitutes a poor district. In 1910 the number of paupers relieved was 2,149. The expenditure amounted to 7,500*l*.

There is in every community one Old-Age Pension Fund, to which all men and women from 18 to 60 years of age, to whom pensions are not otherwise secured, are bound to contribute, unless they are considered too poor to do so. In addition the funds receive a subvention from the State. Grants are made to infirm poor persons over 60 years of age who for the preceding 5 years have not received poor-relief. In 1915 there were granted subvention from the funds to an amount of 2,500*l*., and at the end of that year the total property of the funds amounted to 18,000*l*.

Justice and Crime.—The lower courts of justice in Iceland are those of the provincial magistrates (*sýslumenn*) and town judges (*þæjarfógetar*). From these there is an appeal to the Supreme Court (*hæstiréttur*) in Reykjavík, which has 5 judges. In 1918, 24 persons were convicted of crimes.

Finance.—Revenue and expenditure for 6 years :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1916	181,555	173,611	1919	904,510	919,286
1917	813,500	769,888	1920	916,300	887,212
1918	133,388	160,010	1921 ¹	285,309	262,071

¹ Estimates.

Budget estimates for the year 1922 :—

Revenue	Krónur	Expenditure	Krónur
Taxes	1,780,000	Interest on State debt	700,522
Customs	3,510,000	Reduction of debt . .	828,949
Post and telegraphs . .	1,300,000	The civil list of the King	60,000
Monopoly of tobacco	150,000	Althingi and the central administration . .	533,400
Balance of domain revenue	40,050	Foreign Affairs	48,000
Interest on State assets.	87,000	Justice, police, etc. . .	734,420
Other revenues	512,700	Sanitary affairs	825,992
		Communications	2,504,650
		Ecclesiastical affairs and instruction . .	1,672,718
		Science, literature, and art	280,970
		Trade, etc.	745,790
		Pensions	230,411
		Other expenditure . . .	204,000
Total revenue	7,397,450 (406,357 <i>l.</i>)	Total expenditure . .	9,369,822 (515,959 <i>l.</i>)

The State possesses a comparatively large reserve fund invested in different loans. On December 31, 1920, it amounted to 1,785,000 krónur (about 98,300*l.*)

The public debt of Iceland has been incurred partly by the establishment of telegraph lines and other important public works, partly by increasing the means of the National Bank, but mainly owing to the extraordinary expenses caused by the European War (buying of ships and providing of commodities). The public debt was on December 31, 1920, 14,717,590 krónur (810,430*l.*). It is in a great measure a foreign debt, due to Danish creditors. The foreign debt amounted to 8,957,623 krónur, and the internal debt 5,759,967 krónur.

Defence.—Iceland possesses neither an army nor a navy, nor any fortifications, and according to the Act of Union of 1918 its permanent neutrality is established.

Production.—Of the total area of Iceland, about six-sevenths is unproductive, but only about one-quarter per cent. is under cultivation, which is confined to hay, potatoes, and turnips. In 1920 the total hay crop from cultivated and uncultivated land was about 2,600,000 cwt., the crop of potatoes 65,000 cwt., and of turnips 22,000 cwt. In the spring of 1920 the live stock was as follows:—Horses 50,600, head of cattle 23,500, sheep 579,000, goats 2,000.

The total value of the fisheries in 1918 was estimated at 22,600,000 krónur (about 1,245,000*l.*), whereof the cod fishery was valued at 20,700,000 krónur, the herring fishery at 1,720,000 krónur, and the shark fishery at 180,000 krónur.

Commerce.—Total value of imports and exports for 5 years :—

	1914	1915	1916	1917	1918
	£	£	£	£	£
Imports	997,821	1,446,039	2,157,689	2,392,475	2,259,285
Exports	1,147,052	2,182,442	2,203,552	1,636,300	2,083,050

The value of the leading imports and exports for 1918 was as follows
(kr. 18'16=1£):—

	Imports.	Exports.
	Krónur.	Krónur.
Animals living and animal food	933,915	29,029,520
Cereals	7,119,636	—
Colonial produce	3,132,164	—
Textile materials	29,755	8,430,480
Yarn, rope, etc.	704,772	8,500
Textile manufactures	5,222,595	—
Skins, hair, etc.	215,388	3,230,474
Oils, tallow, etc.	2,585,104	1,208,255
Timber and wooden goods	2,055,266	171
Coal	5,636,042	—
Salt	4,932,537	—
Metals and hardware	1,920,888	—
Vessels, carriages, machinery, etc.	2,033,545	—
Other articles	4,456,094	12,844
Total	41,027,701 (2,259,235£)	36,920,200 (2,033,950£.)

The following table shows the value of the trade with the different countries in 1918:—

	Imports from: 1918.	Exports to: 1918.
	Krónur.	Krónur.
Denmark	10,899,007	818,851
Great Britain	11,724,860	17,852,062
Norway	207,367	4,306,747
Sweden	1,185,118	70
Germany	450	133
Netherlands	74,051	10
France	25,367	843,636
Spain	3,124,788	6,858,710
Italy	11,713	683,597
United States	13,678,589	5,547,674
Other countries	96,891	8,720
Total	41,027,701	36,920,200

The following table shows the chief articles of import and domestic export of the United Kingdom from and to Iceland (Board of Trade Returns) for 2 years:—

Imports into U.K.	1919	1920	Exports to Iceland	1919	1920
	£	£		£	£
Fish	489,948	397,381	Coal	64,485	87,937
Oil	23,175	50,978	Cotton manufactures	74,889	68,694
Wool	13,277	1,468	Grain and flour	269	32,736

Total trade (Board of Trade Returns) between Iceland and the United Kingdom for 5 years:—

	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Iceland to U.K	595,923	860,372	534,215	518,815	273,192
Exports to Iceland from U.K	259,323	313,700	493,206	1,022,808	325,187

Shipping and Navigation.—The mercantile marine of Iceland (above 50 net tons) was, in 1920, 33 steam vessels of 6,992 net tons, 8 motor vessels of 911 net tons, and 5 sailing vessels of 521 net tons: total, 49 vessels of 8,424 net tons.

In 1917, 178 vessels of 61,432 tons cargo entered the Icelandic ports from foreign countries.

Internal Communications.—There are no railways in Iceland. At the end of 1917 there were completed about 320 miles of carriage roads outside the towns.

There are 240 post offices.

The length of the telegraph and telephone lines at the end of 1920 was 1,512 miles. The wires had a length of 4,520 miles. There were 160 telegraph and telephone offices. Number of dispatches sent in the year 1917 was 193,850, of which 105,379 were internal. Number of telephone conversations was 311,582. The total receipts amounted to 1,098,437 krónur, and the total expenditure to 915,195 krónur, leaving a surplus of 183,242 krónur.

Money and Credit.—There are two banks in Iceland, *Landsbankinn* (The National Bank), which belongs entirely to the State, and *Íslands banki* (Bank of Iceland), a private joint-stock bank, which has the privilege of issuing notes beyond a fixed amount of State notes which the National Bank has in circulation. On December 31, 1920, the accounts of the National Bank balanced at 33,004,543 krónur. The liabilities included 750,000 krónur note issue and 3,143,416 krónur reserve fund. A special department for loans on mortgage is connected with the National Bank. The accounts of the Bank of Iceland balanced 52,343,867 krónur at the end of 1920. The assets included 4,094,376 krónur in bullion and specie. The liabilities included 8,586,180 krónur note issue, 4,500,000 krónur of capital, and 3,792,587 krónur reserve fund.

At the end of 1916 there were 44 savings banks with 14,667 depositors, and deposits amounting to 3,499,000 krónur, or about 239 krónur to each account.

Money, Weights and Measures.—According to the Act of Union of 1918, Iceland uses the coinage of Denmark. The Icelandic name of the monetary unit is *króna*, pl. *krónur*.

The metric system of weights and measures is obligatory.

Diplomatic and Consular Representatives.

1. OF ICELAND IN GREAT BRITAIN.

According to the Act of Union of 1918, Iceland is represented by the Diplomatic Representatives of Denmark.

2. OF GREAT BRITAIN IN ICELAND.

Consul at Reykjavík.—Asgier Sigurdsson.

There are also consular representatives at Akureyri, Seydisfjörður, and Vestmannaeyjar.

Statistical and other Books of Reference concerning Iceland.

ECUADOR.

(REPÚBLICA DEL ECUADOR.)

Constitution and Government.

THE Republic of Ecuador, which is situated in the north-west of South America, approximately between latitude 1°40' north and 6° south, and between 69°20' east longitude and 90° west, was constituted May 11, 1830, in consequence of a civil war which separated the members of the original Republic of Colombia, founded by Simon Bolivar, by uniting the Presidency of Quito to the Vice-Royalty of New Grenada, and the Captaincy-General

of Venezuela, when they threw off the Spanish yoke. Under the present Constitution, promulgated December 28, 1906, the executive is vested in a President, elected for the term of four years, while the legislative power is given to a Congress of two Houses; the first consisting of thirty-two senators, two for each province (chosen for four years), and the second of 48 deputies, on the basis of one deputy for every 30,000 inhabitants, chosen for two years; both elected by adults who can read and write. The Congress meets on the 10th. of August of every year at Quito, the capital, without being summoned by the Government. The election of the President takes place in a direct manner by the people. Under the present constitution there is no election for Vice-President. In case of death, or other cause of vacancy in the office of President, he is replaced (1) by the President of the Senate of the Last Congress, and (2) if he should also fail, by the President of the Chamber of Deputies.

President of the Republic.—Dr. José Luis Tamayo (September 1, 1920, to August 31, 1924).

The President, who receives a salary of 24,000 sucres a year, theoretically exercises his functions through a Cabinet of five ministers (Interior, Foreign Affairs, Public Instruction, Finance, and War) who, together with himself, may be impeached by Congress. Each minister receives a salary of 9,600 sucres a year. The President has the power of veto, but if Congress insist on a vetoed bill becoming law, he has no alternative but to give his assent to it. He may summon an Extraordinary Congress for a specified purpose, but he cannot dissolve the Chambers or shorten their sittings.

The Council of State is formed by the President of the Supreme Court of Justice, who presides over it; the President of the Court of Accounts; the five Secretaries of State who can report but not vote; two Senators; two Deputies; and three citizens elected annually by Congress and who, in order to be eligible, must have the qualifications necessary for being a Senator.

By the terms of the Constitution privileges of rank and race are not allowed to exist within the Republic. Until October 20, 1918, most of the Indians were virtually in bondage and peonage and debt servitude existed in its worst forms on the landed estates. But by a Legislative decree of that date peonage was abolished. By an edict of 1896 the Indians are exempted from paying tribute, and are admitted to citizenship.

The Provinces are administered by Governors, appointed by the Government; their subdivisions, or cantons, by political chiefs; and the parishes by political lieutenants. The Galapagos Archipelago is under the administration of a Territorial Chief, whose functions are the same as those of a Provincial Governor.

Area and Population.

The area of Ecuador is given variously as being between 116,000 and 276,000 square miles, but since the frontiers have not been settled, no definite figure is possible. Ecuador is said to have more boundaries than any other country, and there are maps of the Republic showing six different frontiers according to six different opinions. The country is divided into 17 provinces and one territory—the Archipelago of Galapagos—officially called “Colon,” situated in the Pacific Ocean about 600 miles to the west of Ecuador. The bulk of the population is Indian; inhabitants of pure European blood are few; those of mixed blood are estimated at about 400,000. Included in the above statement are the Galapagos or Tortoise Islands, with an area of 2,400 square miles, and a population of about 400.

Ecuador still has a boundary dispute with Peru. That with Colombia was settled by Treaty in 1917.

The population of the Republic (1903) was distributed as follows among the provinces (capitals in brackets):—

Provinces	Population	Provincas	Population
Azuay (Cuenca) . . .	132,400	Loja (Loja) . . .	66,000
Bolivar (Guaranda) . .	43,000	Manabi (Puertoviejo) . .	64,100
Cañar (Azogues) . . .	64,000	Napo-Pastaza ² } . .	80,000
Carchi (Tulcán) . . .	36,000	Santiago-Zamora ² } . .	
Chimborazo (Riobamba) .	122,000	Oro (Machala) . . .	32,600
Esmeraldas (Esmeraldas)	14,600	Pichincha (Quito) . . .	205,000
Colon ¹ (San Cristobal) . .	400	Los Rios (Babahoyo) . .	32,800
Guayas (Guayaquil) . .	150,000	Tungurahua (Ambato) . .	103,000
Imbabura (Ibarra) . . .	68,000		
Leon (Latacunga) . . .	109,600	Total . . .	1,323,590

¹ Galapagos Islands, not a province, but a territory.

² Formed out of the former territory of Oriente, by legislative decree of November 25, 1920.

Estimated population 1915 : 2,000,000.

The chief towns are the capital, Quito (70,000), Guayaquil (98,851 in 1919), Cuenca (30,000), Riobamba (12,000), Ambato, Loja, and Latacunga (each about 10,000), Bahia (5,000), Esmeraldas (4,000).

In 1917 there were 74,386 births, 10,016 marriages and 41,531 deaths. Increase of births over deaths, 32,855.

Religion and Instruction.

According to the Constitution the State recognises no religion, but grants freedom of worship to all. The Catholic Church has one archbishop (Quito) and six suffragan bishops. Its income, in substitution for tithes, is annually provided for in the estimates. All members of the Episcopate are required to be Ecuadorian citizens. Civil marriages are obligatory in accordance with regulations prescribed by law of December, 1902.

Public instruction was organised in 1897 and improved in 1912. Primary education is gratuitous and obligatory. Higher education is carried on in the Central University at Quito (founded in the eighteenth century by the Dominicans), which has the faculties of medicine, pharmacy, science, and law; at the Guayas University, in Guayaquil, and at the Azuay University, in Cuenca. The two latter have faculties of medicine, pharmacy, and jurisprudence. Total number of students (1919-20), 744. There is also a law college at Loja. During the school-year 1920-21 there were 1,716 schools in operation in the Republic, 1,395 of which were Government schools; 182 municipal, and 139 private schools. The total attendance at these schools in 1920-21 was 103,344. The Government schools had an attendance of 75,110. The attendance in the municipal schools was 13,143. The attendance in the private schools was 15,091. These schools employed 2,438 teachers. Total expenditure on elementary education, 1920, 200,4017.; on secondary education, 90,8177.; and for the universities, 72,4357.; making a total of 313,7077.

Justice and Crime.

" The appellate courts are the Supreme Court in Quito, which is the highest tribunal and consists of 5 justices elected by Congress for a term of 6 years. The eight superior courts are located at Quito, Guayaquil, Cuenca, Riobamba, Ibarra, Ambato, Loja and Portoviejo. The first two are composed of 6 judges, the remainder of 3 judges each, all elected by Congress for 6 years. The Court of Accounts is empowered to audit and investigate all public accounts. In the Republics there are 359 parochial justices.

Finance.

Of the total revenue about 70 per cent. is derived from customs duties; 15 per cent. from taxes on cocoa, real estate, whiterum, and tobacco; 6 per cent. from salt and the remainder mostly from excise, rents of State property, and the postal department. The revenue and expenditure for recent years are given as follows in sterling (1 sucre = 24*d.*), but the figures are not to be taken as representing the exact state of affairs:—

—	1917	1918	1919	1920	1921 ¹
	£	£	£	£	£
Revenue . . .	1,882,806	1,401,544	1,549,727	1,765,389	2,028,570
Expenditure . . .	1,796,496	1,588,771	1,850,526	2,035,685	2,028,570

¹ Estimates.

On December 31, 1920, the foreign debt amounted to 3,583,470*l.* and the internal debt to 2,564,734*l.*, making a total of 6,148,204*l.*

Defence.

The Ecuadorian regular army has an establishment of 557 officers and 4,408 men. This force is composed of 3 regiments of artillery, 10 battalions of infantry, 3 squadrons of cavalry, and 2 battalions of sappers, which form the active army. Military service was made compulsory on May 24, 1921. The regular infantry have the Mauser rifle; the artillery have Vickers Maxim, old-fashioned Krupps and new Ehrards. The country is divided into 6 military districts. A military school is established at Quito.

The Navy consists of three vessels: The *Libertador Bolivar*, a torpedo gunboat; the *Cotopaxi*, an old destroyer; and the *Tarqui*.

Production and Industry.

Ecuador is divided into two agricultural zones: the coast regions and the lower river valleys, where tropical farming is carried on; and the hill country, the foothills, and the high mountain valleys, adapted to grazing, dairying, and the production of hay, grain, and the fruits and vegetables to temperate climes. The staple produce of Ecuador is cocoa. The production of cocoa beans was in 1915, 769,750 cwts.; in 1916, 1,079,250 cwts.; in 1917, 68,359 cwts.; in 1918, 37,507 cwts., and in 1919, 22,474 cwts. The largest cocoa estate in the country has been taken over by an English company. Coffee is also grown; the exports in 1919 were 3,729,451 lbs. Rubber plantations have been formed in the Balzar and Tenguel districts and in Manabi and Esmeraldas, with more than a million trees. The rubber exports in 1919 amounted to 886,373 lbs. But rubber is rapidly declining on account of the destructive methods employed in its collection. Other products are tagua (ivory nuts), tobacco, the annual yield

of which is about 3,000 lbs; and sugar. Mangrove bark (for tanning), alligator skins, and kapok (silk cotton tree fibre, *Bombax ceiba*) are exported in small quantities.

Ecuador is auriferous. At Pillzhum in Cañar rich silver ore is found, but is not now worked. Petroleum is found; the oil-fields of Santa Elena are being worked by two British Companies. The country is known to be also rich in copper, iron, lead and coal; and sulphur exists in great quantities in the Chimborazo district and in the Galapagos Islands.

Excepting the inter-Andean plateau and a few arid spots on the Pacific coast, Ecuador is a vast forest. Roughly estimated, 10,000 square miles on the Pacific slope extending from the sea to an altitude of 5,000 feet on the Andes, and the Amazon Basin below the same level containing 80,000 square miles, nearly all virgin forest, are rich in dyewoods, cinchona trees, and other valuable timber.

Panama hats are made almost exclusively in Ecuador, the principal centres being Monticristi, Jipijapa and Cuenca. The Government of Ecuador attempted to monopolise the hat business for its own people by placing a heavy export duty on "paja toquilla," but large quantities of the material still go to Peru; and Payta, Peru, where little "toquilla" is grown, is a strong competitor of Ecuador in the manufacture of Panama hats. There are flour mills, 13 sugar works, breweries, and chocolate factories.

Commerce.

The value of imports and exports for five years is given as follows in sterling (10 suc és = £1):—

	1916	1917	1918	1919	1920
	£	£	£	£	£
Imports .	1,919,788	2,094,001	1,669,063	2,400,769	4,809,432
Exports .	3,615,163	3,355,794	2,749,946	4,322,055	5,528,379

In 1920 the chief exports were cocoa, 3,557,340*l.*; tagua, or ivory nuts, 587,864*l.*; hats, 77,465*l.*; coffee, 91,691*l.*; hides, 56,186*l.*; rubber, 15,457*l.* The chief imports in 1919 were woven goods, 582,223*l.*; foodstuffs, 438,339*l.*; machinery, 220,207*l.*; clothing, 51,923*l.* Of the imports in 1919, the value of 1,681,277*l.* was from the United States; 378,126*l.* from Great Britain; 65,776*l.* from Peru; 63,914*l.* from France.

The chief articles of import from Ecuador into Great Britain (according to Board of Trade returns) in 1920 consisted of cocoa of the value of 1,213,098*l.*; hides, 40,339*l.*; straw hats, 171,367*l.* The chief exports of British produce to Ecuador in 1920 were cotton goods, to the value of 690,350*l.*; woollens, 156,940*l.*; iron, wrought and unwrought, 47,816*l.*

Total trade between Ecuador and the United Kingdom for five years (according to Board of Trade returns):—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Ecuador into U.K. .	204,507	142,240	1,230,780	1,666,882	171,800
Exports to Ecuador from U.K. .	595,862	372,671	376,603	1,349,442	627,862

Shipping and Internal Communications.

In 1920 there entered at Guayaquil 241 steam vessels of 451,753 tons (84 vessels of 130,599 tons British), and cleared 242 vessels of 479,112 tons (83 vessels of 129,948 tons British). Guayaquil is visited by the steamers of three European lines passing through Magellan's Straits, as well as by steamers plying only on the Pacific coast.

The roads of the country are mostly bridle-roads only, and often impassable for half the year. The one highway is from Quito towards Guayaquil, for a distance of 115 miles, but the work of thus connecting the capital and the port has long been discontinued. In 1917 it was decided to construct a road of 20 miles from Guayaquil to Pasquales on the Daule river. There is river communication throughout the principal agricultural districts on the low grounds to the west of the Cordillera by the rivers Guayas, Daule, and Vinces (navigable for 200 miles by river steamers in the rainy season), and other small affluents thereof. Navigation of these inland waters is carried on by about 17 American and Ecuadorian-built side-wheel and screw steamers, 20 steam yachts or tow-ferry boats, many small steam launches, and a large fleet of gasoline launches, canoes, and other small craft.

A railway is open from Duran (opposite Guayaquil) to Quito (280 miles). The total length of Ecuadorian railways actually in operation (1921) is 413 miles. The journey from Guayaquil to Quito takes two days, with a stop at Riobamba, where the passengers spend the night; 12 hours trip first day and 9 hours second day. Railways for the development of local trade have been undertaken by several local authorities.

The total length of telegraph line (1915) is about 4,360 miles, Quito being connected with Guayaquil and the coast, with the Republics of Colombia and Peru, and by cable with the rest of the world. There are 204 telegraph stations through which 400,000 messages were sent. In 1915 there were 2,926 telephone instruments in Ecuador (2,250 in Guayaquil) and 2,815 miles of wire. Wireless telegraphy has been installed. At present there are only in operation three stations: one in Quito, one in Guayaquil, and one in Esmeraldas. Further stations are projected at Manabí, Tulcán, Cuenca, Loja, San Cristobal (Galapagos Islands), and Oriental Region.

On January 1st, 1921, there were 225 post offices in the country.

Banking and Credit.

Ecuador having no mint, the coin of the country is minted in England, the United States, and Peru.

There is no national money in Ecuador, the circulating medium being issued wholly by the banks. Five banks are authorised to issue notes for circulation, viz. the Banco del Ecuador, capital 300,000L., the Banco Comercial y Agrícola, capital 400,000L., Banco del Azuay, capital 100,000L., the Banco del Pichincha, capital 250,000L., and the Compañía de Crédito Agrícola e Industrial, capital 100,000L. On December 31, 1920, there were in circulation in Ecuador bank-notes of the value of 1,650,590L. The following are the reserve funds of gold and silver specie held by the banks: gold coin, 902,742L.; silver coin, 86,918L., and funds abroad, 481,826L., making a total of 1,471,486L. Excess of note circulation over specie is 179,104L.

Money, Weights and Measures.

A law passed in 1898 provided for a gold standard, which was established on June 4, 1900. The new coinage consists of: the gold *condor* of 10 sucres weighing 8.136 grams, and containing 7.3224 grams of fine gold (equivalent

to the English sovereign), the silver *sucre* and its sub-divisions, and nickel and copper pieces. The *sucre*, so called from the likeness of Marshal Sucre (a former President) imprinted on the coin, is legal tender only up to 10 *sucre*s. In 1917 subsidiary nickel coins of 5 and 10 centavos were issued.

By a law of December 6, 1856, the French metrical system of weights and measures was made the legal standard of the Republic; but is not adopted by commerce. The quintal is equivalent to about 101 pounds.

The meridian of Quito has been adopted as the official time.

Diplomatic and Consular Representatives.

1. OF ECUADOR IN GREAT BRITAIN.

Minister.—Don Enrique Dorne y de Alsúa. (Resides in Paris.) Appointed 1916.

Attaché in Paris.—José de Icaza.

Attaché in London.—Lisimaco Guzmán Aspiazu.

Consul-General.—Pedro Miller Gutierrez (London).

2. OF GREAT BRITAIN IN ECUADOR.

Envoy Extraordinary and Minister Plenipotentiary.—A. C. Grant Duff, appointed August 1, 1920 (who is also Minister at Lima, Peru, where he resides).

Chargé d'Affaires and Consul-General in Quito.—R. C. Michell.

Vice-Consul in Quito.—H. L. Williams.

Commercial Secretary.—F. W. Manners (resides in Lima).

Consul at Guayaquil.—W. C. Graham.

ESTHONIA.

(EESTI WABARIK.)

Esthonia comprises the former Russian Government of Estland, the northern part of Livland, the north-western portion of the Pskoff Government, and the Islands Saaremaa (Oesel), Hiiumaa (Dago), and Muhumaa in the Baltic Sea.

After the Bolshevik *coup d'état*, Esthonia, on February 24, 1918, declared her independence, and was recognised in the same year as a *de facto* independent body by Great Britain (May 3), France (May 13), and Italy (May 29). The following year (1919) Esthonia was recognised *de facto* by Japan, Sweden and Poland, and in 1920 *de jure* by Russia and Finland. On January 26, 1921, the Supreme Council accorded *de jure* recognition to Esthonia.

Constitution and Government.—Pending the elaboration of a permanent constitution, Esthonia was governed according to a Provisional Constitution adopted by the Constituent Assembly on June 4, 1919. According to this the Supreme Power was vested in the Constituent Assembly, which was composed of 120 members.

The Constitution of the Estonian Republic was passed by the Constituent Assembly on June 15, 1920, and has been in force since December 20, 1920.

The power of the State is in the hands of the people. The sovereign power is assured to the people by means of the elections to the Legislative Assembly (*Riigikogu*, State Assembly), the referendum, and the right of initiating legislation.

The State Assembly is composed of 100 members, elected for three years on the basis of proportional representation, and by universal, direct, equal, and secret suffrage. The Assembly forms the Government, and accepts its resignation, promulgates the laws, passes the budget, decides the financial policy generally, ratifies treaties, the mobilisation decree, and state of siege, &c.

The signatures of 25,000 citizens are necessary in demanding a referendum, proposing a new law, or amending the existing laws. The budget and measures affecting war, peace and foreign treaties cannot be submitted to a referendum.

The executive power consists of the State Head (*Riigivanem*, State Elder), and ministers, who form the Government. The Government directs the foreign and home policy of the Republic, appoints officials (except where special laws exist), and introduces legislation. It is chosen by the State Assembly, and is responsible to that body. The Government collectively and individually must possess the confidence of the Assembly, and must resign if a vote of no confidence is passed. The Government is the Commander-in-Chief of the Republican defence forces in peace time.

The members of local organs of self-government are elected on a basis similar to that on which rests the elections to the State Assembly. If the law has not created special offices, the executive power of the Government is exercised through the local government institutions.

All Estonian citizens are equal in the eyes of the law. There is no death penalty.

The national flag of Esthonia is blue, black and white in horizontal stripes.

The elections for the Esthonian Diet were held on November 28, 1920, and resulted in the return of the following parties:—Reformist Labour, 22; Agrarians, 21; Populists, 10; Christian Party, 7; Social Democrats, 18; Independent Socialists, 11; Bolsheviks, 5; Balts, 4; Russian, 1; Economist Group, 1; making a total of 100.

State Head (Riigivanem).—Konstantine Paets.

Minister for Foreign Affairs.—Ant. Piip.

Minister of Trade and Industry.—Karl Ipsberg.

Minister of War.—Jaan Soots.

Minister of Education.—Heinrich Bauer.

Minister of the Interior.—Karl Einbund.

Minister of Agriculture.—Bernard Rostfeld.

Minister of Justice.—Jaak Reichmann.

Minister of Finance.—George Westel.

Minister of Labour.—Chr. Kaarna.

Area and Population.—Esthonia comprises the former Russian province of Esthonia, the northern portion of the former Russian province of Livonia, the islands of Moon Sound, the Toropetskoi district of the Pskov Government, and the Glovskii district of the Petrograd Government. The boundary line between Esthonia and Russia is defined by the Peace Treaty of February 2, 1920. The boundaries between Esthonia and Latvia were settled on July 3, 1920. The extreme length is about 217 miles, and the breadth about 124 miles, the total area being about 23,160 square miles.

The population of 1,750,000 is composed as to 93.46 per cent. of Esthonians, 1.28 per cent. of Germans (Balts), and 5.26 per cent. of Russians and other nationalities.

The Republic is divided into eleven districts, as follows (the capitals are given in brackets, and when two are given the second mentioned is the German name):—Harju (Tallinn-Reval), Wiru (Rakvere-Wesenberg), Jarva (Paide-Weisenstein), Laane (Hapsal), Tartu (Tartu-Dorpat), Woru (Woru), Wiljandi (Wiljandi-Fellin), Parnu (Parnu), Saaremaa-Oesel (Kuresaare-Arensburg), Petseri (Petseri), and Walga (Walk). The capital, Tallinn (Reval), was founded in 1219 at the mouth of the Gulf of Finland, and in 1917 had 160,000 inhabitants. The university town of Tartu (Dorpat) had 60,000 inhabitants. The population of the port of Parnu, on the Gulf of Riga, was 23,000, and that of the manufacturing town of Narva 35,000.

Religion and Instruction.—There is no State religion in Esthonia. Five-sixths of the population are Lutherans, the rest Orthodox, Catholics, &c.

Elementary education is obligatory and gratuitous. In 1897 the illiterates among the population above the age of 10 years numbered 3 per cent. In 1919 there were 1,257 elementary schools with a four years' course in the Esthonian Republic. Of this number 1,227 were supported by self-government institutions, for example of communities, suburbs, towns or of the State, and 30 were private schools kept by private individuals. The number of higher schools with a seven years' course amounted to 211, seven of which are private. The number of middle schools for general education, gymnasiums, and so on, was 65, of which number 32 were private schools (mostly supported by the Government).

For special or professional education there are teachers' seminaries in Tallinn, Tartu, and Rakvere, navigation schools in Tallinn, Kasmu, Kuresaare, and Parnu, commercial schools with an eight years' course, agricultural schools with a four years' course, mercantile schools with a four years' course, and industrial and art schools with a six years' course.

The minority nationals (Germans, Russians, Swedes, and Letts) are guaranteed education in their mother tongue.

For higher education there are the Dorpat University (founded in 1632), which on December 1, 1919, was re-opened as an Estonian seat of learning maintained by the Government; number of students (1921), 2,775 (2,001 men and 774 women); the Technicum at Tallinn is a higher professional school with 500 students in 1920.

Justice.—The supreme judicial power is invested in the State Court of Justice, which is elected by the State Assembly and sits in Tartu (Dorpat).

The laws are being gradually revised by the State Assembly.

Finance.—Estimated revenue and expenditure for two years were as follows (in Estonian marks):—

	1920	1921
Revenue ...	1,071,500,000	6,886,914,772
Expenditure ...	979,450,000	6,886,914,772

The foreign debt of Estonia amounts to 4,400,000*l.* (3,847,000*l.* to the United States, 200,000*l.* to France, and 353,000*l.* to Great Britain), and the internal debt to 2,800,000,000 Estonian marks.

Defence.—During the war with Soviet Russia all classes from 19 to 35 years were mobilised, and an army of more than 90,000 was created. The army is composed of three divisions. In peace times the army consists of 15,000 men.

The young navy of this new country comprises two destroyers, with a few gunboats and launches, including the ex-Russian *Bobr*, 875 tons, two 4·7-in. guns. Rear-Admiral Pitka, who received the K.C.M.G. in recognition of the services of the Estonian vessels in assisting Sir Walter Cowan's operations, is in command.

Production.—Agriculture is the chief occupation. Half the area of Estonia was taken up by large landed properties of more than 2,000 hectares each. By the passing of the Agrarian Reform Bill these estates were parcelled out to the peasants. The total area is about 10,352,154 acres, divided as follows: forest land, 2,081,249 acres (20·1 per cent.); fields, 2,371,076 acres (22·9 per cent.); meadows, 2,533,335 acres (24·46 per cent.); pastures, 1,810,197 acres (17·48 per cent.); untillable land, 1,557,327 acres (15·04 per cent.), including a peat bog of 496,112 acres.

The principal crops, with acreage and yield, are shown as follows:—

	Acreage		Yield in Bushels	
	1919	1920	1919	1920
Rye	325,886	376,004	4,903,402	6,435,488
Wheat	32,615	37,351	441,072	612,930
Barley	263,153	297,453	4,500,030	5,968,308
Potatoes	188,963	155,513	19,082,030	25,240,705

In 1920 Estonia had 414,955 head of cattle, 497,838 sheep, 244,912 pigs, and 155,489 horses.

Commerce.—The chief exports are flax, timber, cellulose, and meat. The trade in 1920 amounted to 3,912,394 pounds (62 pounds=1 ton) of imports, valued at 1,395,185,291 marks (782,442,200 marks in 1919), and 7,675,508 pounds of exports, valued at 1,228,099,436 marks (389,361,000 marks in 1919). Of the total imports, 1,142,759 pounds came from the United Kingdom and 1,298,670 pounds from Germany; of the total exports, 3,531,362 pounds went to the United Kingdom and 275,905 to Germany.

Principal imports (in pounds):—Salt, 1,103,342; coal, 809,629; fertilisers, 481,285; sugar, 113,117. Principal exports:—Timber, 4,113,144; potatoes, 1,534,007; paper, 895,988; flax, 208,035.

Total trade between the United Kingdom and Esthonia (according to Board of Trade returns):—

		1921
		£
Imports from Esthonia into United Kingdom	...	729,663
Exports to Esthonia from United Kingdom	...	3,950,669

Currency.—The currency of Esthonia is the Esthonian mark, equal in value to the French franc.

Diplomatic and Consular Representatives.

1. OF ESTHONIA IN GREAT BRITAIN.

Minister.—Dr. Oskar Philipp Kallas (appointed January, 1922).

Secretary.—Rudolph A. Möllerson.

Commercial Attaché.—August Uustal.

There are Consular Representatives in London, Aberdeen, Hull, Dover, Belfast, Leith, Bo'ness, Liverpool, Methill, Alloa, Glasgow, Manchester, Dundee, Cardiff, Southampton, West Hartlepool, Swansea.

2. OF GREAT BRITAIN IN ESTHONIA.

Minister.—E. C. C. Wilton, C.M.G.

Consul at Reval.—Peter Leslie.

FINLAND.

(SUOMEN TASAVALTA.)

Finland is a Republic according to the Constitutional Law of June 14, 1919.

From 1809 Finland was united to the Russian Empire as an autonomous Grand-Duchy. On December 6, 1917, the House of Representatives unanimously proclaimed Finland an independent and sovereign State, and she has been recognised as such by the Powers. According to the Constitutional Law

of 1906, the House of Representatives consists of one Chamber of 200 members chosen by direct and proportional election, in which all who are entitled to vote have an equal vote. The suffrage is possessed, with the usual exceptions, by every Finnish citizen (man or woman) who has reached his or her 24th year. There are 16 electoral districts with a representation proportioned to the population, a rearrangement being required every 10 years. Each district is divided into voting circuits. The voting system, devised with a view to proportional representation, provides for the formation of voters' associations which prepare three-name lists of candidates, the votes for whom are in a falling scale according to the order in which the voter has placed them. There may, within limits, be compacts between associations, and joint candidates may be entered in competing lists, while any voter may either support an association list or vote for any candidate he pleases. Every citizen entitled to vote is eligible to the House of Representatives, which is elected for 3 years. The President is elected for 6 years by the votes of the citizens. He receives a salary of 150,000 marks and 250,000 marks for allowances.

At the elections held in March, 1919, the following parties were returned:—Social-Democrats, 80; Finnish Coalition Party, 28; Finnish Progressive Party, 26; Agrarians, 42; Swedish Party, 22; and Christian Labour Party, 2.

President of Finland.—Dr. Kaarlo Juho Ståhlberg (born 1865; elected July, 1919).

The Finnish Cabinet, appointed April, 9, 1921, is composed as follows:—

Prime Minister.—Dr. Juho Vennola.

Minister for Foreign Affairs.—Dr. Eino Rudolf Woldemar Holsti.

Minister of Finance.—Risto Ryti.

Minister of the Interior.—Dr. Heimo Helminen.

Minister of Justice.—Baron de Hellens.

Minister of Education.—Niilo Liakka.

Minister of War.—Major-General Bruno Ylander.

Minister of Communications.—Erkki Pullinen.

Minister of Commerce and Industries.—Erkki Makkonen.

Minister of Social Affairs.—Vilku Joukahainen.

Minister of Agriculture.—Kyösti Kallio.

Minister without Portfolio.—Juho Niukkanen.

Area and Population.

The area and population of Finland, according to the census taken on Dec. 31, 1910, and estimates for Dec. 31, 1919, are as follows:—

Governments (Läänit).	Area English sq. miles	Population Dec. 31, 1910	Population Dec. 31, 1919	Population per sq. mile, 1919
Uusimaa (Nyland)	4,705	376,218	427,751	133·6
Turku-Pori (Åbo-Björneborg)	8,832 }	499,332	{ 490,671	81·2
Åland (Ålivenanmaa)	557 }		{ 27,351	68·6
Häme (Tavastehus)	8,102	342,321	357,106	73·2
Vilpuri (Viborg)	16,691	521,469	564,512	63·6
Mikkeli (St.-Michel)	9,002	198,829	208,818	48·7
Kuopio	17,014	333,777	352,585	35·1
Vaasa (Vasa)	15,969	514,940	544,656	51·0
Oulu (Uleåborg)	64,854	328,311	366,787	9·3
Petsamo	3,860	—	1,700	0·4
Total	140,586	3,115,197	3,385,237	34·7

Of the total on Dec. 31, 1919, 1,617,596 were male and 1,687,641 female. The estimated population on December 31, 1921, was 3,867,542. The growth of the population is shown as follows:—

Years	In Towns	In Country	Total	Percentage in towns
1800	46,604	786,055	832,659	56.0
1850	105,496	1,531,419	1,636,915	63.7
1900	339,613	2,372,940	2,712,562	125.2
1910	456,873	2,658,324	3,115,197	146.7
1915	512,226	2,788,424	3,300,650	155.2
1919	527,861	2,807,375	3,335,237	158.3

The movement of the population for four years was as follows:—

Year	Living Births	Of which illegitimate	Stillborn	Marriages	Deaths (exclusive of stillborn)	Excess of Births
1916	79,653	6,337	2,124	19,297	54,577	25,076
1917	81,046	6,490	2,174	20,004	58,863	22,183
1918	79,494	6,981	2,001	15,008	95,102	15,608
1919	63,898	4,312	1,656	15,831	62,982	964

Emigration (the first figures give the total for the year, the figures in brackets give the number emigrating to America): 1915, 4,041 (4,023); 1916, 5,325 (5,318); 1917, 2,773 (2,758); 1918, 1,900 (1,867); 1919, 1,085 (1,077); 1920, 5,595 (5,577).

The principal towns, with the number of their inhabitants in 1919, are: Helsinki (Helsingfors), 188,922; Turku (Åbo), 59,914; Tampere (Tammerfors), 46,819; Viipuri (Viborg), 30,039; Vaasa (Vasa), 24,479; Oulu (Uleåborg), 21,216; Kuopio, 18,137; Pori (Björneborg), 17,045; and Kotka, 11,563.

Religion and Instruction.

The Evangelical Lutheran religion is the national Church, but entire liberty of conscience is guaranteed to the members of all religions and confessions. Ecclesiastically Finland is divided into 4 bishoprics (Turku being the archiepiscopal see), 47 provostships, and 549 parishes.

Of the total population there were at end of 1919: Lutherans, 3,269,421; Greek-Catholics and Raskolnics, 56,672; Roman Catholics, 606; Baptists, etc., 8,538. The Greek-Catholics are under an archbishop, resident at Viipuri.

In 1920 Finland had 2 universities: at Helsinki (founded in 1640 at Turku, and removed to Helsinki after having been burned down in 1827), and Turku (Swedish, opened 1919). The former has 2,578 students (698 women), and the latter 130 students (56 women). In 1920 there were also 1 technical high school, with 602 students (24 women), and 2 commercial high schools, with 158 students.

For secondary education there were, in 1920, 81 lyceums, with a curriculum of 8 or 9 years and 20,241 pupils (8,466 girls); 42 middle schools (the first 5 years of curriculum), with 4,721 pupils (2,567 girls); 23 colleges for girls (middle schools), with 4,416 pupils; and 17 extension classes (the last 3 years of curriculum), with 694 pupils. There were 8 training colleges for elementary school teachers, with 713 students (437 women); and 6 for infant

school teachers, with 293 students. There were also 42 high schools for the people, with 2,807 pupils (1,631 females).

For elementary education (1919) there were in the country 3,639 higher elementary schools, with 179,389 pupils (89,084 girls); 1,262 lower elementary schools, with 41,104 pupils (20,304 girls); 1,543 infant schools under the superintendence of the Church, with 197,721 pupils. In the towns, there were 1,262 classes of higher elementary schools, with 41,104 pupils (20,304 girls); and 35 preparatory schools for secondary education, with 2,096 pupils. There were besides 7 navigation schools, with 97 pupils; 21 commercial schools, with 1,584 pupils; 31 trade schools, with 2,404 pupils; 13 technical schools, with 678 pupils; 107 schools for arts and crafts ("slöjd"), with 3,233 pupils; 35 agricultural schools; 3 dairy schools; 35 cattle-management schools; and 41 horticultural schools, with 3,227 pupils; 5 forestry schools, with 139 pupils. The school age in the primary schools is from 7 to 15 years.

In 1920 there were published 240 newspapers and reviews in Finnish, 92 in Swedish, 11 in Finnish and Swedish, and 3 in other languages.

Justice and Crime.

The administration of justice is independent of the Government. The lowest courts of justice in Finland are those of the District. In towns these district courts are held by the burgomaster and his assessors; in the country by a judge and 12 jurors—peasant proprietors, the judge alone deciding, unless the jurors unanimously differ from him, when their decision prevails. From these courts an appeal lies to the Superior Court (*Hovioikeus*) in Turku, Vaasa and Viipuri. The Supreme Court of Judicature (*Korkein oikeus*) sits in Helsinki. Judges can be removed only by judicial sentence.

Two functionaries, the *Oikeuskansleri* or the Chancellor of Justice, and the *Oikeusasiamies*, or the Attorney-General, exercise control over the administration of justice. The former acts also as counsel and public prosecutor for the Government; while the latter, who is appointed by the Parliament, has to extend a general supervision over all the courts of law.

At the end of 1918 the prison population numbered 4,666 men and 697 women, while the number of sentences pronounced at the end of 1919 was 38,426 for crimes and 18,476 in civil cases.

Pauperism.

The number of paupers in 1919 supported by the towns and the village communities was 192,980 (5.78 per cent. of the population); and the total cost was 86,006,073 marks.

Finance.

Revenue and expenditure for 6 years in thousands of marks:—

	1917	1918	1919	1920	1921 ¹	1922 ¹
Revenue .	520,000	1,252,170	984,144	1,545,545	2,339,104	2,065,860

According to the establishment of 1921, the personnel of the coast defence is as follows: *Navy*—Admiral or Major-General (Commander-in-Chief of the Coast Defences), 71 officers, 79 civil officers, and 1,028 petty officers and men. The *Coast Artillery* contains 3 regiments and 1 independent group of batteries; and to the personnel belong 95 officers, 47 ensigns, 63 civil officers, and 2,240 petty officers and men.

Production and Industry.

Agriculture is the chief occupation of the people in Finland, although the cultivated area only covers 8.5 per cent. of the land. The land was divided in 1910 into 284,188 farms, and the landed property was distributed as follows:—Less than 3 hectares cultivated, number of farms, 143,933; 3–10 hectares, farms 88,998; 10–25 hectares, farms 37,749; 25–100 hectares, farms 13,209; over 100 hectares, farms 899.

The crop of 1919 was, in bushels:—rye, 8,465,719; barley, 4,578,506; oats, 19,857,558; potatoes, 19,531,282; flax and hemp, 951 tons; hay, 2,105,988 tons. Butter production in 1919 was in 431 dairies, producing 164,820,000 kilos of butter.

Domestic animals in 1919:—Horses, 3 years of age, 273,271; horned cattle, 2 years of age, 1,100,486; sheep and goats, 827,791; pigs, 110,993.

More than half the country is covered with forests of pine, and the main industry is the lumber industry. The Crown forests covered (January, 1920) 12,456,123 hectares (about 33 per cent. of the area of the country). Their maintenance cost (1919) 33,250,000 marks, and the income derived from them was 65,690,000 marks. The timber stock of the Crown forests numbered 198,555,012 tree trunks. In 1918 there were 279 saw mills with 70 water motors, 407 steam, 1,170 electric, and 56 other motors. They give occupation to 19,746 workers.

Finland had, in 1918, 4,098 large factories, employing an aggregate of 82,471 workers, and yielding an aggregate product of 1,458,155,800 marks. The chief were:—

—	No. of Establishments	No. of Workers	Production Marks
Iron and mechanical works	404	16,384	254,219,100
Textiles	182	14,403	260,475,700
Wood industries	405	15,098	140,828,800
Paper	144	10,766	200,649,300
Distilleries and breweries	30	348	9,434,600
Leather	194	3,519	167,387,400
Chemicals	44	1,828	38,405,200
Graphic arts	137	3,560	40,839,800
Tobacco	18	2,990	103,562,600
Electricity, gas and water	98	1,453	34,556,500

Commerce.

Imports and exports for 5 years, in thousands of Finnish marks:—

—	1917	1918	1919	1920	1921
Imports	1,231,930	504,612	2,509,900	3,626,500	3,583,000
Exports	444,859	226,843	880,400	2,926,400	3,385,700

The foreign trade of Finland appears as follows for 3 years :—

	1919		1920		1921	
	Imports from	Exports to	Imports from	Exports to	Imports from	Exports to
Gt. Britain	676,452,640	375,803,884	1,002,789,694	1,257,595,515	709,800,000	1,144,000,000

Spinning materials	110,310,513	314,419,643	Matches	2,407,805	—

Total trade between the United Kingdom and Finland (according to Board of Trade returns) :—

	1921
Imports from Finland into U. K.	£ 7,727,822
Exports to Finland from U. K.	1,933,958

Internal Communications.

For internal communications Finland has a remarkable system of lakes connected with each other and with the Gulf of Finland by canals. The number of vessels which passed along the canals in 1919 was 47,880; the receipts from vessels, 3,340,997 marks; and expenditure, 2,259,511 marks.

On December 31, 1920, there were 2,685 miles of high roads and 2,500 miles of secondary roads.

Railway history in Finland begins in 1860, when the State built a line 66 miles long between Helsingfors and Hameenlinna. On December 31, 1920, there were 2,685 miles of railways, all but 186 miles belonging to the State. The gauge is 1·524 metres (4·9 feet). The traffic upon the State railways in 1920 was 16,783,570 passengers and 5,408,022 tons of goods. The total cost of the State railways to the end of 1919 was 650 million marks. The total revenue in 1920 was 378,408,457 marks, and the total expenditure 305,220,163 marks.

Finland had 2,525 post-offices in 1920, and revenue and expenditure were respectively 48,173,900, and 53,141,996 marks. The number of letters and postcards, 51,960,415; samples and printed packets, 9,252,776; newspapers, 124,238,080; money-orders, 1,864,779; total, 186,816,050.

There are 10,517 miles of telegraph and 3,230 miles of telephone wires belonging to the State in Finland. The telegraph system and part of the telephone system is State property.

Banking, Money, Weights, &c.

The Bank of Finland (founded in 1811) is the State Bank and the only bank of issue. Finland had in 1921, besides the State bank, 22 joint stock banks, and 979 savings banks. The paper currency of the Bank of Finland in 1921 was 1,341.1 million marks, against which the bank held a stock of gold of 42.6 million marks. The deposits of all private banks on August 31, 1921, were 2,453,371,043 marks.

In ordinary savings banks about 500,000 depositors had to their credit 946,255,006 marks; and in the Post Office savings banks 114,652 depositors had 57,820,374 marks.

The *markka* of 100 *penni* is of the value of a franc, 9½d. The standard is gold, and the markka, though not coined in gold, is the unit.

Gold coins are 20 and 10 markka pieces. They contain 2903225 grammes of fine gold to the markka. Silver coins are 2, 1, ½, and ¼ markka pieces. Nickel coins (introduced in 1921) are 1, ½, and ¼ markka pieces. Copper coins are 10, 5, and 1 penni pieces.

The paper currency is exchangeable at par against gold.

The metric system of weights and measures is universally employed in Finland.

Diplomatic Representatives.

1. OF FINLAND IN GREAT BRITAIN.

Envoy and Minister.—Ossian Donner.

Counsellor.—Marcus Tollet.

Secretary.—Hugo Valvanne.

Attaché.—Tapio Voionmaa.

Consul-General in London.—L. Norrgren.

2. OF GREAT BRITAIN IN FINLAND.

Envoy and Minister.—E. A. Rennie, M.V.O., Appointed April 30, 1921.

Secretaries.—G. A. D. Ogilvie Forbes and W. R. C. Green.

Consul at Helsingfors.—C. H. Mackie.

FIUME.

Fiume is an independent State created by the Treaty of Rapallo, signed on November 12, 1920, between Italy and the Kingdom of the Serbs, Croats and Slovenes. By Article 4 of the Treaty the contracting Powers recognise the independence of Fiume in perpetuity. The Treaty has been duly ratified, and the ratifications were exchanged in February, 1921.

The Treaty of London of April 26, 1915, granted Italy a large area of continental Dalmatia. Difficulties arose between the Italians and the Yugo-Slavs as to Italy's share, and the difficulties were complicated by the action of the poet D'Annunzio in seizing Fiume on September 12, 1919, and annexing it to Italy. The difficulties were, however, solved by the Treaty of Rapallo.

On June 5, 1921, a further agreement was arrived at between the Free City, Italy and Yugo-Slavia in reference to the Port of Fiume, which includes the Port of Barro, according to which equal rights are granted to the three parties concerned.

During the year 1921, and down to March, 1922, there has been a good deal of unrest in the new State, and though a Constituent Assembly met in October, a settled government has not yet been established (March, 1922).

Head of the Provisional Government (March 15, 1922).—Lieut. Cabruna.

The area of the new State is given as 8 sq. miles, and the population as 49,806.

By Article 5 of the Treaty of Rapallo, it is provided that the area of Fiume shall be delimited by a special commission composed half of Italian and half of Yugo-Slav delegates.

British Consul at Fiume.—W. J. Holmes.

FRANCE.

Constitution and Government.

CENTRAL.

SINCE the overthrow of Napoleon III. on September 4, 1870, France has been under a Republican form of government, confirmed on February 25, and July 16, 1875, by a constitutional law, which has been partially modified in June, 1879, August, 1884, June, 1885, and July, 1889. It vests the legislative power in the Chamber of Deputies and the Senate, and the executive in the President of the Republic and the Ministry.

The President is elected for seven years, by an absolute majority of votes, by the Senate and Chamber of Deputies united in a National Assembly, or Congress. He promulgates the laws voted by both Chambers, and ensures their execution. He selects a Ministry from the two Chambers, but may, and sometimes does, choose ministers who are not members of either Chamber (*e.g.* a general as Minister for War, an admiral as Minister of Marine, a civilian as Minister for Foreign Affairs); he appoints to all civil and military posts, has the right of individual pardon, and is responsible only in case of high treason. The President concludes treaties with foreign Powers, but treaties which affect the area of France or of French colonies must be approved by the Legislature, and he cannot declare war without the previous assent of both Chambers. Every act of the President has to be countersigned by a Minister. With the consent of the Senate he can dissolve the Chamber of Deputies. In case of vacancy, the two Chambers united immediately elect a new President.

President of the Republic.—Alexandre Millerand; born February 10, 1859; elected September 23, 1920.

The Ministers or Secretaries of State, the number of whom varies, are usually, but not necessarily, members of the Senate or Chamber of Deputies. The President of the Council (Premier) chooses his colleagues in concert with the President of the Republic. Each Minister has the direction of one of the great administrative departments and each is responsible to the Chambers for his acts, while the Ministry as a whole is responsible for the general policy of the Government.

The Ministry consists of the following members, appointed January 15, 1922:—

Prime Minister and Minister of Foreign Affairs.—M. Raymond Poincaré (Deputy).

Deputy Prime Minister and Minister of Justice.—M. L. Barthou (Deputy).

Minister of the Interior.—M. Maurice Maunoury.

Minister of War.—M. Maginot.

Minister of Marine.—M. Raiberti.

Minister of Finance.—M. de Lasteyrie.

Minister of Colonies.—M. Albert Sarraut (Deputy).

Minister of Public Instruction and of Fine Arts.—M. Léon Bérard (Deputy).

Minister of Public Works.—M. Y. Le Troquer (Deputy).

Minister of Commerce.—M. L. Diot (Deputy).

Minister of Agriculture.—M. Chéron.

Minister of Labour.—M. Peyronnet.

Minister of the Liberated Territories.—M. Reibel.

Minister of Hygiene, of Assistance, and of Social Provision.—M. Paul Strauss (Deputy).

The following is a list of the Sovereigns and Governments of France, from the accession of the House of Bourbon :—

<i>House of Bourbon.</i>		<i>Second Republic.</i>	
Henri IV.	1589-1610	Provisional Government, Feb—Dec.	1848
Louis XIII., 'le Juste'	1610-1643	Louis Napoléon	1848-1852
Louis XIV., 'le Grand'	1643-1715		
Louis XV.	1715-1774	<i>Second Empire.</i>	
Louis XVI. (died 1793)	1774-1792	Napoléon III. (died 1873)	1852-1870
<i>First Republic.</i>		<i>Third Republic.</i>	
Convention.	1792-1795	Government of National Defence	1870-1871
Directory	1795-1799	Adolphe Thiers, President.	1871-1873
Consulate	1799-1804	Marshal MacMahon	1873-1879
		F. J. P. Jules Grévy	1879-1887
		F. Sadi Carnot	1887-1894
		Casimir Perier (June—Jan.)	1894-1895
<i>First Empire.</i>		Félix Faure	1895-1899
Napoléon I. (died 1821)	1804-1814	Émile Loubet	1899-1906
<i>House of Bourbon restored.</i>		Armand Fallières	1906-1913
Louis XVIII.	1814-1824	Raymond Poincaré	1913-1920
Charles X. (died 1836)	1824-1830	Paul Deschanel	1920
<i>House of Bourbon-Orléans.</i>		Alexandre Millerand	1920
Louis-Philippe (died 1850)	1830-1848		

The Chamber of Deputies is elected for four years, by manhood suffrage, and each citizen 21 years old, not actually in military service, who can prove a six months' residence in any one town or commune, and not otherwise disqualified, has the right of vote. Deputies must be citizens and not under 25 years of age. The manner of election of Deputies has been modified several times since 1871. The *scrutin de liste*, under which each elector votes for as many Deputies as the entire department has to elect, was introduced in 1871. In 1876 it was replaced by the *scrutin d'arrondissement*, under which each department is divided into a number of *arrondissements*, each elector voting for one Deputy only; in 1885 there was a return to the *scrutin de liste*, in 1889 the uninominal vote was reintroduced; and in 1919 the *scrutin de liste*, with proportional representation, was again adopted. In 1889 it was enacted that each candidate is bound to make, within the fortnight which precedes the elections, a declaration as to his being a candidate for a given constituency, and for one constituency only—all votes which eventually may be given for him in other constituencies being reckoned as void. The Chamber verifies the powers of its members. In each constituency the votes are cast up and the Deputy proclaimed elected by a commission of Councillors-General appointed by the prefect of the department. The Chamber is now composed of 610 Deputies.

Chamber of Deputies, elected November 16, 1919 :—Republicans of the Left, 139; Progressives, 130; Socialist Radicals, 83; Action Libérale, 72; Unified Socialists, 68; Radicals, 60; Conservatives, 31; Republican Socialists, 27; Dissident Socialists, 6.

The Senate is composed of 314 members, elected for nine years from citizens 40 years old, one-third retiring every three years. The election of the Senators is indirect, and is made by an electoral body composed (1) of delegates chosen by the Municipal Council of each commune in proportion to the population; and (2) of the Deputies, Councillors-General, and District Councillors of the department. Besides the 225 Departmental Senators elected in this way, there were, according to the law of 1875, 75 Senators elected for life by the united two Chambers; but by the Senate Bill of 1884 it was enacted that vacancies arising

among the Life Senatorships would be filled by the election of ordinary nine-years Senators, the department which should have the right to the vacant seat to be determined by lot. The Princes of deposed dynasties are precluded from sitting in either House.

Senate, elected on January 11, 1920: Radicals, 120; Republicans of the Left, 58; Progressives, 23; Conservatives, 20; Liberal Republicans, 14; Socialist Republicans, 2; Unified Socialists, 2.

The Senate and Chamber of Deputies assemble every year on the second Tuesday in January, unless a previous summons is made by the President of the Republic, and they must remain in session at least five months out of the twelve. The President is bound to convoke them if the demand is made by one-half of the number of members composing each Chamber. The President can adjourn the Chambers, but the adjournment cannot exceed the term of a month, nor occur more than twice in the same session.

Bills may be presented either in the Chamber or Senate by the Government, or on the initiative of private members. In the first case they are remitted to the bureaux for examination; in the second, they are first submitted to a commission of parliamentary initiative. Financial laws must be first presented to and voted by the Chamber of Deputies.

The Senate, constituted as a High Court of Justice, tries cases of attempt against the safety of the State or of plotting to change the form of government.

Senators and Deputies are paid 27,000 francs (1,080%) a year and the Presidents of the two Chambers receive allowances for the expense of entertainment. Members of both Chambers travel free on all railways by means of a small annual payment. The dotation of the President of the Republic is 1,200,000 francs (48,000%), with a further allowance of 1,200,000 francs for his expenses. On January 1, 1905, a fund was instituted for pensions to ex-Deputies, or their widows and orphans. It is supported by contributions from Deputies (deducted from their pay) as well as by gifts and legacies.

France has, besides, a special institution under the name of *Conseil d'Etat*, which was introduced by Napoleon I., and has been maintained since. It is presided over by the Minister of Justice or (in his absence) by a vice-president, and is composed of Councillors, Masters of Requests (*Maitres des Requêtes*), and Auditors, all appointed by the President of the Republic. Its duty is to give opinion upon such questions, chiefly those connected with administration, as may be submitted to it by the Government. It is judge in the last resort in administrative suits, and it prepares the rules for the public administration.

II. LOCAL GOVERNMENT.

For administrative purposes France is divided into 90 departments including the 'territory of Belfort' (remnant of the department of Haut-Rhin). Since 1881 the three departments of Algeria are also treated for most purposes, as part of France proper. The department has representatives of all the Ministries, and is placed under a Prefect, nominated by Government, and having wide and undefined functions. He is assisted by a Prefecture Council, an administrative body, whose advice he may take without being bound to follow it. The Prefect is a representative of the Executive, and, as such, supervises the execution of the laws, issues police regulations, supplies information on matters which concern the depart-

ment, nominates subordinate officials, and has under his control all officials of the State. There is a Sub-Prefect in every *arrondissement*, except in those containing the capitals of departments and the department of the Seine.

The unit of local government is the *commune*, the size and population of which vary very much. There were, in 1921, in the 90 departments into which France was divided, 37,963 communes. Most of them (33,986) have less than 1,500 inhabitants, and 22,024 have even less than 500; while 140 communes only have more than 20,000 inhabitants. The local affairs of the commune are under a Municipal Council, composed of from 10 to 36 members, elected by universal suffrage, and by the *scrutin de liste* for 4 years by Frenchmen after 21 years and 6 months' residence; but each act of the Council must receive the approval of the Prefect, while many must be submitted to the Council General or even to the President of the Republic, before becoming lawful. Even the commune's quota of direct taxation is settled by persons (*répartiteurs*) chosen by the Prefect from among the lists of candidates drawn up by the Municipal Council.

Each Municipal Council elects a Mayor, who is both the representative of the commune and the agent of the central government. He is the head of the local police and, with his assistants, acts under the orders of the Prefect.

In Paris the Municipal Council is composed of 80 members; each of the 20 *arrondissements* into which the city is subdivided has its own Mayor. The place of the Mayor of Paris is taken by the Prefect of the Seine, and, in part, by the Prefect of Police. Lyons has an elected Mayor, but the control of the police is vested in the Prefect of the department of the Rhone.

The next unit is the *canton* (2,915 in France before 1914), which is composed of an average of 12 communes, although some of the largest communes are, on the contrary, divided into several cantons. It is a seat of a justice of the peace (*juge de paix*), but is not an administrative unit.

The district, or *arrondissement* (385 in France), has an elected *conseil d'arrondissement*, with as many members as there are cantons, its chief function being to allot among the communes their respective parts in the direct taxes assigned to each *arrondissement* by the Council General. That body stands under the control of the Sub-Prefect. A varying number of *arrondissements* form a department, which has its *conseil général* renewed by universal suffrage to the extent of one-half every three years (one Councillor for each canton). These *conseils* deliberate upon all economical affairs of the department, the repartition of the direct taxes among the *arrondissements*, the roads, normal schools, and undertakings for the relief of the poor. Their decisions are controlled by the Prefect, and may be annulled by the President of the Republic.

Area and Population.

I. PROGRESS AND PRESENT CONDITION.

The legal population at the date of the last two enumerations was:—

Departments.	Area : Engl. sq. miles	Population		Population per square mile. 1921
		March, 1911	March, 1921	
Ain	2,248	342,482	315,757	140·5
Aisne	2,866	530,226	421,515	147·1

According to the Peace Treaty with Germany (June 28, 1919) Alsace-Lorraine has been transferred to France, to date from the Armistice of November 11, 1918. The districts of Lower Alsace, Upper Alsace and Lorraine have become the departments of Bas-Rhin (1,848 square miles and population 651,586); Haut-Rhin (1,354 square miles, population 468,943), and Moselle (2,403 square miles, population 589,120).

Total area added to France is 5,605 square miles, population (1921)

1,709,749. Thus the total area of France is 212,659 square miles and population 39,209,766.

According to the Treaty of Versailles (article 45), France obtained from Germany as a compensation for the destruction of the coal mines in the North of France, the exclusive rights of exploitation of the coal mines situated in the Saar Basin. The area of this district is about 751 square miles, and the population 657,870. For the next 15 years the Saar Basin will be governed by a Commission of Five, chosen by the League of Nations. At the end of 15 years the population will decide by vote one of three alternatives, viz., the maintenance of the rule set up by the Treaty, union with France, or union with Germany.

Between the years 1811 and 1820 the average annual surplus of births over deaths was 5·7 per thousand of population; between 1851 and 1860 it was 2·4; and between 1881 and 1885 it was 1·6. The average number of births per marriage was (1881-85) about 3; in 1891 it was 2·1.

In the following table, the third, fourth, and fifth columns give [in brackets] for the first five censuses the population, its density, and its average annual increase of France, excluding Alsace-Lorraine, and are thus comparable with the data for the censuses posterior to the loss of Alsace and Lorraine (1872-1911).

Dates	Area: sq. miles	Domiciled Population	Inhabitants per sq. mile	Annual Increase per 10,000 inhabits.

¹ Decrease.

In 1911, the foreign nationalities most numerously represented were: English, 40,378; Belgians, 287,126; Germans, 102,271; Austrians, 14,681; Swiss, 73,422; Italians, 419,234; Spaniards, 105,760; Russians, 35,016; total, 1,159,835. Total number of foreigners in 1921: 1,550,449.

The active population of 1911 was returned under the following occupations: Fisheries, 55,000; agriculture and forestry, 8,517,000; mines and quarries, 246,000; manufacturing industries, 5,746,000; transport, &c., 1,543,000; commerce, 2,053,000; liberal professions, 550,000; domestic service, &c., 929,000; public service (including the army), 1,292,000; total, 20,931,000, of whom 7,719,000 were of the female sex.

II. MOVEMENT OF THE POPULATION.

Births, Deaths, and Marriages.

Year	Marriages	Living Births	Deaths	Surplus of Births over Deaths	Still-born
1913 ^a	312,036	790,355	731,441	+ 58,914	35,987

¹ Figures for 77 departments only. ^a Figures for whole of France (90 departments).

In 1913 the average birth rate for all France (living births) was 1·91 per cent. of population, and in 1920, 2·13 per cent.

The number of divorces was 15,450 in 1913, and 29,156 in 1920.

III. PRINCIPAL TOWNS.

The following towns, according to the census of 1921, have each a total population over 50,000 :—

Paris . . . 2,906,472	Angers . . . 86,158	Boulogne-sur-

Mulhouse . . 99,226	Le Mans . . . 71,783	St. Ouen . . . 50,848
Amiens . . . 92,780	Orléans . . . 69,048	Clichy . . . 50,165
Limoges . . . 90,187		

On March 5, 1911, the urban population was 17,508,940, and rural 22,093,318.

For fiscal and electoral purposes the population of each commune is divided into *agglomerated*, *scattered*, and *separated* (*comptée à part*); the first two constitute the municipal population, and the third consists of garrison, college, prison, and hospital population. Different from this is the distinction between urban and rural population, a commune being urban where the agglomerated population is over 2,000, and rural where under 2,000.

Religion.

No religion is recognised by the State.

Under the law promulgated on December 9, 1905, the Churches were separated from the State, the adherents of all creeds were authorised to form associations for public worship (*associations cultuelles*). As transitory measures, ecclesiastics over 45 years of age and of over 25 years of service remunerated by the State were entitled to a pension, and all other ecclesiastics were to receive a grant during a period of from four to eight years. All buildings actually used for public worship and as dwellings in that connection were to be made over, after an inventory was taken, to the associations for public worship: the places of worship for the total period of the existence of these associations, the ecclesiastical dwellings for a time.

The law of January 2, 1907, provides (among other things) that, failing *associations cultuelles*, the buildings for public worship, together with their furniture, will continue at the disposition of the ministers of religion and the worshippers for the exercise of their religion; but, in each case, there is required an administrative act drawn up by the *prefet* as regards buildings belonging to the State or the Departments, and by the *maire* as regards buildings belonging to the Communes. Forms of the documents necessary under the new law have been supplied by the Government.

There are 17 archbishops and 68 bishops of the Roman Catholic Church in France, not including Alsace and Lorraine, Algeria or the colonies, in addition to 51,000 clergy of various grades. The Protestants of the Augsburg Confession are, in their religious affairs, governed by a General Consistory, while the Reformed Church is under a Council of Administration, the seat of which is at Paris. There are about a million Protestants in France.

The Associations law, passed July 1, 1901, requires religious communities to be authorised by the State, and no monastic association can be authorised without a special law in each particular case. Before the passing of that law there were 910 recognised associations, and 753 not recognised; the establishments, mostly not recognised, numbered 19,514, and their members 159,628 (30,136 men and 129,492 women). After the passing of the law, of the 753 associations not recognised, 305 dissolved themselves and 448 asked for authorisation, which was refused by the Chambers to the majority of them.

Instruction.

The Minister of Instruction, seconded by the Government educational bureaux and inspectors-general, directs public and controls private schools. The public schools constitute the University of France and are divided into three classes, primary, secondary, and superior. The Superior Council of 52 members has deliberative, administrative, and judiciary functions, and a Consultative Committee advises respecting the working of the school system, but the inspectors-general are in direct communication with the Minister. For local educational administration France is divided into 17 circumscriptions, called Academies, each of which has an Academic Council whose members comprise a certain number elected by the professors or teachers. The Academic Councils deal with all grades of instruction. Each is under a Rector, and each is provided with academy inspectors, one for each department except Nord which has two (one being for primary instruction), and Seine which has eight (one being director of primary instruction), besides primary inspectors of schools, usually one for each *arrondissement*, 20 inspectors (male or female) for the department of

the Seine. Each department has a council for primary educational matters, the prefect being president, and this body has large powers with respect to the inspection, management and maintenance of schools and the opening of free schools.

The law of August 9, 1879, rendered obligatory for each department the maintenance of two primary normal schools, one for school-masters, the other for school-mistresses; there are two higher normal schools of primary instruction: one at Fontenay-aux-Roses for professors for normal schools for school-mistresses, the other at St. Cloud for professors for normal schools for school-masters. The law of June 16, 1881, made instruction absolutely free in all primary public schools; that of March 28, 1882, rendered it obligatory for all children from 6 completed to 13 years of age. The law of October 30, 1886, is the organic law of primary instruction now in force; it established that teachers should be lay; for infant schools it substituted *écoles maternelles* instead of *salles d'asile*; it fixed the programmes of instruction, and established freedom of private schools under the supervision of the school authorities.

The following table shows the condition of primary instruction in 1918-19 and 1919-20:—

Description of Schools	France and Algeria (excluding Alsace-Lorraine)					
	1918-19			1919-20		
	Schools	Teachers	Enrolled Pupils	Schools	Teachers	Enrolled Pupils
<i>Infant Schools:</i>						
Public	2,078	4,942	195,071	2,063	5,242	189,762
Private	855	1,069	46,079	786	999	37,394
Total	2,933	6,011	241,150	2,849	6,241	227,156
<i>Primary and Higher schools:</i>						
Lay	56,278	99,468	3,066,956	56,503	102,433	3,002,666
Clerical	11,740		825,825	11,512		833,150
Total	68,018	99,468	3,892,781	68,015	102,433	3,835,816

Courses of instruction for adults are conducted in the evening by teachers in their schools.

In 1914, 2·3 per cent. of the conscripts could neither read nor write, as compared with 2·7 per cent. in 1912.

The number of primary normal schools (exclusive of Fontenay and St. Cloud) is 84 for school-masters, and 82 for school-mistresses (France and Algeria). The number of pupil-teachers in primary normal schools in 1919-20 was 4,617 men and 5,135 women.

Secondary Instruction: Boys.—Secondary instruction is supplied in two types of schools—by the State in the lycées, and by the communes in the colleges, by associations and by private individuals in free establishments (*écoles libres*). The course of study extends over 7 years, 4 in the first cycle, and 3 in the second, with four different courses of study; 1, Latin, Greek; 2, Latin, sciences; 3, Latin, living languages; 4, sciences, living languages.

The number of public secondary schools for boys and the number of pupils for 3 years were as follows :—

Public Institutions : France and Algeria	1917 ¹		1918 ¹		1919 ²	
	No.	Pupils	No.	Pupils	No.	Pupils
<i>Lycées</i>	104	59,128	—	54,258	—	67,728
Communal colleges .	211	31,418	—	29,844	—	32,492

¹ Not including the invaded territories.

² Excluding Alsace and Lorraine.

Girls.—The following table shows the condition of the institutions for girls :

Institutions	1917 ¹		1918 ¹		1919 ²	
	No.	Pupils	No.	Pupils	No.	Pupils
<i>Lycées</i> (France) .	127	21,446	125	21,611	55	25,358
Colleges (France and Algeria) .		11,565		11,291	85	13,916
Secondary courses (France and Algeria) .	47	5,520	49	5,414	49	5,694
Total . . .	174	38,531	174	38,316	189	45,168

¹ Not including invaded territories.

² Not including Alsace and Lorraine.

Higher Instruction is supplied by the State in the universities and in special schools, and by private individuals in the private faculties and schools. The freedom of higher instruction was established by the law of July 12, 1875, modified by that of March 18, 1880, which reserved to the State faculties the exclusive right to confer degrees. A decree of December 28, 1885, created a general council of the faculties, and the creation of universities, each consisting of several faculties, was accomplished in 1897, in virtue of the law of July 10, 1896.

There are 16 Universities in France. The following table shows the year of foundation and the total number of students on July 31, 1919 :—

Universities	Students	Universities	Students
Aix-en-Provence (1409) . . .	1179	Lyon (1808) . . .	2,593
Besançon (1485) . . .	346	Montpellier (1125) . . .	2,221
Bordeaux (1441) . . .	2241	Nancy (1572) . . .	650
Caen (1432) . . .	570	Paris (1150) . . .	11,026
Clermont-Ferrand (180-) . . .	571	Poitiers (1431) . . .	687
Dijon (1722) . . .	686	Rennes (1735) . . .	939
Grenoble (1339) . . .	1724	Strasbourg (1567) . . .	1,122
Lille (1530) . . .	739	Toulouse (1230) . . .	1,704

The faculties are of four kinds : 15 faculties of Law (Paris, Aix, Bordeaux, Caen, Dijon, Grenoble, Lille, Lyon, Montpellier, Nancy, Poitiers, Rennes, Strasbourg, Toulouse, and Algiers) ; 9 faculties of Medicine (Paris, Montpellier, Bordeaux, Lille, Lyon, Toulouse, Nancy, Strasbourg, and Algiers) ; 17 faculties of Science (Paris, Besançon, Bordeaux, Caen, Clermont, Dijon, Grenoble, Lille, Lyon, Marseille, Montpellier, Nancy, Poitiers, Rennes, Toulouse, Strasbourg, and Algiers) ; 17 faculties of letters (at the towns last named) ; 8 higher pharmacy schools and mixed faculties of medicine

and pharmacy; 15 schools with full functions and preparatory schools of medicine and pharmacy.

The following statement shows the number of students by faculties or schools in January, for 3 years (excluding the students of the University of Strasbourg in 1919 :—

Students of	1919	1920	1921
	State Institutions	State Institutions	State Institutions
Law	7,735	13,948	17,376
Medicine	6,542	11,990	11,344
Sciences	5,979	10,517	10,918
Letters	6,339	6,355	7,892
Pharmacy	1,215	2,128	2,197
Schools of Medicine and Pharmacy	2,080	—	—
Total	29,890	44,938	49,931

There are free faculties: at Paris (the Catholic Institute of Paris comprising the law and advanced scientific and literary studies); Angers (theology, law, sciences, letters, agriculture); Lille (theology, law, medicine and pharmacy, sciences, letters, social sciences and politics); Lyon (theology, law, sciences, letters); Marseille (law); Toulouse (the Catholic Institute with theological, literary, and scientific instruction). There is, besides, in Paris a large institution for free higher instruction, the *École libre des Sciences Politiques*.

The State faculties confer the degrees of bachelor, of licentiate, and of doctor. Admission to degrees (*agréations*) is by special competition, which lead to the title of *professeur* in secondary and in higher instruction.

The other higher institutions dependent on the Ministry of Public Instruction are the *Collège de France* (founded by Francis I. in 1530), which has courses of study bearing on various subjects, literature and language, archæology, mathematical, natural, mental and social science (political economy, &c.); the Museum of Natural History giving instruction in the sciences and nature; the *École Pratique des Hautes Études* (history and philology, mathematical and physico-chemical sciences, and the sciences of nature and of religion), having its seat at the Sorbonne; the *École Normale Supérieure*, which prepares teachers for secondary instruction and, since 1904, follows the curricula of the Sorbonne without special teachers of its own; the *École des Chartes*, which trains the archivist paleographers; the *École des Langues Orientales vivantes*; the *École du Louvre*, devoted to art and archæology; the *École des Beaux-Arts*, and the Bureau des Longitudes, the Central Meteorological Bureau; the Observatoire of Paris; and the French Schools at Athens, Rome, Cairo and Indo-China, besides a school for Morocco.

Outside Paris there are eight observatories (Meudon, Besançon, Bordeaux, &c.). The observatory at Nice is dependent on the Academy of Sciences.

Professional and Technical Instruction.—The principal institutions of higher or technical instruction dependent on other ministries are: the *Conservatoire des Arts et Métiers* at Paris (with 20 evening courses on the applied sciences and social economy), the *École Centrale des Arts et Manufactures*, the *École des Hautes Études Commerciales*, 12 higher schools of commerce with about 1,300 pupils, dependent on the Ministry of Commerce;

the National Agronomic Institute at Paris, the Veterinary school at Alfort, a school of forestry at Nancy, national agricultural schools at Grignon, Rennes, Montpellier, 46 practical schools of Agriculture, &c., dependent on the Ministry of Agriculture; the École Polytechnique, the École Supérieure de Guerre, the military school at St. Cyr, the École de Cavalerie at Saumur, and other schools dependent on the Ministry of War; the Naval School at Brest dependent on the Ministry of Marine; the School of Mines at Paris, the School of Bridges and Roads at Paris, with other schools dependent on the Ministry of Public Works; the School of Mines at St. Etienne, and the Schools of Miners at Alais and Douai; the École Coloniale at Paris, dependent on the Ministry of the Colonies. The École des Beaux Arts, the École Nationale des Arts Décoratifs, and the Conservatoire de Musique et de Déclamation depend on the department of the Under Secretary for the Fine Arts, which is attached to the Ministry of Public Instruction. In the provinces there are National schools of fine arts, and schools of music, and also several municipal schools as well as free subventioned schools, etc.

Technical schools of a somewhat lower grade (dependent on the Ministry of Public Instruction) are very numerous, comprising (in 1913—the latest available figures) six national schools of arts and trades (Aix, Angers, Chalons, Cluny, Lille, Paris), two schools of horology, four national professional schools, 56 practical schools of commerce and industry (of which 14 are for girls), 17 practical schools of industry; there are also 35 schools of industries, with 5,550 pupils; 13 municipal professional schools in Paris, with 1,385 pupils, and about 370 private schools, with 92,000 pupils.

Justice and Crime.

The Courts of lowest jurisdiction in France are those of the Justices of Peace (*juges de paix*, one in each *canton*) who try small civil cases and act also as judges of Police Courts, where all petty offences (*contraventions*) are disposed of. The Correctional Courts pronounce upon all graver offences (*délits*), including cases involving imprisonment up to 5 years. They have no jury, and consist of 3 judges belonging to the civil tribunals of first instance. In all cases of a *délit* or a *crime* the preliminary inquiry is made in secrecy by an examining magistrate (*juge d'instruction*), who may either dismiss the case or send it for trial before a court where a public prosecutor (*Procureur*) endeavours to prove the charge. The Court of Assizes is assisted by 12 jurors, who decide by simple majority on the fact with respect to offences amounting to crimes. The highest courts are the 26 Courts of Appeal, composed each of one President and a variable number of members, for all criminal cases which have been tried without a jury; and one Court of Cassation which sits at Paris, for all criminal cases tried by jury, so far as regards matters of law.

For civil cases, wherein the amount in dispute is between 200 and 1,500 francs, there is, in each *arrondissement*, a tribunal of first instance; above these are the Appeal Courts and the Court of Cassation. For commercial cases there are, in 226 towns, Tribunals of Commerce and Councils of experts (*prud'hommes*). In the towns are police courts.

All Judges are nominated by the President of the Republic. They can be removed only by a decision of the Court of Cassation constituted as the *Conseil Supérieur* of the magistracy.

The French penal institutions consist, first, of Houses of Arrest (3,371 *chambres de sûreté* and *dépôts de sûreté* in 1912). Next come Departmental Prisons (66 in 1912), also styled *maisons d'arrêt, de justice* and *de correction*, where both persons awaiting trial and those condemned to less than one year's imprisonment are kept, as also a number of boys and girls transferred

from, or going to be transferred to, reformatories. The reformatories are 14 for boys and 7 for girls, 10 for boys and 3 for girls being public, and 4 for boys and 4 for girls being private. The Central Prisons (*maisons de force et de correction*), where all prisoners condemned to more than one year's imprisonment are kept, provided with large industrial establishments for the work of prisoners, are 9 for men and 2 for women.

All persons condemned to hard labour and many condemned to 'reclusion' are sent to New Caledonia or Guiana (military and *récidivistes*); the *dépôt de forçats* of St. Martin-de-Ré is a *dépôt* for transferred hard-labour convicts.

Pauperism and Relief of Old Age.

In France the poor are assisted partly through public '*bureaux de bienfaisance*' and partly by private and ecclesiastical charity. They are partly under the care of the communes and partly of the departments, both of which contribute, and ultimately under the supervision of Government. The funds of the '*bureaux de bienfaisance*' are partly derived from endowments, partly from communal contributions, and partly from public and private charity. In 1913, the bureaux expended 41,651,000 francs and assisted 903,917 persons. Public assistance is rendered to poor or destitute children. At the end of 1913 the institutions for this purpose contained 212,186 children; the expenditure during the year amounted to 43,432,649 francs. In 1913 the hospitals for the sick, infirm, aged, or infants, numbered 1,722; and at the end of the year had 741,705 patients, besides 100,239 aged and infirm inmates; their expenditure for 1913 amounted to 198,548,406 francs. In the same year 945,043 persons received gratuitous medical assistance at home and 145,500 in hospitals, the expenditure for such purposes amounting to 28,097,418 francs. At the end of 1913 the asylums for imbeciles, national, departmental, and private, had 77,013 patients.

An Act was passed in 1905 for the relief of the aged poor, the infirm, and the permanently incurable, age limit, 70; but by the amendment of the Act, April 5, 1910, this was reduced to 65. The same amendment provided for limited help being given to those between the ages of 65 and 70. On December 31, 1913, there were 100,529 such persons in receipt of the limited assistance, the total expenditure for 1913 having been 8,007,595 francs. The Act of 1910 provided that the cost of the scheme should be borne by the communes, the departments, and the State. The number of persons registered for relief has risen from 511,446 on December 31, 1908, to 599,061 on December 31, 1911, and to 592,530 on December 31, 1913. The cost to the State alone for 1910 was 45,000,000 francs; for 1911, 46,300,000 francs; and for 1913, 49,145,270 francs. In addition, contributions of the departments and communes totalled 48,500,000 francs in 1911, and 53,100,000 francs in 1912; but it has to be remembered that the increased expenditure under this law is in part balanced by the diminished activities of the '*bureaux de bienfaisance*' in assisting invalids under 60 years of age. The Old-Age Pensions Law of April 5, 1910, as amended on February 27, 1912, provides for all wage-earners old-age pensions towards which both employers and workers contribute. Contributions are to be paid up to the 60th year of the worker's life, and the State will contribute 100 francs. This sum will be increased by one-tenth for every insured worker who has brought up 3 children of the age of 16. On December 31, 1918, 10,475,272 persons were registered under the scheme.

A law of March 24, 1873, provides protection for new-born infants. In 1913 in 82 departments there were 77,829 such infants who came within the scope of the law. In 1913 two further laws were introduced: that of June 17 to give relief, varying from 0.50 to 1.50 francs per day, to women

in confinement, and that of July 14 to give relief to families with numerous children. The rate is between 60 and 90 francs for every child beyond the third.

Finance.

I. STATE FINANCE.

The following figures do not include the *budget sur ressources spéciales*, and represent the actual verified revenue (inclusive of loans) and expenditure for 6 years :—

Years	Receipts	Expenditure	Years	Revenue	Expenditure
	Francs	Francs		Francs	Francs
1910	4,273,890,789	4,321,918,609	1918 ¹	10,064,657,897	9,966,664,778
1912	4,857,491,192	4,742,756,094	1919	11,300,000,000	49,793,884,586
1913	5,091,744,959	5,066,931,220	1920	21,770,243,181	29,882,700,000

¹ Exclusive of war expenditure.

The accounts of revenue and expenditure of the Government officials are examined by a special administrative tribunal (*Cour des Comptes*), instituted in 1807.

From 1914 to 1917 there were no annual budgets, the financial requirements of the country being provided for by votes of credit. For 1918, 1919, and 1920 budgets were introduced. The following table gives details of the votes of credit and of the budget estimates :—

Year	Military and special Expenditure	Expenditure on the debt	Other Expenditure	Total
	Francs	Francs	Francs	Francs
1914 ¹	6,400,925,761	59,626,763	128,881,725	6,589,434,249
1915	13,455,406,750	1,899,393,673	2,449,686,102	22,804,486,525
1916	27,240,404,259	3,333,015,879	2,371,725,031	32,945,145,169
1917	34,065,809,126	4,862,586,400	2,759,104,103	41,679,599,629
1918	44,047,748,089	7,087,677,888	3,401,679,123	54,537,105,100
1919	36,675,781,168	7,986,808,071	5,131,295,347	49,793,884,586
Total	166,886,075,153	25,230,208,674	16,233,371,431	208,349,655,258

¹ August to December.

Budget estimates in millions of francs for the years 1921 and 1922 (exclusive of loans) :—

REVENUE (Millions of Francs).

	1921.	1922

The French National debt has grown from 28·5 millions sterling in 1800 to 50·9 millions in 1815, 236·5 millions in 1848, 498 millions in 1871, 1,302 millions in 1912, (32,557,899,787 francs); 1,367 millions on July 31, 1914, (34,188,147,969 francs); 5,898 millions on January 1, 1919, (147,472,421,289 francs); 9,609 millions on January 1, 1920 (240,242,109,503 francs); and 12,060 millions on May 31, 1921 (301,510,147,177 francs).

On September 30, 1920, and on May 31, 1921, the debt of France stood as follows (in millions of francs) :—

	Sept. 30, 1920	May 31, 1921
	Millions of Francs	Millions of Francs
1. Internal Debt :—		
3 per cent. Rentes	19,742	19,742
5 per cent. Rentes	24,924	20,244
4 per cent. Rentes, 1917	12,641	9,709
4 per cent. Rentes, 1918	29,990	22,458
6 per cent. Rentes, 1920	—	27,700
Amortizable 5 per cent. rentes	16,150	15,819
Amortizable 3 per cent. rentes	2,989	2,940
Amortizable 3½ per cent. rentes	23	3
National Defence Obligations	933	580
Other debts of the Ministry of Finance	1,457	9,386
Total of debt of Ministry of Finance	116,848	128,581
Debts of other Ministries	5,147	5,206
Total of fixed debts	121,995	133,787
Total of floating debt	81,257	92,559
Total Internal debt	203,252	226,346
2. External Debt :—		
Fixed debt	49,796	44,604
Floating debt	33,476	30,560
Total external debt	88,272	75,164
Grand Total	286,524	301,510

The Foreign Debt on May 31, 1921, was made up as follows :—

		Amount 1,000,000 francs	Annual Interest 1,000,000 francs
1. Fixed Debt.			
Advanced by U.S.A. Treasury	2,950,762,000 dollars	35,867	1,793.3
Anglo-French loan in U.S.A.	200,000,000 "	2,510	138.4
Loan of the City of Paris in U.S.A. . .	47,587,000 "	578	34.7
Loans of Bordeaux, Lyons and Marseilles in U.S.A.	17,806,700 "	217	13.0
Japanese loan	100,000,000 yen	570	37.1
American Loan secured by American Stock	400,000,000 dollars	4,802	243.1
Total		44,604	2,309.6
2. Floating Debt.			
Treasury Bills deposited in English Treasury	535,730,000L	25,206	1,512.4
Treasury Bills deposited in Bank of England	65,000,000L	3,058	214.1
Treasury Bills sold in U.S.A.	21,630,000 dollars	263	16.4
Treasury Bills sold in Japan	30,000,000 yen	171	10.3
Total Treasury Bills		28,698	1,753.2
3. Bank Credits.			
Spain	496,507,500 pesetas	783	44.3
Sweden	50,000,000 kroner	143	11.4
Norway	46,400,000 "	99	7.9
Argentina	43,650,000 pesos	164	9.0
Switzerland	46,400,000 francs	98	6.6
Holland	55,000,000 florins	229	11.4
England	9,897,400L	466	27.9
Uruguay	15,000,000 piastres	122	6.1
Total of Bank Credits		1,862	105.3
Total Floating Debt		30,560	1,858.5
Total Foreign Debt		75,104	4,168.1

The total annual debt charge on May 31, 1921, was 13,759 million francs, not including the floating debt.

France has advanced to the Allied Governments (up to June 30, 1921) a total of 14,082 million francs, of which the principal items are as follows (in millions of francs): Belgium, 3,027; Serbia, 1,554; Poland, 1,082; Czecho-Slovakia, 552; Russia, 5,755; Greece, 911; Rumania, 1,103.

The public fortune of France was estimated in 1912 (latest available date) to amount to 304,517 million francs.

II. LOCAL FINANCE.

For 1915 the revenue of the departments of France, excluding a balance of 131,018,505 francs from 1914, amounted to 551,313,501 francs (22,052,540L.), and the expenditure to 515,209,966 francs (20,608,398L.). The departmental debt stood at 1,157,952,504 francs (46,318,100L.).

For the year 1921, the revenue of the City of Paris was estimated at 1,003,494,949 francs, and the expenditure at 986,394,949 francs. On January 1, 1922, the debt of the City of Paris was 6,119,511,146 francs.

Defence.

I. LAND DEFENCES.

France has a coastline of 1,760 miles, 1,304 on the Atlantic and 456 on the Mediterranean. Its land frontier extends over 1,665 miles, of

which 1,246 miles are along the Belgian, German, Swiss, and Italian frontiers, and 419 along the Spanish frontier.

The permanent land defences of France now include the former German fortresses of Strassburg, Metz and Thionville, the former being in Alsace and the two latter in Lorraine. West of these lies the former first line of French permanent defences, namely the first-class fortresses of Verdun, Toul, Epinal and Belfort. The experiences of the Great War, which brought to light the power of mobile heavy artillery, the fire of which could be observed and directed from aeroplanes against permanent defences, will affect profoundly the principles of permanent fortification, and it is doubtful if many even of the first-class fortresses will in future be maintained, while those of the second and third classes will almost certainly disappear in so far as they have been designed to meet land attack. On the other hand coast defences will probably be maintained. On the coast Toulon, Rochefort, Lorient, Brest, and Cherbourg are naval harbours surrounded by forts.

II. ARMY.

The French Army is divided into the Metropolitan and the Colonial Armies, both are under the War Minister, but the estimates for Colonial troops other than those maintained in Algeria, Tunis, and Morocco are included in the budget of the Minister for the Colonies. The Metropolitan Army is divided into the *Active Army*, the *Reservé Troops* and the *Territorial Army*. The Army, with the exception of the Armies of Occupation is localised and territorialised in the military government of Paris, 20 Army Corps districts and the territories of Alsace and Lorraine. The normal composition of a French Army Corps is 2 infantry divisions, 1 regiment of cavalry, 1 artillery brigade of three regiments, 1 battalion of engineers, 1 group and 1 company of observation balloons, and administrative services.

The infantry division consists of 3 regiments of infantry each of 3 battalions, and 1 regiment of artillery of 3 groups each of 3 batteries. The cavalry division consists of 3 cavalry brigades each of 2 regiments, 1 group of horse artillery, and 1 group of cyclist chasseurs.

The peace establishment of the French Army provides for 20 Army Corps of the Active Metropolitan Army, 1 Colonial Army Corps of 3 divisions quartered in France, 1 Algerian Army Corps of 3 divisions, 1 Tunisian division, 4 Aviation brigades, 3 brigades of Tanks, and 39 regiments of Heavy Artillery not allotted to Army Corps. The establishment of the Active Metropolitan Army, exclusive of the North African troops, by units was at the end of 1921 as follows:—

Infantry		Cavalry		Artillery		Engineers		Aviation		Tanks	
Regiments of 3 bns.	143	Cuirassier Regts.	6	Field Regts.	42	Regiments	11	Pursuit Regts.	4	Light Regts.	9
Chasseurs (bns.)	31	Dragoon Regts.	37	Medium Regts.	20	Battalions	15	Bombing Regts.	5	Heavy groups	3
Cyclists (groups)	6	Chasseur Regts.	16	Heavy (tractor) Regts.	11			Observation Regts.	7		
		Hussar Regts.	11	Heavy (horse) Regts.	20			Balloon Regts.	2		
		Motor Machine Gun (groups)	10	Fortress Regts.	9						
				Mountain Regts.	2						
				Horse (groups)	6						

The peace establishment of the Active Metropolitan Army in 1921 was 390,000, included in this is the Air Force establishment of 22,600. The Armies of Occupation, which in December, 1921, numbered 95,000 men, are not included in these figures. Enlistment for the Metropolitan Army is on a compulsory basis, but liberal exemptions are allowed. At present the average term of service with the colours is 2 years and the average annual contingent is 250,000, the surplus being accounted for by the French soldiers serving outside France on various terms of service. In December, 1921, there were 65,000 soldiers of French birth in the Army of the Rhine, 24,000 in Algeria and Tunis, 18,000 in Morocco, 17,000 in the Levant and 14,000 in the colonies. It is contemplated to reduce the service with the colours to 1½ years.

The *Reserve Troops* form divisions corresponding to those in the *Active Army* on mobilisation, in the same districts as those to which the *Active divisions* belong. The *Territorial Army* forms a second line and is similarly organised in divisions on mobilisation. The *Customs Corps* is organised in battalions as are the *Chasseurs Forestiers*, these are both recruited from men who have passed into the *Territorial Army*.

The *Gendarmerie* is a police force recruited from the Army but performing civil duties in time of peace. There is a legion in each military district. The strength of the *Gendarmerie* is 21,700, of whom about half are mounted.

The *Garde Républicaine* is also a police force and performs duties in Paris similar to those performed by the *Gendarmerie* in the districts.

The *Colonial Army* is distinct from the *Metropolitan*, and consists partly of white troops and partly of native troops. The Colonial white troops are recruited either by voluntary enlistment, or by voluntary transfer from the *Metropolitan Army*.

One Colonial Army Corps of 3 divisions and 1 Artillery brigade of white troops is quartered in France. The 19th Army Corps, partly of white and partly of native troops is composed of 3 divisions, each with a cavalry brigade, and is quartered in Algiers, and the Tunis division is quartered in Tunis. A Moroccan Army Corps is in process of formation, but at present a number of Moroccan troops form part of the Army of Occupation in Germany. The establishment of the Colonial Army and North African troops by units is as follows:—

Infantry (white)		Infantry (white, colonial and native)	Cavalry		Artillery	
Regiments (3 battalions) . . .	16	Zouaves Regts. . .	6	Chassuers Regts. (d'Afrique) . .	6	Field Regts. 10
Battalions . . .	3	Tirailleur Regts. (Moroccan and Algerian) . . .	46	Spahis Regts . .	12	Heavy Regt. 1
Companies . . .	3	Mixed Regts. (part white, part Moroccan)		Mixed " . . .	3	Field groups 8
Foreign Legion (Regts.) . . .	2	Senegalese Regts. . .	6			
		Tonkinese " . .	4			
		Annamites " . .	1			
		Malagasc " . .	4			

The peace establishment of the Colonial Army and North African troops, which has been very much increased as compared with the pre-war establishment, was, in 1921, 251,000. The total peace establishment of the *Active Metropolitan* and *Colonial* armies in December, 1921, was 736,000.

The administration of the French Army consists of a General Staff and of a number of departments, all under the War Minister. In questions of strategy and of higher military policy the War Minister is assisted by a Council called the *Conseil Supérieur de la Guerre*, consisting of himself as President and twelve selected generals.

In September, 1919, it was decided that the uniform of the Army should be the horizon-blue dress with kepi. The *Chasseurs* or Light Infantry battalions were, however, permitted to keep their distinctive dark blue uniform. Khaki was adopted for Colonial and North African troops.

The French infantry is armed with the Lebel magazine rifle: calibre .315. The French field gun is the 7.5 cm. (2.95 in.) Q.F., shielded gun. The French howitzer is the 10.5 cm. (3.35 in.) howitzer, and as the result of the war the French Army possesses a large variety of heavy guns of all calibres.

NAVY.

Since the War the French naval establishments have undergone a great revision. The position is not yet normal. Reduced expenditure was demanded as well as reconstruction, and, in inspecting and reconditioning the ships and vessels attention was devoted chiefly to the flotillas. Only two pre-Dreadnoughts now remain in the Fleet, and these mainly for training purposes. The inclusion of ex-enemy light cruisers, destroyers, and submarines in the French Fleet has strengthened it where it was weakest. A great number of old destroyers, torpedo boats, and submarines have been struck off the list.

Economies are being made in other directions. The naval ports have been reduced, but none of these have yet, as was intended, been given over to civil industry. The Mediterranean squadron has been reduced and a large part of it remains in reserve.

The Navy is under the supreme direction of the Minister of Marine, assisted by a Chief of the Staff. The latter has charge of all the work of the department having reference to construction, maintenance, commissioning, and the mobilization of the fleet, and particularly of all that concerns preparation for war. He is chief of the Military Cabinet. There are two sub-chiefs of the staff, of whom one is in charge of various sections, and the other of the work of the Military Cabinet. The Navy is now charged with the coast defences, and has its own flying service. The central administration embraces the directorates of *personnel*, *matériel*, and artillery, the inspectorate of works, the finance department, the services of submarine defences, hydrography, and other special branches. In addition to these are the Superior Council of the Navy, which advises the Minister on high policy, and several special committees. For purposes of administration the French coasts are divided into five maritime arrondissements, having their headquarters at the naval ports of Cherbourg, Brest, Lorient, Rochefort, and Toulon. At the head of each arrondissement is a vice-admiral, with the title of Maritime Prefect, who is responsible for the port administration and the coast defences, mobile and fixed. The chief torpedo-stations are Dunkirk, Cherbourg, Brest, Rochefort, Toulon, Corsica, Bizerta, Oran, Algiers, and Bona.

The French navy is manned partly by conscription and partly by voluntary enlistment. There have lately been difficulties, and a considerable number of men have been taken as a levy from the Army services, mainly for engine room and analogous duties. By the channel of the 'Inscription Maritime,' which was introduced by Colbert, and on the lists of which are the names of all male individuals of the 'maritime population'—that is, men and youths devoted to a seafaring life, from the 18th to the 50th year

of age—France was formerly provided with a reserve of 114,000 men, of whom about 25,500 were usually serving with the fleet.

The ex-enemy vessels allotted to France are, included in the following summary—5 light cruisers, one flotilla leader, 12 destroyers, and 10 submarines.

	Complete at end of		
	1920	1921	1922
Dreadnoughts	7	7	7
Pre-Dreadnought battleships	10	9	2
Armoured cruisers	15	15	8
Light cruisers	12	13	5
Despatch Vessels, etc.	35	40	55
Destroyers	80	63	71 ¹
Torpedo boats	100 (?)	63	58
Submarines	102	49	53

¹ Including the ex-enemy flotilla leader, 'Amiral Sencs.'

In the ship tables which follow, all the older vessels have been removed as being no longer in service. The nine battleships are retained under the Washington agreement. The armoured cruisers are of a class that will not be maintained. Six 35-knot light cruisers of new type, provided with armour and mounting 7.5-in. guns, were intended to be built.

BATTLE FLEET.

Built under programme for	Name	Displacement	Armour		Armament	Torpedo Tubes	Indicated horse-power	Max. speed

1905	{Edgar Quinet W. Rousseau}	14,300	6½	8	16 7.6in.	5	40,000	24	
Light Cruisers.									
1907	Colmar	4,280	—	2	6 5.9in. ; 4 3.4in. .	2	30,000	26	
1914	Metz	4,200	—	1	7 5.9in. ; 3 3.4in. .	4	45,000	28	
1912	Mulhouse	4,480	—	2	7 5.9in. ; 2 3.4in. .	2	35,515	28	
1913	Strasbourg	4,842	—	2	7 5.9in. ; 2 3.4in. .	2	26,000	27	
1912	Thionville	3,500	—	—	9 8.9in.	1	25,000	27	

The cruisers are late enemy vessels, all ex-German except the Thionville, which was Austrian. Other old French cruisers in the list are the Jeanne d'Arc, Montcalm, Gueydon, Desaix and Duplex. During the war 55 despatch vessels were put in hand, of which all but a few have been completed. Ten ex-German submarines have been added to the French flotilla; also the flotilla leader mentioned above, and 12 ex-German and Austrian destroyers. Although France resisted the British plan of abolishing submarines, none of the class are now being built.

Production and Industry.

I. AGRICULTURE.

Of the total area of France (132,381,447 acres) 24,716,752 acres were under forests in 1912, and 9,483,625 acres were returned as moor and uncultivated land, and 98,181,070 acres, of which 59,127,750 acres were arable, were returned as under crops, fallow and grass. The following tables show the area under the leading crops and the production (1 metric ton = 2205 lbs.) for three years, the results being still confined to the frontiers of 1914, except for 1921 :—

Crop	Area (1,000 acres)			Produce (1,000 metric tons)		
	1919	1920	1921	1919	1920 ¹	1921
Wheat	11,375	12,135	13,245	4,965	6,271	8,784
Mixed Corn	238	235	271	97	708	1,460
Rye	1,837	2,022	2,185	730	843	11,302
Barley	1,375	1,512	1,662	500	771	823
Oats	6,980	8,160	8,346	2,494	4,223	3,559
Potatoes	3,175	3,310	—	7,730	10,315	—
Beetroot, sugar	180	220	—	1,247	2,055	—

¹ Provisional.

The annual production of wine and cider appears as follows :—

Year	Under Vines, acres	Wine produced thousands of gallons	Wine Import, thousands of gallons	Wine Export, thousands of gallons	Cider produced 1,000's of gallons
1900	3,974,970	1,441,330	114,760	41,010	647,000
1917	3,825,000	840,994	230,560	9,350	573,363
1918	3,754,085	929,810	128,966	8,580	55,310
1919	3,737,745	1,195,778	130,790	24,684	491,326
1920	3,726,620	1,300,200	117,100	27,962	224,400

The production of fruits (other than for cider making) and nuts for 1920 is given in metric tons, as follows :—Apples 68,480, pears 34,315, olives 22,864, cherries 21,614, plums 20,177, peaches 17,255, apricots 7,466, oranges 553, mandarins 211, lemons 120, strawberries 6,737, currants 2,153, gooseberries 988, raspberries 760, figs 3,047, chestnuts 152,924, walnuts 31,440, almonds 4,370, truffles 62, and filberts 106.

On December 31, 1920, the numbers of farm animals were: Horses, 2,542,820; mules, 178,470; asses, 297,540; cattle, 12,782,110; sheep and lambs, 9,372,360; pigs, 4,583,471; goats, 1,228,580.

Silk culture, with Government encouragement (*primes*), is carried on in 24 departments of France—most extensively in Gard, Drôme, Ardèche, and Vaucluse. Silk production for 3 years :—

Year	Number of producers	Quantities of eggs put into incubation	Total production	Total value of produce
		Kilogs	1000 Kilogs.	1000 Francs.
1918 . .	60,057	1,678	3,010	22,258
1919 . .	52,401	1,427	2,322	17,489
1920 . .	65,592	—	2,008	45,800

II. MINING AND METALS.

In France there were in 1913, 41,638 mines and quarries in work, with 237,864 workers (180,956 in 1918). The annual yield of all the mines was valued at 829,453,263 francs (33,178,130*l.*) ; of quarries, 305,955,651 francs (16,238,226*l.*).

The following are statistics of the leading mineral and metal products of conceded mines, in metric tons, in 1918 :—coal and lignite, 26,259,083 ; iron ore, 1,672,000 (13,871,187 in 1920) ; pig iron, 1,292,958 (2,412,149 in 1919 and 3,433,791 in 1920) ; finished iron and steel, 193,812 ; worked steel, 1,800,079.

The coal output was as follows for 4 years, in thousands of metric tons:—1917, 27,757 ; 1918, 24,941 ; 1919, 22,224 ; 1920, 25,276. Coal output of the Saar Basin in 1920, 9,410,433 tons.

In 1918 the production of ores was : lead, zinc and silver, 25,087 metric tons ; copper and tin, 811 tons ; antimony, 10,020 tons ; arsenic and gold, 6,155 tons ; manganese, 9,871 tons ; and salt, 1,092,581 tons. Potash production in Alsace :—1919, 474,607 tons ; 1920, 1,061,191 tons.

III. MANUFACTURES.

For the numbers of persons employed in the more important industries in 1906, see THE STATESMAN'S YEAR-BOOK for 1916, page 877.

Sugar.—In 1920-21 there were 72 sugar works, employing 14,234 men, 821 women, and 350 children. The yield of sugar during 12 years (expressed in metric tons of refined sugar) was :—

Years	Tons	Years	Tons	Years	Tons	Years	Tons
1908-09	723,081	1911-12	465,377	1915-16	135,899	1918-19	107,841
1909-10	753,902	1912-13	877,656	1916-17	185,435	1919-20	155,101
1910-11	650,488	1914-15	302,961	1917-18	200,265	1920-21	305,041

Alcohol.—In 1906, 59,616 thousands of gallons of alcohol were produced ; in 1913, 60,145 ; in 1916, 31,672 ; in 1917, 32,813 ; in 1918, 18,311 ; in 1919, 18,066 ; and in 1920, 28,489 thousands of gallons.

IV. FISHERIES.

For the French fisheries, including those of Algeria, the following are statistics for 1912 :—Persons employed, 154,931 ; sailing boats, 28,505 ; tonnage, 216,905 ; steamers, 946 ; tonnage, 54,555 ; value of products, 143,003,160 francs.

Commerce.

In French statistics General Trade includes all goods entering or leaving France, while Special Trade includes only imports for home use and exports of French origin.

The chief subdivisions of the special trade in millions of francs were for three years :—

—	Imports			Exports		
	1919	1920	1921	1919	1920	1921
Food products	10,704·4	11,874·9	6,205·8	1,190·4	2,612·7	1,932·3
Raw materials	14,753·3	25,156·5	12,398·0	2,444·2	6,113·8	5,558·6
Manufactured goods	10,341·5	12,873·4	4,944·5	7,387·5	16,962·5	12,808·9
Postal packets	—	—	—	857·5	1,205·7	1,253·3
Total	35,799·2	49,904·8	23,548·3	11,879·6	26,894·7	21,553·1

The chief articles of import and export (special trade) were in millions of francs :—

Imports	1919	1920 ¹	Exports	1919	1920 ¹
Wine	711·0	619·4	Arms and munitions	123·5	314·4
Wool	2,005·3	2,087·4	Textiles, silk	1,451·9	1,819·5
Cereals	2,758·0	2,908·5	„ cotton	782·0	1,261·7
Raw cotton	1,501·8	1,568·0	Wine	365·4	531·2
Coal and coke	2,969·9	4,202·2	Raw silk and yarn	352·6	294·5
Coffee	940·5	659·9	Paris goods, &c., &c.	186·2	323·5
Oil seeds and fruits	894·1	1,147·7	Leather	304·7	662·2
Chemical products	783·2	700·0	Metal goods and tools	153·3	548·3
Petroleum	388·7	537·5	Automobiles	124·5	1,188·0

Arms and munitions	294·5	7·9			
Metal goods	744·4	854·1			

¹ Provisional figures.

The chief imports for home use and exports of home goods are to and from the following countries, in thousands of francs :—

Countries	Imports		Exports	
	1920	1921	1920	1921
United Kingdom	10,318,193	3,166,585	4,233,267	3,354,897
Germany	2,667,968	2,476,446	1,502,118	2,856,271
Belgium	3,325,484	1,793,337	4,478,937	4,090,876
Switzerland	1,043,905	398,493	1,791,931	1,169,142
Spain	1,052,480	509,878	969,531	589,309
Italy	1,282,549	567,657	1,248,742	771,534
United States	10,866,102	3,581,789	2,256,515	2,039,711
Brazil	901,107	557,065	362,846	129,503
Argentina	2,991,686	832,875	445,323	249,235

The treaty of 1826 provides for 'the most favoured nation treatment' between the United Kingdom and France in matters of navigation, and that of 1882 (which includes Algeria), in matters of commerce, customs duties, &c.; in 1897 the treaties in force between the United Kingdom and France were extended to include Tunis.

The following table gives the declared value, in pounds sterling, of the staple articles consigned to the United Kingdom from France in four years according to Board of Trade returns :—

Staple Imports into U.K.	1917	1918	1919	1920
	£	£	£	£
Apparel &c.	248,762	352,564	680,803	1,572,624
Silk manufactures	2,899,118	3,874,269	5,280,539	6,135,788
Woollen "	31,692	27,088	270,494	2,670,011
Ribbons			2,958,377	2,397,466
Hewn timber	1,826,282	1,576,448	1,752,176	2,822,594
Wine	1,100,603	2,844,184	6,670,259	5,480,033
Ornamental feathers . . .	162,068	216,975	255,669	247,695
Gloves.	299,095	524,104	598,934	548,490
Motor-cars	396,017	297,688	1,172,080	2,025,546

The total quantity of wine imported into the United Kingdom from France in 1920 was 4,676,627 gallons; in 1919, 5,031,835 gallons.

The following table exhibits the value, according to Board of Trade returns, of the principal articles of British produce consigned from the United Kingdom to France in four years :—

Staple Exports from U.K.	1917	1918	1919	1920
	£	£	£	£
Woollen manufactures & yarn	9,694,896	10,974,614	20,019,372	11,182,103
Iron and steel	22,603,366	16,660,110	9,623,310	9,520,041
Coal	25,425,443	26,898,297	34,286,287	42,800,623
Cotton yarn	11,406,823	25,968,788	23,200,058	7,001,294
Machinery	4,701,586	4,713,622	6,761,235	10,151,795

Total trade between France and United Kingdom for 5 years (in thousands of pounds) :—

—	1917	1918	1919	1920	1921
Imports from France into U.K.	22,868	34,972	48,498	75,536	58,094
Exports to France from U.K. .	111,673	130,767	147,364	136,936	44,257

Shipping and Navigation.

On January 18, 1921, the French mercantile navy had a tonnage of 2,694,199, or 3,101,199 tons if enemy ships be included. Under construction in England, 580,200 tons; in France, 373,135 tons; in other countries, 10,000 tons.

For three years the navigation of vessels with cargoes at the French ports was as follows, excluding the coasting trade :—

Entered	Vessels	Tonnage	Cleared	Vessels	Tonnage
1918			1918		
French	6,062	4,523,000	French	2,909	2,325,000
Foreign	27,189	15,325,000	Foreign	7,190	2,930,000
Total	33,251	19,848,000	Total	10,099	5,255,000
1919			1919		
French	5,579	6,022,000	French	3,637	3,613,000
Foreign	27,059	16,812,000	Foreign	8,737	5,777,000
Total	33,638	22,834,000	Total	12,374	9,390,000
1920			1920		
French	8,021	7,427,000	French	5,701	5,291,000
Foreign	23,741	21,363,000	Foreign	11,623	11,656,000
Total	31,762	28,790,000	Total	17,324	16,947,000

Shipping in foreign trade in 1920, and its distribution among French ports, is shown as follows with cargoes only :—

	Entered (1920)		Cleared (1920)	
	Vessels	Tonnage	Vessels	Tonnage
French	8,021	7,427,000	5,701	5,291,000
Foreign	23,741	21,363,000	11,623	11,656,000
Total	31,762	28,790,000	17,324	16,947,000
Marseille	3,269	5,976,000	2,927	4,920,000
Le Havre	2,388	4,104,000	1,512	2,706,000
Cherbourg	610	2,678,000	498	2,445,000
Bordeaux	1,392	1,910,000	1,000	1,142,000
Boulogne	2,806	1,889,000	1,431	1,466,000

Caen	669	311,000	226	88,000

Internal Communications.

I. RIVERS, RAILWAYS, ETC.

On January 1, 1912, there were in France 23,899 miles of national roads, in addition to the vicinal roads.

Navigable rivers (1911), 5,450 miles; actually navigated, 3,822 miles; canals, 3,104 miles; actually navigated, 3,052 miles; rivers navigable for rafts, 1,908 miles. In 1913 there were 3,620 miles of canals; in 1919 a programme was adopted for the extension and improvement of the canal system.

By a law of July 11, 1842, the construction of railways was left mainly to companies, superintended, and if necessary assisted, by the State; which now constructs lines which the companies work, and works on its own account one important State system. There are lines of local interest subventioned by the State or by the departments. The concessions granted to the six great companies expire at various dates from 1950 to 1960; the periods of State guarantee of four of them terminated at the end of 1914, and will do so in the case of the others in 1934 and 1935.

A new law (October 29, 1921), applicable after approval at a general meeting of the shareholders of the companies, create closer relations between the various networks. From the financial point of view especially, it allows the organisation of a common fund.

The length of line open for traffic in 1919 was 25,167 miles of lines, not including the railways of Alsace and Lorraine, made up as follows:—

—	Miles	• —	Miles
State	5,588·8	Paris Belt Line	19·9
Nord (Northern)	2,146·4	Grand Belt Line	77·7
Est (Eastern)	3,116·7		
Paris-to-Orleans	4,780·8	Total	97·6
Paris-Lyon-Mediterranean	6,064·2		
Midi (Southern)	2,515·9	Secondary companies (mostly departmental railways) . .	839·5
		Non-concessionary roads . .	19·9
Total	24 210·8	Grand Total. . . .	25,167·8

At the end of 1920, the total length of line in operation (including Alsace-Lorraine), was 26,250 miles; under construction, 761 miles; projected, 688 miles.

II. POSTS AND TELEGRAPHS.

In 1914, France had 15,769 post-offices. The receipts on account of posts, telegraphs, and telephones, amounted to 402 million francs; the expenditure to 358 million francs. The number of letters, &c., carried in 1914 was:—

—	Internal	International		Transit (1913)
		Dispatched	Received	
	millions	millions	millions	millions
Letters	1,145	87	81	135
Post-cards	825	5	5	2
Other packages	1,325	97	48	142
Total	2,795	189	134	279

The total length of the telegraphic lines in 1913 was 120,471 miles, with 451,195 miles of wire. There were 23,117 telegraph offices, of which 19,461

belonged to the State, and the remainder to railway companies and private persons. In 1913 there were despatched 87,771,000 telegrams, of which 51,410,000 were internal, 10,261,000 international, 2,124,000 in transit, and 3,976,000 were official.

In 1913 there were in France 11,451 urban telephone systems with 36,100 miles of line and 790,173 miles of wire; number of conversations in 1913, 388,966,000. There were 20,331 inter-urban circuits with 72,181 miles of line, and 387,641 miles of wire; conversations in 1913, 45,327,000. In 1913 the gross telephone receipts were 65,800,000 francs.

Money and Credit.

The nominal value of the French money coined in France during 7 years was :—

Year	Gold	Silver	Nickel and Bronze	Total
	Francs	Francs	Francs	Francs
1914	160,769,990	31,593,289	1,235,680	193,598,959
1915	—	86,328,362	871,660	87,200,022
1916	—	154,238,813	4,379,145	158,662,058
1917	—	114,578,114	4,166,746	118,744,860
1918	—	92,410,595	9,422,604	101,833,199
1919	—	76,782,759	6,859,961	83,642,720
1920	—	29,603,429	11,827,853	41,431,282

The ordinary savings-banks numbered 554 (with about 1,800 branch offices) on December 31, 1920; the number of depositors was 8,755,194, to the value of 5,795,082,757 francs. The National savings-banks, on December 31, 1919, held deposits and interest amounting to 2,086,786,691 francs due to 6,908,854 depositors.

The Bank of France, founded in 1800, and placed under State control in 1806, has the monopoly of issuing bank notes. The present privileges of the Bank were renewed on December 11, 1917, for a further 25 years, *i.e.* until December 31, 1945. The capital of the Bank is fixed at 182,500,000 francs (7,300,000*l.*)

The situation of the bank on April 14, 1921, and on March 9, 1922, was :—

	April 14, 1921	March 9, 1922
	1000 francs	1000 francs
Gold	3,556,778	3,577,180
Silver	270,301	281,341
Advances to the Public	2,196,082	2,376,966
Advances to the State	26,250,000	21,900,000
Notes in circulation	38,528,892	36,225,852
Capital and Reserve	237,415	—

At the outbreak of war the maximum note issue of the Bank of France was 6,800 million francs; on August 5, 1914, it was raised to 12,000 million francs; the amount was increased on successive occasions, the last having been Sept. 28, 1920, when the maximum was fixed at 41,000 million francs.

Of the other well known banks, the following may be mentioned :—The Crédit Foncier de France, founded in 1852, which lends money on mortgage; the Crédit Lyonnais, founded in 1863; the Société Générale; and the Comptoir-Nationale d'Escompte de Paris.

Money, Weights, and Measures.

The *Franc* of 100 *centimes* was in normal conditions of the value of $9\frac{1}{4}d.$ or 25·225 francs to the pound sterling.

Gold coins in common use are 20 and 10 franc pieces. The 20 franc gold piece weighs 6·4516 grammes 900 fine, and thus contains 5·80645 grammes of fine gold. Silver coins are 5, 2, 1, and half franc pieces and 20-centime pieces. The 5-franc silver piece weighs 25 grammes 900 fine, and thus contains 22·5 grammes of fine silver. The franc piece weighs 5 grammes 835 fine, and contains 4·175 grammes of fine silver. Bronze coins are 10 and 5 centime pieces. There are also 25, 10, and 5 centime nickel pieces.

There is a double standard of value, gold and silver, the ratio being theoretically $15\frac{1}{2}$ to 1. Of silver coins, however, only 5-franc pieces are legal tender, and of these the free coinage has been suspended since 1876.

The present monetary convention between France, Belgium, Italy, Switzerland, and Greece is tacitly continued from year to year, but may be denounced by any of the contracting States, and, if denounced, will expire at the end of the year, which commences on January 1, following the denunciation. According to its terms, the five contracting States have their gold and silver coins respectively of the same fineness, weight, diameter, and current value, and the allowance for wear and tear in each case is the same. The coinage of 5-franc pieces, both gold and silver, is temporarily suspended, and the issue of subsidiary silver is, with certain exceptions for special reasons, limited to 7 francs per head of the population of each State (but 6 francs for Greece). Each Government, in its public offices, accepts payments in the silver 5-franc pieces of each of the others, and in subsidiary silver to the amount of 100 francs for each payment. Each State engages to exchange the excess of its issues over its receipts of subsidiary silver for gold or 5-franc silver pieces, and at the termination of the convention each is bound to resume also its 5-franc silver pieces, and to pay in gold a sum equal to the nominal value of the coin resumed. The following are the total issues of the five States, authorised by the convention of 1897:—France, 394 millions of francs; Italy, 232·4; Belgium, 46·8; Switzerland, 28; Greece, 15.

The monetary system of the Union has been adopted, either wholly or partially, in Spain, Rumania, Bulgaria, Servia, Russia, Finland, and many of the South American States.

<i>Gramme</i> . . . = 15·43 gr. tr.	<i>Mètre</i> . . . = 39·37 inches.
<i>Kilogramme</i> . . = 2·205 lbs. av.	<i>Kilomètre</i> . . = 621 mile.
<i>Quintal Métrique</i> . = 220½ „ „	<i>Mètre Cube</i> } . = 35·31 cubic ft.
<i>Tonne (Metric Ton)</i> = 2,205 lbs.	
<i>Litre, Liquid</i> . . = 1·76 pints.	<i>Hectare</i> . . . = 2·47 acres.
<i>Hectolitre</i> {	<i>Kilomètre Carré</i> . = 386 sq. mile.
	<i>Liquid</i> . . . = 22 gallons.
<i>Dry</i> . . . = 2·75 bushels.	

Diplomatic Representatives.

1. OF FRANCE IN GREAT BRITAIN.

Ambassador.—Comte de Beaufort de St. Aulaire (appointed November 20, 1920).

Counsellor.—M. de Montille.

First Secretary.—M. Roger Cambon.

Second Secretaries.—Adrien Thierry and M. Japy.

Attachés.—Jean Vergé, Jean de Bourguignon de St. Martin, and Frédéric Knobel.

Military Attaché.—General Vicomte de La Panouse, K.C.M.G., C.B., C.V.O.

Naval Attaché.—Capitaine de Frégate de Ruffi de Pontevéz-Gévaudan.

Air Attaché.—Capitaine Sablé.

Commercial Attaché.—M. J. Périer, C.B.

Financial Attaché.—M. Avenol.

Secretary-Archivist.—Comte La Combe.

Consul-General in London.—J. Knecht.

There are also French Consuls at—Cardiff, Dublin, Glasgow, Liverpool, Manchester (V.C.), Newcastle, Southampton (V.C.), and other places.

2. OF GREAT BRITAIN IN FRANCE.

Ambassador.—Rt. Hon. Lord Hardinge of Penshurst, K.G., P.C., G.C.B., G.C.S.I., G.C.M.G., G.C.I.E., I.S.O., G.C.V.O., Appointed September 9, 1920.

Minister Plenipotentiary.—Sir Milne Cheetham, K.C.M.G.

First Secretaries.—C. M. Palairé and R. S. Hudson.

Second Secretary.—R. I. Campbell.

Military Attaché.—Major-General the Hon. Sir C. Sackville West, K.B.E. C.M.G.

Naval Attaché.—Captain the Hon. Alexander R. M. Ramsay, D.S.O., R.N.

Air Attaché.—Squadron Leader J. P. Sewell.

Commercial Counsellor.—J. R. Cahill.

Consul-General.—H. G. A. Mackie, C.B.E.

There are British Consuls at Ajaccio, Bordeaux, Brest, Calais, Cherbourg, Dunkirk, Havre (C.G.), Lille, Lyon, Marseille (C.G.) Nantes, Nice, Rouen, Strasbourg (C.G.), and other towns.

ANDORRA.

The republic of Andorra, which is under the joint suzerainty of the head of the French state and of the Spanish Bishop of Urgel, consists chiefly of a valley, surrounded by high mountain peaks. Its maximum length is 17 miles, and its width 18 miles; it has an area of 191 square miles and a population of 5,231, scattered in some 30 villages. The surface of the country is rough and irregular, with an altitude varying between 6,562 and 10,171 feet. It is governed by a council of twenty-four members elected, for four years by the heads of families in each of the six parishes. The council nominates a First Syndic to preside over its deliberations; in the First Syndic is vested the executive power. A Second Syndic is also nominated as deputy of the First Syndic. The judicial power is exercised in civil matters in the first instance by 2 civil judges appointed by the Bishop and by France respectively; and there is also a Supreme Court of Andorra at Perpignan. This, or the Ecclesiastical Court of the Bishop, forms the highest appeal court. For criminal suits two magistrates (*le Viguiet de France* and *le Viguiet Episcopale*) preside over a criminal court at Andorra-la-Vieille. The republic pays an annual due of 960 francs to France and 400 pesetas to the Bishop. A permanent delegate, the Prefect of the Pyrénées Orientales, moreover, has charge of the interests of France in the republic. A good road runs from the Spanish frontier to Andorra. Catalan is spoken in Andorra. French and Spanish currency are both in use.

Colonies and Dependencies.

The colonies and dependencies of France (including Algeria and Tunis) have an area roughly estimated at about 5,119,138 square miles with a population of about 53,582,905. Algeria, however, is not regarded as a colony but as a part of France, and Tunis and Morocco are attached to the Ministry of Foreign Affairs. The administration of the colonies is directed or controlled by the Ministry of the Colonies, which was organised as a separate department in 1894. Most of them enjoy some measure of self-government and have elective councils to assist the governor. The older colonies have also direct representation in the French legislature, Réunion, Martinique and Guadeloupe sending each a senator and two deputies; French India a senator and a deputy; Senegal, Guiana, and Cochín-China each a deputy, while most of the others are represented on the "Conseil Supérieur des Colonies." This council consists of the senators and deputies of colonies, delegates from other colonies, and officials and other persons appointed on account of their special knowledge or qualifications. Some only of the colonies have a revenue sufficient for the cost of administration. In 1921, France spent on the colonial service 252,146,603 francs, of which 28,663,613 francs were for civil administration, 212,742,276 francs for military services, and 10,740,714 francs for penitentiary services.

The area and population of the colonial domain of France are as follows:

	Year of Acquisition	Area in Square Miles	Population
<i>In Asia:—</i>			
India	1679	196	268,499
Annam	1884	256,000	16,990,229
Cambodia	1862		
Cochin-China	1861		
Tonking	1884		
Laos	1892		
Total Asia ¹		256,196	17,268,728
<i>In Africa:—</i>			
Algeria	1830-1902	222,580	5,563,828
Sahara	—	1,544,000 ¹	800,000 ¹

ASIA.

FRENCH INDIA.

The chief French possession in India is Pondicherry. It was founded by the French in 1674, taken by the Dutch in 1693, and restored in 1699. The English took it in 1761, restored it in 1765, re-took it in 1778, restored it a second time in 1785; retook it a third time in 1793, and restored it in 1814.

As established by the treaties of 1814 and 1815, the French possessions in India consist of five separate colonies, which cover an aggregate of 50,803 hectares (about 196 square miles), and had in 1921 the following estimated populations :—

*Pondichéry . . . 46,849	Modéliarpeth . . . 14,189	Nodoukadou . . . 7,126
Oulgaret . . . 22,988	Arianeoupom . . . 12,506	Cotchéry . . . 6,257
Villenour . . . 21,370	*Karikal . . . 16,365	*Chandernagar . . . 25,423
Tiroubouvané . . . 20,783	Tirnoular . . . 10,219	*Mahé . . . 11,199
Bahour . . . 18,716	Grande Aldée . . . 7,082	*Yanaon . . . 4,705
Nettapacom . . . 13,445	Neravy . . . 5,978	Total . . . 265,200

In 1921 the population of the Provinces was as follows :—Pondichéry, 170,846; Karikal, 53,027; Chandernagar, 25,423; Mahé, 11,199; Yanaon, 4,705; Total, 265,200.

The colonies are divided into five *dépendances* (the chief towns of which are marked with an asterisk in the above table) and seventeen communes, having municipal institutions. There is also an elective general council. The Governor of the colonies resides at Pondichéry. The colonies are represented in the Parliament at Paris by one senator and one deputy. At Pondichéry the birth-rate in 1920 was 3·55 per cent., and the death-rate 3·86 per cent. There were in 1920, 61 primary schools and 3 colleges, all maintained by the Government, with 312 teachers and 9,911 pupils. Local revenue and expenditure (budget of 1921) 2,457,850 rupees. The principal crops are paddy, rice, sugar, cotton, manioc, cacao, coffee, ground-nuts. There are at Pondichéry 4 cotton mills, and at Chandernagar 1 jute mill; the cotton mills have, in all, 1,632 looms and 71,213 spindles, employing 7,335 persons. There are also at work 2 oil factories and a few oil presses for ground-nuts, 1 ice factory, a cocoatine factory, and an iron foundry. The chief exports from Pondichéry are oil seeds. At the ports of Pondichéry, Karikal, and Mahé in 1920 the imports amounted to 673,076,798 francs, and the exports to 23,805,649 francs. At these three ports in 1920, 244 vessels of 42,343,825 kilos entered and cleared. Railway open, 43 miles, Pondichéry to Villapuram, and Peralam to Karikal.

FRENCH INDO-CHINA.

CENTRAL GOVERNMENT.

French Indo-China, with an area of about 310,344 square miles and a population in 1914 of 16,990,229, of whom 23,700 were European (excluding military forces), consists of 5 States: the Colony of Cochin-China, the Protectorates of Annam, Cambodia, Tonking and Laos; and Kwang-Chau-Wan leased from China as well as the territory around Battambang, which was ceded by Siam in 1907. The whole country is under a Governor-General, assisted by a Secretary-General, and each of the States has at its head a functionary bearing the title of Resident-Superior, except in the case of Cochin-China, which, being a direct French Colony while the others are only Protectorates, has a Governor at its head. There is a Superior Council for the whole of Indo-China and a Permanent Commission of the Council.

The white population are subject to French law. Throughout the country there are native tribunals from which there is an appeal to courts at Saigon and Hanoi. In these appeal courts European judges, in matters affecting natives, are assisted by Annamite mandarins.

There is a common budget for the whole of Indo-China, and also a separate budget for each of the States. The Provinces, about 120 in number, have also their budget, as have the municipalities. The general budget is supported by receipts from customs, Government monopolies, indirect contributions, posts, telegraphs, and railways in all the countries of the union, and besides maintaining these, provides for military and judicial services, public works, and other matters relating to the whole of the union. For 1921 the revenue and expenditure of the general budget balanced at 54,878,400 piastres. The outstanding debt of Indo-China on January 1, 1920, amounted to 403,000,000 francs.

The military force, totalling about 25,514, are commanded by the Commandant-Superior, a general of division with the same rank as army corps generals in France. The naval force comprises 2 gun-boats, 4 torpedo-boats, and 21 despatch vessels.

Indo-China is divided into three main economic areas:—(1) The territory tributary to Saigon (Cochin China, Cambodia, Southern Laos, and Annam South of Cape Varela), which, apart from the fisheries on the Coast and the interior lakes, is almost entirely agricultural, being one of the great rice regions of the world. (2) The region tributary to Haifong (Tonking and the two northern districts of Annam), which is devoted to agriculture, mining and manufacture. (3) Central Annam (the region between Ports d'Annam and Cape Varela), with Tourane as the principal port, which is mainly agricultural, but is not a great rice-growing district; its main exports are cinnamon, sugar and tea. The minerals of Indo-China are coal, lignite, antimony, tin, wolfram and zinc.

In 1887 the French possessions in Indo-China, including Annam, Tonking and Cambodia, were united into a Customs Union. In 1920 the total imports amounted to 21,940,000*l.*, and exports to 23,620,000*l.* The chief export is rice, forming about 70 per cent. of the total, and other exports are fish, pepper, hides, coal, cotton, rubber and sugar. The principal imports are cotton-tissues, cotton-thread, tin.

Into Great Britain in 1921 the imports from Indo-China amounted to 259,407*l.*, and the exports from Great Britain, 569,841*l.* (chiefly cotton).

In 1919, 2,408 vessels of 2,166,464 metric tons entered, and 2,290 vessels of 2,066,653 tons cleared. Of those entered 374 of 644,263 tons were French, 280 of 484,605 tons were English, and 250 of 446,662 tons were Japanese.

There are about 3,300 miles of principal roads and 2,000 miles of local roads.

The oldest railway in Indo-China is that from Saigon to Mytho. Total length of line, two thirds Government, at end of 1921, 1,265 miles. There are 348 post offices (1918). Number of letters, postcards, etc., handled in in 1918, 10,621,464.

The Bank of Indo-China, with an authorised capital of 48 million francs and reserve and redemption funds amounting to 33,500,000 francs, had till 1920 the privilege not only of making advances on security, but also of engaging in financial, industrial, or commercial enterprise in Indo-China and New Caledonia. For French Indo-China there is a coinage of silver pieces, piastres, $\frac{1}{2}$ -piastres, $\frac{1}{4}$ -piastres, and $\frac{1}{10}$ -piastres; the piastre (since 1895) weighs 27 grams, and the fractional coins in proportion; the piastre and $\frac{1}{2}$ -piastre are '900 fine, but the $\frac{1}{4}$ - and $\frac{1}{10}$ -piastre (since 1898) only '835 fine. The piastre is usually worth rather less than 24d. There are two bronze coins, one equal to the 100th and the other the 375th part of a piastre.

British Consul-General at Saigon.—J. D. Hogg.

British Vice-Consul at Haiphong.—J. Giqueaux.

STATES AND PROTECTORATES.

Cochin-China.

The area of French Cochin-China is estimated at 22,000 square miles. The whole is divided into 17 provinces. The towns of Saigon and Cholon have been formed into municipalities. The Colonial Council contains 18 members. The colony is represented in France by one deputy. The population consists mainly of Annamites, Cambodians, Mois, Chams, Chinese, and a few Indians, Malays, Tagals, and foreigners. In 1919 the total population was put at 3,452,248, of whom 6,301 were Europeans (excluding the military forces). Saigon had, in 1921, a population of 72,372, of whom 4,601 were Europeans, exclusive of 994 troops; the town of Cholon has 226,537 inhabitants, of whom about 101,427 are Chinese. There are about 867 schools, with 1,325 teachers, and 51,452 pupils.

The total area is put at 5,011,277 hectares (1 hectare = 2.47 acres) of which 1,975,725 hectares are cultivated, and 3,488,611 hectares uncultivated (1,748,694 hectares being forest). The chief culture is rice, to which 1,665,159 hectares are devoted. The planting of rubber has been undertaken in recent years. Other crops are maize, beans, sweet potatoes, earth-nuts, cotton, sugar-cane, tobacco, coffee, coco-nuts, betel-nuts, pepper, oranges, bananas, &c. The farm animals in 1920 comprise 13,683 horses, 420,506 buffaloes, 247,623 pigs, 2,860 sheep and goats.

River and coast fishing is actively carried on; there are about 73,520 boats on the rivers, and 3,000 on the coast; the fishery products are valued at 2,800,000 francs yearly. There are 10 rice mills in Saigon and Cholon, turning out each from 450 to 900 tons a day. In these towns are also 2 saw-mills, 2 soap factories, and a varnish factory. Commerce is mostly in the hands of Europeans and Chinese, but about 22,000 Annamites are small traders. The chief exports are rice, fish and fish oil, pepper, cotton, copra, silk, shrimps, isinglass, hides, cardamoms. During 1920, 4,698 steamers of 2,166,464 tons entered at the port of Saigon, of which 565 of 961,281 tons were British. The vessels of the Messageries-Maritimes and of the Chargeurs Réunis Companies visit Saigon regularly. There is also constant communication with Hong Kong and Singapore by British vessels. (For railways see

Indo-China.) At Saigon there are 5 banks or bank-agencies. The total exports in 1919 amounted to 980,777,780 francs, and imports to 84,202,744 francs. In 1919 the local budget balanced at 9,085,359 piastres.

Annam.

French intervention in the affairs of Annam, which began as early as 1787, was terminated by a treaty, signed on June 6, 1884, and ratified at Hué on February 23, 1886, by which a French protectorate has been established over Annam. The King Khai-Dinh, who succeeded to the throne in 1916, governs the country, assisted by a Council of Ministers, in accordance with the wishes of the French Government, represented by a Resident Supérieur. The ports of Tourane, Qui-Nhon, and Xuan Day are opened to European commerce, and the customs revenue conceded to France; French troops occupy part of the citadel (called Mang-Ca) of Hué, the capital (population 60,611). Binh-Dinh, the largest town, has 74,400 inhabitants. Annamite functionaries, under the control of the French Government, administer all the internal affairs of Annam. The area of the protectorate is about 39,758 square miles, with a population in 1920 of 5,731,189, including 1,642 Europeans (exclusive of the military forces). The population is Annamite in the towns and along the coast, and consists of various tribes of Moïs in the hilly tracts. At the end of 1920 the official schools of Annam were reorganised and placed under the direct control of the French Protectorate. There were 685 village schools with 14,438 pupils; 98 elementary schools with 5,985 pupils; 16 secondary schools with 5,058 pupils; one higher secondary school, at Hué, with 562 pupils; one higher secondary school for native girls with 289 pupils; one professional school with 125 pupils; and one school of law and administration with 55 pupils. Local budget, 1921, balanced at 7,065,442 piastres. The Phanrang river has been utilised to irrigate about 10,000 acres, and similar works, on a smaller scale, have been carried out in Central Annam. Rice is one of the most important products. Others are cotton, maize, and other cereals, the areca nut, mulberry, cinnamon, tobacco, sugar, betel, manioc, bamboo; excellent timber abounds, also caoutchouc, cardamoms, coffee, dye, and medicinal plants. Raw silk is produced, amounting annually to about 800,000 kilogrammes, one-third of which is exported, and the remainder used in native manufactures. There are about (1920) 461,338 head of cattle in Annam, and cattle rearing is of some importance. There are copper, zinc, and gold in the province of Quang-nam; the mines are worked by natives. An important seam of haematite iron is worked about 9 kilometres from Thanhhoa. At Nongson, near Tourane, coal mines are worked. In North, Central, and Southern Annam there are salt works. Imports in 1920, 16,563,000 francs; exports, 30,602,000 francs. The chief imports are cotton-yarn, cottons, tea, petroleum, paper goods, and tobacco; chief exports, sugar, rice, cotton and silk tissues, cinnamon, tea, and paper. In 1920, 153 ships (5 Portuguese of 1,160 tons, 4 Japanese of 6,530 tons, 2 English of 1,908 tons, 41 Chinese of 15,566 tons, 5 Russian of 4,615 tons, 4 American of 3,329 tons, and 3 Norwegian of 1,947 tons) of a total tonnage of 39,039 tons, cleared the port of Tourane.

Cambodia.

Cambodia is bounded on the south by Cochin China, on the east by Annam, on the north by Laos and Siam, on the north-west by Siam, and on the west by the Gulf of Siam. Area, 57,900 square miles; population in 1919, 2,000,000 (estimated), of whom 1,100 were Europeans (excluding the

military forces), 108,500 Annamites, and 140,000 Chinese. The present King, **Sisowath**, in 1904 succeeded his late brother, **Norodom**, who had recognised the French protectorate in 1863. The country is divided into 12 provinces. The three chief towns are **Pnôm-Penh** (population 87,870), the capital of the territory, **Battambang**, and **Kampot**, a seaport but not accessible for sea-going vessels. The budget for 1921 balanced at 6,809,815 piastres, including a sum of 476,400 piastres allowed for the civil list of the king and princes. There are 60 schools with 4,000 pupils.

The soil is fertile, but only a part of it is under cultivation. That cultivation is not intensive, as the natives are scarce and not very fond of work. Enormous tracts of rich land are available for plantation of cotton, tea, rubber, and coffee. The overflow of the Mekong river fills up the Great Lake which occupies the middle of Western Cambodia. With the low-water season the lake slowly empties and leaves innumerable ponds on the ground it covered during the high-water season. These ponds are filled with an enormous quantity of fish suitable for salting and smoking. This is the principal native industry, and the export to China of Mekong fish attains in some years 30,000 tons. The chief product of Cambodia is rice, of which that country exports over 300,000 tons yearly, but as the export is made by way of **Cholon** (where the rice is milled) and **Saigon** (where it is shipped), these figures appear in the customs statistics of **Cochin China**. Amongst the other products are kapok, cotton, pepper, salt fish, hides, cattle, palm-sugar, and tobacco, and amongst the produce to become more important in the near future, coffee, rubber, and iron. Pepper is grown by 61 villages with 4,800 planters, the production being over 800,000 kilogrammes annually. Cotton growing is extending; the production is estimated at 9,000 tons, the whole of which is exported. Cattle breeding is a flourishing native industry, especially between **Pnôm-Penh** and **Manila**. Salt is worked. There is a cotton-ginning mill at **Khsach-Kandal**, near **Pnôm-Penh**, and another at **Kompong-Cham**. The external trade is carried on mostly through **Saigon** in **Cochin-China**. The imports comprise salt, wine, and textiles; the exports comprise salt fish, cotton, tobacco, rice, also boats. In 1920, 4,236 vessels of 179,874 tons entered, and 10,806 vessels of 312,166 tons cleared the ports of Cambodia.

Cambodia possessed in 1916 500 miles of good metalled roads and nearly 1,000 miles of unmetalled roads and roads in course of construction. The chief roads are from **Saigon** to the Siamese frontier, via the left side of the river from **Banan**; on the right side of the **Mékong**, from **Pnôm-Penh**, through the district south-west of the lakes; the road from **Pnôm-Penh** to the Gulf of **Siam**; and the road from **Saigon** to **Kratié**. The **Mékong** and the Great Lake with their affluents give a total of 875 miles of waterways, of which about 370 are not navigable to launches during the low-water season. Sea-going steamers can easily reach **Pnôm-Penh**, which has good quays and embankments.

Of all the countries of the Far East, Cambodia is among the richest in ancient monuments. The ruins of **Angkor** are specially famous.

Tonking.

This territory, brought under France's protectorate in 1884, has an area of 40,530 square miles, and is divided into 21 provinces, and 4 military territories, with 8,698 villages and a population in 1919 of 6,470,250, of whom 6,875 were Europeans (exclusive of military forces). The King of **Annam** was formerly represented in **Tonking** by a viceroy, but, in July, 1897, he consented to the suppression of the viceroyalty and the creation

of a French residency in its place. Chief town Hanoi, a fine and large modern town, with a population of 90,308 in 1921. This town on January 1, 1902, became the capital of Indo-China, instead of Saigon. There are 14 grammar schools with (1920) 4,967 pupils. In 1902 a school of medicine for natives was opened at Hanoi. This with the other higher education schools for natives was formed in 1917 into the University of Indo-China. Hanoi has also since 1918 a large European college. The local budget for 1921 balanced at 13,131,390 piastres. The chief crop is rice (total exports 1920, 150,613 tons valued at 150,000,000 francs) exported mostly to Hong Kong (in 1920, 135,000 tons). Other products are maize, arrow-root, sugar-cane, coffee, tea, various fruit trees, and tobacco. A large quantity of raw silk is produced annually, most of which is used in native weaving and the remainder exported (13,000 kilogrammes for 1919). There are rich limestone quarries, calamine and tin mines, and also rich hard coal beds. The enormous limestone quarries allowed the rapid increase of Portland cement manufacture which produced for export in 1920 115,984 tons of cement. During the same year 501,665 tons of hard coal were exported.

Chief imports are metal tools and machinery, yarn and tissues, beverages; chief exports, rice, maize, and animal products. The principal port is Haiphong, which is visited regularly by the steamers of three French lines. In 1920, 466 vessels of 532,108 tons gross entered and cleared this port, 111 vessels (113,132 tons) being British.

The **Laos** territory, under French protectorate since 1893, is estimated to contain 96,500 square miles, and in 1921 there were 800,000 inhabitants. The capital is Vientiane. In the country there are three protected states, Luang Prabang, which has a capital of the same name, the residence of the King, who is assisted in his government by a French Administrator; the other protected states are Bassac and Muong Sing. The soil is fertile, producing rice, cotton, indigo, tobacco and fruits, and bearing teak forests, from which the logs are now floated down the Mekong to Saigon. Gold, tin, lead and precious stones are found, and concessions have been granted to several French mining companies. It can be entered only by the Mekong, which is barred at Khone by rapids. A railway, four miles in length, has been constructed across that island, and by means of it several steam launches have been transported to the upper waters, where they now ply. A telegraph line connects Hué in Annam with the towns on the Mekong, and these with Saigon and Hanoi. The cost of the Laos administration is borne by Cochinchina (to the extent of six-thirteenths), Tonking and Annam (five-thirteenths), and Cambodia (two-thirteenths). The local budget for 1921 balanced at 2,506,300 piastres.

In 1900 the territory of **Kwang Chau Wan** on the coast of China, leased from China in 1898, and increased in 1899 by the addition of 2 islands in the bay, was placed under the authority of the Governor-General of Indo-China. The territory has been divided into 3 administrative circumscriptions, but the Chinese communal organisation is maintained. Its area is about 190 square miles and its population about 168,000. The imports are chiefly cotton yarns, opium, petroleum; the exports are straw sacks, swine, mats. The port is a free port. The territory is regularly visited by the vessels of two French companies; in 1919 there were 290 vessels of 94,905 tons. Official buildings, a post office, roads, &c., have been or are being constructed. The local budget for 1918 balanced at 404,960 piastres.

AFRICA.*

ALGERIA.

(L'ALGÉRIE.)

Government.

The government and administration of Algeria are centralised at Algiers under the authority of the Governor-General, who represents the Government of the Republic throughout Algerian territory. With the exception of the non-Mussulman services of Justice, Public Instruction, Worship, and the Treasury, which are under competent ministers, all the services are under his direction. He has to prepare a special budget for Algeria, he grants concessions for works, and he contracts loans in the name of the Colony.

The budget of Algeria which, since 1901, has been entirely distinct from that of France, comprises under revenue the imposts of every sort which are collected within the Colony and under expenditure the whole of the civil disbursements. The expenditure on War and Marine is still at the cost of the mother country, as is also the burden of guarantees of interest on railways up to 1926. The budget, prepared by the Governor under the control of the Minister of the Interior, is discussed and voted by the Financial Delegations and the Superior Council. These Delegations were instituted in 1898 to enable the body of tax-payers to state their views on questions of imposts by means of elected delegates. There are three Delegations representing respectively the French colonists, the French tax-payers other than colonists, and the Mussulman natives. The Superior Council is composed of elected members and of high officials. Lastly, the Governor is assisted in the exercise of his functions by a purely consultative council of government.

The territories of the South, forming a separate colony, are each under a military command which directs all the administrative and civil services under the authority of the Governor. They have a budget distinct from that of Algeria. The natives are represented on the communal administration. By the law of February 4, 1919, the position of French citizens is accorded to natives, above the age of 25 and monogamous, who served in the war, who are proprietors or farmers, who can read or write or hold a French decoration. It is proposed to create in Paris a Consultative Committee on the same lines as the British Council of India.

The French Chambers have alone the right of legislating for Algeria while such matters as do not come within the legislative power are regulated by decree of the President of the Republic. Each department sends one senator and two deputies to the National Assembly.

Governor-General.—M. Théodore Steeg, appointed July 29, 1921.

Area and Population.

The census of March 6, 1921, which is the last taken, showed a population (including the military forces) amounting to 5,800,974 on an area of 222,180 sq. miles. The colony has been organised in 2 great divisions called respectively Northern and Southern Algeria. Northern Algeria consists as formerly of Civil Territory and Territoire de Commandement, but the Civil Territory has been extended, while the Territoire de Commandement has been diminished and will before long be completely merged in the Civil Territory. Northern Algeria contains 17 arrondissements and 278 communes and 76 are mixed communes. Southern Algeria consists of the 4 Territories of Ain Sefra, Ghardaia, Touggout, and the Saharan Oases, organized under decree of

* See also Morocco.

August 14, 1905. These territories contain 14 communes of which 7 are mixed and 7 native.

Population, including military forces, on March 6, 1921 :—

	Municipal Population			Population numbered separately			Grand Total
	European	Native	Total	European	Native	Total	
Northern Territory	778,360	4,892,080	5,170,440	36,458	46,241	82,697	5,253,137
Southern Territory	4,828	537,255	542,083	1,783	3,971	5,754	547,837
Grand Total .	783,188	4,929,335	5,712,523	38,239	50,212	88,451	5,800,974

Population according to Departements and Territories in 1921 :—

Northern Algeria (Departements)	Population	Southern Algeria (Territories)	Population
Algiers	1,785,574	Ain Sefra	163,529
Oran	1,305,051	Ghardaia	145,029
Constantine	2,162,512	Touggourt	202,743
		Saharan Oases	30,736
Total	5,253,137	Total	547,837

The total population in 1891 was 4,124,732, in 1896, 4,429,421. In 1911, the native municipal population numbered 4,711,276; French, 492,660; naturalised Jews and their offspring, 70,271; Tunisians, 2,375; Moroccans, 23,115; Spaniards, 135,156; Italians, 36,795; other foreigners 20,927. Municipal population of Northern Algeria in 1911 :—

	Males	Females	Total
Europeans	373,220	373,290	746,510
Natives	2,251,233	2,008,241	4,259,474
	2,624,453	2,381,531	5,005,984

The chief towns with the total communal population in 1921 were: Algiers, 206,595; Oran, 141,156; Constantine, 78,220; Bône, 45,171; Sidi-bel-Abbes, 37,752; Tlemçen, 43,090; Mostaganem, 27,375; Mascara, 28,693; Blida, 36,384; Philippeville, 33,808; Sétif, 30,867; Tizi Ouzon, 35,171; Bougie, 19,440.

Religion and Instruction.

The native population is entirely Musulman, the Jews being now regarded as French citizens. The Roman Catholic Church has an archbishop and 2 bishops, with 386 officiating clergymen. There are 13 Protestant pastors and 6 Jewish rabbis sharing in Government grants.

At Algiers (city) there is a University, attended in 1919-20 by 1,428 students (614 for Law, 359 Medicine and Pharmacy, 189 Science, 266 Arts); Professors (1919-20), 101. There are also special schools for commerce, the fine arts, hydrography, and agriculture. There were also in 1919-20 496 Musulman schools with 35,578 pupils. There are higher Musulman schools (*médersas*) at Algiers, Tlemçen, and Constantine. In Algeria there are 16 establishments for secondary education with, in 1919, 9,837 pupils (7,180

boys and 2,651 girls). In 1919-20 there were 1,298 primary and infant schools, public and private, and 132,617 pupils. There were two normal schools for men teachers with 29 professors and 230 students (54 Musulman), and three normal schools for women teachers with 21 professors and 200 students.

Justice and Crime.

There is an Appeal Court at Algiers, and in the arrondissements are 16 courts of first instance. There are also commercial courts and justices of the peace with extensive powers. Criminal justice is organised as in France for Europeans. Since 1902 there have been criminal courts and special repressive tribunals for trying natives accused of crime.

Musulman justice is administered to natives by the Cadis in the first instance with an appeal to French courts.

Finance.

Europeans and natives pay the same direct and indirect taxes. The departments of War and Marine are excluded from the estimates, but the proceeds of the Military tax, the Government monopolies, and some other revenues are paid to France. The total expenditure (including military and extraordinary disbursements) exceeds the Algerian revenue by about 75,000,000 francs.

The budget estimates for five years were as follows in francs :—

—	1918	1919	1920	1921	1922
Revenue . . .	159,859,921	222,948,810	510,652,801	501,659,318	604,157,674
Expenditure . . .	159,857,985	222,732,317	510,649,736	501,525,219	603,815,199

The details of the 1922 budget are as follows :—

Revenue		Expenditure	
	Francs		Francs
Direct Taxation	60,612,465	Debt	97,943,985
Registration & Stamp	101,708,520	Government and Central Administration	12,648,352
Duties	50,212,209	Debts of the Interior, Assistance, Security, & Public Instruction	91,418,843
Customs	90,256,521	Native Affairs	26,084,909
Various Taxes, Duties, and Dues	32,804,000	Finance	31,804,488
Post, Telegraph and Telephones	11,668,047	Posts, Telegraphs and Telephones	46,919,287
State Lands	5,348,965	Public Works and Maritime Services	40,761,970
Various	1,219,000	Railways	1,780,131
Exceptional resources	23,466,947	Mines	899,279
Various receipts	226,831,000	Agriculture, &c.	15,693,695
Extraordinary receipts		Forests	11,629,310
		Miscellaneous	500,000
		Extraordinary	226,831,000
Total (including all items)	604,157,674	Total (including all items)	603,815,199

For the Southern Territories in 1922 the revenue was put at 13,442,108 francs, and the expenditure at 13,379,514 francs.

Defence.

The military force in Algeria constitutes the XIXth Army Corps, consisting of 3 divisions. French residents are under the same obligation to serve as in France; natives are under the obligation to serve 3 years with the colours and can be called up as reservists in case of mobilisation. The troops might be stationed in North Africa or employed on Colonial expeditions, but they belonged to the 'Metropolitan,' not to the Colonial Army. There are 6 regiments of zouaves, each of 3 battalions, of 5 companies; 6 regiments of cavalry (Chasseurs d'Afrique), of several squadrons; 3 groups of field and 1 of heavy artillery; 1 battalion of engineers; and 1 regiment of the Flying Corps. These were all European troops, and in the case of the artillery and engineers their recruiting dépôts are in France. The Foreign Legion of 2 regiments of a varying number of battalions is recruited from foreigners of any nationality, but officered chiefly by Frenchmen; the headquarters of the regiments is in Algiers, but battalions are sent to any colony where they may be required. The Natives were 12 regiments of Algerian Tirailleurs each of 3 battalions, and 6 regiments of Spahis (Arab cavalry) each of several squadrons. The officers and a proportion of the non-commissioned officers of the native regiments are French.

Agriculture and Industry.

There exists in Algeria a small area of highly fertile plains and valleys in the neighbourhood of the coast, mainly owned by Europeans, which is cultivated scientifically, and where profitable returns are obtained from vineyards, cereals, &c., but the greater part of Algeria is of limited value for agricultural purposes. The northern portion is mountainous and generally better adapted to grazing and forestry than agriculture, and a large portion of the native population is quite poor. In spite of the many excellent roads built by the Government, a considerable area of the mountainous region is without adequate means of communication and is very inaccessible.

The soil is, under various systems, held by proprietors, by farmers, and by Métayers or Khammés. Most of the State lands have been appropriated to colonists. The chief cereal crops are wheat (2,904,811 acres with a yield of 1,028,900 tons in 1921), barley (2,513,943 acres with a yield of 1,099,300 tons in 1921), oats (573,885 acres with a yield of 170,650 tons in 1921), maize, potatoes, artichokes, beans, peas and tomatoes. Flax, silk, and tobacco (the cultivation of which is most remunerative) are also cultivated.

In 1920 the yield of wine was 157,136,452 gallons. The orange, date, mandarine, citron, banana, pomegranate, almond, fig, and many other fruits grow abundantly. The production of olive oil is an important industry. Cotton in 1920 was sown on 445 acres. Forests cover 6,560,232 acres, and, for the most part, belong to the State and communes. The greater part is mere brushwood, but on 645,000 acres are cork-oak trees, from which, in 1919, 634 tons of cork were obtained. The dwarf-palm and alfa are worked on the plains. Timber is cut for firewood, also for industrial purposes, for railway sleepers, telegraph poles, &c., and for bark for tanning. Considerable portions of the forest area are also leased for tillage, or for pasturage for cattle, sheep, or pigs. The forest revenue annually amounts to over 240,000*l*.

In 1919 there were in Algeria 202,839 horses, 184,895 mules, 247,808 asses, 1,092,996 cattle, 9,139,722 sheep, 3,793,998 goats, and 108,213 pigs.

There are extensive fisheries for sardines, allaches, anchovies, sprats, tunny-fish, &c., and also shell-fish. In 1920, 5,638 persons, and 1,206 boats of 4,023 metric tons were employed in fishing, and the fish taken were valued at 17,056,897 francs.

Algeria possesses iron, zinc, lead, mercury, copper, antimony, and petrol. The mineral output in 1920 was as follows: iron ore, 1,071,278 tons; lead, 11,633 tons; zinc, 26,422 tons; iron pyrites, 7,861 tons; coal, 6,871 tons; lignite, 1,754 tons; phosphates, 456,169 tons.

Commerce.

The foreign trade of Algiers in recent years has been as follows (in 1,000£ sterling):—

—	Imports	Exports	—	Imports	Exports
1916	27,716	25,267	1919	54,301	67,592
1917	27,186	39,250	1920	101,406	57,662
1918	29,399	31,762	1921	77,280	55,880

The imports and exports for 1921 were divided as follows (in thousands of francs):—

—	Imports			Exports		
	From France	From Elsewhere	Total	To France	To Elsewhere	Total
Animal products	60,416	33,387	98,803	216,232	59,973	276,205
Vegetable products	270,190	267,190	537,290	755,020	201,725	956,745
Mineral products	69,807	88,186	157,993	15,779	62,443	78,222
Manufactured articles	1,065,974	72,189	1,138,163	22,810	62,770	85,580
Total	1,466,387	465,862	1,932,249	1,009,841	386,911	1,396,752

The principal imports in 1921 were (in thousands of francs), sugar, 60,450; petroleum, 58,066; cotton, 62,012; clothing, 117,364; automobiles, 70,736. The principal exports were sheep, 116,781; raw silk, 7,372; eggs, 7,762; wheat, 126,606; figs, 12,996; tobacco, 34,959; cigarettes, 57,868; wines, 276,917.

In 1920 the receipts of the customs authorities amounted to 45,139,097 francs; and in 1921 to 43,852,923 francs.

Total trade between the United Kingdom and Algeria (Board of Trade returns) for 5 years:—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Algeria into U.K.	2,918,579	2,260,039	1,940,089	3,936,104	1,791,422
Exports to Algeria from U.K.	2,330,532	3,879,536	3,653,242	3,723,374	1,315,644

Shipping and Communications.

In 1921, 11,199 vessels of 9,201,437 tons net entered, and 11,160 vessels of 9,180,003 tons cleared Algerian ports.

On January 1, 1921, the mercantile marine of Algeria consisted of 419 vessels of 46,666 tons net.

National roads have a length of 3,330 miles.

On December 31, 1920, there were 2,221 English miles of railway open for traffic (exclusive of lines on Tunisian territory). Of the total 807 miles are privately owned.

The postal receipts in 1920 were 13,955,328 francs, and there were 720 post offices. The telegraphic receipts were 6,515,057 francs, and those from telephones 5,790,986 francs. The total for the three services was 26,261,371 francs.

The telegraph of Algeria consisted on December 31, 1919, of 8,121 miles of line and 25,283 miles of wire, serving 786 offices. Telephone urban systems, 6,296 miles of line; inter-urban, 10,902 miles of line. Number of subscribers (January 1, 1921), 11,060.

The Bank of Algeria is a bank of issue, with a capital of 20,000,000 francs, but its note circulation must not in any case exceed 1,300,000,000 francs (law of January 29, 1920). Several co-operative agricultural banks, assisted by Government funds, are in operation. There are in Algeria 7 savings banks with, on December 31, 1918, 20,511 depositors, the amount due to depositors being 4,828,400 francs. Messrs. Cox & Co. (France) have branches at Algiers and Oran.

British Consul-General for Algeria.—B. S. Cave, C.B.

Vice-Consul at Algiers.—J. K. V. Dible.

Vice-Consuls at Arzew, Montaganem, Bône, Oran, Philippeville, and Bougie.

Money, Weights, and Measures.

The money, weights, and measures of France only are used.

FRENCH EQUATORIAL AFRICA (FRENCH CONGO).

The French Congo extends along the Atlantic coast between Cameroon and the territories of the Belgian Congo, with the exception of the Spanish territory on the coast from the Muni river on 1° N. lat. to Cameroon, and inland to the meridian of 11° 20' E. of Greenwich, and the Kabinda region, which is Portuguese. Inland it is bounded by the Congo and Ubanghi rivers and stretches northwards to the Bahr-el-Ghazal and Lake Chad. French acquisition began on the Gabun river in 1841; Libreville was founded in 1849; Cape Lopez was gained in 1862, and the French possessions extended along the coast for about 200 miles. Since then the territories have been increased by exploration and military occupation and their limits have been defined in a series of international conventions. By a convention, dated November 14, 1911, France agreed to cede certain parts of the colony to Germany in return for German recognition of the French protectorate in Morocco. These territories were restored to France by the Treaty of Versailles of June 28, 1919. The territory which in November, 1911, Germany ceded to France was incorporated in French Equatorial Africa.

By decree of January 15, 1910, the French Congo was divided into three circumscriptions which form three colonies, viz.:—the Gabun Colony (capital Libreville), the Middle Congo Colony (capital Brazzaville), and the Ubangi-Shari Colony (capital Bangui). The Chad Territory, which was formerly a dependency of the Ubangi-Shari Colony, was, by decree issued on March 17, 1920, made a separate colony.

By decrees issued on January 15, 1910, the name of the French Congo was changed into French Equatorial Africa, which extends over the Gabun, the Middle Congo, the Ubangi-Shari and Chad Colonies; to these have since been added the Cameroon territories.

The area is about 982,049 square miles, containing a population estimated in 1915 at 9 millions of negro and other races. Estimated area and population of the separate colonies is shown as follows:—

Colony.	Area in square miles.	Population.
Gabun	121,862	1,300,000
Middle Congo	150,292	1,390,000
Ubangi-Shari	203,219	1,590,000
Chad	501,676	2,090,000
Total	982,049	6,370,000

The Colonies have each a Lieutenant-Governor; they all have financial and administrative autonomy, and each has an administrative council; the Lieutenant-Governors are under the Governor-General of French Equatorial Africa, having his headquarters at Brazzaville, who is assisted by a Secretary-General and a Council of Government. There is a general budget for the whole of French Equatorial Africa, and also separate budgets for the colonies. Local revenues accrue chiefly from customs duties; there are native poll taxes. The sale of alcohol to natives is restricted. For 1921 the budgets showed the following figures: General budget, 8,845,402 francs; the colonial budgets were as follows: Gabun, 4,149,500 francs; Middle-Congo, 4,325,000 francs; Ubangi-Shari, 3,514,000 francs; Chad Colony, 3,850,000 francs. In the colony there are (1916) 45 mission schools for boys and 10 for girls, with about 3,600 pupils (724 being girls), and 94 public schools with about 3,900 pupils.

The resources of French Equatorial Africa are quite undeveloped. There are about 30,000 square miles of tropical forest extending to the Gabun coast, containing many species of industrial value. Wild caoutchouc is the most important export, 2,122 tons in 1920. Palm oil is also produced to some extent, 7,352 tons were exported in 1920. Coffee is also cultivated. In the Chad Colony large numbers of cattle, sheep, asses, camels, horses, and ostriches are raised, but there are no facilities for export. Copper, zinc, and lead are found. In 1920 the total exports amounted to 31,246,248 francs; and imports, 18,370,512 francs.

There is considerable shipping at Port Gentil and Libreville, the chief ports; but at Loango steamers must anchor about three miles off the coast. All three ports are visited by the vessels of the Chargeurs Réunis, and the steamers of the Elder Dempster Line. Whale fishing commenced in 1912. The military force of the colony (1914) consisted of 7,145 men, of whom 530 are Europeans.

On February 6, 1921, a new railway was commenced to connect Brazzaville with the Atlantic at Pointe-Navie.

The Central African telegraph line connects Brazzaville with Loango, and is in communication with the English Atlantic cable. Wireless telegraphy connects Brazzaville and the head of the Southern Railway in the Loango Region, a distance of 300 miles, and also Brazzaville and Leopoldville. In the Chad region there are several stations connecting Fort Lamy, Ati, Faya, and Maô. A line has been laid to connect Brazzaville with Bangui, and another to connect Bangui with Fort Lamy. The total length of line in operation is about 2,386 miles.

On the north-east of Lake Chad is the state of Kanem, which was completely subjected to France in 1903, and is now only a district of the Shari territory with Maô for its capital. Wadai, to the east of Kanem, with an area of about 170,000 square miles, and a semi-civilised population of about 1,000,000, accepted the French Protectorate in the summer of 1903. In 1911 a French force occupied Arada, some miles to the north of the capital, Abeshr, which is in communication with Benghazi, on the coast of Tripoli, by caravans, and in 1913 Ain-Galakka.

Governor-General of Equatorial Africa.—M. Alfassa (1921).

Cameroon.—The former German Colony of Kamerun, including the area of French Equatorial Africa ceded by France to Germany, was occupied by French and British troops in 1916. The greater portion of the territory has been placed under French administration, and a strip on the southern border of Nigeria under British. The total area allotted to France amounts to 166,489 square miles, excluding the 107,270 square miles ceded to Germany in 1911, which is now included in French Equatorial Africa. The portion of Cameroon placed under the Mandate of France by the Treaty of Versailles has, by a decree of March 28, 1921, been constituted an autonomous territory both administratively and financially. The seat of government is Yaoundé. General budget for 1921 balances at 11,715,500 francs; special railway budget, 3,115,100 francs. Chief products are coffee, tobacco, palm oil, and ivory. The country has 213 miles of good roads, and 359 miles of railway.

Commissioner.—M. Carde (appointed December 5, 1919).

MADAGASCAR.

Government.

The last native sovereign of Madagascar, Rānavālonā III. (born 1861, died 1916), succeeded in 1883. The French having claimed a portion of the north-west coast as having been transferred to them by local chiefs, hostilities were carried on in 1882-84 against the Hovas, who refused to recognise the cession. In 1885 peace was made, Diégo Suarez having been surrendered to France. A French Resident-General was received at the capital, and the foreign relations of the country were claimed to be regulated by France. By the Anglo-French agreement of August 5, 1890, the protectorate of France over Madagascar was recognised by Great Britain; but the Native Government steadily refused to recognise any protectorate. In May, 1895, a French expedition was despatched to enforce the claims of France, and on October 1, the capital having been occupied, a treaty was signed whereby the Queen recognised and accepted the protectorate. By a unilateral convention made in January, 1896, Madagascar became a French possession, and by law promulgated August 6, 1896, the island and its dependencies were declared a French colony.

Governor-General.—Hubert Garbit (appointed March 14, 1920).

A Consultative Council of Administration has been established at Antananarivo. The Colony is not represented in the French Parliament, nor has it any elective assembly. By decree of June, 1918, Madagascar is divided into 24 provinces, and 75 districts administered by officials of the council of administration. Natives are employed to a large extent in subordinate positions both in the civil and military administration. In some parts of the island the natives, under the direction of the administrators, are allowed to choose one of their number as intermediary between themselves and the native governors appointed by the French Government. These representatives receive a remuneration and give their whole time to this work.

Area and Population.

Madagascar is situated to the south-east coast of Africa, from which it is separated by the Mozambique Channel, the least distance between island and continent being 240 miles; its length is 980 miles; greatest breadth, 360 miles. The area is estimated at 228,000 square miles. The census of December 31, 1917, showed a population of 3,545,264, of whom 15,157 were French, 3,101 were of other European birth, 5,272 were Hindus, 1,007 Chinese, 631 were African, and 3,520,096 were Malagasy. On December 31, 1918, the population was 3,545,575.

The Malagasy races or tribes are very numerous, the more important being the Hova (1,097,458), the Betsiléô (515,005), the Betsimisarakā (401,857), the Tanala (151,061), the Sakalava (208,777), and the Bara (161,116). Hindus, Chinese, Arabs, and other Asiatics carry on small retail trade. The most intelligent and enterprising tribe is the Hova, whose language, allied to the Malayan and Oceanic tongues, is understood over a large part of the island. The people are divided into a great many clans, who seldom inter-marry.

The slave trade was nominally abolished in 1877; slavery in Imerina and in all parts under French authority was abolished by proclamation on September 27, 1896. The system of forced labour in the public service was abolished on January 1, 1901, but the personal tax due from 16

to 60 years of age, formerly 5 francs, has been increased to 10, 15, in some provinces 20, and in Antananarivo to 30 francs. The populations of the chief towns were : The capital, Antananarivo, in the centre of the island, 63,115, Tamatave 15,000, Fianarantsoa 8,231, Andovoranto 1,322, Majunga 7,205, Diégo Suarez 10,377, Ambositra 3,580, Tuléar 2,467, Mananjary 8,927, Maroantsetra, 3,294. Fort Dausslen 2,000. The principal ports are Tamatave, on the east coast, Majunga on the north-west coast, Diégo Suarez in the north, and Tuléar in the south-west.

In 1896 Diégo-Suarez (a French colony from 1885), the island of Nossi Bé (area 130 sq. m.) on the west coast, and the island of Ste. Marie on the east coast (area, 64 sq. m.), and in 1914 the Comoro Islands, were placed under the authority of the Governor-General of Madagascar.

Religion, Education, Justice.

Up to 1895 a large portion of the Hova and of the other tribes in the central districts had been Christianised. The Christian population was estimated at 450,000 Protestants, and 50,000 Roman Catholics. There are many missionary societies at work, French (Catholic and Protestant), British the London Missionary Society, the Friends' Mission, and the Anglican Mission; there is also a Norwegian Lutheran Mission and an American Mission. French Catholic missions had 258 European workers (67 female); Protestant and Anglican missions had 173 (54 female). The outlying tribes are still mostly heathen.

Education is compulsory from 8 to 14 years of age. On January 1, 1918, there were 745 official schools with 76,243 pupils (48,444 boys and 24,206 girls), and 432 private schools, with 43,994 pupils. Children are required to learn the French language. At Antananarivo there is a school of native medicine, an administrative and commercial school, a normal school, and a school of agriculture.

For the administration of French justice there are a *Parquet* consisting of a *Procureur-Général* and other officials, a court of appeal, 4 courts of first instance in the principal towns, and justice of peace courts at 17 centres. For native justice there are tribunals in the districts and provinces, and the natives have the right of appeal from lower to higher tribunals.

Finance.

The local revenue of Madagascar is derived chiefly from direct taxation (including a poll tax and taxes on land, cattle, and houses), from customs and other indirect taxes, from colonial lands, from posts and telegraphs, markets, and miscellaneous sources. The chief branches of expenditure are general administration, public works, the post office, and the public debt. For 1921 the local budget balanced at 66,232,500 francs.

The colony has since 1897 contracted debt to the amount of 4,200,000*l.* at the average yearly rate of interest of 3·02 per cent. The loans were made for the purpose of public works or for the conversion of loans for that purpose.

Defence.

In peace time the troops in Madagascar (including the forces at Diégo-Suarez) consist of 2,411 Europeans, and 6,376 natives. The police and militia are maintained on the local budget.

Production and Industry.

In 1896, on the completion of the French occupation of the Island, the Malagasy system of land tenure was modified; foreigners were permitted to acquire land, and registration of land was begun. Government lands, urban or non-urban, are let or sold to private persons, or to companies for agriculture, pasturage, or mining. On December 31, 1916, there were 2,634,410 acres of land under cultivation by natives and 257,343 acres by Europeans. Estimated yield of the chief vegetable products for 1918 was rice (701,005 tons), sugar (516 tons), coffee (1,116 tons), manioc (800,700 tons), cotton, cacao, vanilla, (422 tons), tobacco (986 tons) butter beans (19,375 tons), cloves, mulberry trees, and rubber trees. Sericulture is encouraged. The forests abound with many valuable woods, while caoutchouc, gum, resins, and plants for textile, tanning, dyeing, and medicinal purposes abound. The quantity of graphite and caoutchouc exported is at present considerable; the production of graphite for 1917 was 35,000 metric tons.

Cattle breeding and agriculture are the chief occupations of the natives; there were on December 31, 1919, 7,277,609 cattle in the island; 3,086 horses; 270,690 sheep; 140,426 goats; 662 ostriches, and 421,349 pigs.

Silk and cotton weaving are carried on, and the working of metal and the making of panama and other straw hats. The preparation of sugar, rice, soap, tapioca, &c., is being undertaken by Europeans, as well as the canning of meat. There are large meat-preserving factories at Bo-anamary (Majunga), Diego-Suarez, Tamatave, Antananarivo and Antsirabe.

Of minerals, gold (27,141 ozs. in 1918), iron, copper, lead, silver, zinc, antimony, manganese, nickel, sulphur, graphite (27,838 tons in 1917), lignite (first found in Maïch, 1912), and also coal have been found in various parts of the island.

Commerce.

The trade of Madagascar has been as follows in five years :—

—	1915	1916	1917	1918	1919
	£	£	£	£	£
Imports . . .	1,750,694	4,078,225	5,470,823	4,090,792	3,958,909
Exports . . .	2,642,644	3,400,608	3,448,318	3,671,308	7,086,703

The chief articles of import and export in 1917 and 1918 were the following :—

Imports	1917	1918	Exports	1917	1918
	£	£		£	£
Cottons . . .	1,154,224	—	Gold dust . . .	110,554	74,518
Beverages . . .	156,090	823,091	Cattle . . .	28,371	14,566
Machinery . . .	76,442	74,252	Tanning bark . . .	10,184	515
Metals . . .	71,388	112,611	Rice . . .	70,806	212,005
Cement . . .	33,395	19,587	Hides . . .	348,656	242,149
Lime . . .	4,870	3,678	Rafia fibre . . .	182,587	128,075
Clothing . . .	1,330,662	1,979,757	Wax . . .	65,342	37,146

The trade in 1917 and 1918 was distributed as follows :—

From or to	Imports		Exports	
	1917	1918	1917	1918
	£	£	£	£
France	3,920,152	1,763,021	2,600,194	2,441,369
French Colonies . .	300,949	596,674	181,366	495,581
United Kingdom . .	236,365	216,752	499,639	414,496
British Possessions .	630,329	1,275,085	127,021	193,312

According to Board of Trade returns, the imports from Madagascar into Great Britain in 1921 amounted to 376,231 $\frac{1}{2}$ (mainly beans and plumbago), and the exports from Great Britain amounted to 92,858 $\frac{1}{2}$ (mainly cotton goods).

Shipping and Communications.

Tamatave, the principal seaport of the island, is visited by the steamers of two French shipping companies, and the principal ports are connected with each other by coasting steamers plying regularly. In 1918, vessels of 630,320 tons entered and vessels of 632,133 tons cleared at the ports of Madagascar. Of the total tonnage entering 490,563 tons were French, and 78,981 tons were British; and of those clearing, 492,671 tons were French and 81,384 tons British.

There are as yet but few roads in Madagascar in the European sense of the word. At the end of 1920 there were 1,611 miles of metalled roads. Antananarivo is connected by metalled road with Ambalavao, 290 miles to the south; Miarinarivo, 60 miles to the west; Marololo, 240 miles to the north-west; Mahatsara, 160 miles to the east, and Mananjary, one of the lesser east coast ports, 335 miles. Waggon roads have been made from Tamatave to Antananarivo, from Antananarivo to Maevetanana and between most of the chief military posts. Three railways are at present worked in Madagascar. The first is the through railway line between Antananarivo and Tamatave (237 miles) which was opened for traffic in March, 1913. The second is the railway which is being constructed between Antananarivo and Antsirabe (noted for its thermal springs), 107 miles south of Antananarivo, 27 miles of which were opened for traffic in January, 1919. The third is the branch line of the Tamatave railway, from Moramanga to the Antsihanaka provinces, towards the north of the island, which was opened for traffic in October, 1917, as far as Anosiroa, a distance of 61 miles. Total railway mileage on June 30, 1919, 776 miles.

There is postal communication throughout the island. The telegraph line has (December 31, 1918) a length of 4,444 miles, and 6,520 miles of wire. There is cable communication to Mozambique, Mauritius, Réunion, and Aden. In 1918 there were 462 miles of urban telephone line, 1,703 miles of inter-urban circuits, and three Government wireless telegraph stations.

Money and Banks.

The Comptoir National d'Escompte de Paris has agencies at Antananarivo, Tamatave, Diégo-Suarez, Mananjary, Majunga and Tuléar; in 1911 the Bank of Madagascar, with headquarters in Paris, was opened at Tamatave with a capital of 600,000 francs.

The only legal coin is the silver 5-franc piece, with its silver sub-divisions, as well as copper coins of 5 and 10 centimes, but the Italian 5-lire piece and Belgian, Greek, and other coins of equal value are also in circulation. French Bank notes of 5, 10, 20, 50 and 100 francs are also legal tender, as well as, since the war, postage stamps affixed to cardboards, for smaller values, viz., 10, 25 and 50 centimes, and 1 and 2 francs.

MAYOTTE AND THE COMORO ISLANDS.

The archipelago of the Comoro Islands, is formed by the islands of Mayotte, Anjouan, Grande Comore and Moheli. Before 1912, Anjouan, Moheli and Grande Comore were only under French protection; Mayotte alone being a colony. But by a law of July 25, 1912, and a decree of February 23, 1914, the whole archipelago has become a colony, attached to the general government of Madagascar, of which it forms a twenty-third province, the 'Province des Comores.'

The island of Mayotte (140 square miles) had a population (1915) of 13,500. There is an increasing emigration to Zanzibar and Madagascar. The chief product was formerly sugar, but the cultivation of vanilla has now superseded that of the sugar-cane. There are now only two sugar works and two distilleries for rum. Besides vanilla and sugar, cacao, aloes and perfume plants (citronella, ylang-ylang, patchouli, &c.) are cultivated.

Grande Comore, Moheli, Anjouan, and a number of smaller islands, have an area of about 650 square miles and population in 1914 of 84,117. Vanilla, cacao and perfume plants are successfully cultivated. Grande Comore has a fine forest and exports timber for building and for railway sleepers.

The principal imports are cotton fabrics, metals, and rice; the principal exports, hides, sugar, and vanilla.

Consular and other Representatives.

OF GREAT BRITAIN IN MADAGASCAR.

Consul at Antananarivo.—P. Helyar.

There is also a Vice-Consul at Majunga and a Consular agent at Diégo Suarez.

RÉUNION.

Réunion (or Bourbon), about 420 miles east of Madagascar, has belonged to France since 1643. It is administered by a Governor assisted by a Privy Council, and an elective Council-General, and is represented in the French Parliament by a Senator and two Deputies. It has an area of 970 square miles and population (1921) of 173,190, of whom 167,947 were Europeans, 167,789 of French origin; there were also 2,194 British Indians, 403 natives of Madagascar, 885 Africans, 1,052 Chinese, 709 Arabians. The chief towns are: St. Denis, with 21,538 inhabitants in 1921; St. Pierre, 27,895; St. Paul, 19,456; St. Louis, 14,803. The towns are under the French municipal law. Réunion has a lycée with 24 teachers and 327 pupils. Primary education is given in a training school with 56 pupils and 7 teachers, and 174 elementary schools with 398 teachers and 16,731 pupils (1921). The chief port, Pointe-des-Galets, is connected by a coast railway of 80 miles with St. Benoît on the one hand, and St. Pierre on the other. In 1888 this railway was taken over by the State. The chief productions are sugar (62,000 acres), rum, coffee (6,000 acres), manioc, (12,000 acres), tapioca, vanilla, spices. The forests occupy about 150,000 acres. There are 20 sugar factories in the island. The annual production of rum amounts to 1,166,000 gallons, of which 836,000 gallons are exported. The chief imports are rice, grain, &c.; the chief exports are sugar and rum. Total value of imports in 1920, 58,541,861 francs; of exports, 88,980,113 francs. In 1920, 68 vessels of 133,181 tons entered, and 66 vessels of 128,782 tons cleared at the ports of the island. There are about 80 miles of railway. The Tamatave-Réunion-Mauritius Telegraph Cable is open for traffic. During the year 1920, there were 67,000 telephone conversations and 115,000 telegraph communications. There are 34 post offices and 350 telephone stations. The budget for 1920 balanced at 12,170,760 francs. The debt was 1,122,500 francs. The currency of Réunion consists of local bank

notes and token nickel coinage. It has nominally the same value as that of France.

St. Paul and Amsterdam, small islands in the Indian Ocean, belong to France.

Kerguelen, a desolate island, about 50 S. lat. and 70 E. long., was annexed by France in 1893.

British Consul at Réunion.—M. J. T. Piat.

FRENCH SOMALILAND.

The colony of the Somali Coast lies between the Italian Colony of Eritrea and British Somaliland. On the north it is bounded by Cape Doumeirah, which separates it from the Italian possessions; on the south by a line drawn from the wells of Hadou to Guedessa, which separates it from the British possessions; the inland boundary towards Abyssinia being, by convention of March 20, 1897, at a distance of 90 kilometres (about 56 miles) from the coast. The territory has an area of about 5,790 square miles, and the population was estimated in 1921 at about 65,000. It is administered by a Governor, assisted by an Administrative Council. The port of Obock was acquired for France in 1862, but it was not till 1884 that its active occupation began. In 1884 Sagallo and Tajurah were ceded to France; in 1885, Ambado; in 1888 the territory was delimited by agreement with Great Britain; in 1888 a port was created at Djibouti, now the seat of government.

Djibouti has (1921) 8,266 inhabitants, of whom 354 are European (190 French). The natives are made up as follows (1921): Somali, 3,428; Arabs, 3,336; Danakils, 208; Indians, 356; Jews, 109; Sudanese, 230; Abyssinians, 89; Senegalese, 248; total 8,002. In 1902 a French mission school for boys and one for girls were opened at Djibouti; in 1921 it had 150 pupils. The local budget for 1921 balanced at 5,255,000 francs. The country has scarcely any industries, but with the coast fisheries and inland trade there is considerable traffic. The salt mines, opened in 1912, exported in 1918 11,500 metric tons of salt. The chief imports are cotton goods, butter, coal, sugar; the chief exports were coffee, ivory, hides and skins. The total imports in 1919 amounted to 106,301,216 francs, and the total exports (1919) to 66,816,294 francs. The export of the products of Abyssinia in 1919 amounted to 14,990,097 francs. Much of the traffic with Abyssinia which formerly passed by Zailah now goes by railway from Djibouti to Addis Abeba (485 miles). [See also under *Abyssinia*.] The vessels of 3 French, 4 English, and 1 Italian shipping companies visit Djibouti, which is also in communication with Aden by means of French and English steamboats for local traffic. In 1917 there entered at Djibouti 272 steam merchant vessels of 643,290 tons. Of these vessels, 163 were French, 44 English, 33 Italian, 19 Greek, 11 Japanese, 1 Dutch, and 1 Swedish.

FRENCH WEST AFRICA AND THE SAHARA

Since January 1, 1921, French West Africa comprises the following colonies:—(1) Senegal, (2) French Guinea, (3) the Ivory Coast, (4) Dahomey, (5) Upper Senegal-Niger (French Sudan), (6) Upper Volta, (7) Mauritania, and (8) Territory of the Niger.

In 1912 the Military Territory of the Niger was placed under a Commissioner, whose headquarters were at Zinder, the capital. In 1916 the region

of Tibesti was attached, administratively, to French West Africa ; it forms a part of the Territory of the Niger.

The approximate area and population of French West Africa according to the Census of 1921 are shown as follows :—

Colony	Area (in Square Miles)	Population.			Total
		Non-African Races		African Races	
		French	Foreign	French	
Senegal	74,112	3,507	814	1,221,202	1,225,523
Guinea	95,218	751	606	1,874,639	1,875,996
Ivory Coast	121,976	723	107	1,544,845	1,545,680
Dahomey	42,460	470	68	841,705	842,243
French Sudan	617,000	843	140	2,473,606	2,474,589
Upper Volta	154,400	180	11	2,973,951	2,974,142
Mauritania	347,400	135	79	261,532	261,746
Territory of Niger	347,400	215	1	1,083,827	1,084,043
Total	1,800,566	6,829	1,826	12,275,307	12,283,962

A treaty of October 19, 1906, determines the course of the Anglo-French boundary from the Gulf of Guinea to the Niger. The delineation of the boundary was completed in 1912, and approved by the two governments 1914. The British government has leased to France for purposes of commerce two pieces of land, one on the right bank of the Niger between Lealaba and the confluence of the rivers Moussa and Niger, and the other on one of the mouths of the Niger, each to form one block of from 25 to 120 acres with a river frontage not exceeding 436 yards ; the lease, at first, to be for 30 years. It is further stipulated that, within the boundaries indicated in the convention, British and French as regards persons and merchandise shall enjoy for 30 years the same treatment in all matters of river navigation, of commerce, and of tariff and fiscal treatment and taxes of all kinds.

Under the Anglo-French Convention of April 8, 1904, the river port of Yarbata on the Gambia (belonging to the British colony of Gambia), with all its landing places, was ceded to France, and, if this port should prove inaccessible to sea-going merchantmen, access to the river will be granted to France at an accessible point lower down. At the same time the Los Islands were ceded to France.

By an agreement, dated July 6, 1911, between England and France, the boundary line between French Guinea and Sierra Leone was readjusted.

By a Convention between Great Britain and France the former recognised the right of France to all territory west of the Nile basin, which practically includes the whole of the Sahara (exclusive of the Libyan Desert), and the State of Wadai. The French Sahara may be roughly estimated at about 1½ million square miles.

Over the whole of French West Africa there is a Governor-General, who is assisted by a Council, the seat of the general government being at Dakar. The Colonies are each under a Lieutenant-Governor, subject to the direction of the Governor-General, who has been relieved of the direct administration of any portion of his Government, and is free to devote the whole of his attention to directing and controlling the common interests of all the Colonies. To facilitate this object a General Budget has been created, drawn up by the Governor-General, which provides for all the services which are common to all the Colonies, and the funds for which are

918 FRANCE:—FRENCH WEST AFRICA AND THE SAHARA

provided by the customs and shipping dues of each of the Colonies, which have now only their internal revenues to depend upon for their local budgets, which have, however, been relieved of the cost of all the general services.

The general budget of French West Africa for 1921 amounted to 64,604,240 francs. The military forces in peace times consist of 18,000 men, of whom 3,000 are Europeans. The police force numbers 5,500.

For primary education there are altogether 487 schools (230 village schools, 50 regional schools, 10 urban schools, 10 girls' schools, 181 schools for adults and 6 central groups). For higher technical education there are 4 institutions; of special schools there are 4 for half-caste orphans, 3 'medersas,' and 2 schools for secondary education. The teaching staff numbers 600, and over 23,000 children are receiving elementary instruction about 3,000 of the pupils being girls.

The imports into French West Africa are mostly food substances, tissues, mechanical implements, and beverages; the exports from these colonies are chiefly fruits, oils and oil seeds, as well as rubber, cotton, cacao and timber. The following is a comparative table of values of the imports and exports during 1919 and 1920 for each of the colonies:—

Colonies	Imports		Exports	
	1919	1920	1919	1920
	francs	francs	francs	francs
Senegal	198,164,926	443,895,496	202,178,941	428,690,328
French Guinea	25,918,941	47,401,146	23,535,011	34,192,917
Ivory Coast	23,537,038	55,180,170	23,478,353	60,213,004
Dahomey	44,384,684	93,655,790	70,104,510	63,650,651
French Sudan	—	14,505,699	—	2,304,344
Total	292,609,589	654,638,301	324,296,815	589,051,244

In 1919, 3,169 vessels of 6,430,949 tons entered and cleared the ports of French West Africa.

There are 1,658 miles of railway and 11,798 miles of telegraph. In 1921 there were 247 post offices, divided as follows:—Senegal, 42; French Sudan, 57; Guinea, 35; Ivory Coast, 45; Dahomey, 30; Mauretania, 9; and Territory of the Niger, 16.

The use of French weights and measures, and money, is compulsory throughout French West Africa.

Governor-General of French West Africa.—M. Merlin. Appointed January, 1918.

The colony of **Senegal** consists of:—

1. The four municipal communes of St. Louis, the capital of the Colony (population, 1917, 23,326, French, 307); Dakar, a fortified naval station, and the seat of the Government General of French West Africa (population, 1918, 25,468, French, 2,791); Rufisque (population, 11,414, French, 205); and Goree (population, 1,444, French, 67). The total area is 438 square miles. The natives of these towns and their descendants are French citizens, and have the right of vote.

2. The territories of direct administration, in which the Government exercises absolute authority, which consist of:—

The outskirts of the communes of Dakar, Rufisque and St. Louis, and one kilometre on each side of the Dakar-St. Louis Railway, with the principal parts of Hann, Pout, Thiès, Tivaouane, Pire, Macklié, Mekhe, Kelle, Kébémér, Guéoul, Louga, Sakal.

A rectangle with a front of two kilometres and a depth of one kilometre around the posts of Richard Toll, Dagana, Podor, Saldé, Matam, and Bakel on the river Senegal ; Kaolack, Fatick, and the island of Foundiougne in the Sine-Saloum ; Sedhiou, Ziguinchor, and the island of Carabane on the river Casamance ; and Portudal, Nianing, and Joal on the sea coast east of Rufisque.

In these territories the natives are not French citizens, and are not electors.

The former Protectorate has been restored to the Colony, but with a separate budget. The total population of Senegal in 1921 was put at 1,225,523 (including 4,321 Europeans), and the area 74,112 sq. miles.

The Colony is represented in the French Parliament by a deputy.

The Colony is administered by a Lieutenant-Governor, assisted by a Colonial Council of 40 members, 20 elected by French citizens and 20 by representatives of native chiefs of cantons and provinces. The Colony is divided into 11 'circles,' each under the rule of an administrator. The local budget for 1921 was 30,528,050 francs.

All towns having a sufficiently numerous European or assimilated native population have urban schools giving the same instruction as the French primary schools, modified to suit local requirements. At Dakar there are grouped superior technical schools common to all the colonies, normal school, professional school, commercial and administrative school, a school of medicine. At St. Louis are a secondary school, a superior primary school, a professional school for interpreters, kaid's (native judges), and chief's sons. There is a large hospital for natives at Dakar.

The soil is generally sandy. The natives cultivate ground-nuts, millet, maize, and some rice ; other products are castor beans, some coco-nuts, gum from Mauritania, and rubber from the Casamance river. Ground-nuts form the bulk of the exports. A salt industry is being developed.

Native industries comprise weaving, pottery, brick-making and jewellery.

Imports in 1920, 443,167,955 francs ; exports, 428,690,328 francs. The chief imports are cottons, foodstuffs, metal-work, coal. The chief exports are pea-nuts (236,719,556 francs in 1920), hides and skins, rubber and gums.

There are 1,494 miles of telegraph and about 100 miles of telephone lines. A submarine cable from Brest to Dakar was completed in April, 1905, so that the French West African Colonies are now independent of foreign cables. There are three other cables, one Spanish, one French West African, and the third belonging to a South American company.

One railway connects Dakar, Rufisque and St. Louis (165 miles) ; another one Thiés and Kayes (Upper-Senegal-Niger) 435 miles (350 miles open).

There is a river service on the Senegal from St. Louis to Kayes, the former a principal town of Upper-Senegal-Niger (490 sea miles) on the Senegal river, during the rainy season, and extensive works for the improvement of the river have been carried out. The Senegal is closed to foreign flags. Dakar, the principal port, is in regular communication with French ports by the steamers of 4 French lines, and with Liverpool by a British line. In 1920 2,210 vessels of 2,844,047 tons entered, and 2,201 vessels of 2,654,025 tons cleared the ports of the colony. Works are in progress for the extension and deepening of the harbour, the erection of sheds and workshops. The dry dock at Dakar which was completed in 1908, can take boats 630 feet long. The Bank of West Africa (established June 29, 1901), with a capital of 6,000,000 francs, and reserve funds 3,920,000 francs, was founded for the purpose of carrying on financial, industrial, or commercial operations ; it has a branch at Dakar, and agencies at St. Louis, and at Rufuquer. La Banque Française de l'Afrique Equatoriale has a branch at Dakar.

920 FRANCE:—FRENCH WEST AFRICA AND THE SAHARA

H. B. M.'s Consul-General at Dakar (for French Western Africa, including the Sudan).—R. C. F. Maugham.

Consul at Senegal.—J. Cuthbertson Smith.

French Guinea lies on the coast between Portuguese Guinea and the British colony of Sierra Leone, and extends inland so as to include the territories of Koumbia, Dinguiray, Sigui, Kouroussa, Kankan, Kissidougou, Beyla, Macenta and N'zérékoré. The area is about 95,218 square miles, and the population was, in 1920, 1,851,200, including 1,200 Europeans (1,100 French). A regular system of Government lay schools has recently been introduced all over French West Africa. The principal products are palm oil and nuts, rubber, millet, earthnuts, rice, gum, and coffee, which is grown in the Rio Nunez region. There is an experimental garden near Konakry (the capital) where the culture of bananas, pineapples, rubber trees, and other plants is being tried. Futa Jallon contains cattle in abundance. In 1919 there were 420,000 cattle, 102,000 sheep, 2,000 goats, and 2,800 horses. Gold is found in the river Tinkisso and in the Bouré and Siecké districts. Imports in 1920, 47,401,146 francs; exports, 34,192,917 francs. The principal exports were rubber, cattle, ground-nuts, hides, wax, wool, and palm-kernels. Number of vessels entered in 1919 was 169, of 288,614 tons; number cleared 173, of 292,780 tons. A network of roads is being made to connect with the railway station from Konakry to the Niger. The French Guinea railway which runs from Konakry on the coast to the Niger at Kouroussa (366 miles long) was opened in January, 1911, and in August, 1914, was continued to Kankan (412 miles from Konakry). The jetty 1,066 feet long, at Konakry has been completed. In the colony there are 2,556 miles of telegraph and 43 miles of telephone line, with 6 miles of submarine line. The Colony is connected by cable with France and Pernambuco; also with Freetown, Monrovia, and Grand Bassam. Konakry is visited regularly by the steamers of two French and one English company. The budget of the colony provided for 1920 the sum of 13,124,800 francs.

The **Ivory Coast** lies between Liberia and the British Gold Coast Colony. It has common frontiers with French Guinea and Upper-Senegal-Niger Colonies. France asserted and obtained rights on the coast about 1843, but did not actively and continuously occupy the territory till 1883. Area about 121,976 square miles; population, 1,545,680; Europeans, 835. The seat of administration is Bingerville, the capital, formerly called Adjame (European population, 76). There is a central school group at Bingerville and a number of Government schools in the districts. The chief ports, in a populous and commercial point of view, are Grand Bassam, with a lagoon (124 miles long, and 12 to 15 feet deep), forming an excellent harbour of refuge; Assinie, also with a lagoon; Grand Lahou, the lagoon of which is connected by means of a canal with the lagoon of Grand Bassam; Sassandra, with a pier, and Tabou, which has a wireless station. The chief centres in the interior are Abidjan, Dimbokro, Bouaké, Aboisso, Bondoukou, and Korhogo. The natives cultivate maize, rice, plantains, pine-apples, and many other fruits. The Europeans culture with success coffee trees and cocoa trees, especially in Elima near Assinie and in M'Bato near Bingerville. Coco-nuts and rubber are collected. The mahogany forests inland are worked. Gold is found near Grand Bassam in Baouli, on the Comoe and Bia Rivers, in Idenie. The imports in 1920 amounted to 55,180,170 francs, and the exports to 59,856,245 francs. Chief imports in 1920 were, tissues, 11,904,000 francs; tobacco, 2,210,000 francs; wines, 1,021,800 francs; petroleum, 1,657,000 francs; automobiles, 1,114,000 francs. Chief exports were, palm

kernels, 11,238,940 francs; palm oil, 18,023,377 francs; coffee, 86,328 francs; cocoa, 2,656,388 francs; rubber, 205,000 francs; mahogany, 20,370,876 francs; other timber, 3,156,400 francs; cotton, 1,351,994 francs. The ports of the Colony are visited by liners of several French, English and Belgian shipping companies. Number of vessels entered in 1920, 465 of 1,238,008 tons, and cleared 467 vessels, of 1,232,853 tons. From Abidjan, on the north side of the lagoon, a railway has been constructed, running between Abidjan and Bouaké (197 miles). Works are now contracted to lengthen this to the north, to the Niger and Upper Volta. At the end of 1918, there were 2,300 miles of telegraphic and 117 miles of telephonic lines. The telegraph connects the principal towns and extends to adjoining colonies. Telephonic communication exists between Bassam and Bingerville and other places. The budget of the colony for 1921 has been fixed at 15,074,680 francs.

Dahomey stretches from the coast between Togoland on the west and the British possessions of Lagos and Nigeria on the east, and extends northwards to the French Military Territories. France obtained a footing on the coast in 1851, and gradually extended her power until in 1894 the whole kingdom of Dahomey was annexed. The colony has only about 70 miles of coast, but opens out northwards into a wide hinterland. The area in 1920 was 42,460 square miles, and the population 860,590, including 590 Europeans. The seat of government is Porto Novo (the chief business centre), which has about 20,000 inhabitants. Village, regional, and urban schools are instituted under the new West African educational system. The natives are of pure Negro stock, and belong to the Fon branch of the Ewe family. They are industrious agriculturists in the coast region, and grow maize, manioc, yams, and potatoes. The forests contain oil palms, which have been profitably utilized. These furnish the chief exports—kernels and oil. Cotton cultivation has recently been successfully introduced in the central provinces. At Porto Novo there is an experimental station. Imports in 1920, 93,665,790 francs; exports, 63,650,651 francs. The principal exports were palm kernels, 29,342 tons in 1920; palm oil, 11,417 tons in 1920.

There are few roads in the colony, but in the last four years they have been greatly improved. A new metalled road (310 miles in length) for motor traffic runs from Savé to the Niger. At Kotonu an iron pier has been erected, and from that port a railway runs into the interior to Savé (156 miles) with a branch line to Whydah and Segborué in Lake Aheme (20 miles). The line is intended to run to Chaoru (400 miles). The gauge is a metre. A metre gauge railway has also been constructed from Porto Novo to Pobé (50 miles) along the Lagos frontier. A telegraph line connects Kotonu with Abomey, Togoland, the Niger, and Senegal. In the colony there are 1,389 miles of telegraph line, and 70 miles of telephone line. In 1919, 114 vessels of 259,887 tons entered, and 123 vessels of 277,003 tons cleared the ports of Dahomey. French and English coins are in circulation. The budget of the colony for 1919 provided for the sum of 5,921,000 francs. The local budget for 1920 was 7,785,175 francs.

The Colony of French Sudan was formed in 1904 from the Territories of Senegambia and the Niger, less the Senegal Protectorate, which was restored to Senegal. Its old name of Upper Senegal-Niger was changed to French Sudan by decree of December 4, 1920.

The Colony is bounded on the north by the Algerian sphere; on the west

these ports carrying merchandise to and from the colony valued at 56 million francs.

The French Minister of the Colonies has lately announced that the French Government proposes to carry on the work started in Togo by the Germans and the British, along lines which should both benefit the natives very greatly and also help France in her work of reconstruction.

TUNIS.

(AFRIKIYA.)

Government.—*Sidi Mohamed En Naceur Bacha Bey*, born 1855, son of Mohamed Pasha Bey, nephew of Sidi Ali, former Bey of Tunis; succeeded his cousin, Sidi Mohamed el Hadi, May 12, 1906. The heir-presumptive is *Sidi Mohamed el Habib Bey*, born 1858.

The reigning family of Tunis, occupants of the throne since 1705, descend from Hussein ben Ali, commonly believed to be a native of the Isle of Crete, who made himself master of the country, acknowledging, however, the suzerainty of the Sultan of Turkey.

After the French invasion of the country in the spring of 1881, the treaty of Kasr-es-Said (May 12, 1881), confirmed by convention signed June 8, 1883, placed Tunis under the protectorate of France. The government is carried on under the direction of the French Foreign Office, which has a special department for Tunisian affairs, under the control of a French Minister Resident-General, who is also Minister of Foreign Affairs, and a ministry of 11 heads of departments, 8 of the ministers being French and 3 Tunisian. The country is divided into 19 districts (contrôles civils), and 6 military circles; the district governors (contrôleurs) are French; the subordinate officials (Caidas, Kahias and Sheiks) are Native. French tribunals administer justice between subjects of European powers, and also between them and natives (tribunaux at Ouzara and Charaâ); there are Native courts for cases between natives. In 1914 the Tunisian penal law was codified. French administration in Tunis has been confirmed by conventions with all the European Powers regulating the status and the conditions of trade of their respective citizens within the Regency.

French Resident-General.—Lucien Saint (appointed November 24, 1920).

Area and Population.—The present boundaries are: on the north and east the Mediterranean Sea, on the west the Algerian province of Constantine, and on the south the great desert of the Sahara and Libya. Area about 50,000 English square miles, including that portion of the Sahara which is to the east of the Djerid, extending towards Gadamés.

According to the census held on March 6, 1921, the total European population was 156,115, composed of 54,476 French (exclusive of the army of occupation and of the navy), 84,799 Italians, 13,520 Maltese, 664 Spaniards, 920 Greeks, and 1,736 other foreigners. The total native population was 1,937,824, of whom 1,889,388 were Arabs and Bedouins, and 48,436 Jews.

The capital, the city of Tunis, had a population of 79,175 Moslems, and 19,029 Jews, besides 22,206 French, 42,592 Italians and 7,379 Maltese. By means of the canal, which was opened in 1893, Tunis is directly accessible to ocean-going vessels.

The bulk of the population is Mohammedan under the Sheik-ul-Islam, and the revenue from the "Habus" lands, like that from the "Wakf" lands in Egypt, is applied to religious, educational, and charitable purposes. There are about 35,000 Roman Catholics, under the ministration of the Archbishop of Carthage, and about 25 other clergymen. The Greek Church (400), the French Protestants, and the English Church are also represented, and there are 30 English Protestant missionaries at work.

Education.—Within the Regency there are about 319 public schools, 8 lycées and colleges, and 28 private schools (of which 6 Jewish schools are provided for by the Government). In the schools there are 44,500 pupils, of whom 27,168 are boys. Of the total number of pupils, 10,387 are French; 13,000 Mussulman; 9,542 Jews; 9,330 Italian; 1,910 Maltese and 329 others. In the Great Mosque at Tunis there is a Mohammedan university. In the city are 88 and in the interior 1,219 Mussulman primary schools, some of them assisted by Government funds. 24 Moslem apprenticeship-schools have been created during the last few years numbering 490 native pupils. Many private schools have recently sprung up at Tunis and Sfax. The abolition of congregational teaching decreed in France has been extended to the Regency as regards French children. The Italian Government and certain Italian societies still maintain Italian schools at Tunis and other large towns.

Finance.—Receipts and expenditure for 5 years:—

	1917	1918	1919	1920	1921
	£	£	£	£	£
Revenue	3,024,915	2,795,822	4,803,432	5,692,633	9,841,996
Expenditure	2,612,930	2,753,391	4,803,409	5,688,410	9,840,178

The estimates of ordinary receipts and expenditure for the year 1920 were as follows:—

Receipts		Expenditure	
	£		£
Taxation:—		Beylical Civil List	97,882
Direct	1,013,476	Residency and direct services	622,521
Indirect	1,028,812	Charges on Public Debt	967,200
Monopolies:—		Departments:—	
Tobacco	1,427,000	Finance	1,450,726
Others	296,580	Post Office	447,440
Post Office, Telegraph, &c.	174,600	Local Administration	658,598
Royalties and Miscellaneous	852,165	Agriculture and Commerce	179,208
		Education	482,929
		Public Works	733,176
		Army	48,730
Total	£5,692,633	Total	£5,688,410

At the end of the year 1921 the Tunisian Public Debt amounted to about 580,000,000 francs. The yearly charge for interest together with sinking fund is 891,019*fr.* In normal conditions, the 1903 loan (640,000*fr.*) will be extinguished in 1968, and the rest in 1988.

Defence.—The army of occupation consists of 25,000 men, including 1,145 officers, supported by native regiments (*tirailleurs* and *spahis*).

Production and Industry.—Tunis may be divided into five districts—the north, characterised by its mountainous formation, having large and fertile valleys (*e.g.*, the valley of the Mørjerdah, and the plains of Mornag, Mateur, and Beja); the north-east, with the peninsula of Cap Bon, the soil being specially suited for the cultivation of oranges, lemons, and citrus fruits; the Sahel, where olive trees abound; the centre, the region of high table lands and pastures; and the south, famous for its oases and gardens, where dates grow in profusion. The chief industry is agriculture, and large estates predominate. The area of the country is divided as follows:—7,925,000 acres of tillage land; 2,740,000 acres of forest, containing 12,008,043 olive trees and 2,137,975 palm trees; 58,835 acres of vineyards; and 11,585,000 acres of stockland. The area of wheat in 1920 was 1,334,415 acres; the production was 142,300 tons; of barley 937,500 acres, and the production 57,000 tons; of oats 151,900 acres, and the production 21,500 tons. For 1921 the results of the cereal crops were given as follows:—Wheat, 250,000 tons; barley, 243,000 tons; and oats, 62,000 tons. The total area of vineyards in 1920 was 58,535 acres, and 10,952,276 gallons of wine were produced. In the south of Tunis the date palms produced in 1920, 87,520,000 pounds of dates. Other products are almonds, oranges, lemons, shaddockes, pistachios, alfa grass, henna, and cork. The cork forests in the north-west have an area of 617,440 acres. Considerable areas of agricultural land have been acquired either on lease or by purchase by immigrants. In 1921 the total area occupied by French colonists was 2,530,000 acres, by Italians 427,000 acres, and by other Europeans 116,200 acres.

In 1920 the farm animals were:—horses, 75,000; asses, 163,739; mules, 30,136; cattle, 537,088; sheep, 2,182,749; goats, 1,285,047; camels, 140,762; pigs, 18,699.

In 1920 40 mines were worked; value of ore exported in 1920, 1,605,155*l*. These are being developed, and the output steadily increases. Lead-ore, zinc-ore, and iron are all found. By far the greatest development has been in phosphates, the output of which is increasing yearly. Mineral output in 1920:—lead, 23,600 tons; zinc, 9,600 tons; iron, 434,400 tons; manganese, 1,275 tons; phosphate of lime, 1,075,000 tons; total value of the minerals, 1920, 5,378,740*l*.

Native industries are the spinning and weaving of wool for garments, carpet weaving, leather embroidery, saddle making, the manufacture of slippers, pottery (in ancient style), and matting; tanning and silk weaving are declining.

The fisheries are principally in the hands of Italians and Tunisians. In 1920, 2,835 boats (7,201 tons) were engaged in this industry, with a total of 10,386 men. Sardines, anchovies, allaches, tunny (5,695 tons of fish, valued at 552,764*l*. in 1920) were caught.

Commerce.

Commerce.—The imports and exports in recent years have been to the following amounts (including precious metals):—

	1916	1917	1918	1919	1920
	£	£	£	£	£
Imports	5,370,213	5,681,667	8,297,703	11,430,440	25,422,502
Exports	4,751,798	5,026,883	5,181,928	8,081,155	13,482,299

Imports and exports in 1920 were :—

Imports	Value	Exports	Value
	£		£
Textiles ¹	5,589,407	Grain, mealy food	1,456,506
Colonial produce	1,860,955	Marble, stone, minerals	5,106,043
Marble, stone, and minerals	1,781,637	Crude metals	1,907,410
Manufactured metals	3,255,108	Beverages and wines	815,949
Hides	651,513	Textiles	541,868
Yarns	651,125	Fruits and seeds	489,109
Timber	774,018	Live Animals	347,681
Mealy foods	2,331,739	Hides	569,252

¹ These goods coming chiefly from England.

The distribution of the trade in 1920 was as follows :—

Country	Imports	Exports	Country	Imports	Exports
	£	£		£	£
France	11,863,010	7,069,419	India	348,299	14,179
United Kingdom	2,769,035	1,663,669	Switzerland	338,761	20,946
Italy	2,107,147	1,832,528	Japan	340,611	10,898
U.S. of America	3,461,639	17,870	Spain	205,312	122,229
Algeria	1,286,817	1,016,898	Egypt	16,558	272,083
Belgium	405,498	383,060	Malta	62,986	222,576
Lybia (Tripoli)	427,182	257,773	Sweden	239,612	17,071
Rumania	553,672	—	Brazil	211,856	—

Total trade between Tunis and the United Kingdom (according to Board of Trade returns) for 3 years :—

	1913	1919	1920
	£	£	£
Imports from Tunis into U.K.	862,461	2,383,620	1,130,788
Exports to Tunis from U.K.	476,263	1,769,328	661,993

In the year 1920 there entered the ports of the Regency 8,428 vessels of 2,355,319 tons ; and cleared 8,333 of 2,339,621 tons.

Good roads to the length of 2,886 miles have been constructed between 1882 and 1920.

Length of railways, 2,493 miles on January 1, 1921.

There were in 1920, 3,218 miles of telegraphs ; 253 telegraph offices ; messages (1920), 1,694,273. In 1920 urban telephone systems had 2,727 miles of line ; inter-urban systems had 6,767 miles of wire. There were in 1920, 467 post offices ; letters sent and received, internal service, 43,553,328 ; external service, 53,831,376.

Money, Weights, and Measures.—The Banque d'Algérie has begun operations in the Regency and issues Tunisian bank notes.

The legal coinage since 1892 consists of pieces similar to the French, the pieces being coined in France.

The ounce = 31·487 grammes ; the multiples of the ounce are the various denominations of the *Kottolo*, which contains from 16 to 42 ounces.

The *Kaffis* (of 16 *whibas*, each of 12 sahs) = 16 bushels.

The principal measure of length is the *pik* : the *pik Arbi* for linen = ·5392 yd. ; the *pik Turki* for silk = ·7058 yd. ; the *pik Andoulsi* for cloth = ·7094 yd.

French weights and measures have almost entirely taken the place of those of Tunis, but corn is still sold in *kaffis* and *whibas*.

British Consul-General at Tunis.—P. C. Sarell.

There is a Consul at Bizerta, and Vice-Consuls at Sfax and Susa ; and Consular Agents at Mehdiâ, Monastir, Gabes, and Djerba.

AMERICA.

GADELOUPE AND DEPENDENCIES.

Guadeloupe, situated in the Lesser Antilles, consists of two islands separated by a narrow channel, called 'Rivière Salée.' That on the west is called Guadeloupe proper or Basse-Terre, and that to the east, Grande-Terre, with a united area of 138,000 hectares (532 square miles), and a circumference of 275 miles ; it has five dependencies consisting of the smaller islands, Marie Galante, Les Saintes, Désirade, St. Barthélemy, and St. Martin, the total area being 688 square miles. It is under a governor and an elected council, and is represented by a senator and two deputies. Population (1921) 229,822. Instruction (1920-21) is given in 1 *lycée* with 415 pupils, a secondary course for girls at Pointe-à-Pitre, with 240 pupils, and 101 public

and private elementary schools. The public elementary schools have 361 teachers and 15,354 pupils, and the private have 850 under 28 mistresses. The seat of government is *Basse-Terre* (8,318 inhabitants). *Pointe-à-Pitre* (27,679 inhabitants) has a fine harbour. Revenue and expenditure balanced at 16,954,562 francs for 1921. Outstanding debt, December 31, 1920, 472,254 francs.

Chief products are sugar, coffee, cacao, and rum. For local consumption there are grown bananas, sweet potatoes, manioc, tobacco, indian corn, and vegetables.

In 1920, the imports were 117,858,064 francs, and the exports 146,389,180 francs (sugar, 14,265 tons; coffee, 1,069 tons; rum, 16,615,518 litres; cacao, 666 tons; vanilla 26,636 tons). Guadeloupe is in direct communication with France by means of two steam navigation companies. A new wireless station at *Destrellan* was opened in 1918. Within the islands traffic is carried on by means of roads. The Bank of Guadeloupe, with a capital of 3,000,000 francs, and reserve funds amounting to 843,746 francs, advances loans chiefly for agricultural purposes, even on the security of jewellery. The Royal Bank of Canada has also established a branch. There is likewise another bank, the *Banque de Commerce*, but while this is a private institution, the *Banque de la Guadeloupe* and the Royal Bank of Canada have a semi-official character. Silver coin has disappeared from circulation; nickel treasury tokens (*bons*) of ½ franc and of 50 centimes are authorised up to a total emission of 1,000,000 francs.

British Vice-Consul at Guadeloupe.—J. E. Devaux.

GUIANA.

The colony of French Guiana, on the north-east coast of South America, is administered by a Governor, assisted by a Privy Council of 5 members. The colony has a Council-General of 16 members elected by French citizens resident in Guiana, and is represented in the French Parliament by one deputy. Area about 32,000 square miles, and population, census of 1911, 49,009. *Cayenne*, the chief town and only seaport, has a population of 13,527, and the other 14 communes have 12,798. These figures are exclusive of the population of the penal settlement of *Maroni*, of the floating population of miners without any fixed abode, as also officials, troops, and native tribes. At *Cayenne* there are a court of first instance, a court of appeal, and justices of the peace, with jurisdiction in other localities. The military force consists of 200 European officers and men. Primary education is given gratuitously since 1889 in lay schools for the two sexes in the communes and many villages. There is also a college for secondary and higher primary education, with a department for professional education and a normal course for teachers. There are also several Congregational schools. The school population in 1920 was 3,023. The penal settlement also has 4 schools with 163 pupils. The budget for 1918 amounted to 3,490,000 francs, receipts and expenses. The country has immense forests rich in many kinds of timber. There is little agriculture in the colony; only about 7,500 acres are under cultivation. The crops consist of rice, maize, manioc, cocoa, coffee, sugarcane, indigo, tobacco, and gutta percha. The most important industry is gold-mining (placer). Silver, iron, and phosphates are also worked. The exports consist of cocoa, phosphates, various woods, gold, rosewood essence, and hides. The total imports in 1920 were valued at 40,405,823 francs, and the exports at 42,674,734 francs. There are three ports—*Cayenne*, *Saint-Laurent-du-Maroni*, and *Oyapoc*. *Cayenne* is visited once a month by a cargo boat of the *Compagnie Général Transatlantique*. There is also

steamboat communication between the capital and the other towns and with the neighbouring colonies. There are three chief and many secondary roads connecting the capital with various centres of population in the interior.

Since 1885 Guiana has had a penal settlement for habitual criminals and convicts sentenced to hard labour. On December 31, 1920, the penal population consisted of 3,633.

The Bank of Guiana, under Government control, with a capital of 600,000 francs, with statutory reserve fund amounting to 650,000 francs, advances loans for agricultural and other purposes.

MARTINIQUE.

The colony is under a Governor, a General Council, and elective municipal councils. It is represented by a senator and two deputies. Area 385 square miles, divided into 31 communes; population (census 1921) 244,439. The military force (1920) consists of one company of infantry and a battery of artillery. There is (1920) a law school (at Fort-de-France) with 70 students; a lycée for boys, with 652 pupils; a high school for girls with 815 pupils; primary schools, with 21,037 pupils (including 7 private schools); a commercial school, and a school of arts and crafts (93 pupils). Chief commercial town, Fort-de-France (population, 26,399). The budget for 1920 balanced at 16,198,602 francs. Sugar, rum, and cocoa are the chief productions, then come coffee, tobacco, and cotton. There are 15,000 hectares under the food-producing crops. Tobacco culture is under special regulations. There are 15 sugar works, 126 rum distilleries, and other industrial establishments. In 1920 sugar to the value of 17,546,768 francs, rum to the value of 89,464,153 francs, and cocoa to the value of 2,181,370 francs were exported. The total imports in 1920 were valued at 132,186,479 francs, and the exports at 128,953,479 francs. Vessels entered in 1920, 643 of 455,561 tons; vessels cleared, 649 of 542,138 tons. The island is visited regularly by the steamers of French and American companies. For local traffic there are subsidised mail coaches and motor-cars; and subsidised steamers ply on the coast. The colony is in telegraphic communication with the rest of the world by telegraph cables. The Bank of Martinique at Fort-de-France with a capital of 3,000,000 francs, and a branch of the Royal Bank of Canada advances loans for agricultural and other purposes.

ST. PIERRE AND MIQUELON.

The largest islands of two small groups close to the south coast of Newfoundland. Area of St. Pierre group, 10 sq. miles; population in 1921, 3,419; area of Miquelon group, 83 sq. miles; population, 499; total area, 93 sq. miles; total population, 3,918. Since May, 1906, an Administrator organises and regulates the various branches of the public service. He is assisted by a consultative council of administration and municipal councils. Chief town, St. Pierre. Primary instruction is free. There are 3 public schools for boys, and 3 for girls, with (in all) 27 teachers and 618 pupils. There are, besides, infant schools, 'salles d'asile,' frequented by 116 children. There are a private boarding school and four private schools with 434 pupils.

The islands, being mostly barren rock, are unsuited for agriculture. The chief industry is cod-fishing. Imports in 1920, 40,846,742 francs; exports, 28,047,100 francs. The imports comprise textiles, salt, wines, foodstuffs, meat; and the exports, cod, dried and fresh, and fish products. St. Pierre is in regular steam communication with North Sydney and Halifax; and

is connected by telegraph cable with Europe and the American continent. Local budget for 1921, 1,818,383 francs. Expenditure of France (budget 1921), 280,607 francs.

Acting British Consul.—Fred H. White.

AUSTRALASIA AND OCEANIA.

NEW CALEDONIA AND DEPENDENCIES.

New Caledonia is administered by a Governor assisted by a Privy Council consisting of the Secretary-General, the Procureur-Général (the head of the Judicial administration), the Superior Commandant of the Troops, the head of the Department of Domains and Colonisation, and two notables of the colony appointed by the President of the Republic. The colony has also an elective Council-General. Nouméa, the capital, has a municipality; other centres of population are locally administered by municipal commissions. The colony contains a penal settlement at Nou Island. Since 1896, however no convicts have been sent thither, and the convict element in the population is quickly decreasing.

The island is situated between the 20° 1' and 22° 26' parallels south latitude, and 161° 30' and 144° 40' east longitude. It has a total length exceeding 248 miles and an average breadth of 31 miles. Area, 7,650 square miles. According to the census of March 5, 1911, the population was 50,608, of whom 13,138 were free, 5,671 of convict origin, and 28,075 Melanesians and Polynesians. On January 1, 1921, the population of convict origin totalled 2,310. Nouméa had (1921) 10,053 inhabitants, of whom 6,502 were free. The immigrants from France are not numerous. Other immigrants (July 1, 1921) were 2,098 Javanese, 1,032 Tonkinese, 67 Indians, and 378 islanders from the New Hebrides. Primary instruction is provided in public and also in private elementary schools, the latter being assisted by the municipalities. In 1919 there were 50 public and private primary schools with 2,591 pupils (1,252 being girls), and 70 native schools with 2,408 pupils. In Nouméa the 'Collège La Pérouse' gives classical tuition

to 120 pupils and professional instruction (iron and wood) to 80 pupils. Local budget for 1921, receipts and expenses, 18,359,125 francs. In 1921 the military force consisted of 400 Europeans. Of the total area more than half is mountainous or not cultivable; about 1,600 square miles is pasture land; about the same area is cultivated or cultivable; and about 500 square miles contain forest which is being worked. The land is divided into 3 domains: that of the state (in which gratuitous concessions may be made); that of the penal establishment (about 400 square miles); and that of the native reserve. The chief agricultural products are coffee, copra, cotton, manioc (cassava), maize, tobacco, bananas, pine-apples. There are 200,000 cattle and about 25,000 sheep. Local industries are developing; there are a grain storage and cleaning depôt, meat preserving works, barking mills for coffee and cotton, and two blast furnaces melting nickel ore. About 179,563 hectares of mining land are owned, and 90,722 hectares have been granted for prospecting. In 1920 the mineral export comprised nickel ore, 3,424 metric tons; chrome ore, 91,634 tons, and manganese, 2,693 tons. The value of the mineral export was 11,912,400 francs. The blast furnaces produced 3,701 tons of nickel valued at 8,157,000 francs. The imports in 1920 were valued at 47,472,000 francs, and the exports at 43,043,000 francs. The imports comprise wine, coal, flour, rice; the exports, minerals, coffee, copra, rubber, guano, and preserved meats. In 1920, 124 vessels of 128,631 tons entered and 124 of 122,346 tons cleared at the ports of New Caledonia. Nouméa is connected three times monthly with Sydney in N. S. Wales by regular steamers sailing monthly, and by other vessels sailing irregularly. There is a mail service by steamer along the coast. A railway from Nouméa to Bourail (90 miles) is under construction; it is open for traffic to Paita (about 20 miles). Harbour improvements are in progress; a pier and a slip are being constructed, dredging operations are about to begin, and a wharf and a dry dock are contemplated. There are 987 miles of telegraph line and 402 of telephone line.

Dependencies of New Caledonia are:

1. The Isle of Pines, 30 miles to the south-east, with an area of 58 square miles and a population of about 600.
2. The Wallis Archipelago, north-east of Fiji, with an area of 40 square miles and about 4,500 inhabitants. The islands were placed under the French protectorate in 1887. There is a French Resident, and the archipelago is in regular communication with Nouméa.
3. The Loyalty Islands, 60 miles east of New Caledonia, consisting of 3 large islands, Maré, Lifou, and Uvéa, and many small islands with a total area of about 800 square miles. The chief culture in the islands is that of coconuts; the chief export, copra and rubber.
4. The Huon Islands, 170 miles north-west of New Caledonia, a most barren group.
5. Futuna and Alofi, south of the Wallis Islands, with about 1,500 inhabitants, were annexed by France in 1888.

The **New Hebrides**, in accordance with the Anglo-French convention of February (ratified in October), 1906, are jointly administered by the High Commissioners of His Britannic Majesty and the French Republic. In 1914 an Anglo-French conference was appointed to devise means of remedying the defects of the condominium. There are French and English courts, and a mixed court with a judge foreign to both nations. Maize, coffee, vanilla, coconut trees are grown. In some places sulphur is abundant.

British Consul at Nouméa.—Mr. Dunlop.

FRENCH ESTABLISHMENTS IN OCEANIA.

These, scattered over a wide area in the Eastern Pacific, are administered by a governor with an Administrative Council consisting of certain officials, the *maire* of Papeete, and the Presidents of the Chambers of Commerce and Agriculture. The establishments consist of the **Society Islands**, the most important of which are Tahiti and Moorea, the former with an area of about 600 square miles and 11,691 inhabitants, the latter with an area of 50 square miles and 1,564 inhabitants; the principal product is phosphate (annual production, 80,000 metric tons). Other groups are the **Marquezas Islands**, with a total area of 480 square miles and 3,424 inhabitants, the two largest islands being Nukahiva and Hivaoa; the **Tuamotu group**, consisting of two parallel ranges of islands from King George's Island on the north to Gloucester Island on the south, their total population being 3,828; the **Leeward Islands** (*Iles sous le Vent*), of which the more important are Huahiné (pop. 1,230), Raiatá and Tahaa (pop. 3,347), and Bora-Bora-Maupiti (pop. 1,295); the **Gambier, Tubuai, and Rapa Islands**; the Gambier group (of which Mangareva is the principal) having six square miles of area and 1,533 inhabitants; the Tubuai (or southern) Islands, of which Rurutu is the largest, Raiavavae (or Vavitu), Rimatara, and, far to the south, Rapa, having together an area of 115 square miles and about 2,550 inhabitants. The total area of the Establishments is estimated at 1,520 square miles, and their population on December 29, 1911, at 31,477, of whom 26,219 were natives. There were 28,875 French, 2,656 other Europeans, and 975 Chinese. In 1903 it was decreed that separate islands or groups should no longer be regarded as distinct Establishments, but that all should be united to form a homogeneous colony. Local budget 1921, 5,980,000 francs.

The most important of the islands is Tahiti, whose chief town is Papeete with 3,617 inhabitants, of whom 1,909 are French. A higher primary school, with a normal school, has been established at Papeete, and there are 6 primary schools, each with about 100 pupils, in various islands, besides 4 Catholic and 2 Protestant mission schools. Pearls and mother-o'-pearl are important products. The island is mountainous and picturesque with a fertile coastland bearing coconut, banana, and orange trees, sugar-cane, vanilla, and other tropical fruits, besides vegetables grown in temperate climates. Cotton, coffee, and tobacco are now little cultivated. The chief industries are the preparation of copra, sugar, and rum. Value of imports (1917) 312,256*l.*, exports, 399,160*l.* The chief imports are tissues, wheat, flour, metal work. The chief exports are copra (250,000*l.* in 1916), mother-o'-pearl, vanilla, coconuts and oranges. In 1916, vessels of 160,527 tons entered, and 163,437 tons cleared. The New Zealand company (with a French subvention) has a monthly service connecting San Francisco, New Zealand and Australia with Papeete, the Tuamotu Islands, the Marquezas, and the Leeward Islands. The shipping between the islands is carried on by sailing boats.

GEORGIA:

(SAKARTVELO.)

The Georgians claim that they first appear in authentic history in the time of Alexander the Great, by whom they were conquered. But on Alexander's death (323 B.C.), the Georgians regained their independence under Pharnavas. With Pharnavas (302-237 B.C.) began the first of four dynasties: Karthlosi (302-93 B.C.), Arsacidi (93 B.C.-267 A.D.), Khosro-Sassanidi (267-570 A.D.), and Bagratidi (570-1801). In 1801 the Russian Emperor Alexander I. annexed the Kingdom of Georgia. When the Bolshevik régime was set up in Russia the Georgians, together with the Tartars and Armenians, formed the Transcaucasian Republic, which refused to recognise the Bolsheviks. The capital of Georgia, Tiflis, became the centre of that Republic, the independence of which was formally proclaimed by the Transcaucasian Diet (*Sejm*) on April 22, 1918. But Georgia was eventually forced to form a separate State, and on May 26, 1918, its independence was proclaimed in Tiflis by the representative organ, the National Council, elected by the National Assembly of Georgia on November 22, 1917. The Act of Independence of Georgia was approved, confirmed and ratified on March 12, 1919, by the Constituent Assembly, elected according to the electoral system of direct, equal, universal, secret and proportional voting of citizens of both sexes. The Government received *de jure* recognition by the Allies on January 27, 1921.

During 1921 Soviet troops occupied the country, and the Government was compelled to flee. The country is governed by a Revolutionary Committee on the model of Soviet Russia, by which Georgia is designated The Fraternal Soviet Republic of Georgia.

Area and Population.—Georgia is situated in Transcaucasia, between the Black and Caspian Seas. Her frontiers are, in the north, the Caucasus; in the east, the Republic of Azerbaijan; and in the south, Armenia. The capital of Georgia is Tiflis (in Georgian Tbilisi so called from the hot-springs found there), which was founded by King Vakhtang in the fifth century A.D.

Georgia comprises the following provinces and districts :—Zakathali ; Tiflis (Tbilisi) ; Kutais ; Sukhum ; the southern part of the Black Sea district up to Tuapse (Sotchi district) ; Ardahan ; Olti. This territory has an area of 32,769 square miles, and a population, according to statistics for 1915, of 3,053,345. The population of Georgia is divided into three classes—the remnants of a feudal aristocracy ; the bourgeoisie of the towns, principally shopkeepers and merchants, most of those in Tiflis being of the Armenian race, though Georgian merchants do inhabit the smaller towns ; and a peasantry largely of Georgian stock, engaged in agricultural pursuits and the raising of sheep and cattle. While this population is more or less racially solid in character, the Georgians are divided into a number of separate tribal stocks, each of which has its peculiar customs, and in some cases its distinct language. The principal groups are Georgians proper, Mingrelians, Osietines, Hevsurs, Abhasians, and Emertines. Of these the Emertines constitute the largest racial group, and have more energy and executive ability than the other tribes.

The area, population, and density of population of each of the seven provinces were claimed to be as follows :—

Provinces and Districts	Area in square verts	Population in 1915	Population per square verst
Zakathali	3,502·22	92,608	26·4
Tiflis	35,904·04	1,473,308	41·0
Kutais	18,535·12	1,034,468	55·8
Sukhum	5,791·79	209,671	36·2
Sotchi	3,304·84	49,666	15·0
Ardahan	4,917·90	85,869	17·6
Olti	2,621·27	57,755	16·2
Total	74,577·18	3,053,345	40·9

In 1915 there were 78,744 births, 16,572 marriages, and 47,876 deaths. The chief towns, with population, are :—Tiflis (346,766), Kutais (85,151), Sukhum (61,974), Poti (20,731), and Sotchi (13,254).

Religion and Instruction.—Christianity is said to have been preached in Georgia as early as the first century by the Apostles St. Andrew and Simon the Canaanite, and was adopted as the State religion in 323.

Georgia has three types of educational institutions :—Elementary schools, where instruction is free and compulsory for all children from 5 to 11 years ; preparatory schools for the colleges, consisting of four classes, to which are admitted without examination children leaving elementary schools ; and colleges, consisting of four classes, to which are admitted, also without examination, children leaving preparatory schools.

The elementary and preparatory schools are under the rural and municipal councils, their control and administrative supervision being reserved to the Ministry of Public Instruction, whilst the colleges are controlled directly by the Ministry.

University instruction is given at the University of Tiflis (founded in 1918), which has 45 professors and 1,500 students.

The Georgian language, formerly in common use only among the peasants, has been declared the official language. Owing to years of disuse, it is somewhat undeveloped, but in recent months it has been introduced into the schools and adopted in governmental correspondence.

Production and Industry.—About 90 per cent. of the population is engaged in agriculture, but methods are primitive. The principal crop is corn. The land of the great landowners has been distributed among the peasants; the minimum allowance for any one family being 7 dessiatines (about 17 acres). Wine-growing is extensive. The country is also rich in fruits. Silk production and bee-keeping are old occupations.

There are about 12,000,000 domestic animals, and the country has vast possibilities for cattle-breeding.

A number of minerals are found, viz., naphtha, copper ore, coal, lead, manganese ore, iron ore, pyrites and sulphur, zinc and antimony. The most important mineral industry is that of manganese, the centre of which is at Tchiaturi.

Commerce.—For the year ending July 1, 1919, the imports of Georgia amounted to 366,897,167 roubles, and the exports to 257,559,000 roubles.

Communications.—The railway system of Georgia extends to 970 miles. The trunk line leading from Batum through Tiflis to Baku on the Caspian Sea has several narrow gauge branches on Georgian territory to the coal mines of Tklhibuli, to the port of Poti, to the manganese mines of Tchiaturi, to the mineral springs of Borjom and the health resort Bakuriani, to the towns Signakh and Telavi, in Kakhetia, and to the Armenian frontier, across the coal mine district of Alverdi. The last branch divides in Armenia, going on the one side to Tabriz in Persia, and on the other to Erzerum in Anatolia. All the railway lines on the territory of Georgia belong to the State.

A railway line from Akhal-Senaki along the Black Sea coast, through Sukhum to Tuapse, is being constructed.

Currency.—The Transcaucasian Republic had been forced to print its own money, and notes were printed in four languages—Georgian, Armenian, Tatar, and Russian—and were called Transcaucasian bonds. These notes, estimated at 2,000,000,000 roubles, were supposed to constitute a lien against the resources of the Caucasus. When Georgia declared its independence, Azerbaijan withdrew from the financial convention, and Georgia continued to print these Caucasian bonds with Armenia until the latter half of the year 1919, when each began the issue of its separate money. The Georgian rouble steadily fell in value throughout 1920, and now stands at about 1,100–1,200 to the pound sterling. Other roubles are also in circulation (Imperial, Kerensky, etc.).

GERMANY.

(DEUTSCHES REICH.)

ON November 9, 1918, the abdication of the German Emperor was announced, and from that date Germany became a Republic.

(For the constitution of the Empire and its rulers, see THE STATESMAN'S YEAR-BOOK for 1918, pp. 881-884.)

Constitution and Government.

The Council of People's Commissioners in Berlin took over the Government of the country; the reigning princes of the Federal States were either deposed or abdicated, the existing Imperial Parliament was declared dissolved, and arrangements were made for summoning a National Assembly. The elections for the body (for which all Germans, men and women, over 20 years of age voted) were held in January, 1919, and resulted, on the basis of proportional representation, in the return of the following parties:—Majority Socialists, 165; Centre (Catholic) Party, 90; Democrats, 75; Conservatives, 42; Independent Socialists, 22; German People's Party, 22; and minor parties, 7; total, 423. The National Assembly was summoned to meet at Weimar on February 6, and on February 11, 1919, it elected the first President of the Republic.

President of the German Republic.—Friedrich Ebert, born February 4, 1871.

The President receives a salary of 100,000 marks per annum, and an allowance of 100,000 marks. Future Presidents will be elected by the direct vote of all citizens, male and female, over 20 years of age. The election must be held either on Sunday or on a day of public rest.

On March 1, 1922, the following Cabinet was appointed:—

Chancellor.—Dr. Joseph Wirth (Centre).

Vice-Chancellor and Minister of the Treasury.—Gustav Bauer (Majority Socialist).

Minister for Foreign Affairs.—Dr. Walther Rathenau.

Minister for Home Affairs.—Dr. Adolf Koester (Majority Socialist).

Minister of Finance.—Dr. Andreas Hermes (Centre).

Minister of Defence.—Dr. Otto Gessler (Democrat).

Minister of Economics.—Robert Schmidt (Majority Socialist).

Minister of Labour.—Dr. Heinrich Brauns (Centre).

Minister of Justice.—Dr. Gustav Radbruch (Majority Socialist).

Minister of Posts.—Johann Giesberts (Centre).

Minister of Transport.—Wilhelm Groener.

The Constitution of the Republic was adopted on July 31, 1919, by the National Assembly at Weimar, and promulgated on August 11, 1919. It declares that the new Commonwealth is a Republic and that the power of the State is derived from the people. The colours of the Republic are black, red and gold. The Constitution provides for Central and State Legislative organs; makes foreign relations, defence, customs duties, taxation and railway services matters for the central authority; lays it down that every component State in the Federation must have a Republican Constitution, with a universal, equal, direct, and secret franchise of male and female voters on the proportional system. An Imperial Council (*Reichsrat*) is to be formed for the representation of the component States (*Länder*). All Bills (*Gesetzesvorlagen*) before they are introduced into the Reichstag require the assent of the Reichsrat. The principle of the Referendum is provided for in the Constitution. The Constitution further declares all Germans equal before the law, and abolishes all privileges or disadvantages of birth, class, or creed. Freedom of speech and of the Press is guaranteed; so is the right of meeting. Members of the Legislature of the Republic (*Reichstag*) are to be elected by universal, equal, direct and secret votes of male and female voters, on the proportional system. The Reichstag is to be elected for 4 years. The President of the Republic is elected by the whole German people for a period of 7 years. Declarations of war and conclusions of peace are made by a law of the Republic. The Cabinet appointed by the President must enjoy the confidence of the Reichstag.

The Reichsrat consists of 66 members (Prussia 26, Bavaria 10, Saxony 7, Württemberg 4, Baden 3, and the other States 16).

The Reichstag, in accordance with the elections on February 20, 1921, is composed as follows: Majority Socialists, 108; Independent Socialists, 61; Centre Party, 72; German National People's Party, 71; German People's Party, 65; German Democratic Party, 40; Bavarian People's Party, 20; and minor parties, 7; total, 469.

The actual votes cast for the larger parties were:—Majority Socialists, 6,210,620 (22·1 per cent. of total); Independent Socialists, 4,970,753 (18·0 per cent.); Centre Party, 3,639,539 (13·1 per cent.); German National People's Party, 4,176,867 (15·1 per cent.); German People's Party, 3,878,228 (14·0 per cent.); German Democratic Party, 2,320,408 (8·4 per cent.); Bavarian People's Party, 1,173,344 (4·2 per cent.); and minor parties, 859,564 (3·1 per cent.); total, 27,673,104.

Area and Population.

I. PROGRESS AND PRESENT CONDITIONS.

The following table gives the area and population of the present States (*Länder*) of Germany as on December 31, 1921, in the order of their

magnitude, according to the returns of the census of October 8, 1919 :—

States of the Empire	Area English sq. miles	Population Oct. 8, 1919			Pop. per sq. mile 1919
		Male	Female	Total	
Prussia ¹	181,689	17,533,779	19,150,938	36,684,717	313
Bavaria (with Coburg)	29,501	3,394,270	3,746,063	7,140,333	242
Württemberg	7,629	1,195,144	1,323,629	2,518,773	330
Baden	5,817	1,051,405	1,157,098	2,208,503	379
Saxony	5,789	2,168,065	2,495,233	4,663,298	805
Mecklenburg-Schw.	5,068	317,400	339,930	657,330	130
Thuringia ²	4,546	712,474	795,551	1,508,025	331
Hesse	2,966	616,521	674,467	1,290,988	435
Oldenburg	2,482	250,623	267,142	517,765	209
Brunswick	1,418	226,400	254,199	480,599	338
Mecklenburg-Str.	1,131	51,170	55,224	106,394	94
Anhalt	888	157,710	173,548	331,258	374
Lippe	469	71,117	83,201	154,318	329
Waldeck	433	31,065	35,367	66,432	153
Schaumburg-Lippe	131	22,148	24,209	46,357	354
Hamburg	160	493,260	557,099	1,050,359	6,564
Lübeck	115	57,539	63,029	120,568	1,048
Bremen	99	148,466	162,800	311,266	3,143
Total	250,471	28,498,556	31,358,727	59,857,283	318

¹ Including the Saar.

² See page 982.

According to the Treaty of Versailles (June 28, 1919) Germany has agreed to the following territorial rearrangements :—(1) Alsace-Lorraine has been ceded to France, (2) the greater part of the Province of West Prussia has been ceded to Poland, (3) a part of Eastern Silesia likewise to Poland, (4) a portion of Upper Silesia to Czechoslovakia, (5) Memel to the Allies, (6) Danzig to the Allies, (7) Eupen and Malmedy to Belgium.

Provision is made in the Treaty to settle the ultimate fate of the following areas by *plébiscite* :—(1) The Saar Basin (after 15 years), (2) Schleswig (in two zones), (3) districts in Southern East Prussia, in West Prussia and in Upper Silesia. Results of the *plébiscites* :—Schleswig (March, 1920), northern zone for Denmark, southern zone for Germany; East and West Prussia (July, 1920) for Germany; Upper Silesia (March, 1921) for Germany. Despite the decision in Upper Silesia, 1,255 square miles, with a population of 891,669, were transferred to Poland.

An estimate of the actual areas and populations lost to pre-war Germany has been made as follows :—Alsace-Lorraine, 5,604 square miles, population 1,874,014; ceded to Belgium, 386 square miles, population 60,924; ceded to Poland, 17,787 square miles, population 3,853,354; Memel, 1,057 square miles, population 140,746; Danzig, 794 square miles, population 330,252; ceded to Denmark, 1,537 square miles, population 166,895; ceded to Czechoslovakia, 110 square miles, population 45,396; total 27,275 square miles, population 6,471,581.

The Saar Basin, which will be placed under the government of the League of Nations, has an area of 751 square miles and a population of

657,870. The area of the occupied territory is about 9,650 square miles, containing about 7 million inhabitants.

The population of the German Empire (without Heligoland) was 24,831,396 in 1816, and 31,589,547 in 1837, showing an average annual increase of nearly 1·3 per cent. The following table shows the actual increase in population at various periods, with the annual rate of increase per cent. The small increase in 1867-71 is explained by the intervention of the war with France.

Year	Increase	Annual Rate per cent.	Year	Increase	Annual Rate per cent.
1867 ¹	3,220,083	0·93	1890	2,572,766	1·07
1871	970,171	0·60	1895	2,851,431	1·12
1875	1,668,568	1·0	1900	4,087,277	1·51
1880	2,506,701	1·14	1905	4,274,311	1·46
1885	1,621,643	0·70	1910	4,284,504	1·36

¹ Since 1858.

II. MOVEMENT OF THE POPULATION.

The following table shows the movement of the population of the old Empire during three years :—

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths	Surplus of Births
1918 ¹	352,543	956,251	29,438	125,253	1,635,307	—679,056
1919 ²	344,339	1,299,404	38,904	145,303	1,017,174	+232,230
1920 ³	851,508	1,561,641	49,479	—	938,274	+623,367

¹ Exclusive of Alsace-Lorraine.

² Exclusive of Alsace-Lorraine and most of that portion of Posen ceded to Poland.

³ Exclusive of Württemberg and the two Mecklenburgs, but inclusive of Upper Silesia.

Of the children born in 1918, 495,953 were boys, and 460,298 girls; in 1919, 676,091 were boys and 623,313 girls.

The number of divorces in Germany was in 1918, 13,344, being 20·6 per 100,000 inhabitants; in 1919, 22,022 or 36·2. (For 1918 the figures are exclusive of Alsace-Lorraine, and for 1919 exclusive of Württemberg and the two Mecklenburgs, but inclusive of Upper Silesia.)

The following table shows the annual number of German emigrants for six years :—

Year	Total	Destination			
		European Countries	United States	Brazil	Other American Countries
1915	528	—	467	—	61
1916	326	—	291	—	35
1917	9	—	6	—	3
1918	—	—	—	—	—
1919	3,144	—	213	—	2,931
1920	8,458	11	1,429	131	6,897

¹ To Great Britain.

III. PRINCIPAL TOWNS.

German towns are officially distinguished as large towns (with 100,000 inhabitants and upwards); medium towns (20,000-100,000 inhabitants); small towns (5,000-20,000 inhabitants), and country towns 2,000-5,000 inhabitants). In 1905, only 1 town had over 1,000,000 inhabitants; 10 others over 250,000; 30 others over 100,000; 43 between 50,000 and 100,000; and 137 between 20,000 and 50,000. According to the results of the census of October 8, 1919, the population of the principal towns at that date was:—

Town	State	Pop. (8 Oct., 1919)	Town	State	Pop. (8 Oct., 1919)
Greater Berlin	Prussia	3,801,235	Augsburg	Bavaria	154,555

Religion.

The Constitution provides for entire liberty of conscience and for complete social equality among all religious denominations. There is no State Church.

There are 5 Roman Catholic archbishoprics, 14 suffragan bishoprics, and 6 bishoprics immediately subject to Rome; there are 3 apostolic vicariates. The 'Old Catholics' have a bishop at Bonn.

The following are the results of three religious censuses :—

Creed	1900	Per Ct. of Pop.	1905	Per Ct. of Pop.	1910	Per Ct. of Pop.
Protestants .	35,231,104	62·5	37,646,852	62·1	39,991,421	61·6
Catholics . .	20,327,913	36·1	22,109,644	36·5	23,821,453	36·7
Other Christians	203,793	0·4	259,717	0·4	283,946	0·4
Jews	586,833	1·0	607,862	1·0	615,021	1·0
Others and un- classified .	17,535	0·03	17,203	0·03	214,152	0·3

Roman Catholics in 1905 were in the majority in Alsace-Lorraine, Bavaria, and Baden; and formed more than 20 per cent. of the population in Oldenburg, Württemberg, Hesse, and Prussia.

Instruction.

Education is general and compulsory throughout Germany. The laws of Prussia, which provide for the establishment of elementary schools (*Volkschulen*), supported from the local rates, in every town and village, and compel all parents to send their children to these or other schools, have been adopted, with slight modifications, in all the States of the Empire. The school age is from six to fourteen.

According to a school census taken in 1911 there were in that year 61,557 public elementary schools in Germany with 148,217 male and 39,268 female teachers, and 10,309,949 pupils (5,157,446 boys and 5,152,503 girls).

There were also, in 1911, 480 private schools with 11,894 boys and 14,257 girls who received instruction similar to that given in the Public Elementary Schools.

The system of secondary education is practically homogeneous. Above the elementary schools rank the middle schools of the towns, the *Bürger-schulen* and *Höhere Bürgerschulen*, which fit their pupils for business life. Children of the working classes may continue their education at the *Fortbildungs-Schulen* or continuation schools, which are open in the evening or other convenient time. The *Gymnasien* are the most fully developed classical schools, preparing pupils in a nine years' course for the universities

and the learned professions. The *Progymnasien* differ from these only in not having the highest classes. In the *Realgymnasien*, Latin, but not Greek, is taught, and what are usually termed 'modern subjects' have more time devoted to them. *Realprogymnasien* have a similar course, but have no class corresponding to the highest class in the preceding. In the *Oberrealschulen* and *Realschulen* Latin is wholly displaced in favour of modern languages. The teachers in German schools are required to hold a Government certificate, and to have undergone a year's probation. For girls there are *Höhere Töchterschulen Lyceen*, *Oberlyceen* and special *Studienanstalten* which prepare for the universities. Besides these there are numerous *Gewerbeschulen* or technical schools, *Polytechnica*, normal schools, seminaries, and the universities.

In 1911 (the latest available figures) the number of secondary schools was as follows:—For boys, *Gymnasien*, 524, with 9,769 teachers and 160,237 pupils; *Realgymnasien*, 223, with 3,708 teachers and 70,375 pupils; *Oberrealschulen*, 167, with 3,473 teachers and 75,832 pupils; *Progymnasien*, 81, with 570 teachers and 9,509 pupils; *Realschulen*, 411, with 4,265 teachers and 89,968 pupils. For girls, *Gymnasien*, 39, with 1,039 teachers and 22,137 pupils; *High schools*, 789, with 11,359 teachers and 212,324 pupils.

There are 10 fully equipped Technical High Schools, with the power of granting degrees. They are all aided by the States to which they respectively belong. The statistics for the summer half-year 1921 were as follows:—

Schools	Teaching Staff	Students	Schools	Teaching Staff	Students
Berlin . . .	377	3,878	Stuttgart . . .	132	1,925
Munich . . .	183	3,915	Aachen . . .	152	1,341
Darmstadt . . .	156	2,737	Brunswick . . .	104	1,098
Karlsruhe . . .	145	1,643	Breslau . . .	88	1,016
Hanover . . .	131	2,839			
Dresden . . .	175	2,822	Total . . .	1,643	23,214

For instruction in agriculture there are Agricultural High Schools at Berlin (956 students in 1921), Hohenheim (740), Bonn-Poppelsdorf (868), and Weihenstephan near München (343); at 8 of the universities there are Agricultural Institutes; at Weihenstephan (Bavaria) an agricultural and brewing academy; in Prussia 16 secondary agricultural schools, and in other German States 6; in Prussia 26 farming schools, in other States 19; in Prussia 118 lower agricultural winter schools, and in other States 77; besides many schools for special agricultural instruction (in Prussia alone, 1,320). Other technical schools are 3 Veterinary High Schools with 948 students in 1921; 15 schools of mining; 15 schools of architecture and building; 4 academies of forestry; 27 schools of art and art-industry (*Kunst* and *Kunstgewerbe-Schulen*); 429 commercial schools (including 6 commercial colleges with the right of granting degrees); about 100 schools (including universities) for textile manufactures; 12 for special metal industries; 12 for wood working; 4 for ceramic industries; 11 for naval architecture and engineering; 8 for ships' engineers; 19 for navigation; and 11 public music-schools. There are also numerous smaller as well as private music and other schools, and a large number of artisans' or trade schools. There was a naval academy and school at Kiel, and military academies at Berlin and Munich; besides 47 schools of navigation, 9 military schools, and 9 cadet institutions.

There are 23 universities in the German Empire, besides the *Lyceums*, at Braunsberg, Bamberg (85 students in 1921), Dillingen (144 students in 1921), Eichstatt, Freising (164 students in 1921), Passau (105 students in

1921), and Regensburg, which have only faculties of theology (Roman Catholic) and philosophy.

The following table gives the date of foundation, the number of teachers and students for the summer half-year, 1921 :—

Universities	Professors and Teachers	Students					Total
		Theology.	Jurisprudence, &c.	Medicine and Dentistry.	Philosophy	Mathematic and Natural Science, &c.

¹ Including the students of the faculty of political science.

² Including the students of forestry.

³ Including the students of veterinary and forestry.

⁴ Including the students of veterinary science.

In three universities, namely, Freiburg, München, and Würzburg, the faculties of theology are Roman Catholic; four are mixed, both Protestant and Roman Catholic—Bonn, Breslau, Münster, and Tübingen; and the rest are Protestant. Cologne, Frankfort, and Hamburg have no theological faculties.

Justice and Crime.

A uniform system of law courts exists throughout Germany, though, with the exception of the Reichsgericht, all courts are directly subject to the Government of the special State in which they exercise jurisdiction, and not to the Central Government. The appointment of the judges is also a State function, and not that of the Central Government. Germany possesses uniform codes of commercial and criminal law.

The lowest courts of first instance are the *Amtsgerichte* (1,778 on January 1, 1921), each with one or more judges, competent to try petty civil and criminal cases. The *Landgerichte* (159 on January 1, 1921), exercise a revising jurisdiction over the *Amtsgerichte*, and also a more extensive original jurisdiction in both civil and criminal cases, divorce cases, &c. In the criminal chamber five judges sit, and a majority of four votes is required for a conviction. But in the courts with appellate jurisdiction

only three judges sit. Jury courts (*Schwurgerichte*) are also held periodically, in which three judges preside; the jury are twelve in number. The first court of second instance is the *Oberlandesgericht*. In its criminal senate, which also has an original jurisdiction in serious cases, the number of the judges is seven. There are twenty-seven such courts in Germany. The total number of judges on the bench in all the courts above mentioned was 9,906 (Jan. 1, 1921). The supreme court is the *Reichsgericht*, which sits at Leipzig, and has 103 judges. The court exercises an appellate jurisdiction over all inferior courts, and also an original jurisdiction in cases of treason. It has 6 criminal and 7 civil senates.

In 1915, 425,598 persons were condemned by the courts; of these, 220,795 were fined, 180,797 were sent to prison, and 5,426 to penal servitude.

Pauperism.

Since January 1, 1916, the general principles as to poor-relief in all the German States are laid down by the Imperial law of May 30, 1908. According to this law, there may be formed local unions (*Ortsarmenverbände*) and provincial unions (*Landarmenverbände*). Usually a local union is a commune (*Gemeinde*), while a provincial union consists of a large administrative division such as a circle (*Kreis*), a province, or a whole State. For the purposes of poor-relief a settlement is acquired by one year's continuous residence (after the age of 16), by marriage, or by descent. A German in distress must be relieved by the local union in which he becomes destitute, and the cost must be refunded by the local union in which he has a settlement, or by the appropriate provincial union. In rural communes poor-relief forms part of the ordinary local business of the district councils; in urban municipalities the actual administration is carried out by a special committee under the presidency of the burgomaster. Poor rates are usually not levied. In most large towns the Elberfeld system of unpaid district visitors is in force. Statistics of pauperism are not published regularly; the last issue related to the year 1885.

Compulsory Insurance.

Social insurance has existed in Germany since 1880. It comprises compulsory insurance of workmen against sickness, insurance against accidents by employers, and the insurance of workmen against old age and infirmity.

Under an Imperial law of 1883 and amending Acts (codified in the *Reichsversicherungsordnung* (R.V.O.), of July 19, 1911), workmen must be insured against sickness, and must themselves pay two-thirds of the contributions, their employers paying one-third. For accident insurance, under an Act of 1884 and amending Acts, the contributions are paid entirely by the employers, and they, for mutual protection, have united into associations according to the nature of the industries in which they are engaged. The working of these insurance associations is controlled by Government. For invalidity and old age insurances, under an Act of 1889, amended in 1899, the contributions are paid half by the workmen and half by their employers, while towards each pension the Government grants an annual subsidy of 50 shillings. The employers are responsible both for their own and the workmen's contributions, but the latter may be deducted from wages paid subsequently.

Contributions are paid by the purchase of stamps from the Post Office; these are affixed by the contributing person to cards on which there are spaces for stamps for 52 weeks. When the contributions are complete, the card is handed in to a specified office and a certificate given in return.

For the year 1915 the average of those insured against sickness was 14,583,783. Of this total, 13,840,848 (7,856,696 men and 5,984,152 women) were insured in ordinary societies, and 742,935 (715,201 men and 27,734 women) in *Knappschaften* or societies for miners. In 1919, 22,700,000

persons were insured against accident in 68 industrial societies and 49 agricultural societies, and 571 State or municipal organisations; and 16,859,600 against invalidity (11,688,300 men and 5,171,300 women) in 38 organisations.

Finance.

The following tables exhibit the budget estimates of the revenue and expenditure for three years, ending March 31 (20 marks nominal = 1L):—

Years ending March 31	REVENUE			EXPENDITURE		
	Ordinary	Extraord. (loans, &c)	Total	Ordinary (recurring and non-recurring)	Extraord.	Total
	Marks	Marks	Marks	Marks	Marks	Marks
1918-19	8,478,609,249	23,111,100,088	31,589,709,287	8,628,940,230	36,884,731,755	45,513,671,985
1919-20	12,752,720,550	4,154,304,859	16,907,025,409	15,087,415,539	39,779,613,341	54,867,028,880
1920-21	44,534,305,212	90,781,462,873	135,315,768,085	44,534,305,212	90,781,462,873	135,315,768,085

1 Estimate.

The budget estimates for 1921-22 give the principal items of ordinary revenue and expenditure as follows:—

Revenue	1,000 marks	Expenditure	1,000 marks
Income Tax	12,000,000	National Debt	16,121,472
Tax on Turnover	5,400,000	Pensions	8,147,200
Tax on Coal	4,500,000	Defence	3,058,896
New Taxes	4,250,000	Ministry of the Interior	2,802,538
National Debt	2,479,325	" Foreign Affairs	433,764
Customs	2,500,000	" Finance	2,091,593
Tax on Tobacco	1,800,000	Treasury	11,958,601
Banking Dues	1,530,018	Ministry of Labour	1,829,242
Forced Levy on Capital	2,200,000	" Justice	51,647
Tax on Capital Increase	1,400,000	" Transport	631,423
Stamp Duties	1,308,000	Audit Office	6,387
Tax on Travelling and Transport	1,200,000	Posts and Telegraphs	9,307,178
Corporation Tax	1,030,000	Railways	34,076,185
Postal Receipts	6,217,300	Reconstruction	143,521
Railway Receipts	27,604,000	Reichstag	20,148
Total (including all items)	92,220,816	Total (including all items)	92,220,816

The extraordinary budget provides for a revenue of 69,619,208,000 marks, including 57,449,445,000 marks under the heading "Imperial Debt"; and an expenditure of 69,619,208,000 marks, including 26,589,955,000 marks under the heading "Execution of the Peace Treaty," and 8,648,225,000 marks under heading "Ministry of Agriculture and Food Supply."

For 1922-23 the budget balances at 288,424 million marks.

On March 31, 1921, the total funded debt amounted to 82,159,000,000 marks, of which 64,633,000,000 marks bear interest at 5 per cent.; 1,125,000,000 marks at 4 per cent.; 1,960,000,000 marks at 3½ per cent.; 1,622,000,000 marks at 3 per cent.; the Treasury bills amounted to 1,219,000,000 at 5 per cent.; 7,971,000,000 marks at 4½ per cent.; and 3,629,000,000 marks lottery bonds. There is also a floating debt of

166,329,200,000 marks of Treasury bills free of interest. On March 31, 1921, the total debt amounted to 248,848,200,000 marks.

Between August 4, 1914, and March 31, 1920, Germany issued loans to the total value of 222,151,465,980 marks. On December 20, 1921, the floating debt was 237,869,000,000 marks.

The growth of the German debt is shown as follows :—

Year.	Marks.	Year.	Marks.
1870 . . .	396,600,000	1905 . . .	3,323,500,000
1875 . . .	120,300,000	1910 . . .	5,013,500,000
1885 . . .	551,200,000	1915 . . .	16,954,868,000
1895 . . .	2,201,200,000	1920 . . .	182,944,000,000
1900 . . .	2,418,500,000	1921 . . .	248,848,000,000

Defence.

I. ARMY.

Towards the end of January, 1919, the President of the Republic was authorised by the Reichstag to disband the existing army and to raise a provisional National Defence Army pending the creation of a permanent Defence Force (*Reichswehr*). On May 1 the demobilisation of the German army was officially declared to be completed, and the Defence Force came into being. On August 1 the strength of the Defence Force was 500,000 men. It was voluntarily recruited and was formed by raising brigades with the necessary auxiliary services in each of the old army corps districts. Meanwhile the Treaty of Versailles was signed on June 28 and was ratified by Great Britain on July 10. It was not ratified by Germany until January 10, 1920, when its provisions became effective. For the principal military clauses of the Treaty see the STATESMAN'S YEAR-BOOK for 1921, pp. 926-7.

The reduction of the Reichswehr began in August, 1919, which then consisted of 43 brigades of all arms. There were then in addition 3 marine infantry brigades stationed at Hamburg, Berlin and in Upper Silesia, and a coastguard regiment stationed in the North Sea ports. In January, 1921, the reduction of the Reichswehr to its authorised establishment of 100,000 men was completed. By June, 1921, the fortresses specified in the Treaty, and also the coast defences of Kiel and Heligoland had been razed. The equipment of the fortresses of Kustrin, Glatz, Neisse, Glogau, Loetzen, and Marienburg had been surrendered. The Inter-Allied Disarmament Commission reported on September 26, 1921, that the following arms had been destroyed : Guns, 32,864 ; small arms, 4,306,000 ; machine guns, 84,000 ; machine-gun barrels, 212,000 ; live shells, 34,500 ; small arm ammunition, 358,000,000 rounds : mine-throwing ammunition, 3,750,000 rounds. The Commission had notice of 116 field guns, 2,000 machine guns, 181,000 machine-gun barrels, 900,000 shells, 88,000,000 rounds of small arm ammunition, and 450,000 rounds of mine-throwing ammunition not destroyed.

The returns of the surrender and destruction of aeronautical material on the same date were :—

	Surrendered	Destroyed		Surrendered	Destroyed
Airplanes . . .	516	14,167	Engines . . .	4,091	25,037
Seaplanes . . .	58		Sheds & Hangars . . .	116	196
Airships . . .	8	3	Machine Guns . . .	656	7,626
Balloons . . .	24	65	Bombs . . .	17,044	214,042

During 1919 a number of organisations came into existence under the auspices of the Ministry of the Interior, on the pretext that they were required to maintain public order. At the end of 1919 these organisations consisted of the Public Safety Police (*Sicherheitspolizei*), 150,000 strong, the Emergency Volunteers (*Zeitfreiwilligen*), 150,000 strong, and the Civic Guards (*Einwohnerwehr*), 350,000 strong. Of these only the Public Safety Police were armed and equipped, and they were distributed amongst the chief towns of Germany. They were provided with rifles, bayonets and hand grenades, and had in addition 8 field howitzers, 16 field guns, 12 trench mortars, and 2,780 machine guns.

The raising of these forces is contrary to the terms of the Treaty of Versailles, and during 1921 pressure was brought upon Germany by the Supreme War Council of the Allies, and after protracted negotiations the German Government agreed to the abolishing of the *Zeitfreiwilligen* and of the *Einwohnerwehr* and to modify the organisation of the *Sicherheitspolizei*. The Bavarian Government refused to disband the *Einwohnerwehr*, but again under pressure from the Supreme War Council, the *Einwohnerwehr* decided, on June 6, 1921, to disband voluntarily. In September, 1921, the disbandment of the *Zeitfreiwilligen* and the *Einwohnerwehr* was completed. The 150,000 *Sicherheitspolizei* remain in existence, but are no longer equipped with artillery.

II. NAVY.

As a fighting force the German Navy ceased to exist under the terms of the Armistice and the Treaty of Peace, but reorganisation of the existing forces is in progress, mainly for training purposes, and one of the obsolete light cruisers is to be replaced.

Under the law of March 23, 1921, the navy is directed and administered by the Chief of Naval Direction, under the Ministry of National Defence. In addition to the central administrative division are the Office of Naval Command (staff), the General Naval Office (supply, research and investigation), also the Naval Administrative Office, and some departments dealing with the relations of the Navy to the Defence Ministry, which also controls the Army.

The Treaty allows to the German Government the right of maintaining a navy, recruited and maintained on a volunteer basis. The fleet consists of six pre-Dreadnoughts completed between 1904 and 1908, each displacing approximately 13,000 tons and mounting four 11-inch and fourteen 6·7-inch guns. They are the *Braunschweig*, *Elsass*, *Hannover*, *Hessen*, *Schlesien*, and *Schleswig-Holstein*. They possess little fighting value. The six light cruisers authorized by the Treaty are the *Medusa*, *Thetis*, *Amazona*, *Arkona*, *Hamburg*, and *Berlin*, completed between 1901 and 1905, and each of them mounting ten 4·1 inch guns. There are also twelve destroyers, three of older type and nine dating from 1911-14, and twelve torpedo-boats. No submarines are permitted. In addition to the ships and vessels indicated, Germany is authorised to retain certain others, which are to be kept in reserve and to have no ammunition on board. These are the battleships *Lothringen* and *Preussen*, the cruisers *Nymphe* and *Niobe*, four destroyers, and four torpedo-boats. They appear to be used for barrack and training purposes.

The total personnel may not exceed 15,000, including a maximum of 1,500 officers and warrant officers. The officers and warrant officers engage for a minimum of twenty-five consecutive years, and the petty officers and men for twelve years. The vessels of war are to have a fixed allowance of arms, munitions, and material.

An Act was passed by the National Assembly (April 16, 1919) establishing a provisional Navy on a volunteer and democratic basis for the protection of the coasts and the removal of mines, and also for policing and protecting the fisheries. A decree was signed by the Defence Minister and the Chief of the Admiralty on September 3, 1919, instructing the commanders of the naval stations on the Baltic and North Sea to enlist volunteers throughout the country for this provisional Imperial Navy. This has been done and the arrangement has been confirmed by the Reichstag (March 19, 1921). The battleships, light cruisers, destroyers and torpedo-boats named above are being divided equally to constitute squadrons severally in the North Sea and the Baltic. The Baltic Command has been removed from Kiel to Swinemünde. The naval expenditure in 1921, including mine-sweeping, was estimated at 221,000,000 marks. The sum for the personnel is 140,000,000 marks, and 25,000,000 marks are to be expended on the new cruiser, which will be of the Dresden class, with displacement of 5,600 tons, carrying eight 6-inch guns.

Production and Industry.

I. AGRICULTURE.

In Germany (except the Mecklenburgs) there is complete free trade in land. Generally speaking, small estates and peasant proprietorship prevail in the West and South German States, while large estates prevail in the north-east.

The subdivision of the soil, according to the latest official returns (1913), was as follows (in acres):—Arable land, 65,148,000; grass, meadows, pasture, 21,760,500; vineyards, 296,500; woods and forests, 35,558,000; all other, 12,811,560.

On June 12, 1907, the total number of agricultural enclosures (including arable land, meadows, cultivated pastures, orchards, and vineyards) each cultivated by one household, was 5,736,082, with an area of 78,665,370 acres, being an average of about 13·7 acres to each. The total was distributed as follows:—

Under 2·47 acres	2·47 to 24·7 acres	24·7 to 247 acres	247 acres & over	Total
2,731,055	2,306,529	674,932	23,566	5,736,082

On June 12, 1907, these farms employed 15,169,549 persons; in the year ending June 12, 1907, the greatest number employed at the same time was 19,732,424.

The areas under the principal crops, in acres, and the yields, in metric tons (1 metric ton = 2,204 lbs. or 984 an English ton), were for three years as follows:—

—	Acreage.			Produce (Metric tons).		
	1919	1920	1921	1919	1920	1921 ¹
Wheat . . .	8,232,572	8,453,185	8,603,902	2,158,695	2,255,055	2,663,460
Rye . . .	10,964,655	13,313,117	10,741,417	6,074,796	4,971,800	6,608,023
Barley . . .	3,775,305	3,996,155	3,846,897	1,642,521	1,799,713	1,792,904
Oats . . .	7,899,132	8,109,180	7,974,457	4,436,126	4,870,120	4,715,672
Potatoes . . .	5,490,212	6,149,680	6,694,427	21,427,166	28,248,765	—
Beet . . .	763,160	817,435	974,225	5,815,924	7,964,024	—
Hay . . .	13,679,510	13,721,665	13,649,825	20,422,252	23,669,144	—

Preliminary estimates.

In 1913 there were within the Empire 196,084,642 fruit trees, comprising 74,375,929 apple-trees, 30,788,886 pear-trees, 64,547,217 plum-trees, 21,390,088 cherry-trees, 769,731 apricot trees, 2,021,188 peach trees, and 2,191,603 walnut trees. In 1920 the area devoted to vines was 181,653 acres, the wine yield 53,683,256 gallons, valued at 2,349,274,480 marks.

The number of domestic animals in Germany according to the Censuses of December 1, 1919, and December 1, 1920, was :—

States	Horses ¹	Cattle	Sheep	Swine	Goats
Prussia	2,498,430	9,157,945	4,017,950	9,383,133	2,651,422
Bavaria	365,026	3,667,244	741,483	1,740,703	431,691
Saxony	160,653	721,574	102,486	454,380	591,999
Württemberg	101,785	987,093	269,305	416,028	148,543
Baden	63,334	625,558	79,618	419,493	179,697
Other States	398,777	1,646,536	988,834	1,704,638	655,070
Total, Dec. 1, 1920	3,588,005	16,805,950	6,149,076	14,178,375	4,458,422
„ „ 1, 1919	3,465,278	16,317,600	5,340,579	11,518,103	4,139,620

¹ Exclusive of Army horses.

II. FORESTRY.

Forestry in Germany is an industry of great importance, conducted under the care of the State on scientific methods. The forest area of the Empire is put in 1913 (latest statistics) at 35,552,930 acres, of which crown forests occupy 707,352 acres; State and partly State forests, 11,638,027 acres; communal forests, 5,721,892 acres; private forests, 16,184,772 acres, and forests belonging to various associations or foundations, 1,300,885 acres. Of the whole forest area 6,599,477 acres are under foliage trees, oak, birch, ash, beech, &c., and 22,192,810 acres bear pine, larch; red and white fir, &c.

III. MINING.

The great bulk of the minerals raised in Germany is produced in Prussia, where the chief mining districts are Westphalia, Rhenish Prussia, and Silesia, for coal and iron, the Harz for silver and copper, and Silesia for zinc. Saxony has coal, iron, and silver mines.

In 1913 there were 4,275 mines and foundries in Germany employing 1,196,786 persons (1,133,701 men, 15,969 women, 46,947 juveniles, and 169 children under 14 years of age).

The quantities of the principal minerals raised were as follows in metric tons :—

—	1917	1918	1919
Coal	167,747,171	158,254,116 ¹	* 116,707,234 ¹
Lignite	95,542,922	100,599,318	93,648,264
Iron ore	22,464,780	7,914,897	6,153,834
Zinc ore	527,077	447,061	285,596
Lead ore	124,550	125,096	85,187
Copper ore	960,097	872,592	616,809
Rock salt	2,089,237	2,344,481	1,487,849
Potash	8,953,110	9,231,134	7,888,152

¹ Exclusive of Alsace-Lorraine.

In 1913 the total output of pig iron was 16,763,809 tons; in 1915, 10,154,721 tons; in 1916, 11,342,077 tons; in 1917, 11,622,168 tons;

in 1918, 9,208,252 tons; in 1919, 5,654,215 tons. Ingot steel production in 1914 totalled 13,520,664 metric tons; in 1916, 13,601,454 tons; in 1917, 13,778,852 tons; in 1918, 11,392,135 tons; in 1919, 6,731,699 tons.

IV. FISHERIES.

The yield of the North Sea fisheries was valued at 129,292,900 marks in 1919, and 573,426,800 marks in 1920; and the Baltic fisheries, 52,855,800 marks in 1919, and 118,794,200 marks in 1920.

V. MANUFACTURES.

The chief seats of the German iron manufacture are in Prussia, Bavaria, and Saxony. Steel is made in Rhenish Prussia. Saxony is the leading State in the production of textiles, but Westphalia and Silesia also produce linen; Württemberg, Baden, and Bavaria produce cotton goods. Woollens are manufactured in several Prussian provinces, also in Saxony and Bavaria; silk in Rhenish Prussia, and Baden. Cotton spindles decreased from 12·4 million in 1914 to 10·3 million in 1920; wool spindles decreased from 5 million in 1907 to 4·5 million in 1920; cotton looms in 1920, 240,000. Beetroot sugar is an important manufacture in Prussia, Brunswick, Anhalt, and Bavaria, &c. Production of potash, mainly in the Harz Mountains, 11,386,439 metric tons in 1920. Glass, porcelain, and earthenware in Silesia, Thuringia, Bavaria, and Saxony; clocks and wooden ware in Württemberg and Bavaria; and beer in Bavaria, Prussia, Saxony, Baden, Hamburg, Bremen, &c. In 1919 there were produced in Germany monthly, 140,000 tons of cement, 250,000 tons of chalk, and 0·3 million bricks. In 1920 the average monthly production of paper was 85,000 tons, and of cardboard 18,000 tons.

The following are the statistics of the beetroot sugar manufacture in Germany.

Years beginning 1 August	Number of Factories	Beetroot used in Metric Tons	Production in Metric Tons		No. of Kgs. Beetroot to produce 1 Kg. of Sugar
			Raw Sugar	Molasses	
1917-18	312	9,229,939	1,566,255	228,250	5·89
1918-19	307	8,709,011	1,346,101	194,031	6·47
1919-20	260	4,796,248	710,444	108,246	6·75
1920-21 ¹	263	6,568,499	1,086,857	149,768	6·04

¹ Preliminary figures.

The following table shows the quantity of beer (in thousands of hectolitres, 1 hectolitre = 22 gallons) brewed in Germany in the Beer-excite district (*Brausteuergebiet*), which includes all the States of the Zollgebiet, except Bavaria, Württemberg, and Baden:—

Year	Beer Excise District	Bavaria.	Württemberg	Baden	Total ¹
1914	34,249	17,020	3,355	2,961	59,373
1915	25,609	14,192	2,375	2,363	45,862
1916	19,648	12,617	1,721	1,838	36,835
1917	10,432	11,157	927	964	23,837
1918	12,767	10,268	1,003	780	24,818

¹ Including Alsace-Lorraine, except for 1918.

The total number of active breweries in the Beer-excise district was in 1914, 3,602; in 1915, 2,900; in 1916, 2,418; in 1917, 2,192; in 1918, 1,833.

Production of alcohol for four years :—

Year	No. of Distilleries	Gallons	Year	No. of Distilleries	Gallons
1915-16	58,489	51,747,190	1917-18	35,023	51,877,034
1916-17	46,822	44,425,986	1918-19	30,577	29,135,656

In 1913 (latest figures), 556,840 juvenile workers were employed in Germany, 376,481 being males and 180,359 females. In addition 8,008 boys and 6,158 girls (total 14,166) under 14 years of age were employed.

Commerce.

The following table shows the volume and value of the special trade (exclusive of gold and silver) for five years :—

Year	Imports		Exports	
	Double cwts.	Million marks	Double cwts.	Million marks
1911. . .	683,994,288	9705·7	591,495,394	8106·1

Internal Communications.

I. RAILWAYS.

In 1915 there were 3,296 miles of tramway, and 7,171 miles ' Kleinbahnen.

On April 1, 1920, all the various German state railways were transferred to the Central Government. The total length of railway line was 35,919 miles on December 31, 1919. Of this total 34,689 miles are state lines.

II. CANALS AND NAVIGATIONS.

The latest available statistics are for 1904. They will be found in the STATESMAN'S YEAR-BOOK for 1913, p. 885. On June 17, 1914, the Hohenzollern Canal, between Berlin and Hohensaaten, was opened; in 1914 also the Rhein-Herne Canal, and in 1915 the Ems-Weser Canal.

III. POSTS AND TELEGRAPHS.

The postal and telegraphic services are retained in the hands of the Central Government.

Statistics for 1919 :— Employees, 266,422; number of post offices, 38,531; number of telegraph offices, 51,114.

The following are the telegraph statistics for the year 1919 :—Length of telegraph lines, 144,150 miles; of wire, 1,448,692 miles; number of foreign telegrams, 86,788,000; of inland telegrams, 84,844,000. Length of telephone lines, 91,326 miles; of wire, 4,198,516 miles; number of telephone boxes, 1,733,400; of telephone connections, 3,162,300.

Banking, Money, and Credit.

Money (in thousands of marks) coined and nominally in circulation on the dates given :—

March 31	Gold	Silver	Nickel	Copper	Total
1919	5,155,840·3	1,159,090·2	100,352·9	25,104·3	6,528,740·3 ²
1920	5,155,840·3	1,076,182·5	100,311·1	25,102·7	6,357,336·6
1921	5,155,840·1	—	100,310·6	25,102·6	5,281,253·3
1921 ¹	5,155,840·1	—	100,300·9	25,102·5	5,281,252·5

¹ December 31.

² Including 57,996,176 marks' worth of iron coins, 29,239,962 marks' worth of zinc coins, and 507,251 marks' worth of aluminium coins.

The actual currency (in thousands of marks) is composed as follows :—

March 31	Iron	Zinc	Aluminium	Total
1920	68,711·0	48,209·5	15,827·0	132,747·5
1921	76,177·5	72,741·1	145,600·3	294,727·9
1921 ¹	88,007·2	96,721·7	281,946·8	466,675·7

¹ December 31.

The bank notes current in Germany are those of (1) the Imperial Bank (in denominations of 10, 20, 50, 100 and 1,000 marks); (2) the Badische Bank (100 mark notes only); (3) the Bayerische Notenbank (100 mark notes only); (4) the Sächsische Bank (100 and 500 mark notes); and (5) Württembergische Notenbank (100 mark notes). The notes of the last four banks are termed 'private bank notes.' The notes of all five banks must be accepted at their full face value by each of the banks named. Since January 1, 1910, the notes of the Imperial Bank are legal tender. On April 8, 1921, a law was passed, suspending until December 31, 1923, the provision of the Banking Law, under which one-third of the note circulation of the Imperial Bank had to be covered by specie, Treasury Notes, or Loan-Bank Certificates.

Imperial Treasury Notes in denominations of 50, 20, 10 and 5 marks, which were first issued in 1874, were as a war measure by the law of August 4, 1914, declared legal tender. Their total issue amounts to 360 million marks. By the same law the necessity to change all notes into gold was set aside. Moreover, Loan Banks (*Darlehnskassen*) were established in August, 1914, with the right of issuing notes up to 3,000 million marks. These notes, which are in denominations of 50, 20, 5, 2 and 1 marks, are accepted at all public offices (*e.g.*, post, railways, customs, etc.).

On January 1, 1922, the circulation of paper money was as follows :—Imperial Bank Notes, 118,639·5 million marks (68,805·0 million marks in 1921); private bank notes, 334·5 million marks (233 millions in 1921); Loan-Bank Notes, 8,324·7 million marks (12,033·3 million marks in 1921); treasury notes, 198 million marks (316 millions in 1921); total, 122,496·7 million marks.

Many local paper notes issued by municipalities are also in circulation.

The condition of the Imperial Bank of Germany on February 23, 1922, is shown as follows (in thousands of marks):—

—	Amount Feb. 23, 1922	—	Amount Feb. 23, 1922
Total coin and bullion . . .	1,010,816	Advances	18,684
Of which gold	995,688	Investments	210,799
Treasury notes and loan bank notes	5,618,709	Other securities	8,681,828
Notes of other banks	8,493	Notes in circulation	115,797,213
Bills discounted	124,468,010	Deposits	4,947,764
		Other liabilities	3,108,398

The original charter of the Imperial Bank expired on December 31, 1920, but the privileges of the bank have been renewed for a further term.

The following are some particulars of German banking:—

Year	No. of Banks				Share Capital	Reserves	Per Cent. of Capital
	Of Emission	Mortgage	Credit	Total	Millions of Marks	Millions of Marks	
1883	18	24	71	113	1,248·7	174·4	14
1903	6	40	124	170	2,869·5	712·7	25
1908	5	40	169	214	3,647·9	1,024·2	28
1913	5	40	160	205	4,124·4	1,345·1	32
1914	5	40	150	195	4,065·7	1,446·0	35
1915	5	40	148	193	3,993·0	1,492·8	37
1916	5	30	141	185	3,869·9	1,568·8	40
1917	5	39	127	171	3,829·9	1,758·8	46
1918	5	33	120	163	3,764·3	2,115·0	56

Money, Weights, and Measures.

The *Mark*, of 100 *Pfennig*, is of the normal value of 11½*d.*, or 20·43 marks to the pound sterling. (March, 1922, 1,120–1,145 marks to the £.) Gold coins are 20- and 10-mark pieces, called respectively *doppel-krone* and *krone*. The 20-mark piece weighs 7·96495 grammes '900 fine, and consequently contains 7·16846 grammes of fine gold. Gold coins have been entirely withdrawn from circulation. Silver coins are 5-, 3-, 2-, and 1-mark pieces and half-mark pieces. Silver coins were, however, put out of currency on January 1, 1921. The mark weighs 5·5 grammes '900 fine, and thus contains 5 grammes of fine silver. Nickel coins are 10 and 5 pfennig pieces. Copper coins are in 2 and 1 pfennig pieces. There are bronze coins of smaller denominations. Iron coins were introduced in 1915—5 pfennig pieces in August, and 10 pfennig pieces in December. Aluminium coins—1 pfennig pieces in 1916 and 50 pfennig pieces in 1919. Zinc coins—10 pfennig pieces in March, 1917.

The standard of value is gold, but in actuality it is paper (bank notes and treasury notes).

The metric system of weights and measures is in force.

Diplomatic Representatives.

1. OF GERMANY IN GREAT BRITAIN.

Ambassador.—Dr. Friedrich Sthamer. Appointed August 27, 1920.

Counsellor.—Albert Doufour-Féronce.

Secretaries.—Dr. Conrad Roediger, Kurt von Kamphoevener, and Emil Wiehl.

Attaché.—Carl von Below.

Commercial Attaché.—Dr. Richard Hemmen.

Special Attaché.—Dr. von Friedberg.

Chancellor.—F. W. Achilles.

2. OF GREAT BRITAIN IN GERMANY.

Ambassador.—Lord d'Abernon, G.C.M.G. Appointed June 30, 1920.

Counsellor.—Joseph Addison.

Secretaries.—Sir R. P. S. Head, Bart., R. C. S. Stevenson, and P. M. Broadmead.

Commercial Secretaries.—J. W. F. Thelwall, M.C., C. J. Kavanagh, and Harold Norman Sturrock.

British High Commissioner on the Inter-Allied Rhineland High Commission at Coblenz.—Lord Kilmarnock, C.M.G.

There are consular officers at Berlin (C.G.), Cologne (C.G.), Frankfurt (C.G.), Hamburg (C.G.), Stettin, Bremen, Bremerhaven, Emden, Hannover, Düsseldorf, Essen, Leipzig and Munich.

STATES OF GERMANY.

Statistics of area, population, births, deaths, marriages, emigration, primary schools, universities, and railways are given collectively for all the German States under the head of *Germany*.

ANHALT.

(FREISTAAT ANHALT.)

The Constitution of the Free State of Anhalt bears date July 18, 1919. The Diet is elected by the people for 3 years, and the Government is in the hands of a State Council composed of 5 members, whose chairman bears the title of President.

Area, 888 square miles. Population, 1919, 331,258. The capital, Dessau, 57,658 inhabitants in 1919; Bernburg, 33,724; Cöthen, 23,416; Zerbst, 19,210; Rosslau, 11,354. Population mostly Protestant (1910), 12,755 Catholics, 1,383 Jews.

Estimated income and expenditure, 1920-21, 62,285,300 marks. Public debt, June 30, 1919, 68,765,266 marks; State property, June, 1919, 64,910,689 marks.

BADEN.

(REPUBLIK BADEN.)

Until 1771, Baden was a Margraviate divided into two or more lines; it was then united, and subsequently received various additions, and its ruler took the title of Elector in 1803, and of Grand-duke in 1806. On November 22, 1918, the Grand-duke abdicated, and the Provisional Government proclaimed Baden a Republic.

Constitution.—The Constitution of the Republic of Baden was determined by the National Assembly which met on January 15, 1919, and which was elected on the basis of equal, secret, direct, universal suffrage (with proportional representation) of all males and females over 20 years of age. According to this Constitution of March 21, 1919, the Free State of Baden is a Republic and a component state of Germany. All privileges of birth, religion, and caste are abolished. Women enjoy the same rights as men and are eligible for all public offices. There is no State or established church, but religion is taught in all schools. The right of combining is granted to all citizens, including civil servants. The Initiative and Referendum have been adopted, as also proportional representation. The suffrage is granted to all adults, male and female, who are over 20 years of age. There is only one Chamber (Landtag), the members of which are elected for 4 years. Qualified electors over 25 years of age are eligible as members of the Chamber. No fixed number of seats has been provided for, but generally one member is allocated for each 10,000 voters. The present Landtag, elected on October 31, 1921, will continue until October 31, 1925. Its membership numbers 86, distributed as follows:—Centre, 34; Majority Socialists, 20; German Democratic Party, 7; Conservatives, 7; other parties, 18.

The Cabinet consists of 5 Ministers and 4 State Councillors (Ministers without portfolio), elected by the legislature. The Landtag also nominates the President of the Cabinet, who is styled officially 'State President.'

The new Government (1922) is made up as follows :—

State President and Minister of Education.—H. Hummel (Democrat).

Minister of Justice.—G. Trunk (Centre).

Minister of Social Affairs and Public Works.—A. Engler (Socialist).

Minister of the Interior.—A. Remmele (Socialist).

Minister of Finance.—H. Köhler (Centre).

For general administrative purposes there are 53 'Amtsbezirke,' superintended by four general commissioners (Landes-Kommissäre). For local government there are 11 circles (Kreise), and 1,590 communes (Gemeinden), 120 communal cities, and 1,472 parishes.

Area and Population :—

District	Area : Square miles	Population		Pop. per square mile 1919
		1919	1910	
Konstanz . .	1,610	337,962	325,924	209.9
Freiburg . .	1,830	557,871	564,580	304.9
Karlsruhe . .	993	631,681	610,784	636.1
Mannheim . .	1,386	680,989	641,545	498.5
Total . .	5,819	2,208,503	2,142,833	379.5

Population in 1919, 1,051,405 males and 1,157,098 females.

Including a part of the Lake of Constance, area is 5,889 square miles.

Principal towns, 1919 :—

Mannheim . 229,576	Konstanz . 30,119	Lahr . 13,650
Karlsruhe . 135,952	Baden . 25,444	Lörrach . 14,623
Freiburg . 87,946	Offenburg . 16,246	Weinheim . 14,537
Pforzheim . 73,839	Bruchsal . 15,323	Durlach . 17,529
Heidelberg . 69,806	Rastatt . 12,222	Villingen . 12,438

For movement of population, *see* under *Germany*.

Religion and Instruction.—In 1910 there were 1,271,015 Catholics, 826,364 Protestants, 13,229 other Christian sects, 25,896 Jews, and 6,329 others.

All religious denominations enjoy equality and self-government, appointing their own clergy. The Protestant Church is governed by a synod, and its affairs are administered by a board (Oberkirchenrat). The Roman Catholic Church has an Archbishop (at Freiburg), whose 4 suffragans are outside Baden. The Catholic Foundations Council (Oberstiftungsrat) manages the property of the Catholic Church. The Jews, whose ecclesiastical affairs are managed by the 'Oberrat der Israeliten,' have 15 rabbinates.

Instruction is general, free, and compulsory. Schools are under the authority of the State. Religious instruction, however, is provided by each denomination, but there is no compulsion to give or to receive religious instruction. Baden has 2 universities (Heidelberg and Freiburg), 1 technical high school (Karlsruhe), 1 Academy of Arts (Karlsruhe), 1 commercial high school (Mannheim), 17 gymnasias, 52 Real schools, 12 high schools for girls, 13 training colleges for teachers, and a number of technical and special schools.

Finance.—The following table shows revenue and expenditure for six years. The first three entries are actual returns, the last three are estimates (20 marks = £1) :—

	1914	1915	1916	1917	1918	1919
	£	£	£	£	£	£
Revenue . .	5,502,331	4,910,451	6,383,893	5,229,518	6,036,331	13,037,308
Expenditure .	5,855,719	7,174,667	8,193,804	5,472,995	6,743,224	13,839,898

Direct taxes are on property and income ; indirect taxes chiefly on wine, beer, and meat, registry, duties on succession, on change of possession.

There was only a railway debt of 30,045,450*l.* in 1919.

Production and Industry.—Of the total area, 3,547,257 acres (94 per cent.) is cultivable land. Of this total 1,461,385 acres (41·2 per cent.) are forests, 2,070,490 acres (58·4 per cent.) under cultivation, and 220,440 acres (5·9 per cent.) uncultivated land. Wheat, barley, rye and potatoes are grown. Vines in 1920, 33,482 acres, yield 8,275,000 gallons of wine, valued at 356,537,120 marks ; beetroot, turnips, hemp, and chicory are also grown. Tobacco area in 1920, 12,695 acres. Mineral produce almost solely salt and building-stone.

Principal manufactures : Tiles, cigars, jewellery, machinery, clocks, musical instruments, chemicals, silk ribbons, cotton tissues, felt and straw hats, paper and cardboard, leather, wood-work, and brushes.

BAVARIA.

(FREISTAAT BAYERN.)

Bavaria was for over a century a kingdom, ruled by descendants of the ancient Counts of Wittelsbach, who flourished in the twelfth century. Duke Maximilian I. of Bavaria was elevated to the rank of Elector of the Holy Roman Empire in the 'Thirty Years' War ; and Elector Maximilian Joseph was raised to the rank of king by Napoleon I. in 1805. On November 22, 1918, the dynasty was deposed, and Bavaria was declared a Republic.

Constitution and Government.—On the outbreak of the Revolution the Government was taken over by a cabinet under the leadership of Kurt Eisner, an Independent Socialist. Eisner was assassinated in February,

1919, and a struggle ensued between the extremists of the Left, who proclaimed themselves Bolsheviks, and their more moderate opponents, with varying success on either side. By May, 1919, the moderate party had returned to power.

The constitution of August 14, 1919, establishes the Free State of Bavaria. The supreme power lies with the people. The Diet consists of one Chamber, elected for 4 years on the basis of 1 member for every 40,000 inhabitants; at present there are 158 members. The present Chamber will continue until June, 1925. The suffrage is universal, equal, direct, secret and proportional. All citizens over 20 years of age have the vote. The supreme executive power is exercised by the Ministry as a whole. All privileges of birth and caste are abolished. The Church is separated from the State. All religious associations have equal rights, and are free in their activities.

State of parties in the Bavarian National Constituent Assembly (elected June, 1920):—Bavarian People's Party, 65; Majority Socialists, 25; German Democrats, 12; Peasants' Union, 12; National Liberals, 19; and Independent Socialists, 20; Communists, 2; members for Coburg, 3.

The Cabinet, constituted on September 22, 1921, is as follows:—

Premier and Minister of Foreign Affairs.—Graf von Lerchenfeld.

Minister of Education.—Dr. Matt.

Minister of Commerce and Industry.—Herr Hamm.

Minister of Social Welfare.—Herr Oswald.

Minister of Agriculture.—Herr Wutzelhofer.

Minister of the Interior.—Dr. Schweyer.

Minister of Finance.—Dr. Krausnick.

Minister of Justice.—Graf von Lerchenfeld.

Area and Population:—

Regierungsbezirke	Area, Eng. sq. miles	Population		Pop. per sq. mile 1919
		1910	1919	
Upper Bavaria (Oberbayern)	6,686	1,511,952	1,582,669	237·0
Lower Bavaria (Niederbayern)	4,298	724,331	739,967	172·3
Palatinate (Rheinpfalz)	2,372	937,085	957,321	403·1
Upper Palatinate (Oberpfalz)	3,862	599,461	611,723	158·5
Upper Franconia (Oberfranken)	2,798	661,862	656,489	234·9
Middle Franconia (Mittelfranken)	3,036	931,691	948,175	312·7
Lower Franconia (Unterfranken)	3,360	710,943	733,971	219·3
Suabia (Schwaben)	3,934	809,966	835,709	212·8
Coburg	216	74,818	74,326	344·1
Total	30,562	6,962,109	7,140,340	233·8

On November 30, 1919, the inhabitants of the Free State of Coburg decided by an overwhelming majority to join the Free State of Bavaria, and on March 11, 1920, the Bavarian Diet unanimously adopted a bill for the Union of the two Republics.

To the area has to be added 257 square miles for water.

Of the total population at the end of 1919, 3,394,274 were males and 3,746,066 females.

The increase of the population since 1900 has been as follows :—

Year	Population	Population per sq. mile	Annual Increase per cent.
1900	6,176,057	210·9	1·22
1905	6,524,372	222·3	1·12
1910	6,887,291	226·9	1·12
1919	7,140,340	242·1	—

Urban and rural population at the censuses of 1910 and 1919 :

Census	No. of Towns	No. of Rural Communes	Towns, &c., with 2,000 inhabitants and over			Communes, &c., with less than 2,000 inhabitants		
			No.	Population	Per cent. of pop.	No.	Population	Per cent. of pop.
1910	255	7,729	334	3,079,022	44·7	7,650	3,808,269	55·3
1919	262	7,702	354	3,253,878	46·0	7,614	3,812,146	54·0

In 1919 the urban population was thus distributed :—

—	No.	Population 1919	—	No.	Population 1919
Large towns ¹ .	3	1,137,441	Small towns .	69	549,963
Medium „ .	21	810,340	Country „ .	261	755,634

¹ See under *Germany* for official signification of these terms.

Principal towns, 1919 :—

Towns	1919	Towns	1919
Munich (München) .	630,711	Pirmasens . . .	39,611

Bamberg . . .	49,179	Coburg . . .	23,413
Hof . . .	39,690	Speyer . . .	23,326

Religion.—Religious division of the population, December 1, 1910 :—
Roman Catholics, 4,862,233 ; Protestants, 1,912,262 ; Jews, 55,065.

Besides the above there are included in other Christian sects 5,816 Old Catholics, 3,017 Mennonites, 164 Anglican, 1,611 Greek Catholics and Russian Orthodox, 1,139 Irvingites, 25 Anabaptists, 1,833 Methodists, 5,841 Free Christians, 1,649 other Christians, 1,368 of religion not Christian, 4,240 of religion not stated, or without religion, 905 of religion not ascertainable.

There are 2 Roman Catholic archbishoprics, those of Munich and Bamberg each with 3 suffragan bishoprics ; 218 deaneries ; and 3,703 parishes. The Protestant Church is under a Superior Church Council (*Oberkirchenrat*)—and three General Deaneries (*General-Deanate*), 81 deaneries, and 1,154 parishes. Of the three universities of the Republic, two, at Munich and Würzburg, are Roman Catholic, and one, at Erlangen, Protestant.

Instruction.—(For Universities, *see* under *Germany*.) Education compulsory from six to sixteen. In 1919-20 there were 6,483 public elementary schools, with 22,104 teachers (14,947 male, 7,157 female), and 1,091,345 pupils. There were 2 agricultural schools, with 323 pupils.

Justice, Crime, and Pauperism.—Bavaria is the only German State which before the revolution had an *Oberstes Landesgericht*, or appeal-court intervening between the Oberlandesgerichte and the Reichsgericht; it has a bench of 22 judges. Under it are 5 Oberlandesgerichte, 28 Landgerichte and 266 Amtsgerichte. The number of judges was (1917) 1,385. In 1917, 66,263 criminals were convicted.

Finance.—The ordinary budget for the year 1922 provides for a revenue of 2,396,345,030 marks, and an expenditure of 2,745,473,029 marks, leaving a deficit of 349,127,999 marks. The extraordinary budget balanced at 243,550,000 marks.

Debt, March 31, 1922, 2,736,207,473 marks, of which 2,403,517,088 marks is the share of the Reich, and 332,690,385 marks the share of Bavaria.

Production and Industry.—Of the total area, nearly one-half is under cultivation, one-sixth under grass, and one-third under forests.

The areas under the chief crops, and the yield in 1920, were as follows:—

Wheat, 704,982 acres (yield 383,118 metric tons); rye, 1,185,950 acres (548,276 tons); oats, 1,113,325 acres (574,078 tons); potatoes, 806,450 acres (3,173,858 tons). Vines, 50,042 acres, yielding 18,252,662 gallons; 25,082 acres under hops yielded 4,902 metric tons.

The census of live-stock on December 1, 1920, showed 365,026 horses, 3,667,244 cattle, 741,483 sheep, 1,740,703 pigs, and 431,691 goats.

In 1920 the output of coal was 2,529,781 metric tons; in 1919, iron ore, 376,486 tons; pig iron, 159,690 tons; cast iron wares, 142,760 tons; sulphuric acid, 30,492 tons.

The quantity of beer brewed in 1919-20 was 163,235,116 gallons. In 1919-20, the distilleries produced 2,609,598 gallons of alcohol.

In 1917 there were 384 savings banks, with 1,677,632 depositors having to their credit 988,188,737 marks.

BREMEN.

(FREIE HANSESTADT BREMEN.)

Bremen is a Free State, with a Constitution adopted on May 15, 1920. The highest power in the State is exercised by the House of Burgesses (Bürgerschaft), consisting of 120 members, elected on a democratic basis by all citizens of the State. The Bürgerschaft elects the Senate of 14 members as the Executive body. Two Bürgermeister chosen from the members of the Senate preside over the deliberations of that body.

The results of the elections for the House of Burgesses held on February 20, 1921, were :—Majority Socialists, 28 ; Independent Socialists, 23 ; Communists, 6 ; Democrats, 24 ; German People's Party, 31 ; German National People's Party, 8.

Area, 99 square miles ; population census (1919), 311,266 ; (July 1, 1921) Bremen, 279,518 ; Bremerhaven, 22,333.

On Dec. 1, 1910, Bremen contained 257,930 Protestants (87·2 per cent.), 21,074 Roman Catholics (7·1 per cent.), 1,217 other Christians, 1,251 Jews, others 14,243. In Bremen (town) marriages in 1920, 3,915 ; births, 6,177 ; deaths, 3,730 ; excess of deaths, 2,447.

Bremen contains two Amtsgerichte and a Landgericht, whence appeals lie to the ' Hanseatische Oberlandesgericht ' at Hamburg.

In 1919 the revenue was 93,129,003 marks, and expenditure 114,671,188 marks. Public debt on April 1, 1918, 292,345,000 marks.

Next to Hamburg, Bremen was the largest port for the international trade of Germany. Eighty per cent. of the commerce was, in 1914, under the German, and about 8 per cent. under the British flag.

Railways, 31 miles, owned and worked by the State.

BRUNSWICK.

(FREISTAAT BRAUNSCHWEIG.)

On November 8, 1918, the reigning Duke of Brunswick was deposed, and the duchy proclaimed a Republic. The Constitution bears date December 23, 1921. The Diet consists of 60 members. Present Diet elected on May 17, 1920. The Cabinet contains 4 members.

Area, 1,424 square miles ; population (1919), 480,599 (226,400 males and 254,199 females). There were only 25,888 Catholics in 1910.

The capital, Brunswick (Braunschweig), had 139,539 inhabitants in 1919.

For the financial period ending April 1, 1921, the budget of the State was fixed at 65,049,000 marks revenue and 88,049,100 marks expenditure. The public debt of Brunswick, on August 31, 1921, was 35,000,000 marks. The property of the State consists chiefly of domains and forests.

HAMBURG.

(FREIE UND HANSESTADT HAMBURG.)

Constitution.—The State and Free City of Hamburg is a republic. The Constitution bears date January 7, 1921. According to this, supreme power rests with the Bürgerschaft, or House of Burgesses of 160 members, elected on a democratic basis. The Executive is in the hands of the Senate, composed of 16 members elected by the House of Burgesses.

Area and Population.—Area, 160 English square miles ; population on December 1, 1920, 1,091,074 ; December 1, 1910, 1,014,664. The State consists of two divisions, the population of each of which was as follows on December 1, 1920 :—City of Hamburg, 1,025,502 ; Landgebiet (4 Landherrenschaften), 65,572.

Marriages, 1920, 16,168 ; births, 22,323 (757 or 3·39 per cent. still-births, 2,605 or 11·67 per cent. illegitimate) ; deaths, 14,681.

Religion, Instruction, and Justice.—On December 1, 1910, 930,071 Protestants (91·66 per cent.), 51,036 Roman Catholics (5·03 per cent.), 3,942 other Christians (0·39 per cent.), 19,472 Jews (1·92 per cent.), and 10,143 'all other' (1·00 per cent.).

In the year ending March, 1921, Hamburg (State) had 235 public elementary schools with 3,874 teachers (2,092 male, 1,782 female), and 121,167 pupils ; cost for the year, 90,000,000 marks ; 28 higher State schools with 15,415 pupils and 71 private schools with 18,086 pupils. The University at Hamburg had 3,430 matriculated students (421 women).

The State contains three Amtsgerichte, a Landgericht, and the 'Hanseatische Oberlandesgericht,' or court of appeal for the Hanse Towns and the Republic of Lübeck (Oldenburg). In 1920, 16,296 persons, in the State of Hamburg, were convicted of crime.

Finance.—For 1921 the budget estimated revenue at 1,002,804,684 marks, and expenditure at 1,214,549,754 marks. Expenditure for the debt, 156,675,000 marks in 1921.

Public debt, January 1, 1920, 2,159,857,684 marks, incurred chiefly for public works.

Commerce and Shipping.—Hamburg is the principal seaport in Germany. Leading Steamship Companies :—Hamburg - America line ; Hamburg-South America line ; German Kosmos line ; German-Australia line ; German East Africa line ; Woermann line ; German Levant line. Movement of shipping for 5 years :—

Year	Entered		Cleared

HESSE.

(VOLKSTAAT HESSEN.)

Hesse was proclaimed a Republic early in November, 1918.

Constitution.—The Constitution of the new Republic was adopted on December 20, 1919. The Landtag of 70 members is elected for 3 years. The new Diet, elected January 26, 1919, is composed as follows :—Majority Socialists, 31 ; Independents, 1 ; Democrats, 13 ; German People's Party, 7 ; Centre (Catholics), 13 ; Hessian People's Party, 5.

The Cabinet, nominated on December 20, 1921, is as follows:—

Premier and Minister of Foreign Affairs.—Herr *Ulrich* (Socialist).

Minister of Finance.—Herr *Henrich* (Democrat).

Minister of the Interior.—Herr *Ulrich*.

Minister of Justice.—Herr von *Brentano* (Centre).

For administrative purposes, the Republic is divided into three provinces, eighteen circles (Kreise), and 983 communes (Gemeinden).

Area and Population.

Provinces	Sq. Miles	Population			Pop. per sq. mile, 1919
		1905	1910	1919	
Starkenbug	1,169	542,996	590,380	598,358	511·8
Upper Hesse (Oberhessen) . . .	1,269	296,755	309,233	322,270	253·9
Rhenish Hesse (Rhein Hessen) . .	530	369,424	382,438	370,621	699·2
Total	2,968	1,209,175	1,282,051	1,291,249	435·0

There were 616,882 males and 674,367 females in 1919. Increase from 1910 to 1919 was at the rate of 0·08 per cent. per annum.

The largest towns are Mayence or Mainz (including suburbs), with 107,930; Darmstadt, the capital, 82,368; Offenbach, 75,380; Worms, 44,290; Giessen, 33,409 inhabitants, 1919.

Religion and Instruction.—At the census of 1910 there were 848,004 Protestants, 397,549 Catholics, 6,707 of other Christian sects, 24,063 Jews, and 5,728 unclassified, or of no religion. The Protestant Church is governed by a synod, and its affairs are administered by a consistory (Oberkonsistorium). The Roman Catholic Church has a Bishop (at Mainz).

Instruction is compulsory. The elementary schools are maintained by the communes, but with contributions by the State. There are (1921) 977 public elementary schools with 4,331 teachers, and 198,236 pupils. Continuation schools (Fortbildungsschulen); winter, 1920-21, 27,030 pupils. Hesse has 10 gymnasia, 3 progymnasia, 3 realgymnasia, 9 Oberrealschulen, 18 realschulen, 1 Agricultural College (Landwirtschaftsschule), and 20 incomplete realschulen (höhere Bürgerschulen), with 842 teachers, and 15,405 pupils; 7 higher girls' schools with 3,801 pupils; and 45 private schools with 4,880 pupils. The University at Giessen had 2,112 matriculated students (131 women), and a Technical High School at Darmstadt, with 2,678 students. There are many industrial, technical, agricultural and other special institutes.

Finance.—The ordinary revenue and expenditure were estimated for the year 1921 to balance at 531,752,508 marks.

Public debt 498,812,808 marks, 1919, nearly all railway debt.

Production and Industry.—Of the area, 63·4 per cent. is under cultivation; 31·5 per cent. forests; 5·1 per cent. uncultivated (houses, roads, water, &c.). Arable land occupies 923,403 acres; meadows and pastures, 252,602; vineyards, 36,087; and forests, 604,904 acres; of the latter,

191,090 belong to the State, 235,918 to the communes and other bodies, and 193,825 to private persons.

Areas and yield of chief crops, 1920 :—Rye, 152,320 acres (yield 97,287 tons); summer barley, 93,478 acres (61,952 tons); potatoes, 138,148 acres (719,492 tons); 34,010 acres under vines, yielding 10,399,136 gallons of wine to the value of 353,260,663 marks in 1920.

Domestic animals, December 1, 1920 :—Horses, 56,418; cattle, 279,271; sheep, 87,215; swine, 284,719; goats, 153,005.

The quantity of coal raised in 1919 was 402,773 tons, to the value of 4,671,386 marks; and iron, 823,818 tons, valued at 7,151,330 marks. The principal manufactures are leather, cloth, paper, chemicals, furniture, wagons, railway cars and carriages, machinery, musical instruments, tobacco and cigars, sparkling-wine.

LIPPE.

(FREISTAAT LIPPE.)

Lippe became a Republic in November, 1918. The provisional Constitution bears date February 13, 1919. The Landtag has 21 members, elected on January 24, 1921, and divided as follows :—Majority Socialists, 8; German Nationals, 5; German People's Party, 4; Democrats, 2; Trade Union Federation, 1; and Communist, 1. The Cabinet has 3 members.

Except 5,925 Catholics and 780 Jews (1910), the people are Protestants. Marriages, 1920, 2,351; births, 3,936; deaths, 2,208; stillborn, 138; illegitimate, 233. The capital, Detmold, has 15,275 inhabitants (1919). Area 469 square miles; population 1919, 154,318 (71,117 males and 83,201 females).

For 1920-1921 the revenue was estimated at 21,878,944 marks, and expenditure at 22,037,528 marks. Public debt in 1921, 13,368,000 marks.

In November 1915, a State bank was established, with its seat in Detmold.

LÜBECK.

(FREIE UND HANSE-STADT LÜBECK.)

The free city and State of Lübeck is a Republic, the Constitution of which bears date May 23, 1920. Supreme power lies with the people, who elect a House of Burgesses (Bürgerschaft) of 80 members. The latter elects the Senate of 12 members, which is the supreme executive authority.

Area 115 square miles. The city of Lübeck had (1919) 120,568 inhabitants (57,539 males and 63,029 females).

On December 1, 1910, Protestants numbered* 111,543, Roman Catholics 3,802, other Christians 276, Jews 623, and 'unclassified' 355. Education is compulsory between the ages of 6 and 14. There are in Lübeck (1920) 20 elementary schools (6 for boys, 6 for girls, 8 for either sex), with 9,127 pupils; for boys 1 gymnasium (653 pupils), 1 real gymnasium (562 pupils), 1 higher real school (680 pupils), 1 private real school (581 pupils), and 3 public middle schools (2,140 pupils); for girls there are 1 public high school (745 pupils), 1 private high school (447 pupils), 1 private middle school (351 pupils), 3 public middle schools (2,200 pupils), 1 church school (277 pupils) and 4 foundation schools (484 pupils). There are also 1 teachers' seminary, 1 public technical school for apprentices, 1 architectural school, 1 naval school, 1 school for engineers of steamers, 1 public commercial school, 1 private technical school for women, 1 agricultural school, 1 continuation school for working people and 1 people's high school.

Lübeck contains an Amtsgericht and a Landgericht, whence the appeal lies to the 'Hanseatisches Oberlandesgericht' at Hamburg.

For 1921 the revenue and expenditure balanced at 8,314,058*l*. About one-third of the revenue is derived from public domains, chiefly forests and industrial establishments; and over one-third from direct taxation. The public debt amounted to 9,529,181*l*. in 1921.

MECKLENBURG-SCHWERIN.

(FREISTAAT MECKLENBURG-SCHWERIN.)

Until November, 1918, Mecklenburg was a Grand Duchy. The Grand-ducal house of Mecklenburg was the only reigning family in Western Europe of Slavonic origin, and claimed to be the oldest sovereign house in the Western world. In their full title, the Grand-dukes styled themselves Princes of the Wends. Their genealogical table begins with Niklot, who died 1160, and comprises 26 generations. The title of Grand-duke was assumed in 1815. In November, 1918, Mecklenburg was proclaimed a Republic. The Constitution, which bears date May 17, 1920, provides for a Landtag consisting of 67 members. The Landtag elected on March 13, 1921, is made up as follows:—Majority Socialists, 28; German National Party, 15; German People's Party, 12; Communists, 3; Village Union, 4; Economic Party, 2; Democrats, 3.

Area, 5,068 sq. miles; population (1919), 657,330 (317,400 males and 339,930 females). The chief towns (1919) were Rostock (67,953 inhabitants), Schwerin (45,455 inhabitants), the capital, Wismar (25,201 inhabitants), Güstrow (18,843 inhabitants), and Parchim (11,435 inhabitants).

In 1910 there were: Protestants, 615,512; Catholics, 21,043; other Christians, 1,288; Jews, 1,413; not stated, 702. The parishes are generally well endowed with landed property.

There were 1,235 elementary schools with 92,912 pupils (1911); Gymnasias, 7 with 1,819 pupils; Realgymnasien, 6 with 1,492 pupils; Realprogymnasien, 2 with 167 pupils; Realschulen, 5 with 1,254 pupils; 6 preparatory schools with 618 pupils; higher private schools, 18 with 2,154 pupils; normal

972 GERMANY :—MECKLENBURG-STRELITZ—OLDENBURG

schools, 2 with 398 pupils; navigation schools, 2 with 129 pupils; agricultural school, 1 with 55 pupils; technical schools, 2 with 196 pupils in the summer session and with 303 pupils in the winter session; institutions for the deaf and dumb, 1 with 54 pupils; institution for the blind, 1 with 90 pupils; schools for artisans, 50 with 5,843 pupils. There is a university at Rostock (see *Germany*).

There are 43 Amtsgerichte, 3 Landgerichte, and 1 Oberlandesgericht at Rostock, which is also the supreme court for Mecklenburg-Strelitz.

MECKLENBURG-STRELITZ.

(FREISTAAT MECKLENBURG-STRELITZ.)

In November, 1918, Mecklenburg-Strelitz was proclaimed a Republic. Its Constitution bears date June 11, 1919. The Landtag consists of 35 members elected for 3 years.

The country is divided into two provinces: Stargard and Ratzeburg. Area, 1,131 square miles; population (1919), 106,394 (51,170 males and 55,224 females). The capital, Neu-Strelitz, had 11,461 inhabitants in 1919. With the exception of 4,255 Catholics, 254 Jews, and 352 persons of other confessions (1910), the people are Protestants.

Revenue for 1919-20, 10,752,100 marks, expenditure 10,571,500 marks. Debt, July 1, 1919, 2,651,200 marks.

OLDENBURG.

(FREISTAAT OLDENBURG.)

In November, 1918, Oldenburg became a Republic. Its Constitution bears date June 7, 1919. The Landtag consists of 48 members elected for 5 years.

Area, 2,482 sq. miles. The population, 1919 :—Duchy of Oldenburg, 421,435; Republic of Lübeck, 45,450; Republic of Birkenfeld, 51,263; total, 518,148 (251,006 males and 267,142 females). Oldenburg, the capital, had 30,242 inhabitants in 1910.

In 1910 Oldenburg contained 371,650 Protestants, 107,508 Roman Catholics; other religions, 2,359; 1,525 Jews.

Oldenburg contains an Oberlandesgericht and a Landgericht. The Amtsgerichte of Lübeck and Birkenfeld are under the jurisdiction of the Landgerichte at Lübeck and Koblenz respectively.

Estimated revenue, 1920, 44,350,019 marks; expenditure, 41,774,919 marks. Debt, 1920, 162,470,369 marks.

PRUSSIA.

(FREISTAAT PREUSSEN.)

Until November 13, 1918, Prussia was ruled by sovereigns who traced their origin to Count Thassilo, of Zollern in Swabia, one of the generals of Charles the Great. His successor, Count Friedrich I., built the family castle of Hohenzollern, near the Danube, in the year 980. A subsequent Zollern, or Hohenzollern, Friedrich III., was elevated to the rank of a Prince of the Holy Roman Empire in 1273, and received the Burggraviate of Nuremberg in fief; and his great-grandson, Friedrich VI., was invested by King Sigmund, in 1415, with the Margraviate of Brandenburg, and obtained the rank of Elector in 1417. A century after, in 1511, the Teutonic Knights, owners of the large province of Prussia, on the Baltic, elected Margrave Albrecht, a younger son of the family of Hohenzollern, to the post of Grand-Master, and he, turning Protestant, declared himself hereditary duke. The early extinction of the male line of Albrecht brought the province of Prussia by inheritance to the electors of Brandenburg, who likewise adopted Protestantism. In the seventeenth century, the Hohenzollern territories became greatly enlarged by Friedrich Wilhelm, 'the Great Elector,' under whose fostering care arose the first standing army in Central Europe. The Great Elector, after a reign extending from 1640 to 1688, left a country of one and a half million inhabitants, a vast treasure, and 38,000 well-drilled troops to his son, Friedrich I., who put the kingly crown on his head at Königsberg on January 18, 1701. His successor Friedrich Wilhelm I., after adding part of Pomerania to the possessions of the house, left his son and successor Friedrich II., called 'the Great,' a State of 47,770 square miles, with two and a half millions of inhabitants. Friedrich II. added Silesia, an area of 14,200 square miles; this, and the large territory gained in the first partition of Poland, increased Prussia to 74,340 square miles, with more than five and a half million inhabitants. Under the reign of Friedrich's successor, Friedrich Wilhelm II., the State was enlarged by the acquisition of the principalities of Ansbach and Baireuth, as well as the vast territory acquired in another partition of Poland, which raised its area to nearly 100,000 square miles with about nine millions of souls. Under Friedrich Wilhelm III., nearly one-half of this State and population was taken by Napoleon; but the Congress of Vienna not only restored the loss, but added part of the Kingdom of Saxony, the Rhineland, much of Westphalia, and Swedish Pomerania, moulding Prussia into two separate pieces of territory, of a total area of 106,820 square miles. This was shaped into a compact State of 134,463 square miles, with a population of 22,769,436, by the war of 1866. According to the Constitution of the German Empire which was established in 1871, the King of Prussia was chosen hereditary German Emperor.

On November 13, 1918, Prussia was proclaimed a Republic.

Constitution and Government.

The Constitution, adopted on November 30, 1920, gives a vote to every citizen, male and female, over 20 years of age in general, equal, secret, and direct suffrage. Prussia is declared to be a Republic. Besides the Diet (*Landtag*) there is a State Council (*Staatsrat*) elected by the Provincial Assemblies on the basis of one representative for every 50,000 inhabitants. The function of the State Council is to advise and control the Diet, and is intended to be a kind of parallel institution to the Reichsrat in the Empire. The State Council has the right of rejecting legislation adopted by the Diet. The Diet elects the Premier, and he appoints the other members of the Cabinet. The Diet is elected for 4 years on the principle of proportional representation by secret and direct ballot, and the ministry is invested with the powers of the former King.

The Prussian Constituent National Assembly, elected by universal, equal, and secret suffrage of men and women, met on March 14, 1919.

In February, 1921, the elections were held for a Parliament, and resulted in the return of the following parties:—114 Majority Socialists; 81 Centre (Catholics); 26 Democrats; 75 German National Party; 29 Independent Socialists; 58 German People's Party; 11 Guelphs; 30 Communists, and 4 Economic Party; total, 428.

The State Council, composed of 74 members, is made up as follows (April, 1921):—German People's Party, and German National Party, 27; Centre, 16; Democrats, 4; Social Democrats, 18; Communists, 2; Independent Socialists, 7.

The Cabinet appointed on November 6, 1921, is composed as follows:—

Prime Minister.—Otto Braun (Socialist).

Minister of National Welfare.—Herr Hirtsiefer (Centre).

Minister of Justice.—Herr Zehnhoff (Centre).

Minister of Commerce.—Herr Siering (Socialist).

Minister of the Interior.—Herr Severing (Socialist).

Minister of Agriculture.—Dr. Wendorff (Democrat).

Minister of Finance.—Herr Richter (German People's Party).

Minister of Education and Public Worship.—Dr. Boelitz (German People's Party).

For local government Prussia is divided into Provinces, Government districts (*Regierungsbezirke*), urban circles (*Stadtkreise*), and rural circles (*Landkreise*). According to the Constitution, there are 14 Provinces. Urban circles consist of towns of over 25,000 inhabitants; rural circles consist of the smaller towns, rural communes (*Landgemeinden*), and manors (*Gutsbezirke*). For provinces and rural circles the local authorities of the constituent areas elect deliberative assemblies which appoint executive committees. Each province has a governor (*Oberpräsident*); each government district has a president, and deals chiefly with local affairs of State concern. In towns the deliberative authority is the town council (*Stadtverordnetenversammlung*), elected on the system of proportional suffrage. The executive is a magistracy with the burgomaster as president. Each rural circle has a *Landrat*. Local administrative business varies according to the nature of the administrative division. The matters dealt with are such as poor-relief, roads, light railways, &c., but in rural districts they include agricultural interests, and in towns, education, sick-insurance, valuation, collection of certain taxes, mustering of recruits, management of gas, water, and electric works, &c.

Area and Population.

I. PROGRESS AND PRESENT CONDITION.

Provinces	Area : Square Miles (Oct. 1, 1920)	Population		Pop. per Square Mile, 1919
		1919	1910	
East Prussia (Ostpreussen)	14,286	2,229,290	2,149,389	156·0
Brandenburg	15,070	2,445,627	2,434,223	162·3
Berlin	338	3,803,770	3,729,050	11,253·8
Pomerania (Pommern)	11,654	1,787,193	1,718,860	153·4
Border Province (Grenzmark Posen—West Preussen)	3,026	326,881	311,267	108·0
Lower Silesia (Niederschlesien)	10,270	2,987,904	2,990,183	290·9
Upper Silesia (Oberschlesien)	4,998	2,283,992	2,162,585	457·0
Saxony (Sachsen)	9,756	3,129,193	3,089,275	320·7
Schleswig-Holstein	5,805	1,462,187	1,454,109	251·9
Hannover	14,869	3,017,366	2,942,436	202·9
Westphalia (Westfalen)	7,807	4,488,115	4,125,096	574·9
Hesse-Nassau	6,062	2,273,502	2,221,021	375·0
Rhine (Rheinprovinz) ¹	9,470	6,769,469	6,488,344	714·8
Hohenzollern (Hohenzollernsche Lande)	441	70,751	71,011	160·4
Total	113,852	37,075,240	35,887,449	325·6

¹ Exclusive of the Saar district, and Eupen and Malmedy.

As a result of the Treaty of Versailles, Prussia, on the basis of the census of December 1, 1910, has lost 20,377 square miles and a population of 3,705,898.

Development of Prussia since 1875 :—

Year	Area in Sq. Miles	Population	Average per Sq. Mile	Percentage of Annual Increase
1875	134,179	25,742,404	191·8	—
1890	134,537	29,957,367	222·7	1·00
1900	134,622	34,472,509	256·1	1·51
1905	135,134	37,293,264	275·9	1·64
1910	135,131	40,165,219	297·0	1·54
1919	113,852	37,075,240	325·6	-0·85

II. MOVEMENT OF THE POPULATION.

Year	Marriages	Total Births	Still-born	Illegitimate	Total Deaths incl. Still- born	Surplus of Births
1915	177,566	918,821	28,107	92,843	954,560	-35,739
1916	176,872	697,658	21,635	71,028	824,377	-123,719
1917	198,573	623,201	18,667	66,046	876,751	-253,550
1918	229,851	630,524	19,619	76,617	1,035,279	-404,755
1919	527,172	827,335	25,192	85,336	649,349	+177,986

In 1919 2·86 per cent. of the total births in rural districts and 3·26 per cent. in urban areas were still-born, and 8·72 per cent. in rural districts and 12·20 per cent. in urban areas were illegitimate.

Principal towns with population in 1919 :—

Berlin	3,803,770	Hannover	392,805	Kiel	205,330
Cologne	633,904	Dortmund	295,026	Halle	182,326
Breslau	528,260	Magdeburg	285,856	Altona	168,729
Essen	439,257	Königsberg	260,895	Gelsenkirchen	168,557
Frankfort (Main)	433,002	Duisburg	244,302	Cassel	162,391
Düsseldorf	407,338	Stettin	232,726	Elberfeld	157,218

Religion.

Absolute religious liberty is guaranteed in the Republic. Nearly two-thirds of the population are Protestants, and rather over one-third Roman Catholics. In 1910, the numbers were: Protestants, 24,830,547; Roman Catholics, 14,581,829; other Christians, 189,887; Jews, 415,926; others and unknown, 147,030. Catholics are in a majority only in West Prussia, Silesia, Westphalia, Rhine Province, and Hohenzollern.

The Evangelical or Protestant Church has since October 31, 1817, consisted of a fusion of the Lutheran and Calvinistic bodies, from which, however, there are still a few dissenters. It is governed by 'consistories,' or boards elected by the people. There are also synods in most circles and provinces, and general synods representing the *old* provinces only. The constitution of the Catholic Church differs in the various provinces. Altogether in Prussia there are two archbishops and ten bishops.

Instruction.

Education in Prussia is compulsory. Every town, or community in town or country, must maintain a school supported by local rates, supplemented by the State, and administered by the local authorities, who are elected by the citizens, and called aldermen or town councillors. All parents are compelled to have their children properly taught or to send them to one of these elementary schools, in which all fees are now abolished. No compulsion exists in reference to a higher educational institution than elementary schools, but parents who send more than one child to any school supported by the community have, in many cases, a reduction made in the charge, and a limited number of pupils (about 10 per cent.) whose parents cannot afford to pay the full rate either enjoy this reduction or are admitted entirely free, at the discretion of the authorities. The school age is from 6 to 14 years, and the number of children of that age in 1910 was returned at 7,165,744.

The following table gives the educational statistics of Prussia :—

	No.	Teaching Staff	Students or Pupils
Universities ⁴ (1910-20) ¹	13	2,283 ⁵	38,050 ⁸
Gymnasias & Progymnasias ² (1918-19) ¹	356	7,382	112,814
Realgymnasias, Realprogymnasias, and Higher Realschulen (1918-19) ¹	378	7,269	148,972
Realschulen ² (1918-19) ¹	175	1,492	37,772
High schools for girls (Lyceums), public and private (1920-21) ¹	507	11,745	208,639
Middle schools, public (1911) ³	629	7,154	193,429
" " private (1911) ³	924	5,646	62,265
Public elementary schools (1911)	38,684	163,016 ⁷	6,572,074
Private " " (1911)	263	553	8,498
Public normal schools (1919)	204	1,472	16,343

¹ Winter half-year. ² Including teachers and scholars of preliminary schools. ³ Including girls' schools not officially recognised. ⁴ Including Lyceum at Braunsberg. ⁵ Including lecturers and special teachers. ⁶ Including regular technical and assistant teachers. ⁷ Including technical and assistant teachers, but excluding teachers of religion. ⁸ Including 3,475 women students.

There are also 4 technical high schools (Berlin, Hannover, Aachen, Breslau), 2 forestry schools (Eberswalde, Münden), 2 technical mining schools

(Berlin, Klausthal), 2 agricultural high schools (Berlin, Bonn-Poppelsdorf), agricultural institutes connected with universities, 2 veterinary high schools (Berlin, Hannover), a great number of other schools for various aspects of agriculture, 4 commercial high schools (Berlin, Köln, Frankfurt am Main, Königsberg i. Pr.), 2 academies of local government work (Düsseldorf and Köln), besides other special schools and State establishments for art and music.

The Universities, the high schools (exclusive of commercial high schools), some of the Gymnasias, Realgymnasias, and similar schools, as also the normal schools, are maintained and administered by the Government, while all the other scholastic institutions are supported by the community, &c., under control of the Government.

Justice, Crime.

Prussia contains 13 Oberlandesgerichte (*see* under *German Empire*). The Oberlandesgericht at Berlin is called the *Kammergericht*, and serves as an ultimate appeal court for summary convictions; though for all cases the court of final instance is the Reichsgericht at Leipzig. The prosecution in all criminal cases is conducted by *Staatsanwälte*, or public prosecutors, paid by the State.

Finance.

Revenue and expenditure for years ending March 31 :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	Marks	Marks		Marks	Marks
1916-17	11,876,500,166	11,496,017,819	1919-20 ¹	8,939,024,266	8,939,024,266
1917-18	13,562,656,534	13,148,547,888	1920-21 ¹	8,534,245,264	8,534,245,264

¹ Estimates.

Public debt on April 1, 1921, 13,747,864,387 marks.

Production and Industry.

I. AGRICULTURE.

The areas under the chief crops for 2 years, and the yield in metric tons, for 3 years, were as follows (1 hectare = 2·47 acres; 1 metric ton = 2,204 lbs.) :—

—	1917		1918		1919 ¹	
	Acres	Tons	Acres	Tons	Acres	Tons
Wheat . . .	2,078,626	1,286,850	2,033,687	1,488,245	1,760,386	1,284,668
Rye . . .	10,689,258	5,311,605	11,055,962	6,157,424	7,965,296	4,472,035
Summer barley . . .	2,101,212	1,050,546	2,033,304	1,283,326	1,587,565	1,043,008
Oats . . .	5,815,726	2,420,507	5,395,673	3,090,418	4,746,443	2,983,196
Potatoes . . .	4,389,410	24,758,979	4,858,564	21,986,753	8,637,406	14,886,800
Hay (meadow) . . .	6,762,386	8,390,510	7,488,358	8,901,704	6,312,070	8,768,271

¹ Excluding the ceded territories.

In 1919 there were vineyards on 40,762 acres, yielding 8,679,735 gallons of wine, valued at 389,183,677 marks; hops (1919) on 356 acres, yielding 91 tons. On December 1, 1920, Prussia contained live-stock comprising 2,498,430 horses (excluding army horses), 9,157,945 cattle, 4,017,950 sheep, 9,383,183 swine, and 2,651,422 goats.

II. MINERALS.

Quantities (in metric tons) and values (in marks) of the coal and iron ore raised in 2 years:—

—	1918		1919	
	Tons	Marks	Tons	Marks
Coal	152,809,966	3,341,435,857	112,028,796	5,713,045,859
Lignite	83,372,828	374,928,532	75,953,982	740,602,723
Iron ore	6,203,399	121,800,177	4,625,906	201,168,927
Salt	1,278,157	27,776,444	780,923	25,033,260

In 1920 the production of coal was 127,057,135 tons; and of lignite, 91,979,395 tons.

In 1919 the numbers employed in and about mines in Prussia were: Underground workers, 485,904; surface workers, 1,284,337; total (all workers), 816,391.

Internal Communications.—On April 1, 1919, the total length of the railway system open for traffic was 24,196 miles. Plans for the electrification of main railway lines were being steadily pushed on before the war. Total receipts on the railways in 1918, 3,549·5 million marks; total expenditure, 4,778·4 million marks; deficit, 1,228·9 million marks; capital sunk, 14,436·9 million marks.

Savings Banks.—In 1919 there were 1,584 savings banks in Prussia. On December 31, 1919, the deposits amounted to 24,878 million marks.

SAXONY.

(FREISTAAT SACHSEN.)

The former Kingdom of Saxony was proclaimed a Republic on November 9, 1918.

The former royal house of Saxony counted amongst the oldest reigning families in Europe. Heinrich of Eilenburg, of the family of Wettin, was Margrave of Meissen 1089–1103; he was succeeded by his son, Heinrich (1103–1123), and Konrad the Great (1123–1156), well known in Saxon history. The house subsequently spread into numerous branches, the elder of which, called the Ernestine line, is represented by the former ducal families of Saxe-Altenburg, Saxe-Coburg-Gotha, and Saxe-Meiningen, and the grand-ducal family of Saxe-Weimar; while the younger, the Albertine line, lived in the rulers of the Kingdom of Saxony. In 1806 the Elector Friedrich August III. (1763–1827), on entering the Confederation of the Rhine, took from Napoleon the title of King of Saxony, which was confirmed by the Congress of Vienna in 1815.

Constitution and Government.—The Constitution of the Republic bears date October 26, 1920. The Diet was elected in November, 1920, and is composed of 27 Majority Socialists, 8 Democrats, 13 Independent Socialists, 20 German National Party, 18 members of the German People's Party, 9 Communists, and 1 Centre.

The Ministry elected on December 11, 1920, is composed as follows:—

Premier.—Herr Johann Wilhelm *Buck* (Majority Socialist). Born November 12, 1869.

Minister of National Economy.—Herr *Fellisch* (Majority Socialist).

Minister of the Interior.—Herr *Lipinski* (Independent Socialist).

Minister of Education.—Herr *Fleissner* (Independent Socialist).

Minister of Labour.—Herr *Jüchel* (Independent Socialist).

Minister of Finance.—Herr *Heldt* (Majority Socialist).

Minister of Justice.—Dr. *Zeigner* (Majority Socialist).

Area and Population:—

Governmental Divisions	Area, English Sq. Miles	Population.		Population per Sq. Mile 1919
		Dec. 1910	Oct. 1919	
Dresden . . .	1,674	1,350,287	1,326,262	794·6
Leipzig . . .	1,377	1,234,623	1,223,748	888·7
Bautzen . . .	953	443,549	433,011	454·3
Chemnitz . . .	800	920,543	890,731	1113·3
Zwickau . . .	983	857,659	796,559	810·3
Total . . .	5,787	4,806,661	4,670,311 ¹	807·0

Of the population, according to the census of October 8, 1919, 2,175,078 were males and 2,495,233 females.

The growth of the population is shown in the following table:—

Year	Population	Density per Sq. Mile	Annual Increase per Cent.	Year	Population	Density per Sq. Mile	Annual Increase per Cent.
1885	3,182,003	543	1·41	1905	4,508,601	779·1	1·46
1895	3,787,688	654·5	1·63	1910	4,806,661	830·6	1·32
1900	4,202,216	726·3	2·19	1919	4,663,298 ²	805·2	—

¹ Including prisoners of War.

² Excluding prisoners of War.

Saxony contains (1910) 43,358 Lusatian Wends, most of them in the district of Bautzen.

The movement of the population is shown in the following table :—

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths	Surplus (+) or Decrease (-) of Births
1916	24,211	61,185	2,212	9,292	89,316	—30,348
1917	25,009	52,721	1,755	7,117	96,121	—45,155
1918	25,279	55,130	1,894	7,601	110,500	—57,264
1919	59,020	86,472	2,855	10,619	68,570	+15,077
1920	71,545	123,038	4,313	17,325	64,017	+54,708

The population of the principal towns was, 1919 (including the municipalities incorporated up to October 1, 1921) :—

Leipzig	604,897	Meissen	37,493	Reichenbach	26,881
Dresden	587,758	Zittau	85,953	Crümmitschau	25,496
Chemnitz	304,961	Bautzen	34,993	Glauchau	22,971
Plauen	104,926	Freiburg	32,981	Meerane	21,927
Zwickau	70,509	Freital	27,570		

Religion.—The vast majority of the inhabitants of Saxony are Protestants. In 1910, there were Lutherans, 4,501,510; Roman Catholics, 233,872; Reformists, 16,531; other Christians, 36,750; Jews, 17,587; unclassified, 411. Of the Lutheran Church, the chief governing body is the 'Landes-Consistorium' or National Consistory at Dresden; and it also has a representative Synod (*Synode*) with 35 clerical and 42 lay members (1901).

Instruction.—On December 31, 1919, there were 2,233 common schools, and 1,950 continuation schools (*Fortbildungsschulen*), or altogether 4,183, with a total attendance of 857,610, besides 50 private and chapter schools. In addition there were 1 technical high school at Dresden (summer term, 1921, 2,488 students), 1 mining academy at Freiberg (1919–20, 391 students), 1 forestry academy at Tharandt (91 students, summer term, 1919), further, 19 *Gymnasias*, 21 *Realgymnasias*, 9 'Oberrealschulen,' 36 other high schools, 25 seminaries, 11 higher girls' schools and 'Studienanstalten' (1919), altogether 124 educational establishments, exclusive of the University and a large number of industrial, commercial, agricultural, musical, and art institutes. The University of Leipzig is one of the largest in Germany. See under *Germany*.

Justice and Crime.—Saxony has one 'Oberlandesgericht,' at Dresden, 7 'Landgerichte,' and 112 'Amtsgerichte.' The 'Reichsgericht' has its seat at Leipzig.

Finance.—The following table shows the estimated ordinary revenue and expenditure for five financial budget periods.

—	1914–15	1916–17	1918–19	1920 (Jan.–Mar.)	1920–21 (Ending March 31)
	£	£	£	£	£
Revenue	12,853,807	14,580,565	61,542,004	9,784,825	58,951,937
Expenditure	12,353,807	14,580,565	61,542,004	9,734,825	58,951,937

Public debt, 1919, 859,881,200 marks, incurred almost entirely on railways and telegraphs, and other works of public utility.

Production and Industry.—Saxony is, in proportion to its size, the busiest industrial State in the Empire, rivalled only by the leading industrial provinces of Prussia. Textile manufactures form the leading branch of industry, but mining and metal working are also important.

In 1920, of the total area, 2,318,515 acres were under cultivation, viz. :—1,831,337 acres (79·12 per cent.) arable; 456,069 acres (19·67 per cent. meadow; 27,551 acres (1·19 per cent.) pasture and 15,558 acres (0·02 per cent.) vineyards; besides 932,454 acres under wood, of which 415,583 acres belonged to the State (1913).

Areas under the chief crops in acres and the yield in metric tons (of 2,204 lbs.) in 1920 :—wheat, 152,582 acres (140,450 tons); rye, 403,259 acres (282,146 tons); barley, 86,675 acres (66,807 tons); oats, 398,211 acres (324,082 tons); potatoes, 248,732 acres (1,403,679 tons). The census of live-stock taken in December, 1920, showed 160,653 horses, 721,574 cattle, and 454,380 pigs.

The following shows the mining statistics for five years :—

Year	Coal Mines					Other Mines			Total		
	No. of Mines	Hands	Production in metric tons		Value in 1,000 marks	No. of Mines ¹	Hands	Produce in 1,000 marks	No. of Mines	Hands	Produce in 1,000 marks
			Coal	Lignite							
1915	89	24,707	4,206,045	6,658,462	77,483	23	781	1,974	112	25,488	79,457
1916	88	23,648	4,186,538	6,534,079	87,860	25	819	4,234	113	24,467	92,094
1917	86	29,477	4,793,519	6,330,057	125,676	34	1,169	6,222	120	30,646	131,896
1918	82	32,148	4,625,218	6,741,233	163,689	39	1,680	8,329	121	33,828	172,518
1919	81	42,627	3,932,304	6,712,010	321,169	36	1,577	9,151	117	44,204	330,326

¹ Exclusive of mines not worked.

In 1919-20, 238 breweries produced 34,314,198 gallons of beer.

In 1918 there were 365 savings banks having to the credit of their depositors at the end of the year, 134,215,300l.

SCHAUMBURG-LIPPE.

(FREISTAAT SCHAUMBURG-LIPPE.)

Schaumburg-Lippe was proclaimed a Republic in November, 1918. The Constitution bears date March 14, 1919. The Landtag consists of 16 members.

Area, 131 sq. miles ; population (1919), 46,357 (22,148 males and 24,280 females).

For the financial year 1920 the revenue and expenditure were 3,494,599 marks. Public debt, 4,400,000 marks.

Except 715 Catholics and 230 Jews, the inhabitants are Protestant. Buckeburg, the capital, had, in 1910, 5,747 inhabitants.

OFFICIAL PUBLICATION.

Schaumburg-Lippische Landesanzeigen bezw. Landesverordnungen.

THURINGIA.

(EINHEITSSTAAT THÜRINGEN.)

The seven Thuringian States after much negotiation, which commenced in May, 1919, and ended on December 24, 1919, decided to combine into one State. The two Republics of Reuss had by a law of April 4, 1919, already been merged into the one People's State of Reuss, and Coburg had elected to merge with Bavaria. The following table shows the area and population of the separate political entities which have been united into the greater whole :—

Republic	Area in sq. miles	Population Census October 8, 1919			Population per sq. mile 1919
		Males	Females	Total	
Saxe-Weimar-Eisenach . .	1,397	126,944	143,071	270,015	193
Saxe-Meiningen . . .	953	93,204	98,287	191,491	200
Gotha	548	205,356	228,693	433,959	791
Saxe-Altenburg . . .	511	101,360	110,278	211,638	414
Reuss	441	97,995	114,012	212,007	480
Schwarzburg-Rudolstadt	363	46,993	52,346	99,339	273
Schwarzburg-Sonderhausen	333	44,465	48,962	93,427	280
Total	4,546	716,317	795,559	1,511,876	332

Principal towns with population in 1919 :—Weimar, the capital, 37,237 ; Gera, 73,641 ; Gotha, 41,465 ; Jena, 48,504 ; Eisenach, 39,229 ; Greiz, 19,995 ; Arnstadt, 19,374 ; Rudolstadt, 12,172 ; and Sonderhausen 7,728.

The elections to the first Diet of Thuringia were held in June, 1920, and the Diet adopted the Constitution on March 11, 1921.

President of the State Council.—Dr. A. Paulsen (Democrat).

WALDECK.

(FREISTAAT WALDECK.)

Waldeck was proclaimed a Republic in November, 1918. The provisional Constitution bears date April 15, 1919. The Diet consists of 21 members. The Republic is governed by Prussia, in accordance with the arrangement of January 1 1865.

The revenue and expenditure for 1921 was 2,141,966 marks.

The debt on July 1, 1920, was 1,070,460 marks.

Area, 433 sq. miles; population (census of October 8, 1919), 66,432 (31,065 males and 35,367 females). Protestants (1910), 57,817; Catholics, 2,858; other Christians, 393; Jews, 590; unclassified, 49. Arolsen, the capital, had 2,442 inhabitants in 1919.

Reference.

Waldeckischer Landes-Kalender. Mengeringhausen. Annual.

WÜRTTEMBERG.

(VOLKSSTAAT WÜRTTEMBERG.)

Württemberg was proclaimed a People's Republic in November, 1918.

State President and Minister of Education.—Dr. Johannes Hieber. (Born June 25, 1862. Elected June 23, 1920.)

Constitution and Government.—The constitution of the Republic of Württemberg bears date September 25, 1919. The supreme power in the State is vested in the Landtag composed of 101 members elected by universal suffrage for 4 years, on the basis of 1 member for every 20,000 inhabitants. The Landtag appoints the State Ministry, the President of which is styled 'State President.'

The Diet which was elected on June 6, 1920, is composed as follows :—Württemberg National Party, 28; Centre, 23; Social Democrats, 17; German Democratic Party, 15; Independent Socialists, 8; Communists, 6; German Popular Party, 4.

For administrative purposes the country is divided into 4 circles (Kreise), 64 districts (Oberämter), and 1,894 communes (Gemeinden).

Area and Population:—

Circles	Area in Sq. Miles	Population		Population per Sq. Mile 1919
		1910	1919	
Neckar	1,286	882,569	930,114	723·2
Black Forest (Schwarz- wald).	1,844	570,820	583,524	316·2
Jagst	1,985	414,969	421,391	212·3
Danube (Donau)	2,419	569,216	591,142	244·3
Total	7,534	2,437,574	2,526,171	335·3

In 1919, there were 1,202,542 males and 1,323,629 females.

In 1919, 936,583, or 37·1 per cent., lived in communes of 5,000 inhabitants and upwards, and 1,589,588, or 62·9 per cent., in other communes, Foreigners, 25,848 in 1910.

The movement of the population for four years was:—

Year	Marriages	Total Births	Stillborn	Illegitimate	Total Deaths	Surplus of Births
1917	9,812	36,752	1,006	3,881	38,999	2,247
1918	11,150	38,128	1,119	4,670	46,223	8,095
1919	31,984	51,145	1,306	5,613	36,807	14,338
1920	32,027	64,781	1,774	—	7,070	27,711

The population in 1919 of the largest towns was as follows:—

Stuttgart ¹	309,197	Göppingen	21,629	Schwenningen	17,175
Ulm	59,040	Gmünd	20,294	Feuerbach	16,729
Heilbronn	44,105	Tübingen	20,481	Zuffenhausen	14,480
Esslingen	37,814	Heidenheim	18,412	Ebingen	11,168
Reutlingen ¹	28,897	Tuttlingen	15,719	Aalen	11,982
Ludwigsburg ¹	23,306	Ravensburg	16,779	Geislingen	13,521

¹ Including extensions.

Religion.—The various creeds were distributed as follows at the census of 1910:—

Kreise	Protestant	Roman Catholic	Other Christians	Jews	Others
Neckar	762,178*	105,617	7,404	6,276	1,094
Black Forest	418,409	147,507	3,381	1,359	164
Jagst	275,976	135,475	1,048	2,412	58
Danube	214,620	351,396	1,030	1,935	235
Total	1,671,183	739,995	12,863	11,982	1,551

The administration of the Evangelical Church is in the hands of a consistorium of a president, and councillors, and four general superintendents, at Ludwigsburg, Heilbronn, Reutlingen, and Ulm. The representative body of the Evangelical ecclesiastical communes is the Evangelical Landeskirchenversammlung consisting of 26 clerical and 55 lay representatives of the dioceses and 1 of the evangelical theological faculty of the university. It meets at least every six years, oftener if necessary. The Roman Catholics are under a bishop, who has his see at Rottenburg, and is suffragan to the archbishop of Freiburg in Baden. The Jews likewise are under a special council (Oberkirchenbehörde).

Instruction.—Education is compulsory, and there must be one public school or more in every commune. According to official returns, there is not an individual above the age of ten unable to read and write. In 1918 there were 2,232 places with elementary schools with 6,776 teachers, attended by 381,033 pupils; in 1921 there were 110 Realschulen with 19,885 pupils; 21 grammar schools (Elementarschulen) with 4,284 pupils; 17 gymnasia, of which 4 are training colleges for the Protestant clergy, 13 Realgymnasias, 5 Progymnasias and 6 Real Progymnasias, 41 Latin schools, having together 10,424 scholars; 6 city schools with 5,018 scholars. For girls there are

24 high schools with 9,892 pupils and 1 gymnasium with 196 pupils. There are, besides, the Technical High School at Stuttgart, the Agricultural High School at Hohenheim, and several agricultural and other special institutes. The State funds appropriated to education amounted in 1920 to 188,249,645 marks. For Tübingen University, *see under Germany*.

Justice.—In addition to other tribunals there is one Oberlandesgericht at Stuttgart. In 1914, 16,100 persons were convicted of crimes.

Finance.—The estimated revenue for the year ending March 31, 1922, was 547,160,384 marks, and the expenditure 575,506,557 marks. Public debt (March 31, 1921), 908,751,600 marks, divided into the general debt and the railway debt.

Production.—Württemberg is primarily an agricultural State, and 3,007,510 acres, or 64 per cent. of the entire area, are under cultivation, and 1,510,727 acres, or 31 per cent., under forest.

Areas under the principal crops and yield in metric tons in 1920:—

—	Acres	Yield, tons	—	Acres	Yield, tons
Wheat . . .	180,570	98,577	Oats . . .	262,907	129,755
Rye . . .	71,995	33,874	Potatoes . . .	178,387	753,170
Barley . . .	219,310	113,440	Hay . . .	1,310,400	2,867,761
Spelt . . .	197,405	83,093	Hops . . .	2,925	951

Vines in 1920, 27,467 acres, yielded 3,476,318 gallons of wine. In 1919 there were produced 29,148,746 gallons of beer. The total value of the minerals raised in 1920 was about 1,200,000. There are active iron foundries and salt works.

Books of Reference concerning Württemberg.

The following publications of the Statistical Landesamt, Stuttgart: Württembergische Jahrbücher für Statistik und Landeskunde. Statistisches Handbuch für Württemberg Mitteilungen des Statistischen Landesamts. Das Königreich Württemberg: Eine Beschreibung von Land, Volk, und Staat; 3 Bände, Stuttgart, 1882-1886. Das Königreich Württemberg: Eine Beschreibung nach Kreisen, Oberämtern, und Gemeinden: 4 Bände, Stuttgart, 1904. Oberamtsbeschreibungen, neue Folge. Kartenwerke des Königreichs Württemberg. The "Württembergische Jahrbücher" contains Chronicle and Necrology for the past year, and copious lists of publications, official and other, relating to Württemberg, in addition to much historical and statistical information concerning the population and products of Württemberg.

GREECE

(KINGDOM OF HELLAS.)

Reigning King.

Konstantinos, born August 2, 1868, married October 27, 1889, to *Sophia*, born June 14, 1870, sister of William II., ex-German Emperor; succeeded on the assassination of his father, George I., on March 19, 1913; abandoned the throne to his second son Alexandros according to the ultimatum of the Guaranteeing Powers on June 11, 1917; recalled to the throne after the death of King Alexandros by a plebiscite on December 5, 1920, and returned to Greece on December 19, 1920.

Children of the King.

I. Prince *Georgios*, born July 19, 1890, married February, 1921, to Elizabeth, elder daughter of King Ferdinand and Queen Marie of Rumania. II. *Alexandros*, born August 1, 1893, King of Greece from his father's abandonment of the throne, June 11, 1917, till his death on October 25, 1920. III. Princess *Helénè*, born May 2, 1896; married on March 10, 1921, to Prince Carol, Crown Prince of Rumania. IV. Prince *Pavlos*, born December 14, 1901. V. Princess *Irene*, born February 14, 1904. VI. Princess *Catherine*, born May 4, 1913.

Brothers and Sisters of the King.

I. Prince *Georgios*, born June 24, 1869; High Commissioner in Crete, 1898-1906; married, November 21, 1907, to Princess Marie, only child of Prince Roland Bonaparte; offspring:—Prince *Petros*, born December 3, 1908; Princess *Eugenia*, born February 11, 1910. II. Prince *Nicolaos*, born January 21, 1872; married, August 29, 1902, to the Grand-Duchess Helena Vladimirovna, daughter of the Grand-Duke Vladimir of Russia; offspring, Princess *Olga*, born June 11, 1903; Princess *Elizabeth*, born May 23, 1904; Princess *Marina*, born November 30, 1906. III. Princess *Maria*, born March 3, 1876; married, April 30, 1900, to the Grand-Duke George Michailovitch of Russia. IV. Prince *Andreas*, born February 1, 1882; married, October 7, 1903, to Princess Alice, daughter of the Marquis of Milford Haven; offspring, Princess Margaret, born April 17, 1905; Princess Theodora, born May 30, 1906; Princess Cecilia, born June 23, 1911; Princess Sophia, born June 27, 1914; Prince Philippos, born June 12, 1921. V. Prince *Christóphoros*, born August 10, 1888; married, 1920, Anastasia (Nancy), widow of William Leeds.

Greece, a province of the Turkish Empire since the latter part of the 15th century, gained its independence in the insurrection of 1821-29, and by the Protocol of London, of February 3, 1830, was declared a kingdom, under the guarantee of Great Britain, France, and Russia. The crown was accepted by Prince Otto of Bavaria, who ascended the throne January 25, 1833, being under the age of eighteen. He was expelled the Kingdom, after a reign of 29 years, in October, 1862, which event was followed by the election, in 1863, under the directing guidance of the three guaranteeing Powers, of King George I., the father of the present sovereign. George I., who was assassinated on March 18, 1913, was succeeded by his son Constantine, who reigned until June 11, 1917. Alexandros, second son of King Constantine, then reigned till his death on October 25, 1920. From

October 25 to November 18 Admiral Koundouriotes was Regent; and from November 18 to December 19, 1920, Queen Olga.

The King, according to Art. 49 of the Constitution of 1864, attains his majority upon completing his eighteenth year. Within two months at the most the King must convoke the Legislature. If the successor to the throne is either a minor or absent at the time of the King's decease, and no Regent has been appointed, the Legislative Chamber has to assemble of its own accord within ten days after the occurrence of that event. The constitutional royal authority in this case has to be exercised by the ministerial council, until the choice of a Regent, or the arrival of the successor to the throne. The sovereign and his heirs and successors must be members of the Greek Orthodox Church.

Constitution and Government.

The Constitution of Greece, adopted October 29, 1864, vested the whole legislative power in a single chamber, called the Bulé, consisting of 184 representatives, elected by manhood suffrage (in the proportion of 1 for every 16,000 inhabitants) for the term of four years. In 1911 the Constitution was modified and a substitute for a second chamber was adopted in the re-establishment of the Council of State. The functions of the Council will be the examination of *Projets de Loi* and the annulling of official decisions and acts which may be contrary to law. The new Constitution came in force on June 1, 1911. The deputies must be at least 25 years of age. The elections take place by ballot. The Bulé must meet annually for not less than three months. No sitting is valid unless at least one-third of the members of the Assembly are present, and no bill can pass into law without an absolute majority of members attending. Every measure before being adopted, must be discussed and voted, once in principle and twice article by article, on three separate days. A revision of any non-fundamental provisions of the new Constitution may be demanded, after the lapse of ten years, by an ordinary Parliament by means of two votes passed by a two-thirds majority, provided that the second vote shall not be taken until at least one month after the first, and provided also that such revision shall be carried out by a newly-elected Chamber. The Chamber of Deputies, unless specially convoked at an earlier date, must meet on October 1 (old style) of every year. The deputies are paid 4,000 drachmai a year, except those living in Athens or in Piræus, who receive only 3,200 drachmai. In case of absence extending over more than five sittings every month, the deputy has 20 drachmai per sitting taken from the total amount due to him. The number of Deputies, including those for the new territories, is 316.

The Chamber, elected in November, 1920, is composed of the following parties:—Rallis Party, 25; Gonnaris Party, 75; Dragoumists, 30; Independents, 69; Stratos' Party, 62; Liberals (Venizelists), 110.

The Ministry, appointed April 1, 1921, and reconstituted March 1922, is as follows:—

Premier and Minister of Justice.—D. Gounaris.

Minister of Foreign Affairs.—J. Baltazzi.

Minister of War.—N. Theotokis.

Minister of the Interior.—M. Stais.

Minister of Communications.—P. Tsaldares.

Minister of Education.—Theodore Zaimis.

Minister of Finance and of Supplies.—M. Protopapadakis.

Minister of Marine.—Peter Mavromichalis.

Minister of Public Assistance.—M. Kartalis.

Minister of Agriculture.—M. Tertipes.

Minister of National Economy.—John Rallis.

Area and Population.

Old Greece (before 1912) comprises continental Greece, the Peloponnesus to the south of the Gulf of Corinth, the Aegean Island of Eubœa, the Cyclades (about 220 islands, including Syra, Naxos, Andros, Tenos, Mikonos, Thermia, Seriphos, Paros, and Amorgos), the Sporades Islands (about 20), and the islands in the Ionian Sea, including Corfu, Zante, Santa Maura, and Cephalonia.

New Greece consists of Macedonia, Epirus, Crete, and the other Aegean Islands.

At the census of 1879 Greece had a population (including that of Thessaly in 1881) of 1,679,470 ; in 1889, 2,187,208 ; in 1896, 2,433,806 ; on October 27, 1907, 2,631,952. In 1896 the population consisted of 1,266,816 males and 1,166,990 females ; in 1907, 1,324,942 males and 1,307,010 females.

The acquisition of new territories by Greece, obtained as the result of the war with Turkey from October 17, 1912, to May 30, 1913, and with Bulgaria from June 30, to August 10, 1913, gave the country a total area of 41,933 square miles. The new territory is 16,919 square miles in extent. The population of the nomes or departments into which Greece is divided is, according to the Census of 1920, as follows :—

Divisions of Old Territory		Divisions of New Territory	
Departments	Population (Provisional Census 1920)	Departments	Population (Provisional Census 1920)
Attica and Boeotia . . .	581,829	<i>Macedonia :—</i>	
Phthiotis and Phocis . . .	119,215	Salonica	398,240
Acarmania and Ætolia . . .	195,571	Pellis	94,117

Arcadia	155,833	Kozani	175,577
Laconia	137,456	Florina	200,866
Messenia	226,066		1,144,310
Eubœa	127,876	<i>Epirus :—</i>	
Cyclades	120,292	Yanina	167,644
Corfu	124,371	Prevesa	45,632
Cephalonia	64,775		213,276
Zante	39,078	<i>Aegean Islands :—</i>	
Larissa	239,528	Mytilene	146,852
Trikkala	186,476	Chios	61,873
Arta	52,578	Samos	65,756
			274,481
Total	2,800,164	Canea	97,175
		Heracleion (Candia) . . .	118,101
		Lasithion	61,158
		Rethymnos	68,715
			345,149
		<i>Thrace :—</i>	
		Adrianople	145,490
		Kirkkilisse	134,359
		Kallipoli	53,568
		Raidestos	143,801
		Euros	92,050
		Rodopi	100,480
			669,697
		Total new territories	2,646,913

The Powers, in accordance with the Treaties of London and of Athens, have decided that Greece shall retain all those Aegean islands which she occupied

during the war, except Imbros, Tenedos, and Castellorizzo, which were to be restored to Turkey. In the meantime Greece is in occupation of all the islands. These include Crete, Samos, Chios, and Mytilene.

As a result of the Great War of 1914-18, Greece, with the consent of the Allied and Associated Powers, has occupied part of Bulgarian (Western) Thrace (principal town, Xanthe) and the greater part of the province of Aidin in Asia Minor (principal town, Smyrna).

Mount Athos is inhabited by the monks of Greek (17), Russian (1), Bulgarian (1), Rumanian (1), and Serbian (1) monasteries and hermitages (*Sketari*). The monks and their servitors till the fields, tend the vineyard, take in the harvest, fish, weave, sell in shops, and, indeed, take upon themselves all the secular duties of the community as well as the sacred. Originally inhabited by one mediæval ascetic, Peter the Athonite, it has at last grown to a religious colony of thousands, contained in 20 monasteries with their respective dependencies; and after having passed in the fifteenth century from the sovereignty of the Greek Emperors of Byzantium to that of the Sultans it fell again into the hands of the Greeks, who occupied it in November, 1912. Each of the 20 monasteries is a sort of little republic in itself, those of the 'coenobitic' category being ruled by abbots chosen for life, while the 'idiorrhhythmic' monasteries are administered by a board of overseers (*epitropoi*) elected for a certain term of years. Hitherto the peninsula has been administered by a Council of 4 members, and an Assembly of 20 members, the latter consisting of 1 deputy from each monastery.

In recent years there has been considerable emigration. According to United States statistics, the number of Greek immigrants into the States was in 1915-16, 26,792; in 1916-17, 25,919; in 1917-18, 2,602; in 1918-19, 813.

The principal towns are the following, with populations, 1920 (census):—

Athens	300,701	Calamata	20,592	Chalcis	13,280
Salonica	170,195	Raidestos	19,044	Pyrgos	13,246
Piræus	133,482	Trikkala	18,947	Verria	12,542
Patras	52,133	Yanina	18,878	Florina	12,489
Adrianopolis	50,201	Syra (Hermou-		Zante	11,071
Volo	30,056	polis)	17,657	Tripolitsa	11,062
Corfu	27,084	Xanthi	17,177	Kozani	10,334
Candia	24,687	Serres	16,677	Vodena	9,568
Canea	23,934	Gumultchina	16,550	Kallipoli	7,842
Cavalla	22,964	Kirkkilisso	16,263	Rethymno	7,653
Larissa	20,713	Drama	15,560	Laurium	4,662

Religion.

The great majority of the inhabitants of the Kingdom are adherents of the Greek Orthodox Church. By the terms of the Constitution of 1864, the Greek Orthodox Church is declared the religion of the State, but complete toleration and liberty of worship is guaranteed to all other sects. A National Synod, held at Nauplia in 1833, vested the government of the Orthodox Church, within the limits of the Kingdom, in a permanent council, called the Holy Synod, consisting of the Metropolitan of Athens and 4 archbishops and bishops, who must during their year of office reside at the seat of the executive. The Orthodox Church has 3 archbishops and 29 bishops in the old territory and 59 archbishops and bishops in the new territories, including 1 metropolitan and 6 bishops in Crete. The Roman Catholic Church has an archbishop at Athens, another at Corfu, and a third at Naxos; and 1 bishop at Syra, Tinos, and Santorin respectively.

Instruction.

All children between the ages of six and twelve years must attend school, but the law is not well enforced in country districts. Of the army recruits 30 per cent. are illiterate, and 15 per cent. can read only. Probably the percentage is higher when the recruits from the new territories are included.

There were (1917-18) 6,799 primary schools with 8,641 teachers (of whom 3,990 were of the female sex) and 476,695 pupils (174,805 females). For secondary education there were 76 high schools, 425 middle schools, having 55,408 pupils (50,997 boys and 5,311 girls). There are 2 agricultural schools in Greece with, together, 150 pupils. There is a Trade and Industrial Academy. The Government Commercial Schools at Athens, Volo, Salonica and Patras have together 326 pupils. In 1912 the two Universities of Athens, the National University (founded 1836) and the Capodistria University, had 56 ordinary professors, 106 lecturers, and 3,250 students studying medicine, law, philosophy, theology, and chemistry. Of the total number, 800 were from abroad, chiefly from Turkey. The Polytechnic, with 22 professors and 170 students, provides instruction in painting, sculpture, mechanics, architecture, surveying, etc.

The cost of primary instruction is borne by the State. It amounts to some 10 million drachmai annually.

The Ministry of Education is also charged with the Service of Antiquities, managed by an Archaeological Council, which is responsible for the conservation and reparation of ancient monuments of all periods (Prehistoric, Classical, Byzantine and Mediæval), the upkeep of museums and the conduct of excavations. The service is well organised and efficient; it has carried out the difficult and expensive work of repairing the Parthenon and other buildings on the Acropolis at Athens. There is an archaeological department of the Ministry to which the provincial inspectors (*ephors*) of antiquities report.

British Science is represented in Athens by the British School of Archaeology, which, by the aid of grants from the Government, universities, and private subscribers, is able to encourage and carry out scientific research of all kinds, but especially art, archaeology and history. Members of the school have in recent years been responsible for the excavations at Knossos, in Crete, in Melos, at Sparta, in Thessaly, at Mycenæ, and elsewhere. There are also similar French, American, Italian, Austrian and German institutions.

Finance.

The estimates of ordinary revenue and expenditure for 6 years are as follows :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1915-16	17,724,896	19,061,291	1918-19 ¹	40,960,942	32,951,548
1916-17	12,530,043	14,528,283	1919-20 ¹	45,906,773	61,692,020
1917-18	17,867,963	17,611,555	1920-21 ¹	51,950,390	51,950,390

¹ Estimates.

The main items of the budget for 1920-21 are given as follows:—

Revenue	Drachmai	Expenditure	Drachmai
Ordinary	491,125,728	War, ordinary	211,878,307
Extraordinary	69,954,022	War, extraordinary	285,432,180
Loans	472,500,000	Other war expenses	34,805,000
	1,033,579,740	Total war expenditure	532,115,487
Deficit	265,180,014	Other expenditure, including debt service	766,644,267
	1,298,759,754	Total expenditure	1,298,759,754

No budget for 1921-22 was submitted to the National Assembly and no figures, even provisional, of public income and expenditure were available. The expenses of administration and of the war in Asia Minor were financed by monthly credits passed by Royal Decree without any Parliamentary control. Some money was obtained by loans from the National Bank, but these are floating debts. In order to retard the rapid depreciation of the drachma the Government instituted a banking consortium to control exchange without much success. In spite of this the drachma has fallen from 50 to the £ sterling to about 100 (par is 25 to the £ sterling).

The outstanding external debt of Greece amounted on December 31, 1921, to 40,885,200*l.*, the principal items in which were the five per cent. loan of 1881, 3,212,700*l.*; the five per cent. loan of 1884, 2,797,040*l.*; the 2½ per cent. loan of 1898, 3,899,100*l.*; the five per cent. loan of 1914, 12,811,000*l.*

In accordance with the peace preliminaries between Greece and Turkey and the Greek Law of Control of March, 1898, the financial commission of delegates representing Germany, Austria-Hungary, France, Great Britain, Italy and Russia (the mediating Powers) is established at Athens in direct relation with the Greek Minister of Finance (Germany and Austria-Hungary are not now represented). The public debt of Greece is in large measure under the control of this commission. To this commission were assigned, for the payment of the interest on the external debt, the revenues from the salt, petroleum, matches and playing-cards monopolies, the duties on tobacco, cigarette paper, Naxos emery, the stamp duty, and the import duties at the port of Piræus. In their report for 1921 the Commissioners announce an income of 149,185,600 drachmai, of which the receipts from monopolies were 73,493,141 drachmai, and the Piræus customs 75,692,499 drachmai.

The collection of the assigned revenues and the administration of the monopolies is entrusted to a Greek Company, called the "Société de Régie des Revenues affectés au Service de la Dette Publique," which is under the control of the international commission.

By Agreements dated February 10, 1918, the Governments of Great Britain, the United States and France agreed to advance to the Hellenic Government credits as follows:—Great Britain, 14,700,000*l.*; France, 410,000,000 francs; and the United States, 48,239,267 dollars. The control of the Fund thus created was lodged in an Inter-allied Financial Commission and an Inter-allied Military Commission sitting at Athens. Of the sum agreed upon, there has been actually paid by January, 1921, 7,000,000*l.* by Great Britain, 30,000,000 francs by France, and 15,000,000 dollars by the United States.

Defence.

I. ARMY.

Military service in Greece is compulsory and universal, with very few exemptions (laws of 1867, 1896, 1904, and November 30, 1914). It commences in the 20th year, and lasts for the long period of 31 years. The normal term of service in the active army was 3 years for the cavalry and artillery and 2 years for the infantry, &c., followed by 21 years in the first series of the reserve and 8 years in the second series. The normal annual contingent of recruits, fixed by the Parliament, was about 25,000.

After the Armistice, November, 1918, a large part of the Greek army joined the Allied forces in occupation of Turkish territory. Military operations in Asia Minor continued intermittently, and came to a climax at the end of June, 1921. The Greek advance against the Kemalists was at first successful, but ended in a deadlock in September at the battle of Sakaria. Failing to pierce the Turkish lines, the Greeks fell back to positions covering Eski-Shehr, where they were still established at the end of 1921. The Greek army in Asia Minor consisted of 11 divisions and a number of detached regiments. After the battle of Sakaria the Greek Government called out the 1922 class and summoned to the colours all men liable to military service up to the age of 40.

The army corps in Asia each consisted of two divisions, those in Europe of three divisions, the total number of divisions thus being twelve. The average strength of a division was 12,000 men. The Greek cavalry is not organised in divisions, but is distributed by squadrons to the divisions of the army corps. The infantry is organised in regiments of three battalions, three regiments forming the infantry of each division. The field artillery is organised in brigades, each of two regiments. The regiment of artillery is composed of three groups, and each group of three batteries of four guns. The Greek infantry is armed with both the Mannlicher and the Mauser rifle, but some battalions are armed with the Martini. The artillery is armed with the French '75 field gun and the French light and medium howitzer.

II. NAVY.

The Greek Navy was reorganised in 1906, and after 1911 a British naval mission superintended the training and organisation of the fleet. The principal vessels are as follows (the three first named have now little value):—

	Launched	Displacement Tons	Armour		Principal Armament	Torpedo Tubes	Horse Power	Max. Speed Knots
			Belt In.	Gun In.				
Spetsai . . .	1889	5,000	12	13½	3 10 6; 5 6in.; 1 4in.	3	6,700	17
Ilydra . . .	1889							
Psara . . .	1880							
Averoff . . .	1910	10,118	8	6½	4 9·2; 8 7·5in. . .	3	19,000	24
Kilkos ¹ . . .	1905	13,000	9	12	4 12in.; 8 8in.; 8 7in.	2	14,000	17
Lemnos . . .								
Helle ² . . .	1912	2,600	—	—	2 6in.; 4 4in. . .	2	6,500	20

¹ Purchased 1914 from the U.S. Navy.

² Cruiser purchased 1914 from China.

There are also 13 destroyers, 6 modern torpedo boats, 2 submarines, and a variety of miscellaneous craft. To these have been added the ex-Austrian destroyer *Ulan*, and (for police duties only) 7 surrendered torpedo boats.

Much preliminary work has been done on the new arsenal for the Greek Navy, which is intended to take the place of the establishment at Salamis. The cost of the new work was estimated at 2,800,000*l.*; it is to be carried out under the direction of British engineers. There is a British Naval Mission in Greece which has been charged with the re-organisation of the Greek Navy.

Production and Industry.

Greece is mainly an agricultural country, and the economic life is directly dependent on the products of the soil. Of the total area only one-fifth is cultivable. The total area (old Greece) is 6,429,610 hectares (16,074,025 acres), made up as follows: 1,286,583 hectares (3,216,457 acres) is cultivated land; 5,055,122 hectares (12,137,805 acres) is covered by mountains; and 87,905 hectares (219,762 acres) occupied by lakes and marshes.

The deforestation of Greece progresses steadily and in every part of the country. The pine woods in Attica steadily decrease by cutting and by fires, but great efforts for re-afforestation and proper forest administration are being made.

By the draining of Lake Copais, an area of about 53,000 acres has been acquired for agricultural purposes. Irrigation and drainage canals, farm roads and buildings are being constructed, tree planting is undertaken, and the breed of cattle is being improved.

While there are a few large proprietors in Greece, the land is to a large extent in the hands of peasant proprietors and *mélayer* farmers, among whom the large estates, on which they live and work, are being divided. On the whole, agriculture is in a backward state, chiefly because of the dryness of the climate, the scarcity of rivers which may be utilised for irrigation, the system of payment of rent in kind, and by the lack of co-operative societies and agricultural banks. The most favoured and best cultivated crop is the currant, which covers vast districts. Patras is the great currant centre. The yield for 1920 was 95,000 tons. Thirty-three thousand *stremmata* (*stremma*=0.2471 acre) of currant plantations have been uprooted in accordance with a law to limit the production of currants.

The acreage and production of the chief crops for two years were as follows:—

	Area in Acres		Production in Metric Tons	
	1918	1919	1918	1919
Wheat . . .	1,104,608	1,080,908	373,468	266,936
Barley . . .	418,435	414,442	158,083	118,914
Maize . . .	423,507	458,598	164,235	191,818
Oats . . .	183,242	214,784	65,593	55,548
Tobacco . . .	117,732	92,435	30,357	29,694
Cotton . . .	19,502	25,756	5,827	7,388
New wine . . .	411,130	445,602	317,885	266,650
Currants . . .	244,635	194,700	120,516	130,092

Olives are abundant, about 717,500 acres are under cultivation; olive oil production in 1921, 13,801,000 gallons. The nut crop in 1921 amounted to 6,376,590 lbs. The fig industry is centred in the port of Calamata. In 1919 the number of oranges grown was 206,412,000, of mandarins, 273,311,000, and of lemons, 163,874,000. Rice is cultivated in Greek Macedonia—Vodena, near Salonika, being the principal centre. Two kinds of cheese are produced in Greece—sliced cheese in brine (commercially known as Fetta cheese) and head cheese. Production in 1921, 14,812,875 lbs. (Fetta cheese, 4,937,625 lbs.)

There were in Greece (1918) 131,436 horses, 111,979 mules, 242,700 asses, 527,173 cattle, 5,467,828 sheep, and 365,074 pigs.

Greece has a great variety of mineral deposits, and there are now in force about 35 mining concessions embracing a total area of nearly 20,000 acres. The ore and other minerals worked include iron, copper, zinc, lead, silver, manganese, aluminium, antimony, tin, nickel, magnesite ore, cobalt, lignite, sulphur ochre, and various other earths. The Laurium district, Thessaly, Eubœa, the Ægean islands and other parts of Greece yield a large output of ores and earths.

The principal mineral output of all Greece for two years is given as follows (in metric tons):—

—	1919	1920	—	1919	1920
	Tons	Tons		Tons	Tons
Chromite . . .	8,054	7,162	Lead . . .	2,650	23,582
Emery . . .	9,300	11,089	Magnesite . . .	62,404	71,870
Iron . . .	46,939	45,179	Nickel . . .	1,096	—
Manganese iron . . .	418	4	Zinc . . .	3,334	2,591
Iron pyrites . . .	2,354	—	Salt . . .	28,831	57,285

Lignite production in 1915 was 39,745 tons; in 1916, 116,946 tons; in 1917, 157,956 tons; in 1918, 208,797 tons; in 1919, 182,006 tons; and 1920, 187,196 tons.

Industry is making considerable progress in Greece. The leading industrial products are olive oil, wine, textiles, leather, and soap. The industrial census of 1917 showed that the country had 2,213 factories, employing 36,124 hands, and valued at 260,363,647 drachmai. In the cotton mills of Greece there are 169,000 spindles and 2,245 looms, in 82 factories, employing 10,875 hands. Total number of workers employed in mines (1919) 7,319, including 3,444 underground.

Commerce.

Value of the commerce of Greece (25 drachmai = £1):—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports . . .	8,923,019	29,356,283	62,332,957	85,241,532	66,944,776
Exports . . .	4,505,063	11,874,410	29,074,410	26,564,505	32,679,647

Principal special imports and exports in 1919 and 1920 :—

Sweden	13,720,310	16,754,692	9,859,661	9,694,617
Total	1,608,323,928	2,131,038,321	726,533,168	664,112,647

The customs revenue amounted in 1920 to 12,402,440l.

The commercial treaty of 1866 provides for 'the most favoured nation' treatment between the United Kingdom and Greece, and the declaration of November, 1904, extends the scope of the treaty so as to include all British possessions, colonies, &c., which accord

the 'most-favoured nation' treatment to Greece (that is, all except India, Canada, the Cape, and New South Wales). The treaty is terminable July 25, 1910, and then after 12 months' notice.

The staple article of import from Greece into the United Kingdom (Board of Trade Returns) is currants, the value of which amounted in 1920 to 5,019,141*l*. Other articles of import in 1920 were:—iron ore (including chrome), 95,679*l*.; raisins, 189,880*l*.; tobacco, 322,427*l*. Of the exports from the United Kingdom to Greece in 1920, cotton goods and yarns were valued at 3,506,133*l*.; woollens, 2,929,304*l*.; coal, 481,658*l*.; iron, 545,567*l*.; machinery, 405,966*l*.

The total trade between Greece and the United Kingdom for 5 years was as follows:—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Greece to U.K.	958,092	2,329,688	10,440,500	6,815,805	4,013,896
Exports to Greece from U.K.	182,621	1,048,804	6,314,713	12,783,804	6,896,779

Navigation and Shipping.

The merchant navy of Greece on September 1, 1921, had 1,192 sailing vessels of 113,726 tons and 408 steamers of 402,221 tons. In 1920, 2,936 steamers of 3,640,017 tons, and 2,600 sailing vessels of 62,083 tons entered the ports of Greece, while 3,283 steamers of 3,910,357 tons, and 2,133 sailing vessels of 69,906 tons cleared all the ports.

Internal Communications.

There are about 49,838 miles of roads in Old and New Greece. There is a canal (opened November 9, 1893) across the Isthmus of Corinth (about 4 miles). In 1920, 2,968 steamers of 1,571,571 tons and 2,502 sailing vessels of 60,953 tons passed through the canal.

Railways open for traffic in 1920 for a length of about 1,470 miles. Principal lines:—Hellenic Railway, 275 miles; Piræus-Athens-Peloponnesus railway, 456 miles; the Thessalian Railway, 142 miles; Athens-Piræus railway, 6 miles; Attica Railway, 51 miles; North-Western Railway, 46 miles; Salonica-Gevgheli, 49 miles; Salonica-Monastir, 136 miles; Salonica-Dedeagats, 215 miles. Before the war with Turkey (1912-13) Greece was completely isolated by land from the rest of Europe, but on May 8, 1916, the railway was completed between Gida, on the Salonica-Monastir line, and Papapul, on the Thessalian frontier, a distance of 56 miles, whereby Greece was linked up with the European railroads. The railway system has been extended by the inclusion of the lines in Western and Eastern Thrace. The Government has also purchased from England for two million francs the Salonika-Angista-Stavros line, 75 miles long, which was built by the British during the war. The lines are State-owned and State-controlled, except the Piræus-Athens, Attica, North-Western, and Thessalian Railways.

The telegraph lines in 1920 had a length of 10,565 miles, with 20,186 miles of wire and 3,973,000 miles of cable. The number of offices was 349.

They despatched 3,906,000 inland telegrams, 1,216,000 international, and 845,000 official. Total, 5,967,000.

In 1920 there were 7,742 miles of telephone lines with 4,718 miles of wire belonging to 6 urban systems.

Of post offices there existed at the end of 1920, 938, and there passed through the post in that year:—Service of the interior:—letters, 28,894,000; post-cards, 2,985,000; printed matter, journals and samples, 15,987,000; postal orders, 455,000; parcels, 367,000. Service of the exterior:—letters and post-cards, 22,576,000; printed matter and journals, 2,451,000; postal orders, 28,000; parcels, 168,000.

Banking and Credit.

The nominal value of the Greek coinage (minted in Paris) put in circulation since 1866 has been: gold, in 1876, 1,000,000 drachmai; in 1884, 11,000,000 drachmai; total gold, 12,000,000 drachmai; silver, up to 1910, 26,262,865 drachmai, nearly all of which had disappeared from circulation during the period when the agio on gold made it profitable to export to other countries of the Latin Union; bronze, up to 1883, 6,816,065 drachmai; nickel, 1893-95, 3,000,000 drachmai. Since 1910 the silver currency has been restored by the repatriation from other countries of the Latin Union of 4,548,024 drachmai, in good condition, and by coin (at Paris) of 9,451,976 drachmai. Owing to the war 1 and 2 drachmai notes as well as 50 lepta notes have been issued to meet the scarcity of currency. There are also 20, 10, and 5 lepta coins made of a mixture of nickel and tin, and bronze coins of 10 and 5 lepta.

The National Bank (founded in 1841) is authorised to issue forced currency notes to the amount of 73,000,000 drachmai. This privilege was extended to December 31, 1930, and by an agreement with the Government made on December 6, 1914, these privileges were extended to the new territories as from January 1, 1915. On December 31, 1920, the notes of the National Bank amounted to 1,547,884,000 drachmai.

The Bank of Piræus, with a capital of a million sterling, was founded in October, 1916, by a number of shipowners for the purpose of financing maritime ventures. Other banks are the Commercial Bank (capital 15,000,000 drachmai), the Central Bank (capital 3,500,000 drachmai), the Bank of Athens (capital 48,000,000 drachmai), the Bank of the Orient (capital 25,000,000 drachmai), the Popular Bank (capital 1,500,000 drachmai), the Bank of National Economy (capital 10,000,000 drachmai), the Industrial Bank (capital 15,000,000 drachmai), the Maritime Bank (capital 10,000,000 drachmai), and the General Bank (capital 3,000,000 drachmai). Total deposits in all the banks in 1920, 2,298,881,814 drachmai.

Money, Weights and Measures.

Greece entered in 1868 the Latin Monetary Union.

The *Drachma*, of 100 *lepta*, is equivalent to the franc (25·225 francs = 11. sterling). 100 new drachmai = 112 old drachmai.

By Royal decree of January 30, 1893, the gold coins of Great Britain, Austria, Germany, Denmark, Russia, Spain, Turkey, Egypt, and the United States are accepted by the Treasury and by private persons as legal tender, one-fourth per cent. being deducted from their nominal value.

In September, 1898, it was announced that it had been decided to introduce the metric system as regards measures of length, weight, and capacity.

The change from the old system is to be gradual, commencing with measures of length. The old system is as follows :—

The <i>Oke</i>	=	2·827	lbs. avoirdupois.
„ <i>Stater</i>	=	123·20	„ „
„ <i>Livre</i> (Venetian)	=	1·05	„ „
„ <i>Baril</i> (wine)	=	16·33	imperial gallons.
„ <i>Kilo</i>	=	0·114	„ quarter.
„ <i>Pike</i>	=	$\frac{3}{4}$	of an English yard.
„ <i>Stremma</i>	=	·242	„ „ acre.

Diplomatic Representatives.

1. OF GREECE IN GREAT BRITAIN.

Chargé d'Affaires.—Alexandre Rizo-Rangaba (appointed December 7, 1920).

Secretaries.—D. Bikelas and M. Vanopoulos.

Military Attaché.—Col. P. Vlassis.

Naval Attaché.—Commander J. Bouboulis.

Commercial Attaché.—M. Frangopoulos.

Acting Consul-General.—P. Delyannis.

There are consular officers of Greece at London, Liverpool, Birmingham, Cardiff, Dublin, Edinburgh, Glasgow, Liverpool, Manchester, and various other towns.

2. OF GREAT BRITAIN IN GREECE.

H. M. Representative at Athens.—Hon. F. O. Lindley, C.B.E. (appointed November 25, 1921).

Counsellor.—C. H. Bentinck.

Secretaries.—C. Dodd and J. MacEwen.

Commercial Secretary.—E. C. D. Rawlins.

Military Attaché.—Brig.-General E. S. Hoare Naine, C.B., C.M.G.

Consul-General at Salonica.—R. A. Fontana.

There are also British Consular representatives at Piræus, Candia, Canea, Cephalonia, Corfu, Mitylene, Patras, Samos, Santorin, Volo, and Zante.

Statistical and other Books of Reference concerning Greece.

(REPÚBLICA DE GUATEMALA.)

Constitution and Government.

THE Republic of Guatemala, established on March 21, 1847, after having formed part for twenty-six years of the Confederation of Central America, is governed under a Constitution proclaimed December, 1879, and modified October, 1885, November, 1887, October, 1889, and July, 1903. By its terms the legislative power is vested in a National Assembly, consisting of representatives (one for every 20,000 inhabitants) chosen by universal suffrage for four years, and a Council of State, of 13 members, partly elected by the National Assembly, partly appointed by the President of the Republic. The executive is vested in a President, elected for six years.

President of the Republic.—General José Maria *Orellana* (March, 1922, to March, 1928).

The administration is carried on, under the President, by the heads of six departments—of Foreign Affairs, Government and Justice, Hacienda and Public Credit, Public Instruction, Fomento, War.

Area and Population.

Area, estimated at 48,290 English square miles. In 1903 the population was 1,842,134; December 31, 1914, estimate, 2,003,579. About 60 per cent. are pure Indians, most of the remainder being half-caste, there being very few descendants of Europeans. Guatemala is administratively divided into 23 departments.

Capital of the Republic and seat of the government was Guatemala, with 90,000 inhabitants (1910), about one-quarter of them being of European origin. An earthquake shock on January 3 and 4, 1917, completely destroyed the city. Other towns are Quetzaltenango, 28,940, Coban, 30,770, and Totonicapan, 28,310. A boundary convention with Honduras of March, 1905, was extended to March 1, 1915, and a New Convention was signed and ratified in 1915.

Religion and Instruction.

Roman Catholicism is the prevailing religion; but all other creeds have complete liberty of worship. Guatemala has an archbishop under whom are suffragan bishops for Costa Rica, Honduras, Nicaragua, and San Salvador. The State does not recognise any creed.

Education is free, and obligatory for all children between 6 and 14 years of age. In 1920 there were 1,334 Government schools, including Kindergarten (18), primary schools for boys (492) and girls (516), training schools for girls (34), night schools for workmen (87), schools of arts and crafts (3), and rural schools (317). The number of pupils attending the elementary schools in 1920 was 55,100. On May 2, 1918, the Government promulgated a decree establishing the University of Guatemala, which is to be known as the "Universidad Estrada Cabrera." The University was opened on September 15, 1918. The National Central Institute confers degrees which are recognised in all the Central American Republics. Among the other institutions are a School of Handicraft for Women, a National Conservatoire of Music, and a School of Art. Total expenditure on education in 1920, 12,848,270 pesos. The national library contains 19,400 volumes.

Justice and Crime.

Justice is administered in a supreme court, 6 appeal courts, and 26 courts of first instance. In all the municipalities there are Justices of Peace.

Finance.

Ordinary revenue and expenditure in currency (186 paper dollars = £1 in 1917; 194 = £1 in 1916):—

—	1916-17 ¹	1917-18	1918-19	1919-20	1920-21 ¹
	dollars	dollars	dollars	dollars	dollars
Revenue	66,200,000	135,471,585	110,937,325	127,249,490	—
Expenditure	63,095,693	131,413,218	77,666,023	101,028,476	135,604,267

¹ Estimates.

On December 31, 1920 (according to the report of the Council of the Corporation of Foreign Bondholders), the outstanding amount of the 4 per cent. External Debt of 1895 was 1,414,980*l.*; certificates in respect of unpaid interest, 844,603*l.*; total, 2,259,583*l.* The internal debt on December 31, 1916, amounted to 135,799,843 dollars currency and 1,091,702 dollars sold.

Defence.

The military force of Guatemala, as reorganised, numbers 85,535 officers and men when mobilised. The reserve army consists of 40,575, divided into 81 battalions. All male citizens are liable to conscription from 18 to 50.

Production and Industry.

The Cordilleras divide Guatemala into two unequal drainage areas, of which the Atlantic is much the greater. The Pacific slope, though comparatively narrow, is exceptionally well watered and fertile between the altitudes of 1,000 and 5,000 feet, and is the most densely settled part of the Republic. The Atlantic slope is sparsely populated and has little of commercial importance beyond the timber cutting of the Peten, coffee cultivation of Coban region, and banana raising of the Motagua Valley and Lake Izabal district.

By the National Land Law of 1894, the State lands (except those on the

frontiers and the sea-shore) were divided into lots for sale, the maximum allotment permitted to one person being 15 caballarias (or about 1,687 acres); and these cannot be sold under ten years. In December, 1915, the state took over all the ore lands in the country, and such land may be exploited only under leasehold. The forest area has an extent of 1,316,482 acres.

The soil in general is exceedingly fertile. The most important crop is coffee, of which there are 1,500 plantations under cultivation, covering an area of 597,529 acres in 1920, and containing some 450,000,000 coffee trees. The quantity exported in 1920 was 960,000 pounds. Germans own and control between 50 and 60 per cent. of the coffee plantations of Guatemala. Next to coffee, sugar is the most important crop; the area in 1920 was 54,270 acres. Other crops in 1920 were 13,095 acres of rice, 834,413 acres of maize, 30,810 acres of bananas. In 1920 2,179,943 bunches of bananas were exported. Of the smaller crops, area in 1920, beans, 67,570 acres, wheat, 42,523 acres, and potatoes, 5,062 acres.

The department of Petén is rich in mahogany and dye woods, for which there is a ready market in the United States. Petén is also the centre of the chicle (gum) industry; in 1916, 407,195 lbs. were obtained. Cotton is grown in small quantities. On the high plateaux the area of the cattle-grounds (potreros) is about 758,640 acres. On December 31, 1914, there were in the Republic 655,386 head of cattle, 114,451 horses and mules, 402,124 sheep, 58,847 goats, and 175,515 pigs, making a total of 1,467,323. On December 31, 1915, the total was 1,470,200.

There are silver, gold, copper, iron and lead mines, but owing to the lack of transport, mining is little developed. Chrome was discovered in 1916. In 1919-20 the ferro-chromium mines of the department of Jalapa produced 2,241,341 kilos; of Estrada Cabrera, 11,352 kilos. The mines of Santa Rosa produced 680,770 kilos of mineral ore; the lead mines of Huehuetenango produced 1,249 quintals.

Commerce.

Value of the commerce in pounds sterling for 5 years:—

	1916	1917	1918	1919	1920
	£	£	£	£	£
Imports	1,707,858	1,798,314	1,326,300	2,246,164	2,908,940
Exports	2,127,577	1,561,946	2,263,800	4,483,827	3,720,581

The values of the principal imports and exports in U.S. dollars for 2 years were:—

Imports	1918	1920	Exports	1919	1920
	Dollars	Dollars		Dollars	Dollars
Cotton	1,492,141	4,728,948	Coffee	19,726,546	13,942,083
Foodstuffs	277,402	784,156	Rubber	—	2,307
Linen, hemp, and jute	215,013	411,348	Timber	—	451,011
Paper, etc.	170,636	416,924	Hides	—	37,897
Iron and Steel	667,430	1,266,603	Bananas	681,312	990,138
Leather	101,031	428,230	Sugar	557,875	1,070,373

In 1920 imports from Great Britain amounted to 3,147,424 dollars; from the United States, 9,441,207 dollars; from France, 401,606 dollars; and from Japan, 239,776 dollars.

Total trade between Guatemala and the U.K. for 5 years (according to Board of Trade returns) :—

	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Guatemala to U.K.	46,848	—	315,291	270,139	112,865
Exports to Guatemala from U.K.	298,380	281,416	397,985	£97,427	384,660

Shipping and Communications.

In 1919, 601 vessels of 696,885 tons (175 of 422,929 tons being American, and 129 of 58,888 tons British) entered and 576 vessels of 541,580 tons cleared the ports of the Republic. The chief ports on the Atlantic side are Puerto Barrios and Livingston; on the Pacific side, San José, Champerico, and Ocos.

The International Railway of Central America was incorporated in 1912 and represents a consolidation of the Guatemala Railway (195 miles), the Guatemala Central Railway (139 miles), the Occidental Railway (51 miles), and the Ocos Railway (22 miles). The company's main lines at present extend from Puerto Barrios to Guatemala City, a distance of 194.5 miles, thence to San José de Guatemala, on the Pacific Ocean, a distance of 74 miles. The company receives subsidies from the Governments of Guatemala and Salvador. The Salvador division of 40 miles is operated separately. The Government of Guatemala may purchase the lines after the year 2002 at a price to be decided by arbitration. The lines located in Salvador may be purchased after June, 1978, by the Government of that country at an arbitrated price. After the year 2006 Salvador will receive the lines without indemnity. In 1914 the International Railways of Central America acquired by purchase a 60-mile railroad extending from Santa Maria, on the main line between Guatemala City and San José de Guatemala, to Las Cruces. The same year it built an extension from Las Cruces to Ayutla, a distance of 45 miles. Ayutla is on the border of Mexico; Mariscal, in Mexico, being on the other side of the river Suchiate, which forms the boundary between the two countries. Although the road was constructed in 1914, through freight and passenger traffic between Guatemala City and Ayutla was not inaugurated until October 1, 1916. The International Railways of Central America has also projected a line to run south-east from Santa Maria to Santa Ana in Salvador. It is stated that when this and other lines in Central America, projected or under construction, are completed, a direct through route will be afforded between Vera Cruz, Mexico, and Panama and Colon, extending along the western portion of Central America through the five Republics of Guatemala, Salvador, Honduras, Nicaragua, and Costa Rica.

There are few good roads, and many bridges have been recently built, but away from the railway most of the traffic is on mule-back. In November, 1916, a concession was granted to a company for the construction of an intra-coastal canal, to be known as the Chiquimulilla Canal, skirting the Pacific Coast of Guatemala and extending 80 miles from San José to the Esclaves River, but the work has not yet been started.

There were in 1917, 423 post-offices, through which passed 17,285,844 letters, &c. In 1920 the national telegraph lines had a length of 4,512 miles, and the telephones 416 miles. There were 262 telegraph and 252 telephone offices. Number of telegrams sent in 1920, 1,523,512.

Money, Weights, and Measures.

On April 11, 1918, the National Assembly established a National Bank (Banco Nacional Privilegiado), with headquarters in the City of Guatemala. The principal functions of this bank is the making of agricultural loans, aiding in the reconstruction of the national capital and of other towns damaged by earthquakes, and co-operating in the settlement of economic questions. The funds of the bank are to consist of money subscribed by the Government and the proceeds of the sale of shares to national and foreign capitalists who may desire to participate in the enterprise. The President of the Republic is authorised to negotiate and conclude such financial arrangements, either at home or abroad, as he may deem necessary or expedient in establishing and operating the bank.

Important private Banks are:—(1) The Bank of Guatemala (1895), capital, 10,000,000 pesos; paid-up capital, 2,500,000 pesos; reserve, 4,312,512 pesos. (2) The International Bank of Guatemala (1877), subscribed capital, 2,000,000 pesos; reserve fund, 1,651,000 pesos. (3) The American Bank (1895), paid-up capital, 3,000,000 pesos; reserve fund, 1,200,000 pesos. (4) The Western Bank (Banco de Occidente) of Quezaltenango (1881), capital, 2,000,000 pesos; paid-up capital, 1,650,000 pesos; reserve fund, 3,300,000 pesos. On December 31, 1916, there were in circulation 183,000,000 pesos in paper money issued by the banks.

The National Treasury has continued to withdraw from circulation the notes of the extinct banking committee, and during the year 1918 cancelled 309,972 dollars, which with amounts previously withdrawn makes a total of 3,631,156 dollars.

The silver peso or dollar is not now current, the money in use being paper or fractional nickel and copper coin. The paper money in circulation is estimated at between 150,000,000 and 200,000,000 pesos.

The Dollar or Peso, of 100 *Centavos*, weight, 25 grammes, .900 fine; nominal value, 4s. Nickel coins are the *real*, nominal value 6d., and the half and quarter real. Copper coins (introduced in 1915) are 25 and 12½ centavos. In 1917, 1,200,000 of the former and 2,468,000 of the latter were coined.

The Spanish <i>Libra</i> of 16 ounces . . .	= 1·014 lb. avoirdupois.
„ <i>Arroba</i> of 25 libras . . .	= 25·35 lb. „
„ <i>Quintal</i> of 4 arrobas . . .	= 101·40 „
„ <i>Tonelada</i> of 20 quintals . . .	= 18·10 cwt.
„ <i>Fanega</i> . . .	= 1½ imperial bushels.

The metric system has been officially adopted.

Diplomatic and Consular Representatives.

1. OF GUATEMALA IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary.—Dr. Don Manuel Arroyo. (Appointed 1920).

Secretary.—Don Jorge Garcia Granados.

There are also Consular representatives at Glasgow, Liverpool, Manchester, Southampton, Birmingham, Cardiff, Grimsby.

2. OF GREAT BRITAIN IN GUATEMALA.

Envoy Extraordinary, Minister and Consul-General.—Hugh William Gaisford. Appointed January 17, 1920.

There is a British Consul at Quezaltenango; Vice-Consuls at Livingston, Puerto Barrios, and San José.

HAITI.

(RÉPUBLIQUE D'HAÏTI.)

Constitution and Government.

THE Republic of Haiti, formerly a French colony, was proclaimed independent January 1, 1804, and is now governed under a Constitution ratified on June 12, 1918. The legislative power is vested in a Chamber of Deputies on the basis of one member for each 60,000 inhabitants, members being chosen for 2 years by direct popular vote, and in a Senate of 15 members chosen for 6 years likewise by direct vote of the people. Citizens over 21 enjoy the franchise. The President is elected for 4 years by the two Chambers in joint session. Members of both houses are paid a monthly salary of 150 dollars throughout the year.

President of the Republic.—Monsieur Sudre Dartiguenave; elected August 12, 1915.

The administration of the Republic is carried on, under the President, by five Secretaries of State. The President receives an annual salary of 24,000 dollars.

In November, 1915, both Houses of the Haitian Congress ratified the treaty with the United States establishing a virtual protectorate by the United States over Haiti.

Area and Population.

The area of the Republic, which embraces the western portion of the island of Haiti—the larger but less populated eastern division forming the Republic of *Santo Domingo*—is estimated at 10,204 English square miles. The inhabitants were estimated to number 960,000 in 1887; the ecclesiastical estimate, based on parish registers, in 1909 put the number at 2,029,700. In 1912 the estimated population was 2½ millions. The majority of them are negroes; there are also great numbers of Mulatto Haitians, the descendants of the former French settlers. There are about 5,000 foreigners, of whom about 10 per cent. are white. Capital; Port-au-Prince, with 120,000 inhabitants, situated on a large bay, and possessed of an excellent harbour. Cape Haiti has an estimated population of about 15,000; Jacmel, 20,000; Cayes about 15,000; Gonaïves, 8,000; Port de Paix, 5,000. The official language of the country is French, though most of the common people speak a debased dialect known as Creole French.

Religion and Instruction.

The religion is Roman Catholicism. There is an archbishop with 4 suffragan bishops. The Catholic clergy are French: Public elementary education is free, the country being divided into 15 inspectors' districts. The sum allotted for public instruction amounts to nearly 1,000,000 dollars annually, but the educational system is still very imperfect, especially in rural districts. In 1910 education was made compulsory. In the 6 national lycées in 1920–21 there were 550 pupils, and in 10 private secondary schools 2,792 pupils. There were in the 11 national primary schools in charge of friars 3,260 pupils divided among 66 classes, and in 32 in charge of nuns there were 4,782 pupils. There were also 29 school-teachers who are laymen and are visited by the friars as supervisors. During the 1920–21 school year 15 private rural primary schools had 530 pupils, and 38 private city primary schools 2,951; 563 national rural primary schools, 18,187 pupils; 105 religious schools, 5,857 pupils; 118 girls' primary schools, 10,481 pupils; 100 boys' schools, 8,331 pupils; and 10 half-time schools, 963 pupils. In 1921 there was created the University of Haiti.

Justice.

Justice is administered by a Court of Cassation and by lower courts. All the judges are nominated by the President and are irremovable.

Finance.

The revenue of Haiti is derived almost exclusively from customs, paid in American gold on exports and imports. The largest portion of the expenditure is for debt charges.

The following table shows the revenue and expenditure for two years:—

	Revenue		Expenditure	
	U.S. Gold dollars	Currency gourdes	U.S. Gold dollars	Currency gourdes
1918-19	5,115,930	3,063,968	2,349,880	4,534,121
1919-20	5,608,414	5,011,708	3,748,498	4,602,494

The budget for 1919-20 has also been adopted for the fiscal year 1920-21.

On December 31, 1920, the debt consisted of gold loans amounting to 92,263,260 francs. The internal debt amounts to 2,263,226 dollars; the floating debt, 3,734,005 dollars and 2,068,988 gourdes (nominally 4s.).

Defence.

An armed constabulary (Gendarmerie d'Haiti), both urban and rural, was instituted in 1916. The officers are drawn from the United States Marine Corps. The establishment consists of 110 officers and 2,688 non-commissioned officers and men. A coastguard service of one armed auxiliary schooner is attached to the constabulary. The reserve troops consisting of the former 'Guard of the Government' and old line regiments, have an effective of 19,128 men.

Production.

The industries of Haiti are mainly agricultural, and the most important product is coffee of excellent quality, but the export duty (3 cents gold per lb.) is so considerable as to hamper the development of its cultivation. Cocoa is grown extensively and cotton is exported in increasing quantities. The cultivation of tobacco is extending, and a cigar and cigarette factory is successful. Sugar is likewise grown, and there are 4 sugar-making establishments. An extensive sugar central, founded with American capital, has been constructed near Port-au-Prince. Rum and other spirits are distilled but not exported: the rum is of a superior quality. Logwood is an important product, and other valuable woods are now exported. Cattle breeding is neglected.

Haiti possesses considerable mineral resources quite undeveloped. Gold, silver, copper, iron, antimony, tin, sulphur, coal, kaolin, nickel, gypsum, limestone and porphyry are found but are little worked. Some effort has been made to work copper mines in the last few years, and concessions have been granted for mining coal, iron, and copper.

Commerce.

Imports and Exports for 4 years:—

—	Imports	Exports	—	Imports	Exports
	Dollars	Dollars		Dollars	Dollars
1915-16	1,925,255	1,837,741	1918-19	17,117,603	21,460,044
1916-17	1,661,369	1,602,968	1919-20	27,398,411	18,990,082

The values of imports into Haiti from various countries for the year 1919-20 were as follows:—From the United States, 22,773,762 dollars (83.12 per cent.); from Great Britain, 2,286,614 dollars (8.35 per cent.); from France, 1,451,700 dollars (5.30 per cent.). Of the exports, 9,903,881 dollars went to the United States (52.15 per cent.); 6,531,252 dollars to France (34.39 per cent.); and 318,120 dollars to the United Kingdom (1.68 per cent.).

Total trade between Haiti and the U.K. for 5 years (Board of Trade Returns):—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports . . .	47,018	18,074	161,981	158,292	135,359
Exports . . .	145,915	71,812	216,868	437,323	102,463

Shipping and Communications.

In 1919 there entered and cleared at the ports of the Republic 988 steam vessels of 90,566 tons, and 481 sailing ships of 923 tons. Several lines of steamers (French, Dutch, and Norwegian) connect the ports of Haiti with New York.

Port-au-Prince is connected with Cape Haiti by a road 169 miles long, and with Morebalais and Las Coobas by a road 33 miles long. A light railway has been constructed from Port-au-Prince to Lake Assuéi (28 miles), and to Léogane (22 miles), but the traffic is small. A concession has been granted the 'National Railroad Company of Hayti' for a railroad from Cape Haiti to Port-au-Prince, now in construction. Total length of line, 64 miles. Port-au-Prince has 5 miles of tramway.

The principal towns are connected by the Government telegraph system. A cable runs from the Mole St. Nicholas to Santiago de Cuba and from the Mole to Port-au-Prince, and also to Cape Haiti, whence it runs to Puerto Plata (Santo Domingo) and to South America.

There are 31 post offices. Haiti joined the Postal Union in 1880. Length of telegraph lines, 124 miles.

Money, Weights, and Measures.

The Banque Nationale de la République d'Haiti, established October 21, 1910, with a capital of 10,000,000 francs, undertakes to render services to the Government in respect of loans and other matters. In 1916, the National City Bank of New York purchased control over this bank. In 1919 the Royal Bank of Canada established a branch at Port-au-Prince.

The *Gourde*, or dollar, nominal value, 4s. Nickel coins are 50-, 20-, 10- and 5-centime pieces, and bronze 3-, 2-, and 1-centime pieces. The money in circulation consists of paper money, 7,394,972 gourdes; nickel coins, 7,000,000 gourdes; bronze coins, 245,000 gourdes; treasury bonds, 1,468,437 gourdes; total, 16,108,409 gourdes. It is estimated there are also 2,100,000 dollars in American gold in circulation. The bank notes are to be issued by the Banque Nationale de la République d'Haiti under the control of the Haitian Government. In 1917 the premium on gold as against Haitian gourdes was stationary at 400 per cent., at which rate the local currency has been stabilised.

The metric system of weights and measures came into use officially on October 1, 1920, but so far only in theory.

Diplomatic and Consular Representatives.

1. OF HAITI IN GREAT BRITAIN.

HONDURAS.

(REPÚBLICA DE HONDURAS.)

Constitution and Government.

ON September 15, 1821, the State of Honduras declared its independence of Spain and set up as a Republic which is governed under a charter proclaimed October, 1894. It gives the legislative power to a Congress of Deputies consisting of 42 members, chosen for 4 years directly by popular vote, in the ratio of one per 10,000 inhabitants. It meets for 60 days on January 1 each year. The executive authority rests with a President, nominated and elected by popular vote for 4 years, and holding office from February 1st.

President.—General Rafael Lopez Gutierrez (1920–1924).

The administration of the Republic is carried on by a Council of five ministers, to whom are entrusted the departments of Foreign Relations, Government and Justice, War, Treasury and Public Credit, Public Works and Agriculture, and Instruction.

Area and Population.

Area about 44,275 English square miles, with a population, on January 1, 1921, of 637,114 (314,528 males and 322,846 females), according to official figures, or 12.5 inhabitants to the square mile. The inhabitants are chiefly Indians with an admixture of Spanish blood. On the north coast there is a considerable proportion of negroes. The Republic is divided into 17 departments. La Mosquitia is still practically unexplored and is inhabited by native races who speak no Spanish. The capital of

Honduras was Tegucigalpa, with 38,950 inhabitants in 1920, but this became the capital of the new Republic of Central America (*see* 'Additions and Corrections' for the Republic of Central America), and the provisional capital of Honduras is Comayagua; other towns are Pespire, 7,132; Nacaome, 8,152; La Esperanza, 11,453; Santa Rosa, 10,574; Choluteca, 8,065; San Pedro Sula, 7,820. The main ports are Amapala on the Pacific, and, on the Atlantic, Puerto Cortez (2,500), Omoa (1,000), Ulúa, La Ceiba, Trujillo, Roatan, and Tela. Amapala, on Tiger Island, is 3 hours by gasoline launch from San Lorenzo on the mainland, where a cart road starts for 81½ miles (130 kilometres). Traction is by autos and bull carts. Tegucigalpa is 4 days' mule travel from the end of railroad on North Coast, and 4 hours from the end of the cart road at Comayagua.

Vital statistics in 1920:—Births, 17,435 (9,038 boys and 8,397 girls); deaths, 11,531 (5,953 males and 5,578 females); surplus of births, 5,904.

Religion, Instruction, Justice.

The Roman Catholic is the prevailing religion, but the Constitution guarantees freedom to all creeds, and the State does not contribute to the support of any. Instruction is free, compulsory (from 7 to 15 years of age), and entirely secular. In 1920 there were 867 schools, with 1,107 teachers. In 1920 there were 93,314 children of school age (52,620 boys and 40,694 girls), of whom 45,301 attended school. The expenditure for education in 1920 was 371,538 pesos. At Tegucigalpa there is a central university with faculties of medicine, and of science, law, and political sciences; also a military and automobile school, and at Comayagua there is a school of jurisprudence. For secondary instruction the Government maintains a Central Institute at Tegucigalpa, and subsidised colleges in the departments. To these colleges five normal schools are annexed.

The Judicial power resides in the Supreme Court with five judges chosen directly by the people for 4 years; four Appeal Courts, and departmental and local judges.

Finance.

The revenue is mainly derived from customs, and from spirit, explosives, and tobacco monopolies. For the years stated, ending July 30, the revenue and expenditure are given as follows (the silver peso is legally fixed at one-half the value of an American dollar).

—	1917-18 ¹	1918-19 ¹	1919-20 ¹	1920-21 ²	1921-22 ³
	£	£	£	£	£
Revenue . . .	720,867	794,114	1,003,346	951,491	834,350 ³
Expenditure . .	813,460	823,775	1,165,587	960,546	834,350 ³

¹ Peso converted at 3s.

² Peso converted at 2s. 6d.

³ Estimates.

On December 31, 1920, the external debt of Honduras consisted of four loans contracted as follows: 1867, 78,800*l.* and 900,700*l.*; 1869, 2,176,570*l.*; 1870, 2,242,500*l.*; amounting to 5,398,570*l.* The arrears of interest to January 1, 1921, amount to 22,326,112*l.*; total, 27,724,682*l.* No interest has been paid since 1872. The bonds of this debt were floated

to build a Trans-oceanic railway, but the scheme ended in a complete failure. Afterwards the Government took over the railway.

The internal debt on July 31, 1920, amounted to 3,555,982 silver dollars, an increase of 132,989 silver dollars over the preceding year.

Defence.

Every citizen of Honduras belongs to the regular army from the age of 21 to 35; to the reserves from the age of 35 to 40. Foreigners are exempt from service, naturalised citizens being exempt for 10 years. The troops on July 31, 1918, consisted of 46,106 fighting men and 21,505 reserves, making a total force of 77,611. The country is divided into five military zones.

Production and Industry.

The chief culture is that of bananas, mostly on the Atlantic coast, where coconuts are also grown. In 1920 there were exported 11,524,149 bunches of bananas, Tela being the principal banana exporting port. The coconut groves of Puerto Sal extend from the Ulua River to the Cuero River, a distance of about 60 miles, and are said to contain over 28,000 fruit-bearing trees. The export of coconuts in 1920 was 12,647,508. Rubber is produced in decreasing quantity; coffee of fine quality is grown, and the industry is increasing. Tobacco too is grown. While the Department of El Paraiso has become noted for its fine quality of tobacco, the Department of Copan still leads in quantity, producing 75 per cent. of the total amount raised in the Republic (about 1,717,500 pounds annually). This finds a market in the neighbouring Republics and also in Peru. In 1915-16 there was produced 1,644,521 quintals (of 100 pounds) of corn, 187,227 quintals of beans, 407,828 quintals of maicillo (Kaffir corn), 76,935 quintals of rice, 4,963 quintals of wheat, 67,119 quintals of coffee, and 6,069,379 bunches of bananas. The cultivation of indigo is being revived round Camasca, where 6,373 acres were cultivated in 1917. Henequen is being widely planted, the government having offered a subsidy. Attention is also being paid to the planting of the castor-oil plant.

Honduras is essentially a cattle producing country. The total number of farms was 3,658; of cattle ranches, 1,561. Cattle breeding is carried on extensively, and dairy farming on a small scale. In 1920 there were within the Republic approximately 500,000 head of cattle, horses, mules, donkeys and pigs, etc.

The mineral resources of Honduras are—gold, silver, copper, lead, zinc, iron, antimony, some of them being found in almost every department. Gold, bar silver, some copper and lead, and various ores are exported. Deposits of brown and other coal have also been found. The production of silver in 1920 was 1,979,686 ounces, and of gold 9,110 ounces. The chief requisites for the development of the mining industries are capital and facilities for transport.

Straw hats and cigars are the only articles of home manufacture exported. A very good quality of Panama hat is manufactured in the Departments of Copan and Santa Barbara. There is a large number of small factories of all classes in the Republic, mostly for making aguardiente, soda water, cigars, sugar, soap, candles, shoes, and artificial ice, besides other minor establishments.

Commerce.

Imports and exports for 5 years :—

—	1916-17	1917-18	1918-19	1919-20	1920-21
	£	£	£	£	£
Imports . . .	1,259,032	1,435,334	2,079,412	3,858,228	4,180,675
Exports . . .	1,070,690	1,376,079	1,799,322	2,083,418	1,357,147

The principal exports from Honduras in 1920-21 were bananas (2,832,288 U.S. dollars), coconuts (291,331 dollars), coffee (28,190 dollars), hides (40,222 dollars), cattle (153,485 dollars), and sugar (792,182 dollars).

The United States takes practically all the exports of Honduras (95.9 per cent. in 1919-20), and furnishes practically all its imports (14,029,063 dollars).

In February, 1916, Congress agreed to the establishment of a free port, called Puerto Herrera, and built at the point where the Cruta River joins the Bay of Caratasca.

The treaty of Commerce and Navigation of 1915 provides for the 'most-favoured-nation' treatment between the United Kingdom and Honduras.

Total trade between Honduras and United Kingdom for 5 years was according to Board of Trade returns) as follows :—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Honduras . . .	120	—	540	12,302	38,768
Exports to Honduras . . .	86,778	64,259	72,278	331,846	126,036

The transport of fruit, &c., to the United States is effected largely by steamships, some of them built for the purpose.

Communications.

In general, travelling and transport are accomplished by means of mules and ox-carts. Slow improvements in road-making and repairing are beginning to be made. The cart road from Tegucigalpa to the north coast is being rapidly pushed forward, reaching Comayagua in 1919. There is a good mail service by automobiles. The two principal roads are the Carretera del Sur from San Lorenzo, on the Pacific Coast, to Tegucigalpa, 84 miles; and the Carretera del Norte, from Tegucigalpa to Comayagua, 63 miles. A third road is being built from Lake Yojoa to Signatepeque, and thence to Comayagua; and a fourth from Tegucigalpa to Juticalpa.

There is a railway of 60 miles (95 kilometres) from Puerto Cortez to Potrerillos; the line, which was taken over by the Government in 1912, has been almost completely overhauled and repaired, and is now in a condition to meet the heavy demands made upon it by the banana crop. The other four railroads are owned and operated by the various fruit companies on the north coast. The Trujillo Railway, which will eventually reach Juticalpa, has about 73 miles completed; the Tela Railway has about 155 miles completed; the Cuyamel Fruit Co. Railway (Department of Cortes) has an extension of 49 miles; and the Vaccaro Brothers' Railway, which is being

built towards the town of Yoro, has 126 miles. Total length of line (1920) 463 miles.

In 1920 the country had 877 miles of telephone lines and 4,663 miles of telegraph lines. Number of telephone offices, 684; number of telegraph offices, 277. Number of pieces of mail matter handled in 1920, 4,337,917.

Money, Weights, and Measures.

The silver *peso* or *dollar*, of 100 cents, weighing 25 grammes, .900 fine, is the monetary unit. The fractional silver money consists of 50, 25, 20, 10, and 5 cent pieces. The *real* is also in popular use. It is equivalent to 12½ cents. There is a 1-cent and a 2-cent copper coin. On January 10, 1920, the government signed convention with banks for the introduction of United States coin into Honduras. The value of the silver peso is legally fixed at one-half the value of an American dollar.

There are two banks in the Republic, which are also banks of emission: the 'Banco de Honduras,' with a capital of 417,000 pesos; and the Banco Atlantida (1913), with a capital of 500,000 dollars. The total bank notes of the two banks amount to 909,592 pesos. The money in circulation is now about 3 million dollars in U.S. currency and 100,000 pesos of Honduras Banks notes.

The metric system of weights and measures has been legal since April 1, 1897, but English pounds and yards and the old Spanish system are still in general use:

1 <i>Vara</i>	= 32 inches.
1 <i>Arroba</i>	= 25 lb.
1 <i>Quintal</i>	= 100 lb.
1 <i>Tonelada</i>	= 2,000 lb.

Diplomatic and Consular Representatives.

1. OF HONDURAS IN GREAT BRITAIN.

Consul-General.—Arthur Breen Ryde, London.

There are Consuls at Manchester, Cardiff, Grimsby, Liverpool, Birmingham and Newcastle-on-Tyne.

2. OF GREAT BRITAIN IN HONDURAS.

Minister.—Hugh William Gaisford (resident at Guatemala).

Consul and Chargé d'Affaires at Tegucigalpa.—George L. Yall.

There are Consuls at Trujillo and Puerto Cortez.

HUNGARY.

(KINGDOM OF HUNGARY.)

Constitution and Government.

On October 31, 1918, a revolution broke out in Hungary with the object of establishing a Republic and making the country independent of Austria. On November 13 King Charles issued a letter of abdication, and on November 16, 1918, Hungary was proclaimed an independent Republic (Hungarian People's Republic), of which Count Michael Karolyi became Provisional President. The two Houses of the Legislature were abolished, and their place taken by a Provisional National Assembly. The Karolyi régime continued until March 22, 1919, when the Count resigned in consequence of an Entente note in reference to the boundary between Hungary and Rumania. Count Karolyi's Cabinet was succeeded by a Soviet Government, which proclaimed the dictatorship of the proletariat. An opposition Government was, however, soon set up at Arad and Szeged, which with the assistance of the Rumanian army swept away the Soviet Government, and on August 7, 1919, a National Government was again in the Capital. Elections were held on the basis of universal suffrage in January and February 1920, and as a result a *bloc* composed of parties of the Right was returned to power. The new Parliament proceeded to elect a Regent who was styled officially 'Protector of the Magyar Republic.'

Regent.—Admiral Nicholas von Horthy. (Elected March 1, 1920).

The Ministry at present (April, 1922), in power was formed on April 14, 1921, as follows:—

Prime Minister.—Count Stephen Bethlen.

Minister of Foreign Affairs.—Count Nicholas Banffy.

Minister of the Interior.—Count Kuno Klebelsberg.

Minister of Finance.—Tibor Kallay.

Minister of Agriculture.—John Mayer.

Minister of Commerce.—Louis Hegyesfalmy.

Minister of Public Instruction.—Dr. Joseph Vass.

Minister of Justice.—Paul Tomcsanyi.

Minister of National Defence.—General Alexander Belitska.

Minister of Social Welfare.—Ferdinand Bernolak.

On March 23, 1920, a Government Order that Hungary was a Monarchy, that the official style of the Ministry is 'Royal Hungarian Ministry,' that Hungary should be described as a Monarchy in all official documents, and that the Royal Arms were to be adopted again.

II. LOCAL GOVERNMENT.

In Hungary a distinction is observed between communes which are large or small, or may be townships with regular magistrates, and municipalities, which are regarded as communes of a higher order. The communal electoral right is possessed by every male inhabitant over twenty years of age who for two years has paid the State tax. The representative body is composed half of members elected for six years, and half of persons who pay the highest taxes. The committee consists of members appointed, in the towns for six years, in the rural communes for three years, with officials appointed for life. The counties and cities invested with similar rights are independent municipalities. Each has its council constituted similarly to the representative body of the communes; and the members are elected also for six years. All electors for the Parliament are qualified to vote. In Budapest they must be able to read and write. The executive is in the hands of the official body of the municipality, who sit and vote with the council.

Area and Population.

The Treaty of Trianon, signed on June 4, 1920, and ratified by Hungary on November 13, 1920, mentions in general terms the boundaries of the new State with Austria, Czecho-Slovakia, Yugo-Slavia and Rumania. The exact boundaries with Yugo-Slavia and Rumania are to be determined by a mixed commission. As a result of negotiations with Austria and of the consequent plebiscite, Hungary has obtained Sopron (Oedenburg) in Western Hungary. (See under Austria.)

The population of Hungary according to the census of 1921 is 7,840,832, and its area 35,654 square miles.

Vital statistics for 1920 :—Births, 211,697; marriages, 88,089; deaths, 146,408.

PRINCIPAL TOWNS, WITH POPULATION IN 1920.

Budapest (Census Jan. 1, 1921)	1,184,616	Hódmezővásárhely . . .	60,854	Győr . . .	50,035
Szeged . . .	109,896	Miskolcz . . .	57,384	Békéscsaba . . .	46,679
Debreczen . . .	103,228	Ujpest . . .	55,825	Nyiregyháza . . .	41,112
Kecskemét . . .	72,768	Kispest . . .	50,244	Erzsébetfalva . . .	40,325

Religion.

Religious toleration is one of the fundamental principles of the Hungarian State. There is perfect equality among all legally recognised religions, which include the Roman and Greek Catholic, the Evangelical (Augsburg and Helvetian), the Unitarian, the Greek-Oriental, the Gregorian-Armenian, the Baptist (since 1905), the Jewish, and the Mohammedan (since 1916). Each has the independent administration of its own affairs.

Instruction.

Public education in Hungary comprises the following grades:—(1) Infant schools; (2) elementary schools; (3) industrial and commercial apprentice

schools; (4) higher primary and primary schools; (5) training colleges for teachers; (6) middle or secondary schools: gymnasia and realschools, secondary schools for girls; (7) academies (high schools) of law; (8) institutions for religious education; (9) universities; (10) technical high schools, economic, mining, industrial, and commercial special schools.

School attendance is compulsory for children of six to twelve years. There were in the school year 1916 altogether 2,285 infants' schools and permanent foster-homes with 214,199 infants, and 9 training colleges for female teachers of infant schools.

In Old Hungary there were in the school-year 1916-17 15,224 elementary schools with 1,795,443 pupils and 29,611 teachers. The number of primary schools was 533, with 104,355 pupils and 4,256 professors. The number of training colleges for teachers and female teachers for elementary schools was 85, and for primary schools 9.

In the middle schools the curriculum extends over eight years. They are maintained by the State, by the larger communes, or (in the case of the denominational schools) by ecclesiastical foundations, with sometimes a subvention from the State. There were in 1916-1917, 186 gymnasia, with 3,198 teachers and 67,190 pupils; 34 realschools, with 628 teachers and 12,662 pupils, and 39 secondary schools for girls, with 802 teachers and 9,899 pupils.

Hungary has four universities all maintained by the State. In the first semester of the year 1916-17 the University of Budapest had 526 professors and 3,950 students (4,589 in 1920-21); the University of Kolozsvár, 165 professors and 420 students; the Universities of Pozsony (Pressburg) 19 professors and 147 students, and Debreczen 38 professors and 257 students—the last two having been founded in 1912. There are also 42 theological colleges, viz., 25 Roman Catholic, 4 Greek Catholic, 3 Greek Oriental, 7 Protestant, 1 Unitarian, and 1 Jewish, with a total of 238 professors and 1,355 students; and 8 law schools with 90 professors and 729 students. The technical high school (polytechnicum) in Budapest has 120 professors and 727 students. In the school-year 1916-17 there were 66 high commercial schools separately for boys and girls, 1 industrial school of art, 4 high industrial schools. There were 49 industrial schools.

Justice and Crime.

The Supreme Court in Budapest is the highest instance in all civil and criminal matters. As courts of first instance, there are county courts (törvényszékek) with collegiate judgeships; district courts (járásbíróságok) with single judges; and jury courts, (sajtóbíróságok) for press offences, besides an army special court.

Pauperism.

In Hungary poor relief is in the main left to communal administration. In the smaller communes orphans and the indigent are cared for by official guardians and overseers, while in the larger there are poor-houses, the funds being mostly derived from fines and taxes. The number of asylums for paupers and orphans is about 300. The Church and charitable societies also render assistance, and several millions of crowns are annually bestowed in legacies and gifts towards benevolent purposes.

Finance.

Budget estimates for 2 years :—

	1920-21	1921-22
	Kronen	Kronen
Revenue . . .	10,520,555,804	20,294,193,738
Expenditure . . .	20,210,748,615	26,762,508,209
Deficit . . .	9,690,192,811	6,468,314,471

Summary of the Budget estimates for 1920-21 :—

Revenue	Kronen	Expenditure	Kronen
Ministry of Foreign Affairs . . .	8,000,000	The Regent's Civil List . . .	3,000,000
„ „ the Interior . . .	10,765,358	Parliament . . .	15,711,045

„ „ Agriculture . . .	227,977,322	Ministry of Foreign Affairs . . .	587,056,548
„ „ Education . . .	47,942,855	„ „ the Interior . . .	838,912,674
„ „ Justice . . .	25,258,612	„ „ Finance . . .	4,944,979,872
„ „ War . . .	126,317,144	„ „ War . . .	4,567,370,245
Total (including all items) . . .	10,520,555,804	Total (including all items) . . .	20,210,748,615

The public debt of Hungary on December 31, 1920, was given at 54,453,041,000 kronen, of which 8,287,835,000 kronen are pre-war debt, 32,631,056,000 kronen debt incurred during the war, and 13,534,150,000 kronen incurred since the armistice.

Defence.

The armed forces of Hungary consist of the National Army, the Police, the Gendarmerie and the Customs Guards.

According to the Treaty of Trianon, Hungary is authorised to maintain an army of 35,000 officers, non-commissioned officers and men. The Treaty laid down that conscription was to be abolished, and consequently recruiting on a voluntary basis has been substituted. All recruits have to undertake to serve in the Army for a minimum period of 12 consecutive years, at least 6 of which are to be with the colours. Officers now serving will continue to do so until they attain the age of 40 years at least. Officers newly appointed must undertake to serve on the active list for a minimum of 20 consecutive years. No reserves or measures for mobilisation are permitted.

Hungary is divided into the following seven military districts:—Budapest, Szombathely, Szekesfehar, Kaposvar, Szeged, Miskolcz, and Debreczen. To each of these districts is allotted a mixed brigade each composed of 1 brigade staff, 1 cavalry squadron, 2 infantry regiments, 1 trench mortar company, 1 field artillery group, 1 cyclist battalion. In addition to the 7 mixed brigades there are the following army troops: 4 hussar regiments, 1 field artillery group, and 3 pioneer battalions.

Hungary has a force of 12,000 gendarmerie and 12,000 police, as well as 4,500 customs guards. The members of this force are under the obligation to serve for a minimum of 6 consecutive years. The authorised armament is as follows :—Gendarmerie: 1 rifle or 1 carbine per man; Police: 1 sword or revolver per man (automatic pistols for 5% of the establishment, i.e. 600); Customs Guards: 1 rifle per man.

A force of 3,000 finance guards is also maintained. These are armed with revolvers.

Hungary has no navy or air force.

Production and Industry.

The cultivation of the soil is the chief industry of Hungary. The soil is noted for its fertility and the variety of its products. The area and production of crops in Hungary in 1919-20 was as follows:—

Crop	Area	Yield	Crop	Area	Yield
	Acres	Quintals		Acres	Quintals
Wheat . . .	267,440	7,930,270	Maize . . .	2,026,502	12,273,770
Rye	1,482,137	4,196,430	Tobacco . .	51,293	263,725
Barley . . .	1,272,157	4,364,350	Sugar . . .	77,824	6,378,753
Oats	806,091	3,355,960	Grapes . . .	533,191	1,978,468

In Hungary there were in 1920 746,423 horses, 2,221,988 cattle, 1,817,405 sheep, and 3,729,190 pigs.

The total area under forest in Hungary (1920) was 1,357,438 acres.

The total production of coal in Hungary in 1920 was 4,458,694 tons. The best quality coal is found in the Mecsek Mountain, in the district of Pecs. Bituminous coal is found at Ajk. Hungary has a considerable number of brown-coal and lignite mines. Among the brown-coal deposits are the following: The district between Tatabánya-Esztergom, amounting to 120,000,000 tons; the Sarisap-Annavolgy mines, 20,000,000 tons; the Pilisszentivány, and Pilisvörösvár coal mines, containing approximately 6,000,000 tons of coal; the brown-coal deposits at Vertes, county of Komárom, and at Szapar and Csernye, county of Veszprém, amounting to about 2,000,000 tons. The borings at Kornye and Mor have had good results. At Kosd, near Vác, a brown-coal deposit was discovered, amounting to 1,000,000 tons. Other large brown-coal deposits are to be found in the Salgotarján district, in the territory of the counties of Nógrád and Heves, containing about 58,000,000 tons.

The bulk of the lignite deposits is to be found at Mátraalja, where there are about 12,000,000 tons. Other important lignite deposits are located at Varpalota, in the Trans-Danubian district, amounting to 2,000,000 tons, and in the Hungarian lowlands, near Balmazújváros, to an amount of 2,000,000 tons.

Hungary retains important fishery preserves in the Danube and Theiss rivers and in Lake Balaton. The latter, situated in the west, is the largest lake in central Europe, being 50 miles long and from 2 to 7 miles broad. Its waters contain plentiful supplies of perch, carp, pike, sheat-fish, shad and other fish. The north shore of Lake Balaton is an important wine-producing district. The best known Hungarian wines come from the hilly country, "Tokay," in the northeast section of New Hungary. Rock salt and the precious metals are also found in the foothill spurs of the Carpathians in this section of Hungary.

The industries of Hungary are based on agriculture. They include milling, distilling, the manufacture of sugar, hemp and flax, and also iron and steel works.

Commerce.

The imports into Hungary in 1920 amounted to 5,423 quintals, and the exports to 5,226 quintals.

Total trade between Hungary and the United Kingdom in 1921, according to Board of Trade returns:—Imports, 97,568£; Exports, 297,383£.

Internal Communications.

The length of railways in Hungary in March, 1921, was 4,372 miles, of which 1,858 are owned by the State.

Number of Hungarian post-offices, 2,156.

Money and Credit.

The krone is the unit of currency.

Notes of the Austro-Hungarian Bank circulating in Hungary on October 23, 1920, amounted to 11,982,646,810 kronen. The Hungarian Government in a decree issued on March 18, 1920, ordered the stamping of Austro-Hungarian bank notes circulating in Hungarian territory. This order was issued in conformity with a clause in the draft of the peace treaty and is effective with regard to all currency circulating in Hungary except the following: Notes of 1 and 2 kronen issued by the Austro-Hungarian Bank; notes of 5, 10, and 20 kronen issued by the Hungarian Postal Savings Bank; falsifications of 25 and 200 kronen notes of the Austro-Hungarian Bank printed by the Bolshevik Government; and certain old notes which have been recalled by the Austro-Hungarian Bank, some of which are still in circulation.

Diplomatic Representatives.

1. OF HUNGARY IN GREAT BRITAIN.

Minister.—Count Ladislas Szapary. Appointed March, 1922.

Counsellor.—William de Ruttkay.

Attaché.—Antoine de Balásy.

Chancellor.—Joseph Bolzar.

2. OF GREAT BRITAIN IN HUNGARY.

Minister.—Thomas Beaumont Hohler, C.B., C.M.G. Appointed January 5, 1920.

Secretaries.—John Balfour and J. H. Le Rougetel.

Commercial Secretary.—R. J. E. Humphreys.

Consul at Budapest.—L. M. Robinson.

ITALY.

(REGNO D'ITALIA.)

Reigning King.

Vittorio Emanuele III., born November 11, 1869, the only son of King Umberto I. of Italy and of Queen Margherita; succeeded to the throne on the death of his father, July 29, 1900; married October 24, 1896, to *Elena*, born January 8, 1873, daughter of Nicholas, King

of Montenegro; offspring, Princess *Jolanda*, born June 1, 1901; Princess *Mafalda*, born November 19, 1902; Prince *Umberto*, Nicola Tommaso Giovanni Maria, Prince of Piedmont and Heir Apparent, born Sept. 15, 1904; Princess *Giovanna*, born November 13, 1907; Princess *Maria*, born December 26, 1914.

Mother of the King.

Queen *Margherita*, born November 20, 1851, the only daughter of the late Prince Ferdinando of Savoy, Duke of Genoa, married, April 22, 1868, to Umberto of Savoy, Prince of Piemonte (King of Italy, 1878), widow July 29, 1900.

Uncle of the King.

Prince *Tomaso Alberto Vittorio*, of Savoy, Duke of Genoa, born February 6, 1854.

Cousins of the King.

Prince *Emanuele Filiberto*, of Savoy, Duke of Aosta, born January 13, 1869, married, June 25, 1895, to Princess *Elena*, d'Orleans, daughter of the late Comte de Paris; offspring, Prince *Amedeo Umberto*, Duke of Apulia, born October 21, 1898, and Prince *Aimone*, Duke of Spoleto, born March 9, 1900; Prince *Vittorio Emanuele*, of Savoy-Aosta, Count of Turin, born November 24, 1870; Prince *Luigi Amedeo*, of Savoy-Aosta, Duke of the Abruzzi, born January 30, 1873—children of the late Prince Amedeo of Savoy, Duke of Aosta, from his union with Maria Vittoria, Princess of Pozzo della Cisterna, who died November 8, 1876.

Most genealogists trace the origin of the reigning house to a German Count Berthold, who, in the eleventh century, established himself on the western slope of the Alps, between Mont Blanc and Lake Lemman. In the end of the eleventh century the Count of Savoy acquired the countries of Turin and Susa. Count Amadeus, in 1383, founded a law of primogeniture which led to the immediate acquisition of the territory of Nice. In 1416 the Counts of Savoy adopted the title of Duke; in 1418 they acquired the Principality of Piedmont; and in 1713 they obtained the island of Sicily, with the title of King. Sicily had to be exchanged, in 1720, for the isle of Sardinia, to which henceforth the royal dignity remained attached. The Genoese territory was added at the peace of 1815. The direct male line of the House of Savoy died out with King Carlo Felice in 1831, and the crown fell to Prince Carlo Alberto, of the house of Savoy-Carignano, a branch founded by Tommaso Francesco, born in 1596, younger son of Duke Carlo Emanuele I. of Savoy. King Carlo Alberto abdicated the throne March 23, 1849, in favour of his son, the late King Vittorio Emanuele II., who, by the Peace of Zürich, November 10, 1859, obtained Lombardy, with the exception of Mantua and a part of the surrounding territory. On March 11, 1860, annexation to Sardinia was voted by *plebiscites* in Parma, Modena, the Romagna, and Tuscany; on October 21, Sicily and Naples (including *Benevento* and *Pontecorvo*, part of the Papal States), and on November 4, the Marches and Umbria. The first Italian Parliament assembled in February 1861, and declared (March 17, 1861) Vittorio Emanuele King of Italy. The remaining part of the province of Mantua and Venetia were added in 1866. Finally, the remaining part of the Papal States (province of Rome), having been taken possession of by an Italian army (September 20, 1870), after the withdrawal of the French garrison, was annexed to the Kingdom by *plebiscite* on October 2.

The civil list has been settled at 16,050,000 lire.¹ From this amount the children of the late Prince Amedeo, Duke of Aosta, receive jointly allowance of 400,000 lire; Prince Tomaso, Duke of Genoa, an allowance of 400,000 lire; and Queen Margherita, an allowance of 1,000,000 lire.

¹ The amount of the civil list is, in fact, 15,050,000 lire, because the King repays to the State the annuity settled on Queen Margherita by law of December 6, 1900.

The greater part of the private domains of the reigning family were given up to the State in 1848.

Constitution and Government.

The present Constitution of Italy is an expansion of the 'Statuto fondamentale del Regno,' granted on March 4, 1848, by King Charles Albert to his Sardinian subjects. According to this charter, the executive power of the State belongs exclusively to the Sovereign, and is exercised by him through responsible ministers; while the legislative authority rests conjointly in the King and Parliament, the latter consisting of two Chambers—an upper one, the Senate, and a lower one, called the 'Camera de' Deputati.' The Senate is composed of the princes of the royal house who are twenty-one years of age (with the right to vote when twenty-five years of age), and of an unlimited number of members, above forty years old, who are nominated by the King for life; a condition of the nomination being that the person should either fill a high office, or have acquired fame in science, literature, or any other pursuit tending to the benefit of the nation, or, finally, should pay taxes to the annual amount of 3,000 lire, or 120*l*. On January 1, 1920, there were 368 senators and 9 members of the royal family. The electoral law of December 1920, made the suffrage universal for men and women 21 years of age, and also for men aged less than 21 years who have performed military service during the war. The Electoral Reform Act of 1919 introduced the principle of proportional representation and *scrutin de liste*. The number of deputies is 535, or 1 to every 71,000 of the population (census 1911). In 1921 the number of enrolled electors was 11,821,168 (34 per 100 inhabitants without distinction of sex or age) inclusive of the electors temporarily disfranchised on account of military service. For electoral purposes the whole of the Kingdom is divided into 508 electoral colleges or districts, and these again into several sections (19,508). A deputy must be thirty years old, and have the requisites demanded by the electoral law. Incapable of being elected are all salaried Government officials, as well as all persons ordained for the priesthood and filling clerical charges, or receiving pay from the State. Officers in the army and navy, ministers, under-secretaries of State, and various other classes of functionaries high in office, may be elected, but their number must never be more than forty, not including the ministers and the under-secretaries of State. All deputies receive 15,000 lire (600*l*.) annually, and all deputies and senators travel gratis on the railways.

Lower House, elected May, 1921: Constitutionalists, 275; Socialists, 122; Catholics, 107; Communists, 16; Republicans, 7; Germans, 4; and Slavs, 4.

The duration of a Parliament is five years, and it must meet annually; but the King has the power to dissolve the lower House at any time, being bound only to order new elections, and convoke a new meeting within four months. Each of the Chambers has the right of introducing new bills, the same as the Government; but all money bills must originate in the House of Deputies. The ministers have the right to attend the debates of both the upper and the lower House; but they have no vote unless they are members. No sitting is valid unless an absolute majority of the members are present.

The executive power is exercised, under the King, by a ministry. The ministry, constituted February, 25, 1922, is as follows:—

President of the Council and Minister of the Interior.—Signor Luigi Facta (Democrat).

Minister of Foreign Affairs.—Signor Dr. Carlo Schanzer (Democrat).

Minister for the Colonies.—Signor Giovanni Amendola (Democrat).

Minister of Justice and of Ecclesiastical Affairs.—Signor Luigi Rossi (Democrat).

Minister of the Treasury.—Signor Camillo Peano (Democrat).

Minister of Finance.—Signor Giambattista Bertone (Popular Party).

Minister of War.—Signor Di Scacchi (Agrarian).

Minister of Marine.—Signor Roberto de Vito (Democrat).

Minister of Public Instruction.—Signor Antonino Anile (Popular Party).

Minister of Public Works.—Signor Vincenzo Riccio (Liberal).

Minister of Agriculture.—Signor Giovanni Bertini (Popular Party).

Minister of Industry and Commerce.—Signor Teofilo Rossi (Democrat).

Minister of Labour.—Signor Arnaldo dello Sbarba (Socialist).

Minister of Posts and Telegraphs.—Signor Fulci (Democrat).

Minister of the Liberated Provinces.—Senator Maggiorino Ferraris.

LOCAL GOVERNMENT.

The administrative divisions of Italy are provinces (69), territories or circondari (214), districts or mandamenti (1805), and communes.

In 1922 (January 1) there were 8,362 communes. The two principal elective local administrative bodies are the communal councils and the provincial councils. According to the law of February 4, 1915, each commune has a communal council, a municipal council, and a syndic. Both the communal councils and the municipal councils vary according to population, the members of the latter being selected by the former from among themselves. The syndic is the head of the communal administration, and is a Government official; he is elected by the communal council from among its own members, by secret vote. Each province has a provincial council and a provincial commission, the numbers varying according to population. The council elects its president and other officials. The provincial commission is elected by the council from its own members. It conducts the business of the province when the latter is not sitting. Both communal and provincial councillors are elected for 4 years. The communal council meets twice and the provincial once a year in ordinary session, though they may be convened for extraordinary purposes. All communal electors are eligible to the council except those having an official or pecuniary interest in the commune. Electors must be Italian citizens, resident in the kingdom, or belonging to Italian provinces outside Italy, and be on the Parliamentary electoral list.

In 1920 the number of enrolled *administrative* electors was 11,950,756 (33·1 per cent. of population).

Area and Population.

The following figures show the increase of the population of the present territory of the Kingdom of Italy:—

Year (1 Jan.)	Population	Increase per cent. per annum	Year (1 Jan.)	Population	Increase per cent. per annum
1816	18,383,000	—	1917	36,755,764	0·24
1872 ³	26,801,154	0·720	1918	36,557,615	0·54
1882 ³	28,459,628	0·619	1919	35,970,464	1·61
1901 ¹ 3	32,475,253	0·738	1920	36,099,657	0·36
1911 ² 3	34,671,377	0·658	1921	40,070,161	—

¹ February 10.² June 10.³ Census Figures.

As a result of the Treaty of St. Germain there has been a considerable rearrangement of the Italo-Austrian frontier, and Italy has obtained large tracts of what were formerly Austrian lands. The following table shows the area and population of the acquired territories:—

—	Area in square miles	Popula- tion	—	Area in square miles	Popula- tion
Alto Adige	618	24,345	Triest	37	229,510
Carinzia	113	7,667	Istria	2,035	404,309
Carniola	782	88,605	Trentino & Ampezzano	2,627	393,111
Gorizia and Gradisca	1,138	260,749			
			Total	7,350	1,408,296

In the following table areas of 19 provinces marked with an asterisk are definitely ascertained by the Government Survey Department; the others are estimated by the General Statistical Department:—

Provinces and Departments.	Area in square miles	Population Present				Population per square mile, 1915

The resident population (*i.e.* having habitual residence in Italy, including persons temporarily absent) on June 10, 1911, numbered 35,845,048.

The population of Italy is in general perfectly homogeneous. According to statistics of 1911, the exceptions are: about 83,300 of French origin; 9,600 of Teutonic origin; 81,000 of Albanian origin; 29,000 of Greek origin; 11,700 of Spanish (Catalan) origin, and 42,200 Slavs.

MOVEMENT OF POPULATION.

Births, deaths, and marriages :—

Year	Marriages	Births Living			Stillborn	Deaths exclusive of the Stillborn	Surplus of Births

² For 8,076 communes out of a total of 8,344.

³ For 8,259 communes out of a total of 8,346.

Emigrants.—Total number in 1920, 344,208, of whom 153,717 went to other European countries or those bordering on the Mediterranean, and 190,491 to countries overseas.

The number of Italians who returned to Italy was :—In 1920, 77,369 (of whom 52,678 were from the United States).

PRINCIPAL TOWNS.

The numbers of inhabitants at the different centres do not in Italian statistics afford a sufficient basis for distinguishing between the urban and rural population. In Northern Italy the population is scattered over the country and there are few centres. In Southern Italy and in the islands the country people live in the towns, coming and going to cultivate their own plots of land ; consequently there are many populous centres where, if numbers alone were considered, the population would be regarded as urban, though it is, in truth, almost exclusively rural. The following statement gives the classification of communes according to resident population on December 31, 1920, on the basis of the 1911 census :—

	Number	Population	Per 1,000
Communes with population over 100,000	13	3,913,958	109.2
From 50,001 to 100,000	30	1,976,361	55.2
From 30,001 to 50,000	50	1,909,536	53.2
From 20,001 to 30,000	99	2,336,556	65.2
From 15,001 to 20,000	96	1,632,038	45.5
Others	8,070	24,675,599	671.7
Total	8,358	35,845,048	1,000.0

The estimated communal population of the capitals of provinces was as follows on January 1, 1915 :—

Communes	Population	Communes	Population	Communes	Population
Napoli	697,917	Venezia	168,038	Lucca	79,110

Religion.

The Roman Catholic Church is, nominally, the ruling State religion of Italy ; but the power of the Church and clergy is subordinated to the civil government, and there is freedom of worship to the adherents of all recognised religions. The census returns of 1911 were as follows :—

Profession	Total	Per cent.
Roman Catholics	32,983,664	95·13
Evangelical Protestants	123,253	0·36
Jews	34,324	0·11
Other professions	2,200	—
Not professing any religion	874,532	2·52
Not known	653,404	1·88
Total	34,671,377	100·00

¹ See also Rome, See and Church of.

Of the Protestants, 22,500 belonged to the Waldensian Church of Piedmont, about 10,000 to the other Evangelical Italian Churches, and 30,000 to foreign Protestant bodies.

Italy is divided into 13 apostolical provinces, comprising 272 episcopal jurisdictions, viz., 1 patriarchate (Venice), 49 archbishoprics, 6 cardinal bishoprics, and 216 bishoprics, 11 abbeys, and a number of prelates without dioceses. Every archbishop or bishop is appointed by the Pope, on the advice of a committee of Cardinals ; but the royal *cæquatur* is necessary for his installation. In 1911, the number of parishes was 20,707. According to the census, 1911, the secular clergy numbered 67,147 ; the regulars (monks, lay-brothers, nuns, &c.), 45,253 ; sacristans, &c., 10,761 ; persons employed at

the Pontifical and Episcopal Courts, &c., 284¹. There were in 1911, 358 Evangelical pastors and ministers, and 54 Jewish Rabbis.

The suppression of the religious corporations began for the old provinces in 1855, and was continued for the whole of the country by a law of July 7, 1866, and completed by the law of June 19, 1873, which extended the measure to the city and province of Rome. Of the monastic edifices some were occupied by the State, others assigned to communes or provinces. The corporations of Lombardy were privileged by the treaty of Zürich, and their lands and houses were left to the disposal of their individual members. The administration of the revenue from the proceeds of land destined for charity or instruction now belongs to the communes; that from monastic parish church property in Rome, to the parish churches; that from property of foreign religious orders in Rome (400,000 lire) to the Holy See; while the remainder is administered by two institutes which pay the pensions and other dues, and provide (1) for beneficent work and for worship in Rome; and (2) for worship in the rest of Italy.

Instruction.

The State regulates public instruction, and maintains, either entirely or in conjunction with the communes and provinces, public schools of every grade.

Schools in Italy may be classified under four heads, according as they provide: (1) elementary instruction; (2) secondary instruction—classical; (3) secondary instruction—technical; (4) higher education.

(1) Schools providing elementary instruction are of two grades. Religious instruction is given to those whose parents request it. Only the *lower-grade* instruction is compulsory. Every commune must have at least one lower-grade school for boys and one for girls; and no school with only one master should have more than seventy pupils. Higher-grade elementary schools are required in communes having normal and secondary schools, and in those with over 4,000 inhabitants. In both grades the instruction is free. The age-limit of 6 to 9 exists for communes where there is no higher elementary school, but where there is such higher school, children are required to attend till they have completed the course of instruction, the compulsory age being thus raised to 12 years. This law provides that illiterate persons shall be under various disabilities.

(2) Secondary instruction—classical—is provided in the *ginnasi* and *licei*, the latter leading to the universities.

(3) Secondary instruction—technical. This is supplied by the technical schools, technical institutes, and institutes for the mercantile marine.

(4) Higher education is supplied by the universities, by other higher institutes, and by special higher schools.

According to the census of 1911 the smallest percentage of illiterates above six years was in Piedmont, male 9·1, female 12·8 (male and female 11·0); and the largest in Calabria, male 59·5, female 78·1 (male and female 69·6). Since then there has been much improvement, and now there are *circondari* (arrondissements), e.g. Domodossola Pallanza, and Varallo in the province of Novara, and others in the provinces of Turin, Como, Cuneo, &c., where all young people twenty years of age can read and write.

¹ In this total are not comprised the priests, monks, nuns, etc., engaged in education (males, 1,343, females, 3,860), or as nurses (males, 450, females, 3,147).

Besides the universities there are also three institutions of university rank—the Institute of Higher Education in Florence ; the Royal Scientific and Literary Academy in Milan ; and the Higher Technical Institute of Milan.

There were, also, six higher institutes for commercial education (Turin,

Genoa, Milan, Venice, Rome, and Bari), with 3,791 students in 1918-19; three higher schools of agriculture (Milan, Perugia, and Portici) with 708 students; five engineering colleges (Turin, Milan, Bologna, Rome and Naples) with 6,096 students; the higher naval college at Genoa with 437 students; the high school of forestry in Florence, with 20 students (1914-15); the school of social science in Florence, with 118 students (1918-19); the school for Oriental languages in Naples, with 237 students; 3 veterinary colleges (Turin, Milan, and Naples) with 213 students; 3 women's-training colleges (Florence, Rome, and Naples), with 1,112 students.

In 1919 there was set up a national institute for the instruction of illiterate adults.

Justice and Crime.

Italy has 5 Courts of Cassation (4 of which have jurisdiction exclusively in civil matters), and is divided for the administration of justice into 20 appeal court districts, subdivided into 162 tribunal districts, and these again into mandamenti, each with its own magistracy (Pretura), 1,535 in all. In 12 of the principal towns there are also *Pretori urbani* (15), who have jurisdiction exclusively in penal matters. For civil business, besides the magistracy above-mentioned, *Conciliatori* have jurisdiction in petty claims.

The Pretori have jurisdiction concerning all misdemeanours (*contravvenzioni*) and offences (*delitti*) punishable by imprisonment (reclusion and detention) not exceeding six months, or banishment not exceeding one year, or by fine not exceeding 2,000 lire. The penal Tribunals have jurisdiction in the first instance in offences (*delitti*) for which the Code establishes a *minimum* penalty not exceeding five years of imprisonment and a *maximum* not exceeding ten years, or in offences punishable by a fine, exceeding 2,000 lire.

The Courts of Assize, which in all cases have juries, have jurisdiction in all proceedings concerning serious offences punishable by imprisonment for life (*ergastolo*), or by imprisonment (reclusion and detention) exceeding in the *minimum* five years, and in the *maximum* ten years. They have exclusive jurisdiction (save that the Senate is, on occasion, a high Court of Justice) concerning offences against the internal and external security of the State, and all press offences. Appeal is allowed to the penal Tribunals from the sentences of the Pretori, and to the Courts of Appeal from those of the penal Tribunals. There is no appeal from sentences of the Courts of Assize. The Court of Cassation in Rome has power to annul, for illegality, sentences passed by the inferior magistracy and to decide questions of jurisdiction or competency.

Statistics of persons convicted of offences of all kinds:—

Year	Convictions			
	Total	Before the Pretori	Before the Tribunali (first instance)	• Before the Corti d'Assize
1917	423,707	382,838	39,616	1,253
1918	337,398	297,312	38,942	1,144
1919	265,493	220,844	43,434	1,215

In 1918 (January 1) there were 30,704 males and 2,903 female prisoners; and 3,202 males and 1,441 females were placed in reformatories. At that

date there were 167 central and arrondissement prisons, 70 penal establishments, 34 reformatories, and 8 colonies for persons under domiciliary restraint. There were, besides, 1,414 cantonal prisons.

Pauperism.

In Italy legal charity, in the sense of a right in the poor to be supported by the parish or commune, or of an obligation on the commune to relieve the poor, does not exist. Public charity in general is exercised through the permanent charitable foundations, called 'Istituzioni pubbliche di beneficenza' (Opere pie), regulated by the law of July 17, 1890. The general results of an inquiry in 1900 were :—Leaving out of account institutions intended for lending, or for the encouragement of saving (that is, monti di pietà, monti frumentari, casse di prestanze agrarie), there were 27,078 opere pie, with a gross capital of about 2,205,000,000 francs. Their net income amounted to 52,559,000 lire. Added to this net income were casual legacies, contributions from private benefactors, subsidies from communes (for hospitals), &c., all of which receipts are spent annually, and thus the sum at the disposal of the opere pie in 1900 (last available data) amounted to 120,765,000 lire. Between 1901 and 1917 the capital of all the benevolent institutions was increased by 385 million lire. On December 31, 1919, the charitable foundations numbered 31,543, and their capital was 2,670,538,112 lire.

Finance.

Revenue and Expenditure.

Direct taxes are those on lands, on houses, and on incomes derived from movable capital and labour. The tax on houses is at the rate of 12·5 per cent. (with three-tenths additional) of the amount taxable, which is two-thirds of the real annual value in the case of factories, and three-fourths in the case of dwelling houses. The tax on incomes from movable wealth was raised to 20 per cent. of the amount taxable. The communes and provinces also tax lands and buildings. The State grants to the communes one-tenth of the proceeds of the tax on incomes as compensation for other communal revenues made over to the State by various laws.

The principal indirect taxes are :—the customs duties, the octroi, the taxes on manufactures, the salt and tobacco monopolies, lotto.

Total revenue and expenditure for five years (25 lire = 1*l.*) :—

Years ending June 30	Total Revenue	Total Expenditure	Difference
	Lire	Lire	Lire

Advances by the Bank	—	19,300,000	—	—
Total		649,300,000	—	—

¹ By-law of May 1, 1912, the interest on the 5 p.c. (gross) and 4 p.c. (net) consolidated debts is reduced from 3½ p.c. (net) to 3¼ p.c.

The capital (nominal) of the consolidated and redeemable debt amounted to 72,574,300,000 lire on July 1, 1920, and the interest to 3,542,000,000 lire. On June 30, 1920, the property of the State was as follows :—

	Estimated Value, Lire
Financial assets (Treasury)	36,003,122,815
Property, immovable, movable, loans, and various titles	5,025,829,673
Property of industrial nature	5,725,399,003
Material in use in army and navy	4,200,257,459
Property used in the service of the State	1,205,815,206
Scientific and artistic material	275,352,600
Gold in dépôt	3,263,405
Total	52,489,039,661

In the financial year 1917-18 the revenue from State property was:—Ecclesiastical, 284,169 lire; from fixed capital, 8,687,369 lire; from the Cavour Canals, 3,614,550 lire; from railways, 4,242 lire; various, 8,187,445 lire; total, 20,777,775.

Defence.

I. FRONTIER.

The extent of the land frontier of Italy is as follows:—French frontier 300 miles; Swiss 418; Austrian 566; frontier of San Marino 24; in all (exclusive of San Marino) 1,284 miles. The coast line of the peninsula measures 2,052 miles; of Sicily, 630; of Sardinia, 830; of Elba and the small islands, 648; the total length of coast is thus 4,160 miles.

On the Continental frontier of Italy the principal passes of the Alps are defended by fortifications. The basin of the Po is also studded with fortified places; the chief strong places in the region are the following:—Casale, Piacenza, Verona, Mantua (these two belong to the old Austrian Quadrilateral), Venice, Alessandria. On the coasts and islands are the following fortified places:—Vado, Genoa, Spezia, Monte Argentaro, Gaeta; works in the Straits of Messina, Taranto. To the north of Sardinia a group of fortified islands form the naval station of Maddalena. Rome is protected by a circle of forts.

II. ARMY.

Service in the army (or navy) is compulsory and universal. The total period is 19 years, beginning at the age of twenty. The young men of the year are divided into 3 categories; the first being posted to the permanent army; the second also to the permanent army but with 'unlimited leave'; and the third, that is those exempted from active service, to the territorial militia. The second category men form what is called the 'complementary force.'

The term of service in the ranks of the permanent army is 2 years for all arms. After passing through the ranks, the men are placed on 'unlimited leave,' *i.e.*, they are transferred to the reserve, in which they remain until they have completed a total of 8 years' service. From the reserve the soldier passes to the mobile militia, the term of service in which is 4 years. After completing his time in the mobile militia he is transferred to the territorial militia, in which he remains 7 years; thus finishing his military service at the age of 39.

The second category recruits are regarded as belonging to the permanent army for the first 8 years of their service. During this period they receive from 2 to 6 months' training, which may be spread over several years. They then pass to the mobile militia, and afterwards to the territorial militia, the periods of service in each being the same as in the case of the first category soldiers. The men allotted to the third category, who are posted at once to the territorial militia, receive 30 days' training.

In Italy each regiment receives recruits from all parts of the country, and the troops change their stations by brigades every four years. On

mobilisation regiments would be filled up by reservists from the districts in which they are quartered at the time. Reliefs are so arranged that at least half the reservists shall have previously served in the unit which they would join on mobilisation.

The field army is organized into 15 Territorial Army Corps, sub-divided into 30 divisions and 2 cavalry divisions, and includes—the General Staff and Commands of the larger units, the Royal Carabinieri, Infantry, Cavalry, Artillery, Engineers, Aerial Corps, the Military Districts, Invalid and Veteran Corps, Mechanical Transport, Railway Transport, Medical Corps, Supply Corps, Administrative Services, Veterinary Corps, the Military Schools, Institutes and various Technical establishments, the Army and Navy Supreme Tribunal and the Military Penal Establishments.

Besides the above-mentioned units permanently maintained on service, other units and corps that are generally formed at time of mobilisation for instructional duties of a temporary nature, or for internal duties, will form part of the Royal Army. The establishment of the active army in 1921 was 250,000 men.

The army corps consists of 2 divisions, the divisions of 2 brigades of infantry each of 3 battalions, and of artillery, engineers and auxiliary services. A regiment of Bersaglieri and a proportion of heavy artillery will be attached to each army corps.

Each regiment of Bersaglieri (light infantry) consists of 3 battalions of infantry and 1 battalion of cyclists, the cyclists being intended to supplement the cavalry in the field. The Alpini are frontier troops, specially organised to defend the mountain passes leading into Italy; they consist of 8 regiments (26 battalions) of Alpine infantry, and 2 regiments of 36 mountain artillery batteries.

Cavalry divisions each consist of 2 brigades of 2 regiments and of a horse artillery regiment. Each cavalry regiment comprises regimental headquarters, 2 squadron groups and 1 depot squadron.

The regiments of field artillery, heavy field artillery, heavy and coast artillery each comprise 1 headquarters, 4 groups and a depot. The mechanically transported artillery is composed of a headquarters, 5 groups and a depot. The regiment of horse artillery comprises 1 headquarters, 2 groups and a depot.

The Carabinieri are a force of military police. They are recruited by selection from the army, and they remain in the ranks of the force until they have completed 3 years' service. They then serve in the reserve of the Carabinieri for 4 years, after which they are transferred to the territorial militia for the remainder of their service, and are reckoned as a part of the army.

The garrison of Libya consists of 3 infantry battalions, 4 companies mounted infantry, 2 field batteries and 2 mountain batteries as colonial troops recruited voluntarily in Italy for 3 years' service. The native army is to consist of 12 battalions, 6 squadrons, 6 mountain batteries, 3 camel squadrons, etc.

The Italians have a special African corps in Erythrea, consisting of 3 companies of white infantry and 10 native battalions; also 1 squadron of native cavalry, a local company of artillery (Italians), and a native mountain battery. Its total strength is about 8,600 of all ranks.

In Italian Somaliland there is a native corps of 15 infantry companies, 1 camel company and 1 artillery company, with Italian officers, and a body of military police. Total strength about 4,700 of all ranks.

III. NAVY.

The Italian Navy has undergone complete revision and much reduction since the Armistice. The old battleships have been removed from the list, and the three pre-Dreadnoughts which remain are condemned. The armoured cruisers are of little value. The list of light cruisers has been expanded by the accession of six enemy vessels. No large shipbuilding is contemplated, and all attention is directed to the flotillas, from which everything that is ineffective has been removed. Three scout cruisers, 14 destroyers, and some smaller vessels are being built, and 8 mine-layers, 4 submarines, and other vessels are in the programme. There have been considerable reductions in the *personnel*. The expenditure in 1921-22 is estimated at about 34,000,000*l.* at pre-war rates, equivalent to nearly 11,000,000*l.* at current rates. Reduction is still in progress.

The naval administration is under the Minister of Marine, with an assistant secretary; a Chief of the Staff; a Superior Board which controls the general administration and advises on policy. Under its direction are the heads of the various services of the *personnel*, naval constructors (*Genio Navale*), ordnance, equipment, engineering, and civil administration. A civil officer administers the department of the merchant marine, which is under the direction of the assistant secretary for the navy. For purposes of local naval administration and defence the Italian littoral is divided into the following commands: Spezia, Naples, Taranto, and Pola. Venice has been reduced from a command to an administrative station. The vessels are apportioned, for administrative purposes, between the departments. There are torpedo stations all round the Italian coasts, the head stations being at Genoa, Spezia, Maddalena, Messina, Taranto, Brindisi, and Venice. Some of them are being demobilised. Summary of the Italian navy:—

	Completed at end of		
	1919	1920	1921
Dreadnoughts	6	5	5
Pre-Dreadnoughts	6	4	3
Armoured cruisers	5	5	3
Light cruisers, scouts and flotilla leaders	23	20	18
Torpedo gunboats, etc.	4	2	2
Destroyers	50	49	65
Torpedo boats	74	86	91
Submarines	80	50	46

Ships of no fighting value are excluded from the summary. The three pre-Dreadnoughts included in the summary and in the following table are to be sold, also the two older armoured cruisers.

The tables which follow of the Italian fleet are arranged after the manner of other similar tables in this book.

BATTLE FLEET.

First of class laid down	Name	Displace- ment.	Armour		Principal Armament	Torpedo Tubes	Indicated horse-power	Max. speed
			Belt	Big guns.				
<i>Dreadnoughts.</i>

1912	Quarto	—	—	—	—	—	—	—
1912	Ancona	4,842	—	—	7 5·9in. ; 3 4in.	2	26,000	27·5
1912	Taranto	4,480	—	2	7 5·9in. ; 2 3·4in.	2	34,000	28
1913	Bari	4,320	—	—	8 5·9in. ; 2 3in.	5	27,400	27·5
1911	Brindisi	—	—	—	—	—	—	—
1911	Venezia	3,444	—	—	8 3·9in.	3	25,000	27

The five cruisers last named are ex-enemy vessels. Older Italian cruisers are the *Liguria* and *Puglia*. There are 8 modern scouts or flotilla leaders, ranging upward from 1,000 tons to 2,500 tons, and a speed from 28 to 35 knots. One of them is the *Premuda*, ex-German V. 115. Twelve of the light cruisers and other smaller vessels are equipped as mine-layers and carry large supplies.

The large flotillas of destroyers are composed of 30 and 35 knot vessels, very effective in character, and there are flotillas of quite modern torpedo-boats. The destroyers include 2 ex-German and 7 ex-Austrian.

Monitors and armed pontoons: *Faà Di Bruno*, *Carso*, *Cucco*, and *Vodice*, 1,650 tons ; 2 15in., 4 14pr. and 6 light guns.

The *personnel* normally consists of over 1,000 officers and 40,000 men, but the numbers have been greatly reduced.

Production and Industry.

I. AGRICULTURE.

The systems of cultivation in Italy may be reduced to three:—1. The system of peasant proprietorship (*coltivazione per economia o a mano propria*); 2. That of partnership (*colonia parziaria*); 3. That of rent (*affitto*). Peasant proprietorship is most common in Piedmont and Liguria, but is found in many other parts of Italy. The system of partnership or *colonia parziaria*, more especially in the form of *mezzadria*, consists in a form of partnership between the proprietor and the cultivator. This system is general in Tuscany, the Marches, and Umbria. It is almost unknown in the Basilicata, little practised in Apulia, Calabria, and Sardinia, and has been entirely abandoned in the two most advanced centres of cultivation in the south, viz. :—Barese and the province of Naples. Various modifications of the system exist in different parts of Italy. The system of rent (*affitto*) exists in Lombardy and Venetia. Large farms (*la grande coltura*) exist in the neighbourhood of Vercelli, Pavia, Milan, Cremona, Chioggia, Ferrara, Grosseto, Rome, Caserta, and in Apulia, the Basilicata, Calabria, and at Girgenti and Trapani in Sicily. In Italy generally the land is much subdivided.

The area of Italy comprises 71,652,592 acres. Of this area 65,995,000 acres are under crops and 5,662,500 acres are waste.

Number of proprietors in Italy, 1911 :—Proprietors of lands, 1,326,736 ; of buildings, 732,484 ; of lands and buildings, 1,737,341 ; total, 3,796,561. Proprietors of lands and buildings (3,796,561) per 100 of population, 11 ; proprietors of lands (3,064,077) per square mile, 27.

The principal crops for 3 years were as follows :—

	Acreage			Produce in cwts.		
	1919	1920	1921	1919	1920	1921
Wheat . . .	10,694,000	11,362,000	11,927,000	92,206,000	76,932,000	102,400,000
Barley . . .	485,500	500,000	550,000	8,626,000	2,556,000	4,800,000
Oats . . .	1,142,750	1,172,500	1,200,000	10,080,000	7,032,000	11,000,000
Rye . . .	276,500	235,750	290,000	2,322,000	2,306,000	2,600,000
Maize . . .	3,757,250	3,753,250	3,750,000	43,498,000	43,366,000	48,000,000
Rice . . .	329,250	279,750	325,000	9,734,000	9,024,000	9,400,000
Beans . . .	979,000	1,068,000	1,125,000	5,948,000	5,190,000	8,000,000
Potatoes . .	770,250	725,500	750,000	27,726,000	28,446,000	28,446,000
Sugar Beet- root . . .	107,500	115,000	125,000	28,000,000	24,000,000	30,000,000
Vines ¹ . . .	10,759,000	11,338,500	10,590,000	726,000	930,468	726,000
Olives ¹ . . .	5,736,750	5,735,500	—	352,000	418,000	352,000

¹ Produce in thousand gallons.

In 1918 Italy had 989,786 horses, 949,162 asses, 496,743 mules, 6,239,741 cattle, 24,026 buffaloes, 2,338,926 pigs, 11,753,910 sheep, and 3,082,558 goats.

Silk culture, though flourishing most extensively in Lombardy, Piedmont and Venetia, is carried on all over Italy. In 1921 the silk cocoon crop was 3,000 tons. On June 30, 1920, there were 670 silk spinning mills and 164 weaving mills, the latter employing 23,759 operatives (21,851 women).

In the year 1898-99 there were only 4 sugar factories, with an output of 5,972 metric tons ; in 1919-20 there were 85, their output being 170,466 tons.

The value of the output of industrial chemical products in 1915 was 215,093,928 lire (in 1893, 26,134,000 lire).

II. FORESTRY.

The forest area (belonging to the State) is 71,226 hectares. The yield from these forests was valued as follows in 1919:—Timber, 465,384 cubic metres at 15,683,636 lire; firewood, 2,433,822 cubic metres at 3,001,012 lire; total value, 18,684,648 lire.

This total is exclusive of secondary produce valued at about 55 millions of lire annually. The forest produce thus amounts to 225 millions of lire. From 1867 to June 30, 1915, 33,555 hectares were replanted by or with assistance from the Government.

III. MINES AND MINERALS.

The Italian mining industry is most developed in Sicily (Caltanissetta), in Tuscany (Arezzo, Florence, and Grosseto), in Sardinia (Cagliari, Sassari, and Iglesias), in Lombardy (particularly near Bergamo and Brescia), and in Piedmont.

Production in metric tons (1 metric ton = 2,204 lbs., or 1,016 metric tons = 1,000 English tons) of metallic ores and other minerals in 1920:—

Ores, &c.	Productive mines	Metric tons	Lire	Workers
Iron	59	389,876	17,434,330	2,660

¹ No mine was productive in 1918.

The quarries of Italy employed in 1916, 46,820 persons (1,257 females), the output of building and decorative stone being valued at 61,739,320 lire.

IV. FISHERIES.

On December 31, 1915, the number of vessels and boats employed in fishing was 26,725, with an aggregate tonnage of 70,443. Those numbers include 48 boats of 419 tons engaged in coral fishing. There were 162,755 fishermen, of whom 6,902 were engaged in deep-sea or foreign fishing. The

value of the fish caught in 1916 (excluding foreign fishing) was estimated at 17,473,503 lire; the value obtained from tunny-fishing was in 1915 221,331 lire, and from coral-fishing 350,340 lire, the quantity being estimated at 327 kilogrammes.

V. MANUFACTURES

The Italian industrial census of June 10, 1911, showed that there were 243,926 industrial establishments in the country, having 2,304,438 employees, and possessing 1,620,404 horse-power. The particulars as to the kind of industries were as follows:—

Industries	Establishments	Employees	Horse-power
Industries connected with products of agriculture, hunting, and fishing	135,461	640,856	293,942
Mining and metal-working industries (except the chemical industry) and construction work (buildings, roads, water power, &c.)	58,836	695,737	268,763
Textile industry	32,691	656,733	177,610
Chemical industry	5,661	100,024	85,152
Public services	5,309	76,783	791,855

Japan	145,584	311,978	7,367	11,830

For the determination of Customs' values, &c., in Italy there is a permanent central commission, comprising official members, representatives of commercial corporations, &c. The values recorded are those of the goods at the frontier, exclusive of import or export duties. For imports and exports the parties interested declare the value of the goods, their quantity, and the country of origin or destination. For imports there is recorded the

gross weight in the case of goods subject to a duty of 20 francs per quintal (8s. 1½d. per cwt.) or less; the net legal weight (i.e. with deduction of an official tare) in the case of goods subject to duty of 20 or 40 francs per quintal (8s. 1½d. to 16s. 3d. per cwt.); the actual net weight in the case of goods taxed at over 40 francs per quintal (16s. 3d. per cwt.). For exports the gross weight is usually given. Inaccurate declarations are punishable by fine if the inaccuracies are prejudicial to the Treasury.

The trade of Italy is regarded either as general or special. The general trade comprehends all imports from abroad, whether intended for consumption within the kingdom or merely for transit, and all exports to foreign countries, whether national, nationalised or only issuing after transit. The special trade is restricted to imports for consumption and exports of national or nationalised merchandise. National merchandise consists of the produce and manufactures of the kingdom, while foreign imports on which the duties have been paid at the frontier are said to be nationalised. Transit trade denotes merchandise merely passing through the kingdom whether directly or after having been temporarily warehoused.

The treaty of 1883 provides for 'the most-favoured-nation' treatment in matters of commerce and navigation between Italy and the United Kingdom, and Italy is a party to the International Sugar Convention.

The principal articles of import into Great Britain from Italy, and British exports to Italy (according to the Board of Trade returns) in 2 years were:—

Imports into U.K.	1919	1920	Exports to Italy	1919	1920
	£	£		£	£
Olive oil	215,135	309,662	Coal	10,700,634	11,759,464
Hemp	1,734,216	4,112,643	Ironwork	2,845,376	3,152,453
Canned vegetables . .	1,215,597	689,483	Machinery	1,493,152	1,343,125
Lemons	798,725	477,503	Fish	439,045	428,303
Silk manufactures . .	2,464,091	812,113	Woollen goods . . .	1,692,703	5,030,073
Stone and slate . . .	467,135	384,712	Cottons	1,502,883	3,473,892

Total trade between Italy and the United Kingdom (Board of Trade returns) for 5 years (in thousands of pounds sterling):—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Italy to United Kingdom .	10,397	18,364	14,635	17,880	8,896
Exports to Italy from United Kingdom .	27,464	29,208	27,750	39,701	17,328

Navigation and Shipping.

The mercantile marine of Italy is shown as follows:—

—		Sailing Vessels (Jan. 1, 1917)	—		Steam Vessels (Jan. 1, 1922)
		No. Tons			No. Tons
Over 2,000 tons . . .		2 4,282	Up to 500 tons . . .		183 35,753
1,001 to 2,000 tons . .		56 77,269	501—3,000 tons . . .		222 389,528

Messina	1,058	785,787	1,058	787,021
Catania	1,701	707,474	1,689	710,259
Palermo	2,458	1,417,237	2,494	1,430,162
Venice	1,581	1,215,330	1,568	1,268,297

Internal Communications.

I. RAILWAYS.

Railway history in Italy began in 1839, with a short line between Naples and Portici (5 miles). Length of State railways 8,761 miles (June 30, 1920); all the railway lines 9,741 miles. Receipts from State railways in 1919-20, 1,996,255,287 lire; expenditure, 2,856,006,784 lire.

The Government proposes to electrify nearly 4,000 miles of State railways. By June 30, 1921, 639 miles had already been electrified.

II. POSTS AND TELEGRAPHS.

In the year 1921 (June 30) there were 11,228 post offices. The postal traffic was as follows :—

	1919	1920-21
	Total	Total.
Letters	1,000	1,000
Post cards	505,714	562,885
Newspapers, Printed matter, &c.	341,001	142,315
Post Office orders, &c.	1,059,667	1,400,500
	35,892	—
Total	1,941,774	2,105,700

On June 30, 1920, the telegraph lines had a length of 35,205 miles, and the wires 239,517 miles. There were 10,017 telegraph offices, of which 7,353 were State offices and 2,664 railway offices. There were, in that year, 19,501,640 private telegrams sent inland; and 1,710,015 private international telegrams.

The telephone service in 1919-20 had 111,719 subscribers. There were 324 urban systems; and 855 inter-urban systems with 19,374 miles of line and 239,354 miles of wire. Total number of conversations in the year, 7,232,826 (excluding international conversations). In 1907 the telephone service passed to the direct working of the State.

Money and Credit.

State notes and bank notes in circulation in lire :—

—	1916	1917	1918	1919	1920
State notes .	1,317,283,870	1,747,349,125	2,123,991,725	2,271,309,255	2,268,364,000
Bank notes .	5,012,349,600	8,424,997,250	11,750,263,050	16,281,342,600	19,731,640,700

The total coinage from 1862 to the end of 1919 was : gold, 430,810,430 lire ; silver, 694,028,777 lire ; nickel, 66,295,678 lire ; bronze, 85,474,017 lire ; total, 1,276,638,903 lire, exclusive of recoinage.

The nominal value of the money coined (including recoinage) in each year :—

—	Gold	Silver	Nickel	Bronze	Total
	Lire	Lire	Lire	Lire	Lire
1912	2,323,400	10,197,050	4,208,000	83,900	16,822,410
1916	—	23,681,004	—	129,250	23,810,254
1917	—	21,979,328	—	96,710	22,076,078
1918	—	—	8,619,400	239,200	8,858,600
1919	—	—	9,213,345	759,000	9,972,345

On June 30, 1921, the paper currency consisted of 18,159,000,000 lire of notes.

There is no national bank in Italy. According to the law of August 10, 1893, there are only three banks of issue : the Banca d'Italia, the Banco di Napoli, and the Banco di Sicilia. Assets and liabilities of these banks on December 31, 1920 :—

—	Assets	—	Liabilities
	Lire		Lire
Cash	1,775,302,021	Capital	302,000,000
Bills	4,338,221,971	Notes in circulation .	19,731,640,725
Anticipations	3,302,824,031	Accounts current, &c. .	2,748,711,016
Credits	2,035,245,078	Titles and valuables	
Deposits	34,859,520,635	deposited	34,859,520,635
Various securities . . .	13,467,216,481	Various	2,141,457,836
Total	59,778,330,212	Total	59,778,330,212

On December 31, 1919, the gold reserve amounted to 1,053,769,000 lire ; the silver reserve to 114,676,000 lire ; and the note circulation to 19,731,640,700 lire.

On June 30, 1918, there were 747 co-operative credit societies and popular banks, 1,904 rural banks, 221 ordinary credit companies, and 10 agrarian credit institutions, and (January, 1918) 11 credit foncier companies, of which 4 were in liquidation, with 789,739,000 lire of 'cartelle fondiarie' in circulation, and with 739,073,156 lire of 'mutui con ammortamento.'

The following table gives statistics of the savings-banks on December 31, 1920 :—

	Depositors	Total Deposits	Deposits during year	Repayments during year
		Lire	Lire	Lire
Post Office savings-banks	—	6,981,080,692	3,726,080,597	2,091,044,124
Ordinary " "	—	6,249,225,039	4,756,765,471	3,970,285,655

On June 30, 1919, the savings deposited with the co-operative credit and ordinary credit companies amounted to 3,872,424,058 lire, and *Monti di pietà*, 292,269,738 lire, and with *Casse rurali* 281,991,528.

On August 12, 1912, a Law came into operation establishing life assurance as a State monopoly. The existing insurance companies were allowed to continue their operations for 10 years under certain conditions. The National Insurance Institute carries out the Government business. It started operations on January 1, 1913, and has already assumed large proportions, having absorbed the business of 24 insurance companies (15 foreign and 9 Italian). According to the law, the companies which at the end of 1911 were engaged in life insurance in the Kingdom which did not cede their business to the Government were given the privilege of continuing their business for not more than 10 years, with the obligation of turning over to the Government Institute 40 per cent. of the business done after the beginning of the new régime. Only 3 Italian and 9 foreign companies continued business in Italy under these conditions and later one of these also ceded its business to the Institute. Branches of the National Institute of Insurance were established in every Province of Italy, 2,386 branches in all.

The insurance effected by the Institute in the years 1916 and 1917 was as follows :—

	1916		1917	
	No. of Contracts	Amount	No. of Contracts	Amount
Insurance issued	11,486	Lire 89,028,929	11,066	Lire 112,923,216
Insurance paid .	10,555	81,597,632	10,369	103,955,024

Money, Weights, and Measures.

The money, weights, and measures of Italy are the same as those of France, the names only being altered to the Italian form.

The *Lira* of 100 *Centesimi* ; intrinsic value, 25-22½ to 1*l.* sterling.

The coin in circulation consists of gold 10-lire, 20-lire, 50-lire and 100-lire pieces ; of silver 50 cent, 1-lira, 2-lire, and 5-lire pieces ; nickel 20 cent pieces, and bronze 1, 2, 5 and 10 cent pieces. Nickel coin is being substituted for bronze to a large amount. Bank notes of 25, 50, 100, 500 and 1,000 lire are in circulation ; also small notes, issued by the State (*biglietti di Stato*), for 5 and 10 lire. During the war there were issued cash notes (*buoni di cassa*) of 1 and 2 lire, in substitution for silver pieces of corresponding value.

Diplomatic Representatives.

1. OF ITALY IN GREAT BRITAIN.

Ambassador.—Nobile Cavaliere Giacomo de Martino (appointed November 11, 1920).

Secretaries.—Francesco M. Taliani, C.B.E., Giovanni Balsamo, and Mario Porta

Military Attaché.—Col. Virginio Riggi, M.C.

Naval Attaché.—Captain Luigi Bianchi.

Air Attaché.—Major Carlo Graziani, M.C.

Commercial Attaché.—Francesco Giannini.

Chancellor.—Giuseppe de Grossi.

Archivist.—Cavaliere Ugo Catani.

Consul in London.—Marquis A. Faà di Bruno.

There are also Consular representatives at Dublin (C.), Glasgow, Liverpool (C.G.), &c.

2. OF GREAT BRITAIN IN ITALY.

Ambassador.—Rt. Hon. Sir R. W. Graham, K.C.M.G., C.B., appointed November 25, 1921.

Counsellor.—H. W. Kennard.

Secretaries.—E. H. J. Leslie, C.M.G., C. J. W. Torr, and H. L. Thomas.

Commercial Counsellor.—Sir E. Capel Cure.

Commercial Secretary.—J. H. Henderson, O.B.E.

Naval Attaché.—Commander N. W. Diggle.

Military Attaché.—Major-General J. Duncan, C.B., C.M.G., D.S.O.

Consuls-General.—P. A. Somers Cocks, C.M.G. (at Naples), W. H. M. Sinclair (at Genoa), and W. A. Churchill (at Milan).

There are also Consular representatives at Brindisi, Cagliari, Florence, Leghorn, Messina, Palermo, Spezia, Turin, and other towns.

San Marino.

Embraced in the area of Italy is the independent Republic of San Marino, which claims to be the oldest State in Europe. Its legislative power is vested in the Great Council of 60 members elected by popular vote, a third of whom are renewable every three years, and two of whom are appointed every six months to act as Regents (*Capitani reggenti*). The regents exercise executive power, assisted by various nominated congresses, viz., *Congresso Economico di Stato*, *Congresso dei Legali*, *Congresso degli Studi*, *Congresso militare*. The frontier line is 24 miles in length, area is 38 square miles, and population (June 1920) 12,027. The revenue and expenditure for 1920-21 amounted to 2,000,000 and 2,150,000 lire respectively. There is no public debt. The military force contains 39 officers and 950 men. The chief exports are wine, cattle and stone. A new treaty of friendship with the Kingdom of Italy was concluded June 28, 1907, revised in 1920 and in 1921. The Republic has extradition treaties with England, Belgium, Holland, and United States. San Marino has bronze and silver currency coined in Italy: 210,000 lire in silver and 119,000 lire in bronze.

FOREIGN DEPENDENCIES.

. Colony of Eritrea.

The dominion of Italy on the coast of the Red Sea extends from Cape Kasar (18° 2' N.) to Cape Dumeirah on the Strait of Bab-el-Mandeb (12° 30' N.). The length of coast is about 670 miles. The area is about 45,800 square miles, and the whole population is estimated at 405,681, inclusive of 2,888 European, of whom 2,435 are Italian (exclusive of the military forces) and 453 of other nationalities. Massawah has 2,645 inhabitants, of whom about 400 are European, mainly Italian. The seat of the Government is Asmara, a modern town 7,765 feet above the sea-level, with 14,711 inhabitants (2,500 European). The religions of the native population are the Christian (Coptic rite) and the Mohammedan. There are some Roman Catholics and a few Pagans. Tigrean (an Abyssinian dialect) is spoken in the plateau, and Arabic in the lowlands.

The Italian possessions on the Red Sea are constituted as the Colony of Eritrea, with the management of its own finances and an autonomous administration in 8 commissariats, as follows:—

Commissariat	Area in square miles	Total Native Population (Census 1920)	Capital
Hamassen	1,160	60,234	Asmara
Massowah	5,000	47,910	Massowah
Assab	5,500	3,926	Assab
Acchele Guzai	3,475	62,169	Adi Caleh
Serae	3,300	69,311	Adi Ugri
Cheren	8,800	73,737	Cheren
Barca	12,700	58,540	Agordat
Gase and Setit	5,500	26,066	Barentu

Military force : 138 commissioned and non-commissioned officers and 5,457 men (5,164 natives and 293 Italians, exclusive of the police force of the colony.

In the Italian dependencies the central government is represented by a civil governor, who is nominated by the King and is under the direction of the Minister for the Colonies.

Governor.—Marquis G. Cerrina Feroni (1919).

For the financial year 1921-22 the revenue and expenditure of the Colony of Eritrea were estimated at: Colonial revenue, 11,456,700 lire; State contribution, 6,650,000 lire; extraordinary revenue, 5,937,300 lire; total revenue, 25,044,000 lire; expenditure, civil administration, 13,376,325 lire; military, 4,148,640 lire; extraordinary expenditure, 7,519,035 lire; total expenditure, 25,044,000 lire.

For climatic and agricultural purposes the country must be divided into two zones, the lowlands along the sea coasts and in the plains, where the tropical climate is very hot and the rains fall in winter; and the uplands, where the climate is cool and sometimes cold and the rains fall in summer. Both in the lowlands and the uplands the annual rain is sufficient for the successful raising of the crops. Irrigation works are being carried on in the lower zone in order to facilitate the intensive production of Italian farmers. Pasture is abundant, but the pastoral population is partly nomadic. Camels, oxen, sheep, goats, are common, and the produce, consisting of meat, hides, butter, supplies articles of local trade. Pearl-fishing is carried on

at Massawah and the Dahlak archipelago to the annual value of from 250,000 lire for pearls and 800,000 lire for mother-of-pearl. A very promising trade is being carried out in palm nuts. The exportation of these nuts in 1919 was 1,600,000 lire. There are gold mines worked successfully in several localities of Hamasién. Other minerals have recently been found, including petroleum.

At Massawah the imports by land and sea, the exports, and the tonnage entered were as follows:—

—	1915	1916	1917	1918
Imports . Lire	23,623,490	21,047,777	47,591,643	103,811,379
Exports . „	14,005,201	11,299,259	21,660,428	85,254,452
Transit . „	5,845,617	567,217	2,498,293	5,415,030
Tonnage entd. Tons	356,258	235,942	157,237	166,078

Through the land frontier the imports in 1920 amounted to 39,969,504 lire, and the exports to 31,126,555 lire.

There are 74 miles of railway from Massawah to Asmara (end of 1912), and now the line is being taken to Keren (60 miles) and to Agordat (54 miles). There are 12 post-offices. There is a telegraph line of 514 miles in length. There are 863 miles of telephone lines. Two wireless telegraph stations have been opened at Massawah and Asseb. They communicate with the radiotelegraphic system of Italian Somaliland and also with Italy (Coltano). There is, thus, through wireless communication between Italy and Italian Somaliland, via Massawah.

The legal currency consists of Italian coins and those of the Latin Union, but in actual circulation there are still Maria Theresa dollars. The Italian mint in 1918 issued a new silver coin, the *Tallero d'Italia*, the weight of which is 28.0668 grammes.

Italian Somaliland.

The Colony and Protectorates of Italian Somaliland have an area of 139,430 sq. miles and a population of about 650,000. They extend along the east coast of Africa from British Somaliland to the course of the Juba. The inland boundaries are determined under the Treaty of May 16, 1908, between Italy and Abyssinia, by a line (only partially demarcated) from Dolo on the Juba to the confluence of the Juba with the Dana, thence to the Webi Shebeli (comprising in Benadir the territory of the Somali tribe Baddi Addo and dependent clans), and finally to the Anglo-Abyssinian frontier fixed by protocol of May 14 and June 4, 1897. As a result of the Treaty of 1915 and the Colonial rearrangements consequent on the war, Britain will grant Italy territories on the right bank of the Juba with the port of Kismayu. Italy thus controls the whole of the Juba.

Italian Somaliland comprises (I.) The Protectorates, viz.—(1) The Sultanate of the Mijertins (Sultan Osman Mahmud), from Bender Ziade, the most northerly point belonging to Italy on the Gulf of Aden, to Cape Gabbee on the Indian Ocean (8° 13' N. lat.), with an Italian Commissioner, resident at Alula, capital of the Sultanate; (2) the territory of the Nogal, from Cape Gabbee to Cape Garad (6° 47' N. lat.), formerly occupied by the Mad Mullah; (3) the Sultanate of Obbia (Sultan Ali Iusuf), from Cape Garad to the northern boundary of the colony of Benadir, determined by a line which ends at the sea near the wells of Fah (about 4° 30' N. lat.), with an Italian Commissioner resident at Obbia, capital of the Sultanate. (II.) The Colony formerly called 'Benadir' but now officially known as 'Southern Italian Somaliland,' which extends from 4° 30' N. lat. to the mouth of the Juba, and comprises the following four administrative divisions:—(1) Medio

Shebeli, with Afgoi (population 3,000) as capital, (2) Basso Shebeli and Gosha, with Brava (8,000) as capital, (3) Alto Shebeli, with Mahaddei (5,000) as capital, and (4) Alto Juba, with Baidoa (2,000) as capital. Mogadisho (population 14,000), capital of the Colony, with its territory, has been placed under the direct dependence of the Governor.

The Colony is administered by a civil governor who resides at Mogadisho. A royal decree of December 8, 1910, provides for the minting of silver coins of 1 rupee, $\frac{1}{2}$ and $\frac{1}{4}$ rupee for Italian Somaliland, of the value of 15 rupees to 17. sterling. A royal decree of May 13, 1920, provides for the issuing of currency notes in rupees. These have been issued since November 1920 by the Banca d'Italia, a branch of which has been established at Mogadisho. The currency is fully covered by a corresponding reserve of silver rupees. Silver coins, however, are still largely circulating in the Colony and in the Protectorates.

The principal occupations of the people are cattle-rearing and agriculture. Formerly only the lower classes of the population cultivated the fields ; but in Southern Somaliland, after the Italian occupation of the interior, the shepherds were turned into farmers, and now the whole country near the banks of the Webi Shebele is inhabited and cultivated by the higher classes also of the Somali tribes. The most productive districts are Gheledi, Mobilen and Bur Acaba. But in Northern Somaliland the Mijertins rear camels and sheep. Exports (1920) are 17,623,109 lire ; imports, 28,447,389 lire. Imports are cottons, sugar, rice, petroleum, yarn, timber ; exports, dura, maize, gum, hides, butter, cotton. Animal produce is exported to Italy, Aden and Zanzibar, whence it is shipped to Europe, America, or India. Length of roads 1,135 miles ; steamship service on the Juba River from Kismayu to Bardera. A monthly service of steamers between Genoa and Port Durban, and the East African line of the Indian Steamship Company, Cowajee Dinshaw, from Aden to Zanzibar, connects the colony with Italy, the former directly, the latter through Aden and the India lines. Military force, 74 (Italian) officers and 2,738 (coloured) men. A detachment of the Flying Corps has recently been added.

Governor.—Carlo Riveri (1919).

The budget of Italian Somaliland for the year 1921-22 is as follows : Revenue proper of the colony, 2,992,000 lire ; State contribution, 5,593,000 lire ; extraordinary revenue, 4,407,000 lire ; total, 12,992,000 lire. Civil expenditure, 5,610,246 lire ; military, 2,591,700 lire ; special expenditure, 429,000 lire ; extraordinary expenditure, 4,361,053 lire ; total, 12,992,000 lire.

Thirteen wireless telegraph stations are working in the Colony connecting the principal coast and inland towns. The wireless station at Mogadisho communicates with Italy, via Massawah.

There are in the Colony 6 principal post offices (Mogadisho, Merca, Brava, Jumbo, Baidoa, and Mahaddei), but postal business is carried out at every station. The construction of the railway line from Mogadisho to Baidoa has been started.

An agricultural company (initial capital 24,000,000 lire ; Chairman, H. R. H. the Duke of the Abruzzi) has undertaken the agricultural colonisation of a stretch of land (12,000 hectares) on the Webi Scebeli, whose waters are used for irrigation. The agricultural work is already well advanced and the building of a powerful barrage across the river has been initiated. A navigation service on the Webi Scebeli from Afgoi to Bulsburti (480 km.) with small steam traffic and lighters has been established.

In 1920, 619 steamers of 161,481 tons entered and cleared the ports of Italian Somaliland.

Tripolitania and Cyrenaica.

(LIBIA ITALIANA.)

Italian Libia lies along the north coast of Africa between Tunis on the west and Egypt on the east, in longitude from about 9° to 23° east. The extreme northerly point of Libia is at about the parallel of latitude 33° north; the southernmost point is unknown, as the territory runs into the unmapped Sahara indefinitely. According to an arrangement with France (September 12, 1919) as a result of the Treaty of 1915, the frontier extends in a curve from west of Ghadames to south of Tummo. On the Egyptian frontier Italy has obtained from Britain Jarabaib.

Government.—Tripoli fell under Turkish domination in the sixteenth century, and though, in 1714, the Arab population secured some measure of independence, the country was in 1835 proclaimed a Turkish vilayet. In September, 1911, a quarrel broke out between Turkey and Italy, and the latter invaded Tripoli and established an army there. On November 5, 1911, a decree was issued annexing Tripoli, and on February 23, 1912, the Italian Chamber passed the Bill which ratified the decree of annexation. The war, nevertheless, continued until October 18, 1912, when the Treaty of Ouchy was signed, by which the sovereignty of Italy in Tripoli was established. This has now been recognised by the Great Powers.

For administrative and military purposes the country is divided (decree of May 17, 1919) into two independent districts, Tripolitania and Cyrenaica, with their respective capitals at Tripoli and Benghazi, all under the jurisdiction of the minister of colonies. Each province or district has its governor, appointed by the King upon the nomination of the minister of colonies. Immediately under the governor is the secretary-general for civil and political affairs, and the commander of the forces. To the secretary-general belongs the duty of organising and supervising the civil administration within the civil zone. In both provinces natives have equal rights with Italians, and in each there is a small local parliament elected by all citizens.

Governor of Tripolitania.—Giuseppe Volpi (1921).

Governor of Cyrenaica.—Luigi Pintor (1922).

Area and Population.—The entire area of the territory is estimated at about 406,000 square miles. According to a census taken on August 3, 1911, there were 523,176 natives, of whom 29,761 were in Tripoli town. It is estimated that the total population is about 1 million, of whom some 30 per cent. are Arabs, 40 per cent. Negroes, 23 per cent. Jews, and about 10 per cent. Europeans. The civil European population numbers 28,364 (Census 1921), mostly Maltese and Italians. Arabic is generally spoken, and both Italian and Arabic are the official languages. The principal towns are on the coast, Tripoli, with 73,000 inhabitants, Benghazi with 35,000, Derna, with 8,000 inhabitants, and Homs; inland are the caravan halting places, Ghadames, Murzûk, and Ghat.

Justice.—In both districts justice is administered by Mahommedan or rabbinic tribunals, and by regional tribunals, presided over by civil magistrates who are assisted by Italian or Mussulman assessors according as the cases concern Italians or native subjects. In civil and commercial matters the laws of the Koran or the Talmud are in force for natives; and in penal matters, the judicial law of Italy holds good. The Court of second instance is the Assize Court, which deals with more serious cases. The Royal Court of Appeal for Libia held its first session in December, 1912.

Finance.—For the financial year 1921–22 the revenue and expenditure of Tripolitania and Cyrenaica were estimated at: Colonial revenue, 32,971,000 lire; State contribution, 86,821,100 lire; extraordinary revenue, 56,960,100 lire; total revenue, 176,752,200 lire. Civil and military expenditure, 119,792,100 lire; extraordinary expenditure, 56,970,100 lire; total expenditure, 176,762,200 lire.

Defence.—The military force in Tripolitania consists of 299 officers and 13,023 men (9,383 natives and 3,640 Italians); that in Cyrenaica of 197 officers and 9,679 men (5,570 natives and 4,109 Italians).

Production and Industry.—Tripolitania has four zones, the first of which, along the sea, is covered with palm, olive, lemon, and fruit trees. The second is formed by the highlands of Gebel and Tarhuna; the former has olive groves and palm and fig trees, while cereals and saffron are also grown. The country, however, is rather barren. The Tarhuna land is rich in esparto grass. The rest of the second zone, which includes the hills of Mesellata and Bondara, as well as numerous valleys, is most fertile, and olive trees are abundant. The third zone consists chiefly of oases and is rich in palms. The oases (of which Ghadames is the most important) are some distance apart. The fourth zone is covered with palms, figs, vines, and almonds.

In Cyrenaica, olives and cypresses predominate. Pasturage is abundant and cattle could be bred on a vast scale. Bananas are grown at Derna. Barley is the chief food of the people.

Commerce.—There is a considerable caravan trade between Benghazi and Wadai and between Tripoli and Central Sudan when the routes are free from raiders. An important article of trade is ostrich feathers, which are brought overland from Central Africa, and exported to Paris and London from Tripoli to the value of 50,000*l.* annually, and 20,000*l.* from Benghazi.

Imports and exports for 5 years:—

	1916	1917	1918	1919	1920
	£	£	£	£	£
Imports . . .	1,161,327	2,416,964	3,039,402	3,900,000	7,847,070
Exports . . .	93,429	208,791	300,309	3,255	2,523,889

Sponge-fishing was started in 1885. In good years the returns from the industry amount to some 2,000,000 lire (£80,000) out of a total of 10,000,000 lire (£400,000) for the whole Mediterranean. The two fishing seasons in Libya are from November to February, and from March to October, the latter being the more important. During the year 1920–21 78 boats engaged in fishing; the sponges collected totalled 159,619 kilos, valued at 16,424,250 lire.

In 1917, 4,527 steamers with a tonnage of 2,831,167 entered and cleared at the ports of Libya; in 1914, there were 8,203 steamers of 6,446,377 tons.

Communications.—The principal means of communication inland are the caravans which follow long-frequented routes. Tripoli (town) is connected by telegraph cable with Malta, and by land lines with Bengardane (Tunis). In 1912 two Italian cables were laid, one between Syracuse and Tripoli, and the other between Syracuse and Benghazi.

Total length of railways, 163 miles. The principal lines in Tripolitania are: a line 53 miles in length, running from the coast to Hensair el Abiat; another, 75 miles long, along the coast, from Tripoli to Zuara; a third, 12 miles long, from Tripoli to Taginra, and a fourth, 6 miles long, from Tripoli to Ain-Zara. In Cyrenaica a line 20 miles long runs from Benghazi inland. In both districts some 600 miles of line are in operation.

In 1921, 201,977 registered letters were received and 227,257 despatched; 10,470 insured letters received and 9,725 despatched; 41,918 parcels received and 26,076 despatched. Deposits in savings bank, 4,312,853 lire; number of telegrams despatched, 100,341; number received, 95,027.

Banking and Currency.—The Banca d'Italia, the Banco di Sicilia, the Banco di Napoli, the Banco di Roma and other banks carry on financial operations.

There is a British Consul at Benghazi, and a Vice-Consul at Homs.

Concession of Tientsin.—The Italian concession of Tientsin, under the agreement with China of June 7, 1902, lies on the left bank of the Peiho and has an area of about half a square kilometer with a population of 10,017 (Chinese, 9,887; Italians, 51; other Europeans, 79) in 1915. It contains a village and salt-pits. Revenue 1915-16, 433,532 lire; expenditure, 513,002 lire.

Aegean Islands.—During the war with Turkey in 1912, Italy occupied as base, the islands of Egeo, Rhodes and the other small islands of the Sporadi group (Stampolia, Scarpanto, Caso, Piscopi, Nisiro, Colinnio, Liro, Patino, Cos, Simi, Calchi and Lipso—the Dodecannese). The total population in 1917 was 100,198.

Statistical and other Books of Reference concerning Italy.

1. OFFICIAL PUBLICATIONS.

The *Annuario Statistico Italiano* (Annual), issued by the General Statistical Department of the Ministry of Industry, Commerce and Labour, gives statistical information about Italy and its colonies.

The publications of the various Departments of Government: Agriculture; Industry, Commerce, and Labour; Public Works; Treasury; Finance; War; Marine; Interior; Public Instruction; Justice; Foreign Affairs; Post and Telegraphs; Colonies.

Census publications are issued by the General Statistical Department of the Ministry of Industry, Commerce, and Labour.

JAPAN.

(NIPPON.)

Reigning Sovereign.

THE Japanese claim that their empire was founded by the first Emperor Jimmu Tennō, 660 B.C., and that the dynasty founded by him still reigns. It was revived in the year 1868 (the first year of the *Meiji*), when the now ruling (*de jure*) sovereign overthrew, after a short war, the power of the Shogun (the *de facto* sovereign), who had held the ruling power in successive families, since the twelfth century; and in 1871 the feudal system (*Hōken Seiji*) was entirely suppressed. The Emperor bears title of Tennō; but the appellation by which he is called in relation to external affairs is 'Kōtei,' a word of Chinese origin. Only foreigners make use of the poetical title 'Mikado.'

Emperor of Japan.—*Yoshihito* (Harunomia), born at Tōkyō, August 31, 1879; succeeded his father, Mutsuhito, July 30, 1912; married, May 10, 1900, to Princess Sadako, born June 25, 1884, daughter of Prince Kujō.

Children of the Mikado.—I., Prince Hirohito, born April 29, 1901 (Crown Prince). II., Prince Yasuhito, born June 25, 1902. III., Prince Nobuhito, born January 3, 1905. IV., Prince Takahito, born December 2, 1915.

Sisters of the Mikado.—I., Princess Masako, born Sept. 30, 1888, married, April 27, 1908, to Prince Tsunehisa. II., Princess Fusako, born Jan. 29, 1890, married, April 29, 1909, to Prince Narihisa. III., Princess Nobuko, born August 7, 1891, married May 6, 1910, to Prince Yasuhiko. IV., Princess Toshiko, born May 11, 1896, married May 18, 1915, to Prince Naruhiko.

By the Imperial House Law of February 11, 1889, the succession to the throne has been definitely fixed upon the male descendants. In case of failure of direct descendants, the throne devolves upon the nearest Prince and his descendants. The civil list is fixed at 4,500,000 yen.

On November 25, 1921, owing to the continued ill-health of the Emperor, the Crown Prince of Japan was constituted Regent.

Constitution and Government.

By the Constitution of February 11, 1889, the Emperor combines in himself the rights of sovereignty, and exercises the whole of the executive powers with the advice and assistance of the Cabinet Ministers, who are responsible to him, and are appointed by himself. There is also a Privy Council, who are consulted by the Emperor on important matters of State. The Emperor can declare war, make peace, and conclude treaties. The Emperor exercises the legislative power with the consent of the Imperial Diet. It is his prerogative to give sanction to laws, to convoke the Imperial Diet, to open, close, and prorogue it, and to dissolve the House of Representatives. The Imperial Diet consists of two Houses, a House of Peers and a House of Representatives. Every law requires the consent of the Imperial Diet. Both Houses may respectively initiate projects of law, can make representations to the Government as to laws or upon any other subject, and may present addresses to the Emperor.

The House of Peers (373 members) is composed of (1) male members of the Imperial family of full age, sixteen in number; (2) princes and marquises of the age of 25 and upwards (14 princes and 34 marquises); (3) counts, viscounts, and barons of the age of 25 and upwards, and who have been elected by the members of their respective orders, never to exceed one-fifth of each order (101 counts and 20 members, 381 viscounts and 73 members, 410 barons and 73 members); (4) persons above the age of 30 years, who have been nominated members by the Emperor for meritorious services to the State or for erudition (7 viscounts, 14 barons and 97 others); (5) persons who shall have been elected in each Fu and Ken from among and by the 15 male inhabitants thereof, above the age of 30 years, paying therein the highest amount of direct national taxes on land, industry, or trade, and have been nominated by the Emperor. The term of membership under (3) and (5) is seven years; under (1), (2), and (4) for life. The number of members under (4) and (5) must not exceed the number of other members.

The members of the House of Representatives number 463, a fixed number being returned from each electoral district. The proportion of the number of members to the population is one to about 120,610. Voting is by secret single ballot. Electors are (1) male Japanese subjects of not less than full 25 years of age, (2) permanent and actual residents in the electoral district for not less than a year; (3) and paying land tax to the amount of not less than 3 yen in a year for more than one year, or direct taxes other than land tax to the amount of not less than 3 yen in a year for more than two years or of land tax together with other direct national taxes to the amount of not less than 3 yen in a year for more than two years. In general, male Japanese subjects of not less than 30 years of age are eligible to the House of Representatives, without any qualification arising from payment of taxes. Disqualified for membership are the Imperial Household officials, priests, students, teachers of elementary schools, government contractors, election officials. The President and Vice-President of the House of Peers are nominated by the Emperor from among the members, and President and Vice-President of the House of Representatives are nominated by the Emperor from among three candidates, elected by the House. The Presidents of both Houses receive an annual salary of 7,500 yen; Vice-Presidents, 4,500 yen; elected and nominated members of the House of Peers and members of the House of Representatives, 3,000 yen, besides travelling expenses. The Imperial Diet, which must meet annually, has control over the finances.

After the elections held in May, 1920, the following parties were returned to the Diet :—Seiyūkai (Government Party), 283 ; Kenseikai, 108 ; Kokuminto (Popular Party), 26 ; Koshin Club, 25 ; and Independents, 21.

The Cabinet (formed on September 30, 1918) consists of the following members :—

Prime Minister.—Viscount Korekiyo *Takahashi* (appointed on November 12, 1921, on the assassination of Mr. *Hara*).

Interior.—Takejirō *Tokonami*.

Foreign Affairs.—Count Yasuya *Uchida*.

War.—General Hanyō *Yamanashi*.

Marine.—Admiral Tomosaburō *Katō*.

Finance.—Baron Korekiyo *Takahashi*.

Minister of Justice.—Count Yenkichirō *Okuma*.

Agriculture and Commerce.—Tatsuo *Yamamoto*.

Education.—Tokugorō *Nakabayashi*.

Communications.—Utarō *Noda*.

Railways.—Hajime *Motoda*.

Local Government.

For local administration Japan (except Hokkaidō or Yezo ; Chōsen, formerly Korea or Chao-psien ; Karafuto or Japanese Sakhalin ; and Taiwan or Formosa) is divided into prefectures ('Fu' and 'Ken'). The prefectures are subdivided into municipalities ('Shi') and counties ('Gun') ; and the counties are again subdivided into towns ('Chō') and villages ('Son'). Okinawa Prefecture and some islands have, however, special organisations. Municipality, town, and village are the units of local government. These administrative divisions form at the same time local corporations of the same names, except Gun, the corporation of which was abolished in 1921. In each prefecture there are a governor ('Chiji'), a prefectural assembly ('Fu-kwai' or 'Ken-kwai'), and a prefectural council ('Fu-Sanji-kwai' or 'Ken-sanjikwai'), of which the governor is president ; in each county a sheriff, in each municipality a mayor, a municipal assembly, and a municipal council, of which the mayor is the president ; and in each town or village a chief magistrate and a town or village assembly. Prefectural, municipal, town and village assemblies give decisions mainly upon financial matters. The prefectural council gives decisions upon matters delegated by the prefectural assemblies and upon matters of pressing necessity when the assembly is not in actual session.

The qualifications of the prefectural electors are (1) citizenship and residence in the prefecture ; (2) payment of the direct national tax to the amount of not less than 3 yen for one year in the prefecture. Persons eligible for election must pay direct national tax to the amount of not less than 10 yen. Citizenship is shared by all male Japanese subjects not less than 25 years of age, who for two years (1) reside in the municipality, or town, or village ; (2) share its burden ; and (3) pay land tax or not less than 2 yen direct national tax annually in it. The governor and sheriff are appointed by Government ; the mayor is that one of three candidates elected by the municipal assembly who has obtained the Emperor's approval ; and chief magistrate of town or village is one who has been elected by the town or village assembly and has obtained the governor's approval.

Hokkaidō has a governor and a special organisation. Chōsen has a Governor-General. The peninsula is administered in 13 Do or provinces, these being sub-divided into 329 Tuand Yun or districts. Taiwan (Formosa) also has a governor-general, who is invested with very extensive powers. The island is divided into 5 provinces (Shū), each of which has a governor. Karafuto is divided into 5 local divisions (Chō).

Area and Population.

The Empire consists of the five principal islands of Honshiu (mainland), Kiushiu, Shikoku, Hokkaidō (Yezo), and Taiwan (Formosa); besides the Chishima (Kuriles), Sado, Oki, Awaji, Iki, Tsushima, Riukiu (Luchu Islands), Ogasawarajima (Bonin Islands), Hōkotō (Pescadores) islands, the peninsula Chosen (Korea), and the southern half of the island of Karafuto (Sakhalin). Total area is shown as follows:—

Principal Islands	Number of Adjacent Small Islands	Area in square miles			
		Principal Islands	Adjacent Small Islands	Total	Per cent.
Mainland	167	86,953	473	87,426	33.53
Shikoku	74	6,907	176	7,083	2.72
Kiushiu	150	13,870	1,833	15,703	6.02
Hokkaidō (excluding the Chishima)	13	30,340	162	30,502	11.70
Chishima or Kurile Islands (31 islands)	—	6,068	—	6,068	2.33
Sado	—	337	—	337	0.13
Oki	1	130	1	131	0.05
Awaji	1	219	1	220	0.08
Iki	1	51	1	52	0.02
Tsushima	5	263	3	266	0.10
Riukiu (55 islands)	—	941	—	941	0.36
Ogasawarajima or Bonin Islands (20 islands)	—	27	—	27	0.01
Total	412	146,106	2,650	148,756	57.05
Chōsen (Korea)	—	—	—	84,738	32.50
Taiwan (Formosa)	14	13,911	33	13,944	5.35
Hōkotō (Pescadores)	12	25	22	47	0.02
Karafuto (Japanese Sakhalin)	—	—	—	13,253	5.08
Grand Total	438	160,042	2,705	260,738	100.00

Administratively there exists a division into 47 prefectures. There is also a division into 636 rural districts, 79 cities, 1,333 towns, and 10,839 villages (1918).

Taiwan (Formosa) and Hōkotō (the Pescadores) were ceded by China in accordance with the treaty of Shimonoseki in 1895, and Japanese Karafuto was ceded by Russia by the Treaty of Portsmouth, N.H., in 1905. By the same Treaty of Peace the Russian Government ceded to Japan the lease of Port Arthur, Ta-lien, and adjacent territory and waters, and also the railway between Chan-Chun and Port Arthur, and the coal mines worked in connection therewith. In March, 1915, the Chinese Government agreed to extend the lease of the territory on Liaotung Peninsula, including Port Arthur and Dalny, to 99 years. The Chino-Japanese Treaty of December 22, 1905, provided for the interests of China and Japan with respect to

Manchuria. By a treaty between Japan and Korea on Aug. 23, 1910, the Korean Territory was annexed to the Empire of Japan.

By an agreement signed May 25, 1915, Japan obtained from China exclusive mining rights in Eastern Mongolia, and the right to settle in the province, and in Shantung the transference of all mining and railway privileges hitherto enjoyed by the Germans; also the extension of the lease of Port Arthur to 99 years, and a joint control over certain industrial works in which they have a large financial interest, besides other privileges. (For full details, see Introduction to THE STATESMAN'S YEAR-BOOK for 1916.)

The population of Japan on December 31 of the years shown :—

Year	Male	Female	Total	Annual Increase per 1,000
1913 ¹	26,964,586	26,398,095	53,362,682	15.99
1916	28,118,981	27,518,462	55,637,443	12.79
1917	28,472,320	27,863,663	56,335,983	12.79
1918	28,042,094	28,625,617	56,667,711	12.79
1920 ¹	28,042,995	27,918,145	55,961,140	—

¹ Census.

In 1920 (Census) the population of Chōsen was 17,284,207; of Taiwan, 3,654,398; of Karafuto, 105,765. Total, Japan, 77,005,510.

Up to June 30, 1920, 470,604 Japanese emigrated, and of these 114,841 men and 87,519 women were living in the United States (including Hawaii); 139,888 men and 85,899 women in China; 4,998 men and 276 women in Australia; 19,885 men and 14,373 women in Brazil; and 2,724 men and 201 women in Europe. On December 31, 1920, the number of foreigners in Japan (exclusive of Formosa) was 25,880, of whom 14,258 were Chinese, 2,384 English, 2,036 American, 568 German, 460 French, 233 Portuguese 135 Dutch, 1,232 Russian, 142 Swiss.

Births, deaths, and marriages of Japanese at home and abroad :—

Year	Marriages	Births	Deaths	Excess of Births
1913	432,782	1,778,106	1,038,723	739,383
1914	454,741	1,832,158	1,115,770	716,388
1915	447,170	1,824,888	1,107,237	717,651
1916	435,755	1,832,931	1,202,900	630,031
1917	450,478	1,843,023	1,215,337	627,686

In 1917 the still-births (not included in the above) numbered 140,328 and the illegitimate, 160,286.

The following is a list of large towns and cities on December 31, 1918 :—

Tokyo (1920)	2,173,162	Nagasaki (1920)	176,554	Sendai . . .	122,720
Osaka (1920)	1,252,972	Hiroshima . .	162,391	Otaru . . .	102,467

Fukui .	59,932	Nara .	47,515	Saga .	38,547

¹ Shimonoseki was formerly called Akamagaseki.

Religion (excluding Formosa).

There is absolute religious freedom. The chief forms of religion are—(1) Shintoism, with 13 sects; (2) Buddhism, with 12 sects (56 denominations). There is no State religion, and no State support. In 1918 Shinto shrines numbered 49,346 (besides 67,418 minor shrines), and the priests, 14,759. Buddhist temples, 71,681 (besides 36,109 minor temples); high priests and priestesses, 52,250. There were, besides, 2,566 licensed preachers and 1,493 churches and preaching stations of the Roman Catholic, Greek, Catholic, and Protestant Churches. Since 1891 the Roman Catholics have had an episcopate of one archbishop and three suffragan bishops. There are shrines dedicated to the eminent ancestors of the Imperial House, and to meritorious subjects; these are independent of any religious sect, and some of them are supported by State or local authorities.

Instruction.

Elementary education is compulsory. The number of children of school age (6-14) on March 31, 1915, was 9,061,921. The following are the educational statistics for 1918-19:—

Institutes	Number	Teaching Staff	Students and Pupils
Kindergarten	612	1,750	51,834
Schools for the Blind and Dumb	74	495	3,641
Elementary schools . .	25,625	172,979	8,137,347
Middle " "	337	6,991	158,974
Girls' High " " . .	420	5,287	118,932
Normal " "	94	1,915	27,078
Special & technical schools	704	9,050	160,922
Miscellaneous schools .	14,691	11,873	982,071
High schools	8	356	6,781
Universities	5	970	9,040

Japan has 5 Imperial universities, and 11 other institutions which in 1920 were admitted to university rank, making 16 in all, as follows:—

University	Location	Established	1919-20	
			Teachers	Students
Tokyo Imperial University	Tokyo	1877	417	5,233
Kyoto Imperial University	Kyoto	1897	191	2,052
Tohoku Imperial University	Sendai	1907	197	1,781
Kyushu Imperial University	Fukuoka	1910	90	630

Chū-ō University	Tokyo	1885	114	1,910
Nihon University	Tokyo	1890	79	1,370
Hōsei University	Tokyo	1889	57	2,700
Dōshisha University	Kyoto	1897	51	457
Kokugaku-in University	Tokyo	1890	58	200
Tokyo University of Commerce ¹	Tokyo	1875	59	1,290
Osaka University of Medicine ²	Osaka	1880	50	730
A-ichi University of Medicine ²	Nagoya	1877	58	560

1 Governmental.

2 Prefectural.

The Government will devote 44,000,000 yen to extend higher education, this sum to be a continuing expenditure extending over six years from 1919-20 to 1924-25. Of the total 39,500,000 yen is to be expended on the building and extension of schoolhouses and 4,500,000 yen on the training of teachers (especially abroad). The proposal is to establish, in addition to the higher educational institutions already in existence, 10 high schools, 17 technical and commercial schools, 1 foreign-language school, and 1 school of pharmacy, besides extending the present colleges and organising new ones. It is expected that the programme will be completely carried into execution in the course of six years and that teaching at the new institutions will commence in 1925. The Emperor has contributed the sum of 10,000,000 yen toward the necessary funds, and the balance is to be met by public bonds or temporary loans.

In 1918-19 there were 1,359 libraries in Japan, with 4,775,266 volumes (4,500,683 Japanese and Chinese, and 235,183 European). In 1918, 36,903 books of various kinds, and 3,123 periodicals, monthly, weekly, and daily, were published.*

In Formosa there is a special educational system.

Justice and Crime.

A system of justice founded on modern jurisprudence has been established. Judges are irremovable, except by way of criminal or disciplinary punishment. There are four classes of courts in Japan (exclusive of Formosa); namely, sub-district courts, district courts, courts of appeal, and court of cassation. In the court of cassation seven judges preside; in the courts of appeal eight judges; in the district courts three judges; in each case one of them being the chief judge. In the subdistrict courts a single judge presides. A court which deals with disputes respecting administrative affairs is under the direct supervision of the Emperor.

A few judges of high rank are directly appointed by the Emperor, and some are appointed by him on nomination by the Minister of Justice. The following are the criminal statistics for five years :—In 1910, 106,179 criminals were condemned; in 1915, 94,931; in 1916, 102,691; in 1917, 106,747; and in 1918, 108,592.

In 1918 there were 52 prisons, 1,210 detached prisons and houses of correction. Number of prisoners of all kinds, convicted and accused, and those in houses of correction at the close of 1918 :—Men, 57,181; women, 2,175; total, 59,356.

For the trial of cases connected with the military and naval services there are courts-martial.

Pauperism.

In 1899 new legislation settled that the minimum amount of prefectural funds for the relief of sufferers from extreme calamity shall be 500,000 yen; that funds below that limit are to be made up by the Treasury; and that when the amount of relief exceeds 5 per cent. of the funds at the beginning of the fiscal year, one-third of the amount thus granted is to be supplied from the Treasury.

The relief statistics for 3 years show expenditure as follows (in yen, exclusive of Formosa) :—

Year	Shelter	Food	Clothing	Medicine	Temporary lodgings	Providing with work	Total (including miscellaneous)
1916-17	1,370	30,439	5,385	191	21,294	26,886	87,117
1917-18	18,936	319,835	10,895	2,898	100,349	43,770	498,618
1918-19	14,317	245,843	8,287	2,319	53,878	52,622	380,707

In 1917 the Central Government relieved 5,892 persons to the amount of 115,855 yen (excluding Formosa). At the end of 1917, 1,608 foundlings (excluding Formosa) were being maintained, and the expense in that year was 64,960 yen. There are, besides, several workhouses established by local corporations and private persons.

Finance.

I. IMPERIAL.

Revenue and expenditure, ordinary and extraordinary (excluding Formosa) (the yen = about 24½d.) :—

—	1918-19	1919-20 ¹	1920-21 ¹	1921-22 ¹	1922-23 ¹
	Yen	Yen	Yen	Yen	Yen
Revenue . . .	902,273,000	1,061,204,000	1,319,202,000	1,563,000,000	1,465,000,000
Expenditure . .	902,273,000	1,061,204,000	1,319,291,000	1,563,000,000	1,465,000,000

¹ Estimates.

Summary of the budget estimates for the year ending March 31, 1921.

Revenue 1920-21	Yen	Expenditure 1920-21	Yen
Ordinary:—		Ordinary:—	
Land tax	73,720,649	Civil List	4,500,000
Income tax	181,522,179	Foreign Affairs	6,568,000
Business tax	43,277,294	Home Affairs	19,277,000
Liquor tax	132,445,486	Finance	157,287,000
Sugar excise	39,282,428	Army	93,989,000
Tax on Textile fabrics	39,530,930	Navy	60,842,000
Customs duties	66,326,726	Justice	16,319,000
		Instruction	21,749,000
Total Taxes ¹	613,986,979	Agriculture and Commerce	9,085,000
Stamps	66,047,074	Communications	92,485,000
Public Undertakings and State Property	288,959,895		
Posts and Telegraphs	160,537,787		
Forests	24,807,721		
Monopolies	89,522,578		
Total ordinary (including other receipts)	1,012,614,197	Total ordinary	482,100,000
Extraordinary Revenue	306,588,000	Extraordinary expenditure	837,191,000
Total Revenue	1,319,202,000 (131,920,200 ¹)	Total expenditure	1,319,291,000 (131,929,100 ¹)

¹ Including all items.

Public debt, December 31, 1920:—Internal loans (4 and 5 per cent.), 1,686,744,851 yen; foreign loans (4 to 5 per cent.), 1,428,293,532 yen; total, 3,115,038,383 yen.

II. LOCAL.

The revenue of the Prefectures for the year 1920-1921 was 214,067,062 yen, and expenditure 214,051,876 yen. Of the revenue 148,179,828 yen was from rates. The revenue of the cities in 1919-20 was 182,976,966 yen (38,856,053 yen from rates), and the expenditure was 165,851,113 yen. The revenue of the towns and villages in 1919-20 was 206,207,776 yen (139,911,573 yen from rates), and the expenditure was 206,035,666 yen. The total local debt at the end of 1919 was 397,026,755 yen (165,851,113 yen in 1918).

Defence.

I. ARMY.

Service in the army (or navy) is universal and compulsory. Liability commences at the age of 17 and extends to the age of 40, but actual service begins at 20. 'All those physically capable of bearing arms are divided into two classes, the 'fit,' and the 'absolutely fit.' The numbers necessary for the first line (or active army), called *Gen-eki*, are taken solely from the 'absolutely fit.' Service in the ranks is for 2 years in all arms; then for 5 (or 4) years and 4 months in the reserve (*Yobi*). One year volunteers are admitted. Reservists are called out twice for training during their reserve service, for 60 days on each occasion. Having completed 7 years and 4 months in the first line, including its reserve, the men are transferred to the second line, called *Kōbi*. Service in the *Kōbi* is for 10 years, with two trainings of 60 days each in the whole period. At the end of their *Kōbi* service the men are in the 38th year of their age, and they are passed into

the *Kokumin*, which is the territorial or home defence army. In this they serve for 2 years and 8 months, to complete their total service of 20 years.

The reserve for making good the waste of war, or *supplementary reserve*, is called *Hojū*. It is composed of the balance of the 'absolutely fit' recruits not required for the first line, and of as many of those classed as "fit" as may be required to make up a certain fixed number. They all serve in the *Hojū* for 7 years and 4 months, during which they have a first training of 90 days, and two subsequent trainings of 60 days each. After completion of this period of their service they are passed to the *Kōbi*, in which they serve for ten years, like the men who have passed through the first line. Like them also they are finally passed to the *Kokumin* for 2 years and 8 months to complete their army service.

The *Kokumin* is divided into two 'bans.' The first ban comprises all the men who have passed, as shown above, through the first line and *landwehr*, or through the supplementary reserve and *landwehr*, and who therefore have only 2 years and 8 months to spend in the *Kokumin*. The second ban is the levy *en masse* of all those capable of bearing arms. It includes (1) those who though 'fit' are not required for the *Hojū*; (2) those who for various reasons have been exempted from military service; and (3) the young men between 17 and 20 years of age who have not been called up. None of these classes receive any military training, but they can be drawn on in case of national emergency.

The partially trained men who have been passed into the *Kōbi* from the *Hojū* are not included in the fighting units of the Second Line. They supply the large number of men required for the transport service on mobilisation, and for the expansion of other departmental corps.

The field army of Japan consists of 24 divisions, including the guard, 4 independent cavalry brigades, 3 independent brigades of field artillery (each of 12 batteries of 6 guns), 3 independent groups of mountain guns, and 10 regiments of heavy field artillery, each of 24 guns.

Two infantry regiments form a brigade, and two brigades (12 battalions) a division. The divisional artillery consists of a regiment of field artillery (6 batteries of 6 guns) supplemented by heavy or mountain guns as required (also probably by 3 batteries of *Kōbi* artillery). A regiment of cavalry of 3 squadrons, with 4 machine guns, and a battalion of engineers, complete the division. Four infantry, and 4 artillery, ammunition columns, 6 field hospitals, 4 supply columns, and 1 remount *dépôt* accompany each division in the field. The war strength of a division is reckoned at 18,700 officers and men, 4,800 horses, 36 guns, and 1,674 vehicles.

The strength of an independent brigade of cavalry is 2 regiments, each of 4 squadrons and a battery of 8 machine guns; total about 1,650 men and 1,680 horses. The strength of an independent artillery brigade of 12 batteries is about 2,500 men and 1,000 horses. Divisions are grouped directly into armies, 3 to 5 divisions forming an army of from 80,000 to 180,000 men. The war strength of the army on mobilization may be taken at about 700,000 combatants, including *Kōbi* troops detailed for the lines of communication.

The active army consists at present of 88 regiments (264 battalions) of infantry, 27 regiments of cavalry (89 squadrons), 168 field batteries, 9 mountain batteries, 19 battalions of garrison artillery, 19 battalions of engineers each of 3 companies, 12 railway companies, 6 telegraph companies, 1 aero battalion, and 38 companies of train troops.

The *Kōbi* comprises 228 battalions, 57 squadrons, 114 field batteries, 12 battalions of garrison artillery, and 19 battalions of engineers, and would on mobilisation form independent divisions.

The Japanese Islands are divided into military districts, corresponding to the divisions of the army, and the district is the unit of administration as well as of territorial command. Each division is supplied with recruits from its own district, except the Guards, whose infantry recruits are selected from the whole country; the other arms of the Guard division are recruited from the large district of the 1st division. Abroad there are the separate division of Formosa, and the small garrison of Saghalien, also some 25,000 to 30,000 men in Korea and Manchuria. Between July and November, 1918, 60,000 men were dispatched to Siberia. The garrison of Siberia was at the end of 1921 about 40,000, and there was 4,500 Japanese troops in China.

The Emperor is the head and supreme commander of the army, and also of the navy. He nominates the War Minister (always a general officer of high rank), the Chief of the General Staff, the Director of Military Schools, and the Members of the Military Council.

The arm of the Japanese infantry is the improved Arisaka rifle; calibre, 6.5 mm. (.256"), a Mauser with an altered chamber. The cavalry are armed with a carbine of similar construction. The field gun is a q.-f. shielded Krupp of 7.5 cm. calibre, which fires a shrapnel of 14.3 lb. The mountain artillery has a gun of the same calibre firing a lighter shell. There are a certain number of field howitzer batteries, armed with 4.6" and 5.9" howitzers, firing shells of about 44 lb. and 80 lb. respectively. A 4" gun for heavy field batteries is being introduced.

No returns of the peace strength of the Japanese army are published, but the total apparently amounts to rather over 300,000 of all ranks.

The military budget for 1921-22 amounted to 761,780,780 yen.

II. NAVY.

The direction of the Navy is in the charge of the Minister of Marine. The departments are those of the chief of the staff, with Operations, Mobilization, and Intelligence branches; the Administrative division; the Departments of Naval Construction and Material, Naval Engineering and Naval Works.

The coast of Japan is divided into five maritime districts having their headquarters at Yokosuka, Kure, Sasebo, Maizuru, and Chinkai.

The Japanese Fleet is profoundly affected by the Washington Agreement. It was being expanded in pursuance of the programme of 1916-17, supplemented by a new programme which was sanctioned in 1920, but had not been put in hand. The plan was to provide a strength of 8 battleships and 8 battle-cruisers, not any one of which should be of greater age than 8 years. Four battleships had been put in hand, as well as four battle-cruisers, of which the last was laid down in February 1920, but 2 of the battleships and the 4 battle-cruisers will not be completed. The 1920 programme included 4 additional battleships and 4 battle-cruisers, as well as 12 light cruisers in addition to 8 of the 1916 programme, and destroyers and submarines, all to be completed by 1927-28, but the programme has been cancelled so far as capital ships are concerned. It is anticipated that in 1923 or 1924 Japan will possess 44 first-class destroyers (several of them of the class of flotilla leaders), 78 second-class destroyers, and about 46 of a smaller class. Full information regarding the submarines is not accessible but the Japan Year Book says there will be 80 of the first-class by 1927, in February 1922 about 30 were in hand, with a gross displacement of 22,165 tons.

The principal state dockyards are at Kure and Yokosuka, where capital ships are built, and there is a dockyard also at Sasebo, where lighter vessels

are constructed. The Kawasaki private shipbuilding yard at Kobe and the Mitsubishi establishment at Nagasaki have received new plant, and there are lesser building yards at Maizuru, Uraga and elsewhere, as well as the government armour and armament factory at Kure. Japan has thus made herself practically independent of Europe for the building and arming and equipment of her warships. Experience has been gained of the finest English shipbuilding work, and now every class of vessel is built in Japan. The Navy is highly scientific and modern in every respect. The officers are energetic and capable, and the men are of the best class.

A statement of the Japanese fleet similar to that given for other navies is:—

	Completed at end of		
	1920	1921	1922
Dreadnoughts	9	11	10
Pre-Dreadnoughts	13	13	—
Armoured Cruisers	12	12	5
Light Cruisers	13	13	13
Torpedo Gunboats, Scouts, etc.	4	4	4
Destroyers	100	105	120
Torpedo Boats	26	30	19
Submarines	43	40	38

The following table includes all the battleships and battle-cruisers which are to be retained, and the armoured cruisers and principal protected cruisers. None of the pre-Dreadnoughts are now counted effective. Some of the armoured cruisers have been removed, and some of the older destroyers, torpedo boats and submarines. Ships shown in *Italic type* are not expected to be completed in 1922.

Laid down	Name	Displace- ment	Armour		Main Armament	Torpedo Tubes	Indicated Horse-power	Designed Speed

The *Ayase*, *Otonose*, *Abukama*, *Kinu*, *Minase* and *Yura*, light cruisers of the 5,500 ton class, are in early stages of construction. There are the older light cruisers *Yodo*, *Suma*, *Akashi*, and *Chitose*, and several torpedo gunboats. A seaplane carrier is being built. There is a large air service attached to the Navy.

The budget estimate for 1921-22 for the cost of the Navy is approximately £62,756,000.

Production and Industry (exclusive of Formosa).

About three-fifths of the arable land is cultivated by peasant proprietors and the remaining portion of it by tenants. According to the official report of January 1, 1920, taxed land owned by private persons and local corporations was in chō (1 chō = 2,450.7 acres) 15,286,246; of which under rice fields, 2,922,575; other cereals, 2,501,785; forests, 8,048,889; plains, 1,336,545; pasturages, 50,966.

The forest area in 1918 was 18,783,516 chō, of which 7,288,261 belonged to the State, and 1,303,118 to the Imperial household.

The following are some agricultural statistics for three years :—

Crop	Acreage			Produce (quarters)		
	1917	1918	1919	1917	1918	1919
Rice . . .	7,554,807	7,569,860	7,761,527	34,099,600	34,187,600	38,011,352
Wheat . . .	1,392,219	1,392,000	1,371,267	4,241,757	4,058,420	3,975,529

Antimony (kin ²) . .	2,690	287			

¹ 120 mommé = 1 lb. avoirdupois.

² kin = 1·323 lb. av.

³ kwan = 8·28 lbs.

⁴ koku = 39·7 gall.

In 1918 the number of mining workers was as follows :—in collieries, 287,159 ; in metal mines, 160,960 ; various, 16,608 ; total, 464,727.

In 1919, 6,294,736 cocoon egg-cards were hatched, and the total number of cocoons obtained was 7,221,990 koku ; in 1920, 6,332,000 koku (1 koku = 4·9 bushels).

The industrial census on December 31, 1918, showed that there were 22,391 factories (employing more than 10 hands). Number of employees, 1,409,196 (646,115 males and 763,081 females).

Principal manufactures in 1918 were woven goods, 1,189,271,699 yen (cotton, 624,216,447 yen ; silk, 377,898,661 yen ; woollen goods, 85,938,320 yen) ; Japanese paper worth 53,932,699 yen ; European paper, 103,087,117 yen ; matches, 39,689,159 yen ; earthenware, 44,214,084 yen ; lacquered ware, 16,190,745 yen ; matting, 19,272,285 yen ; leather, 34,713,374 yen ; oil, 54,404,200 yen ; knittings, 68,589,804 yen.

In March 1921 there were 50 cotton spinning companies operating in Japan, with 2,043,775 working spindles and employing 35,289 men and 105,895 women.

In 1918 the raw marine products amounted to the value of 171,185,081 yen ; the manufactured products to the value of 112,213,553 yen.

The recorded values are ascertained from shipping documents and invoices, in the case of exports being given as the market values in Japan, and of imports as the values in the countries of purchase, inclusive of the cost of transport, insurance, &c. The prime origin and ultimate destination, as far as they are known, are recorded as disclosed in the shipping documents.

Chief articles of the foreign commerce, excluding re-imports and re-exports :—

Imports	1920	1921	Exports	1920	1921
	Yen	Yen		Yen	Yen
Rice	18,085,000	28,808,000	Cotton yarn	153,013,000	80,568,000
Beans and Peas	47,648,000	24,680,000	Cotton tissues	334,975,000	203,686,000
Sugar	60,220,000	69,812,000	Raw silk	383,576,000	418,080,000
Raw cotton	721,433,000	438,169,000	Silk waste and Floss		
Crude India Rubber	13,417,000	15,718,000	Silk	27,541,000	10,367,000

Hides and Skins	19,371,000	8,377,000	Coal	45,200,000	37,765,000
Wool	121,625,000	32,199,000	Toys	21,186,000	7,084,000
Woollen tissues	31,782,000	31,244,000	Matches	28,453,000	16,242,000
Coal	19,913,000	14,092,000	Copper	12,689,000	8,255,000
Oil cake	150,909,000	94,473,000	Camphor	4,965,000	2,872,000
Petroleum	21,270,000	16,721,000	Iron	14,742,000	7,079,000
Iron, bars, rods, plates, &c.	201,152,000	115,333,000	Tea	17,112,548	7,717,000
Saltpetre	24,740,000	2,598,000	Rice	6,051,000	3,449,000
Machinery	110,921,000	120,265,000	Glassware	23,239,000	9,993,000
Flax and Hemp	15,326,000	14,728,000	Earthenware	31,456,000	20,796,000
Pulp	13,185,000	8,822,000	Machinery	17,153,000	13,587,000
Cotton tissues	17,359,000	9,859,000	Refined sugar	30,596,000	15,800,000

The imports of bullion and specie (gold and silver) in 1920 amounted to 404,735,000 yen, and exports to 3,898,000 yen; in 1921, imports, 138,622,000 yen; exports, nil.

SHIPPING, ETC.—INTERNAL COMMUNICATIONS 1071

The staple articles of import from Japan into Great Britain (Board of Trade returns) in the year 1920 were silk manufactures, 4,724,036*l.*; straw plaiting, 2,044,999*l.*; unwrought copper, 485,145*l.*; wheat, 3,602,860*l.*; paper, 185,760*l.*; soya beans, 319,286*l.* The staple articles of British export to Japan consist of cotton goods of the value of 2,169,713*l.*; cotton yarn, 354,019*l.*; woollen goods, 5,102,306*l.*; iron, wrought and unwrought, 5,670,184*l.*; machinery, 4,179,698*l.*; hats, 52,647*l.*; cycles, 514,033*l.*

Total trade between Japan and U.K. for 5 years in thousands of pounds sterling :—

—	1917	1918	1919	1920	1921
Imports from Japan to U.K.	15,298	23,872	23,871	29,699	8,734
Exports to Japan from U.K.	5,521	6,039	12,913	26,093	21,369

Shipping and Navigation.

Shipping movements at Japanese ports for 2 years :—

	Entered				Cleared			
	1918		1919		1918		1919	
	No.	Tons	No.	Tons	No.	Tons	No.	Tons
Steam . . .	9,881	17,771,848	12,435	22,743,173	10,091	18,211,147	12,469	23,038,227

Of the total steamships entered in 1920, 1,121 vessels of 4,781,888 tons were British; 143 of 189,889 tons Russian; 27 of 95,890 tons Norwegian; 804 of 3,148,126 tons American; 51 of 266,930 tons French; and 9,802 of 16,756,868 tons were Japanese.

On December 30, 1919, the merchant navy (without Formosa) consisted of 2,870 steamers of 2,840,650 tons gross; 13,781 sailing vessels of European style, of 945,033 tons; and 925 sailing vessels of Japanese style, of 295,931 koku. The Japanese Government subsidises shipping companies for foreign trade, and now Japanese vessels run on four great routes to Europe, North America, South America, and Australia. There are also lines plying between Japanese ports and Korea, Northern China, and nine ports on the Yangtse-Kiang.

Internal Communications.

The first railway in Japan was built in 1872, between Tokyo and Yokohama, a distance of 18 miles. By 1880 there were 73 miles of railway in operation; by 1900, 3,638 miles; by 1910, 5,130 miles. The following table gives the railway statistics (including, except revenue and expenditure, Formosa) for 1920 :—

—	State Railways	Railways owned by Private Companies	Total
Length in miles . . .	6,202	2,005	8,207
Gross income, yen . . .	373,035,431	28,671,794	406,707,225
Expenditure, yen . . .	308,633,750	18,078,809	326,712,559
Goods carried, tons . . .	2,648,965	12,358,207	15,002,174
Passengers, number . . .	357,881,957	109,681,017	467,562,974

It has been decided to make the standard gauge 4·85 feet. The work is expected to be completed in 1943, and the cost estimated at 1,408,000,000 yen. Japan has been conceded by China the right to build five railway lines in Manchuria and Mongolia. A railway tunnel under the MojiShimonoseki Straits was commenced in 1920 and is expected to be completed in 1928. The tunnel will connect the island of Kiushu with Honshu. The whole length of the tunnel will be 7 miles, of which one mile will be completely under the sea. Comprehensive plans have been made for the electrification of the Japanese Government railways. The first section to be electrified will be the Tokaido line, 408 miles, from Tokyo to Kobe.

There are (1919) 732 miles of electric tramway in Japan.

The following are postal and telegraphic statistics for four fiscal years :—

—	1915-16	1916-17	1917-18	1918-19
Letters	1,888,002,000	2,043,602,000	2,362,802,000	2,783,803,000
Postcards

Money and Credit.

Coinage issued in the fiscal years stated (ending 31st March) :—

—	1915-16	1916-17	1917-18	1918-19	1919-20
	Yen	Yen	Yen	Yen	Yen
Gold coins	26,805,860	60,559,370	141,830,802	24,522,102	33,405,394
Silver "	1,020,000	6,700,000	7,100,000	14,200,000	7,595,000
Bronze "	130,000	250,000	470,000	1,830,000	1,930,400
Nickel "	—	200,000	200,000	500,000	3,240,000
Total	27,955,860	67,709,370	149,600,802	41,052,102	46,170,794

The total amount of coins in circulation at the end of 1919 saw 212,589,701 yen ; notes, 1,874,011,000 yen (1,550,000,000 yen at the end of 1921). On December 31, 1920, the gold stock of Japan was 2,183,000,000 yen, of which 889,000,000 yen were held by the Government and 1,294,000,000 yen by the Bank of Japan.

The modern banking system dates from 1872. The principal banks of Japan are the Nippon Ginko (Bank of Japan), the Yokohama Specie Bank, the Hypothec Bank, the Industrial Bank of Japan, the Hokkaidō Colonisation Bank, the Bank of Taiwan. There are also (1918) 46 agricultural and industrial banks, 1,375 ordinary banks, and 661 savings banks. The condition of the banks (ordinary, saving and special) for three years (December 31st) was as follows.

Year	Paid-up Capital	Reserve Fund	Deposits	Net Earnings	Rate of Dividend
	Yen	Yen	Yen	Yen	Yen
1917 . .	775,771,205	296,615,816	5,369,552,379	180,537,025	7·96
1918 . .	924,047,987	335,525,641	8,208,827,487	223,198,855	8·12
1919 . .	1,248,947,014	370,838,713	9,340,900,002	310,548,533	8·9

The total postal bank savings on December 31, 1920, amounted to 692,739,451 yen, the number of depositors being 19,490,008.

Money, Weights, and Measures.

The present monetary law came into force from October, 1897, by which gold standard was adopted. The unit of value is 0·75 gramme of pure gold, and is called the yen = 2s. 0½d., which, however, is not coined. The pieces coined are as follows:—Gold coins (20, 10, and 5 yen pieces), silver coins (50, 20, and 10 sen pieces), nickel coin (5 sen piece), and bronze coins (1 sen and 5 rin pieces). The sen is the hundredth part of a yen, and the rin is the tenth part of a sen. The gold coins are ·900 fine, and the silver coins ·800 fine. The gold coins formerly issued (20, 10, 5, 2, and 1 yen pieces) are used at double their face value. The one-yen silver coin formerly issued is withdrawn. The old copper 2, 1 and ½ sen pieces, are used as formerly.

The <i>Kin</i>	= 160 <i>momme</i>	. . .	= 1·323 lb. avoirdupois.
„ <i>Kwan</i>	= 1,000 „	. . .	= 8·267 lbs. „
„ <i>Sun</i>	= 1·193 inch.
„ <i>Shaku</i>	(10 <i>sun</i>)	. . .	= 11·931 inches.
„ <i>Ken</i>	= 6 <i>shaku</i>	. . .	= 5·950 feet.
„ <i>Chō</i>	= 60 <i>ken</i>	. . .	= ½ mile, 5·4229 chains.
„ <i>Ri</i>	= 36 <i>chō</i>	. . .	= 2·44 miles.
„ <i>Ri sq.</i>	= 5·9552 sq. miles.
„ <i>Chō</i> , land measure	= 2·45 acres.
„ <i>Koku</i> , liquid	= 39·7033 gallons.
„ „ dry	= 4·9629 bushels.
„ <i>To</i> , liquid=1½ <i>koku</i>	= 3·9703 gallons.
„ „ dry	= 1·9851 peck.

The metric system was made obligatory by a law passed in March, 1921. The following rates are recognised:—

metre	= 3·3 <i>shaku</i> .
gramme	= 0·26667 <i>momme</i> (⅓ <i>momme</i>).

Diplomatic Representatives.

1. OF JAPAN IN GREAT BRITAIN.

Ambassador Extraordinary and Plenipotentiary. — His Excellency Baron Gonsuké Hayashi, G.C.V.O. Born in 1861. (Appointed May 27, 1920.)

Councillor. — Matsuzo Nagai, C.V.O., C.B.E.

First Secretary. — Iyemasa Tokugawa, O.B.E.

Second Secretaries. — Takezo Okamoto, Gicho Nishisawa, and Ken Asaoka.

Third Secretaries. — Kanekazu Okada, Kojiro Inoué, Suémasa Okamoto, Katsusaburo Sasaki, and Kiyoshi Yamagata.

Attachés. — Yakichiro Suma, Toyozo Kawanishi, and Asanosuke Kimura.

Naval Attaché.—Captain Seizo Kobayashi, C.B.

Military Attaché.—Major-General Matsuo Itamy, K.C.V.O.

Financial Attaché.—Kengo Mori, C.B.

Chancellors.—Hikogoro Yunoki, and Saburo Kasawara.

Consul-General in London.—Kihei Ota.

There are Consuls at Glasgow, Liverpool, and Middlesbrough.

2. OF GREAT BRITAIN IN JAPAN.

Ambassador and Consul-General.—Rt. Hon. Sir Charles N. E. Eliot, K.C.M.G., C.B., appointed September, 1919.

Counsellor.—H. Gurney, C.M.G., M.V.O.

Secretaries.—J. H. S. Birch, Count J. A. de Salis, and K. T. Gurney.

Naval Attaché.—Captain John P. R. Marriott, C.M.G.

Military Attaché.—Major J. W. Marsden.

Japanese Counsellor.—H. G. Parlett.

Commercial Counsellor.—E. T. F. Crowe, C.M.G.

There are Consular Representatives at Dairen (Dalny), Hakodate, Kobé, Nagasaki, Shimonoseki, Yokohama, and at Tainan and at Tamsui in the Island of Formosa.

KOREA (CHÖSEN).

Government.—The ex-Emperor, whose surname is Yi and name Chök, was born March 25, 1874, and succeeded his father, Yi Hiung, on his abdication, July 20, 1907. He is reckoned as the thirty-first in succession since the founding of the dynasty in 1392; but four of the so-called Kings were Crown Princes who never ascended the throne.

For details of treaties between Japan and China, Russia, and Korea from 1895, see *THE STATESMAN'S YEAR-BOOK* for 1916, p. 1112.

By a treaty concluded between Japan and Korea on August 22, 1910, the Korean territory was formally annexed to the Empire of Japan. The Emperor was deprived of all political power, and was accorded the title of Prince Yi, and his father (the former ex-Emperor), who died in January, 1919, that of Prince Yi, Senior. The title of the country was changed back to "Chösen," from Tai Han, which had been adopted in 1897, and the office of Japanese Governor-General established. Henceforth Korea became an integral part of the Japanese Empire. By an Imperial Rescript of 1919, Korea is to be treated as in all respects an integral part of Japan, Koreans to be on the same footing as Japanese. Members of the Korean Imperial House and the late Korean Cabinet have had Japanese patents of nobility conferred upon them. In 1919 certain changes were introduced with a view to assimilate more closely the Korean administration with that of Japan.

Governor-General.—His Excellency Baron Saito (September, 1919).

Area and Population.—Estimated area, about 85,183 square miles. Census population 1920, 17,264,119 (8,903,000 males and 8,361,119 females). The vast majority of the foreign residents are Chinese, numbering some 18,588 at the end of 1919. The latest returns give the number of British subjects as 257, Americans 597, French 107, and Germans 57. The urban prefecture of Seoul has 247,467 inhabitants (64,630 Japanese), and that of Ping-Yang 58,630. There has been a large immigration of Japanese into the Peninsula of recent years.

The language of the people is intermediate between Mongolo-Tartar and Japanese, with a large admixture of Chinese words, and an alphabetical system of writing is used. Official correspondence, except with Korean provincial officials, is conducted in Japanese. The written language of the people is a mixture of Chinese characters and native script.

Religion and Instruction.—The worship of ancestors is observed with as much punctiliousness as in China. In the country there are numerous Buddhist monasteries, which, however, are looked upon with scant respect. The knowledge of Chinese classics and of Confucian doctrine, formerly essential to the education of the upper classes, is giving way under Japanese influence to a more practical system of instruction. There is a large number of Christian converts. In 1890 an English Church mission was established, with a bishop and 20 other members. The American missionaries have two hospitals in Seoul, where the Japanese have also established a large Government hospital. The total number of hospitals in the country was 177 on December 31, 1920; while the Red Cross Society has a numerous membership (about 35,900) among both Japanese and Koreans. There are over 250 Protestant missionaries (British and American), and 60 Roman Catholic, also a Russian Greek Church mission in Seoul.

There are numerous Christian Mission schools for boys and girls throughout the country. All these schools are subject to the control of the Education Department. Technical and industrial schools are rapidly springing up. A model farm and agricultural school has been established at Suigen. In 1919 there were 996 public schools of all sorts, with 132,848 pupils; other schools, 24,720, with 310,895 pupils.

In Seoul there are three daily Korean newspapers, and 2 Japanese, besides others published at Chemulpo and in other parts of the country. There is a Government-owned daily newspaper in English, published at Seoul. The Press is entirely in the hands of the Japanese, and a strict censorship is exercised.

Finance.—The finances of Korea form a special account in the Budget of Japan. The estimated revenue for two years is shown as follows (1 yen = 2s. 0½d. nominally):—

Revenue.		1920-21	1921-22	Expenditure.		1920-21	1921-22
		Yen	Yen			Yen	Yen
Ordinary	60,347,820	96,061,601	Ordinary	67,050,142	101,415,683
Extraordinary	54,597,837	60,880,088	Extraordinary	45,413,906	55,526,006
Total	123,945,657	156,941,689	Total	113,464,048	156,941,689

The main sources of revenue are taxes and public undertakings.

The total debt on December 31, 1920, was 142,570,930 yen.

Production.—Korea is almost entirely an agricultural country; the cultivated area is about 10,599,000 acres. The chief crops are rice, wheat, beans, and grain of all kinds, besides tobacco and cotton. The rice crops for 5 years were (in bushels):—1915, 63,776,089; 1916, 69,149,878; 1917, 67,938,346; 1918, 68,622,018; 1919, 62,561,761; 1920, 73,859,654. Whale fishing is carried on the coast. Live-stock is raised as a by-product of agriculture. The cattle are well known for their size and quality.

Gold mining is carried on and promises to be successful. There are four foreign-owned gold mines in active operation. Copper, iron, and coal

are abundant in Korea, but the development of these resources is impeded by defective means of communication. An anthracite coal mine in the north of Korea is in operation. Graphite and mica also are found in considerable quantities. The total value of mineral products in 1920 was 24,245,100 yen. The government has the monopoly of salt and tobacco.

Commerce.—The open ports are Seoul, Chemulpo, Fusan, Wousan, Chinnampo, Mokpo, Kunsan, Songchin, Ping-Yang (inland city), Wiju, Yong-Am-Po (1908), Yuki, Chung-jin and Shin-wi-ju.

Trade (merchandise only) at the open ports:—

—	1916	1917	1918	1919	1920
	Yen	Yen	Yen	Yen	Yen
Imports	74,456,805	102,886,736	158,309,363	280,786,318	238,956,413
Exports	56,801,934	83,775,387	154,189,148	219,665,781	191,858,694

The imports in 1920 included cotton goods, 30,672,623 yen; cotton yarn, 3,246,329 yen; machinery, 6,538,058 yen; silk goods, 906,890 yen; timber, 3,322,005 yen; kerosene oil, 7,926,203 yen; grass cloth, 8,125,274 yen; sugar, 4,403,505 yen; paper, 4,462,182 yen; coal, 17,016,492 yen. The principal exports were rice (1919), 110,030,878 yen; beans, peas, pulse (1919), 23,068,301 yen; hides (1920), 3,170,965 yen; cattle (1920), 4,950,069 yen; gold ore (1920), 1,176,636 yen. Of the total imports in 1920, the value of 143,111,717 yen was from Japan; of the exports, the value of 169,389,887 yen was to Japan. From Great Britain and the United States of America respectively, imports amounted to 4,931,944 yen and 19,238,041 yen.

Shipping and Communication.—The foreign-going shipping entered at the open ports in 1920 had a tonnage of 736,346, and those that cleared a tonnage of 733,187.

Transport in the interior is by porters, pack-horses and oxen, and by river. Improvements in road making are being effected. There are about 1,400 miles of road. Length of railways, 1920, 1,152 miles; number of passengers carried (1919-20), 12,184,485. The Korean system of railways is now connected with the Siberian and Chinese lines.

A street electric railway in Seoul has been extended in four directions to points three miles outside the city. Number of post offices (1920) 562. There are 4,860 miles of telegraph line open, and the lines connect with the Japanese and the Chinese systems. The telephone has been introduced at Seoul, Chemulpo, and several other towns; length of lines 3,258 miles.

Money.—Regulations for banking were framed in 1906. In 1920 there were 15 ordinary banks with 8,900,000 yen paid-up capital.

A central bank, the Bank of Chōsen, was established in August, 1909, and in November it took the place of the First Bank of Japan (Dai-Ichi-Ginko) as the Government Treasury. Notes of this bank are permitted to circulate unrestrictedly within the jurisdiction of the Government-General of Chōsen and are exchangeable with gold coin and convertible notes issued by the Bank of Japan. The Bank of Chōsen has a paid-up capital (1920) of 50 million yen, the deposits amounting to 185,884,266 yen (June 30, 1921). Notes issued to June 30, 1921, 98,600,000 yen. Against their issue must be provided a reserve of the same amount, consisting of gold coin, gold and silver bullion, and convertible notes of the Bank of Japan; silver bullion, however, must not exceed one-fourth of the total reserve. The savings bank in 1919-20 had 1,406,259 depositors with a total amount 14,926,990 yen.

The coinage consists of gold pieces of 5-, 10-, and 20-yen, silver of 10-, 20-, and 50-sen, nickel of 5-sen, and bronze of 1-sen and 5-rin. The old nickel coin has been practically wholly withdrawn from circulation, and the cash currency is now used only for petty transactions. Under certain regulations, bills of exchange and cheques may pass into the currency. In the more important commercial towns there are authorised 'note associations' of merchants for the transaction of business relating to bills.

British Consul-General at Seoul.—A. Hyde Lay, C.M.G.

Vice-Consul at Seoul.—W. B. Cunningham.

FORMOSA (TAIWAN).

THE Island of Formosa, or Taiwan, was ceded to Japan by China by the treaty which was ratified on May 8, 1895, and Japan took formal possession on June 2 of the same year. Japanese civil government in the island began on March 31, 1896.

The Island has an area of 13,839 square miles, with a population (1918 of 3,669,687 (1,899,474 males and 1,770,213 females). Census population 1920, 3,654,398. The chief towns are Taihoku (107,706 inhabitants in 1919), Tainan, Kagi and Taichu.

Many improvements have been effected by the Japanese administration. A colonising scheme was commenced in 1909, whereby Japanese were settled in Taiwan. There are four villages containing (1916), 652 families consisting of 3,268 persons. An educational system has been established for Japanese and natives, for whom there are (1918) 576 elementary and other schools with 2,334 teachers and 132,963 pupils. There are also normal schools, a medical school, and a school for teaching the Japanese language to natives, and native languages to Japanese.

The receipts of the Japanese administration are from inland taxes, customs, public undertakings, and also subsidies from Japan ranging from 5 to 9 million yen annually. The expenditure is chiefly for internal administration and the working of public undertakings.

¹ Estimates.

The agricultural products of Formosa are rice, tea, sugar, sweet potatoes, ramie, jute, turmeric; while camphor is worked in the forests under a Government monopoly. The production of camphor was in 1917-18, 4,297,662 lbs.; in 1918-19, 3,122,733 lbs.; in 1919-20, 2,933,333 lbs.; in 1920-21, 4,000,000 lbs. Production of rice in 1921, 24,625,422 bushels; production of sugar 1921-22, 5,564,739 piculs, produced on an area of 561,415 acres. There are active fisheries. The number of animals is estimated as follows:—sheep, 91; goats, 98,665; cattle, 130,000; caribou, 708. The industries comprise flour-milling, sugar, tobacco; oil, spirits, iron-work, glass, bricks, soap, and many other manufactures. Mining is making steady progress; the output of coal in 1918 was 801,520 tons. In 1919, the area planted with sugar was 286,348 acres, and the yield 6,868,779,686 pounds. There are 60 sugar mills in Taiwan.

1078 . JAPAN : HOKOTO—SAKHALIN—KWANTUNG

The commerce of Formosa is largely with Japan, the chief foreign countries with which there is traffic being China and the United States. In 1919 the imports from Japan amounted to 90,572,432 yen; exports, 142,208,290 yen. The chief exports in 1919 were tea, 8,208,664 yen; sugar, 7,542,252 yen; camphor, 3,073,735 yen; coal, 8,037,334 yen. The chief imports were opium, 6,433,950 yen; rice, 7,728,376 yen; oil-cake, beans and tea-seed, 10,260,723 yen.

In 1919, 2757 vessels, of 1,117,899 tons entered and cleared the ports of Taiwan.

Roads have been and are being constructed throughout the Island. There were, in 1920, 378 miles of railway open. In 1920 there were 168 post offices, through which passed 49,009,142 packets and 770,018 parcels. The telegraph service has 165 offices; length of line 692 miles; of wire, 3,082 miles; messages (1919), 2,388,891. Telephone line, 987 miles; calls, 30,376,783.

At the end of 1920 the post office savings bank had 396,578 depositors with 6,313,142 yen to their credit.

The coinage current in the Island is that of Japan.

Hokotō, or the **Pescadores**, consist of about 12 islands, with a total area of about 50 square miles.

Japanese **Sakhalin** (or **Karafuto**) consists of that portion of Sakhalin which lies to the south of the parallel of 50° north latitude. It has an area of about 13,148 sq. miles, and, in 1918, a population of 79,131 (44,460 males and 34,671 females). Census population, 1920, 105,765. The most important industry of the island is the herring fishery, but large areas are fit for agriculture and pasturage, and Japanese settlers have been provided with seed and domestic animals. There is a vast forest area of larch and fir trees. The minerals found are coal and alluvial gold; coal raised in 1918, 104,695 tons.

The revenue for 1921-22 is estimated at 13,953,806 yen, and expenditure the same.

The leased Territory of **Kwantung**, the southern part of the Liaotung Peninsula, has an area of about 538 sq. miles, and a population (December 31, 1919) of 600,644 (341,673 males and 258,971 females), of whom 534,849 (228,834 females) are Chinese and 65,692 (30,093 females) Japanese (exclusive of army and navy). The Territory is under a Japanese governor-general, the seat of administration being at Dairen (or Tairend, formerly called Dalny), where in 1915 there were 77 schools with 14,984 pupils; also an American Presbyterian Mission with a church and a hospital.

The estimated revenue and expenditure for 1921-22 balance at 15,947,658 yen.

The chief agricultural products of the Territory are maize, millet, beans, wheat, buckwheat, rice, tobacco, hemp, and various vegetables. There is an active fishing industry. The chief manufactured product is salt, which is abundant in the Territory. Since July 1, 1907, the Territory forms a Customs district under the Chinese Imperial Customs, Dairen being the Customs port, with out-stations at Kinchow, Pulantien, Pitzewo, and Port Arthur. The

port is free, goods being subject to duty only on crossing the frontier of the leased territory. The trade is mostly with Japan and China. Imports (1919), 107,186,929 haikwan taels (tael=about 4s. 4d.); exports, 103,733,007 yen. Dairen has a fine harbour, ice-free all the year, and protected by a breakwater 1,000 yards long. The harbour is provided with sheds and warehouses, under the control of the South Manchuria Railway Company. The railway connects Port Arthur and Dairen with Mukden, Kharbin, and the Eastern Chinese Railway System. In 1919 its total length was 687 miles.

Gold and silver coin and the notes of the Yokohama specie bank are current.

Kiau-Chau.—Kiau-Chau, on the east coast of the Chinese province of Shan-tung, was seized by Germany in November, 1897; the town, harbour, and district were by treaty transferred to Germany on a 99 years' lease, March 6, 1898; and the district was declared a Protectorate of the German Empire, April 27, 1898. In November, 1914, the territory was captured by Japanese and British forces, and is now administered by Japan under a mandate.

Area, about 200 square miles, exclusive of the bay (about 200 square miles). There are 33 townships, and a population of about 227,000. Surrounding the district and bay is a neutral zone, whose outer limit is 30 miles from highwater mark on the coast of the bay, its area being about 2,500 square miles, and population about 1,200,000. At Tsing-Tau there is one middle school, one girls' high school, 2 higher primary schools, 2 schools for teaching Chinese to the Japanese, with a total of 152 teachers and 3,336 pupils in 1921. There are also 37 public schools for Chinese pupils, with 236 teachers and 3,293 pupils. For the year 1914 the revenue was estimated at 403,000*l.* and the expenditure 920,500*l.*

The products are wheat, fruits, beans, ground-nuts, sweet potatoes, &c., and silk culture, coal mining, briquette-making, brewing, soap-making are carried on, and there is a prosperous silk factory. Over 1,000 Chinese were employed on the floating dock. At Kiau-Chau in 1920 the imports amounted to 65,533,521 Mexican dollars and the exports to 55,784,618 dollars. The chief imports were cotton goods, cigarettes, petroleum and lumber. The chief exports were ground nut, wheat, tobacco leaf, coal, beef, and hides. In 1920 1,283 steamers of 1,385,469 tons entered and cleared at Kiau-Chau. Of this total 1,016 steamers of 904,946 tons were Japanese and 138 steamers of 302,046 tons British. A railway, Tsing-Tau to Tsinan, is 277 miles long.

The number of Japanese residents (exclusive of the military) was on July 31, 1921, 28,043 (14,984 males and 13,059 females).

On August 6, 1915, an agreement was entered into between the Chinese and Japanese Governments providing for the re-opening of the Chinese Maritime Customs at Tsing-Tau on conditions similar to those in force during the German occupation.

Pacific Islands.—Under the Treaty of Versailles Japan was appointed mandatory to the former German possessions north of the Equator. These include:—(1) *The Marianne (or Ladrone) Islands*—By treaty of February 12, 1899, these islands, with the exception of Guam (the largest of the Marianne Islands) ceded to the United States in 1898, passed on October 1, 1899, from Spanish to German possession for payment of 840,000*l.* Sipan is the seat of Government. The Japanese population of the islands numbers 1,754, and the natives 3,638. The northern group is actively volcanic and uninhabited.

(2) *The Caroline Islands.*—The Carolines consist of about 500 coral islets, Ponapé having about 2,000 inhabitants, Yap 7,155, and Kusai 400. The population is mainly of Malay origin, with some Chinese and Japanese. The chief export is copra. For administrative purposes the islands were divided into two groups: (a) the Eastern Carolines, with Truk and Ponapé as the centres of administration. There are in Truk 169 Japanese, 5 Europeans, and 15,004 natives; in Ponapé there are 193 Japanese, 5 Europeans and 6,778 natives. (b) The Western Carolines, with Palau and Yap as administrative centres. There are in Palau 206 Japanese, 4,598 natives, 1 European, and 15 Chinese. In Yap there are 76 Japanese, 8,537 natives, and 3 Europeans.

(3) *Marshall Islands.*—The Marshall Islands, consisting of two chains or rows of lagoon islands (several uninhabited), known respectively as Ratak (with thirteen islands) and Ralik (with eleven islands), first came under German rule in 1885. The population consists of 102 Japanese, 5 Europeans, and 8,901 natives. The chief island and administrative centre is Jaluit; the most populous island Majeru, with 2,600 inhabitants. Protestant (American) and Catholic missions are at work. There are plantations of coco-palm (1,275 hectares). The chief export is copra.

LATVIA.

(REPUBLIKA LATVIJA.)

LATVIA, along the southern part of the Baltic littoral, is inhabited chiefly by Letts. As early as the 13th century the Letts fought against the Germans (battle of Durbe, 1260), but in the long run the Germans carried the day, and the state created by the Teutonic Order under the form of a Federal Republic (consisting of Esthonia, Latgale, Livonia, and Courland) lasted until 1560. Eventually, Esthonia passed under the rule of Sweden, Latgale and Livonia under that of Lithuania-Poland, while Piltene and Oesel became Danish. Courland alone retained her independence under the form of a vassal duchy of Lithuania-Poland. In 1621 Livonia was annexed by Sweden, and in 1710 by Russia. In 1772, after the first partition of Poland, Latgale was assigned to Russia, and in 1795 Courland joined Russia. From this time onwards, Latvia was under Russian rule.

In 1917 Lettish public opinion expressed itself in favour of the separate existence of Latvia, and announced its view officially in the Russian Constituent Assembly in January 1918. An organization for establishing the independence of the country was formed, and on November 18, 1918, it proclaimed in Riga the sovereign Free State of Latvia, which was recognised as an independent State by most of the Powers, and was admitted to the League of Nations on September 22, 1921.

Constitution and Government.—The present Constituent Assembly, elected on April 17 and 18, 1920, on the basis of universal suffrage for citizens of both sexes, 21 years of age, by equal, direct, and secret vote, and based on proportional representation, consists of 152 (including 5 women) members, divided into the following political groups:—Social-Democrats, 58; Labour party, 6; Democrats, 6; Agrarian party of landless peasants, 3; landless peasants and small farmers' party, 2; Latgallen people's party, 1; Union of Farmers, 26; Latgallen peasants' party, 17; Christian farmers' party of Latgallen, 6; independent citizens' party, 6; Christian nationalists, 3; Germans, 6; Jews, 6; Russians, 4; Poles, 1.

The Constitution (October 1921) declares that Latvia is a Republic, at the head of which stands a President who must be over 40 years of age and is elected for 5 years on the basis of equal, universal and secret suffrage. War can only be declared after a vote of the Legislature. Parliament (Saeima) consists of one chamber of 100 members, who are elected by the system of proportional representation for 3 years. The franchise is universal.

The Ministries are those of Interior, Foreign Affairs, Finance, National Defence, Trade and Industry, Public Works, Public Instruction, Agriculture, Justice, Supplies, and the State Controller.

The national flag is made up of horizontal stripes of red, white and red.

Prime Minister.—Z. A. Meierovics.

The present Government took office on June 27, 1921.

Area and Population.—Latvia consists of the former Russian Province of Courland (about 10,435 square miles), four southern districts (Riga, Wenden, Wolmar, Walk) of the former Russian province of Livonia (about 8,715 square miles) and three western districts (Dvinsk, Reshitza, Lutsin) of the former Russian province of Vitebsk (about 5,292 square miles), making a total of about 24,440 square miles, or, including inland lakes, about 25,000 square miles. The total length of the frontier line of Latvia is 1,040 statute miles, with a coast line of 338 statute miles.

The chief towns are Riga (the capital of Latvia), population (1920) 185,137, Libau (51,533), Mitau (19,643), Windau, Wenden, Wolmar, Walk, Daugavpils (Dvinsk).

The census taken on June 15, 1920, showed a population of 1,503,193 in Latvia. Of these 1,416,090 were Latvian citizens, and 87,103 foreigners. Of the Latvian citizens 80·41 per cent. were Letts, 8·86 per cent. Russians, 4·29 per cent. Jews, 3·23 per cent. Germans, 2·19 per cent. Poles, 0·52 per cent. Lithuanians, 0·25 per cent. Estonians, and 0·25 per cent. other nationalities.

Religion and Instruction.—The majority of the population in Latvia is Protestant (58 per cent.), but in Latgale and one district of Courland there are also many Roman Catholics (23 per cent.), while in Riga, Windau and south-east of Livonia there are about 200,000 Greek Orthodox Letts (8·7 per cent.). Jews form about 5 per cent. of the population. According to a Draft Bill to be presented to the Constituent Assembly there is to be no State Church.

Before the war there were 87 secondary schools in Latvia with 18,089 pupils and 1,601 teachers; and 1,587 elementary school with 153,383 pupils and 3967 teachers.

Formerly the University of Dorpat served the whole of the Baltic provinces of Russia, and as Dorpat became an Estonian institution, the Riga Polytechnic was in 1919 raised to be the Latvian University. The number of students is (1921) 4,379. A Musical Academy has also been re-opened in Riga.

Finance.—Budget estimates for two years are shown as follows:—

	1920-21	1921-22
	Latvian Roubles	Latvian Roubles
Revenue	4,516,000,000	9,855,893,800
Expenditure	4,516,000,000	9,855,893,800

The National Debt of Latvia is as follows:—To United States of America, 5,132,286 dollars; to France, 4,568,399 francs; to Norway, 6,738,127 crowns; to Great Britain, 20,169*l*. The internal debt amounts to 16,395,000 Latvian roubles; and currency notes, 1,784,000,000 Latvian roubles.

Defence.—The standing army numbers 20,000 men.

Production and Industry.—Latvia is mainly an agricultural country, but an increasing number of people are passing from agricultural to industrial life. At present Latvia can export in large quantities only flax and timber. Before the war the Latvian flax crop averaged about 35,000 tons per annum, but this season (1921-22) only 15,000 tons are estimated to be available for export. Latvian timber lands, State and private, produce annually about 172·5 million cubic feet of timber, mostly redwood, which can be exported to the extent of about 14 per cent. either as logs or sawn goods, or manufactured into furniture, or building material. On December 31, 1920, there were 1,430 industrial enterprises in Latvia, employing 21,213 hands.

Live-stock in 1921: horses, 282,500; cattle, 779,500; sheep, 1,332,000; pigs, 482,000.

Latvia does not possess any mineral wealth, although brown coal has been found in the country. The extensive peat bogs of Latvia can be utilised for fuel. A scheme is under consideration to harness the waters of the Dvina for generating electricity at the expenditure of 7,000,000*l*. When fully equipped the stations will be able to generate 360,000 horse power.

Commerce and Communications.—Latvia possesses about 340 miles of sea-coast; its 3 principal harbours are Riga, Libau, and Windau. Three Russian main lines converge on Latvian ports, viz. the Riga-Tsaritsin line, the Windau-Moscow line, and the Libau-Romni line.

In 1920 the imports amounted to 2,061,100,000 Latvian roubles, and the exports to 1,075,400,000 roubles. Of the imports 21 per cent. were from Denmark, 20 per cent. from Great Britain, and 18 per cent. from Germany; of the exports, 67 per cent. were to Great Britain.

The commerce in 1920 was distributed as follows (in millions of Latvian roubles):—

	Imports	Exports
Raw materials and semi-manufactured articles	392·7	1,048·9
Manufactured articles	790·7	22·6
Food products	848·2	3·9
Cattle	29·5	—
Total	2,061·1	1,075·4

Total trade between Latvia and the United Kingdom (according to Board of Trade returns):—

	1921
	£
Imports from Latvia into the United Kingdom	1,619,991
Exports to Latvia from the United Kingdom	518,602

On January 1, 1921, 19 steamboats of 22,936 tons, and 50 sailing vessels of 10,580 tons, making a total of 73 vessels of 33,579 tons, were sailing under the Latvian flag.

In 1920, 1,679 vessels of 479,801 tons entered and 1,597 vessels of 455,994 tons cleared the ports of Latvia.

The Latvian railways in Courland have been altered during the German occupation to the German gauge, while those in Livonia and Latgale retain the Russian gauge. The total length of line is 1,829 miles, of which 543 miles are of Russian gauge, 661 miles of European gauge, and 593 miles of narrow gauge.

Money, Banking, and Currency.—The only legal tender in Latvia are the Latvian roubles, of which up to July 1, 1921, 1784,000,000 have been issued.

It is intended to issue a new currency on a gold basis. The unit will be 1 gold Lat, equal to a gold franc, or one twenty-fifth of a gold sovereign. It is also proposed to set up a central banking institution.

The metric system has been established by law, but the old Russian system of weights and measures may be used until January, 1, 1926.

Diplomatic Representatives.

1. OF LATVIA IN GREAT BRITAIN.

Envoy and Minister.—G. W. Bisseneek (appointed November, 1921).

There is also a Consulate in London, and consular representatives in Belfast, Hull, Newcastle, and Swansea.

2. OF GREAT BRITAIN IN LATVIA.

Minister—E. C. Wilton, C.M.G.

There are consular representatives in Riga and Libau.

Book of Reference.

Statistical Annual of the Bureau of Statistics of the Latvian Republic. 1st year, 1920.

LIBERIA.

Constitution and Government.—The Liberian Republic had its origin in the efforts of several colonisation societies of Europe and America to make permanent provision for freed American slaves. In 1822 a settlement was formed on the west coast of Africa near the spot where Monrovia now stands. On July 26, 1847, the State was constituted as the Free and Independent Republic of Liberia. The new State was first recognised by France and Great Britain, and ultimately by other Powers. The Constitution of the Republic is on the model of that of the United States, with trifling exceptions. The executive is vested in a President and a Council of 6 Ministers, and the legislative power in a parliament of two houses, called the Senate and the House of Representatives. The President and the House of Representatives are elected for four years, and the Senate for six years. The President

must be at least thirty-five years of age, and have real property to the value of 600 dollars, or 120*l*. Electors must be of negro blood, and owners of land. The natives of the country are not excluded from the franchise, but, except in the centres of civilisation, they take no part in political life. The official language of the Government is English.

President of Liberia.—Hon. Charles D. B. *King* (1920–24).

Vice-President.—Hon. Samuel A. *Ross* (1920–24).

The President is assisted in his executive function by the Secretary of State, the Secretary of the Treasury, the Secretary of the Interior, the Attorney-General, the Postmaster-General, the Secretary for War and Navy, and the Secretary for Education.

Area and Population.—Liberia has about 350 miles of coast line, extending from the British colony of Sierra Leone, on the west, to the French colony of the Ivory Coast on the east, and it stretches inland to a distance, in some places, of about 200 miles. The boundaries were determined by the Anglo-Liberian agreement of 1885 and the Franco-Liberian agreements of 1892 and 1907–10. Early in 1911 an agreement was concluded between the British and Liberian Governments transferring the territory of Kaure-Lahun to Sierra Leone in exchange for a strip of undeveloped territory of about the same area, on the south side of Morro River, which now becomes the boundary.

The total area is about 40,000 square miles. The total population is estimated at 1,500,000 to 2,000,000, all of the African race. Since the organisation of the frontier force the Government has obtained complete control of Northern Liberia and of the Kroo countries in Southern Liberia. The indigenous natives belong in the main to six principal stocks: (1) the Mandingos (Muhammadan), (2) the Gissi; (3) the Gola, (4) the Kpvesi, (5) the Kru negroes and their allies, and (6) the Greboes. The Kru tribes are mostly Pagan. The number of American Liberians is estimated at about 12,000. About 50,000 of the coast negroes may be considered civilised. All such use English as their language in daily life, and are Christian in religion. There is a British negro colony of about 500, and there are about 200 Europeans, including 100 Englishmen. The coast region is divided into counties, Bassa, Sino, and Maryland, each under a Government superintendent, and Montserrado, subdivided into 4 districts, each under a superintendent. Monrovia, the capital, has, including Krutown, an estimated population of 6,000. It is one of the 15 ports of entry along the 350 miles of coast, the others being Liberian Jene (river port), Saywolu (river port), Robertsport (Cape Mount), Marshall (Junk), Grand Bassa, River Cess, Greenville (Sinoe), Nana Kru, Sasstown, Grand Cess, Harper (Cape Palmas), Kablaki (river port), Half Cavalla, and Webbo (river port). Other towns are Robertsport, Royesville, Marshall, Arthington, Careysburg, Millsburg, Whiteplains, Boporo (native), Rocktown (native), Philadelphia, Cuttington, Upper Buchanan and Edina.

Religion and Instruction.—The Americo-Liberians are all Protestant (Anglican, Presbyterian, Baptist, or Methodist). There are several American missions at work and one French Roman Catholic. The Government educational system is supplemented by mission schools, instruction being given both to American and to native negroes. In 1910 the Government had 113 elementary schools with 122 teachers and 4,100 pupils. There are 87 mission schools and about 3,000 pupils. The mission schools give industrial training. The Methodists have a college at Monrovia; the

Protestant Episcopalians a high school at Cape Palmas and 3 other important schools. The Government has a college with (1916) 3 professors and 20 students. A criminal code was enacted in 1900; the customs laws were codified in 1907.

Finance.—The revenue and expenditure for 5 years (in American dollars):—

	1912-13	1913-14	1914-15	1915-16	1917-18
	Dollars	Dollars	Dollars	Dollars	Dollars
Revenue . . .	618,809	531,500	273,368	295,233	273,016
Expenditure . .	529,548	531,500	266,861	282,332	255,767

The customs duties for 1918 were 162,120 dollars; for 1919 they were 226,720 dollars; and for 1920, 314,690 dollars.

In 1912 an international loan of 1,700,000 dollars was raised, secured by the Customs revenue, rubber tax, and tax on native labourers shipped from Liberia. The administration of the Customs is in the hands of a Customs Receiver, designated by the Government of the United States. British financial interests preponderate in the loan. It is further provided that for the security of the revenue a frontier police force sufficient for the maintenance of peace in Liberia shall be established, and that the United States shall designate trained military officers to organise the force. In 1918, 72,207 dollars were spent on the force.

On September 30, 1918, the total debt was 2,131,700 dollars, *i.e.* 1,608,000 dollars refunding loan of 1912, 423,128 dollars internal floating debt; 84,603 dollars due to Bank of British West Africa Limited; and 15,969 dollars owing by post office to money-order bureau.

Defence.—For defence every citizen from 16 to 50 years of age capable of bearing arms is liable to serve. The organised militia, volunteers, and police number about 5,000.

Production, Commerce.—The agricultural, mining, and industrial development of Liberia has scarcely begun. There are forests unworked; the soil is productive, but cultivation is neglected; cocoa and cotton are produced in small quantities only, and indigenous coffee is the staple product. Piassava fibre, prepared from the raphia palm, palm oil and palm kernels, kola nuts, chillies, beni seed, coffee, anatto seed and rice are also produced. Beeswax is collected, and gum copal is found but is not collected. Tortoiseshell, improperly prepared, is sold in small quantities. In the forests there are rubber vines and trees of 22 species. Iron is worked by the natives. Gold in small quantities, tin, copper, zinc, monazite, corundum, lead, bitumen or lignite, and diamonds have been at different times found in the interior, but not as yet in payable form or abundance.

The trade for four years is thus shown:—

Year	Imports	Exports	Year	Imports	Exports
	Dollars	Dollars		Dollars	Dollars
1911	1,154,924	1,013,849	1913	902,063	1,288,915
1912	1,194,128	1,150,491	1917	—	618,536

The chief imports are rice, Manchester goods, gin, tobacco, building timber, galvanised roofing iron, ready-made clothing, and dried and preserved fish. The chief exports are rubber, palm oil, palm kernels, piassava fibre, cocoa, coffee, ivory, ginger, and camwood. The trade is chiefly with Great Britain, Holland, Spain, and the United States.

According to the 'Annual Statement of Trade' issued by the Board of Trade, the value of the trade between the United Kingdom and Liberia was as follows in five years:—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports into U.K. from Liberia	211,270	161,423	528,219	537,362	105,733
Exports of U.K. produce to Liberia	117,099	178,161	163,715	271,992	106,031

There are no railways or vehicular means of transport in the country, except ox-carts and a motor road of about 20 miles recently constructed. The river St. Paul is navigable for 25 miles from the sea northwards (including creeks, for 38 miles), and various Liberians maintain steam launches thereon. The Liberian Government has a river launch. There is direct cable communication with Europe and New York. There are two wireless stations at Monrovia.

Money, Weights, and Measures.—The money chiefly used is British gold and silver, but there is a Liberian coinage in silver and copper. Accounts are kept generally in American dollars and cents. The Liberian coins are as follows:—Silver, 50-, 25-, and 10-cent pieces; copper, 2- and 1-cent pieces.

Weights and measures are the same as Great Britain and the United States.

The Bank of British West Africa, Ltd., has a branch at Monrovia, and agencies at other ports of the Republic.

Diplomatic and Consular Representatives.

1. OF LIBERIA IN GREAT BRITAIN.

Minister.—J. P. Crommelin.

Secretary.—C. W. Dresselhuys.

Consul.—J. T. Grein.

There are Consuls in London, Birmingham, Cardiff, Glasgow, Hull, Liverpool, Manchester, Newcastle, Plymouth, Portsmouth, Sheffield, Southampton, Swansea.

2. OF GREAT BRITAIN IN LIBERIA.

H.B.M. Consul-General at Monrovia.—E. H. G. Shepherd (1920).

British Receiver of Customs.—Richard Sharpe.

LIECHTENSTEIN.

THE Principality of Liechtenstein, lying between the Austrian Land of Vorarlberg and the Swiss cantons of St. Gallen and Graubünden, is a sovereign State consisting of Schellenberg and Vaduz (formerly immediate fiefs of the Roman Empire). The former in 1699 and the latter in 1712 came into the possession of the house of Liechtenstein and, by diploma of January 23, 1719, granted by the Emperor Karl VI., the two lordships were constituted as the Principality of Liechtenstein. After the break-up of the Empire in 1806 the Principality was incorporated in the Rhine Confederation; from 1815 to 1866 it formed part of the German Confederation, since the break-up of which it has joined no similar union.

The Reigning Prince is **John II.**, born October 5, 1840; succeeded his father, November 12, 1858. The reigning family originated in the twelfth century, and traces its descent through free barons who in 1608 became princes of Liechtenstein. The monarchy is hereditary in the male line. The constitution, adopted in October 1921, provides for a Diet of 15 members elected for four years by direct vote on the basis of universal suffrage and proportional representation. The capital and seat of Government is Vaduz (pop. 1,142). Formerly the principality was practically a dependency of Austria, but on November 7, 1918, the Diet resolved to establish the complete independence of Liechtenstein. The principality has a High Court. In 1920 negotiations were opened with Switzerland with a view to a Customs Treaty to include the administration by Switzerland of the posts and telegraphs of Liechtenstein, and early in 1921 Switzerland agreed.

Area, 65 square miles; population, of German origin and nearly all Catholic, 1912, 10,716 (5,266 males and 5,450 females). The Budget for 1922 balanced at 384,500 francs. There is no public debt. The inhabitants of Liechtenstein since 1867 have not been liable to military service. The Principality has no army (since 1868). The population is in great part agricultural, the chief products of the country being corn, wine, fruit, and timber. The rearing of cattle, for which the fine Alpine pastures are well suited, is highly developed. The industries of the Principality, except the textile industries, are not important.

Administrator, appointed by the Prince.—Joseph Ospelt (April, 1921).

LITHUANIA.

(LIEŲVA.)

LITHUANIA became a Grand Duchy in the early part of the thirteenth century. In 1386 the Grand Duke Jogaila embraced Christianity and married the Polish Queen Hedvig, thus becoming King of Poland. During the reign of Vytautas (Vitold) the Great (1392-1430) Lithuania reached the zenith of her power and prosperity, her frontiers extending from the Baltic to the Black Sea. After the death of Vytautas the Great, Polish influence gradually increased in Lithuania, and in 1569 the Lithuanians were forced to unite with the Poles at Lublin, the Lithuanians retaining their own treasury, laws, courts of justice, and army. Both countries elected the same king and had a common Seim (parliament).

At the end of the eighteenth century Lithuania shared the fate of Poland. Greater Lithuania fell under Russian rule, and Lithuania Minor was annexed by Prussia.

In 1917 a Lithuanian Conference of 200 representatives at Vilna elected a Lithuanian State Council (*Taryba*) and demanded the complete independence of Lithuania. The independence of the Lithuanian State was proclaimed on February 16, 1918.

The Lithuanian Government has been recognised by most of the Great Powers, and by Russia (Treaty of Peace of July 12, 1920). On September 21, 1921, Lithuania was admitted a member of the League of Nations.

Constitution and Government.—The provisional constitution adopted by the Constituent Assembly on June 2, 1920, declares that the State of Lithuania is a Democratic Republic, the Constituent Assembly is the exponent of the sovereign power of Lithuania, and the Constituent Assembly makes laws, ratifies treaties with other States, approves the State budget and superintends the execution of the laws. The Executive Power is placed in the hands of the President of the Republic and of the Cabinet of Ministers. The President of the Republic is elected by the Constituent Assembly. The President chooses the Minister-President (Premier), who forms the Cabinet. The President also appoints the higher military and civil officials of the State. Until the President of the Republic is elected, his duties are to be performed by the President of the Constituent Assembly. In case of the death, resignation or illness of the President, his place is to be taken by the President of the Constituent Assembly. All the acts of the President must be countersigned by the Premier or the proper Minister. The Cabinet of Ministers is responsible to the Constituent Assembly and resigns on an expression of a lack of confidence by the latter. The Members of the

Constituent Assembly on entering the Cabinet of Ministers do not cease to be Members of the Constituent Assembly.

All the citizens of Lithuania, without distinction of sex, nationality or religion, are equal before the law; there are no classes or titles. All citizens are also guaranteed inviolability of person, homes, and correspondence, and freedom of religion, conscience, press, speech, strikes, assembly and organisation. The penalty of death is abolished.

The Constituent Assembly of Lithuania was elected April 15, 1920, by universal, equal, direct and secret suffrage according to the proportional system, the electoral unit being one representative to about 15,000 inhabitants. There were elected 112 representatives, composed as follows:—Christian Democrats, 59; Social Populist Democrats, 29; Social Democrats, 13; Jews, 6; Poles, 3; non-party, 1.

Acting President of Lithuania.—A. Stulginskis, President of Constituent Assembly (appointed 1920).

The present Cabinet of Ministers was formed on February 2, 1922, and is presided over by:—

Prime Minister.—E. Galvanauskas.

For administrative purposes the non-occupied territory of Lithuania is divided into 20 districts, of about 100,000 inhabitants each. The districts are divided into communities, with about 15 communities to each district. National minorities (Jews, White Russians, and Poles) enjoy cultural autonomy.

Area and Population.—The Lithuanian Government claims that Lithuania consists of: (1) the whole of the former Russian Province of Kaunas (Kovno); (2) the Province of Vilnius (Vilna), minus the districts of Disna and Vileika; (3) a part of the Province of Gardinas (Grodno), north of the Niemen River and the narrow hinterland of the city of Gardinas (Grodno) in the south; (4) the Province of Suvalki minus the southern parts of the districts of Suvalki and Augustovo; (5), part of the Province of Courland between the old German frontier and the Holy Aa (Sventoji) River by the Baltic Sea.

The eastern frontier of these territories is defined in the Treaty of Peace between Lithuania and Russia, signed July 12, 1920, at Moscow, and runs as follows: Beginning at the Dvina River westward from Druja (estate of Safronovo), along the Drujka River, along the eastern shore of Lake Driviaty, southward through Koziany, Postavy, by the eastern shore of Lake Narocz, along the Narocz River; then it cuts in half the Molodecno railway junction, runs by Volozino, along the Beresina River, and further to the west along the Niemen to the Svislovis River; further on it circles the city of Gardinas at a radius of 15 to 20 versts to the south.

The northern frontier (with Latvia) almost coincides with the old boundary between the Provinces of Courland and Kaunas. A special arbitration convention was adopted by the Lithuanian and Lettish Governments on September 28, 1920, at Riga, according to which the British representative acted as arbiter in finally fixing the details of this frontier and determining the corrections to be made.

In the south (in the region of the Province of Suvalki) the frontier with Poland has not yet been conclusively agreed upon by Lithuania and Poland. Both Lithuania and Poland lay claim to Vilna, of which the Poles are in occupation; and though during the year 1921 the League of Nations has endeavoured to bring about a solution of this problem, so far (March, 1922) no agreement has been reached.

This territory had, according to the statistics of 1914, an area of 154,491 sq. kilometres (59,633 square miles) and 4,800,000 inhabitants, viz.: the whole of the former Province of Kaunas, 20,260 sq. kilometres, and 1,857,100 inhabitants; 5 districts of the former Province of Vilnius, 29,818 sq. kilometres, and 2,075,700 inhabitants; 5 districts of the former Province of Suwalki, 101,913 sq. kilometres, and 718,000 inhabitants; also parts of the former Provinces of Courland and Gardinas, 2,500 sq. kilometres, and 150,000 inhabitants.

The Lithuanians form 70 per cent. of the total population, the Jews, 13 per cent.; the Poles, 8 per cent.; the Russians and White-Russians, 7 per cent.; and other nationalities, 2 per cent.

The rural and urban population in Lithuania in 1914 was as follows:—

	Urban	Per cent.	Rural	Per cent.
Vilna . . .	289,200	12·6	1,786,700	87·4
Kovno . . .	195,100	10·5	1,662,000	89·5
Suwalki . . .	97,900	18·4	620,100	81·6
	582,200	13·8	4,068,800	86·2

For every thousand males there are females in Vilna, 1,014; in Kovno, 1,077; and in Suwalki, 1,058; making an average of 1,049 for the whole country.

The capital of Lithuania is Vilnius (Vilna), with a population of 214,600 in 1914. Other large towns were: Kaunas (Kovno), 90,300; Gardinas (Grodno), 61,600; Kiaipeda (Memel), 32,000; Suvalkai (Suwalki), 31,600; and Siauliai (Shavli), 31,300.

Religion.—In the three districts of Vilna, Kovno, and Suwalki Roman Catholics form 75 per cent., Jews 12 per cent., Greek Orthodox 9 per cent., Protestants and Calvinists 4 per cent.

Instruction.—In 1922 there were 1708 primary schools with 160,230 pupils, and 93 secondary schools with 17,149 pupils. On February 16, 1922, the University of Kovno was opened, with 25 professors and 800 students.

Finance.—The budget for 1921 provided for a revenue of 672,582,658 marks, and an expenditure of 885,725,375 marks, leaving a deficit of 213,142,720 marks.

The estimated value of State property in 1919 is given as follows:—State forests, 47,445,500*l.*; confiscated lands, 7,371,000*l.*; State lands (lakes excluded), 8,840,000*l.*; and lakes, open spaces in towns, and buildings, 10,000,000*l.*; making a total of 71,656,500*l.*

This figure does not include the value of State railways and other means of communication.

By the Treaty of Peace of Moscow, Russia took over, in place of an indemnity for the damage done by the Russian Army, the whole of the old Russian debt devolving on Lithuania; in addition, it was agreed to hand over to Lithuania 3,000,000 roubles in gold and to concede to Lithuania 100,000 hectares of forests.

Defence.—The Lithuanian Army is approximately 50,000 men.

Production.—Lithuania is an agricultural country, and preponderantly rural in character; the resources of the country consist of timber and agricultural produce. Of the total area, 45·8 per cent. is arable land, 24·3 per cent. meadow and pasture land, 20·3 per cent. forests, 3·1 per cent. unproductive lands, and 6·5 per cent. waste land. In 1920 in the territory administered by the Lithuanian Government 5,200,000 hectares (about 13,000,000 acres), there was produced (in cwts.) rye, 10,000,000; wheat, 1,500,000; barley, 3,000,000; oats, 5,000,000; potatoes, 20,000,000; peas, 1,200,000; and flax-seed, 700,000.

In 1921 the country possessed 380,000 horses, 780,000 cattle, 1,056,000 sheep, and about 1,262,000 pigs. Poultry-farming is considerably developed, particularly geese-rearing. Bee-keeping is also an important occupation, the figures for 1910 being as follows: Hives, 57,426; honey sold, 5929 cwt., and wax, 1,304·6 cwt.

Forests cover 1,946,000 acres, of which 889,600 acres (or 44 per cent.) belong to the State; 80 per cent. of the forests consist of needle-bearing trees, mostly pines, and the remainder of leaf-bearing trees.

In the industries of the country there were in 1913 4,759 workshops and factories, the yearly output of which was estimated at 5,373,946*z*, and their employees numbered 29,425. These figures include 142 distilleries, which consumed 272,000 cwt. of corn and 17,400,000 cwt. of potatoes, with a total output of 365,280 hectolitres of spirit; 46 breweries, with an output of 635,000 hectolitres; and 1,216 flour mills.

Commerce.—Trade for two years:—

	1920	1921
	Marks.	Marks.
Imports	428,728,541	876,874,930
Exports	321,797,163	631,744,123

Of the imports in 1921, 555,698,988 marks came from Germany, 58,011,154 marks from Danzig, and 7,379,668 marks from the United Kingdom.

The chief articles of export are corn, cattle, hams, poultry, eggs, butter, timber, flax, linseed, hides, and wool. The imports are chiefly manufactured articles, fertilisers and agricultural machinery.

Total trade between Lithuania and the United Kingdom (according to Board of Trade returns):—

	1921
	£
Imports from Lithuania into United Kingdom	344,044
Exports to Lithuania from United Kingdom	53,500

Internal Communications.—In 1920 the total length of railways was 1,550 miles, of which 1,173 miles were broad gauge lines. The total cost of construction of these railways was 20,600,000*z*.

BANKING, ETC.—MONEY, ETC.—REPRESENTATIVES 1095

There are about 930 miles of roads in the country, while of the waterways those navigable for steamboats extend to 117 miles; those for smaller craft to 453 miles; those for rafts to 1,450 miles; total, 2,020 miles. The river Niemen is navigable for about 270 days in the year.

Banking and Credit.—The three principal banks are the Lithuanian Commercial and Industrial Bank (with a capital of 12,000,000 marks); the Lithuanian Bank of Commerce (4,000,000 marks); and the Agricultural Credit Bank (10,000,000 marks).

Money, Weights and Measures.—The paper currency consists of Lithuanian marks ('ostmarks'), which originated during the German occupation. The Lithuanian mark, issued by a German Credit Bank in exchange for German marks, is guaranteed by the German Empire. It has an equal value with the German mark, and can be freely exchanged for the latter during commercial operations between Lithuania and Germany. The two currencies are legal tender, and both being guaranteed by Germany, they undergo identical changes.

The weights and measures are still Russian, but at the same time the metric system is used. Arrangements are being made for making the metric system obligatory.

Diplomatic and Consular Representatives.

1. OF LITHUANIA IN GREAT BRITAIN.

Chargé d'Affaires.—F. Naroushevitch (May, 1921).

LUXEMBURG.

Reigning Grand Duchess.—**Charlotte** born January 23, 1896, succeeded on the abdication of her sister *Marie-Adelaide*, on January 9, 1919; married to Prince Felix of Bourbon-Parma on November 6, 1919. *Offspring*:—Prince *Jean*, born January 6, 1921. Sisters of the Grand Duchess:—Princess *Marie-Adelaide*, born June 14, 1894; Princess *Hilda*, born February 15, 1897; Princess *Antoinette*, born October 7, 1899; Princess *Elisabeth*, born March 7, 1901; Princess *Sophie*, born February 14, 1902.

The early history of Luxemburg may be divided into four periods, viz., from 963 to 1443, when the country was part of the Holy Roman Empire; from 1443 to 1506, the Burgundian period; from 1506 to 1714, the Spanish period; and from 1714 to 1795, the Austrian period. From 1795 to 1815 the Duchy was French. The Congress of Vienna made the Duchy into a Grand Duchy, and from 1815 to 1866 the Grand Duchy was included in the dissolved Germanic Confederation. By the Treaty of London, May 11, 1867, it was declared neutral territory, and its integrity and independence were guaranteed.

Constitution and Government.—The Constitution now in force was proclaimed on October 17, 1868; in 1919 some important changes were introduced into it, viz. the Constituent Assembly decided that the sovereign power resided in the Nation (Article 32); that all secret treaties were abolished (Article 37); that the deputies are to be elected on the basis of universal suffrage, pure and simple, by scrutiny of lists, according to the rules of proportional representation and in conformity with the principle of the smallest electoral quotient.

The country is divided into four electoral districts: the South, North, Centre, and East. In order to qualify as an elector it is necessary to be a citizen (male or female) of Luxemburg and to have completed 21 years of age; to be eligible for election it is necessary to have completed 25 years of age and to fulfil the conditions required for active electorate. The electors may be called upon to record their votes by means of a referendum or plebiscite in all cases and under the conditions to be determined by law (Article 52). The Members of the Chamber of Deputies receive a salary which may not surpass 4,000 francs per annum; they are also entitled to receive a travelling allowance (Article 75).

The Chamber of Deputies consists of 48 members, elected October, 1919. The state of the parties is as follows:—Catholics, 27; National Party, 3; Liberals, 7; Socialists, 9; Popular Party, 2.

The head of the State takes part in the legislative power, exercises the executive power, and has a certain part in the judicial power. The Constitution leaves to the sovereign the right to organise his Government, which consists of a Minister of State, who is President of the Government, and of at least three Directors-General. The Cabinet, appointed April, 1921, is composed as follows:—

Minister of State and President of Government.—Emile Reuter,

Director-General of Finance.—A. Neyens.

Director-General of Home Affairs and Public Instruction.—F. Bech.

Director-General of Justice and Public Works.—W. Leidenbach.

Director-General of Agriculture, Industry and Social Welfare.—Raymond de Waha.

Besides the Government there is a Council of State. It deliberates on proposed laws and bills, on amendments that might be proposed; it also gives administrative decisions and expresses its opinion regarding any other question referred to it by the Grand Duke or by the Law. The Council of State is composed of 15 members chosen for life by the sovereign, who also chooses a president among them each year.

On September 28, 1919, a Referendum was taken in Luxemburg to decide on the political and economic future of the country. Those entitled to vote were men and women of 21 (voters on the register, 127,775; actual voters, 90,984). The voting resulted as follows:—for the reigning Grand Duchess, 66,811; for the continuance of the Nassau-Braganza dynasty under another Grand Duchess, 1,286; for another dynasty, 889; for a Republic, 16,885; for an economic union with France, 60,133; for an economic union with Belgium, 22,242. But France refused in favour of Belgium to consider the possibility of an economic union, and negotiations to this end between Belgium and Luxemburg were concluded on December 22, 1921, when the Chamber of the Grand Duchy passed a Bill for the economic union between Belgium and Luxemburg. The Agreement, which is for 50 years, provides for the disappearance of the customs barrier between the two countries and the use of Belgian currency in the Grand Duchy. It came into force on April 1, 1922.

Area and Population.—Luxemburg has an area of 999 square miles, and a population (Dec. 1, 1916) of 263,824 (130,514 males and 133,310 females). The population is Catholic, save (1910) 4,007 Protestants, 1,270 Jews, and 303 belonging to other sects. The chieftown, Luxemburg, has 45,986 (1921) inhabitants. Other towns are Esch a Alz, the centre of the mining district, 20,672 inhabitants; Differdange, 14,035 inhabitants; Dudelange, 10,400 inhabitants; Rumelange, 5,264 inhabitants; and Diekirch, 3,776 inhabitants.

Instruction.—Education is compulsory for all children between the ages of 6 and 13. In 1920 the primary schools had 1,027 teachers (504 women); there are 35 higher elementary schools, 3 classical schools, 2 commercial and industrial colleges, a college of agriculture, and an academy of music.

Finance.—Estimated revenue and expenditure (including extraordinary for the last five years) in francs:—

—	1917-18	1918-19	1919-20 ¹	1920-21	1921-22
Revenue . . .	42,680,858	42,632,228	126,044,256	63,808,926	56,388,147
Expenditure . . .	74,217,781	100,449,074	189,624,200	149,773,345	156,569,044

¹ Revenue includes loan of 90,000,000 francs; expenditure includes 39,000,000 francs deficits of previous years.

The debt on September 30, 1920, amounted to 129,281,828 francs.

The armed forces of the State number 250 men.

Production and Industry.—Agriculture is carried on by about 90,000 of the population (about 36 per cent.); about 250,000 acres are agricultural

and. The principal crops are beetroot and potatoes, but mining is the chief industry. Production of iron and steel for 3 years:—

Year	Iron		Steel	
	Tons	Value in francs	Tons	Value in francs
1917	1,528,865	231,845,054	1,053,596	207,045,891
1918	1,266,071	254,590,396	857,937	199,573,806
1920	3,704,390	—	732,457	481,830,844

Communications.—There were 330 miles of railway in 1920, and 565 miles of telegraph line with 1,521 miles of wire, and 360 telegraph offices in 1920. There were also (1920) 53 telephone systems with 872 miles of line and 5,667 miles of wire. In 1920 there were 138 post-offices, through which there passed 13,270,000 letters and 5,229,000 post-cards, &c.

Diplomatic Representatives.

MEXICO.

(REPÚBLICA MEXICANA.)

Constitution and Government.

MEXICO was annexed to the Spanish Crown by conquest in 1521, and for three centuries continued to be governed by Spain. In all 64 Spanish Viceroyalties ruled the Courts, from Antonio de Mendoza (1535–1550) to Juan O'Donojú (1821–1822). In 1810 the rule of the Spanish Viceroyalties had become so tyrannical that it caused an outbreak headed by the patriot priest Hidalgo,

who on September 15, 1810, declared the Independence of Mexico. On May 18, 1822, General Augustin Iturbide declared himself Emperor of Mexico, but in 1824 he had to flee, and the Republic was established. Several Presidents (Felix Fernandez Victoria, 1824-28,* was the first) ruled the destinies of the country with more or less severity until 1864, when the throne of Mexico was offered to Archduke Ferdinand Maximilian of Austria. He was shot in 1867, and Benito Juarez, who had been President in the northern part of the country, took the reins of government. He was followed by Lerdo de Tejada, who in 1876 fled, and General Porfirio Diaz (died July 2, 1915) made his entry into Mexico City. He ruled the country with the exception of four years (1880-4, General Manuel Gonzalez) until May 25, 1911, when he presented his resignation to Congress. On November 6, 1911, Señor Francisco I. Madero assumed office as President and ruled until February, 1913, when a *coup d'état* took place, resulting in the President's murder (February 23, 1913) and his replacement by General Victoriano Huerta.

Civil war broke out in April, 1913, and on July 15, 1914, Huerta resigned. The internal discord continued, until December, 1915, when most of the American and European States recognized General Carranza as head of the Government of Mexico. In May 1920, civil war broke out again and Carranza fled from the capital, and he was shortly afterwards killed. General Adolfo de la Huerta was elected Provisional President in May, 1920, and in September, 1920, the presidential elections returned General Alvaro Obregon.

President.—Alvaro Obregon. Assumed office, December 1, 1920.

A new Constitution, amending the Constitution of 1857, was promulgated on February 5, 1917. By its terms Mexico is declared a federative republic, divided into States, each of which has a right to manage its own local affairs, while the whole are bound together in one body politic by fundamental and constitutional laws. The powers of the supreme Government are divided into three branches, the legislative, executive, and judicial. The legislative power is vested in a Congress consisting of a House of Representatives and a Senate, and the executive in a President. Representatives are elected for two years by universal suffrage at the rate of one member for 60,000 inhabitants. The qualification is to be over twenty-five years of age on the day of election. The Senate consists of fifty-eight members, two for each State, of at least thirty years of age, who are returned in the same manner as the deputies. The members of both Houses receive salaries of about 7,000 dollars a year. The President is elected by direct popular vote in a general election, holds office for four years, and cannot be re-elected. Failing the President, Congress acts as an electoral college for the election of a successor. If the vacancy occurs during the first half of the President's term of office, Congress chooses a provisional President and arranges for new elections; if the vacancy occurs in the second term, Congress chooses the President for the remainder of the term. The Session of Congress is to be from September 1 to December 31. During the recess there is a Permanent Committee consisting of fourteen Senators and fifteen Representatives appointed by the respective Houses.

According to the law of April 13, 1917, the administration is carried on, under the direction of the President and a Council, by seven Secretaries of State (Foreign Affairs, Interior, Finance and Public Credit, War and Marine, Communications and Public Works, Industry, Commerce, and Labour, and Agriculture), and three Departments of State (Judicial, Educational, and Public Health).

LOCAL GOVERNMENT.

Mexico is divided into twenty-eight States, one Federal District, and two Territories. Each separate State has its own internal constitution, government, and laws; but inter-State customs duties are not permitted, though State taxes are levied. Each State has its governor, legislature, and judicial officers popularly elected under rules similar to those of the Federation. The Governors of the Federal District and the Territories are appointed by the President. All the States of the Mexican Union have their own special codes based, more or less, on those of the Federal District; but at the same time they must publish and enforce laws issued by the Federal Government.

Area and Population.

The population of the census of 1910 and the estimated population in 1912 are shown in the following table. The capitals of the States and districts are in brackets:—

States and Territories	Area, in square miles	Census Population, 1910	Estimated Population, 1912	Population per square mile, 1910
Aguascalientes (Aguascalientes).	2,969	120,511	124,497	40.6
Baja California (La Paz)	58,338	52,272	53,254	0.8
Campeche (Campeche)	18,089	86,706	86,685	4.7
Chiapas (Tuxtla Gutiérrez)	27,527	438,843	456,371	16.1
Chihuahua (Chihuahua)	90,036	405,265	423,387	4.6
Coahuila (Saltillo)	63,786	382,092	376,747	5.7
Colima (Colima)	2,272	77,704	80,500	34.2
Distrito Federal (México)	578	720,753	703,170	1556.8
Durango (Durango)	42,272	436,147	509,585	12.8
Guanajuato (Guanajuato)	10,960	1,081,651	1,085,681	95.1
Guerrero (Chilpancingo)	25,279	605,437	620,416	20.1
Hidalgo (Pachuca)	8,637	646,551	655,187	74.7
Jalisco (Guadalajara)	33,492	1,208,855	1,220,160	37.9
México (Toluca)	9,230	989,510	1,000,903	107.0

Grand Total	767,198	15,115,612	15,501,684	19.2

In 1910 there were 7,504,471 males and 7,655,893 females. The foreign population in 1910 numbered 116,527:—Spanish, 29,541; United States, 28,639; Guatemalan, 21,334; French, 4,604; British, 5,264; Cuban, 3,478; German, 3,827; Italian, 2,595; Chinese, 13,203; Japanese, 2,276; Arabs, 1,546; Turks, 2,907; all others, 5,433.

The chief cities, 1910, are :—Mexico (capital), 1,080,000 ; Puebla, 96,121 ; Guadalajara, 119,468 ; San Luis Potosí, 68,022 ; Leon, 57,722 ; Monterey, 73,528 ; Pachuca, 39,009 ; Zacatecas, 25,900 ; Guanajuato, 35,682 ; Mérida, 62,447 ; Querétaro, 33,062 ; Morelia, 40,042 ; Oaxaca, 38,011 ; Orizaba, 35,263 ; Aguascalientes, 45,198 ; Saltillo, 35,414 ; Durango, 32,263 ; Chihuahua, 39,706 ; Vera Cruz, 48,633 ; Toluca, 31,023 ; Celaya, 23,062.

Religion, Instruction, and Justice.

The prevailing religion is the Roman Catholic, but according to the new Constitution of 1917, the Church is separated from the State, and there is toleration of all other religions. No ecclesiastical body can acquire landed property. There are 7 archbishops and 23 suffragan bishops. In 1910, there were 15,033,176 Roman Catholics; 68,839 Protestants; 33,343 of other faiths; 25,011 of no professed faith.

Education is free and compulsory, and, according to the Constitution of 1917, secular. In the Federal District and in the Territories education is controlled by the National Government; elsewhere the State authorities regulate education. The Federal capital is the seat of the National University of Mexico, organised in 1910. In 1912 the system of primary education was extended so as to reach the native population, for whom 209 schools have been established with 13,616 pupils.

In 1918, 439 newspapers and periodicals were published in Mexico.

The judicial power, which is entirely distinct from and independent of the executive, consists of the Supreme Court, with 15 judges chosen for a period of six years, three Circuit Courts, with 3 judges, and District Courts, with 32 judges. After 1923 judges are to be appointed for life.

The Ordinary, Civil, Criminal, and Correctional Courts are controlled by the Department of Justice and Public Instruction.

Federal Finance.

The ordinary receipts and expenditure for six years :—

—	Revenue	Expenditure	—	Revenue	Expenditure
	£	£		£	£
1913-14 ¹	13,230,715	13,210,873	1919 ¹	14,038,400	20,349,161
1914-15 ^{1 2}	14,597,000	15,220,489	1920 ¹	17,739,919	17,805,982
1918 ¹	14,914,137	18,713,587	1921 ¹	27,696,693	27,118,566

¹ Estimates. ² Owing to civil disturbances, no figures were published between 1915 and 1918.

On December 31, 1921, the outstanding external debt, together with arrears of interest, amounted to 74,839,055 $\frac{1}{2}$. The internal debt amounted to 136,347,300 pesos.

Defence.

Before the Revolution every Mexican capable of bearing arms was obliged to serve in the Active Army or in the National Guard. The army then consisted of the Active Army, the Reserve, and auxiliary troops, and was organised on a peace footing as follows: infantry, 34 battalions, 20 auxiliary battalions, and 49 irregular corps; cavalry, 18 regular regiments, 21 auxiliary regiments and 2 squadrons of army gendarmes, 52 irregular corps, and 26 scout corps; artillery, 5 regiments. In addition there were 1 sapper

battalion, 1 engineer park, 1 telegraph section, 2 war schools, 1 naval school, 1 school of musketry, 1 school for fencing, 1 medical school, and 57 schools for soldiers. Since 1914 the Army has been continuously on a war footing and the Reserve has disappeared. The nominal strength of the Army in 1920 was 119,000, but it is probable that not more than half this number of effectives would be counted on by the Government.

The infantry is armed with 7 mm. Mauser rifle, the cavalry with a carbine of the same type, artillery with Q.F. guns (Saint Chaumont Mondragon and Schneider-Canet).

Attention has been paid to aviation; the machines employed are of Mexican design and construction. There are 2 engineering parks, 2 telegraph stations. Military education is compulsory in all schools throughout the country.

The Navy, which is little more than a police force, consists of the gun-boats *Bravo*, *Morero*, *Vera Cruz*, *Tampico*, *Democrata*, *General Guerrero*, and *Zaragoza*. There are a few old torpedo-boats, a couple of armed transports, and some smaller vessels.

Production and Industry.

Mexico is well suited for agriculture. Within a radius of 300 miles may be produced the crops of the Tropical, Semi-tropical, and Temperate Zones, owing to the varying altitude, the land rising rapidly from the coast to the centre of the country. The soil is rich in all sections. In the tropical regions, in the mountain valleys, and on the great central plateau are millions of acres of virgin soil and millions more which have been barely skimmed by the antiquated methods of agriculture in vogue.

Cultivated lands, 30,027,600 acres; pastoral lands, 120,444,200 acres; forest lands, 43,933,200 acres. Principal products are maize (1,930,121 tons in 1918), cotton (79,653 tons in 1918), henequen (158,066 tons in 1918), wheat (387,522 tons in 1919), coffee, beans. There is a large output of sugar (140,000 tons in 1919) and molasses, valued at about 2,600,000*l.* annually, and the production of spirits is on the increase. There are 1,226 tobacco factories in the Republic.

Timber lands are estimated to extend over 25,000,000 acres and to contain pine, spruce, cedar, mahogany, logwood, and rosewood.

Live-stock in 1920: Cattle, 2,162,984; horses, 929,385; mules, 354,351; asses, 287,939; sheep, 1,089,976; goats, 1,987,869; and pigs, 1,654,089.

The chief Mexican oil-fields may be grouped in five districts:—(1) The Ebanio district, about 40 miles west of Tampico (largely the property of the Mexican Petroleum Company); (2) The Panuco district, including the Topila region; (3) The Huastaca district, south of Tampico, in which the famous 'Casiano,' 'Cerro Azul,' and 'Potrero del Llano' wells occur; (4) The Tuxpam district, including the Furbero region, south-west of Tuxpam; and (5) The Tehuantepec-Tabasco district, in the neighbourhood of Minicitlan. The total number of productive wells in the Republic is (1921) 334. The potential production of all the wells of the Republic is 1,337,012 barrels daily. On December 31, 1919, there were in existence the following constructions for storing petroleum:—882 steel tanks, with a capacity of 4,125,821 cubic meters; 4 concrete tanks with a capacity of 43,718 cubic meters; 15 earthen reservoirs with a capacity of 3,506,653 cubic meters; and one cement reservoir, with a capacity of 136,740 cubic meters. On the same date there were existing 113 pipe lines with a total length of 1,420,970 meters and a conducting capacity of 457,216 cubic meters.

Petroleum was produced as follows:—In 1912, 16,558,215 barrels;

in 1915, 33,910,508 barrels; in 1916, 40,545,712 barrels; in 1917, 55,292,770 barrels; in 1918, 63,828,326 barrels; in 1919, 87,072,954 barrels; and in 1920, 163,540,000 barrels.

Mining is the principal industry in Mexico. It is carried on in 24 of the 31 States and Territories, nearly all the mines yielding silver either alone or in combination with other ores. The following table shows the quantities of mineral products for 1918, 1919, and 1920 :—

Metals	1918	1919	1920
	Kilos	Kilos	Kilos
Gold	25,318	23,566	23,370
Silver	1,944,542	2,049,898	1,979,972
Copper	70,223,454	56,172,235	46,056,900
Lead	98,837,154	71,375,968	121,434,066
Zinc	20,698,995	11,559,685	14,363,057
Antimony	3,278,546	470,738	1,572,376
Tin	13,587	1,588	—
Tungsten	149,486	21,970	34,917
Molybdenum	27,371	1,767	648
Manganese	2,878,383	2,294,227	838,624
Mercury	163,598	118,940	77,229
Arsenic	1,881,011	2,246,378	1,198,806
Amorphous graphite	6,190,849	4,023,015	2,991,529

Coal is produced only in the State of Coahuila. The output is estimated at 900,000 tons annually. Opals are mined in Querétaro.

Commerce. .

The trade of Mexico for 4 years is shown as follows :—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1913	19,577,233	30,040,561	1919	56,517,870	42,446,247
1918	16,461,090	36,730,545	1920	16,839,830 ¹	28,230,917 ²

¹ First six months.

² First eight months.

The principal articles of commerce between the United Kingdom and Mexico for 1920 (according to Board of Trade Returns) were as follows :— Imports: petroleum spirit, 2,820,142l.; fuel oil, 7,054,671l.; lamp oil, 914,273l.; lubricating oil, 230,278l. Exports: cotton piece goods, 995,538l.; other cotton goods, 973,515l.; sodium, 310,185l.; machinery, 333,832l.

Total trade between Mexico and the United Kingdom for 5 years (according to Board of Trade returns) :—

	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Mexico to U. Kingdom	2,316,317	5,125,844	7,178,640	13,444,493	9,859,094
Exports to Mexico from U. Kingdom	917,061	1,093,081	1,312,776	4,344,402	4,595,660

Shipping and Communications.

The most important ports are Vera Cruz and Tampico, both on the Gulf of Mexico.

In 1909 the main railway lines of Mexico were united in one corporation—The National Railways of Mexico. Since 1914 this system and practically all the private lines have been taken over and worked by the government under the name of the Constitutionalist Railways of Mexico. The National Railways of Mexico own 6,818 miles of track and control an additional 1,220 miles. The Mexican Railway has 520 miles of track. The Tehuantepec Railway owns the line (184 miles of track) between Puerto Mexico on the Atlantic to Salina Cruz on the Pacific. The Mexico North-Western Railway owns 512 miles of track. The Southern Pacific Railway of Mexico has about 1,000 miles of track. The United Railways of Yucatan have a length of 500 miles. A railway between Tuluca and Zitacuaro (81 miles) has been commenced.

On December 31, 1918, the Federal telegraph and telephone lines were 110,530 miles. There were other lines belonging to individual States and private persons totalling 5,199 miles in length. There were on December 31, 1918, 528 telegraph offices, 12 telephone offices and 21 wireless stations. Number of telegraph messages in 1921, 5,735,670.

In 1921 there were 2,128 post-offices. The post handled, in 1921, 107,711,571 pieces of mail matter.

A new wireless station has been established on the Island of Lobos, off the coast of Tampico, largely for the purpose of affording the various petroleum companies facilities for communicating with vessels while at sea. It is provided with powerful apparatus and is able to communicate with the wireless stations at Mexico City, Tuxpam, Tampico, Vera Cruz, Progreso, Frontera, Mazatlan, Santa Rosalia, La Paz, Queretaro, Monterrey, Saltillo, Torreon, and by way of Habana with various stations in the United States.

Banking and Credit.

An executive decree of January 31, 1921, provided for the return to their owners of the banks declared in liquidation by the decree of December 14, 1916.

On December 31, 1919, the liabilities of all the banks in the Republic amounted to 410,763,459 pesos, including notes in circulation of 129,984,148 pesos.

It is proposed to set up a Central Bank of issue with a capital of 200 million pesos and the right to issue paper currency to the amount of 20 million pesos.

Money, Weights, and Measures.

By an executive decree of November 13, 1918, the monetary unit is the gold peso or dollar, the legal value of which has been fixed at .75 gramme of pure gold. There are 20-peso (called *aztecas*), 10-peso, and 5-peso gold coins, .900 fine and .100 copper, weighing respectively 163.8333 and 4.1666 grammes. In 1919 American gold coin was decreed to be legal tender at the fixed rate of 1 dollar for 2 Mexican gold pesos. An executive decree of October 27, 1919, provides for the issue of new silver and copper coins. The silver coins are in denominations of 1-peso, 50 and 20 centavos, with a fineness of 720 milligrams of silver and 280 of copper. The copper coins are to be in denominations of 10 centavos, weigh 12 grams, and have a composition of 95 per cent. copper, 2.5 per cent. tin, and 2.5 per cent. zinc. These coins are restricted legal tender up to 20 pesos for the

silver coins and 2 pesos for the copper coins. Bronze coins are 2- and 1-centavo pieces, 95 parts copper, 4 tin, and 1 zinc. There are 5-centavo nickel coins. In July, 1920, the coinage of Mexican money in the Republic consisted of 1,800,000 gold pesos, 3,730,000 silver pesos, and 50,000 pesos in copper coins, or a total of 5,580,000 pesos. The value of the gold peso or dollar in peace time was 24·58 pence.

An enormous quantity of paper money was in circulation, but it has been gradually withdrawn, and on October 1, 1920, 106,787,862 pesos remained in circulation.

The weights and measures of the metric system were introduced in 1884 and their use is enforced by law of June 19, 1895, though the old Spanish measures are still in use. The old weights and measures were:—

<i>Weight.</i>	1 libra = 0·46 kilogramme = 1·014 lb. avoirdupois.
	1 arroba = 25 libras = 25·357 lb. avoirdupois.
<i>For gold and silver.</i>	1 marco = $\frac{1}{2}$ libra = 4,608 granos.
	1 ochava = $\frac{1}{8}$ tomines.
	1 tomin = 12 granos.
	20 granos = 1 French gramme.
<i>Length.</i>	1 vara = 0·837 mètre = 2 ft. 8 $\frac{1}{16}$ English in.
	1 legua comun = 6,666 $\frac{2}{3}$ varas.

Diplomatic and Consular Representatives.

1. OF MEXICO IN GREAT BRITAIN.

First Secretary (in charge of Mexican Legation).—Juan F. Urquidí.

There are Consular representatives at Barrow-in-Furness, Birmingham, Belfast, Bristol, Cardiff, Dover, Dublin, Falmouth, Glasgow, Great Grimsby, Liverpool, Manchester, Maryport, Newcastle, Southampton.

2. OF GREAT BRITAIN IN MEXICO.

Chargé des Archives.—H. Cummins, O.B.E.

Consul-General.—N. King.

There are Consular representatives at Colima, Progreso, Salina Cruz, Vera Cruz, and other towns.

MONACO.

Prince Albert, born November 13, 1848; succeeded his father, Prince Charles III., September 10, 1889; married (1) to Lady Mary Douglas Hamilton, September 21, 1869;¹ (2) to Alice Duchess-Dowager de Richelieu, Oct. 31, 1889. Son by first wife, Prince Louis, born July 12, 1870.

Monaco is a small Principality on the Mediterranean, surrounded since 1860 by the French Department of Alpes Maritimes except on the side towards the sea. From 968 it belonged to the house of Grimaldi. In 1715 it passed into the female line, Louise Hippolyte, daughter of Antony I., heiress of Monaco, marrying Jacques de Goyon Matignon, Count of Thorigny, who took the name and arms of Grimaldi. Antony I. died in 1731, Louise Hippolyte reigning only ten months and dying in 1732. She was succeeded by her husband under the name of Jacques I., who also succeeded Antony I. as Duc de Valentinois, and was in his turn succeeded by his son Honorius III. This Prince was dispossessed by the French Revolution in 1792, and died in 1795. In 1814 the Principality was re-established, but placed under the protection of the Kingdom of Sardinia by the Treaty of Vienna (1815).

In 1848 Mentone and Rocca-bruna revolted, and declared themselves free towns; in 1861 Charles III. ceded his rights over them to France, and the Principality thus became geographically an *enclave* of France, when the Sardinian garrison was withdrawn and the Protectorate came to an end.

The Prince was an absolute ruler, there having been no elective representation within the Principality. But on January 7, 1911, a Constitution was promulgated, which provides for a National Council elected by universal suffrage and *scrutin de liste*. The Government is carried out under the authority of the Prince by a Ministry assisted by a Council of State. The legislative power is exercised by the Prince and the National Council, which consists of 21 members elected for four years. The territory of the Principality is divided into three communes, administered by municipal bodies, in the election of which women are entitled to take part.

In 1819 the Government adopted a code founded upon the French codes and a Court of First Instance, as well as a Juge de Paix's Court. The Principality has its own coinage (it issues only 100-franc pieces) which is current since 1876 in all the States of the Latin Union; it also issues its own separate postage-stamps, and has its own flag.

The small harbour, absolutely sheltered, has an area of 42 acres, depth at entrance 90 feet, and alongside the quay 24 feet at least. The Customs duties are the same as in France.

The area is eight square miles. Population (census January 9, 1913), 22,956. Towns: Monaco, 2,247; La Condamine, 11,082; Monte Carlo, 9,627.

There has been since 1887 a Roman Catholic bishop. A semi-military police force has taken the place of the 'guard of honour' and troops formerly maintained. The value of the commerce of the Principality is not stated. Imports are coal and wine; olive oil, oranges, citrons, and perfumes are exported. The industries and trade are unimportant, and the revenue is mainly derived from the gaming tables. The annual grant for the concession was 80,000*l.* in 1917; in 1927 it will be 90,000*l.*, and in 1937 100,000*l.*

Consul-General for Monaco in London.—Th. Lumley.

British Consul.—J. W. Keogh (residing at Nice).

Acting British Vice-Consul.—W. G. Henley (residing at Monaco).

¹ The religious marriage was annulled by the Apostolic See on January 8, 1880, and the civil marriage declared dissolved by decree of the reigning Prince on July 28, 1880.

MOROCCO.

(MAGHREB-EL-AKSA.—EL GHARB.)

THE Shereefian Empire was founded at the close of the seventh century by Arab invaders, who named it *Moghreb-el-Aksa*, i. e. 'The Farthest West.' In 1912 the country became a French Protectorate, with the exception of Tangier, which is internationalised, and the Spanish zone.

Reigning Sultan.

Mulai Yusef, G.C.M.G., son of Mulai-Hassan, was proclaimed Sultan on August 18, 1912, on the abdication of his brother, Sultan Mulai-Abd-el-Hafid, who received a lump sum of 400,000 francs and an annual pension of 350,000 francs.

The present Sultan of Morocco is the seventeenth of the dynasty of the Alides, founded by Mulai-Ahmed, and the thirty-sixth lineal descendant of Ali, cousin and son-in-law of the Prophet. His five predecessors were:—

Sultan	Reign	Sultan	Reign
Mulai-Abderrahman	. 1822-1859	Mulai-Abd-el-Aziz	. 1894-1903
Sidi-Mohamed	. 1859-1873	Mulai-Abd-el-Hafid	. 1903-1912
Mulai-Hassan	. 1873-1894		

The Shereefian umbrella is hereditary in the family of the Filali Sharifs of Tafilelt. Each Sultan was supposed, prior to death, to indicate the member of the Shereefian family who, according to his conscientious belief, would best replace him. This succession was, however, elective, and all members of the Shereefian family were eligible. This was the case in the past, but now that the protectorate is firmly established, the French Authorities will doubtless see that a suitable Sultan succeeds. They are preparing Mulai-Yusef's eldest son for the throne on his father's death.

Government.

In April, 1912, a treaty was signed at Fez by which the Sultan formally accepted the French Protectorate.

The form of government of the Sultanate, or Empire of Morocco, is in reality an absolute despotism, unrestricted by any laws, civil or religious. The Sultan—who is known to his subjects under the title of 'Amir-el-Mumenin,' or Prince of True Believers—is chief of the State, as well as head of the religion.

As spiritual ruler, the Sultan stands quite alone, his authority not being limited, as in Turkey and other countries following the religion of Mahomet, by the expounders of the Koran, the class of 'Ulema,' under the 'Sheik-ul-Islam.' Since the establishment of the French Protectorate, however, the Sultan has to follow the advice of the French Resident-General (an office created April 28, 1912) in all matters. The Government of the French Protectorate is in the hands of a French and a Sherreefian (native) administration. The Resident-General holds the appointment also of Minister for Foreign Affairs. The Officer Commanding the French troops is Minister of War. The Sherreefian administration consists of six Viziers, viz. (1) the Grand Vizier, (2) Vizier of Justice, (3) Vizier of Crown Lands, (4) Vizier of 'Habous' or Pious Foundations, (5) Delegate Vizier for Instruction, and (6) President of Sherreefian High Court.

The capitals of Morocco are Fez, Taflelt, Marakesh, and Rabat, in each of which towns the Sultan has palaces. The seat of Government is Rabat, where the Resident-General has his residence. The Sultan, however, at times makes lengthy visits to the other capitals.

The negotiations between France and Spain as to their respective rights in Morocco came to an end in the Franco-Spanish Treaty of Madrid, signed on November 27, 1912. In this France acknowledged the right of Spain to exercise its influence in the Spanish zone, the extent of which was clearly defined. (See map STATESMAN'S YEAR-BOOK for 1913.) The north Spanish zone lies along the Mediterranean for some 200 miles in length, with an average breadth of 60 miles but varying in depth. It extends from the Algerian border to the sea, and westward to the town of El Kasar el Kebir, and then by a straight line to the Atlantic. The zone is administered, under the control of a Spanish High Commissioner, by a Calipha (whose headquarters are at Tetuan) chosen by the Sultan from a list of two candidates presented by the Spanish Government. It was further agreed that Tangier and its district should be excluded from the Spanish zone, and become a special zone, some 140 square miles in extent.

The Spaniards had, in 1921, been extending their zone of occupation, and intended to occupy all the territory between Melilla and the old Spanish possession, the island of Alhucomas. In July, however, they met with a serious disaster; their advance posts being captured by the Rifians. The Spanish Government hurried large numbers of troops into their zone, and eventually succeeded in retaking Nadur and Zilnan, and are now gradually pushing on with the intention, it is said, of reoccupying all the lost ground.

French Resident-General.—Marshall Lyautey (held office from April 28, 1912, to December 13, 1916. Re-appointed April 7, 1917).

Spanish High Commissioner.—General Damaso Berenguer, appointed January 25, 1919.

Calipha of the Spanish Zone.—Mulai El-Mehdi, appointed April 19, 1913.

Area and Population.

According to the most recent investigation, the area is about 231,500 English square miles. Of this Spain claims 10,000 square miles for the north zone and 960 for Ifni on the west coast (see under SPAIN). The population consists of Berbers, Tuaregs, Shellahs, and Arabs, and a considerable number of Jews and Negroes. The French Service des Renseignements estimated the native population of the French zone at 5,400,000, the urban population being put at 484,772, of whom 357,814 are Mussulmans, 76,805 Jewish natives and 50,953 Europeans, of whom 1,838 are British,

30,981 French, 11,859 Spanish and 4,418 Italian. By adding to the 5,400,000 of the French zone, 600,000 for the Spanish zones and Tangier (which can only be taken as a rough estimate), we get 6,000,000 as the total population of Morocco.

The following table shows 1920 Census returns for the principal towns in the French zone, and estimates for the principal towns in the Spanish zone:—

French Zone.						Spanish Zone. ¹		
—	Total	Euro- pean	—	Total	Euro- pean	—	Total	Euro- pean
Rabat ...	29,550	7,835	Meknes ...	36,592	2,622	Tetuan ...	30,000	1,000
Salé ...	24,202	1,048	Fez ...	62,698	2,218	Arzila ...	5,000	—
Kenitra ...	9,438	3,064	Marakesh ...	102,107	2,107	Laraiche ...	10,000	—
Casablanca ...	101,690	39,283	Azenmouir ...	14,037	136	Alcazar ...	8,000	—
Mazagan ...	21,495	1,444	Settat ...	5,599	371			
Saff ...	26,396	1,140	Sefrou ...	6,110	61			
Mogador ...	20,309	742	Taza ...	5,461	785	Tangier ...	50,000	12,000

¹ Melilla, Ceuta and other Spanish possessions are not included. Melilla, created a municipality by decree of December 14, 1918, has a total population of 42,590.

An agreement (July 20, 1901) makes the valley of the Wad Gir the boundary between Morocco and Algeria, and to the east of this only those who acknowledge French authority will be permitted to dwell. A French and Moroccan Commission is entrusted with the formation of police arrangements in the region. The number of Christians is estimated at about 87,800, of whom about 11,000 are at Tangier and 39,283 at Casablanca. The total number of Europeans in Morocco, exclusive of French and Spanish troops, is probably about 87,800. The Sultan and his subjects are of the Malekite sect of Sunnite Mohammedans.

The most important languages are French, Spanish, Arabic and the Berber languages, of which there are different dialects spoken in the Socs, the Riff and other Berber tribes.

Instruction.

The number of schools in the French zone has increased from 37 in 1912 to 201 in 1920 (89 French, 72 French Arabic, 40 French Jewish). In 1920, there were in the high schools, 21 teachers, 345 pupils; in secondary schools, 121 teachers, 2,405 pupils; primary schools, 589 teachers, 18,317 pupils; professional schools, 62 teachers, 695 pupils; evening schools, 2,297 pupils. Total, 793 teachers, 24,059 pupils. For the education of the natives there are two Moslem colleges at Rabat and Fez respectively with 272 pupils; three schools for the daughters of notables, with 150 pupils. In Rabat there is a College (or Research Institute) for Arabic and the Berber languages (established in 1920). The Spanish Administration has also opened numerous schools.

Justice.

In November, 1913, French Law Courts (Court of Appeal, Courts of Assize, and Petty Courts, civil and criminal) with a special code of laws were established for the needs of Europeans. Courts of Appeal, both civil

and criminal, have been established for natives, and the administration of justice by the Governors and codes is controlled. Native judges are the *cadis*, religious magistrates who administer justice according to the Koran.

Finance.

Revenue and expenditure of the French zone for five years :—

	1917 (May to December)	1918	1919 ¹	1920 ¹	1921 ¹
	£	£	£	£	£
Revenue . . .	2,235,183	4,360,140	4,097,988	7,256,500	10,760,170
Expenditure . .	1,562,473	3,042,609	3,152,640	5,379,960	10,759,952

¹ Estimates.

The estimated revenue of the Spanish zone for the year 1920-21 was 566,640*l.*, and the expenditure was 566,640*l.* Cost to Spain of the Spanish zone :—(1920-21) Foreign Office, 9,836,900 pesetas ; Ministry of War, 147,893,469 pesetas ; Ministry of Marine, 5,392,460 pesetas ; Ministry of the Interior, 2,148,467 pesetas ; and Ministry of Public Works, 3,692,000 pesetas ; making a total cost to Spain of 168,963,296 pesetas. The same figures were maintained for the budget 1921-22.

The Moroccan debt consists of French loans (1904, 1910, 1914) amounting to 16,224,960*l.* ; and French and Spanish war indemnities, 5,300,000*l.* The French Government, however, decided not to require the Moorish Government to pay the annuities on their war indemnity (2,800,000*l.*) until its financial position enables it to support the charge. The 1904 loan amounted to 2,500,000*l.* and bears interest at 5 per cent. The 1910 loan was for 4,044,960*l.* and also bore interest at 5 per cent. The 1914 loan, guaranteed by the French Government, was for 6,810,000*l.*, and was issued at a rate of interest not exceeding 4·6 per cent. By a law dated March 25, 1916, the 1914 loan was increased to 9,680,000*l.*, thus bringing the total Moroccan debt to 16,224,960*l.* for loans.

Defence.

The Shereefian army is under the supreme command of the Resident-General. The military forces in Morocco are divided into six areas : Rabat, Casablanca, Meknes, Fez, Marrakesh, the region of Oujda and Taza. Each area is commanded by a General Officer, who, except at Rabat and Casablanca, is in charge of the troops, the civil service and the municipality. The French garrison of Morocco was in December 1921 made up as follows :—2 regiments of zouaves, 10 regiments of tirailleurs, 3 regiments of the foreign legion, 1 regiment of colonial infantry, and 6 regiments of mixed colonial infantry (partly French, partly Moroccan). Each of the above regiments is composed of 3 battalions. The cavalry consists of 2 regiments of Chasseurs d'Afrique, and 4 regiments of Spahes ; the artillery of 4 groups of African artillery each of 3 battalions ; the engineers of two battalions. The total personnel was 21,000 French and 44,000 Moroccan auxiliary troops, consisting of :—the Shereefian guard, 6 regiments of infantry + 1 company, 2 regiments of cavalry + 3 squadrons, 2 mountain batteries of artillery, 3 companies of engineers, 1 signal company ; the strength being approximately 16,000. Military expenditure for 1922, 433,083,186 francs.

The Spanish zone is normally divided for military purposes into two zones, under the command of a general stationed at Tetuan, but in consequence of the war in Spanish Morocco this organisation was suspended at the end of 1921.

Production and Industry.

The interior of Morocco, although generally open to travellers, is not permanently occupiable as yet on account of lack of security to both life and property. Immigration is confined principally to the towns and especially to the ports and neighbouring districts. Morocco, therefore, is still in the rudimentary stages of both economic and commercial development, though great progress has recently been made, particularly in the French zone, where measures have been adopted to encourage colonisation, land being sold to Europeans at a comparatively low price for farming purposes on condition that Europeans settle thereon and farm by European methods. Of the 63,275 acres of country properties, French citizens hold 56,515 acres (89 per cent.), other nationalities, 2,765 acres (4 per cent.), and natives, 3,995 acres (7 per cent.).

The soil is capable of agricultural production, but the methods in use are somewhat primitive. The yield of crops (in metric quintals of 220 pounds) in 1920 is given as follows:—barley, 7,225,788; wheat, 4,843,053; beans, 457,755; oats, 21,810; maize and sorgho, 988,623; chickpeas, 138,032; linseed, 259,040. In 1920 the number of animals in the French zone was sheep, 6,708,728; goats, 2,078,658; cattle (bovine), 1,494,173; pigs, 132,240; asses, 414,600; horses and mules, 193,547; and camels, 98,495. The vine is of ancient growth in Morocco. In the regions of Fez, Mequinez, Rabat and Donkkala, there are 14,247 acres of vineyards under native cultivation (5,065,000 plants in 1920). European vineyards are of recent establishment, the first having been planted near Casablanca in 1908; their total area was 4,967 acres in 1920. A great variety of fruit is grown. In 1920 there were in the French zone 1,933,000 olive trees, 125,671 orange and lemon trees, palm trees (date), 302,068, almond trees, 302,368, and figs, etc., 1,990,000. In February, 1911, cotton was introduced. Fish of all kinds abound in Moroccan waters; more especially sardines and tunny. Eggs form one of the principal exports from the Spanish zone; in 1920, 526 tons were exported.

In addition to its agricultural resources, rich mineral deposits of copper, iron, lead, antimony, sulphur, silver, gold, and petroleum are also said to exist in various parts of the country. In 1920, 211,944 tons of iron ore were exported from the Spanish zone, of which 119,705 tons went to the United Kingdom; and 7 tons of silver ore.

Commerce.

Imports and exports of French Morocco for five years:—

—	1916	1917	1918	1919	1920
	£	£	£	£	£
Imports . . .	9,159,327	10,803,621	12,575,199	19,290,895	40,018,978
Exports . . .	3,274,839	4,645,923	4,598,616	9,100,708	10,765,002

In 1919 and 1920 the commerce of French Morocco was distributed as follows:—

From or to	Imports		Exports	
	1919	1920	1919	1920
	Francs	Francs	Francs	Francs
France and Algeria	190,033,199	460,410,487	164,407,287	127,293,521
United Kingdom and Gibraltar	115,401,276	212,133,926	18,926,002	69,932,607
Germany	—	2,708,441	—	61,840
Spain	27,763,434	26,241,065	8,090,502	29,085,179
Belgium	2,054,992	31,976,007	3,447,232	7,640,900
Italy	1,529,841	10,433,266	917,777	4,545,477
Austria-Hungary	—	—	—	—
United States	20,529,838	40,219,850	4,859,008	3,907,934
Portugal	674,331	1,853,388	6,378,087	800,561
Netherlands	1,090,265	6,006,246	—	319,100
Egypt	153,012	46,811	5,360	228,055
Sweden	3,484,682	14,753,241	17,390	24,739
Norway	47,333	313,210	—	—
Tunis	59,075	224,989	25,066	5,107
Other countries	1,220,673	4,825,527	43,146	133,019
Algeria (land frontier)	114,755,445	188,323,000	20,625,000	24,897,000
Total	480,797,396	1,000,474,464	227,742,457	268,875,057

The chief imports and exports of French Morocco for two years were:—

Imports	1919	1920	Exports	1919	1920
	Francs	Francs		Francs	Francs
Cottons	68,064,642	155,419,779	Wool	5,243,285	8,710,462
Sugar	83,069,478	162,896,853	Eggs	44,948,779	29,910,442
Tea	18,423,348	29,779,966	Almonds	9,391,876	14,946,608
Machinery, hardware	9,217,237	82,973,054	Barley	7,664,102	24,192,495
Candles	12,960,455	20,972,229	Beans	12,469,148	31,140,780
Wines, spirits, beer, &c.	15,949,415	33,901,413	Wheat	4,472,646	2,878
Oils, vegetable	8,025,829	5,798,553	Linseed	21,044,162	24,944,227
Woollen goods	3,698,058	8,362,777	Gums	907,488	4,266,952
Soap, unscented	4,298,627	7,984,393	Cumin	2,831,173	2,370,317

In 1918 the imports from Spain into the Spanish zone amounted to 9,096,606 pesetas, and the exports to 2,535,301 pesetas.

Total trade between Morocco and the United Kingdom for 5 years (Board of Trade Returns):—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Morocco to U.K.	553,584	610,180	316,722	1,647,136	1,147,851
Exports to Morocco from U.K.	2,012,389	2,235,781	3,474,032	4,589,993	3,059,406

Shipping and Communications.

Shipping entered (in foreign trade) in the ports of French Morocco in two years:—

Nationality	1918		1919	
	Vessels	Tonnage	Vessels	Tonnage
French	260	254,508	508	533,990
British	94	70,786	156	100,700
Spanish	245	16,161	359	55,378
Others	62	33,652	191	155,640
Total	661	375,107	1,209	845,708

The Moorish Government have now established a postal service under French management. Postal services have long been maintained by the British, French, German and Spanish Governments, with offices at all the ports and at Fez, Mequinez, Alcazar and Marrakesh, but the French have now suppressed their services in the French and Spanish zones, and the Spanish postal service has been suppressed in the French zone. The British services continue. Regular couriers serve all the places named, mails being also sent by all the steamers. There is a daily post to Europe *viâ* Cadiz and Algeciras, also parcel post and money order systems, and an aerial convey service every day between Toulouse and Rabat.

The Moroccan Post Office in 1919 received 10,655,518 letters, 1,293,661 registered letters, and 3,281,586 printed papers; and dispatched 12,300,500 letters, 515,757 registered letters, and 1,547,016 printed papers.

There are telegraphic submarine cables from Tangier to Cadiz (Eastern Telegraph Co.), Tarifa (Spanish Government), and Oran (French Government), and a cable from Brest to Casablanca; also wireless telegraphic stations belonging to the Moorish Government at Tangier, Rabat, Casablanca, Fez, Marrakesh and Mogador. Land telegraph lines have been laid from Tangier to Arzila, Larache, Alcazar, Arbaoua, Mehedja, Rabat, Casablanca, Mazagan, Saffi and Mogador, and from Rabat to Taourirt and Oran. Lines also exist to Fez, Mequinez and Marrakesh and other places in the interior of the French zone. A French cable has been laid from Tangier to Casablanca and a Spanish cable from Tangier to Arzila; also from Casablanca to Oran direct (French). A fairly extensive network is being established in the Spanish zone. The total length of the telegraph lines open to the public on December 31, 1919, was 4,320 miles, carrying 9,037 miles of wire. In 1919, 611,314 telegrams were received and 575,976 were dispatched, exclusive of 384,342 telegrams received and 288,775 sent free of charge (official, etc.).

The following railway lines are being worked:—Oudja to Taza, Taourist, Guercif, and Fez, 223 miles; from Algerian frontier to Oudja, 9 miles; from Fez to Rabat and Casablanca, 210 miles; from Casablanca to Marrakesh, 171 miles. Branch lines are from Guercif to Fritissa, 7 miles; from Taza to Touahar 17 miles; from Ber Rechid to Oued Zem, 82 miles; from Fritissa to Outat-el-Hadj, 66 miles. There is also a branch line from Taourist to Ain Guettar 55 miles. The following line is nearly completed:—Branch line from Meknes to Azroleh and Ain, 74 miles.

In the Spanish zone there is a metre gauge railway from Ceuta to Tetuan, and a small military railway from Rio Martin to Tetuan.

Telephone systems are now in operation in Tangier, and in all the towns of the French Protectorate: Tangier, Arcila, and Larache are connected by telephone. Casablanca, Rabat, and Kenitra have also inter-urban telephone communication and connections are being effected between Casablanca, Rabat, Fez, and Marrakesh. There are telephones also at Sallé, Mazagan, Ber-Rechid and Sellat, and inter-urban lines connecting them all. In 1919 there were in the French zone 2,176 subscribers, who sent 2,483,865 messages.

On January 1, 1920, there were 1,561 miles of main roads and 422 miles of secondary roads in the French zone. In the Spanish zone, in the Melilla district, the Ceuta-Tetuan road is open (26 miles), and roads are now under construction from Tetuan to the frontier of the Tangier zone and from Larache to Alcazar, and in other directions. A main coast road runs from Kenitra to Mogador, whilst from Rabat and Salé a road runs via Meknès, Fez, Taza, and Oujdah to Algeria. From Meknès a road runs south to Azrou and Timhadit on the middle Atlas Plateau, and is the beginning of the Imperial Road to Tafilalet. Further south Marrakesh is connected with the coast by roads running to Casablanca, Mazagan, Safi, and Mogador. A further road runs from Casablanca to Kasba Tadla, and a minor network of military roads (*pistes aménagées*) run all over the country.

Money, Weights, and Measures.

In the French zone the currency is the French franc. The Hassani or native silver coinage comprises dollars, $\frac{1}{2}$ and $\frac{1}{4}$ dollars, and dirhems and $\frac{1}{2}$ dirhems (1 dollar=10 dirhems). On October 8, 1917, the Moorish dollar was officially fixed as equal to the franc, but in October, 1919, the Hassani was set free, as owing to the rise in the price of silver its intrinsic value became greatly enhanced. In 1920 the State Bank of Morocco was authorised to issue a Moorish franc currency based on a gold standard. At Tangier European goods are paid for in Spanish coin or French coin; French coin is much used at Casablanca (Dar-al-Baida) and other ports in the French zone; in other parts of Morocco Moorish coin is now almost exclusively used. On July 27, 1914, the new bronze Hassani coinage was issued. The Rial Makhzani is to be divided into 500 mouzounis, so that the mouzouni may represent a hundredth part of a Hassani peseta. Coins of 2, 5 and 10 mouzounis have been struck. They are of the same type, differing only in size and the figure indicating their value. Spanish notes of 20 pesetas are in circulation in the Spanish zone.

The metric system of weights and measures are current in the French zone; the metric and native systems in the Spanish zone and the Tangier zone. Native measures:—The *Kantar*, used for the produce of the country sold by weight, contains 100 *Rotals*, and is generally equal to about 168 lb., but varies in different districts. The *Kantar*, 100 *Rotals*, equal to 112 lb. English. The *Drah*, 8 *tominis*, about 22 English inches. The Tangier *Mudd*, 8 *tominis*, equal to $1\frac{1}{4}$ English bushel. Oil is sold, wholesale, by the *kula*; that of Tangier actually weighs 28 *rotals*, 47 lb. English, and is equal to about $5\frac{1}{2}$ British imperial gallons.

Diplomatic and Consular Representatives.

OF GREAT BRITAIN IN MOROCCO.

Agent and Consul-General.—M. A. Robertson, C.M.G.

Second Secretary.—W. M. Codrington.

Vice-Consul.—H. B. Johnstone.

There are also Consuls at Casablanca (Dar-al-Baida) and Fez; Vice Consuls at Casablanca (Dar-al-Baida), Larache, Mazagan, Rabat, Saffi, Tetuan, Mogador, and Marrakesh, and Consular Agent at Alcazar and Arzila.

NEPÁL.

An independent Kingdom in the Himálayas, between $26^{\circ} 25'$ and $30^{\circ} 17'$ N. lat., and between $80^{\circ} 6'$ and $88^{\circ} 14'$ of E. long.; its greatest length 500 miles; its greatest breadth about 150; bounded on the north by Tibet, on the east by Sikkim, on the south and west by British India.

The sovereign is His Majesty Mahārājadhīrāja **Tribhubana Bir Bikram Jung Bahádur Shah Bahádur Shumshere Jung**, who was born on June 30, 1906, and succeeded his father on December 11, 1911. The Prince-Royal and Heir-apparent was born on June 11, 1920. The government of Nepál is a military oligarchy. All power is in the hands of the Prime Minister, to whom it was permanently delegated by the Mahārājadhīrāja Surendra Bikram Shah under pressure of the Bharadars or nobles of the State in 1867. The present Prime Minister is His Excellency Mahārāja Sir Chandrá Shumshere Jung, Bahádur Rana, G.C.B., G.C.S.I., G.C.M.G., G.C.V.O., D.C.L., who was appointed on June 26, 1901. He holds the rank of General in the British army.

The Gurkhas, a Rájput race originally from Udaipur in Rajputana, who had settled in the province of Gurkha in Nepál, overran the whole country during the latter half of the eighteenth century, and have maintained their supremacy ever since. A commercial treaty between India and Nepál was signed in 1792, and a British Resident was sent to reside at Katmandu, but was recalled two years later. A frontier outrage, in 1814, compelled the Indian Government to declare war; and a British force advanced to within three marches of the capital. Peace was concluded and the Treaty of Segowlie signed in March 1816. Since then the relations of the British with Nepál have been friendly. In 1854 hostilities broke out between the Nepalese and Tibetans, and in 1856 a Treaty was concluded between the Nepalese

and Tibetan Governments by which the Tibetans bound themselves to pay an annual tribute of Rs.10,000 to Nepál, to encourage trade between the two countries, and to receive a Representative of Nepál at Lhasa. Besides, trade agents are maintained at Gyantse, Kuti, Kerrong, and other trade marts in Tibet.

The Prime Minister of Nepál practically placed the main power of the State at the disposal of the Government of India during the great war. Besides arranging for the enlistment of special battalions of Gurkhas for the Indian Army (in excess of those normally maintained), the Nepál Government sent to India large contingents of their own troops to replace troops sent abroad. In recognition of help freely rendered, an annual present of ten lakhs of rupees is made by the Government of India to the Nepál Government.

In accordance with the treaty of Segowlie, which amongst other things provides that accredited ministers of each shall reside at the Court of the other, a British Envoy, with a small escort of Indian sepoy, lives at the capital; but he does not interfere in the internal affairs of the State.

Area and Population.—Area about 54,000 square miles; population estimated at about 5,600,000. The estimated gross revenue is 15,000,000 rupees. The races of Nepál, besides the dominant Gurkhas, include earlier inhabitants of Tartar origin, such as Magars, Gurangs, and Bhutias. The Newars, who came from Southern India, live in the valley or adjacent to it.

Capital, Katmandu; population about 80,000, and of the surrounding valley 300,000.

Religion.—Hinduism of an early type is the religion of the Gurkhas, and is gradually but steadily overlaying the Buddhism of the primitive inhabitants. The people are in general prosperous. Charitable hospitals have been built at Katmandu and other towns, and charitable dispensaries are established, two in each of the districts east and west.

Defence.—There is a standing regular army of about 30,000, organised in battalions and armed with Lee Enfield and Martini-Henry rifles. An irregular force, nearly as numerous, is armed with old Snider and Enfield rifles. The artillery force has about 250 guns, two batteries being light field pieces, fairly modern, but the rest old smooth-bore muzzle-loading guns.

Trade.—The trade of Nepál with British India during three years ending March 31, 1920, has been as follows (merchandise and treasure):—

From or to Nepál	1918-19	1919-20	1920-21
	£	£	£
Imports into India . . .	3,180,884	1,936,300	2,820,300
Exports from India . . .	1,520,489	3,467,500	5,969,300

The principal articles of export are cattle, hides and skins, opium and other drugs, gums, resins and dyes, jute, wheat, pulse, rice and other grains, clarified butter, oil seeds, spices, tobacco, timber, saltpetre. The chief imports are cattle, sheep and goats, salt, spices, sugar, tobacco, drugs and dyes, petroleum, leather, brass, iron and copper wares, raw cotton, twist and yarn, silk, cotton and woollen piece goods. Nepál possesses very valuable forests in the southern part of the country.

The silver mohar is valued at 6 annas and 8 pies of British Indian currency. Copper pice, of which 50 go to a silver mohar, are also coined. The Indian rupee passes current throughout Nepál.

British Envoy at the Court of Nepál, Kathmandu.—Lt.-Colonel W. F. T. O'Connor, C.I.E., I.A.

Legation Surgeon.—Lt.-Colonel R. E. Molesworth, R.A.M.C.

NETHERLANDS (THE).

(KONINKRIJK DER NEDERLANDEN.)

Reigning Sovereign.

Wilhelmina Helena Pauline Maria, born August 31, 1880, daughter of the late King Willem III., and of his second wife, Princess Emma, born August 2, 1858, daughter of Prince George Victor of Waldeck; succeeded to the throne on the death of her father, November 23, 1890; came of age August 31, 1898, and was crowned September 6 of that year; married to Prince Henry of Mecklenburg-Schwerin, February 7, 1901. Offspring: Princess Juliana Louise Emma Marie Wilhelmina, born April 30, 1909.

The royal family of the Netherlands, known as the House of Orange, descends from a German Count Walram, who lived in the eleventh century. Through the marriage of Count Engelbrecht, of the branch of Otto, Count of Nassau, with Jane of Polanen, in 1404, the family acquired the barony of Breda, and thereby became settled in the Netherlands. The alliance with another heiress, only sister of the childless Prince of Orange and Count of

Châlons, brought to the house a rich province in the south of France; and a third matrimonial union, that of Prince Willem III. of Orange with a daughter of King James II., led to the transfer of the crown of Great Britain to that prince. Previous to this period, the members of the family had acquired great influence in the United Provinces of the Netherlands under the name of 'stadthouders,' or governors. The dignity was formally declared to be hereditary in 1747, in Willem IV.; but his successor, Willem V., had to fly to England, in 1795, at the invasion of the French republican army. The family did not return till November, 1813, when the United Provinces were freed from French domination. After various diplomatic negotiations, the Belgian provinces, subject before the French revolution to the House of Austria, were ordered by the Congress of Vienna to be joined to the Northern Netherlands, and the whole to be erected into a kingdom, with the son of the last stadthouder, Willem V., as hereditary sovereign. In consequence, the latter was proclaimed King of the Netherlands at the Hague on the 16th of March, 1815, and recognised as sovereign by all the Powers of Europe. The union thus established between the northern and southern Netherlands was dissolved by the Belgian revolution of 1830, and their political relations were not readjusted until the signing of the treaty of London, April 19, 1839, which constituted Belgium an independent kingdom. King Willem I. abdicated in 1840, bequeathing the crown to his son Willem II., who, after a reign of nine years, left it to his heir, Willem III. This king reigned 41 years, and died in 1890; in default of male heirs, he was succeeded by his only daughter Wilhelmina.

The Sovereign has a civil list of 600,000 guilders. There is also a large revenue from domains, and in addition an allowance of 50,000 guilders for the maintenance of the royal palaces. The family of Orange is, besides, in the possession of a very large private fortune, acquired in greater part by King Willem I. in the prosecution of vast enterprises tending to raise the commerce of the Netherlands.

Government and Constitution.

I. CENTRAL GOVERNMENT.

The first Constitution of the Netherlands after its reconstruction as a Sovereign State was promulgated in 1814, and was revised in 1815 (after the addition of the Belgian provinces, and the assumption by the Sovereign of the title of King); in 1840 (after the secession of the Belgian provinces); in 1848, in 1887 and in 1917. According to this charter the Netherlands form a constitutional and hereditary monarchy. The royal succession is in the direct male line in the order of primogeniture: in default of male heirs, the female line ascends the throne. In default of a legal heir, the successor to the throne is designated by the Sovereign and a joint meeting of both the Houses of Parliament (each containing twice the usual number of members), and by this assembly alone if the case occurs after the Sovereign's death. The age of majority of the Sovereign is 18 years. During his minority the royal power is vested in a Regent—designated by law—and in some cases in the State Council.

The executive power of the State belongs exclusively to the Sovereign, while the whole legislative authority rests conjointly in the Sovereign and Parliament, the latter—called the States-General—consisting of two Chambers. The Upper or First Chamber is composed of 50 members, elected by the Provincial States. Members of the First Chamber not residing in the Hague, where the Parliament meets, are allowed 10 guilders (16s. 8d.) a day

during the Session of the States-General. The Second Chamber of the States-General numbers 100 deputies, who are elected directly. Members are allowed 5,000 florins (420*l.*) annually, with travelling expenses. Members of the States-General must be Dutch subjects, men or women, and recognised as such.

First chamber (elected 1913): 17 Catholics, 19 Anti-Revolutionists, 4 Protestant Party, 9 old Liberals, 6 Liberal Union, 2 Democrats and 3 Socialists, and 13 others.

Second chamber (elected 1918): 4 old Liberals, 6 Liberal Union, 30 Catholics, 13 Anti-Revolutionists, 7 Protestant Party, 5 Democrats, 22 Socialists, and 13 others.

The electoral reform act, passed December 12, 1917, provides for universal suffrage and proportional representation. The Members of the Second Chamber are, according to the Electoral Reform Act, passed August 9th, 1919, directly elected by citizens of both sexes who are Dutch subjects not under 23 years. Criminals, lunatics, and certain others are excluded; for certain crimes and misdemeanours there may be temporary exclusion. It is stipulated, however, that until further regulations are introduced, the Members of the Second Chamber will be elected by citizens of the Kingdom who are 25 years of age. The electoral body numbered May 15, 1921, 3,299,672 voters, *i.e.* 97·7 per cent. of the number of citizens of 25 years and older.

The members of the Second Chamber are elected for 4 years, and retire in a body, whereas the First Chamber is elected for 9 years, and every 3 years one-third retire by rotation. The Sovereign has the power to dissolve both Chambers of Parliament, or one of them, being bound only to order new elections within 40 days, and to convoke the new meeting within two months.

The Government and the Second Chamber only may introduce new bills; the functions of the Upper Chamber being restricted to approving or rejecting them without the power of inserting amendments. The meetings of both Chambers are public, though each of them, by the decision of the majority, may form itself into a private committee. The ministers may attend at the meetings of both Chambers, but they have only a deliberative vote unless they are members. Alterations in the Constitution can be made only by a bill declaring that there is reason for introducing those alterations, followed by a dissolution of the Chambers and a second confirmation by the new States-General by two-thirds of the votes. Unless it is expressly declared, the laws concern only the realm in Europe, and not the Colonies. The executive authority, belonging to the Sovereign, is exercised by a responsible Council of Ministers. The names of the members of the Ministry are:—

1. *President of the Council of Ministers and Minister of the Interior.*—Jonkheer Dr. Ch. J. M. Ruys de Beerenbrouck: born December 1, 1873; appointed September 9, 1918.

2. *The Minister of Foreign Affairs.*—Jonkheer Dr. H. A. van Karnebeek; born August 21, 1874; appointed September 9, 1918.

3. *The Minister of Finance.*—Jonkheer Dr. D. J. de Geer; appointed July 28, 1921.

4. *The Minister of Justice.*—Dr. Th. Heemskerk; appointed September 9, 1918.

5. *The Minister of the Colonies.*—S. de Graaff; appointed November 13, 1919.

6. *The Minister of War.*—J. J. C. van Dijk; appointed July 28, 1921.

7. *The Minister of Public Works* (Waterstaat).—Dr. A. A. H. W. König; appointed September 9, 1918.

8. *The Minister of Agriculture, Commerce and Industry*.—H. A. van Ysselstein; appointed September 9, 1918.

9. *The Minister of Marine* (ad interim).—J. J. C. van Dijk.

10. *The Minister of Labour*.—Dr. J. P. M. Aalberse; appointed September 25, 1918.

11. *The Minister of Instruction, Science, and Arts*.—Dr. J. Th. de Visser; appointed September 25, 1918.

Each of the above Ministers has an annual salary of 18,000 guilders, or 1,500*l*. The Minister of Foreign Affairs enjoys besides 10,000 guilders for representation.

There is a State Council—'Raad van State'—of 14 members, appointed by the Sovereign, of which the Sovereign is president, and which is consulted on all legislative and a great number of executive matters.

II. LOCAL GOVERNMENT.

The territory is divided into 11 provinces and 1,110 communes (January 1, 1920). Each province has its own representative body, 'the Provincial States.' The members are elected for 4 years, directly from among the Dutch inhabitants of the province who are 25 years of age. Except that they must be inhabitants of the province, the electors are the same as for the Second Chamber. The members retire in a body and are subject to re-election. The number of members varies according to the population of the province, from 82 for Holland (South) to 35 for Drenthe. The Provincial States are entitled to make ordinances concerning the welfare of the province, and to raise taxes according to legal precepts. All provincial ordinances must be approved by the Crown. The Provincial States exercise a right of control over the municipalities. They also elect the members of the First Chamber of the States-General. They meet twice a year, as a rule in public. A permanent commission composed of 6 (in Drenthe 4) of their members, called the 'Deputed States,' is charged with the executive power in the province and the daily administration of its affairs. This committee has also to see the common law executed in the province. Both the Deputed as well as the Provincial States are presided over by a Commissioner of the Sovereign, who in the former assembly has a deciding vote, but in the latter named only a deliberative vote. He is the chief magistrate in the province. The Commissioner and the members of the Deputed States receive an allowance.

Each of the communes forms a Corporation with its own interests and rights, subject to the general law. In each commune is a Council, elected for four years directly, by the same voters as for the Provincial States, provided they inhabit the commune. All the Dutch inhabitants 23 years of age are eligible, the number of members varying from 7 to 45, according to the population. The Council has a right of making and enforcing by-laws concerning the communal welfare. The Council may raise taxes according to rules prescribed by common law; besides, each commune receives from the State Treasury an allowance proportioned to the total number of its inhabitants and to the share which its non-contributing inhabitants have failed to pay towards local taxes. All by-laws may be vetoed by the Sovereign. The Municipal Budget and the resolutions to alienate municipal property require the approbation of the Deputed States of the province. The Council meets in public as often as may be necessary, and is presided over by a Mayor, appointed by the Sovereign for 6 years. The executive power is vested in a college formed by the Mayor and 2—6 Aldermen (wethouders), elected by and from the Council; this college is also charged with the

execution of the public law. The Municipal Police is under the authority of the Mayor; as a State functionary the Mayor supervises the actions of the Council; he may suspend their resolutions for 30 days, but is bound to inform the Deputed States of the province.

Area and Population.

I. PROGRESS AND PRESENT CONDITION.

Population at various census periods:—

1829.	2,618,487	1869	3,579,529	1909	5,858,175
1849.	3,056,879	1889	4,511,415	1920	6,841,155

Area (excluding water) and the population, according to the communal population lists for December 31, 1914 and the Census of 1920:—

Provinces	Area: English square miles (1909)	Population		
		Dec. 31, 1914	Dec. 31, 1920	Per sq. mile 1920
North Brabant . . .	1,920	670,030	732,035	381
Guelders . . .	1,939	681,824	727,636	377
South Holland . . .	1,131	1,537,419	1,070,170	1,477
North Holland . . .	1,066	1,202,652	1,290,723	1,211
Zealand . . .	707	239,676	245,437	347
Utrecht . . .	525	307,547	341,793	651
Friesland . . .	1,243	372,625	382,891	308
Overijssel . . .	1,295	410,826	437,320	338
Groningen . . .	881	345,649	363,589	418
Drenthe . . .	1,028	188,775	208,718	203
Limburg . . .	847	382,682	440,843	530
Total . . .	12,582	6,339,705	6,841,155	544

Of the total on December 31, 1920, 3,397,597 were males and 3,443,558 females.

The area, including the interior waters, amounted in 1909 to 13,196 square miles, whilst the total area, including gulfs and bays, amounted in 1909 to 15,760 square miles.

On June 14, 1918, a law was passed for the purpose of forming a new province by the draining of the Zuiderzee to the extent of 523,000 acres. The work is expected to take 15 years, and the total outlay for the first stage is calculated at 66,250,000 florins.

The rate of increase in each year has been:—

Decade	Per cent.	Decade	Per cent.
1880-1889 . . .	1·18	1900-1909 . . .	1·39
1890-1899 . . .	1·24	1910-1920 . . .	1·42

Year	Population of the principal Towns ¹	Percentage of the whole Population	Rural Population	Percentage of the whole Population
Dec. 31, 1889 . . .	1,550,187	34·36	2,961,238	65·64
" " 1899 . . .	1,984,063	38·07	3,120,074	61·03
" " 1909 . . .	2,369,930	40·45	3,488,245	59·55
" " 1920 . . .	3,113,752	45·51	3,727,403	54·49

¹ The towns with a population of more than 20,000 inhabitants at the census of 1909.

II. MOVEMENT OF THE POPULATION.

Years	Total Births Registered as Living	• Illegitimate	Deaths	Marriages	Surplus of Births over Deaths	Stillborn
1918	167,636	3,788	115,440	49,527	52,196	6,593
1919	164,447	3,355	89,646	58,270	74,801	5,516
1920	192,987	4,112	81,525	65,425	111,462	7,506

The emigration has been as follows, mostly to North America: 1917, 867; 1918, 1,160; 1919, 2,439; 1920, 5,978 (2,977 were males, 1,940 females, and 1,061 children).

The total number of emigrants, Dutch and foreigners, who sailed from Dutch ports was, in 1919, 8,213, and in 1920, 42,337.

III. PRINCIPAL TOWNS.

Population on December 31, 1920 (Preliminary Centres Returns):—

Amsterdam	642,162	Dordrecht	53,989	Emmen	40,749
Rotterdam	510,638	Maestricht	54,012	Deventer	32,013
The Hague	353,286	Leeuwarde	12,978	Helder	28,818
Utrecht	140,189	Apeldoorn	47,807	Breda	29,647
Groningen	89,895	's Hertogenbosch	38,217	Zaandam	28,846
Haarlem	76,853	Enschede	41,254	Gouda	26,267
Arnhem	70,714	Delft	39,539	Amersfoort	31,043
Leiden	65,635	Zwolle	35,619	Flushing	23,025
Nimeguen	66,899	Schiedam	10,535	Alkmaar	24,097
Tilburg	62,808	Hilversum	38,852	Hengelo	26,002

Religion.

Entire liberty of conscience is granted to the members of all religious confessions. The royal family and the majority of the inhabitants belong to the Reformed Church. The State Budget contains fixed allowances for the different churches: for Protestant Churches, about 1,388,000 guilders; for Roman Catholics, about 576,000; and for Jews, about 14,000.

The number of adherents of the different churches in the various provinces, according to the census of 1909 was: Dutch Reformed Church, 2,588,261; Other Protestants, 746,186; Catholics, 2,053,021; Jansenists, 10,082; Jews, 106,409; and other creeds or those of none, 353,158.

The government of the Reformed Church is Presbyterian. At the end of 1912 the Dutch Reformed, Walloon, English Presbyterian, and Scotch Churches had 1 Synod, 10 provincial districts, 44 classes, and 1,362 parishes. Their clergy numbered about 1,640. The Roman Catholic Church had one archbishop (of Utrecht), 4 bishops, and 1,133 parishes. The Old Catholics had 1 archbishop, 2 bishops, and 27 parishes. The Jews had about 171 parishes.

Instruction.

Public instruction (primary) is given in all places where needed, religious convictions being respected. Instruction was made obligatory by the Act of 1900; the school age is from 6 to 13.

In 1806, and more expressly in 1848, secular instruction was separated from religious or sectarian instruction. The law on the point of the year 1879 is still in force. By a modification of the Act of 1887 public instruction is diminished and a greater share in education is left to private instruction, if approved as efficient by the State, in which case it is paid for out of public

funds. The cost of public primary instruction is borne jointly by the State and the communes, the State contributing to the salaries of the teachers and being responsible for 25 per cent. of the costs of founding or purchasing schools.

The Secondary Education Act dates from the year 1863, but it has repeatedly been modified since. Superior instruction is given in the larger communities in public or private schools. Private schools may be endowed by the State, private professional schools also by the province and the community. The Higher Education Act dates from the year 1876, but it has repeatedly been modified since. Higher education is given at Universities, in high schools, and grammar schools, either public or private. Private institutions may be endowed by the State. Tuition in Kindergartens has not been regulated by law.

The following table is taken from the Government returns for 1919-20 :

Institutions	Number	Teaching Staff	Pupils or Students	
			Total	Female
Universities (public) ¹	4	332	5,430	1,266
Technical University.	1	86	2,311	114
Private University	1	17	215	—
High School of Commerce ²	1	32	565	34
Classical (public) schools	34	582	3,526	1,417
Schools for the working people.	555	4,718	58,472	19,253
Navigation schools	12	162	1,160	—
Middle class schools	160	2,594	24,234	7,781
Elementary Schools :				
Public	3,437	19,697	650,459	280,059
Private	2,510	15,618	461,370	251,971
Infant Schools :				
Public	211	1,620 ³	35,600	16,674
Private	1,142	3,476 ³	111,457	56,039

¹ Leiden (founded 1575), Utrecht (1636), Groningen (1614) Amsterdam (1632). In 1918 Veterinary School at Utrecht and the Agricultural School at Wageningen were created the Universities.

² Rotterdam.

³ Figures for the year 1918-19.

Besides the schools named in the table, there is a great number of special schools, mostly technical. Since 1908 there is also a Government school to train functionaries of the colonial service for superior posts.

In 1919 the State spent on education 8,132,000*l.*; the provinces, 75,000*l.*; the Communes, 1,490,000*l.*

Of the conscripts called out in 1913, 0.6 per cent. could neither read nor write, the percentage being highest in Drenthe, 1.5. Of the persons married in 1918, 0.22 per cent. of the males and 0.41 per cent. of the females could not sign the marriage certificate. Of the convicts in 1911, 4 per cent. could neither read nor write. Of the total number of children from 7 to 13 years (school age) on January 15, 1919, 4.71 per cent. received no elementary instruction.

Justice and Crime.

Justice is administered by the High Court of the Netherlands (Court of Cassation), by 5 courts of justice (Courts of Appeal), by 23 district tribunals, and by 101 cantonal courts; trial by jury is unknown in Holland. The Cantonal Court, which deals with minor offences, is formed by a single judge; the more serious cases are tried by the district tribunals, formed as a rule by 3 judges (in some cases one judge is sufficient); the courts are constituted of 3 and the High Court of 5 judges. All Judges are appointed for life by the Sovereign (the Judges of the High Court from a list prepared by the Second Chamber). They can be removed only by a decision of the High Court.

The number of persons convicted was :—

Year	By the Cantonal Courts		By the District Tribunals	
	Male	Female	Male	Female
1916	145,742	15,373	17,606	3,687
1917	127,459	15,431	25,778	4,834
1918	111,981	15,807	29,028	5,680
1919	154,205	17,221	29,881	5,208

The number of inmates in the 28 prisons during the years 1918, 1919, and 1920 was respectively, 12,165, 10,146, and 8,720 males, and 978, 1,247, and 823 females; in the 27 houses of detention, 20,812, 18,682, and 19,240 males, and 1,787, 1,520, and 1,133 females. There are also 5 State-work establishments; three of which (two for males and one for females) are meant for drunkards, beggars and vagabonds; two for smugglers (males), of which one was transformed in December, 1918, into an establishment where a trial is being given to the system of imprisonment spent in common agricultural labour. The numbers of inmates of the first three establishments were respectively in the years 1918, 1919, and 1920, 2,674, 2,679, and 2,119 males, and 412, 356, and 39 females; in the establishments for smugglers there were respectively 9,611, 3,493, and 1,743 inmates (males); in the establishment where a trial is being given to the system of imprisonment spent in common agricultural labour, there were in the year 1920, 3,290 males.

In 1901 an Act was passed reforming State reformatories for the education of juvenile criminals and establishing disciplinary schools for juvenile criminals and for children admitted by request of parents or guardians (*correction paternelle*). The number of inmates during the years 1918 and 1919 in the 6 State reformatories was: 1,394, 1,341 boys, and 118, 123 girls; in the 5 disciplinary schools: 1,145, 1,176 boys, and 173, 162 girls.

There are both State and communal police. The State police consists of field-constables and cavalry. The former are spread over the country, the latter guard the frontiers (eastern and southern). The cavalry police (*maréchaussée*) numbers about 25 officers and about 1,018 men. There are about 1,339—appointed and paid by the Government—field-constables, divided into numerous brigades. Besides each commune has its own field-constables or police force.

Pauperism and Social Insurance.

The relief of the poor is largely effected by the religious societies and organised private charity. The State does not interfere, except when no relief is to be obtained from private charity; in that case the pauper must be supported by the commune where he is living. There is no poor rate in the Netherlands. Mendicity and vagabondage are treated as offences, and persons so convicted can be placed in a State-work establishment. Workhouses for the poor are found in very few communes.

Number of poor relieved in the Kingdom during the year 1919 :—Heads of families, 180,199; other persons, 53,184; lunatics and idiots, 14,422; women in child-bed, 9,666; in asylums (almshouses), 72,578; in hospitals, 74,829; in workhouses, 6,637.

The amount spent on outdoor relief in 1919 was 22,890,008 florins, for lunatics and idiots 11,919,733 florins, for maternity cases 71,464 florins, for asylums 13,364,737 florins, for hospitals 11,440,757 florins, and for workhouses 1,141,841 florins.

On September 19, 1916, a Government scheme for unemployment insurance was set up in Holland.

Finance.

The revenue and expenditure in five years were (12 guilders = £1):—

REVENUE.

Year	Ordinary	Extraord. (loans, &c.)	Total
	Guilders	Guilders	Guilders
1916	329,193,000	30,347,000	359,541,000
1917	565,895,000	29,917,000	595,812,000
1918	591,925,000	37,120,000	629,045,000
1919	740,772,000	45,644,000	786,415,000
1920	873,884,000	43,953,000	917,838,000

EXPENDITURE.

¹ Provisional.

Budget voted for the year 1921 and estimates for 1922 were as follows:—

Branches of Expenditure	1921	1922	Sources of Revenue	1921	1922
	Guilders	Guilders		Guilders	Guilders
Civil list	900,000	900,000	Direct taxes:—		
Legislative body			Land tax	17,250,000	17,567,000
and Royal cabinet	1,868,106	1,986,829	Personal	19,780,000	21,170,000
Department of Foreign Affairs	5,116,875	5,529,520	Tax on capital	12,500,000	12,000,000
Department of Justice	38,641,646	38,686,640	Tax on incomes from trades, professions, &c.	74,000,000	88,000,000
Department of Interior	15,960,211	12,815,572	Tax on dividends	13,500,000	15,000,000
Department of Instruction, etc.	133,632,433	148,121,118	Excise duties	106,700,000	132,000,000
Department of Marine	52,264,692	59,153,751	Indirect taxes	104,000,000	111,000,000
Department of Finance	198,808,725	220,650,384	Import and export duties	47,000,000	42,600,000
Department of War	74,778,355	78,801,418	Tax on gold & silver	1,000,000	901,000
Department of Public Works, etc.	64,373,501	59,535,918	Domains	3,263,000	3,613,000
Department of Agriculture, etc.	95,211,337	69,648,012	State lottery	658,000	670,000
Department of Labour	75,500,610	66,706,380	Pilot dues	2,000,000	2,300,000
Department of Colonies	6,889,873	7,218,465	Tax on mines	500,000	500,000
Public Debt	170,249,589	173,775,596	State railways	4,248,940	4,248,940
Unforeseen expenditure	50,000	50,000	Part paid by the East Indies in the interest and sinking fund of public debt	2,047,163	1,956,368
			Share in the profits of the Bank of the Netherlands	9,480,000	15,000,000
			State mines	66,050,500	43,901,500
			Misc. receipts	68,192,466	94,162,425
Total expenditure	934,245,953 (77,853,829 <i>l.</i>)	938,139,598 (78,178,290 <i>l.</i>)	Total revenue¹	552,170,069 (46,014,172 <i>l.</i>)	606,590,238 (50,549,086 <i>l.</i>)

¹ Excludes defence taxes.

The amount of the chief taxes per head of the population was, in 1920, 106.42 guilders.

The expenditure of the 'Department for the Colonies' entered in the budget estimates only refers to the central administration. There is a separate budget for the great colonial possessions in the East Indies, voted as such by the States-General. The financial estimates for the year 1922 are distributed between the colonies and the mother country in the following proportions:—

	Guilders		Guilders
Expenditure in the colonies	710,339,019	Revenues in the mother country	44,038,070
Home Government expenditure	214,373,361	Revenues in the colonies	690,453,771
Total expenditure	924,717,380 (77,059,781L.)	Total revenue	734,491,841 (61,207,653L.)

In the Budget for 1922 the national debt is given as follows:—

	Nominal Capital	Annual Interest
Funded Debt	Guilders	Guilders
2½ per cent. debt	560,442,000	14,011,059
3 " " debt of 1895, 1898, 1899 and 1905	455,940,000	13,678,192
3½ " " debt of 1910	44,290,000	1,550,141
4 " " debt of 1916	123,650,000	4,946,000
4½ " " debt of 1916 and 1917	604,746,000	27,213,570
5 " " debt of 1918 and 1919	713,082,000	35,839,175
Floating debt	—	32,362,000
Annuities	—	1,018,559
Sinking fund	—	39,699,400
Total debt	2,502,150,000 (208,512,500L.)	170,318,096 (14,193,174L.)

During the years 1850–1920, 534,727,385 guilders have been devoted to the redemption of the public debt.

The rateable annual value of buildings was given at 229,298,627 guilders in 1920, and of land, 98,325,297 guilders.

The various provinces and communes have their own separate budgets; the provincial expenditure for 1918 was 50,148,548 guilders; the revenue at 56,514,730 guilders; the communal expenses in 1918 amounted to 850,615,000 guilders, whereof 347,812,000 guilders for debt. The communal revenues were, in the same year, 819,159,000 guilders.

Defence.

I. FRONTIER.

The Netherlands are bordered on the south by Belgium, on the east by Germany. On the former side the country is quite level, on the latter more hilly; the land frontier is open all round. The frontiers are defended by few fortresses. The scheme of defence adopted in 1874 contemplates concentration of the defensive forces in a restricted area, known as the 'Holland Fortress.' This comprises the provinces of North and South Holland, with parts of Zeeland and Utrecht. Two-thirds of the area is surrounded by the sea. On the land side, to the East and South, are lines of more or less permanent works, which can be rendered very difficult of attack by inundations. There are also strong works on the coast, notably

the Helder group, barring access to the Zuiderzee, and the Hollandsch Diep and Volkerak position, while the entrances to the Amsterdam and Rotterdam ship canals are defended by powerful forts. The citadel of the whole is Amsterdam, which is well fortified. Here also inundations would almost preclude a successful attack. The coast defences are in good order and are to be further strengthened, but the defences on the land side, except the position of Amsterdam, have of late years been neglected. Moreover, the control of the inundations is not entirely in military hands.

Apart from the Holland Fortress are the works on the Western Schelde. These have hitherto been unimportant, but a plan has been adopted to augment them by entirely new works at Flushing.

II. ARMY.

According to an Act of 1912, service in the army is partly voluntary and partly compulsory; the voluntary enlistments bear a small proportion to the compulsory. Every Dutch citizen and, in certain circumstances, every other resident in the Netherlands, is liable to personal service in the army (or navy) from the age of 19 up to 40. Actual service in the ranks is determined by lot, but substitution is not permitted. The maximum strength of the annual contingent is fixed at 25,500 (including 600 for the sea service).

The conscripted militiamen belong to the active army for 6 years for the unmounted corps, and 8 years for the mounted corps (sea service 5 years). The 'full' training time is 8½ months in the infantry, engineers, and garrison artillery (under certain circumstances 6½ months), and 24 months in the cavalry, horse and field artillery. A certain proportion of the full-course men of the infantry and garrison artillery (between 3,800 and 4,500 men, designed by lot) are retained for an additional 44 months. The full-course men are called up in two batches, two-thirds in January (March), one-third in October.

With regard to further training, men belonging to mounted corps are liable to be called out once in their army service for 4 weeks; the others, once for 4 and the second time for 3 weeks.

After having fulfilled their active service the militiamen pass to the 'landweer' for 5 years; they can be called out once in their 5 years, for 6 days. Men of mounted corps and of the navy are excused from landweer service. Men after they have completed their landweer service belong to the 'landstorm' up to the age of 40, together with all men who have not passed through the ranks.

The landweer forces are organised in units corresponding to those of the first line, except that there are no mounted troops. Cadres are maintained in time of peace for the landweer formations.

The field army consists of 4 divisions and an independent cavalry brigade. A division contains 3 brigades of infantry each consisting of 2 regiments of 3 battalions, 1 squadron, a field artillery regiment (16 three-gun batteries, 48 guns), a group of 2 four-gun batteries of heavy artillery, 2 companies of cyclists, 54 machine guns, and 2 companies of engineers. The total strength of a division in the field, with staff, would be about 20,000 officers and men. The cavalry brigade has 4 regiments, each of 3 squadrons, 4 companies of cyclists and 4 three-gun batteries of horse artillery. There are also 66 battalions of army troops, of which 48 are Landweer battalions. The landweer troops, with the fortress artillery of the active army, would hold the fortresses.

The peace strength of the Netherlands army, including the 'landweers,' was on April 2, 1921, 7,843 officers and 251,444 men, and comprises 137,356

rifles, 156 field and 42 heavy guns. There are 156,000 additional trained men, and 250,000 untrained men available for mobilisation. Military budget for 1922 was 73,801,418 florins. A Bill has been passed to spend about two millions sterling on the coast defences, including armament.

The Netherlands infantry is armed with the Mannlicher magazine rifle, model 95. Cavalry and engineers carry the Mannlicher carbine. The field artillery, including the horse batteries, is armed with a shielded Q.F. Krupp gun of 7.5 cm.

III. NAVY.

The Navy is maintained for a double purpose—viz. the protection of the Dutch waters and coast, and the defence of the East Indian possessions. These latter contribute to the maintenance of that division of it known as the Indian Marine. A Bill has been introduced for adding to the Navy vessels for the defence of the Dutch East Indies.

Following is a list of the principal ships of the Dutch Navy.

Name	Displacement, Tons	Armour water line	Max. Armour on gun	Principal Armament	Torpedo Tubes	Indicated Horse-power	Nominal Speed Knots	Designed
COAST DEFENCE SHIPS								
Hertog Hendrik . . .	5,080	6	10	2 9.4-in., 4 6-in.	3	6-7,000	17	'98
Koningin Regentes . . .								
De Ruijter . . .								
Tromp . . .	5,300	6	10	2 9.4-in., 4 6-in.	3	6-7,000	17	'95
Zeven Provinciën . . .	6,530	6	10	2 11-in., 4 6-in.	—	7,500	16	'08
CRUISERS								
Zeeland . . .	3,900	deck	—	2 5.9-in., 8 4.7-in.	4	10,000	20	'95
Gelderland . . .	4,030	deck	—	10 4.7-in. . .	1	„	20	'97
Java . . .	7,050	3-in.	—	10 6-in., 4 3-in.	—	65,500	30	'16
Sumatra . . .								

There are also 3 armoured gunboats, and 4 others of little value in home waters, and about 9 in the East Indies; 20 small destroyers; 14 submarines; a submarine dépôt ship and 14 mine layers. A British submarine interned was bought by the Dutch Government and taken over in June, 1917, as O8. The Hertog Hendrik, Koningin Regentes, De Ruijter, Zeven Provinciën, Java and Sumatra are assigned to the East Indies Fleet.

Production and Industry.

I. AGRICULTURE.

The surface of the Netherlands was divided in 1920 as follows (in hectares: 1 hectare=2.47 acres):—Uncultivated land (heath) 481,691; water and morass, 127,841; dykes and roads, 58,983; untaxed land, 75,212; building land, houses, &c., 55,568. Total, 798,795. Cultivated land: arable land, 905,614; pasture, 1,219,084; gardens and orchards, 93,700; forest, 247,785. Total, 2,465,183.

Large estates prevail in the provinces of Zealand, South Holland, Groningen, and North Holland; small estates in North Brabant, Guelders, Limburg, and Overijssel.

The areas under the principal crops, in acres, were as follows :—

Products.	1918	1919	1920	Products.	1918	1919	1920
	Acres	Acres	Acres		Acres	Acres	Acres
Winter wheat . . .	101,582	141,340	138,957	Brown mustard seed . . .	1,220	607	1,692
Summer wheat . . .	20,477	28,545	18,792	White mustard seed . . .	1,290	1,312	3,292
Winter rye . . .	450,067	498,132	494,855	Caraway seed . . .	10,052	1,522	2,427
Summer rye . . .	20,782	4,635	—	Flax . . .	30,675	24,565	54,107
Winter barley . . .	31,210	34,107	35,515	Tobacco . . .	915	666	985

Oats . . .	2,388,823	2,701,545	2,661,000	Flax . . .	3,617	5,272	7,125
Rye . . .	1,296,293	1,955,310	2,080,625				

According to the live-stock census of March 5, 1919, Holland possessed 362,011 horses, 1,968,609 cattle, 437,075 sheep, and 449,829 pigs.

II. MINING AND MANUFACTURES.

A few coal-mines are found in the province of Limburg; some of them belong to the State. The quantity of coal extracted in 1920 was 3,940,590 metric tons, valued at 102,788,000 guilders. In 1920 the private mines produced 2,168,880 tons, and the State mines, 1,772,210 tons; total for 1919, 3,940,590 tons. There is one salt mine at Bockelo.

There are no official returns of all the manufacturing industries. According to the last reports there were, in 1920: 352 distilleries, 8 sugar refineries, 21 beet-sugar refineries, 23 salt works, and 257 breweries.

III. FISHERIES.

In 1920, 6,083 vessels of all kinds were engaged in the fisheries, with crews numbering about 16,809. The produce of the herring fishery in the North Sea was valued at 20,935,230 guilders in 1920. The quantity of oysters produced in 1920 amounted to 2,946,510 kilos.

Commerce.

The Netherlands is a free-trading country. A few duties are levied, but they have only a fiscal or statistical, not a protectionist, character.

Treaties of commerce and navigation between the Netherlands and Great Britain were signed in 1837, 1851 and 1889, and (having special reference to the colonies) in 1815, 1827,

and 1871, providing, amongst other things, for the 'most favoured nation' treatment. The treaties of 1837, 1851, and 1889, are terminable on a year's notice, with exception of that of 1851, which is terminable on six weeks' notice, when the privileges granted by the Netherlands law of 1850 may be withdrawn. For the treaties of 1815, 1827 and 1871 no time of notice has been stipulated.

The following are the returns of the imports for home consumption and the export of home produce for six years (in thousands of guilders):—

Year	Imports	Exports	Year	Imports	Exports
1916	1,883,600	1,387,090	1919	2,825,740	1,411,310
1917	964,730	819,250	1920	3,367,772	1,748,549
1918	608,360	381,210	1921	2,288,503	1,471,564

The values of the leading articles of import and export in the last two years were (in thousands of guilders, 12 guilders = 1*l.*):—

	Imports		Exports	
	1920	1921	1920	1921
Iron and steel of all kinds	298,825	137,160	50,204	32,822
Textiles, raw and manufactured	338,970	274,499	259,409	148,548

France	42,350	80,184	France	47,842	60,735
Sweden	56,204	85,358	Switzerland	16,476	45,134

The principal articles of trade between the United Kingdom and the Netherlands (Board of Trade Returns) in two years were :—

Imports into U.K. from Netherlands	1919	1920	Exports of produce and manuf. of U.K. to Netherlands	1919	1920
	£	£		£	£
Flax	987,403	1,049,096	Cottons	3,270,106	3,143,060
Fish	247,720	281,569	Cotton yarn	5,621,597	8,434,598
Cheese	668,289	724,194	Coal	1,368,951	923,744
Butter	20,812	1,583,482	Iron	3,395,269	4,572,030
Margarine	2,223,017	5,231,770	Machinery	908,907	2,033,814
Paper, Strawboard	1,868,118	3,253,261	Boots and Shoes	192,574	480,210
Sugar	1,215,613	50,763	Woollens	2,753,333	3,314,795
Tomatoes	412,127	768,281	Soda compounds	160,125	215,883
Condensed milk	1,084,221	2,639,372	Cottonseed oil	1,240,478	382,761

Much of the trade here entered as with the Netherlands consists of goods on transit from and to Germany, notably the imports of silk goods and metal goods.

Total trade between the Netherlands and the United Kingdom (in thousands of pounds sterling) for 5 years (Board of Trade Returns) :—

	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Netherlands to U.K.	19,903	7,670	21,658	39,253	38,857
Exports to Netherlands from U.K.	20,796	14,986	34,316	47,699	27,328

Shipping and Navigation.

The number of vessels in the mercantile navy at the end of 1919 was :—
Sailing vessels 283, of 27,713 English tons ; steamers 570, of 804,307 English tons.

The following table gives the number and tonnage (in English measurement) of vessels which entered and cleared the ports of the Netherlands :—

<i>Entered.</i>						
Year	With Cargoes		In Ballast		Total	
	No.	Tonnage	No.	Tonnage	No.	Tonnage
1919	5,647	6,009,525	1,435	1,088,191	7,082	7,097,716
1920	8,317	6,691,234	2,797	1,359,166	11,114	8,050,400
1921	10,702	6,422,519	3,372	1,628,584	14,074	8,051,114
<i>Cleared.</i>						
1919	4,408	3,663,276	3,062	3,587,044	7,470	1,700,309
1920	7,712	4,911,739	3,708	3,184,277	11,420	7,250,320
1921	9,995	5,129,672	4,143	2,631,012	14,138	7,760,684

Of the total number in 1921, 4,340 Dutch vessels entered with a tonnage of 2,847,144, and 9,734 foreign vessels with a tonnage of 5,203,969 ; 4,322 Dutch vessels cleared, with a tonnage of 2,572,359, and 9,816 foreign vessels with a tonnage of 5,188,327.

The vessels with cargoes which entered at the chief ports were as follows :—

Port	<i>Entered</i>					
	1920			1921		
	Number	Tons	per cent.	Number	Tons	
Rotterdam	4,015	4,032,352	58·7	5,750	3,935,275	
Amsterdam	1,650	1,143,417	22·0	2,122	1,340,248

Flushing	310	204,691	4·5	349	155,697	
Hook of Holland	298	229,342	4·4	325	167,725	

Internal Communications.

I. CANALS AND RAILWAYS.

The total extent of canals is about 2,000 miles; of roads about 3,000 miles.

In 1920 the total length of the principal tramway lines was 1,830 miles; 347,557,000 passengers were carried, and 1,402,000 kilogrammes of goods. Their revenue amounts to 37,028,000 guilders.

In 1920 the 2 principal railways had a length of 2,377 miles. The breadth of the railway gauge is 1·50 metres, or 4 ft. 11 in. In 1920 54,794,000 passengers and 16,884,000 metric tons of goods were carried on the railways. The revenue was 196,234,000 guilders. All railway companies are private; there is a State railway company, only so named because the road is owned by the State. A project is on foot for bringing the four railway companies under one control.

II. POST AND TELEGRAPHS.

The postal traffic was as follows in 2 years :—

—	Letters	Post Cards	Newspapers and Printed Matter	Parcels	Letters with Money Orders
1919					
Internal .	193,189,000	157,794,000	405,789,000	13,083,000	823,206
Foreign .	45,085,000	13,402,000	22,270,000	1,097,000	135,236
1920					
Internal .	192,868,000	131,892,000	401,018,000	8,822,000	671,784
Foreign .	59,383,000	18,725,000	29,747,000	1,967,000	181,800

The receipts of the Post Office in 1920 were 40,160,000 guilders, the expenditure in 1920 61,052,000 guilders.

There are several private telegraph lines, but most of the lines are owned by the State. The length of State lines on Dec. 31, 1920, was 5,440 miles, the length of wires 29,209 miles. The number of State offices was, on December 31,

1920, 1,455. The number of paid messages by State and private lines in 1920 was 9,763,300. The receipts of the State amounted in the same year to 10,006,000 guilders, and the ordinary expenses in 1920 to 12,451,000 guilders.

In 1920 the interurban telephone system had 2,512 miles of line and 85,397 miles of wire, and is administered by the State; 10,482,883 interurban and 758,558 international conversations were held. The receipts were in the same year for interurban and international intercourse 14,443,000 guilders; the total expenses in 1920 8,485,000 guilders.

Money and Credit.

The money in general circulation is chiefly silver. Before 1875 the Netherlands had the silver standard; but a bill which passed the States-General in the session of 1875 allowed an unrestricted coinage of ten-guilder pieces in gold, whereas the coinage of silver was suspended for an unlimited time.

Value of money minted during the following years (in thousands of guilders):—

Year	Gold	Silver	Copper and Nickel	For the East and West India Colonies	Total value	Total number of pieces
1881-1900	8,564	13,710	1,310	10,834	34,418	452,342,090
1901-1910	992	33,870	2,005	15,230	52,097	400,679,000
1914-1919	11,385	53,100	1,703	19,278	120,061	561,638,476
1920	—	—	—	124	114	11,400,000

The Bank of the Netherlands is a private institution, but it is the only one which has the right of issuing bank-notes. This right, granted in 1863 for 25 years, was prolonged in 1888 for 15 years, and prolonged again for the same term in 1903, with some alterations in the conditions; e.g. all the paper money is to be issued by the Bank. In 1918 the Charter was once more prolonged for a further 15 years. The Bank does the same business as other banks, only with more guarantees. Two-fifths of the paper money in circulation must be covered. It has agencies in all places of importance.

Year	Notes in Circulation, March 31	Total Exchanges years ending March 31	Stock of Gold, March 31	Stock of Silver, March 31
1920	1,051,722,000	1,618,251,658	1,000 guilders 634,871	1,900 guilders 8,432
1921	1,039,316,000	1,847,486,105	621,033	16,687
1922 ¹	2,823,000,000	—	613,027 ²	—

¹ February 21.

² Gold and silver.

The capital amounts to 20,000,000 guilders, the reserve fund in 1915 to 5,000,000 guilders. The Bank keeps the State-Treasury and the cash of the State Postal Savings-Bank and of other institutions. It receives $3\frac{1}{2}$ per cent. of the clear gains; the remainder is divided between the State and the Bank in proportion of 2 : 1.

There are many savings-banks, all private. Besides these there is a State postal savings-bank, established in 1881. The following table gives some particulars of both :—

Year	Number of Savings Banks	Amount deposited (in 1,000 gldrs.)	Amount withdrawn (in 1,000 gldrs.)	Total Deposits at end of year (in 1,000 gldrs.)	Number of Depositors at end of year	Amount per inhabitant. Gldrs.
1918						
State P. S. B.	—	104,885	91,768	241,755	1,816,735	35·67
Private banks	291	82,669	65,218	176,407	561,179	26·02
1919						
State P. S. B.	—	137,836	117,919	268,188	1,887,362	30·26
Private banks	287	106,618	83,105	205,240	603,133	30·04
1920						
State P. S. B.	—	124,983	127,038	272,954	1,908,305	39·90

On June 30, 1921, the total deposits in the Postal Savings-Bank was 274,632,863 guilders, credited to 1,912,355 depositors.

Money, Weights, and Measures.

MONEY.

The standard coin is the 10-florin piece weighing 6·720 grammes, ·900 fine, and thus containing 6·048 grammes of fine gold. The unit of the silver coinage is the gulden or florin, weighing 10 grammes, ·945 fine and containing 9·45 grammes of fine silver.

Gold is legal tender, and the silver coins issued before 1875.

The principal coins are :—

The *gulden*, *guilder* or *florin* of 100 cents = 1s. 8d. ; or 12 g. = £1.

The *rijksdaalder* = 2½ guilders.

The gold-piece of ten guilders and of five guilders.

½ guilder, ¼ guilder (*kwartje*), ⅛ guilder (*dubbeltje*).

Cent coins are: of nickel, 5 cents; of bronze, 1 cent, ½ cent, and 2½ cents.

WEIGHTS AND MEASURES.

The metric system of weights and measures, and, with trifling changes, the metric denominations are adopted in the Netherlands.

Diplomatic and Consular Representatives.

1. OF THE NETHERLANDS IN GREAT BRITAIN.

Envoy and Minister.—Jonkheer R. de Marees van Swinderen (October 13, 1913).

First Secretary.—R. C. T. Roosmale Nepveu.

Attaché.—A. Loudon.

Naval Attaché.—Capt. K. F. Sluys.

Commercial Attaché.—F. 's Jacob.

Director of the Chancery.—H. N. Brouwer.

Consul-General in London.—H. S. J. Maas ; appointed 1897.

2. OF GREAT BRITAIN IN THE NETHERLANDS.

Envoy and Minister.—Sir C. M. Marling, K.C.M.G., C.B. Appointed November 25, 1921.

First Secretary.—H. Knatchbull-Hugessen, C.M.G.

Third Secretary.—Sir Adrian Baillie.

Military Attaché.—Lieut.-Col. A. C. Temperley, C.M.G., D.S.O.

Commercial Secretary.—R. V. Laming, O.B.E.

Consul-General at Rotterdam.—W. N. Dunn.

There are consular representatives at Amsterdam (C.G.), Dordrecht, Flushing, The Hague, Groningen, Harlingen, and Ymuiden.

Colonies.

The colonial possessions of the Netherlands, situated in the East Indies and the West Indies, embrace an area of about 783,000 English square miles. The total population, according to the last returns (December 31, 1917), was, approximately, 47,149,903, or nearly seven times as large as that of the mother-country.

DUTCH EAST INDIES.

The Dutch possessions in Asia, forming the territory of Dutch East India (Nederlandsch Oost Indie), are situated between 6° N. and 11° S. latitude, and between 95° and 141° E. longitude.

In 1602 the Dutch created their East India Company. This Company conquered successively the Dutch East Indies, and ruled them during nearly two centuries. After the dissolution of the Company in 1798 the Dutch possessions were governed by the mother-country.

Government and Constitution.

Politically, the territory, which is under the sovereignty of the Netherlands, is divided into (1) Lands under direct government ; (2) Subject native States.

With regard to administration, the Dutch possessions in the East Indies are divided into residencies, divisions, regencies, districts, and *dessas* (villages). They are also very often divided into: (1) Java and Madura ; (2) the Outposts—Sumatra, Borneo, Riau-Lingga Archipelago, Banca, Billiton, Celebes, Molucca Archipelago, the small Sunda Islands, and a part of New Guinea.

Java, the most important of the colonial possessions of the Netherlands, was formerly administered, politically and socially, on a system established by General Johannes Graaf Van den Bosch in 1832, and known as the 'culture system.' It was based in principle on the officially superintended labour of the natives, directed so as to produce not only a sufficiency of food for themselves, but a large quantity of colonial produce best suited for the European market. To-day, however, the old system no longer exists.

The whole of Java—including the neighbouring island of Madura—is divided into seventeen residencies, each governed by a Resident, assisted by several Assistant-Residents and a number of subordinate officials, called *Contrôleurs*. The Resident and his assistants exercise almost absolute control over the province in their charge ; not, however, directly, but by means of a vast hierarchy of native officials. The Outposts are administered by functionaries with the titles of 'Governor,' 'Resident,' 'Assistant-Resident,' 'Contrôleur,' &c.

The superior administration and executive authority of Dutch India rest in the hands of a Governor-General. He is assisted by a Council of five members, partly of a legislative, partly of an advisory character. The members of the Council, however, have no share in the executive. The Governor-General and the members of the Council are nominated by the Queen. In 1917 a 'Volksraad' was installed to discuss the budget, and to advise the Government on matters of general importance as a first step towards the development of self-government in the colony. Some of the members are appointed by the Government, some are elected by the local councils. It includes Europeans, natives and foreign Orientals (Chinese, Arabs).

Governor-General.—Dr. D. Fock, appointed September 28, 1920.

The Governor-General represents not only the executive power of government, but he has a right of passing laws and regulations for the administration of the colony, so far as this power is not reserved to the legislature of the mother-country. However, he is bound to adhere to the constitutional principles on which the Dutch Indies are governed, and which are laid down in the 'Regulations for the Government of Netherlands India,' passed by the King and States-General of the mother-country in 1854, and altered many times since.

Area and Population.

	Area: English square miles	Population 31 Dec. 1905 (Census)	Population Nov. 1920 (Census)
Java and Madura	50,557	30,098,008	35,017,204

¹ Tolerably accurate.

⁴ A province created in 1920.

⁵ Excluding New Guinea.

² Approximate.

³ Mere conjecture.

⁶ No information available.

According to the Census of 1920, 24,443,902 were males and 24,717,145 were females; 169,355 were Europeans, 48,112,706 natives, and 878,986 other Orientals, chiefly Chinese and Arabs.

Marriages, births, and deaths among Europeans and persons assimilated to them :—

	Marriages		Births		Deaths	
	1917	1918	1917	1918	1917	1918
Java and Madura	1,178	1,105	3,419	3,655	1,732	2,484
Outposts	159	164	1,040	1,025	411	551

The whole population of the colony is legally divided into Europeans and persons assimilated with them, and natives and persons assimilated with these. The former generally live under the same laws as the inhabitants of the mother-country, while in the government of the latter the Indian customs and institutions are considered. The Governor-General, however, is, in agreement with the Council, authorised to make individual exceptions to this rule.

Religion.

Entire liberty is granted to all religious denominations. The Reformed Church counted, in 1921, 37 ministers and 29 assistants, the Roman Catholic 33 curates and 90 priests, not salaried out of the public funds. In 1921, about 570 missionaries of various societies were at work.

The bulk of the natives are Mohamedans, there are also some millions of converted Christians and Animists, and a small number of Buddhists.

Instruction.

There are public (Government) primary schools, where instruction is given through the medium of the Dutch language, for (1) Europeans and persons assimilated with them (a 7 years' course); (2) Chinese ('Dutch-Chinese schools,' with a 7 years' course); and (3) Natives ('Dutch-Native schools,' with a 7 years' course). Public schools where instruction is given through the medium of a native tongue are (1) the 'second class' schools (with a 3, 4, or 5 years' course); and (2) 'Désa schools' (with a 3 years' course of extremely elementary instruction). Besides, there are schools with an extended primary instruction (in the Dutch language) with a 3 years' course (Mulo-schools) open to all, without distinction of race. Side by side with the public schools, there are various private schools.

For secondary education there are public secondary schools with 5 and 3 year courses in connection with the primary schools, and also with 3 year courses in connection with the extended primary school. In addition to the Government institutions there are private secondary schools for girls with a 3 years' course. Higher education is given at the Technical High School at Bandoeng, erected in 1920.

The following table shows the number of schools, the school attendance, the teaching staff, and the expenditure on education in 1921 :—

Schools	Number	Teaching Staff	Pupils	Cost (in guilders)
Public European primary schools	196	840	27,160	11,144,440
Private " " "	58	326	9,840	
Public Dutch-Chinese " "	34	210	7,975	
Private " " "	14	62	2,240	
Public Dutch-Vernacular " "	148	988	30,589	
Private " " "	67	211	7,239	

Schools	Number	Teaching Staff	Pupils	Cost (in guilders)
Public second-class for Natives	1,845	7,044	241,414	
Private schools for Natives	2,368	3,773	118,556	
Désa-schools	7,183	—	396,408	
Public Mulo-schools (extended primary)	18	156	2,634	858,434
Private " " "	5	21	280	61,000
Public secondary schools	7	194	2,546	1,765,968
Private " " "	6	78	349	102,000

Furthermore, there were in 1921 the following training schools :—Four public schools for training in engineering, architecture, and mining (4 years' course) and one trading school (3 years' course), with 117 teachers and 1,817 pupils; one private trade school (3 years' course), with 14 teachers and 110 pupils; one 2 years' and one 3 years' commercial school with 110 pupils; one 1 year's navigation course with 14 pupils; two training schools for physicians (9 years' course) with 38 teachers and 397 pupils; a training school for native jurists (6 years' course) with 9 teachers and 92 pupils; a training school for civil-service officers, a training school for police officers, 9 training schools for native officials (7 years' course) with 76 teachers and 853 pupils; 6 training schools for European teachers (2 and 3 years' course) with 141 pupils, and 13 private schools with 251 pupils.

For native teachers there are the following schools with instruction in the Dutch language: 13 (1 for girls) public training schools (5 years' course), and two higher training schools (3 years' course) with 970 pupils (143 girls); with instruction in the native tongue; 21 (5 for girls) normal schools (4 years' course, 1,432 pupils, 228 being girls), 16 normal classes (2 years' course, 562 pupils), and 106 classes (2 years' course) for native teachers for Désa-schools. Besides, there are 20 private training schools with the Dutch language (6 years' course, 1,129 pupils), and 16 with a native tongue (4 years' course, 776 pupils).

For Chinese teachers there is a school with instruction in the Dutch language (77 pupils)

Justice and Crime.

The administration of justice for Europeans is entrusted to European judges, while for natives their own chiefs have a large share in the trial of cases. There is a High Court of Justice at Batavia—courts of justice at Batavia, Samarang, Soerabaya, Padang, Medan and Makassar—Resident courts and police courts for Europeans; native courts, magistrate courts, police courts, Regent courts, district courts, and courts of priests for natives.

Finance.

The local revenue is derived from land, taxes on houses and estates, from licences, customs duties, poll and income taxes, and a number of indirect taxes; from the Government monopolies of salt, pawnshops, and opium, railways, and from the sale of Government products.

Revenue and expenditure :—

Year	Revenue	Expenditure	Surplus or Deficit
	Guilders	Guilders	Guilders
1920	669,793,127	1,011,509,054	— 341,715,927
1921	731,929,156	866,219,955	— 134,290,799
1922	734,491,841	924,717,380	— 190,225,539

The sources of revenue in 1922 are stated as follows (in guilders):

Receipts in the Netherlands from sales of cinchona, 643,000; railways, 350,000; share of the State in the profits of the Biliton Company (not stated); various, 43,045,070. Receipts in India from sales of opium, 48,055,000; import, export, and excise duties, 123,140,000; land revenues, 25,887,500; sales of salt, 19,717,500; forests, 26,400,000; railways, 118,750,000; coal, 28,932,000; income-tax, 63,500,000; from all other sources, 246,021,771.

Public debt on December 31, 1921, was 446,868,584 guilders.

Defence.

The Dutch forces in the East Indies constitute a colonial army which is entirely separate from the home army. The colonial army consists of about one-quarter Europeans to three-quarters Natives, and comprises 32 battalions and 4 dépôt battalions of infantry, 4 machine-gun companies, 2 companies of cyclist-soldiers, 6 squadrons, 1 dépôt squadron of cavalry, 6 field batteries, 3 mountain batteries, 2 howitzer batteries, 4 motor batteries, 2 fortress and coast-companies of artillery, 3 field companies, 1 motor-car company, 1 railway and telegraph company, and 1 dépôt-company of engineering troops, and a flying corps with 25 officers and 40 aeroplanes. In 1918 compulsory service was introduced in the militia for Europeans between 19 and 32 years of age, and in the landstorm between the ages of 33 and 45. It is calculated that this will yield 25,000 men.

In most battalions there are 4 companies composed either of Europeans or of Natives; the greater part of the officers, and a proportion of the non-commissioned officers, are Europeans. The artillery has European and Native gunners and Native drivers. The Europeans (except the militia) and Natives are recruited by volunteers. The strength of the colonial army in 1921 was 1,320 officers, 36,114 volunteers, of whom 6,326 were Europeans and 8,876 militiamen.

Besides the Army there are different armed troops, viz.: (1) The Legion of the Native Prince Mangkoe Negara, consisting of infantry, numbering 3,600 men. In case of war this Legion would be placed at the disposal of the Government. (2) The Barisan, being a native infantry of Madura, 2,833 men, designed to maintain peace in the island and to participate in campaigns in case of war. (3) The police-soldiers, numbering about 9,600 men. (4) Different voluntary corps, composed of Europeans and Natives, to assist in case of war or insurrection.

The expenditure for defence (army and navy) estimated for 1922 amounts to 156,000,000 guilders.

The Netherlands Navy in the East Indies numbers 229 officers and 1,215 European and 1,441 native non-commissioned officers and sailors, and consists of 30 men-of-war, many of them old and unserviceable. There is, besides, the Colonial Navy, consisting of 22 smaller ships of no naval value, with 173 Europeans and 811 natives, employed for civil service duties.

Production and Industry.

The greater part of the soil of Java is claimed as Government property, and it is principally in the residencies in the western part of Java that there are private estates, chiefly owned by Europeans and by Chinese. The bulk of the people are agricultural labourers. Formerly the Government or private landowners could enforce one day's gratuitous work out of seven, or more, from all the labourers on their estates; in 1882 the greater part of these enforced services for the Government was abolished, in return for the payment of one guilder per head yearly, and the remainder were abolished in 1914 in return for an increased poll tax.

The harvested area under various 'native' cultures (first and second) in Java and Madura were as follows, in acres:—In the year 1920: rice, 7,964,000; maize, 4,885,000; cassava, 2,006,000; arachis, 500,000; soya beans, 401,000; and other secondary crops, 2,347,000; sugar-cane, 44,000; tobacco, 242,000; indigo, 24,000; capsicum, 84,000; native tea, 312,000.

Owing to the 'agrarian law' (1870), which has afforded opportunity to private energy for obtaining waste lands on hereditary lease (emphyteusis)

for seventy-five years, private agriculture has greatly increased, as well in Java as in the Outposts. In 1920 were ceded on lease in Java by the Government to 929 companies and Europeans, 1,288,000 acres; to 145 foreign Orientals, 88,400 acres; to 9 natives, 2,500 acres—total, 1,359,000 acres. The total area in use for native agriculture in Netherlands-India was, in 1920, 7,576,000 acres, of which 3,010,000 acres were in Java (1,359,000 acres land on lease, and 1,651,000 private lands).

The following table gives a comparison of the production of sugar for the last 3 years:—

—	1918	1919	1920
Planted area . . . acres .	402,961	340,146	369,213
Total production . . . tons .	1,778,207	1,336,112	1,577,528
Production per acre . . . do .	4.41	3.96	4.27
Factories . . . number .	186	179	183

The production of coffee in Dutch India was, for 4 years, as follows:—

—	1917	1918	1919	1920
Government—	Tons	Tons	Tons	Tons
Java (Arabica) . . .	265	360	1,195	} abolished
Liberia . . .	14	21	—	
Robusta . . .	1,479	2,411	659	
Private—				
Java (Arabica) . . .	9,560	11,144	8,574	} 45,547 (approx.)
Liberia . . .	2,140	1,887	1,178	
Robusta . . .	59,982	55,484	44,063	
Total . . .	73,440	71,307	55,669	45,547

The production of cinchona, in kilogrammes, in Java was as follows in 1920:—1,131,435 on government plantations, 8,724,171 on estates on emphyteusis, and 601,866 on private lands, making a total of 10,457,472 kilos. The production of tobacco, in kilogrammes, was as follows in 1920:—21,696,082 in Java and 9,769,119 in Sumatra: total 31,465,201 kilos.

The production of tea in Java, in kilogrammes, was as follows: 1916, 147,028,000; 1917, 43,271,000 (estimated); 1918, 34,406,064; 1919, 40,392,323; 1920, Java, 41,489,000, Outer Possessions, 6,621,000, total 48,110,000.

The production of cacao in Java was (in kilogrammes): 1916, 1,209,650; 1917, 1,189,790; 1918, 978,717; 1919, 1,019,729; 1920, 840,745.

The tin mines of Banca are worked by the Government; those of Biliton and Riau by private enterprise. Their total yield was, in tons: 1916, 22,281; 1917, 21,504; 1918, 19,703; 1919, 20,724; 1920, 22,560.

The yield of the principal coal mines in Java, Sumatra and Borneo was, in tons: 1916, 748,815; 1917, 832,129; 1918, 835,154; 1919, 947,915; 1920, 1,055,882.

The production of the principal mineral oil enterprises was, in thousands of kilogrammes: 1916, 1,730,180; 1917, 1,605,610; 1918, 1,764,203; 1919, 2,159,862; 1920, 2,365,320.

Commerce.

No difference is made between Dutch and foreign imports and vessels. There is a tariff on certain goods; on some articles there is a small export duty.

Imports and exports in guilders (12 guilders = £1):—

<i>Imports</i>							
Year	Government			Private			Grand Total
	Merchandise	Specie	Total	Merchandise	Specie	Total	
1918	28,869,577	3,050,014	31,419,591	530,415,870	5,968,390	536,384,170	567,803,761
1919	101,692,487	11,708,840	113,401,327	639,029,401	40,802,497	679,831,898	793,233,225
1920	108,713,312	11,051,608	119,764,920	1,125,903,748	65,155,231	1,191,058,979	1,310,823,899

<i>Exports</i>							
1918	3,710,837	—	3,710,837	675,900,331	232,713	676,133,049	679,843,886
1919	5,224,227	—	5,224,227	2,162,115,836	130,455	2,162,246,291	2,167,470,518
1920	3,137,437	—	3,137,437	2,260,309,944	4,424,348	2,264,734,292	2,267,871,729

The principal exports are sugar (1,480,346 tons in 1920), coffee (2,241,000 kilos in 1920), tea (42,545,000 kilos in 1920), indigo, cinchona (4,526,000 kilos in 1920), tobacco (78,392,000 kilos in 1920), rubber (31,166,000 kilos in 1920), copra (49,733,000 kilos in 1920), and tin (13,648,000 kilos in 1920).

Total trade between the United Kingdom and Java (Board of Trade figures, for five years:—

	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Java to U.K. . .	13,410,672	5,786,020	17,425,359	28,775,277	5,541,567
Exports to Java from U.K. . .	6,046,741	5,841,933	7,111,561	18,383,309	11,363,263

Shipping and Communications.

Year		Entered		Whereof, under British Flag:	
		Number	Tons	Number	Tons
1919	Steamers . .	8,500	4,424,819	5,969	1,389,987
	Sailing vessels . .	6,558	418,260	4,676	273,421
1920	Steamers . .	8,974	4,815,025	6,369	1,539,725
	Sailing vessels . .	3,193	291,131	1,293	147,146

At the end of 1919 the total length of railways (State and private) and tramways was about 3,923 miles (3,130 in Java and 793 in Sumatra); the gross receipts (1918) about 79,070,090 guilders; working expenses, 42,550,106 guilders; number of passengers about 134,617,698.

The Government telegraphs extended in 1919 over 6,822 miles, the Government telegraph cables over 6,260 miles, together over 13,082 miles. The number of post and telegraph stations in 1919 was 645 for Java and Madura, and 390 for the other islands, while the numbers of telegrams were 2,610,468 (internal) and 937,232 (foreign intercourse). Internal letters and postcards carried in 1919, 32,063,921, while there were 25,105,163 newspapers, &c., for the interior.

The Government telephone aerial lines extended in 1919 over 22,565 miles, the Government telephone cables over 21,711 miles. At the end of 1919 there were 228 telephone exchanges and 21,841 telephones, while the number of the long distance calls in that year was 977,241.

Money and Credit.

The 'Java Bank,' established in 1828, has a capital of 6,000,000 guilders, and a reserve on March 31, 1921, of 3,753,423 guilders. The Government has a control over the administration. Two-fifths of the amount of the notes, assignats, and credits must be covered by specie or bullion. In March, 1921, the value of the notes in circulation was 328,812,140 guilders, and of the bank operations 235,040,881. There are some other Dutch and Chinese banks, besides branches of British, American, and Japanese banks.

In the savings-banks, including the Postal savings-bank, there were in 1919, about 190,000 depositors, with a deposited amount of 27,000,000 guilders.

Weights and Measures.

The *Amsterdamsch Pond.* = 1.09 lb. avoirdupois.

„ *Pikol* . . . = 133½ „ „

„ *Catty* . . . = 1½ „ „

„ *Tjengkal* . . . = 4 yards

The legal coins of 10, 5, 2½, 1 and ½ guilders, as well as the weights and measures, of Dutch India, are those of the Netherlands. But the country has coins of its own, viz., 25, 10, 5, 2½, 1, and ½ cent. pieces.

Consular Representatives.

British Consul-General at Batavia.—F. G. Gorton.

There are also consular officers at Samarang, Sourabaya, Makasser, Medan, Padang, and Koepang.

DUTCH WEST INDIES.

The Dutch possessions in the West Indies are (a) *Surinam*, or *Dutch Guiana*, and (b) the colony *Curaçao*.

Surinam or Dutch Guiana.

Dutch Guiana or Surinam is situated on the north coast of S. America between 2 and 8° N. latitude, and 53° 50' and 58° 20' E. longitude, and bounded on the north by the Atlantic Ocean, on the east by the river Marowijne, which separates it from French Guiana, on the west by the river Corantyn, which separates it from British Guiana, and on the south by inaccessible forests and savannas to the Tumuc-Humac Mountains.

At the peace of Breda, in 1667, between England and the United Netherlands, Surinam was assured to the Netherlands in exchange for the colony of New Netherlands in North America, and this was confirmed by the treaty of Westminster of February, 1674. Since then Surinam has been twice in the power of England, 1799 till 1802, when it was restored at the peace of Amiens, and in 1804 to 1816, when it was returned according to the

Convention of London of August 13, 1814, confirmed at the peace of Paris of November 20, 1815, with the other Dutch colonies, except Berbice, Demerara, Essequibo, and the Cape of Good Hope.

The administration and executive authority is in the hands of a governor assisted by a council consisting of the governor as president, a vice-president and three members, all nominated by the Queen. The Colonial States form the representative body of the colony. The members (13) are chosen for 6 years.

Governor.—Baron van *Hermstra*. Appointed December, 1920.

Dutch Guiana is divided into thirteen districts.

Area, 46,060 English square miles; population (January 1, 1921) 113,181 exclusive of the negroes and Indians living in the forests. Capital, Paramaribo, 50,560 inhabitants (January 1, 1920).

Births and deaths for 3 years :—

	Births			Deaths		
	1918	1919	1920	1918	1919	1920
Males	1,538	1,302	1,607	1,449	1,705	1,142
Females	1,511	1,291	1,617	1,067	1,183	938
Total	3,049	2,593	3,224	2,516	2,888	2,080

There is entire religious liberty. At the end of 1919 the numbers of the different religious bodies were : Reformed and Lutheran, 9,594 ; Moravian Brethren, 23,927 ; Roman Catholic, 19,319 ; Jews, 778 ; Mohammedans, 15,431 ; Hindus, 21,500, &c.

There were, in 1920, 33 public schools with 4,331 pupils, and 44 private schools with 7,457 pupils. There is a Government normal school.

There is a court of justice, whose members are nominated by the Sovereign. There are three cantonal courts and two circuit courts.

The relations of the Government to pauperism are limited not only to subventions to orphan-houses and other religious or philanthropical institutions, but the Government itself maintains an almshouse.

The local revenue, derived from import, export, and excise duties, taxes on houses and estates, personal imposts, and some indirect taxes, is shown as follows for 4 years in thousands of guilders :—

—	Expenditure	Local Revenue	Subvention	—	Expenditure	Local Revenue	Subvention
1918	5,053	3,576	1,477	1920	6,728	4,583	2,145
1919	5,172	3,907	1,265	1921	8,193	6,440	1,753

The Dutch forces in Surinam consist of a civic guard and infantry, the latter containing, in 1920, 11 officers and 237 non-commissioned officers and men.

In 1920 sugar was produced to the amount of 10,091,720 kilogrammes ; cacao, 1,602,299 kilogrammes ; bananas, 397,354 bunches ; coffee, 1,705,251 kilogrammes ; rice, 10,592,175 kilogrammes ; maize, 2,076,185 kilogrammes ; rum, 682,520 litres ; and molasses, 315,480 litres.

In 1920 the export of gold, mostly alluvial, was 458,740 grammes, valued at 706,561 guilders. Gold production in 1920 was 407,764 grammes, and of balata 442,071 kilos.

In 1920 there entered 214 vessels of 409,878 tons, and cleared 214 ships of 409,972 tons.

Imports and exports for 6 years :—

Year	Imports	Exports	Year	Imports	Exports
	Guilders	Guilders		Guilders	Guilders
1915	5,445,866	6,949,315	1918	6,157,727	7,080,019
1916	5,911,326	8,054,002	1919	8,946,144	8,987,870
1917	7,645,941	8,852,170	1920	13,718,026	7,477,512

Principal exports in 1920 : Sugar, 7,299,773 kilogs.; rum, 195,791 litres; cocoa, 1,793,897 kilogs.

The communication between several districts of the colony is carried on by vessels and small steamers. A Colonial steamship service extends to British Guiana.

Vice-Consul at Paramaribo.—Rev. W. L. Kissack.

Curaçao.

The colony of *Curaçao* consists of two groups of islands about 500 miles apart. One group is made up of the first three islands in the following list; the other of the last three :—

	Square Miles	Population Dec. 31, 1920
Curaçao	210	32,709
Bonaire	95	7,119
Aruba	69	8,265
St. Martin ¹	17	2,633
St. Eustache	7	1,815
Saba	5	1,661
	403	53,702

¹ Only the southern part belongs to the Netherlands, the northern to France.

There is a Governor, assisted by a Council composed of a vice-president and three members, nominated by the Sovereign. There is also a Colonial Council consisting of thirteen members nominated by the Sovereign. The city of Willemstad (population 12,500), on Curaçao, is the seat of government. The different islands, except Curaçao, are under officials called 'Gezaghebbers,' nominated by the Governor. In 1920 there were 47,387 Roman Catholics, 5,706 Protestants, 565 Jews. Schools in 1920 numbered 40 with 7,304 pupils. In 1920, 1,442 births were registered, 1317 marriages and 1,255 deaths.

The revenue is derived from import, export, and excise duties, taxes on land, and some indirect taxes. In the Budget for 1922 the revenue is estimated at 1,302,529 guilders, and the expenditure at 2,723,916 guilders; the difference is supplied by the mother-country.

The militia (*Schutterij*) of the Isle of Curaçao consisted at the end of 1920 of 23 officers and 445 men; the garrison of 7 officers and 167 men.

The imports of Curaçao and the other islands in 1920 were valued at 7,307,823 guilders; the exports of Curaçao and the other islands at 10,903,597 guilders. The chief products are maize, beans, pulse, cattle, salt, and phosphate of lime. The chief industry is oil-refining.

There entered the ports of the different islands in 1920, 3,144 vessels of 2,654,234 tons net.

Consul at Curaçao.—Jacob Thielen.

NICARAGUA.

(REPÚBLICA DE NICARAGUA.)

Constitution and Government.

THE Constitution of the Republic of Nicaragua is that which came into operation on April 5th, 1913. This is the same as was promulgated on March 12, 1912, with the exception of Articles 168 and 170. Previous constitution was that of March 30, 1905. It vests the legislative power in a Congress of two houses consisting of 40 deputies, elected for 4 years by universal suffrage, and 13 Senators elected for 6 years. The Executive power is with a President appointed for 4 years.

President.—Dr. Diego Manuel Chamorro. (Inaugurated January 1, 1921. Term of office expires December 31, 1924.)

The President exercises his functions through a council of responsible ministers, composed of the heads of the departments of Foreign Affairs and Public Instruction; Finance; Interior, Justice, and Police; War, and Marine; Public Works.

The Republic is divided into 13 departments and 2 comarcas, each of which is under a political head, who has supervision of finance, instruction and other matters, and is also military commandant. The Mosquito Reserve now forms a department named Bluefields. The Indians in this region were long under the protection of Great Britain; but under the treaty of April 19, 1905 (ratified August 24, 1906), the treaty of 1860 was abrogated, and Great Britain agreed to recognise the absolute sovereignty of Nicaragua over the territory.

The judicial power is vested in a supreme Court of Justice, three chambers of second instance, and judges of inferior tribunals.

On February 18, 1916, a treaty between Nicaragua and the United States was ratified, under which the United States in return for 3 million dollars acquires the canal route through Nicaragua and also a naval base in the Bay of Fomesca on the Pacific coast and Corn Island on the Atlantic coast. Ratified by Nicaragua on April 7, 1916.

Area and Population.

Area estimated at 49,200 English square miles, and it has a coastline of about 300 miles on the Atlantic and of about 200 miles on the Pacific. The population according to the census of 1920, was 638,119. At least 75 per cent. of the inhabitants live in the western half of the country. The two halves of the Republic differ greatly in many respects and there is little communication between them, the journey by trail and river being so slow and difficult that passengers usually go by way of Costa Rica, while the small amounts of merchandise shipped from one side to the other are sent mainly by way of Panama.

The people of the western half of the Republic are principally of mixed Spanish and Indian extraction, though there are a considerable number of pure Spanish descent and many Indians. The population of the eastern half is composed mainly of Mosquito and Zambo Indians and negroes from Jamaica and other islands of the Caribbean, with some Americans and a comparatively small number of Nicaraguans from the western part of the Republic.

There are within the Republic 105 municipalities of which 28 have from 2,000 to 30,000 inhabitants. The capital of the Republic and seat of government is the town of Managua, situated on the southern border of the lake of the same name, with (1920) 60,342 inhabitants. Leon, formerly the capital, has a population of 47,234; Granada, 21,925; Matagalpa, 32,271; Masaya, 17,287; Jinotega, 16,990; Chinandega, 14,415; Esteli, 10,583; Matapa, 10,561; Somoto, 8,182; Boaco, 14,342; Jinotepe, 9,317; Diriamba, 11,151; Bluefields, 4,706. Other towns are Corinto, and San Juan del Sur on the Pacific.

Religion and Instruction.

The prevailing form of religion is Roman Catholic. In 1914 the Republic constituted one archbishopric and ecclesiastical province (Nicaragua). The Seat of the Archbishop is Managua. There are three bishoprics, Leon, Granada and Matagalpa, the Bishop of Matagalpa being coadjutor to the Archbishop at Managua.

There are about 356 elementary schools and ten secondary schools. Secondary education is neither obligatory nor free, the secondary schools being carried on not by the state, but by private individuals. Nicaragua has three universities, in the cities of Managua, León, and Granada, called respectively, Universidad Central (Central University), Universidad de Occidente y Septentrión (Western and Northern University), and Universidad de Oriente y Mediodía (Eastern and Southern University). There are also a number of state normal schools.

A national Industrial, Commercial, and scientific Museum has been established at Managua.

Finance.

Revenue and expenditure for 5 years :—

—	1916-17	1917-18	1918-19	1919-20	1921-22 ¹
	£	£	£	£	£
Revenue . .	460,470	480,321	598,547	850,478	677,105
Expenditure .	396,159	351,553	424,167	427,203	559,704

¹ Budget Estimates.

A five (formerly six) per cent. loan for 1,250,000*l.* was issued in 1909 for the construction of railways, &c., and for conversion purposes. Of this 298,240*l.* has been redeemed. Total debt, December 31, 1921, 951,580*l.*

Defence.

The active army consists of 2,000 men; in war it may rise to 7,000. Military service is obligatory between 17 and 55 years of age. The period of active service is a year. The marine consists of one very small boat, on the Pacific coast, capable perhaps of carrying a machine gun and 25 men.

Production and Industry.

The agricultural, timber and mining industries are the principal source of national wealth. The area of cultivation in Nicaragua has extended in recent years and would probably extend still further but for the scarcity of labour. The banana is the principal agricultural product of the eastern part of the Republic. Coconuts are also of some importance, and a few plantains, oranges, and pineapples, and some yucca are raised. Rice is grown to a small extent, and some wheat in the hilly Nueva Segovia district, while tobacco is cultivated round Masaya. The products of the western half are much more varied, the most important being coffee, sugar cane, cacao, corn, and beans. The annual average coffee crop is estimated at 22,500,000 lbs. With the exception of bananas, plantains, and yucca or cassava, the greater part of the food supply of the eastern section is imported from the United States. The western half of the country produces much of its own food, and occasionally exports small quantities of beans, corn, cheese, lard, and sugar to the neighbouring Republics.

The forests contain mahogany and cedar, which are largely exported, many valuable timber trees, dye-woods, gums, and medicinal plants. They are worked both from the Atlantic and Pacific.

There are 1,200,000 cattle in Nicaragua.

There are several gold mines, worked by American and British companies, one having also silver. The gold export amounted in 1917 to 185,125*l.* The mines towards the east coast in Mico, Tunkey, Cuicuina and Pizpiz districts are showing increased activity. Copper and precious stones are also found.

Commerce.

The foreign trade of Nicaragua was as follows in 5 years :—

—	1916	1917	1918	1919	1920
	£	£	£	£	£
Imports . .	955,519	1,278,613	1,185,961	1,582,530	2,772,877
Exports . .	1,056,972	1,195,051	1,550,988	2,481,894	2,157,669

The customs receipts in 1919 were 302,736*l.*; in 1920, 454,470*l.*

In 1920 the value of the principal imports (in dollars) was:—Cotton goods, 5,242,188; chemicals, 581,569; iron and steel, 754,074; wheat flour, 665,659. The principal countries of import were (values in dollars):—United States, 11,247,588; United Kingdom, 1,634,623; France, 220,957; and Panama, 189,567.

In 1920 the value of the principal exports (in dollars) was:—coffee, 2,874,140; bananas, 817,142; timber, 1,953,768; hides and skins, 316,798; and sugar, 2,345,904. The principal countries of export were (values in dollars):—United States, 9,294,809; Great Britain, 306,491; Panama, 261,455; and France, 546,043.

A treaty of commerce between Great Britain and Nicaragua, signed at Managua in July, 1905, and ratified at London on August 14, 1906, provides mutually for the most favoured nation treatment, except that Nicaragua may accord certain advantages to other Central American States.

Total trade between Nicaragua and United Kingdom (Board of Trade Returns) for 5 years:—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Nicaragua to U.K. .	7,461	4,081	119,944	91,401	101,371

Shipping and Communications.

Western Nicaragua has two seaports, Corinto and San Juan del Sur, through which pass approximately 64 per cent. of the imports and 86 per cent. of the exports of the Republic. The eastern ports are Bluefields, Cape Gracias a Dios, Las Perlas (Pearl Lagoon), and San Juan del Norte (Greytown). In 1920, 779 ships of 463,925 tons entered the five ports of Nicaragua, and 846 of 460,779 tons cleared.

There are few good roads in the country, but contracts have been made for roads and transport from Momotombo to Matagalpa, 79 miles, and for 3 roads leading respectively from Matagalpa, from New Segovia, and from the Pizpiz mines in the Cape Gracias district to the head of steamboat navigation on the Cuco Wanks river, about 160 miles from its mouth. A good cart road has recently been completed between Matagalpa and Jinotega, about 24 miles. There is also a road between Puerto Diaz and Juigalpa, of which 7 miles have been constructed; a highway from the capital to Sierras de Managua, 3 miles constructed; there will be two branches from this road, one leading to la Cuchilla and the towns to the south by way of Camino del Ventarron, and the other to Cuchilla and the Pacific coast by way of Camino de Chiquilistagua. There will also be a highway from Tipitapa to Matagalpa, of which the last 2 miles are the most difficult of all the stretch of road in the Tamarindo region. Improvements are being made on the roads from Granada to Nandaime, Boaca to Tipitapa, Masaya to Tipitapa, and from Leon to the Pacific coast. For the repairing and making of roads a tax varying from 1 peso (about 22*d.*) to 10 pesos is imposed on all male inhabitants over 18 years of age.

The Pacific Railroad of Nicaragua is the only line in the republic, having a total length of 171 miles. The line runs from Corinto to Leon, Managua, Granada, and Diriamba, with branches to El Viejo and Monotombo. There are 20 miles of private railway on the Atlantic coast near the Rio Grande,

and, on the west side of Lake Nicaragua, 3 private steam tramways aggregating 3 miles in length. A contract for the construction of a railway from El Bluff (Bluefields) to Lahone Grande (a small place on the line from Managua to Granada), passing through Matagalpa, was entered into by the Government with a New Orleans Syndicate in 1918.

The national railways have been sold to an American company for two million dollars, 51 per cent. of stock being owned by Brown Bros. and J. W. Seligman and Co. of New York, and 49 per cent. by the Government, but held on escrow by American bankers for a loan of 1,060,000 dollars due.

There are 3,637 miles of telegraph wire, and 130 offices; also 805 miles of telephone wire and 29 telephone stations. Between December 1, 1915 and October 31, 1916, 351,786 telegrams were sent, and 3,921 cablegrams. Receipts 3,0517.

The Government has contracted for the installation of wireless telegraph stations at Managua, Granada, San Carlos, San Juan del Norte and Castillo.

Money, Weights, and Measures.

The National Bank of Nicaragua, with a capital of over 100,000 dollars, was established in Managua in 1912. Other banks are the Commercial Bank of Spanish America and the Anglo Central American Commercial Bank, Ltd.

In 1912 a new monetary unit was introduced, the gold *cordoba*, equivalent to the American dollar, containing 1.672 gr. of gold nine-tenths fine, and divided into 100 equal parts. Other gold coins provided for by the monetary law of 1912 are 10, 5 and 2½ cordobas, but no gold coins have ever been struck. As the National Bank suspended the sale of gold drafts on the United States in October, 1914, the monetary reform has fallen to pieces as there is presumably no gold reserve at all behind the circulation of 2 million paper cordobas. No statements are published either by the Bank or by the Government, and very little silver is in circulation. The country again has an unconvertible paper currency, and exchange keeps at 2 to 5 per cent. on account of general shortage of currency. On October 31, 1919, there were in circulation 3,559,100 cordobas.

The silver coins are the silver cordoba, containing 25 grammes of silver nine-tenths fine; the half and quarter cordoba; 10 cents, a coin containing 2½ grammes of silver eight-tenths fine; 5 cents, a coin three-quarters of copper and one of nickel; 1 cent, ninety-five parts of copper and 5 of zinc; ½ cent, in same proportion. 300,000 dollars' worth of cordobas in silver were coined at Birmingham in 1912. There are also paper cordobas.

Since January 7, 1893, the metric system of weights and measures has been in use.

Diplomatic and Consular Representatives.

1. OF NICARAGUA IN GREAT BRITAIN.

Chargé d'Affaires.—Eduardo Perez-Triana.

There are Consular Representatives at Manchester, Birmingham, and Nottingham.

2. OF GREAT BRITAIN IN NICARAGUA.

Minister and Consul-General.—Hugh William Gaisford (resident at Guatemala).

Consul at Bluefields.—S. H. Hammond.

Acting-Consul-General for Nicaragua.—R. C. Michell. (Absent since 1914.)

Vice-Consul at Managua and Acting-Consul-General.—A. J. Martin, F.R.G.S.

There are Vice-Consuls at Managua, Matagalpa and Corinto.

NORWAY.

(NORGE.)

Reigning King.

Haakon VII., born August 3, 1872; the second son, Carl, of Frederik King of Denmark, elected King of Norway by the Storting, November 18, 1905; accepted the crown through his grandfather, the late King Christian of Denmark, November 18, 1905; landed in Norway November 25, 1905; married, July 22, 1896, to Princess *Maud*, born November 26, 1869, the third daughter of the late Edward VII., King of Great Britain and Ireland.

Son.—Prince *Olav*, Crown Prince, born July 2, 1903.

According to the Constitution, Norway is a constitutional and hereditary monarchy. The royal succession is in direct male line in the order of primogeniture. In default of male heirs the King may propose a successor to the Storting, but this assembly has the right to nominate another, if it does not agree with the proposal.

By Treaty of January 14, 1814, Norway was ceded to the King of Sweden by the King of Denmark, but the Norwegian people declared themselves independent and elected Prince Christian Frederick of Denmark as their King. The foreign Powers refused to recognise this election, and on August 14 a convention was made proclaiming the independence of Norway in union with Sweden. This was followed on November 4 by the election of

Karl XIII. as King of Norway. Norway declared this union dissolved, June 7, 1905, and after some months' negotiation, a mutual agreement for the repeal of the union was signed, October 26, 1905. The throne of Norway was offered to a prince of the reigning house of Sweden, but declined, and, after a *plebiscite*, Prince Carl of Denmark was formally elected King. In October, 1907, a treaty guaranteeing the integrity of Norwegian territory was signed at Kristiania by the representatives of Norway, Great Britain, France, Germany, and Russia, and on January 8, 1908, received the unanimous approval of the Storting.

The following is a list of the Sovereigns of Norway since the year 1204, with the date of their accession.

Inge Baardsson	1204	Erik af Pommern	1380
Haakon Haakonsson	1217	Kristofer af Bayern	1442
Magnus Lagabøtter	1263	Karl Knutsson	1440
Erik Magnussøn	1280	Same Sovereigns as in Denmark	
Haakon V. Magnussøn	1290		1450-1814
Magnus Eriksson	1319	Kristian Fredrik	1814
Magnus VI. Magnussøn	1355	Same Sovereigns as in Sweden	
Olav Haakonsson	1381		1814-1905
Margræta	1388	Haakon VII.	1905

The King has a civil list of 700,000 kroner, or 38,546*l*.

Constitution and Government.

The Constitution of Norway, called the Grundlov, bears date May 17, 1814, with several modifications passed at various times. It vests the legislative power of the realm in the Storting, the representative of the sovereign people. The royal veto may be exercised twice; but if the same bill pass three Stortings formed by separate and subsequent elections, it becomes the law of the land without the assent of the sovereign. The King has the command of the land and sea forces, and makes all appointments, but except in a few cases, is not allowed to nominate any but Norwegians to public offices under the crown.

The Storting assembles every year. The meetings take place *suo jure*, and not by any writ from the King or the executive. They begin on the first weekday after January 10 each year, and the Storting can sit as long as it may find it necessary. Every Norwegian citizen of twenty-three years of age (provided that he resides and has resided for five years in the country) is entitled to elect, unless he is disqualified from a special cause. Women are, since 1913, entitled to vote under the same conditions as men, and since 1915 are eligible as members of the Cabinet. The mode of election is direct, and the method of election is proportional. Every third year the people choose their representatives, the total number being 150. The country is divided into districts, each electing from three to eight representatives. Representatives must not be less than thirty years of age, must have resided in Norway for ten years, and be voters in the district from which they are chosen. Former members of the Cabinet can be elected representatives of any district of the Kingdom without regard to their residence. At the election in 1918 the number of electors was 1,201,312 or 45·64 per cent. of total population, while 717,446 votes, or 59·72 per cent. of the whole number, were recorded.

Storting (1922): Conservatives and Moderate Liberals 57, Liberals 37, Communists 29, Agricultural Party 17, Socialists 8, Democrats 2.

The Storting, when assembled, divides itself into two sections, the 'Lagting' and the 'Odelsting.' The former is composed of one-fourth of

the members of the Storting, and the other of the remaining three-fourths. The Ting nominates its own presidents. Questions relating to laws must be considered by each section separately. The inspection of public accounts and the revision of the Government, and impeachment before the Rigsret, belong exclusively to the Odelsting. All other matters are settled by both sections in common sitting. The Storting elects five delegates, whose duty it is to revise the public accounts. All new laws must first be laid before the Odelsting, from which they pass into the Lagting to be either accepted or rejected. If the Odelsting and Lagting do not agree, the two sections assemble in common sitting to deliberate, and the final decision is given by a majority of two-thirds of the voters. The same majority is required for alterations of the Constitution. The Lagting and the ordinary members of the supreme court of justice (*Höjesteret*) form a High Court of the Realm the *Rigsret* for the impeachment and trial of Ministers, members of the *Höjesteret*, and members of the Storting. Every member of the Storting has a salary of three thousand kroner per annum, besides travelling expenses, and, in recent years, an additional grant to cover the higher cost of living.

The executive is represented by the King, who exercises his authority through a Cabinet called a Council of State (*Statsraad*), composed of a Prime Minister or Minister of State (*Statsminister*), and at least seven ministers (*Statsraader*). The ministers are entitled to be present in the Storting and to take part in the discussions, but without a vote. The following are the members of the Cabinet, originally appointed June 22, 1921.

Premier and Minister of Finance.—Otto Albert Blehr.

Ministry for Foreign Affairs.—Arnold Christopher Ræsted.

Ministry for Justice.—Olaf Amundsen. •

Ministry for Social Affairs.—Lars Oftedal.

Ministry for Agriculture.—Haakon Frie.

Ministry for Commerce, Navigation, Industry and Fishery.—Johan Ludwig Mowinckel.

Ministry for Defence.—Ivar Aarætsmark.

Ministry for Worship and Instruction.—Fredrik Anton Martin Olsen Nalun.

Ministry of Public Works.—Ole Monsen Mjælde.

Ministry for Provisioning.—Raunus Olai Mortensen.

II. LOCAL GOVERNMENT.

The administrative division of the country is into twenty districts, each governed by a chief executive functionary (*Fylkesmann*), viz., the town of Kristiania and Bergen, and 18 *Fylker* (counties). There are 43 towns, 22 'Ladesteder,' and 640 rural communes (*Herreder*), mostly parishes or sub-parishes (wards). The government of the Herred is vested in a body of representatives (from 12 to 48), and a council (*Formannskap*), elected by and from among the representatives, who are four times the number of the 'Formannskap.' The representatives elect conjointly every third year from among the 'Formannskap' a chairman and a deputy chairman. All the chairmen of the rural communes of a Fylke form with the Fylkesmann the Fylkesting (county diet), which meets yearly to settle the budget of the Fylke. The towns and the ports form 63 communes, also governed by a council (5 to 21), and representatives (four times the size of the council). The members of the

local governing bodies are elected under the same conditions as those of the Storting. Since 1910 women are entitled to vote and to be elected, under the same conditions as men.

Area and Population.

I. PROGRESS AND PRESENT CONDITION.

Fylker	Area : English square miles	Census Population Dec. 1, 1920 ¹	Population Dec. 1, 1910	Pop. per square mile 1920
Kristiania (town) . . .	6·3	258,341	241,834	41,006·50

Total	124,964·3	2,646,306	2,391,782	21·18

¹ Preliminary figures.

In 1920, 1,861,424 were domiciled in rural districts, and 784,882 in towns.

In 1910 there were 1,155,673 males, and 1,236,109 females.

Conjugal condition of the present population, 1910 :—

—	Unmarried	Married	Widowed	Divorced	Not stated
Males	713,318	364,642	41,778	769	2,653
Females	755,187	382,679	94,128	1,380	1,256

Of the population in 1910 2,296,344 were born in Norway, 38,647 in Sweden, 1,832 in Finland, 2,986 in Germany. In 1910 the number of Laps was 18,590, and of Fins, 7,172.

For the distribution of the population above the age of 15, divided according to occupation and according to the 1910 census, see THE STATESMAN'S YEAR-BOOK for 1916, p. 1192.

II. MOVEMENT OF THE POPULATION.

1. *Births, Deaths, and Marriages.*

Year	Marriages	Births (exc. still- born)	Stillborn	Illegiti- mate, living	Deaths (exc. still- born)	Excess of Births
1916	17,312	66,055	1,350	4,689	34,362	31,693
1917	18,086	64,746	1,460	4,637	34,106	30,640
1918	20,019	63,508	1,516	4,180	43,408	20,100
1919	15,608	58,452	1,507	3,824	33,751	22,701
1920	18,394	70,691	1,722	5,253	83,502	37,189

2. *Emigration.*

Place of Destination	1914	1915	1916	1917	1918	1919	1920
United States	7,723	4,388	4,865	2,344	1,179	2,236	5,216
British North America .	775	169	320	168	30	130	325
Other Non-European countries	24	15	27	6	17	16	40
Total	8,522	4,572	5,212	2,518	1,226	2,432	5,581

III. PRINCIPAL TOWNS.

At the census taken December 1, 1920, the number of towns with a population of above 100,000 was one, above 20,000 five, above 10,000 eighteen, above 5,000—twenty-six in all. The population of the principal towns (preliminary census returns) was:—

Kristiania	258,341	Ålesund	16,347	Larvik	11,391
Bergen	91,081	Kristiansand	16,543	Fredrikshald	11,218
Trondhjem	54,520	Skien	16,503	Sarpsborg	10,881
Stavanger	43,883	Fredrikstad	15,579	Horten	10,413
Drammen	26,174	Kristiansund	15,183	Arendal	10,358
Haugesund	16,563	Tønsberg	12,588		

Religion and Instruction.

The evangelical Lutheran religion is the national Church and the only one endowed by the State. Its clergy are nominated by the King. All religions (except Jesuits) are tolerated. Ecclesiastically Norway is divided into 6 *Bispedømmer* (bishoprics), 90 *Prostier* (provostships, or archdeaconries), 514 *Prestegjeld* (clerical districts). In 1910 there were 62,553 dissenters, including 2,046 Roman Catholics, 10,986 Methodists, 1,659 Baptists, 714 Mormons, 143 Quakers. The Roman Catholics are under a Vicar Apostolic resident at Kristiania.

Education is compulsory, the school age being from six and a half in towns and seven in the country to fourteen. In 1917-18 (the latest date for which there are statistics) there were in the country 5,999 public elementary schools with 282,117 pupils, and in towns 3,379 classes with 96,784 pupils; the amount expended on both being 30,313,225 kroner, of which 12,242,046 kroner was granted by the State, the rest being provided locally. There are 113 secondary schools: 15 public, 88 communal, with 20,714 pupils in 1920-21, 10 schools are private. Most of the secondary schools are mixed. There were in 1918-19, 6 public normal schools and 4 private, with 1,263 students. Norway has one University, viz. at Kristiania (founded 1811), attended in 1917-18 by 1,500 students. In the financial year 1917-18 it had

its own income, 534,460 kroner, and a State subsidy of 2,571,948 kroner. There is one technical high school at Trondhjem, attended in 1920-21 by 672 students, and one agricultural high school in Aas, with 170 students in the same year. There are also many special schools.

There are 10 schools for abnormal children, deaf, blind, and feeble-minded. There are 9 reformatory schools for neglected children. The number of children in reformatories in 1918 was 482 boys and 332 girls. There are, besides, 4 communal compulsory schools, established mainly for children neglecting the ordinary school.

Norwegian is an independent language side by side with Danish and Swedish. As to the written language, there exists two idioms ('riksmaal' and 'landsmaal') and both may be officially used.

Justice and Crime.

For civil justice Norway is divided into 110 districts, each with an inferior court. There are 3 superior courts, having each one chief justice and two other justices, and one supreme court for the whole kingdom (*Höiesteret*), consisting of 1 president and at least 6 other justices. There is a court of mediation (*Forlikskommission*) in each town and *Herred* (district), consisting of two men chosen by the electors, before which, as a rule, civil cases must first be brought.

According to the law of criminal procedure of July 1, 1887, all criminal cases (not military, or coming under the *Rigsret*—the court for impeachments) shall be tried either by jury (*Lagmandsret*), or *Meddomsret*. The *Lagmandsret* consists of three judges and 10 jurors. The Kingdom is divided into 4 jury districts (*Lagdømmer*), each having its chief judge. Each district is divided into circuits, in which courts are held at fixed times. The *Meddomsret* consists of the judge and is held in the district of the inferior court, and 2 assistant judges (not professional) summoned for each case. The *Lagmandsret* takes cognisance of the higher classes of offences, and is also a court of appeal. The *Meddomsret* is for the trial of other offences, and is also a court of first instance.

There are four convict prisons; inmates, June 30, 1921, 371 males and 8 females. There are 135 local prisons, in which were detained, June 30, 1921, 529 males and 25 females.

Pauperism.

The relief of the poor is mostly provided for by local taxation by the State. The number of persons receiving relief amounted to 62,606 in 1919.

Finance

Revenue and expenditure in thousands of kroner (18 kroner = 1*l.*):—

Defence.

The most important fortresses of Norway are Oscarsborg, Tönsberg, Kristiansand, Bergen, and Agdenes; the old fortresses, Karljohansvaern, Akershus in Kristiania, Bergenhus in Bergen, Munkholmen near Trondhjem, and Vardóyhus, are of no importance.

ARMY.

The army of Norway is a *national militia*. Service is universal and compulsory, liability commencing at the age of 18, and continuing till the age of 55. The men are called out at 21, and for the first 12 years belong to the line; then for 12 years to the landvärn. Afterwards they pass to the landstorm, in which they remain until they have attained 55 years of age. The initial training is carried out in recruits' schools; it lasts for 48 days in the infantry and garrison artillery, 62 in the mountain batteries, 72 in the engineers, 92 in the field artillery, and 102 in the cavalry. As soon as their courses are finished the men are passed to the units to which they will permanently belong, and with them go through a further training of 24 days. Subsequent training consists of 24 days in the second, third and seventh years of service.

The line is now organised in 6 divisions of all arms, besides which there is the garrison artillery. There are 55 battalions of infantry, 5 companies of cyclists (skiers), 3 regiments of cavalry (19 squadrons), 27 four-gun field batteries, 3 batteries of mountain artillery, 9 batteries of heavy artillery, and 1 regiment and 2 battalions of engineers. The Flying Corps is organised in 3 divisions. The divisions are of unequal strength, according to the importance of the district in which they are recruited. In event of war, each division would mobilize 2 or 3 regiments of infantry (of 3 battalions), 3 or 4 squadrons of cavalry, a battalion of field artillery (of 3 batteries), a battalion of heavy artillery, a sapper company, a telegraph company, a medical company, a company of train and a company of automobiles. Each regimental district also forms one battalion of landvärn (of 6 companies), and the other arms would form landvärn units in the same proportion. The total peace strength is 138,500 men and comprises 71,836 rifles, 228 field and 36 heavy guns. The additional numbers available on mobilisation amount to 282,000 men.

The Norwegian infantry is armed with the Krag-Jørgensen rifle of 6·5 mm. The field artillery has Erhardt Q.F. guns of 7·5 cm.

The budget of the army for 1921-22 is 2,185,000*l*.

NAVY.

The principal vessels of the Norwegian navy are:—

Laid down	Name	Displacement	Armour		Principal Armament	H.P.	Max. Speed
			Bel	Big Guns			
1896	{Harald Haarfaagre Tordenskiold}	3,900	7	8	2 8in.; 6 4·7in.	4,500	17
1899	{Norge Eidsvold}	4,200	6	8	2 8in.; 6 6in.	5,200	17

None of the above possess any other than local value. The whole navy is designed for coast-defence duties.

There are also 2 gunboats, 4 destroyers, 29 torpedo boats, 4 submarines and 10 minelayers.

The navy numbers about 190 officers on active service and about 160 in the reserve, and about 1,000 petty officers and seamen on permanent engagement. All seafaring men between the ages of twenty and forty-four are enrolled on the lists of the active fleet, and are liable to the maritime conscription. The conscripts (about 1,000) have to go through a training of at least 6 months.

Production and Industry.

I. AGRICULTURE.

As Norway is a barren and mountainous country, there is little opportunity for agriculture. The arable soil is found in comparatively narrow strips, gathered in deep and narrow valleys and around fjords and lakes. Large continuous tracts fit for cultivation do not exist. Of the total area, 74.7 per cent. is unproductive, 21.9 per cent. forest, and 3.4 per cent. under cultivation. On January 1, 1918, there were 216,545 real estates separately registered, and the number of farms was 261,484. The 241,484 farms were classified as follows according to their cultivated area:—

Without cultivated area (not including gardens).	19,495
Up to 2 hectares „	162,608
2.01-10 „ „	64,046
10.01-50 „ „	15,079
Above 50 „ „	265

261,484

The 19,495 farms without cultivated area are most of them special estates of gardens, and not cultivated meadow land.

The acreage and products of the principal crops for 3 years were as follows :

Crops	Acreage			Produce (quarters)		
	1918	1919	1920	1918	1919	1920
Wheat .	40,970	40,941	40,451	132,056	119,811	121,386
Barley .	156,002	156,060	155,785	677,250	607,245	619,616

Hay .	—	—	—	1,885,701 ²	1,715,363 ²	1,883,279 ²

¹ Bushels.

² Tons.

On June 20, 1918, the country possessed live stock as follows:—Horses, 221,062; cattle, 1,049,642; sheep, 1,207,923; goats, 203,099; swine, 214,305.

The value of cereals imported (including flour) was 172,577,500 kroner in 1919; the principal articles being rye, wheat, maize, barley, wheat and rye-flour. The imports of animal products amounted to 150,843,400 kroner in 1919, and their exports to 204,546,800 kroner in 1919.

II. FORESTRY.

The forests and the fisheries are the two chief natural sources of wealth. The total area covered with forests is estimated at 27,434 square miles, of which 75 per cent. is under pine trees. The State forests occupy about 3,678 square miles. The value of unwrought or partly wrought timber exported from Norway in 1919 and 1920 was respectively 77,840,900 and 109,846,200

kroner, and of wrought timber (mostly wood pulp) 113,048,100 in 1919 and 226,669,000 kroner in 1920.

III. MINES AND MINERALS.

The pyrite is the most important mineral product for both its sulphur and copper content. Iron-ore deposits occur in many places, but there is a shortage of coal for smelting. The total value of mineral products in 1918 was 37,131,000 kroner (10,834,000 in 1907); of furnace products, 28,369,000 kroner (3,135,000 in 1907). The chief mineral products are silver, 1,110,000 kroner in 1918; copper ore, 7,151,000 kroner; pyrites, 20,106,000 kroner; iron ore, 2,515,000 kroner; felspar, 306,800 kroner; nickel ore, 480,000 kroner. Of the smelting products in 1917, silver was valued at 1,120,000 kroner; copper, 16,100,000 kroner; electrolyte pig iron, 3,622,000 kroner. At the end of 1918 there existed about 127 mining establishments employing 8,424 workpeople, and 14 smelting furnaces with 1,034 workpeople.

IV. FISHERIES.

Fish and fish-products comprise about a third of Norway's total annual export values. The number of persons in 1918 engaged in cod fishery was 64,253; in summer-herring fishery, 18,388; and in mackerel fishery, 6,016.

The value of the fisheries in kroner in 1918 was: Cod, 36,154,341; herring, 67,330,033; mackerel, 7,964,833; salmon and sea trout, 1,905,066; other fisheries, 21,607,364; lobsters, 328,459; total, 135,890,096.

Other fisheries are the whale, walrus, seal, and shark fisheries which in 1918 produced a total of about 41,493,718 kroner.

Whale oil production in metric tons, 1917, 40,425; 1918, 25,725; 1919, 28,525; 1920, 37,275.

V. MANUFACTURES.

Though the country lacks coal and is dependent entirely on imported supplies, it possesses an enormous amount of water power, which produces motive power for manufacturing industry. The chief manufacturing use of this power has been for the production of pulp and paper and of electrochemical products, which are important Norwegian industries. The principal products of the electrochemical industry are ammonium nitrate, calcium nitrate, sodium nitrate, calcium carbide, and ferrosilicon.

The numbers of establishments and workers in the principal industries on December 31, 1920, were as follows:—

Industries	Estab-lish-ments	Workers over 18 years		Workers under 18 years		Total
		Male	Female	Male	Female	
Chemicals, paints, oils, and soaps	347	11,068	890	412	196	12,566

Spain	56,820,500	21,272,900	Total	2,583,746,700	782,087,400

The total amount of the import duties collected in 1919 was 112·7 millions of kroner ; for the year ending June 30, 1921, 72·7 millions of kroner. The value of imports subject to duty (1919) was 1,370,311,100 kroner and of duty-free 1,213,434,600 kroner.

Under the treaty of 1826 there is the 'most-favoured-nation' treatment between the United Kingdom and Norway.

The recorded values are calculated according to information supplied by Exchange Committees and merchants. Those of imports include the invoice price, freight, packing, and insurance, but not duty ; those of exports give the price free on board in Norwegian port, excluding freight and insurance, but including packing and Norwegian commercial profit. The returns of quantities are compiled from the officially controlled declarations of importers and exporters. These declarations stated prior to 1909 the countries from which the articles were *directly* imported and to which they were *directly* exported. An article coming, for example, from the East Indies *via* London was recorded as coming from England. From January 1, 1909, the declarations state the countries from which the articles are bought and to which they are sold. The recorded imports include all articles imported, whether for consumption inland or for re-exportation, but not the direct transit goods. The exports are divided into exports of Norwegian articles (special trade) and exports of foreign articles.

Values of imports and exports, divided into classes, for 1919 :—

Classes of Goods	1919		Classes of Goods	1919	
	Imports of Foreign Goods	Exports Norwegian Goods		Imports of Foreign Goods	Exports Norwegian Goods

Internal Communications.

The length of State Railways on December 31, 1920, was 1,771 miles; of private companies 271 miles; total 2,072 miles. 1,325 miles have a gauge of 4ft. 8½in.; 649 miles, 3ft. 6in.; 16 miles, 3ft. 3½in.; 52 miles, 2ft. 5½in. Total receipts year ending June 30, 1920: State railways, 101,729,550 kroner; companies, 18,808,969 kroner. Total expenses: State railways, 104,626,323 kroner; companies, 19,445,551 kroner. Goods carried: State railways, 5,411,588 tons (of 1,000 kilogs.); companies, 1,958,014. Passengers carried: State railways, 27,273,844; companies, 6,076,131. The State railways have been constructed partly by subscription in the districts interested and partly at the expense of Government. The receipts, expenses and traffic refer to the year July 1, 1919, to June 30, 1920. A beginning is made for the electrification of the State Railways in Norway.

The following are the postal statistics :—

—	1916	1917	1918	1919	1920
Letters	103,258,016	94,985,181	110,292,121	123,075,227	115,517,673
Post-cards	16,650,375	15,922,855	18,227,739	16,942,466	15,658,909
Letters with declaration of value	6,841,449	6,713,411	7,219,912	6,815,885	6,611,674
Registered letters	3,517,093	3,860,366	4,596,400	4,785,734	5,045,527
Journals	152,252,182	155,556,346	184,521,243	192,626,882	185,269,797
Other printed matter	17,105,068	15,886,593	18,527,492	18,252,200	16,032,640
Samples and parcels	3,899,068	3,998,458	4,860,091	5,512,228	4,787,029

Length of telegraph and inter-urban telephone lines and wires, June 30, 1921 : 16,330 miles of line, 91,600 miles of wires. Number of paid messages on the State lines, 5,900,969. Number of telephone conversations on trunk lines, 11,344,579. State telegraph offices, 2,067 ; receipts, 26,886,999 kroner ; expenses, 33,291,626 kroner.

The Government possesses 11 wireless telegraph stations in Norway and one at Spitsbergen.

Money and Credit.

On June 30, 1920, the nominal value of the coin minted (the coinage after the monetary reform deducting the coins melted down) was : Gold coin, 22,639,850 kroner ; silver coin, 25,697,701 kroner ; nickel coin, 390,500 kroner ; bronze and iron coin, 2,026,116 kroner ; total, 50,754,167 kroner.

There exists no Government paper money.

The value of income in 1919 and property at the end of 1919 assessed for taxes in the fiscal year 1920-21 was :—

	Income.		Property.	
The towns	2,134·6	millions of kroner	5,943·1	millions of kroner
The rural districts	1,567·7	„ „	6,737·0	„ „
The whole kingdom	3,702·3	„ „	12,680·1	„ „

The 'Norges' Bank is a joint-stock bank, of which, however, a considerable part is owned by the State. The bank is, besides, governed by laws enacted by the State, and its directors are elected by the Storting except the president and vice-president of the head office, who are nominated by the King. It is the only bank in Norway that is authorised to issue bank notes for circulation. The balance-sheets of the bank for 1920 show the following figures :—Assets at the end of the year—bullion, 147,283,704 kroner ; outstanding capital, mortgaged estates, foreign bills, &c., 501,137,085 kroner ; total, 648,417,789 kroner. Liabilities—notes in circulation, 491,916,223 kroner ; the issue of notes allowed was 497,283,704 kroner ; deposits, cheques, unclaimed dividends, unsettled losses, &c., 178,932,263 kroner (of which the deposits amounted to 132,463,768 kroner) ; dividends payable for the year, 4,200,000 kroner, 12 per cent. ; total, 670,848,486 ; balance, 32,430,797.

The 'Kongeriget Norges Hypothekbank' was established in 1852 by the State to meet the demand for loans on mortgage. The capital of the bank is mostly furnished by the State, and amounted to 32,000,000 kroner in 1920. At the end of 1920 the total amount of bonds issued was 249,143,200 kroner. The loans on mortgage amounted to 236,434,943 kroner.

The Norwegian 'Arbeiderbruk og Boligbank' was established in 1903 by the State to meet the demand for loans on mortgage from labourers and small proprietors. The capital of the bank is furnished by the State, and amounted to 7,200,000 kroner in 1920. On June 30, 1920, the total amount of bonds issued was 32,465,120 kroner. The loans on mortgage amounted to 40,810,727 kroner. This bank will shortly be replaced by the 'Norske Stats Småbruk og Boligbank,' which was established in 1917. Its capital amounted to 6,000,000 kroner in 1920 ; on June 30, 1920, the total amount of bonds issued was 20,000,000 kroner. The loans on mortgage amounted to 25,560,400 kroner.

There were at the end of 1920, 192 private joint-stock banks reported, with a collective subscribed capital of 528,247,805 kroner and a paid-up capital of 509,130,671. The reserve funds amounted to 345,774,378. The deposits and withdrawals in the course of the year amounted to 9,476,601,375

kroner and 9,301,525,436 kroner respectively. Deposits at the end of the year 3,112,451,786 kroner, of which 205,675,227 kroner deposits on demand, and 2,906,776,559 kroner on other accounts.

All savings-banks must be chartered by royal licence. Their operations are regulated, to a considerable extent, by the law, and controlled by the Ministry of Finance. In 1920 their number was 562; depositors 1,697,048, with 2,040,073,642 kroner to their credit at the end of the year.

Money, Weights, and Measures.

By a treaty signed October 16, 1875, Norway adopted the same monetary system as Sweden and Denmark. The Norwegian krone, of 100 öre, is of the value of 1s. 1½d., or about 18 kroner to the pound sterling. The gold 20-kroner piece weighs 8·960572 grammes, '900 fine containing 8·0645 grammes of fine gold, and the silver krone weighs 7·5 grammes, '800 fine, containing 6 grammes of fine silver. The standard of value is gold. National Bank notes for 5, 10, 50, 100, 500, and 1,000 kroner are legal means of payment, and the Bank is bound to exchange them for gold on presentation. In 1920 the duty of the bank to pay the notes in gold was temporarily suspended.

The metric system of weights and measures is obligatory.

SPITSBERGEN, BEAR ISLAND, AND ADJACENT ISLANDS (SVALBARD).

An archipelago situated between 10° and 35° longitude east of Greenwich and between 74° and 81° latitude north. The distance from Norway to Bear Islands is 250 miles north, and to Spitsbergen 375 miles.

It is claimed that in all probability the archipelago was discovered by Norwegians in 1194 and re-discovered by the Dutch navigator Barents in 1596. The English explorer Henry Hudson visited Spitsbergen in 1607. In the 17th century a very lucrative whale fishery was started and for some time there were Dutch, British, and Norwegian claims to sovereignty and quarrels about the fishing places. But when in the 18th century the whale-fishery ended, the question of the sovereignty of Spitsbergen lost its actuality, and it was not until the beginning of this century that the question was again raised, owing to the discovery and exploitation of rich coalfields. It was settled by a Treaty, signed on February 9, 1921 at Paris, in which Norway's sovereignty over the Archipelago was recognised by the United States of America, the British Empire, Denmark, France, Italy, Japan, Netherlands and Sweden. Claims to land by nationals of the interested Powers are fully protected by the Treaty.

Total area about 25,000 square miles. The chief islands are West Spitsbergen or Mainland, North East Land (about half the former), Prince Charles Foreland, Edge Island, Barents Land, King Karl's Land, Hope Island, and Bear Island. The climate is essentially arctic, tempered by the Gulf Stream. For over 300 years the islands have been frequented by sailors of various nationalities engaged in the whale and seal fisheries, and hunters in search of fur-bearing animals. Spitsbergen has attracted much greater interest than before on account of the discovery of extensive resources. Coal occurs in several formations and of various qualities.

For over 300 years the islands have been frequented by sailors of various nationalities—in the last 100 years practically only Norwegians—engaged in

the whale and seal fisheries, and hunters in search of fur-bearing animals. Since the beginning of this century Spitsbergen and Bear Island have attracted much greater interest than before on account of the discovery of extensive coal resources. Coal occurs in several formations and of various qualities. In Bear Island is found coal of Devonian and Carboniferous age. The first kind has been mined since 1915 by a Norwegian Company. The shipping season lasts about six months. In Spitsbergen there occurs carboniferous, cretaceous, and tertiary coal. Only the last kind of coal is actually worked. There are two or three seams about 3 to 4 feet thick, each of which covers an area of at least 460 square miles with a contents of probably more than 2,000 million tons. The coal is of excellent quality. The number, extent and contents of the coal-seams of the other formations are not known and their coal is not so good as the tertiary coal. The coalfields belong to British, Norwegian, Swedish, Russian, and Dutch companies, and coal is at present mined at and exported from four places. Shipping is only possible in three or four months of the year. There are five mining camps inhabited all the year round. The largest is Longyear "City" in Advent Bay with about 350 inhabitants.

The export of coal and the population of Spitsbergen and Bear Island were :—

	Population		Export
	Summer 1921	Winter 1921-22	Summer 1921
Spitsbergen	1,315	825	Tons 153,000
Bear Island	188	85	19,500
Total	1,503	980	172,500

Besides coal there is found lowgrade iron in a few places, but of no economic value. The same is true of gypsum that occurs in great quantities, and of asbestos, which is found in one place.

Diplomatic Representatives.

1. OF NORWAY IN GREAT BRITAIN.

Envoy and Minister in London.—Paul Benjamin Vogt. (Appointed June 2, 1910.)

Counsellor.—Peter Hersleb Birkeland.

Secretary.—Reidar Kildal.

Naval Attaché.—Captain S. Scott Hansen.

Commercial Counsellor.—G. K. Conradi.

Press Attaché.—M. M. Mjelde.

2. OF GREAT BRITAIN IN NORWAY.

Envoy and Minister.—Sir Mansfeldt de Cardonnel Findlay, K.C.M.G., C.B.

Second Secretary.—W. St. C. H. Roberts.

Military Attaché.—Colonel W. Robertson.

Naval Attaché.—Captain J. Wolfe Murray, D.S.O.

Commercial Secretary.—C. L. Paus, C.B.E.

Consul at Kristiania.—Edward F. Gray.

There are consular representatives at Bergen, Skien, Stavanger, Trömsø, Trondhjem, Larvik, and other places.

OMAN.

AN independent State, in South-eastern Arabia, whose integrity has been guaranteed by Great Britain and France. Oman extends along the southern shore of the gulf of that name from the entrance into the Persian Gulf to the extreme eastern point of Arabia, and thence S.W. as far as Ras Sajir, lat. 16° 8' N. The coast line is nearly 1,000 miles long. Inland Oman is bounded on the S.W. by the great desert. Area, 82,000 square miles; population, estimated at 500,000, chiefly Arabs, but there is a strong infusion of negro blood, especially along the coast. The towns of Muskat and Muttrah hardly contain an Arab, being inhabited almost entirely by Baluchis and Negroes. The capital, Muskat, and the adjacent town of Muttrah have together about 20,000 inhabitants. Less than a fifth of this number now live in Muskat itself, which is in the last stages of decay and mostly in ruins. Muskat was occupied by the Portuguese from 1508 to the middle of the seventeenth century. After various vicissitudes it was recovered in the eighteenth century by Ahmed bin Sa'eed, of Yemenite origin, who was elected Imam in 1741, and whose family has since ruled, though under the title of Sultans for the last three generations. From 1913, the last year of the reign of the late Sultan, till October 1920, the interior of Oman Proper was in rebellion. The tribes elected an Imam, who, assisted by a Council of Sheikhs established paramount authority over the whole of the interior, and even threatened the coast towns. By an agreement signed at Sib, in October 1920, between the tribes and the Sultan through the mediation of the Political Agent, peaceful relations were re-established between the two parties, on the basis of home rule for the tribes of the interior and complete freedom of intercourse and trade. The Sultan's direct control therefore now only extends along the sea coast.

The present Sultan is *Seyyid Taimur bin Feysil*, eldest son of the late *Seyyid Feysil bin Turki*, who succeeded his father October 5, 1913.

In the beginning of last century the power of the Imam of Oman extended over a large area of Arabia, the islands in the Persian Gulf, a strip of the

Persian coast, and a long strip of the African coast south of Cape Guardafui, including Socotra and Zanzibar. On the death of Sultan Sa'eed in 1856, one son proclaimed himself Sultan in Zanzibar and another in Muskat. Eventually the rivals agreed to submit their claims to the arbitration of Lord Canning, Viceroy of India, who formally separated the two Sultanates. Subsequent troubles curtailed the area of the state in Asia. The island of Kishm or Tawilah, near the entrance of the Persian Gulf, formerly belonging to the Imam of Oman, is now under Persian government and is ruled by a Shaikh, but the port of Basidu at the western extremity of the island is British. Further south on the Persian coast of the Gulf of Oman is the Port of Jask, formerly belonging to Oman, but now Persian. The sole remaining possession of the Sultan on the Persian coast is the town of Gwadar, which is of considerable importance, as through it passes a fair amount of the trade of Mekran. The closest relations have for years existed between the Government of India and Oman, and a British Consul and Political Agent resides at Muskat.

The revenue of the Sultan from all sources varies between ten and eleven lakhs of rupees yearly. Since the end of 1919 the Customs have been reorganised under trained customs officials and a considerable increase in revenue has resulted. The population is poor. In the valleys of the interior, date cultivation has reached a high level, and there are possibilities of agricultural development where the water supply is more certain. Inland camels are bred in large numbers by the tribes, and these are said to be the best breed in Arabia, but in size and strength they are inferior to those of north-western India. As to the mineral resources of the country little is known.

Commerce is mostly by sea, statistics being given only for the ports of Muskat and Muttrah, but large caravans under protection carry on traffic with the interior.

Total exports 1919-20, 314,851*l.*; chiefly dates, 198,101*l.*; fruit, 1,844*l.*; fish, 6,653*l.*; limes, 3,724*l.*; cotton goods, 260*l.*; hides and skins, 6,694*l.* Total imports for 1919-20, 260,756*l.*; chiefly rice, 5,812*l.*; piece goods, 1,257*l.*

Total imports from India, 246,315*l.*; Persia, 2,174*l.* Trade is mainly in the hands of British Indians, and the imports and the exports are mostly from and to India. All imports are subject to 5 per cent. *ad valorem* duty. There are no export duties; imports for re-export by the importer within 6 months are not subject to transit duty.¹

The number of vessels that cleared at the port of Muskat in 1919-20, including the native craft, was 141, of 99,621 tons. The Arabs of Sur, near Ras el Hadd, maintain a large coasting trade, and also traffic in native craft with India, and the East African coast and islands.

There is a mail weekly from and to Bombay, and Muskat is connected by cable with the Indo-European telegraph system.

The common medium of exchange is the Maria Theresa dollar. On the coast, but not in the interior, the rupee circulates (rupee exchange 100 dollars equal to from Rs.237 to Rs.256 in 1919-20). There is one Omani copper coin, which fluctuates in value. The muhammadi of 20 *gaj* (1 dollar = 11½ muhammadi) is only money of account. The weights in use are 1 Kujas = the weight of 6 dollars or 5·9375 oz.; 24 Kujas = 1 Maskat Maund; 10 Maunds = 1 Farāsala; 200 Maunds = 2 Bahār. Rice is sold by the bag; other cereals by the following measures:—40 Palis = 1 Farrah; 20 Farrahs = 1 Khandi.

Political Agent and H.B.M.'s Consul.—Major M. E. Rae, I.A.

¹ The above figures of imports and exports include trade carried on by sailing vessels which, however, is very imperfectly registered.

PANAMA.

(REPÚBLICA DE PANAMÁ.)

Government.—Panama, formerly a department of the Republic of Colombia, asserted its independence on November 3, 1903, and the *de facto* Government was on November 13 recognised by the Government of the United States, and soon afterwards by the other Powers. In 1914 Colombia, in virtue of the Treaty of Bogota entered into with the United States (*see* under Colombia), undertook to agree to recognise the independence of Panama. This Treaty has been ratified by Colombia but not by the United States.

The Constitution, adopted February 13, 1904, and amended on December 26, 1918, provides for a Chamber of Deputies of 33 members (one for every 10,000 inhabitants), which meets biennially on September 1, and for a President of the Republic, elected by direct vote for 4 years, and not eligible for the succeeding term. Neither is the President who has been called to exercise the executive power owing to the death or resignation of a President eligible for re-election if he has exercised the power during any of that time. Nor is the President eligible for re-election if he has been called to exercise the executive power on account of the accidental or temporary absence of the titular President, and remains in power during any part of the six months immediately preceding the date of election for the new President. Beginning with 1924, elections of deputies are to be held every four years.

President of the Republic.—Dr. Belisario Porras. Assumed office, October 1, 1920.

There are three Vice-Presidents, and a Cabinet of five Ministers. The Republic is divided into eight provinces, each under a Governor.

A treaty for the demarcation of the boundary line between Panama and Costa Rica was signed on behalf of the respective Governments on March 17, 1910, and has been ratified by the congresses of both countries. By this treaty the question of what is the true boundary line was submitted to the arbitration of the Chief Justice of the Supreme Court of the United States, who gave his decision in 1914. Panama, however, refused to accept the award. The United States Government has, however, insisted upon the acceptance of the White Award, with the result that in September, 1921, the disputed region was occupied by Costa Rica. Panama, however, has protested against the decision, and does not recognise the occupation.

Area and Population.—Extreme length is about 480 miles; breadth between 37 and 110 miles; total area is 32,380 square miles; population according to the census of 1920 (excluding the Canal Zone), 401,428. The inhabitants are of a mixed race, comprising Spanish, Indian, and Negro elements, with a small number of temporary immigrants from the United States and European countries. Chinese subjects are estimated at 3,500. There are about 55,000 British subjects in the Republic, chiefly from the West Indies. There are 8 provinces as follows (the capitals in brackets):—Bocas del Toro (Bocas del Toro), 14,408 inhabitants; Coclé (Penonomé), 47,146 inhabitants; Colón (Colón), 40,886 inhabitants; Chiriquí (David), 70,846 inhabitants; Herrera (Chitré), 28,737 inhabitants; Los Santos (Las Tablas), 34,944 inhabitants; Panamá (Panamá), 104,003 inhabitants; Veraguas (Santiago), 60,458 inhabitants. The capital, Panamá, founded in 1518, on the Pacific coast, has (1917) 61,369 inhabitants (33,559 males and 28,810 females), and Colón on the Atlantic coast, (1917) 26,076. Smaller ports on the Pacific are Aguadulce, Pedregal, Montijo, and Puerto Mutis; on the Atlantic Bocas del Toro, Portobello, and Mandiunga (opened September 26, 1916).

Movement of population for three years:—

Year	Births					Marriages	Deaths
	Total	Boys	Girls	Legitimate	Illegitimate		
1918	11,283	5,938	5,345	3,513	7,770	354	5,649
1919	10,713	—	—	—	—	356	5,403
1920	11,616	5,811	5,805	3,603	8,013	840	5,801

Religion.—The religion of the country is Catholicism, but other denominations are represented and have a fair following. In the Canal Zone Protestantism chiefly prevails. There are 71 Catholic churches and 58 parishes, served by 70 priests of various nationalities (20 are Panamanians, 27 Spaniards, 5 Italians, 4 French, 1 English, 3 North Americans, 3 Germans, 4 Colombians, 2 Venezuelans, and 1 Swiss).

Education.—Elementary education is obligatory for all children from 7 to 15 years of age. The Government maintains 398 public schools throughout the eight provinces (1917), and 22,000 children (excluding 1,721 children enrolled in the Canal Zone public schools) received free instruction in 1917, from 315 teachers. A University (Instituto Nacional) has been opened in buildings constructed at a cost of about 300,000. In addition there are about a dozen private institutions. Many young men and women are being educated in Europe and the United States at the cost of the Panamá Government.

Justice.—The laws have been codified and took effect on October 1, 1917, with the exception of the Administrative Code which was brought into force on November 15, 1918. These codes—civil, penal, commercial, judicial, administrative, fiscal, and mining—are designed to meet national needs and modern conditions, and will replace the old Colombian laws that have been in use since the separation of Panamá. The death penalty has been abolished.

Finance.—All the revenue collected on importations into the Republic or zone belongs to the Panamá Government, but the United States reserve

the right to import supplies of all descriptions required for canal construction and for the use of their employees free of all taxes.

The national revenue and expenditure for 5 years were as follows :—

—	1916	1917	1918	1919-21	1921-23
	£	£	£	£	£
Revenue . . .	729,802	793,882	640,752	2,450,971	2,934,599 ¹
Expenditure . . .	1,164,600	732,170	707,464	1,770,087	2,934,599 ¹

¹ Budget estimate.

The finances of the Republic have been reorganised by a fiscal agent of the United States. Under the new regime, the budget is for biennial periods.

The Republic has 1,260,000*l.* in United States banks and 410,000*l.* in the National Bank. The foreign debt consists of bonds to the value of 556,600*l.* issued in the United States for railway construction, &c. The internal debt amounts to 119,400*l.*

The Republic has no army or navy to support. The National Police Force numbers 69 officers and 750 men.

Production.—The soil of Panama is of great fertility. Of the whole area about five-eighths are unoccupied, and of the remainder only a small part is properly cultivated. Immigration is encouraged, and land is offered to small farmers on favourable terms. The most important product is the banana. Caoutchouc (about 130 tons annually) is collected by the Indians of the Cordillera, or is obtained from trees planted by Europeans near the coast. Coffee (about 500,000 bushes) is grown in the province of Chiriqui, near the Costa Rican frontier. In the province of Coclé (Atlantic coast) there is one large agricultural undertaking, begun in 1894 with German capital. Here about 75,000 cocoa trees, 50,000 coffee bushes, and 25,000 caoutchouc trees have been planted and are now beginning to yield returns. Other products of the soil of Panama are coconuts, mahogany and other woods, copaiba, sarsaparilla and ipecacuanha. Sugar and tobacco growing are assuming importance. The total production of sugar for 1918 is estimated at 40,000 quintals. The country has great timber resources. Cattle rearing is carried on successfully, and hides form an important article of export. In 1916 the live stock was estimated at 200,000 head of cattle, 15,000 horses, 2,000 mules, 30,000 pigs, and 5,000 goats.

Pearl fishing is carried on at the Pearl Islands in the Gulf of Panama, and at Coiba Island to the west. Turtle-shell is also exported to a considerable amount. It is claimed that Panama possesses nearly every common mineral except coal.

Commerce, Shipping, Communications.—The imports and exports (excluding the Canal Zone) for 6 years are shown as follows :—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1915	1,861,095	669,652	1918	1,609,895	1,067,923
1916	1,879,478	1,141,845	1919	2,281,876	785,711
1917	1,921,490	1,155,413	1920	8,516,928	769,840

Of the total imports in 1920, 76 per cent. came from the United States exclusive of canal materials) and of the exports about 90 per cent. went to the United States. The principal exports in 1920 were bananas, coconuts, balata, hides, and gum.

Total trade between Panama and the United Kingdom (Board of Trade Returns) for 5 years :—

	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Panama to U.K. . . .	20,248	84,731	250,261	238,476	138,972
Exports to Panama from U.K. . . .	243,586	173,246	211,588	508,434	304,580

The Isthmus on both sides is in communication with European and American countries by several lines of steamers. All the maritime traffic (International commerce) for Colón and Panama now runs through the Canal Zone ports of Cristobal and Balboa ; Bocas del Toro remains for the provincial trade. The new port of Mandinga, about 80 miles from the city of Colón, was opened on September 26, 1916.

A railway, 47 miles (first built in 1850-55), connects the ports of Colón and Panama. It belongs to the Panama Railroad Company (United States Government). In the Province of Bocas del Toro the United Fruit Company (American) owns about 140 miles of track with branches, which is used to transport bananas and passengers to the port of Almirante in the Chiriqui lagoon. At present the line extends into Costa Rica for a distance of about 30 miles. This line is being extended towards Port Limon (Costa Rica) and its terminal is now distant from that port 30 miles. The Chiriqui line is 65 miles long, and is being extended for 16 miles more. A concession was granted in 1917 for the construction of a railway on the Atlantic Coast of Panama, starting from the mouth of the river Chagres and running south-west to Almirante for at least 31 miles.

There are telegraph cables from Panama to North American and South American ports, and from Colón to the United States and Europe. Roads are being constructed throughout the country. There are 96 post-offices and 37 telegraph offices.

Money and Credit.—The monetary unit is the gold *Balboa* weighing 1·672 gramme ·900 fine, to which the United States gold dollar is legally equivalent. Silver coins are the peso (of 25 grammes ·900 fine), and the half, fifth, tenth and twentieth peso pieces and nickel coins of 2½ cents. There is no paper money. Two silver pesos of Panama currency are taken as equivalent to one U.S. gold dollar. Altogether four millions of silver dollars of the new currency have been coined and placed in circulation. In November, 1916, the sum of 1,000,000 pesos was withdrawn from circulation by the Canal Zone Government, and in August and September of 1917, the local banks withdrew 952,000 pesos ; total amount withdrawn 1,952,000 pesos, equal to 976,000 dollars U.S. currency.

Part of the 10,000,000 dollars (canal money) paid by the United States has been applied to the establishment of a real estate loan bank, part to public improvements in the several provinces, and 6,000,000 dollars have been invested in the United States.

The Panama Canal and the Canal Zone.

On November 18, 1903, a treaty between the United States and Panama was signed, providing facilities for the construction and maintenance of the inter-oceanic Canal. In this treaty, Panama granted in perpetuity the use of a zone (Canal zone) five miles wide on each side of the Canal route, and within this zone the exclusive control for police, judicial, sanitary and other purposes. For subsidiary canals other territory was ceded and, for the defence of the Canal, the coastline of the zone and the islands in Panama Bay were also ceded. The cities of Panama and Colón remain under the authority of Panama, but complete jurisdiction was granted to the United States in both the cities and in their harbours in all that relates to sanitation and quarantine. In return for these grants the United States paid 10,000,000 dollars on the ratification of the treaty, and is paying 250,000 dollars yearly, beginning after nine years. The treaty was ratified on February 23, 1904, and in July, 1904, the provisional delimitation of the boundaries of the United States territory on the Isthmus was signed. According to this agreement the city of Panama is, for all practical purposes, left without a seaport for foreign commerce, as the anchorage of vessels at Flamenco Island and the wharves at Balboa, both lie within the territory of the zone. Moreover, a similar port was opened on the Atlantic entrance to the Canal, called Cristobal.

Governor of Canal Zone.—Colonel Jay J. Morrow (U.S. Army). Appointed March 28, 1921.

The area of the Canal zone within the limits of 5 miles on either side of the centre line of the canal, including land and water, but not including the area within the 3-mile limit from the Atlantic and Pacific ends, is 441·4 square miles made up of : Land area, 332·35 square miles ; Gatun Lake, 106·5 square miles ; Miraflores Lake, 1·9 square miles ; and the area of the channels from the coast to Gatun and Miraflores Locks, 0·85 square mile. Including all the waters of Gatun Lake, over which and its shores to the elevation of 100 ft. above the sea level the Panama Canal has absolute control, the total area of the Canal Zone is 502·5 square miles, plus the territory between the 85 and 190 foot contours, the area of which has not been computed. The area of Gatun Lake, when its surface is at its normal elevation of 85 feet above sea level, is 164 square miles. The civil population of the Canal Zone on June 30, 1921, was 23,757, of whom 8,158 were Americans. Of this population, 2,825 American men, and 323 American women, and 5,102 men and 66 women of other nationalities (chiefly British West Indian negroes) were employed by The Panama Canal and Railroad. There are in the Canal Zone 2,672 American women and 2,661 American children, and 3,553 women and 5,777 children of other nationalities. The Zone has been depopulated of landowners in order to make it a military reservation, and therefore no private individuals or traders are permitted to settle or to acquire land.

The Canal has a summit elevation of 85 feet above the sea. It is 43·84 nautical miles in length from deep water in the Caribbean Sea to deep water in the Pacific Ocean. The distance from deep water to the shore line in Limon Bay is about 4 miles, and from the Pacific shore line to deep water is about 4½ miles ; hence the length of the Canal from shore to shore is approximately 35½ miles. The channel ranges in width from 300 to 1,000 feet. The average bottom width of the channel in this project is 649 feet, and the minimum width is 300 feet. The Canal has a minimum depth of 41 feet. The average time of passage through the Canal is from 7 to 8 hours. The record passage

is 4 hours 10 minutes. The maximum traffic capacity of the Canal is estimated at 36 ships per day.

The Gatun dam along the crest is 8,000 feet long, including the spillway, or about $1\frac{1}{2}$ miles, and 2,100 feet wide at its greatest width. The crest of the dam is at an elevation of 105 feet above sea level, or 20 feet above the normal level of Gatun Lake, and 100 feet wide. The width of the dam at the normal water level of the lake, *i.e.*, 85 feet above sea level, is about 388 feet. The length of the cut through the Continental divide (Culebra, now Gaillard Cut), is 6.97 nautical miles. The minimum bottom width of the cut is 300 feet. The bottom is 49 feet above sea level, giving a normal depth of 45 feet.

The cost of the construction of the Canal to June 30, 1921, including the balance available for expenditure, was 373,563,136 dollars. This amount includes 40,000,000 dollars paid to the new French Canal Company and 10,000,000 dollars to the Republic of Panama for property and franchises. It does not include 4,600,000 dollars spent and to be spent for colliers and barges to carry coal to the Isthmus, 2,093,000 dollars for a new pier at Cristobal, and 720,000 dollars for repairing steamships. The current expenses of operation and maintenance in 1921 were 9,328,300 dollars. In the period from the opening of the Canal to June 30, 1921, the total expenses of operation and maintenance amounted to 45,986,067 dollars, while the revenue amounted to 46,466,791 dollars.

The Canal was informally opened to commerce by the passage of the 9,000 ton steamer *Ancon* on August 15th, 1914, with specially invited guests. The journey was made without mishap in ten hours. The Canal has been in use since, except that owing to landslides in the Gaillard Cut traffic was interrupted for various short periods in 1915, and from September 18, 1915, to April 15, 1916, the channel was entirely blocked. Since April 15, 1916, traffic has moved with only slight delays, save only that in the latter part of August, 1916, Cucaracha slide became active, causing a suspension for six days, and Culebra slide caused a stoppage on January 10 and 11, 1917. Since that time the channel has been maintained at full depth, and there has been no interruption of traffic.

The President of the United States proclaimed the official and formal opening of the Canal on June 12, 1920.

Particulars of the traffic through the Canal are given as follows:—

Fiscal year ending June 30	Northbound (Pacific to Atlantic)		Southbound (Atlantic to Pacific)		Total		Tolls levied
	Vessels ²	Cargo, tons	Vessels	Cargo, tons	Vessels	Cargo, tons	
1915 ¹	530	2,125,785	558	2,844,057	1,088	4,969,792	Dollars 4,343,383
1916	411	1,484,286	376	1,705,810	787	3,140,046	2,399,830
1917	905	3,076,843	971	4,152,412	1,876	7,229,255	5,631,781
1918	1,209	4,922,667	921	2,639,466	2,130	7,562,133	6,439,083
1919	1,168	4,029,742	861	2,778,065	2,029	6,877,649	6,149,598
1920	1,298	5,281,983	1,180	4,092,516	2,478	9,374,499	8,493,082
1921	1,471	5,892,078	1,421	5,707,136	2,892	11,599,214	6,172,828

¹ 10½ months only, from August 15 to June 30.

² *i.e.*, ocean-going vessels, excluding Canal vessels and launches.

Of the total number of commercial ships that passed through the Canal during the year ended June 30, 1921, 1,212 were American, 970 British, 140 Norwegian, 136 Japanese, 63 Chilean, 60 Peruvian, 44 French, 44 Spanish, 60 Danish, 50 Dutch, 25 Swedish, 25 Italian, and 19 German.

The (Hay-Pauncefote) treaty between Great Britain and the United States signed November 19, and ratified by the United States Senate December 16, 1901, provides for the use of the Canal on equal terms by vessels of all nations. On August 24, 1912, the United States Congress passed the Panama Canal Act whereby privileges were given to certain classes of American shipping using the canal. The British Government lodged a protest against some of the provisions which it regarded as involving violation of the Hay-Pauncefote treaty. After much discussion and many suggestions, President Wilson, on March 5, 1914, requested Congress to repeal that provision of the Act which discriminates between American and other vessels, holding that the exemption was 'in plain contravention of the treaty with Great Britain concerning the Canal concluded on November 19, 1901.' The repealing Bill was signed on June 15, 1914.

Diplomatic and Consular Representatives.

1. OF PANAMA IN GREAT BRITAIN.

Secretary and Chargé d'Affaires.—Señor Don Carlos R. Zachrisson.

Attaché.—Señor Don Enrique Stagg.

Consul-General.—J. B. Chevalier (January, 1919).

2. OF GREAT BRITAIN IN PANAMA.

Envoy Extraordinary and Minister Plenipotentiary.—A. P. Bennett, C.M.G. Appointed March, 1919. (Residing in Costa Rica.)

Consul for the Republic.—Constantine Graham (in charge of the Legation at Panama).

Vice-Consul at Panama.—W. Ewing (in charge of the Consulate at Colón).

There are also Vice-Consuls at Colón, and one at Bocas del Toro, and a Consular Agent at David.

PARAGUAY.

(REPÚBLICA DEL PARAGUAY.)

Constitution and Government.

THE Republic of Paraguay gained its independence from Spanish rule in 1811, and after a short government by two consuls, the supreme power was seized, in 1815, by Dr. José Gaspar Rodríguez Francia, who exercised autocratic sway as dictator till his death, September 20, 1840. Dr. Francia's reign was followed by an interregnum, which lasted till 1842, when a National Congress, meeting at the capital, Asuncion, elected Don Mariano Roque Alonso and Don Carlos Antonio Lopez joint consuls of the Republic. Another Congress voted, March 13, 1844, a new Constitution, and, March 14, elected Don Carlos Antonio Lopez sole President; he was continued by another election, March 14, 1857. At the death of Don Carlos, September 10, 1862, his son, Don Francisco Solano Lopez, born 1827, succeeded to the supreme power. President Lopez, in 1864, began a dispute with the Government of Brazil, the consequence of which was the entry of a Brazilian army, united with forces of the Argentine Confederation and Uruguay, into the Republic, June, 1865. After a struggle of five years, in which Paraguay lost probably 500,000 men, Lopez was defeated and killed at the battle of Cerro Cora, March 1, 1870.

A new Constitution was proclaimed on November 25, 1870, whereby the legislative authority is vested in a Congress of two Houses, a Senate and a Chamber of Deputies, the executive being entrusted to a President, elected for the term of four years, with five ministers. There is also a non-active Vice-President, who is at the same time President of the Senate. The Senate and Chamber of Deputies are elected directly by the people, the former in the ratio of one representative to 12,000 inhabitants, and the latter one to 6,000 inhabitants, though in the case of the sparsely populated divisions a greater ratio is permitted. The new electoral law of November 30, 1916, provides for 20 Senators and 40 Deputies. The Senators and Deputies receive each 3,000 dollars per month.

Provisional President of the Republic.—Dr. Eusebio Ayala. (Assumed office on October 29, 1921, on the resignation of Senor Gondra.)

The President exercises his functions through a cabinet of responsible ministers, five in number, presiding over the departments of the Interior; of Finance; of Justice, Worship and Public Instruction; of War and Marine; and of Foreign Affairs. The President receives a salary of 20,000 dollars per month, and each of the ministers 10,000 dollars. The total administrative expenses are estimated (year ending August 15, 1922) at 1,071,882 dollars gold and 105,189,819 dollars currency (together about 768,006*l.*). The apparent large decrease of expenditure compared with that estimated for the years 1919, 1920 and 1921, is due solely to the great depreciation of the paper currency.

The country is divided into 2 sections: the 'Oriental,' east of Paraguay river, and the 'Occidental,' west of the same river. The Oriental section is divided into 12 departments, subdivided into 93 'partidos'; the Occidental section is divided into 3 'comandancias militares.'

The 12 departments are: Concepción, San Pedro, Caraguatay, Villarrica, Yhú, Caazapá, Encarnación, San Ignacio, Quiyindy, Villeta, Paraguari and Pilar. The capital, Asunción, formed a district subdivided into 'secciones policiales.' The civil authority is exercised by a *jefe político* in each of the latter, who is subject to the control of Government *delegados*, or *comisionados*, 12 in number, among whom are included the military commanders of the five military zones.

Area and Population.

The approximate area of Paraguay proper, which is situated between the rivers Paraguay and Alto Paraná, is estimated at 196,200 square kilometres, or 75,673 square miles. An area officially stated to be 100,000 square miles in extent, lying between the rivers Paraguay and Pilcomayo, known as the Chaco, is claimed by Paraguay, whose rights, however, are disputed by Bolivia. In 1917 the total population was estimated at 1,000,000, not including the Chaco Indians, roughly estimated at 50,000, but these figures are probably too high. The population of Paraguay proper consists of people of Guaraní Indian, European (chiefly Spanish) and Negro blood, the Guaraní largely predominating. Of foreigners in Paraguay, in 1916, there were probably upwards of 60,000, including 25,000 to 30,000 Argentines, 10,000 to 15,000 Italians, 1,400 Brazilians, 7,000 Spanish, 3,000 German, 800 to 1,000 French, 1,000 Uruguayans, 400 English. On September 30, 1920, the population of the capital, Asunción (founded 1537), was estimated to be 99,836; other towns are Villarrica, 26,000; Concepción, 15,000; Encarnación, 12,500; San Pedro, 8,700; Luque, 15,000; Carapeguá, 15,000; Paraguari, 10,000; Villa del Pilar, 10,000. These figures include the surrounding districts in each case, and the figures are estimated.

In 1913 the immigrants assisted by Government numbered 1,512; in 1917, 326; in 1918, 270; in 1919, 349; in 1920, 330. Very little land is now national property, most of it having been transferred to private ownership, much of it in very large tracts.

In 1916 the number of marriages was 2,526; of births, 29,381 (13,256 legitimate, and 16,125 illegitimate); of deaths, 8,273.

Religion, Instruction, and Justice.

The Roman Catholic Church is the established religion of the State, but the free exercise of other religions is permitted. Asuncion, Suffragan to Buenos Aires, is the only Paraguayan Episcopal See. The law of civil marriage came into force on August 1, 1899. Roman Catholic and other religious marriage ceremonies are allowed, but the civil ceremony alone gives validity to a marriage.

Education is free and nominally compulsory, but schools are not everywhere available. In 1919 there were 1,268 government primary schools with 78,399 pupils (44,137 boys and 34,262 girls). The teachers numbered 1,808 (653 men and 1,155 women). There were also 74 private schools, with 4,021 pupils (2,173 boys and 1,848 girls). There are National Colleges (*i.e.*, high schools) at Asuncion, Villarrica, and Pilar. The aggregate number of students is 740 and of teachers 46. There is also a University which grants degrees in law, medicine, and social sciences, and certificates to notaries public and practitioners in pharmacy and obstetrics. Number of students in 1919, 247; of professors, 34. There are also 6 normal schools (Asuncion, Villarrica, Concepcion, Encarnacion, Barrero Grande, and San Juan Bantista), with 27 male and 195 female students. Besides contributions from general taxes, there is a special Government fund for education consisting of a proportion of the proceeds of land sales, customs dues, &c. A national library, the national archives, and a natural history museum and botanic zoological garden are under the care of the department of Public Instruction.

Justice is administered by a Supreme Court, two courts of appeal (one for civil causes and another for commercial and criminal causes), a court of jurymen, 10 judges of First Instance, and (at the capital) 3 police magistrates. The functions of magistrates are exercised in the provinces by upwards of 100 *juces de paz* (all laymen), who are at the same time registrars of births, deaths, and marriages.

Finance.

The revenue is derived from import and export duties, inland revenue, transit dues, post and telegraph and other dues. The estimated revenue and expenditure for six years are given as follows:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1916	591,971	673,537	1920 ¹	1,069,530	1,082,846
1917-18 ¹	523,311	577,182	1920-21 ²	675,690	768,006
1919 ¹	1,105,911	1,071,332	1921-22	1,140,542	1,266,274

¹ The budget for the year ending June 30, 1918, remained in force until December 31, 1918.

² Estimated.

On December 31, 1920, the outstanding external debt amounted to 1,202,200*l.*, and the acknowledged internal debt to 762,629*l.* (not including the paper currency, viz., 182,983,500 dollars). The war debt to the Argentine and Brazil (the portion due to Uruguay was condoned) is not included in Government accounts. It may be said to exist only as a political weapon in the hands of those countries, and is by some considered an effective guarantee of the independence of Paraguay.

Defence.

The small army of Paraguay is drilled and trained and armed on the German model. Total about 100 officers and 2,500 men, distributed at 5 centres. In the event of war the National Guard is called to the colours. Service is compulsory in the ranks for 2 years, but the law is not enforced. The territory of the Republic is divided into 5 military zones.

The navy consists at present of a flotilla of 3 small converted merchant vessels armed with modern guns. The largest is about 200 tons gross register (three larger vessels having been sold).

Production and Industry.

Of the total area of the Republic, which is officially given at 111,250,000 acres, 57,231,250 acres are utilised in various ways, and 54,018,750 acres are unexploited land. The utilised land comprises 30,000,000 acres of grazing land, 7,031,250 acres of yerbales land, and 20,000,000 acres of timber land. In 1921 rural property holdings numbered 38,348, and extended to 81,917,345 acres.

The soil of Paraguay is productive and the climatic conditions favourable to the cultivation of many sub-tropical products. But in its present condition much of the country is admirably suited to pastoral purposes. Excellent grazing land is abundant in Paraguay proper and in the Chaco region. The cattle census of 1915 showed that there were in the Republic 5,249,043 cattle, 600,000 sheep, 478,000 horses, 17,000 mules, 18,000 asses, 61,000 pigs, and 87,000 goats. The meat packing and curing industry is encouraged by Government; hides, jerked beef, and other animal products are exported. *Yerba maté*, or Paraguay tea, which is a natural product of the virgin forests, is one of the chief articles of export; in 1918, 11,032,758 kilos were produced. The cultivation of the tree from seed is being undertaken on an extensive scale in many parts of the country, particularly by Germans, and is liable within a few years to revolutionise the industry. The total export of *yerba* in 1920 was 4,760,000 kilos. Tobacco is also one of the principal products. The normal output is about 220,000 cwts., of which about 60 per cent. was (before the war) exported to Europe, chiefly to Germany. Paraguay also produces quebracho extract; in 1920 the output amounted to 24,061 tons. Fruit-growing, especially oranges, is general; 133,360,000 oranges were exported in 1920. The export of petit grain oil, the essential oil made from the leaves of the sour orange, amounted in 1920 to 73,600 kilos. The total area devoted to sugar cultivation (largely for the manufacture of spirit) is about 11,120 acres; estimated sugar production in 1920, 5,230 tons; 1919, 2,504 tons. There are 7 sugar refineries in Paraguay, the most important of which is at Tebicuary. Roots (chiefly mandioca, sweet potatoes, and ground-nuts), maize, beans, rice, &c. are grown for local consumption, but agriculture is primitive. The cultivation of cotton is encouraged by the authorities, but has not yet assumed commercial importance for want of labour.

Iron, manganese, copper, and other minerals are encountered in abundance. The Ibicuí iron mines were worked as early as 1863. The Quiquió and Ibicuí manganese mines contain ore deposits estimated at 60,000,000 tons. Copper has also been found at San Miguel and Quiquió.

Commerce.

The following is the value of the imports and exports (5 dollars = £1):—

—	1915	1916	1917	1918	1919	1920
	£	£	£	£	£	£
Imports . .	481,174 ¹	930,305 ¹	1,021,240 ¹	2,210,324 ²	3,167,194 ²	2,623,701 ²
Exports . .	1,778,200	961,492	1,300,040	1,234,264	3,558,204	3,037,116

¹ The comparison between the import values with the export values is apt to be misleading, since these figures represent the *conventional values* only (assigned by the customs tariff as the basis on which duties are collected) and not the ascertained value of the goods.

² The actual, or ascertained, value.

Import duties (estimated) in 1917-18, 235,657%, in 1919, 444,500%, in 1921-22, 213,700%. The export duties were estimated in 1917-18, at 179,390%, in 1919 at 163,000%, in 1921-22, 123,600%.

The chief imports are textiles, provisions, hardware, wines and spirits, drugs, and fancy goods. The chief exports are hides (198,965), yerba (4,760,000 kilos), oranges, tobacco (8,565,000 kilos) in 1920, timber, canned and preserved beef, cattle, petit grain oil, and quebracho extract. Of the imports in 1920, the most important were foodstuffs, 503,497%; hardware, 702,761%; and textiles, 1,056,370%. Of the total exports in 1920, goods to the value of 1,776,930% went to Argentina, whence the bulk is re-exported. The imports from Great Britain (chiefly consisting of textiles and hardware) amounted in 1920 to 521,163%, or only 20 per cent. of the total. The exports from Paraguay to the United Kingdom were valued at 95,900%. The 'most favoured nation treaty' of 1884 between Great Britain and Paraguay is in force. A free trade treaty was signed in 1916 between Paraguay and Argentina, but has not yet been ratified.

The trade between Paraguay and the United Kingdom (Board of Trade returns) for 5 years:—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Paraguay to U.K. .	390	320	1,250	2,413	9,952
Exports to Paraguay from U.K. .	144,338	245,919	294,882	169,350	60,816

Communications.

In 1920, 3,776 vessels, with an aggregate tonnage of 270,952 tons, entered at the port of Asuncion, and 3,742 with a tonnage of 269,773 cleared. These figures include sailing vessels. The principal company engaged in the river service is the Argentine Navigation Company, Ltd., the controlling interest in which is British.

There is a railway (the Paraguay Central Railway) from Asuncion to Encarnacion, on the Rio Alto Paraná, a distance of 232 miles. The change of gauge from 5½ ft. to the standard 4 ft. 8½ ins., was effected in 1910 and a through train service without break of bulk from Asuncion to Buenos Aires was opened in 1911. Opposite Encarnacion is Posadas, to which an

Argentine line is extended, and the two lines are connected by a train ferry (opened October 10, 1913). El Ferrocarril del Norte, owned by a Paraguayan company, runs from Concepcion as far as Horqueta, a distance of 43 kilometers (26 miles). This road is projected to run as far as Pedro Juan Caballero on the Brazilian border. The Azucarera Paraguaya, in the Department of Ibytymi, has 13 kilometers (8 miles) of its line open to the public. It is owned by Paraguayan capital. The country roads are in general mere bullock tracks, and transport is difficult and costly.

There is a line of telegraph at the side of the railway. The national telegraph (915 miles of line and 1,440 miles of wire) connects Asuncion with Corrientes and Posadas in the Argentine Republic, and thus with the outside world; there are altogether 1,436 miles of telegraph line and 61 telegraph offices in 1919. Number of messages in 1918, transmitted, 127,892; received, 100,378. The telephone at Asuncion was destroyed by fire in 1913. Wireless telegraph stations have been erected at Asuncion, Encarnacion, Concepcion, and Paraguari. They are said to have a radius of 500 kilom. by day and 1,000 kilom. by night. Paraguay joined the postal union in 1881; in 1917 the number of post offices was 385. In 1919 the total number of pieces of mail matter handled was 5,028,896.

Money and Credit.

The principal banks in Paraguay are the Bank of the Republic, opened in June, 1908 (capital, 4,000,000 dollars gold); London and River Plate Bank, opened early in 1920; the Mercantile Bank, established 1891, with a capital of 25,000,000 dollars paper; the Banco de España y Paraguay, with a capital of 5,300,000 dollars paper; the Banco Constructor, with a capital of 2,000,000 dollars paper; and the Agricultural Bank, established 1887, with a capital of 35,664,468 currency dollars advanced by Government. The total currency in circulation on December 31, 1921, was 182,983,500 dollars. The total gold credit, chiefly in Buenos Aires banks, was 2,830,555 dollars.

There is no gold and silver current, and paper is the only circulating medium with the exception of nickel coins to the value of 2,983,500 dollars currency. The average rate of exchange in 1920 was 20 dollars paper to 12. The exchange is subject to fluctuation and transactions are frequently made in Argentine gold or paper dollars. On January 20, 1916, a law was passed establishing an Office of Exchange or Conversion. For the purpose of buying gold currency the office had placed at its disposal (1) 10,000,000 pesos paper currency, (2) the amounts received from the sale of gold currency, and (3) the available funds in hand at the Agricultural Bank. The Office of Conversion had on December 31, 1918, a capital of 1,394,356 gold pesos and 1,017,211 pesos paper, but, owing to insufficient resources, has been unable so far to effectively control the fluctuations of exchange for which purpose the institution was originally created.

Weights and Measures.

The metric system was officially adopted on January 1, 1901, and is now in general use, but the following are still used in certain cases:

The 1 <i>Cuadra</i>	.	.	= 100 varas (97 yards, about).
„ 50 <i>Cuadras</i>	.	.	= 1 league (2½ miles, about).
„ 1 <i>cuadra cuadrada</i>	.	.	= 2 acres (nearly).
„ <i>Legua cuadrada</i>	.	.	= about 7½ sq. miles.

1 arroba	= 25·35 lbs.
1 quintal	= 101·4 „
1 almuda	= 5·28 gallons (dry measure).
1 fanega	= 7·9 bushels.

Diplomatic and Consular Representatives.

1. OF PARAGUAY IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary.—Dr. Don Cecilio Bacz, May, 1920).

Consul-General in Great Britain.—Alfred James. Appointed November 20, 1897.

There are Consuls at Glasgow, Birmingham, Manchester, Cardiff, Liverpool, Bradford, and Southampton.

2. OF GREAT BRITAIN IN PARAGUAY.

Minister Plenipotentiary.—Sir J. W. R. Macleay K.C.M.G. (residing at Buenos Aires).

Consul at Asuncion (Local rank of Secretary of Legation and Chargé d'Affaires in absence of Minister).—F. W. Paris.

PERSIA.

(IRÂN.)

'Reigning Shah.

Sultan Ahmad Shah, born January 20, 1898 (27th Shaban 1315), succeeded his father, Muhammad Ali Shah (who abdicated) July 16, 1909, under regency of Ali Riza Khan, Azud ul Mulk, chief of the Kajar tribe. Azud ul Mulk, the Regent, died September 22, 1910, and on the 25th of the same month the National Council elected Abul Kasim Khan, Nasir-ul-Mulk, who was then in Europe, as his successor. The Regent arrived in Teheran on February 8, 1911, and definitely assumed his functions by taking the oath before the National Council on March 4. The coronation of the Shah took place on July 21, 1914.

Brothers of the Shah.—I. Itezzad es Saltaneh. II. Muhammad Hasan Mirza, Valiahd (heir apparent), born February 19, 1899 (9th Shaban 1316). III. Muhammad Mehdi Mirza. IV. Mahmud Mirza.

Uncles of the Shah.—I. Abu'l Fath Mirza, Salar ed Dowleh, born 1881. II. Abu'l Fazl Mirza, Azud es-Sultan, born 1883. III. Husein Kuli Mirza, Nusrat-es-Sultaneh, G.C.V.O., born 1894. IV. Nâsr-ed-dîn Mirza, born 1896.

The Royal Family is very numerous: there are some thousands of princes and princesses.

The Shah of Persia—by his official title, 'Shâhinshâh' (a corruption of Shâhân Shâh), or King of Kings—was until 1906 absolute ruler within his dominions, and master of the lives and goods of all his subjects. The whole revenue of the country being at their disposal, recent sovereigns of Persia were able to amass a large private fortune.

The present sovereign of Persia is the seventh of the dynasty of the Kajârs, which took possession of the crown by the overthrow of the Zand dynasty. The date of accession of each of the sovereigns of the dynasty was as follows:—

- | | |
|--|--|
| 1. Agha Muhammad . . . 1779-1794 | 5. Muzaffar-ed-dîn, son of Nasir-u-dîn . . . 1896-1907 |
| 2. Fath Ali, nephew of Agha Muhammad . . . 1797-1834 | 6. Muhammad Ali, son of Muzaffar-ed-dîn . . . 1907-1909 |
| 3. Muhammad, grandson of Fath Ali . . . 1835-1848 | 7. Sultan Ahmad, son of Muhammad Ali . . . July 16, 1909 |
| 4. Nasir-u-dîn, son of Muhammad . . . 1848-1896 | |

According to the Constitution the Shah must belong to the Shi'a faith and his successor must be his eldest son, or next male heir in succession, whose mother was a Kajar princess.

Constitution and Government.

The form of government in Persia up to the year 1906 was, in its most important features, similar to that of Turkey. The Shâh, within the limitations imposed by the Moslem religion, was an absolute ruler, but had to reckon with the power of the leading doctors of law (*Mujtahid*), who resided at Najaf and Kerbela in Mesopotamia. Unlike the Sultan of Turkey he had no religious standing. In 1905, the Persian people demanded representative institutions, and in January, 1906, the Shâh gave his consent to the establishment of a National Assembly, or 'Majlis,' which sat from October, 1906, to June, 1908, and drew up a 'Constitution' which received

the Shah's approval on December 30, 1906. The 'Majlis' has had Sessions in 1909 and 1915 and was re-opened on June 22, 1921, by the present Shah. The government of the country is in the hands of the Cabinet, which was formed on January 21, 1922, as follows:—

Prime Minister and Minister of the Interior.—Mushir-ed-Dowleh.

Minister for Foreign Affairs.—Hakim-ul-Mulk.

Minister of War.—The Sardar Sepah (Riza Khan).

Minister of Education.—Mayer-ul-Mulk.

Minister of Finance (Acting).—Mudir-ul-Mulk.

Minister of Justice.—The Sardar Muazzam.

Minister of Posts and Telegraphs.—Ettela-es-Saltaneh.

Minister of Public Works.—Adib-es-Saltaneh.

The country is divided into thirty-three provinces, which are governed by governors-general, who are directly responsible to the central Government, and can nominate the lieutenant-governors of the districts comprised in their own governments. Some of the governments are very small, and do not bear subdivision into districts, &c.; others are very large, and comprise several provinces. Governors-general and governors are generally called Hâkim, the former also often have the title of Wâli. Every town has a mayor or chief magistrate called Kalântar, or Darogha, or Beglerbegi. Every quarter of a town or parish, and every village, has a chief who is called Katkhuda. These officers, whose chief duty is the collection of the revenue, are generally appointed by the governors, but sometimes elected by the citizens. Most of the governors have a vizir or a pîshkâr, a man of experience, to whom are entrusted the details of the government. The chiefs of nomad tribes are called Ilkhânî, Ilbegi, Wâli, Sirdâr, Sheikh; they are responsible for the collection of the revenues to the governors of the province in which their tribes reside.

A law of May, 1907, provides for the election of rural and town councils. In these elections practically all subjects have a right to vote, and it was intended that the councils should be in direct communication with the Majlis.

Area and Population.

Persia, which has an area of about 628,000 square miles, lies between 25° and 40° north latitude and between 44° and 63°30' east longitude. A vast portion of this area is an absolute desert, and the population is everywhere so scanty as not to exceed, on the average, fifteen inhabitants to the square mile.

The population is estimated at between 8 and 10 millions, but all figures are largely conjectural. It is estimated that the country contains some three million nomads. Of these, 260,000 are Arabs, 720,000 Turks, 675,000 Kurds and Leks, 20,700 Baluchis and Gipsies, 234,000 Lurs. These figures, however, are merely round numbers, and estimates vary.

The number of Europeans residing in Persia does not exceed 1,200. There are about 600 British subjects resident in Persia (exclusive of British Indians).

The principal cities of Persia are:—Teheran, with over 220,000 inhabitants; Tabriz, with 200,000; Isfahan with 80,000; Meshed and Kerman, with 70,000 to 80,000 each; Yezd, with 45,000; Barfurush, Kermanshah, and Shiraz, with 50,000 each; Hamadan, Kazvin, Kum, Kashan, Resht, each with 30,000 to 40,000 inhabitants.

Religion.

Of the population about 8½ millions are Moslems of the Shi'a sect, and of that branch of it known as the *Ihnâ-'Ashariyya*, who recognise twelve Imâms or spiritual successors of the Prophet Mahomet; 850,000 are of the Sunni sect; 10,000 are Parsis (Gabrs), 40,000 Jews, 50,000 Armenians, and 30,000 Nestorians.

The Moslems of the sect called Shi'a differ to some extent in religious doctrine, and more in historical belief, from the Moslems of the Turkish Empire, who are called Sunni. The Persian priesthood (ulemâ) is very powerful. Any person capable of reading the Koran and interpreting its laws may act as a priest (mullâ). As soon as such a priest becomes known for his just interpretation of the divine law, and for his knowledge of the traditions and articles of faith, usually gained by many years of study at Najaf and Kerbela, he is called a mujtahid, or doctor of law. There are many mujtahids in Persia, sometimes several in one town; there are, however, only four or five whose decisions are accepted as final. The highest authority, the chief priest of all, is the leading mujtahid, who resides at Najaf or Kerbela, near Baghdad, and some consider him the vicegerent of the Prophet, the representative of the Imâm. The Shah and the Government have no voice in the matter of appointing the mujtahids, but the Sheikh-ul-Islâm, chief judge, and the Imâm-i-Jama, chief of the great mosque (Masjid-i-Jama) of a city, are appointed by Government. Under the Imâm-i-Jama are the pish namâz or khatib (leader of public prayers and reader of the Khutba, the Friday oration), the mu'azzin (crier for prayers), and sometimes the mutavali (guardian of the mosque); this latter, as well as the mu'azzin, need not necessarily be a priest. All mosques and shrines have some endowments (wakf), and out of the proceeds of these are provided the funds for the salaries of the priests attached to them. The shrines of some favourite saints are so richly endowed as to be able to keep an immense staff of priests, servants, and hangers-on.

The Gregorian National Armenians form two dioceses, each under a bishop. One bishop resides at Tabriz, the other at Isfahan. There are also a few thousand Roman Catholic Armenians in Persia who have a bishop of their own rite at Isfahan, the bishop of the Latin rite residing at Urumia. There is a wide tolerance exercised towards Armenians and Nestorians, Jews, and Parsis in cities where Europeans reside; in other places, however, they occasionally suffer oppression from Moslems belonging to the lower classes.

Instruction.

In recent years many schools of various degrees, entirely on European lines, have been established; the Ministry of Education has undergone radical reforms; and female education has been greatly advanced. There are probably some 50 schools in Persia with an aggregate of 4,000 pupils of both sexes.

There are many colleges (medresseh), supported by public funds, in which students are instructed in religion and Persian and Arabic literature, as well as in a certain amount of scientific knowledge, and many schools for children, while private tutors are very common, being employed by all families who have the means. A polytechnic school with a number of European professors, opened in Teheran in 1849, has done much towards introducing the knowledge of Western languages and science into Persia. There are also military colleges at Teheran and Tabriz. At Teheran there is a French school supported by the Alliance Française. But the bulk of the population are taught only to read the Korân. A 'political college,' Medresseh i Siasi, with about 50 pupils,

was opened in 1900, and prepares candidates for service in the Foreign Office, which pays 133,000 krans per annum for its maintenance. Some 40 new schools have been opened at the cost of all who draw pay from the Government, regardless of class, who have to pay 1 per cent. on their emoluments for the upkeep of these schools. Medical schools have also been started under the supervision of French doctors.

Justice.

The Minister of Justice, assisted by an Advisory Council, composed of a legal adviser, the Attorney General, Chief of the High Court of Appeal, and three of the chief directors of the Ministry of Justice, endeavours to supervise the organisation and the proper function of justice in Persia. The "Jurisconsult" of the Ministry of Justice is a Frenchman, who has now also been made the Chief of the "Ecole des Droits."

There are in every town of Persia police magistrates, and in big towns tribunals which deal with cases coming within the sphere of public and criminal laws. There are also courts of appeal in big towns and a High Court of Appeal in Teheran which is similar to the *Cour de Cassation* in France.

Finance.

The revenue for 1911-12 amounted to 2,042,850*l.*, and the expenditure to 1,608,600*l.* In 1912-13 the revenue amounted to 1,055,792*l.*, and in 1913-14 to 1,480,778*l.* These are the latest available figures.

More than half of the revenue consists of payments in cash or kind raised by assessments upon towns, villages, and districts, each of which has to contribute a fixed sum, the amount of which is changed from time to time by tax-assessors (*mumayiz*) appointed by the Government. Almost the entire burthen of taxation lies upon the labouring classes.

Approximate gross Customs receipts for three years (£1=30 Krans in 1917-18; £1=28 Krans in 1918-19; and £1=25 Krans in 1919-20):—

	1917-18	1918-19	1919-20
Northern Zone:—	£	£	£
Azerbaijan (Tabriz)	69,800	27,071	28,428
Astara	21,500	8,270	28,328
Gulan (Enzeli)	63,000	57,120	288,364
Meshed-i-sar	11,100	4,130	13,940
Bandar Gaz	7,900	11,031	10,732
Khurasan	88,000	82,740	158,468
Kermanshah and Hamadan	12,400	148,085	356,608
Southern Zone:—			
Bushire	200,500	281,600	225,728
Bandar Abbas	112,800	143,510	119,060
Mohammera	209,200	208,246	204,588
Teheran	9,400	12,337	3,764
Total	805,600	1,074,140	1,488,008

In December, 1921 the recognised foreign debts of Persia were:—

Loans	Original Amount	Outstanding
1. Indian 5 per cent. loan (£)	314,281 16 4	160,974 15 0
2. Imperial Bank of Persia (£)	1,250,000 0 0	1,207,488 1 0
3. British Advances 1912-14 (£)	490,000 0 0	490,000 0 0
4. Ditto, 1915-17 (£)	317,000 0 0	410,000 0 0
5. Ditto (Krans)	1,000,000	1,000,000
6. Ditto, 1918-20 (Krans)	92,500,000	92,500,000

By the Treaty of March 21, 1921, between Soviet Russia and Persia, all Loans and Advances made by the former to the latter were cancelled. This arrangement included half of the advance 4 although it was the British Government who paid the entire amount here.

The instalments of 1 and 2 are fully paid up, as are the *interests* (only) on 3. No arrangements have so far been made for the repayment of 4, 5, and 6.

Defence.

Prior to the Russian Revolution there was at the capital the 'Cossack Brigade,' of 8 squadrons, 1 infantry battalion, and a battery of 6 (Krupp) guns. The men are Persians, organised and trained by Russian officers. In 1912, Russia obtained the formal consent of the Persian Government to the formation of a similar Cossack Brigade at Tabriz under Russian officers; the consent of the Persian Government was conditional on the withdrawal of Russian troops in Azerbaijan. The 'Cossack Brigade' was in the hands of Russia until the Bolsheviks came into power. The two brigades were in 1919 formed as the Cossack Division and consisted of 56 Russian officers, 202 Persian officers and 7856 Persian rank and file. The chief expense of maintaining the Division was borne by Britain, the balance of rather more than one-third being paid by Persia. In October, 1920, the Russian officers of the Cossack Division were dismissed, and British officers were being chosen to replace them.

At the end of 1920 there were two brigades of South Persia Rifles (47 British officers, 190 Persian officers, 256 British and Indian non-commissioned officers, and 5400 Persian rank and file), with headquarters at Shiraz and Kerman respectively, also a regiment at Bandar Abbas. This force, in which was incorporated a part of the Swedish gendarmerie, is recruited locally and officered and trained by British officers, and forms the only efficient Persian force in Southern Persia.

In January, 1921, there was in north-west Persia a force of about 7,000 British and Indian troops. This force was withdrawn during the year.

The Anglo-Persian Agreement of August 9th, 1919, provided for the formation of a uniform Military Force under the command of British officers. This agreement not having been ratified, it lapsed in 1921, and all British officers and men were withdrawn. The South Persian Rifles, which were in effect a British organisation, therefore, ceased to exist. No systematic organisation of the Persian forces, after the withdrawal of British aid, had taken place up to the end of 1921.

The navy is quite unimportant. The two boats of which it consists are normally used for Customs purposes.

Production and Industry.

Besides wheat, barley, rice, fruits, gums, drugs, wool, cotton, &c., Persia produces much silk. The opium industry, as well as the production of gums, chiefly tragacanth, are increasing. The wool of Khurasan is famous. Persian carpets, of which there are many kinds, are all made by hand. The principal centres of the industry are Tabriz, Hamadan, Sultanabad, and Kerman.

The mineral deposits of Persia are considerable but undeveloped. They include iron, coal, copper, lead, manganese, marble, borax, nickel, and cobalt.

Oil is being developed with much success by the Anglo-Persian Oil Company near Ahwaz in the Karun Valley, and borings are being made in the country behind Bushire. Elsewhere in Persia, and in the island of Kishm, there are rich indications of oil. The turquoise mines of Nishapur are worked in a most primitive fashion but with profit, as also are the iron ochre and rock salt in the Persian Gulf.

Commerce.

The principal centres of commerce are Tabriz, Teheran, Hamadan, and Isfahan; the principal ports, Bandar Abbas, Mohammera, and Bushire on the Persian Gulf, and Astara, Euzeli, Mushed-i-sar, and Bandar Gaz on the Caspian. On March 21, 1899, the Government abolished the farm system in Azerbaijan and Kermanshah, and one year later in all other provinces, establishing at the same time a uniform duty of 5 per cent. *ad valorem* on imports and exports.

According to the statistics published by the Minister of Finance the values of the imports and exports for the six years were as follows:—

Years	Imports	Exports	Years	Imports	Exports
	£	£		£	£
1915-16	7,735,000	6,285,577	1918-19	17,010,240	9,581,080
1916-17	14,552,100	12,761,000	1919-20	25,191,704	14,712,692
1917-18	15,602,200	11,290,500	1920-21	18,982,492	14,728,264

The following table shows (in thousands of Krans : 28 Krans = 1*l.* in 1918-19 and 25 Krans = 1*l.* in 1919-20) the values of the chief imports into, and exports from, Persia:—

Imports	1918-19	1919-20	Exports	1918-19	1919-20
	1000 Krans	1000 Krans		1000 Krans	1000 Krans
Cottons	154,763	219,273	Fruits	21,798	29,939
Sugar	125,563	119,121	Carpets	4,807	29,709
Tea	58,567	35,949	Cotton	3,719	4,571
Gold and silver bars	2,000	12	Fish	2,746	—
Do. coin	3,140	27,719	Rice	650	11,622
Petroleum	7,596	11,739	Gold and silver coins	1,397	5,177
Yarn	5,218	18,237	Gums	2,598	8,889
Flour	3,117	5,543	Opium	28,595	24,166
Woolens	3,287	4,036	Wool	1,091	1,408
Indigo and kermes	4,779	3,370	Cocoons	411	1,226
Haberdashery	2,819	10,051	Skins	1,640	2,800
Rice	14,142	6,824	Animals	12,174	639
Spices	7,873	5,840	Silk stuff	1,874	1,954
Wool	914	—	Cottons	11,567	30,826
Animals	7,015	18,860	Wheat and barley	1,863	5,461
Silk Goods	2,155	2,603	Drugs	1,273	2,553
Tin, zinc and lead	1,732	3,719	Tobacco	1,874	4,184
Tobacco	858	1,747	Petroleum	155,424	180,778
Copper and nickel	—	12,696			

In the years ending March 20, 1919 and 1920, the distribution of the trade of Persia was as follows :—

From or to	Imports		Exports	
	1918-19	1919-20	1918-19	1919-20
	£	£	£	£
Afghanistan	270,300	330,450	47,050	98,128
Germany	1,080	5,780	—	—
Austria	1,950	2,864	—	—
Belgium	9,472	116	—	—
China	145,702	157,324	7,107	11,624
Egypt	577,110	1,465,300	2,045,605	5,032,612
United States	4,024	256,776	85,265	520,396
British Empire	13,602,180	17,943,144	4,177,029	3,264,108
France and Colonies	19,574	106,496	2,741	50,268
Italy	13,941	161,280	—	1,336
Netherlands and Colonies	324,530	34,620	—	—
Russia	1,192,410	3,398,628	1,890,455	3,018,904
Switzerland	11,430	8,964	—	—
Turkey	368,651	650,892	1,333,014	2,063,726
Muscat	2,780	23,848	4,333	3,804
Oman	178,280	190,972	151,536	371,336
Japan	67,834	242,952	7,539	248,800

Of the total trade in the year ending March 20, 1920, the British Empire enjoyed 53 per cent.*

Tonnage entered at Bushire, Lingah, Bandar Abbas, Mohammera, and several smaller ports was : in 1919-20, 1,551,129 tons, of which 1,402,794 tons were British. At Caspian Sea ports in 1919-20, 808,921 tons, all Russian.

Total trade between Persia and United Kingdom (Board of Trade returns) for 5 years :—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Persia to U.K.	572,986	212,775	1,683,198	3,7433 0	6,561,311
Exports to Persia from U.K.	931,834	1,274,004	1,661,102	2,206,,75	1,524,368

Banking and Credit.

The Shah in 1889 granted a concession to Baron Julius de Reuter for the formation of a State Bank of Persia, with head office at Teheran and branches in the chief cities. The bank was formed in the autumn of the same year, with the title "The Imperial Bank of Persia," and incorporated by Royal Charter, dated September 2, 1889. The authorised capital is 4 millions sterling, which may be increased. The bank started with a capital of one million sterling, of which the greater part was remitted to Persia at the then reigning exchange of 32-34. In consequence of the great fall in silver and the rise in the exchange, to 50 or more, the capital was reduced in December, 1894, to 650,000*l*. The bank has the exclusive right of issuing bank-notes—not exceeding 800,000*l*. without the assent of the Persian Government. The issue of notes is on the basis of the silver krân. In virtue of one of the articles of the concession the cash reserve for the first two years was 50 per cent., and afterwards 33 per cent. There is also established at Teheran the Russian 'Banque d'Escompte,' formerly 'Banque des Prêts de Perse' (which is connected with the Russian State Bank and floated the loans of 1900 and 1902 to Persia). This Bank, with all its Concessions, was in March, 1921, handed over to the Persian Government by the Soviet authorities.

Communications.

There are several trade routes in Persia:—The Western Trade Route, from Teheran to Baghdad, is the main Persian trade route, running from the railhead of Kuraitu (near Khanikin) by a slightly metalled road to Kermanshah and Hamadan. In the north there are six trade routes, viz., (1) Julfa to Tabriz, 86 miles; (2) Astara to Ardebil, 45 miles; (3) Enzeli to Teheran, 240 miles; (4) Enzeli to Hamadan, 280 miles; (5) Bandar Gaz to Shahrud, 90 miles; and (6) Askabad to Meshed, 90 miles. There are three central trade routes, viz., (1) Teheran to Qum, 90 miles; (2) Qum to Sultanabad; and (3) Qum to Kashan, 60 miles. In the South there are five trade routes, viz., (1) Harun Valley to Isfahan, 200 miles; (2) Bushire to Shiraz and Isfahan, 520 miles; (3) Bandar Abbas to Yezd, 300 miles; (4) Bandar Abbas to Kerman, 310 miles; and (5) Duzdab to Meshed, 500 miles.

A small railway from Teheran to Shah Abdul Azim (six miles) was opened in July, 1888, and is in the hands of a Belgian company, 'Société des chemins de fer et tramways de Perse.' A Russian company has also constructed a railway from Julfa (Perso-Russian frontier) to Tabriz (opened March 7, 1916) 85 miles long; and another from Pirebazar to Resht, 7 miles long. In southern Persia a military railroad, about 52 miles in length, has been constructed from Bushire to Borazjan, in the direction of Shiraz. The railroad from Quetta to Nushki, in India, has been extended to Duzdab. Total railway mileage, 350.

The river Karun at the head of the Persian Gulf has been opened to foreign navigation as far as Ahwaz. It is served by a fortnightly steamship service subsidised by the British Government.

Persia has a system of telegraphs consisting of 6,312 miles of line, with 10,754 miles of wire, and 131 stations.—(1) 1,706 miles of line with 5,318 miles of wire are worked by an English staff, and form the 'Indo-European Telegraph Department,' a British Government department, established in virtue of a number of conventions from 1863 to 1901 between the British and Persian Governments. The last convention was for the construction and working by the British Government of a three-wire line from Kashan to British Beluchistan via Yezd Kerman, and Bam. Telegraphic communication with India was effected in May, 1904. (2) 457 miles of line with three wires, 1,371 miles of wire between Teheran and Julfa on the Russo-Persian frontier, are worked by the Indo-European Telegraph Company, Limited, according to its concession of 1868. (3) About 3,600 miles of single wire lines belong to the Persian Government, and are worked by a Persian staff.

The first regular postal service, established by an Austrian official in Persian employ, was opened January, 1877. There are 218 post offices. In 1902 the post office was joined to the Customs Department worked by Belgian officials. In August, 1909, posts and telegraphs were placed in charge of a Minister of Posts and Telegraphs, who is a member of the Cabinet, but as to the number of letters, post cards, parcels, &c., conveyed, and telegrams transmitted, very few statistics are obtainable. During the year 1912-13, about 284,000,000 letters, post cards and newspapers, of which 4,000,000 were registered, were delivered in Persia, and there were 320,000 parcels delivered from Europe via Russia.

Money, Weights, and Measures.

Persia has a silver monetary standard. The monetary unit is the kran, a silver coin weighing only 24 nakhods (71 grains) or somewhat less. The proportion of pure silver was before the new coinage (commenced

1877) 92 to 95 per cent.; it was then fixed at 90, but occasionally coins with only 89½ have been turned out from the Mint. In 1874 a kran had the value of a franc, 25 being equal to 1*l*.

The coins in circulation, with their values calculated at exchange 1*l*. = 50 kran, are:—

Copper.		Silver.	
<i>Pal</i>	0·12 <i>d</i> .	Ten <i>Sháhíts</i> = ½ <i>Kran</i>	2·40 <i>d</i>
<i>Sháhít</i> = 2 <i>Pal</i>	0·24 <i>d</i> .	One <i>Kran</i> = 20 <i>Sháhíts</i>	4·80 <i>d</i>
Four <i>Sháhíts</i> = (1 <i>Abbási</i>)	0·96 <i>d</i> .	Two <i>Kran</i>	9·60 <i>d</i>
Five <i>Sháhíts</i> = 10 <i>Pal</i> = ¼ <i>Kran</i>	1·20 <i>d</i> .	Five <i>Kran</i>	2 <i>s</i> . 0·00 <i>d</i>

Copper is out of circulation. In consequence of an excess of coinage by a former mint-master the copper money greatly depreciated in value since 1896 and was circulating at less than its price of copper, viz. 80 to 83 copper shahis (weighing about ½ lb.) to one silver kran (4½*d*.). The Government then decided to introduce a nickel coinage instead; great quantities of five and ten centime pieces, of same size and weight as those current in Belgium, and of the nominal value of ½ and 1 kran, were coined at Brussels and put into circulation in the autumn of 1900.

Gold coins are: ¼ *Toman*, ½ *Toman*, 1 *Toman*, 2, 5 and 10 *Tomans*, but they are not in circulation as current money, because of their ever-varying value in *Kran* (silver) and no coins of the higher values have been struck for some years. They are a commodity and are used for presents and hoarding. A *Toman* in silver is the equivalent of 10 *kran* (now worth 3*s*. 4*d*.), but a gold *Toman* has a value of 22 *Kran* (7*s*. 4*d*.).

Accounts are reckoned in *dinârs*, an imaginary coin, the ten-thousandth part of a toman of ten *kran*s. A *kran* therefore = 1,000 *dinârs*; one *shâhí* = 50 *dinârs*.

The unit of weight is the *miskâl* (71 grains), subdivided into 24 *nakhods* (2·96 grains) of 4 *gandum* (·74 grain) each. Sixteen *miskâls* make a *sir*, and 5 *sir* make an *abbâsi*. Most articles are bought and sold by a weight called *batman* or *man*. The *mans* most frequently in use are:—

<i>Man-i-Tabriz</i> = 8 <i>Abbâsi</i>	.	.	.	= 640 <i>Miskâls</i>	= 6·49 lbs.
<i>Man-i-Noh Abbâsi</i> = 9 <i>Abbâsi</i>	.	.	.	= 720 "	= 7·30 "
<i>Man-i-Kohne</i> (the old man)	.	.	.	= 1,000 "	= 10·14 "
<i>Man-i-Shâh</i> = 2 <i>Tabriz Mans</i>	.	.	.	= 1,280 "	= 12·98 "
<i>Man-i-Rey</i> = 4 <i>Tabriz Mans</i>	.	.	.	= 2,560 "	= 25·96 "
<i>Man-i-Bandar Abbâsi</i>	.	.	.	= 840 "	= 8·52 "
<i>Man-i-Hâshemi</i> = 16 <i>Mans</i> of.	.	.	.	720 "	= 116·80 "
Corn, straw, coal, &c., are sold by <i>Kharvâr</i> = 100 <i>Tabriz Mans</i>	.	.	.		= 649·142 "

The unit of measure is the *zar* or *gaz*; of this standard several are in use. The most common is the one of 40·95 inches; another, used in Azerbaijan, equals 44·09 inches. A *farsakh* theoretically = 6,000 *zar* of 40·95 inches = 3·87 miles. Some calculate the *farsakh* at 6,000 *zar* of 44·09 inches = 4·17 miles. It is about 3½ miles in South Persia and about 4 miles in the North.

The measure of surface is *jerib* = 1,000 to 1,066 square *zar* of 40·95 inches = 1,294 to 1,379 square yards.

Diplomatic Representatives.

1. OF PERSIA IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary.—Mirza Davood Khan, Miftah-es-Saltaneh, K.C.M.G. (appointed November, 1920).

Counsellor.—Mahomed Ali Khan.

First Secretary.—Fathollah Khan Noury, Monazem-u-Saltaneh.

Third Secretaries.—Ibrahim Khan Gharagozlou and Abdul Hussein Khan Ansari, Mudir-u-Dola.

Honorary Attachés.—Gholam Hossein Khan Sidri, Farid-es-Saltaneh, and Prince Anushirwan Mirza Salour.

Consul-General.—Sir Harry S. Foster.

2. OF GREAT BRITAIN IN PERSIA.

Envoy Extraordinary and Minister Plenipotentiary.—Sir Percy L. Lorraine Bart., C.M.G. Appointed October 1, 1921.

Counsellor.—R. Bridgeman, C.M.G., M.V.O.

Secretaries.—R. H. Hadow, E. St. J. D. Monson, and C. W. Baxter, M.C.

Military Attaché.—Lt.-Col. M. Saunders, D.S.O.

Commercial Secretary.—B. Temple.

There are Consular representatives at Teheran, Tabriz (C.), Resht, Bushire (C.-G.), Bandar Abbas, Meshed (C.-G.), Isfahan (C.-G.), Seistan, Kerman, Mohammera, Shiraz, Kermanshah, Hamadan, Yezd, Ahwaz, Turbat-i-Haidari, Sultanabad.

Statistical and other Books of Reference concerning Persia.

1. OFFICIAL PUBLICATIONS.

PERU.

(REPÚBLICA DEL PERÚ.)

Constitution and Government.

THE Republic of Peru, formerly the most important of the Spanish Viceroyalties in South America, issued its declaration of independence July 28, 1821; but it was not till after a war, protracted till 1824, that the country gained its actual freedom from Spanish rule. The Republic is politically divided into departments, and the departments into provinces. According to the Constitution of January 18, 1920, the legislative power is vested in a Senate (35 members) and a House of Representatives (110 members), and renewed totally every five years. The number of senators and deputies can only be altered by reform of the Constitution. An organic law designs the departmental and provincial electoral districts, and the number of senators and deputies which corresponds to each of them. Both senators and deputies are elected by a direct vote. Congress meets annually on July 28, and sits for 90 to 120 days. It may be summoned as often as necessary, but no extraordinary session may last more than 45 days.

The executive power is entrusted to a President, elected for 5 years and not re-eligible till after another 5 years. He receives 30,000 soles (3,000*l.*) a year and an amount for administration expenses, fixed by Congress each year. There are two Vice-Presidents, who take the place of the President only in case of his death or incapacity, and they are elected for 5 years. The Vice-Presidents receive no salary as such. The President and Vice-Presidents are elected by direct vote.

President.—Señor *Agusto B. Leguía*, who assumed the Presidency by means of a *coup d'état* on July 4, 1919. His position was afterwards confirmed and legalised by Congress, and the President took the oath on October 15, 1919, for the term 1919-24.

The President exercises his executive functions through a Cabinet of five ministers, holding office at his pleasure. The ministers are those of the Interior, War, Marine, Foreign Affairs, Justice, with Worship and Instruction, Finance and Public Works. Each minister receives 16,800 soles (1,680*l.*) a year. None of the President's acts has any value without the signature of a minister.

The departments are divided into provinces (113 in all), and these are subdivided into districts (930 in all). Each department is administered by a Prefect, and each province by a Sub-Prefect. There are three regional congresses in the country, one in the north, a second in the centre, and the third in the south. Deputies to these legislatures are chosen by the provinces. Municipal councillors are elected by direct vote, and foreigners are eligible.

Area and Population.

There has been no enumeration of the population in recent years. The census returns of 1862 showed a total population of 2,487,916; that of 1876 put the number at 2,699,106, of whom about 13·8 per cent. were white, 1·9 per cent. negroes, 57·6 per cent. Indian, 24·8 per cent. mestizos (Cholos and Zambos), and 1·9 per cent. Asiatic, chiefly Chinese. An estimate in 1908 gives the population in that year as 4,500,000. An Act of the Peruvian Congress, dated October 30, 1920, authorises the Executive to take a general census.

The population of the capital, Lima, according to the official census of December 17, 1920, was 176,467; Callao 52,843, Arequipa 35,000 to 40,000, Cuzco 10,000 to 15,000, Iquitos district 12,000, Ayacucho 14,346, Huarás 7,646, Huacho 6,283.

The Republic (including Tacna) is divided into 19 departments and 3 provinces (Callao, Tumbes and Moquegua), the areas of which, according to estimates supplied by the Lima Geographical Society, are given below with the population, according to the census returns of 1876 (the latest official one) and an estimate for 1896. The estimate, however, is not to be accepted as satisfactory, grave doubts being entertained whether the population is increasing. The chief towns are shown in brackets:—

Departments and Provinces	Area : English square miles	Population		Pop. per square mile, 1896
		1876	1896	
Departments :

There are, besides, many uncivilised Indians, but their numbers are

absolutely unknown. The Peruvian Government encourages immigration of properly qualified persons, but would-be settlers entirely destitute of capital are mentioned as undesirable.

As a result of the war with Chile, the latter country has annexed the province of Tarapacá. The Chileans have also, under the Treaty of Ancon of March 8, 1884, occupied the provinces of Tacna and Arica since 1883. A popular vote should in 1894 have decided to which country they are to belong, but owing to the failure of negotiations for arriving at a *modus operandi*, the decision was deferred. In December, 1921, the Chilean Government invited the Government of Peru to concur in the holding of the plébiscite. The Government of Peru, however, suggested a settlement by arbitration, and in January, 1922, the Government of the United States invited Peruvian and Chilean delegates to Washington to discuss the Tacna-Arica controversy. By March, 1922, no definite decision had been taken in the matter.

As to the boundary dispute with Bolivia an arrangement has been come to by direct negotiations between Bolivia and Peru. The frontier line between them was fixed from the mouth of the Heath to that of the Yaverija (1912), and finally demarcated by a joint commission. Those with Colombia and Ecuador were referred to the King of Spain. The question at issue concerned the possession of over 100,000 square miles of land rich in rubber, timber, and probably gold lying about the head waters of the Amazon. The King, on the evident unwillingness of Ecuador to decide the dispute by arbitration, renounced his functions as arbitrator in November, 1910. The United States then intervened, and hostilities were for the moment averted by the agreement of the disputants to accept the mediation of the United States, Argentina, and Brazil. A definite arrangement has been made with Brazil as to boundary, favourable, on the whole, to Peru.

The region north of the Marañon from the Pongo de Manseriche is claimed by Ecuador and Colombia and Peru. This region formed in the Spanish Colonial days the Comandancia de Maynas, and was allocated to the Virreynato of Santa Fé, then to the Audiencia of Quito, and for religious and ecclesiastical purposes subject to the Archbishop of Lima. It has been occupied by Peru since 1840.

Religion.

By the terms of the new Constitution (January 18, 1920) there exists absolute political and religious liberty. The Roman Catholic religion is the religion of the State. There is a Roman Catholic archbishopric (Lima, dating from 1545), 13 bishoprics, 2 Apostolic Vicarages, and 2 Apostolic Prefectures. The churches and convents are the property of the State. In 1920, 19,6857. were voted for public worship, and 6607. for missions. In 1897 an Act was passed enabling non-Catholics to contract civil marriages. In 1903 an Act was passed giving still greater facilities for the marriage of non-Catholics.

Instruction, Justice.

By the law of February 5, 1921, elementary education is compulsory for both sexes between the ages of 7 and 14, and is free. In 1920, there were in Peru 3,338 primary schools with 5,059 teachers and 194,701 pupils. There were also in 1920, 29 Government high schools, with 6,669 pupils and 372 teachers. Secondary schools are either general or vocational. Higher education is provided at the central university in Lima, called 'Universidad

de San Marcos,' founded by Charles V. in 1551; it had in 1920, 1,308 students in five faculties. There are also universities at Arequipa (founded in 1827), Cuzco, and Trujillo; while the Education Law of February 5, 1921, created the University of Technical Schools, which comprises advanced schools of engineering, agriculture, commerce, industrial arts, and a school of pedagogy.

Justice is administered in the Supreme Court at Lima composed of 11 judges and 3 fiscals, and in Superior and Minor Courts at Lima and 11 other judicial districts. The judges of the Supreme Court are chosen by Congress from lists of names presented by the Government; those of the Superior Courts and of the Minor Courts are chosen by the Government from lists of names presented by the Supreme and Superior Courts, respectively.

Finance.

For the collection of the dues on alcohol, opium, tobacco, stamped paper for official uses, legacy and property transfer dues, etc., a new syndicate was formed under Government approval called the *Compañía Recaudadora de Impuestos* (the Tax Collecting Company), which began operations on the 1st April, 1913, making a loan to the Government, as a condition of its contract, of 1,245,000*l.*, which sum is to earn 7 per cent. interest per annum. The Company retains 115,000*l.* for administration expenses as also 1 per cent. of the profits.

Salt is a Government monopoly created originally (1896) for the purpose of raising a fund for the ransom of the Provinces of Tacna and Arica. Latterly, however, the *Compañía Recaudadora de Impuestos* has undertaken, as one of the stipulations of its contract, to furnish the Government at any given moment with the necessary sum to make the service of amortization and interest, of a loan it may contract for the ransom of the Provinces mentioned. This monopoly produced a net revenue of 313,706*l.* in 1920.

The revenue and expenditure for 5 years (ended May 31) were as follows (10 soles = 1*l.*):—

—	1916	1917	1918	1919	1920
	£	£	£	£	£
Revenue	3,942,383	4,510,435	4,892,461	6,154,171	8,087,297
Expenditure	3,193,609	3,330,483	4,693,343	5,799,981	7,481,303

For 1922 the budget provided an expenditure of 6,000,000*l.*

The foreign debt of Peru was made up of two loans, contracted in England in 1870 and 1872, amounting to 32,688,320*l.* In 1876 Peru was forced to suspend payments on its external debt, and in 1889 the debt, including arrears of interest, amounted to 55,209,133*l.* In January, 1890, by the signing of the Grace-Donoughmore contract, the Committee of Peruvian Bondholders assumed all responsibility for the foreign debt of Peru, and in return the Peruvian Government granted that organisation certain concessions (rights over guano deposits, mines, and lands) and the control of all State railways, for a period of 66 years. The Peruvian Corporation was then created by the Committee of Peruvian Bondholders to administer these concessions. In 1907 a new contract was effected between the Peruvian Corporation and the Peruvian Government by which certain disputes were adjusted and under which the railway lease was extended for an additional 17 years, during which time the Government was to receive 50 per cent of the net profits resulting from the operation of the railways after the service of the corporation's railway bonds had been met. The Government extended

the contract with the Peruvian Corporation for 10 years from September 11, 1911.

The total debt of Peru (June 30, 1921) amounted to 7,837,774L., of which the internal debt amounted to 4,641,290L., the foreign debt to 934,840L., and the floating debt to 2,261,644L.

In 1919 a law was passed authorising the President to issue at par bonds of the International Consolidated Debt of a nominal value of 2,000,000 Peruvian pounds redeemable in 31 years by semi-yearly drawing, bearing interest at the rate of 7 per cent. per annum.

Defence.

Military service in Peru is compulsory and universal. The terms are 2 years in the active army, 7 years in the first reserve, 5 in the second reserve, and 15 years in the National Guard. The country is divided into 5 military districts, each furnishing a complete division. Each division contains 2 or 3 regiments of infantry of 2 battalions each (1 machine gun company per regiment); 1 group (2 batteries) field artillery; 1 regiment mountain artillery; 1 cavalry regiment of 2 squadrons; 1 railway company; 1 labour company; 1 topographical section; 1 medical section; 1 commissariat section. The General Staff is quartered at Lima, and is composed of 3 sections, a geographical department, commissariat, medical, and engineer services. The centres of instruction comprise: (1) military school to obtain rank of 2nd lieutenant, (2) special school, for lieutenants of all arms, (3) general staff academy, for captains qualifying for staff. The peace establishment of the army is 11,000, Police and gendarmerie amount to 8,000, distributed amongst civil guards and squadrons of mounted police. There is an ammunition factory. The infantry are armed with the 1912 Peruvian model of the Mauser rifle, cavalry with carbine of same type and model, artillery with the Schneider Canet gun. The civil schools (technical, secondary, and state provided) are organised in military fashion, and receive their military instruction from a permanent staff appointed by the General Staff. Shooting is compulsory for all coming within the terms of the military service law. There are also 176 State-aided rifle clubs under military control, with a roll of 16,000 marksmen.

The Peruvian navy now consists of two cruisers, the *Almirante Grau* and the *Coronel Bolognesi*, 3,200 tons and 24 knots speed, which were launched at Barrow in April, 1906; a former French light cruiser, one destroyer, two submarines completed and three building in Italy.

Peru possesses a river flotilla on the Amazon, composed of the following vessels:—*America*, *Tiquitos*, *Cahuapanas*, *Orellana*, *Requena*, *Puno*, and *Cuzco*.

Agriculture and Industry.

The country may be divided into three zones: the coast strip, with an average width of 30 miles; the Sierra, or Uplands, lying between the coast range of mountains and the Andes proper; and the forest or wooded region, called the *Montaña*. The chief agricultural productions of Peru are sugar, cotton, coffee, wool, hides, and skins. The cotton area in 1919 (latest available statistics) was 222,160 acres; cotton production in 1919 was 33,588 tons. The chief coffee-growing districts are those of Chanchamayo, Perené and Paucartambo in Central Peru, where the Peruvian Corporation has done much useful colonising work. Coffee is also grown in the Huanuco district. The concession to

the Corporation comprises about 2,750,000 acres, but the labour and transport difficulties in the tropical forest region are serious; much less than half the area conceded for colonisation is as yet occupied. The sugar industry, the most important in the country, is carried on chiefly in the coast region. The area devoted to cane cultivation was given in 1918 as 124,510 acres, and the number of labourers in the industry as 23,456. In 1918, 287,480 tons were produced; in 1917, 310,000 tons. Cocoa cultivation is extending, about 200,000 cocoa trees having been recently planted in the Perené region. Wheat in 1919 was grown on 373,546 acres, which produced 71,647 tons. Rice is extensively grown; in 1919 the area was 72,555 acres; the production in 1919 was 63,790 tons; in 1918, 64,628 tons. The quality is excellent, but the quantity is insufficient to meet local wants. There are about 20 rice mills in the country. Tobacco, wines and spirits, olives, ramie, and maize are also produced. In 1909 the Government created a tobacco monopoly for the manufacture, importation and sale of tobacco. This industry is conducted by an organisation known as the *Compañía Recaudadora de Impuestos, Estanco del Tabaco*, at Lima. Silk culture is being tried in the coast region. The most important coca growing district is in the province of Otuzco in the department of La Libertad, where there are several coca estates. Cocaine is manufactured in Lima, Otuzco, and several other towns. Besides, there are in the country dyes, cinchona, and other medicinal plants. There is a large export of alpaca, sheep, and llama wool. Thousands of square miles of healthy and fertile land on the eastern slopes of the Andes are available for colonisation.

The guano deposits on Huanillos, Punta Lobos, and Pabellon de Pica, which had been delivered over to the Peruvian Corporation, reverted to the Chilean Government on February 2, 1901; they contained 40 or 50 thousand tons of guano; but those on the island of Lobos de Afuera, and at some places on the coast, still remain in possession of the Corporation. In 1919 a new company was set up by the Government for the administration of guano. In the 1920-21 season 69,685 Spanish ton loads of guano were extracted.

The following table shows the mineral production for two years:—

		1919		1920	
		Quantity	Value	Quantity	Value
Copper	Metric tons	39,230	£ 2,879,983	82,082	£ 2,358,248

¹ The value after the petroleum has been refined.

Commerce.

The value of the trade of Peru in five years (including the Department of Loreto) has been as follows (10 soles = 1*l.*):—

—	1916	1917	1918	1919	1920
	£	£	£	£	£
Imports . .	8,688,150	13,502,851	9,705,113	12,203,840	17,956,758
Exports . .	16,541,063	18,643,414	19,972,595	26,899,422	35,322,226

The values of the principal imports and exports for 2 years are shown by the following table:—

Imports	1918	1919	Exports	1919	1920
	£	£		£	£
Textile Bags . .	479,099	496,419	Sugar . .	8,310,770	15,584,889
Wheat . .	415,221	520,819	Cotton . .	6,656,845	11,190,061
Lumber . .	522,075	405,479	Copper . .	4,812,929	3,625,280
Coal . .	507,376	654,857	Petroleum . .	2,320,319	2,983,060
Industrial Oils . .	116,857	87,292	Wool . .	1,631,644	855,145

The distribution of the trade was mainly as follows (10 soles = 1*l.*):—

From or to	Imports		Exports	
	1918	1919	1918	1919
	£	£	£	£
U.S. America	5,268,667	7,549,655	9,208,971	12,499,234
United Kingdom	1,560,386	1,645,946	6,334,473	8,441,341
Germany	441	111	—	50,584
Belgium	86	—	—	1,768
Italy	138,370	111,616	587	52,504
France	134,836	153,017	13,746	384,499
Chile	716,710	682,630	2,527,140	3,231,635

Custom receipts in 1920 amounted to 4,421,947*l.*; in 1921 to 2,353,069*l.*

Under the treaty of 1850 there is reciprocal freedom of commerce and navigation between the United Kingdom and Peru.

Total trade between Peru and United Kingdom in thousands of pounds for 5 years (Board of Trade returns):—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Peru to United Kingdom	4,672	8,047	8,897	14,619	6,436
Exports to Peru from United Kingdom	1,494	1,530	1,700	4,733	2,141

Shipping and Navigation.

At Callao there entered, in the foreign trade, in 1920, 741 steamers of 1,767,032 tons, and cleared 740 of 1,720,030 tons. Of the total entering, 194 steamers were British, 131 Chilean, 135 Peruvian, 11 Japanese, and 192 United States. Since 1886, foreign sailing vessels may not engage in Peruvian coasting trade; but foreign steamers, with special authorisation, may.

The merchant navy of Peru in 1920 consisted of 15 steamers (over 100 tons) with 14,248 tons ; 37 sailing vessels (over 100 tons) with 23,368 tons ; and 108 barques with 2,915 tons.

Internal Communications.

At the end of 1919 there were in the country 347 miles of road suitable for motor traffic, 90 miles under construction, and 141 miles planned, making a total of 578 miles.

In 1920 the total working length of the Peruvian railways was 1,984 miles, 1,385 miles being State railways under the control of the Peruvian Corporation. These include (1) the Peruvian Central (Oroya) Railway, from Callao and Lima to Huancayo, 249 miles ; (2) the Southern Railway of Peru, from Mollendo to Puno, 326 miles ; from Juliaca, 30 miles from Puno, the Cuzco section strikes off northward for 210 miles ; (3) the Paita to Piura Railway, 60 miles ; (4) the Pacasmayo to Guadalupe Railway, 63 miles ; (5) the Pisco to Ica Railway, 46 miles. All the lines are standard gauge railways (4 ft. 8½ in.), with the exception of the Trujillo Railway (75 miles long) between Salaverry and Ascope, and the Chimbote Railway (36 miles) between Chimbote and Tablones, which are 3 ft. gauge, and the Guaqui to La Paz Railway, which is a metre gauge line. A small Government line connecting up Lima with the Port of Chilca, a short distance south of Callao, is being constructed.

By an agreement (March, 1921) between the Peruvian Government and the Marconi Company, the latter undertakes the administration of the posts, telegraphs, and wireless services for a period of 25 years from May 1, 1921. There were 326 telegraph offices in 1920. The length of State telegraph lines on December 31, 1920, was 8,817 miles. Number of telegrams (1919) 956,223 despatched and 1,061,326 received. Three submarine telegraph cables connect Peru and Chile, and one connects Peru and the Republics to the north. Wireless communication between Iquitos and Masisea, and between Iquitos and Puerto Bermudez was inaugurated July 8, 1908. In 1919 Peru had 19 wireless stations.

In 1920 there were 723 post offices ; letters and packets handled, 26,320,053 in the home service and 7,067,863 in the international service.

Money and Credit.

A decree was issued by the President of the Republic on January 10, 1898, to give effect to the law of December 29, 1897, establishing a gold currency. By Act of December 14, 1901, gold became the only standard. The national gold coin, the *libra*, is of the same standard and weight as the pound sterling, which is also legal tender ; 10 soles = 1*l.* sterling. Silver is legal tender up to 100 soles. Peru has no paper currency issued by the Government, but since the outbreak of the European War (1914) an issue in notes has been made by a number of banks with the sanction of Congress, the total on December 31, 1920, being 7,763,162*l.*, of which 5,936,389*l.* are in circulation.

These notes (10*s.*, 1*l.*, 5*l.* and 10*l.*) are guaranteed by the several banks with 20 per cent. bullion and 80 per cent. in approved bonds, shares and other securities deposited by them in their vaults and subject to Government supervision ; they are by law declared legal substitute for the gold *£*. The actual amount of gold coin held in deposit on December 31, 1920, was 4,282,894*l.*

The scarcity of silver coins made it necessary to issue paper notes of the value of 50 cents. These are being replaced by nickel, which issue amounted on December 31, 1920, to 221,242*l*. Notes of 50 cents remaining in circulation on the same date, 291,114*l*.

On December 31, 1920, the currency of the Republic was as follows: Gold on hand in the banks, 403,792 Peruvian pounds; silver on hand, 1,194,833 soles; gold certificates and banknotes, 7,541,920 pounds; and nickel, 2,212,427 soles.

On October 10, 1921, a Bill was introduced into the Senate for the establishment of a Government bank, to be known as the Banco de la Nacion Peruana. The Bill became law in January, 1922.

In Peru the commercial banks are: the Bank of Peru and London (capital, 500,000*l*.), the Italian Bank, the International Bank of Peru, the American Mercantile Bank (founded in 1916), and the Banco Popular, the Caja de Depositos y Consignaciones, the Banco Alemán Transatlántico, and the Caja de Ahorros de la Beneficencia de Lima, a savings bank with deposits amounting to over 200,000*l*. The Anglo-South American Bank and the National City Bank of New York opened branches in Peru in 1919. On June 30, 1921, the paid-up capital of all the banks amounted to 1,960,000*l*., the reserves to 756,429*l*., and the deposits to 13,914,226*l*.

Money, Weights, and Measures.

The gold coin is the *Libra*=the English sovereign. The coinage of gold 5-sol pieces (equivalent to half-sovereigns) has been authorised. Silver coins are the *Sol* (10 soles=1 libra), $\frac{1}{2}$ sol, $\frac{1}{4}$ sol, $\frac{1}{8}$ sol, $\frac{1}{16}$ sol. Bronze coins are 1 and 2 centavo pieces (100 centavos=1 sol). Nickel coins are also in circulation.

The Ounce	=	1·014 ounce avoirdupois.
„ <i>Libra</i>	=	1·014 lb. „
„ <i>Quintal</i>	=	101·44 lb. „
„ <i>Arroba</i>	{	of 25 pounds	.	.	=	25·36 „ „
		of wine or spirits	.	.	=	6·70 imperial gallons.
„ <i>Gallon</i>	=	0·74 „ gallon.
„ <i>Vara</i>	=	0·927 yard.
„ <i>Square Vara</i>	=	0·835 square yard.

The French metric system of weights and measures was established by law in 1869, and is coming into general use, except for the customs tariff. It came into force in Lima and Callao on September 1, 1916.

Diplomatic Representatives.

1. OF PERU IN GREAT BRITAIN.

Minister.—Dr. Agustin G. Ganoza. (Appointed March, 1922).

First Secretary.—Dr. Ricardo Rivera Schreiber.

Second Secretary.—Cesar Canevaro.

Attachés.—Cipriano Laos, Pablo E. Caballero, Juan Mendoza, J. F. Mareategui, and Miguel Lembecke.

Air Attaché.—Captain Juan Leguia y Swayne.

Consul-General (London).—Oscar Salomon.

There are Consular representatives at Belfast, Cardiff, Dublin, Dundee, Glasgow, Liverpool, Queenstown, Southampton, and other places.

2. OF GREAT BRITAIN IN PERU.

Envoy and Minister.—Arthur Grant Duff. (1920.)

Commercial Secretary.—F. W. Manners.

Consul at Callao.—H. A. Richards.

There is a Vice-Consul at Callao, a Consul at Iquitos; Vice-Consuls at Lima, Arequipa, Mollendo, Salaverry and Paita districts.

POLAND.

(RZECZPOSPOLITA POLSKA.)

POLAND was an independent State until the end of the eighteenth century. The Poles are Slavonic in race and Roman Catholic in religion.

During the seventeenth century the position of Poland rapidly declined, and eventually, by the three partitions of 1772, 1793, and 1795, the Polish Commonwealth, as it was then called, was divided between Prussia, Russia and Austria.

In 1807, Napoleon formed a part of the Old Commonwealth into a semi-independent State under the title of the Duchy of Warsaw and endowed it with a very liberal constitution, but in 1815, at the Congress of Vienna, this was undone, and Poland was re-partitioned between Prussia, Austria and Russia, except the small district of Cracow, which was constituted an independent republic and remained such until 1835, when it was annexed by Austria, despite a guarantee of neutrality by Prussia, Austria and Russia.

At the outbreak of the Great War in 1914, only one portion of Poland enjoyed autonomous government, viz., that annexed by Austria. Austrian-Poland was governed by the Galician Diet at Lwow (Lemberg), under the control of the Central Government in Vienna.

During the war Russian-Poland was invaded by the Germans and Austrians, and by the end of 1915 the whole country was occupied by the Austro-German forces.

On November 5, 1916, the German and Austrian Emperors, in a joint manifesto, proclaimed the independence of Poland, but neither the boundaries nor the constitution of the State were defined. Shortly afterwards a Provisional Council of State, consisting of 25 members, all Poles, was summoned in order to draft the constitution of the new State, but this body did not exist for long. In September, 1917, a new Supreme Authority, the Regency Council, consisting of three members, was appointed, and under their auspices a Ministry was formed and a new Council of State summoned. It was composed partly of elected and partly of appointed members, 110 in all. In October, 1918, this Council of State was dissolved by the Regency Council and the convocation proclaimed a Constituent Assembly to determine the constitution of the Polish State and take over the supreme authority.

On November 9, 1918, the Independence of Poland was solemnly proclaimed. On November 14, General Pilsudski, freed from the Magdeburg prison, returned to Poland, assumed Supreme Power and convoked the Constituent Assembly (*Sejm Ustawodawczy*), which confirmed him in his office. On June 28, 1919, the Treaty of Versailles recognised the Independence of Poland.

President.—Joseph *Pilsudski*, Marshal, Commander-in-Chief of the Polish army, born December 5, 1867, in Zulow, Wilna, assumed office, November 14, 1918, re-elected February 20, 1919.

Constitution and Government.

The Constitution of the Polish Republic adopted by the Sejm (Parliament) on March 17, 1921, contains the following fundamental principles: The franchise will be universal for both sexes, the voting age being 21. Soldiers and Government officials are excluded from voting. There are two chambers, a Diet and a Senate, both elected by general suffrage. The President (*Naczelnik Państwa*) convenes, opens, prorogues and closes the Sejm. It is the President's duty to convene the Sejm for an ordinary session each year before the month of November. The President is the Supreme Commander of the army, except in time of war. He is elected for a term of seven years by the Diet and Senate united in a National Assembly. He can make treaties with foreign Powers. In the case of the President's death, his duties are to be assumed by a council of three, composed of the Speaker of the House, the Prime Minister, and the President of the Supreme Court. Any Polish citizen of 41 years of age may be elected President. The President is not responsible either politically or personally. The Constitution also provides for a Senate. Freedom of conscience is granted to all citizens; and all citizens are equal before the law. Every citizen also has the right of preserving his nationality and developing his mother tongue.

The decree of November 28, 1918, divides Poland into 70 electoral districts, returning altogether 524 deputies. Of this number 241 are returned by Congress Poland, 171 by what was formerly Austrian Poland, and 112 by the former Prussian Provinces. In certain of the districts elections have not yet been held, and the Sejm is at present composed of 412 deputies, distributed as follows among the different parties:—Polish People's Party, 84; National Democratic Party, 79; Christian National Democratic Party, 22; National People's Union, 42; Polish Socialist Party, 33; National Christian Workmen's Party, 28; Polish People's Party 'Wyzwolenie,' 23; Constitutional Group, 16; National Workmen's Club, 25; Middle Class Union, 10; Polish People's Party (left), 12; Catholic People's Party, 7; Communists, 2; German People's Party, 8; Jewish Parties, 10; Independents, 7.

The Executive (appointed September 23, 1921, and reconstructed on March 11, 1922) called the Council of Ministers (*Rada Ministrów*) consists of the following departments:—

Prime Minister and Minister of Education.—Antoni *Penikowski*.

Minister for Foreign Affairs.—Konstanty *Skirmunt*.

Minister of Commerce and Industry.—Stefan *Ossowski*.

Minister of Finance.—Jerzy *Michalski*.

Minister of the Interior.—Antoni *Kamiński*.

Minister of Communications.—Zagorny *Marynowski*.

Minister of Posts and Telegraphs.—Wladyslaw *Steslowicz*.

Minister of Agriculture.—Jozef *Raczynski*.

Minister of Labour.—Ludwik *Barowski*.

Minister of Justice.—Bronislaw *Sobolewski*.

Minister of Public Works.—Gabriel *Narutowicz*.

Minister of War.—General *Sosnkowski*.

LOCAL GOVERNMENT.

Local government, municipal as rural, has not yet (March, 1922) been unified. In the transitional period preceding the unification of the administrative system of the three portions of Poland, the old Austrian and Prussian institutions are still in being. As regards Congress Poland, a provisional decree of local autonomy was issued on February 4, 1919, on democratic lines giving autonomy to the different districts.

Area and Population.

The area of the Polish State cannot be strictly defined until its boundaries are determined by the settlement of the dispute with Lithuania on the question of Vilna. The Peace Treaty with Russia, the Treaty of Riga, was signed on March 18, 1921, and ratifications were exchanged on May 2, 1921. The Treaty of Peace with Lithuania is being negotiated (March, 1922).

According to a recent estimate, Poland at present has an area of 149,042 square miles, and a population of (1920) 24,272,349. Of this Congress Poland (i.e., the Poland as delimited and handed over to Russia by the Congress of Vienna, 1815) had 12,789,226 inhabitants; Galicia, 8,257,505; and Former Prussian Poland, 3,225,618. The territories separated from Russia and ceded to Poland by the Treaty of Riga comprise an area of 43,908 square miles, with 3,683,568 inhabitants.

The territory of Poland is divided into 15 counties and 257 districts (*województwo*): Warsaw with 23 districts (*powiat*); Lodz, 13 districts; Kielce, 16 districts; Lublin, 19 districts; Białystok, 14 districts; Nowogródz, 11 districts; Polesie, 9 districts; Wołyń, 9 districts; Poznań, 36 districts; Pomorze, 18 districts; Kraków, 23 districts; Lwów, 27 districts; Stanisławów, 16 districts; Tarnopol, 17 districts; Silesia, 6 districts.

The first census was taken in independent Poland on September 30, 1921. The area of Upper Silesia allotted to Poland and the disputed districts of the county of Vilna were excluded from the census, which showed the following returns for the area of 149,042 square miles:—

County	Population in		County	Population in	
	1911	Census 1921		1911	Census 1921
Warsaw . . .	2,503,198	2,111,165	Kraków	2,057,757	1,986,055
Lodz	2,587,834	2,256,655	Lwów	2,866,321	2,724,327
Kielce	2,756,822	2,587,127	Stanisławów	1,613,390	1,334,630
Lublin	2,507,320	2,090,040	Tarnopol	1,613,087	1,419,355
Białystok	1,455,090	1,295,086	Silesia (incl. Teshen Silesia)	1,035,297	1,125,537 ¹
Nowogrodek	1,226,687	1,296,417	Military persons	—	500,000 ²
Wołyń	1,521,161	1,501,511			
Polesia	749,133	865,035			
Poznań	1,975,799	1,970,822	City of Warsaw	27,355,474	25,955,223
Pomorze	986,578	941,461		895,435	931,176
			Grand Total	29,240,909	26,886,399

¹ Figures for 1919.

² Approximate.

The area of Upper Silesia allotted to Poland is 1,225 square miles, and the population 891,669.

Population of principal towns (1921) :—

Warsaw	931,176	Czestochowa	81,823	Grodno	34,916
Lodz	451,813	Bialystok	76,971	Kalisz	44,753
Lemberg (1911)	206,113	Lublin	99,917	Dabrowa	39,840
Vilna (1911)	205,000	Radom	61,627	Kolomyja	39,527
Cracow	176,463	Kattowitz	45,422	Thorn	39,419
Posen	150,691	Bromberg	57,696	Kielce	41,857
Sosnowiec	86,452	Przemysl	54,078	Zawiercie	42,700

No recent statistics of births, deaths and marriages are available ; in 1912 (excluding the counties of Vilna, Nowogrodek, Wolyń and Silesia) there were : Marriages, 172,144 ; births (living), 898,819 ; deaths, 488,193 ; surplus of births over deaths, 410,626.

Before the war, emigration was chiefly to the United States. The Polish population in America is estimated to be over 4,000,000.

Religion.

The great majority of the population profess the Roman Catholic faith, but there is no established church in Poland and all denominations enjoy equal rights, though Article 117 of the Constitution declares Roman Catholicism to be the dominant religion. The figures relating to the proportion of people professing different religions are as follows :—

Territories.	Roman Catholics.	Greek Catholics.	Protestants.	Greek Orthodox.	Jews.	Others.
Former Russian Poland (1913)	9,842,428	—	698,804	484,249	1,954,644	75,088
Galicia (1910)	3,731,569	3,379,613	37,144	—	871,895	5,454
Duchy of Posen (1910)	1,422,238	—	646,580	—	26,512	4,501
West Prussia (1910)	882,695	—	789,081	—	13,954	17,744

The percentage of the different religions in the whole territory in the above table is as follows :—Roman Catholic, 62·2 per cent. ; Greek Catholic, 12·1 per cent. ; Greek Orthodox, 9·3 per cent. ; Jews, 11·0 per cent.

Poland is divided into the following Catholic Dioceses : the Metropolitan Archbishopric of Warsaw, the Archbishoprics of Lemberg and Posen, the Bishoprics of Cracow, Wloclawek, Plock, Lublin, Sandomir, Kielce, Sejny, Przemysl, Tarnów, Vilna. The Archbishops of Warsaw and Posen are Cardinals. There are 3,071 churches and 5,448 priests in the former Russian and Austrian Poland alone. The Greek Catholic Church has an Archbishopric in Lemberg and two Bishoprics, Przemysl and Stanislawów ; there are 2,443 churches and 3,318 priests. The province of Teschen Silesia is under the Bishopric of Breslau (Germany). Since 1922 there is an Exarchate of the Russian Orthodox Church in Warsaw.

Instruction.

The educational system of Poland has not yet been unified. Elementary education is free and compulsory. Of schools there were in former Russian Poland (figures for 1914) 6,867 elementary, with 461,474 pupils, and 289 secondary, with 67,400 pupils ; in Galicia (figures for 1912), 6,151 elementary, with 1,336,407 pupils, and 130 secondary, with 42,250 pupils ; in Posen (figures for 1911), 3,116 elementary, with 424,281 pupils, and 40 secondary,

with 13,500 pupils; in West Prussia (figures for 1911), 3,100 elementary, with 316,000 pupils, and 56 secondary, with 1,700 pupils. There were also 318 technical schools, with 24,807 pupils, and 11 high schools, with 5,657 pupils, in Russian Poland, (1913), 493 technical schools, with 45,259 pupils, in Galicia (1912), and 747 technical schools in Posen (1912).

There are 5 universities, viz., Cracow (founded 1384), Warsaw (1816), Lemberg (1661), Posen (1612 and 1919), Lublin (1919); 2 Polytechnics, at Warsaw and Lemberg, an Academy of Fine Arts at Cracow, 2 Veterinary Academies at Warsaw and Lemberg, 2 Academies of Agriculture at Dublany and Pulawy, Academy of Forestry at Lemberg, 2 Academies of Commerce at Cracow and Lemberg, an Academy of Mines at Cracow, and a purely scientific institution, the highest in Poland, the Academy of Science at Cracow.

Justice and Crime.

Each of the three component parts of Poland still has its separate judiciary organisations. The unification of the courts of justice will be worked out by the Codification Commission appointed in November, 1919.

In Galicia the old Austrian courts were taken over by the Polish Ministry of Justice on January 1, 1919. In Posen the courts have the old German organisation, which is being taken over by the Special Department of Justice in the Ministry of Prussian Poland. The highest court in Poland with 3 judges sitting, is the Supreme Court in Warsaw, divided into 5 chambers: 1. Civil; 2. Criminal, both for Congress Poland. 3. Civil and Criminal for Galicia. 4. Administrative which took over the functions of the Supreme Administrative Tribunal in Vienna), and 5. Civil and Criminal for Posen.

The lowest courts in Poland are County Courts (*Sady okregowe*) and Courts of Peace (*Sady pokôju*). There are 19 County Courts and 1,518 (297 urban, 1,221 rural) Courts of Peace in Congress Kingdom.

In Galicia there are 17 County Courts (*Sady okregowe*) and 170 District Courts (*Sady powiatowe*).

From these courts an appeal lies to the superior Appellation Courts (in Warsaw, Lublin, Cracow, Lemberg, Posen, and Thorn) in which there are sitting 3 judges for civil affairs and 2 judges with 3 puisne judges for criminal affairs.

Pauperism and Old Age Pensions.

In the respective provinces of the Polish Republic there are still the same regulations and the same institutions as before the war in Russia, Prussia and Austria.

There are numerous private charitable institutions, such as asylums for aged and infirm, crèches for children, workhouses, eating houses for poor, etc., all over the country. In the Grand Duchy of Posen, West Prussia, East Prussia and Upper Silesia every inhabitant in distress must be relieved by the commune in which he becomes destitute; the costs are defrayed from the funds of the commune to which he belongs. In Galicia the funds for the support of the poor are derived from endowments, voluntary contributions, etc.; if these funds are insufficient the commune to which the destitute belongs must make provision. In the Kingdom of Poland the care for the poor is left entirely to private charity; in cases of hospital treatment the commune to which the patient belonged was obliged to refund the costs.

Insurance in case of illness has been widened and unified by the law of January 11, 1919. It extends the obligation of insurance to all persons

belonging to the wage-earning classes and establishes a uniform organisation of Illness-insurance Officers in every district.

Finance.

The Budget for the calendar year 1921 showed a revenue of 135,166,702,000 Polish marks (99,758,142,000 marks ordinary and 35,408,560,000 marks extraordinary), and an expenditure of 208,961,184,000 Polish marks (111,042,685,000 marks ordinary and 97,918,499,000 marks extraordinary).

Principal items in the Budget for 1921 were as follows:—

Revenue	1,000 Polish Marks	Expenditure	1,000 Polish Marks
Ministry of Finance . .	61,453,626	Ministry of War . .	61,033,295
„ „ Railways . .	26,142,589	„ „ Railways . .	42,095,581
Province of Posen . .	18,980,491	„ „ Public Works . .	10,842,502
		„ „ Commerce . .	7,374,410
		„ „ Interior . .	7,203,182
		„ „ Finance . .	12,150,518

The total internal indebtedness amounted, at the end of 1921 to some 300,000,000,000 Polish marks. The foreign indebtedness of Poland on that date consisted of loans (mostly in kind) from the following countries:—United States, 143,143,167 dollars; France, 460,563,669 francs; Great Britain, 3,715,478*l.*; Switzerland, 33,578,062 francs; Holland, 17,800,000 florins; Norway, 16,575,836 crowns; Italy, 7,134,335 liras; Sweden, 128,507 crowns; Austria, 111,070,000 crowns. Computed into *gold* francs the total foreign debt amounted (January 1922) to 1,750,000,000 gold francs or 45 gold francs per head of population.

The amount of notes in circulation (January 20, 1922) was 233,301,339,000 Polish marks.

Defence.

The Polish army is at present on war-footing, although demobilisation is in progress (March, 1922). Every able-bodied Polish subject is liable to serve in the army. The organisation of the army will be based on conscription and universal service, and its size will be dependent on the future frontiers of Poland. The Polish army has at present French, German, Austrian and Italian arms. Actually there are about 5,000 officers and 250,000 men of all arms serving with the colours.

The country is divided into 9 General Military Districts: Warsaw, Lublin, Kielce, Lodz, Cracow, Lemberg, Posen, Grodno, Pomorze.

There are the following fortresses in Poland: in the west, Thorn and Posen; in the south, Cracow and Przemyśl and armed camps; in the east, Brest Litowsk, Grodno, Osowiec; in the interior, Warsaw, Modlin, Deblin.

It is proposed that Poland shall have six small cruisers and gunboats on the Vistula and some torpedo-boats. One gunboat has been built, another is under construction, and three torpedo-boats have been bought in England.

Production and Industry.

Agriculture.—Poland is essentially an agricultural country. The

division of the territory of Poland, according to the principal forms of cultivation, was as follows:—

District	Total Area in Hectares	Percentage of the Total Area of the Country				
		Arable Land	Meadows and Pastures	Forests	Gardens, Parks, etc.	Unculti- vated or not de- scribed
Kingdom of Poland (1900)	12,284,786	56·3	14·6	18·0	3·9	7·0
Galicia (1912)	7,849,252	48·5	20·9	25·7	1·4	3·5
Posen (1913)	2,889,300	63·7	10·4	19·9	7·0	—
West Prussia (1913)	2,555,800	56·1	11·6	22·9	9·4	—
Regency of Olsztyn (1913)	1,203,000	50·5	15·6	21·6	12·3	—
Duchy of Teschen (1897)	228,000	47·4	16·2	13·1	2·2	3·1

About 85 per cent. of the total area of Poland is productive. Of the productive area, about 25 per cent. is forest, and of the remainder, less than one half is arable and the rest pasture and meadows. By a law of July, 1919, all the forests became the property of the State.

The following table shows for the districts named the area and crop of the principal agricultural products in 1921 and 1920:—

Districts & Years	Wheat		Rye		Barley		Oats		Potatoes	
	Area	Crop	Area	Crop	Area	Crop	Area	Crop	Area	Crop
	1,000 Hec- tares	1,000 Metric tons	1,000 Hec- tares	1,000 Metric tons	1,000 Hec- tares	1,000 Metric tons	1,000 Hec- tares	1,000 Metric tons	1,000 Hec- tares	1,000 Metric tons
Congress Poland.

1920	74	95	915	723	188	256	224	325	378	4,546
Grand Total:										
1921	790 ^o	872	3,079	3,564	908	1069	1,775	2,032	—	—
1920	827	697	3,303	2,085	841	878	1,645	1,870	1,671	19,138

Other important crops are sugar (168,000 tons in 1920-21) beet, hemp, hops, tobacco and chicory.

On July 16, 1920, a law was passed by the Sejm by which it was decided to limit the size of the larger estates, and to diminish the size of holdings situated in the neighbourhood of large towns. The first measures for putting this law into practice are now being taken. The maximum has been fixed at 60 hectares for estates situated in industrial districts, at 400 hectares for Posen, Podolia, Volhynia, &c., and at 180 hectares for the other parts of the Polish Republic.

In 1912 Poland possessed 2,847,000 horses, 6,918,000 cattle, 2,389,000 sheep, and 5,185,000 pigs.

Industry.—There are five industrial centres in Poland, viz., Warsaw, Lodz, Kraków, Dabrowa, and Czestochowa.

The total output of coal in Poland in 1920 was 6,408,664 tons; of brown coal 251,822 tons. The output of ore in 1919 was 830,640 tons, as compared with 107,000 in 1913. The output of iron and steel in 1919 was 16,180 tons. In March, 1920, there were 8 furnaces, with a monthly output of 9,700 tons, compared with 43 furnaces and a monthly output of 87,000 tons in 1913; rolling mills in March, 1920: 4 rolling mills, with monthly output of 2,400 tons, as compared with 9 in 1913, and output of 39,000 tons. The production of mineral salt in 1920 was 282,673 tons; the supply is said to be nearly inexhaustible; the production of rock oil in Galicia in 1910 was 1,766,000 tons; of potassium salts in Galicia in 1911, 37,000 tons. The output of petroleum in Galicia in 1919, was 831,703 tons; in 1920, 764,818 tons. In the textile industry in 1920 there were 485 works, with 750,580 spindles and 12,922 looms, employing 46,800 workmen. Other important industries are paper manufactures of various kinds, and the chief that of paper-bag products, which are gradually recovering from the effects of the war. In 1920 only 34 per cent. of the workmen employed before the war were at work.

Commerce.

Import and export statistics as published by the Polish Government are admittedly incomplete. Two sets of statistics were issued for the year 1920, one covering only private trade (though not the whole of that), being based on permits granted for importation and exportation; and the other attempting to cover the whole trade of the country. As it is, only the volume of trade is dealt with, no values being furnished.

Official figures for the trade of Poland for the year 1920 were as follows:—

1920	Private Trade	Estimated Total
	Tons	Tons
Imports . . .	95,971	3,529,810
Exports . . .	255,860	611,315

The estimated total was distributed by principal countries, as follows:—

Principal countries	Total Imports	Total Exports	Imports excluding Upper Silesian Coal	* Excluding Food-stuffs and Upper Silesian Coal	
				Imports	Exports
1920	Metric tons	Metric tons	Metric tons	Metric tons	Metric tons
Germany	2,834,165	232,731	224,555	192,291	125,665
United States	152,560	211	152,560	36,819	196
Czechoslovakia	149,067	74,404	149,067	136,389	74,220
Austria	76,327	190,793	76,327	60,466	189,651
Rumania	45,622	3,179	45,622	862	2,965
England	37,449	14,018	37,449	23,596	12,315
France	14,520	2,253	14,520	13,251	2,250
Other countries	220,111	93,729	220,111	50,791	60,906
Total	3,529,810	611,315	920,201	514,465	468,168

Total trade between Poland and the United Kingdom (according to Board of Trade Returns) were:—

	1921
	£
Imports from Poland into the United Kingdom .	1,842,963
Imports to Poland from the United Kingdom .	3,024,027

Internal Communications.

On January, 1 1920, Poland proper had 30,070 miles of road. In June 1921 there were 7,295 miles of railways open for traffic in the Republic. All are property of the State.

At the end of 1919 there were in Poland (excluding Prussian Poland) 1,005 Post and Telegraph offices, 1,537 Post Offices, 545 Telephone Exchanges with 29,423 apparatus, while the railway telegraphs had 618 offices. The length of telegraph lines was 51,645 miles, of telephone lines 7,674 miles, of telephone and telegraph lines, 4,347 miles. Of navigable waterways Poland has 1,875 miles, of which 298 miles are accessible for vessels of over 400 tons.

Shipping and Navigation.

Poland is engaged (April, 1921) in realising the programme of her commercial fleet as approved by Parliament, which provides for 220,000 gross tons, including 20 vessels of 8,000 tons each and 10 vessels of 3,000 tons each, besides other smaller vessels for coast traffic.

Money and Credit.

Poland has no national currency. The temporary monetary unit is the 'Marka Polska,' or nominally about 15,000 Polish marks to the £. On January 20, 1922, there were notes to the value of 233,301,339,000 Polish marks in circulation.

The Bank of Poland, created by Act of Parliament, has not yet (March 1922) commenced its functions, which are being performed by the Polish State Loan Bank in Warsaw. The position of this Bank, on January 20, 1922, showed that its assets and liabilities balanced at 302,147,038,000 Polish marks.

An arrangement is being made by the Polish Government to take over and transport to Warsaw the County Bank at Lemberg. It will take the name of 'State Bank,' as its activities will extend throughout the whole country. It will acquire the right to issue banknotes, which so far has been the privilege of the Polish Loan Bank. The capital will be raised to 100 million marks. The Polish State will in future be responsible for every guarantee formerly given by the late Galician Diet. The Polish State Loan Bank is holding on behalf of the future Bank of Poland a reserve of silver, gold, and foreign currencies, which on January 20, 1922, amounted to: Gold, 26,036,000 marks; silver, 42,738,000 marks; foreign bullion, 1,271,000 marks and foreign currencies 177,284,000 gold marks.

The weights and measures are those of the metric system.

Diplomatic and Consular Representatives.

1. OF POLAND IN GREAT BRITAIN.

Envoy and Minister.—Dr. Ladislas Wroblewski. (Appointed April 13, 1921.)

Councillor.—Jan de Ciechanowski.

First Secretary.—Dr. George Adamkiewicz.

Second Secretary.—Count Joseph Potocki.

Military Attaché.—Major J. Bardzinski.

Financial Counsellor.—Mieczyslas Rutkowski, K.C.M.G.

Commercial Counsellor.—Alphonse Poklewski-Koziel.

Consul-General.—Kazimierz Komierowski.

2. OF GREAT BRITAIN IN POLAND.

Envoy and Minister.—William Grenfell Max Müller, C.B., M.V.O. (January 3, 1921).

First Secretary.—R. H. Hoare.

Third Secretary.—P. S. Scrivener.

Commercial Secretary.—Richard Kimens.

Consul at Warsaw.—F. Savery.

There are consular representatives at Lemberg and Borislav.

PORTUGAL.

(REPUBLICA PORTUGUESA.)

PORTUGAL has been an independent State since the twelfth century; until 1910 it was a monarchy. The last King was Manoel II. of the house of Braganza-Coburg, born November 15, 1889, younger son of King Carlos I. and Queen Mary Amélie, daughter of Philippe Duc d'Orléans. Manoel II. succeeded to the throne on the assassination of his father and elder brother, Prince Luiz Philip, February 1, 1908. On October 5, 1910, the republic was proclaimed, after a short revolution, and a provisional government established with Dr. Theophilo Braga as the Provisional President (October 5, 1910, to August 24, 1911). The first President of the Republic was Dr. Manoel de Arriaga (August 24, 1911, to May 27, 1915).

On August 20th, 1911, a new constitution was adopted. This provides that there shall be two Chambers. In the first, which is called the National Council, the members (164) shall be elected by direct suffrage for three years. The Second or Upper Chamber (71 members) shall be elected by all the Municipal Councils, and shall be renewable half at a time every three years. The President of the Republic is elected by both Chambers with a mandate for four years, but he cannot be re-elected. The President must be at least 35 years of age. He appoints Ministers, but these are responsible to Parliament. The President may not be present in the Chambers at debates. He is to receive a yearly salary of 2,600*l.*, with 1,300*l.* for allowances, or a total of 3,900*l.* yearly. The Constitution may be revised every ten years.

The Powers formally recognised the Republic on September 11, 1911.

President of the Republic.—Dr. Antonio José de Almeida. (Born 1866. Elected August 6, 1919.)

Senators (January, 1922).—33 Democrats, 9 Liberals, 15 other parties.

Deputies (January, 1922).—73 Democrats, 30 Liberals, 46 other parties.

The Cabinet, which was formed on February 9, 1922, is as follows:—

Premier and Minister of the Interior.—Senhor Antonio Maria Silva.

Minister of Foreign Affairs.—Senhor Barbosa Magalhaes.

Minister of Finance.—Senhor Puro.

Minister of War.—Senhor Correia Barreto.

Minister of Marine.—Senhor d'Azevedo Concintho.

Minister for the Colonies.—Senhor Rodrigues Caspar.

Minister of Education.—Senhor Vasco Borges.

Area and Population.

Area and population at the Census of 1900 and December 1, 1911. The Azores (3 districts) and Madeira (1 district), are regarded as an integral part of the Republic.

Provinces and Districts	Area in sq. miles	Population		Per sq. mile 1911
		1900	1911	
Entre Minho-e-Douro:—				
Vianna do Castello	857	215,267	227,420	251.2

Estremadura:—				
Leiria	1,317	238,755	262,558	181.3
Santarem	2,555	283,154	322,753	110.8
Lisbon	3,065	709,509	853,415	231.5
	6,937	1,231,418	1,438,726	177.5
Alentejo:—				
Portalegre	2,405	124,431	141,778	51.7
Evora	2,856	128,062	144,307	44.8
Beja	3,958	163,612	192,499	41.3
	9,219	416,105	478,584	45.1
Algarve (Faro)	1,937	255,191	274,122	131.7
Total Continent	34,254	5,016,267	5,545,595	146.4
Islands:—				
Azores	922	256,291	242,613	277.9
Madeira (Funchal)	314	150,574	169,777	479.5
Total Islands	1,236	406,865	412,390	329.2
Grand total	35,490	5,423,132	5,957,985	152.8

In 1911 the population consisted of 2,828,691 males and 3,131,365 females, or 110 females to every hundred males. In 1900 the continental urban population was 1,627,476 or 32·4 per cent., and the rural 3,388,791 or 67·6 per cent.

The chief towns with their population in 1911 were: Lisbon (1920), 489,667; Oporto (1920), 203,981; Setubal, 30,346; Funchal (Madeira), 24,687; Braga, 24,647; Coimbra, 20,581; Evora, 17,901; Ponta Delgada (Azores), 16,179; Covilhã, 15,745; Faro, 12,680; Tavira, 11,665; Portalegre, 11,603; Aveiro, 11,523; Elvas, 10,645; Castello, 10,486; Beja, 10,113; Angra, do Heroismo (Azores), 10,057.

MOVEMENT OF THE POPULATION.

Births, deaths, and marriages (including the Azores and Madeira) for 3 years:—

Years	Births	Deaths	Marriages	Emigrants
1917	190,485	134,691	34,210	15,825
1918	181,408	253,227	31,325	11,672
1919	167,704	153,697	48,804	37,138

In 1919 the stillborn numbered 7164, the illegitimate 21,608, and the legitimate 146,096.

Portuguese emigration is chiefly to Brazil (1919, 21,228), and the United States (1919, 5,246).

Religion.

There is freedom of worship in Portugal; the predominant faith is the Roman Catholic. Portugal, including the Azores and Madeira, is divided into three ecclesiastical provinces, with their sees severally at Lisbon, Braga and Evora. The Archbishop of Lisbon (Patriarch since 1716) has seven suffragans, of whom only two are on the European mainland; while the Archbishop of Braga (the oldest see in Portugal) has five, and the Archbishop of Evora two. The Azores, Madeira, and the Portuguese colonial possessions of West Africa, continental and insular, with five episcopal sees, constitute part of the ecclesiastical province of Lisbon. In East Africa there is also the province of Mozambique. In Asia there is a province of Goa with four suffragan sees (Macao included).

The total income of the upper hierarchy of the Church is calculated to amount to 300,000 milreis. In 1900 the number of Protestants in Portugal was 4,491, and that of Jews 481. The Republican government has separated the Church from the State, and State payments for the maintenance and expenses of worship have now ceased. The conventual establishments of Portugal were suppressed by decree of May 28, 1834, and their property confiscated for the benefit of the State. Notwithstanding, several establishments of this nature were formed in later years; they were suppressed by the provisional government, which enforced the law of 1834.

Instruction.

Education in Portugal is of three kinds—primary, secondary, higher and special. Primary education is compulsory, and is rigorously enforced by a

decree of the Provisional Government of March 29, 1911. In 1918-19 there were 7,007 public elementary schools with 170,415 pupils. In 1919 there were 32 secondary schools (with 11,791 pupils in 1917). For higher education there are 3 Universities: at Lisbon (founded in 1858), Coimbra (founded 1290), and Oporto. The Technical School at Lisbon provides instruction in engineering, chemistry, etc. There are also special colleges for music, art (Lisbon and Oporto), commercial schools, a military academy at Lisbon, and a naval school.

Justice and Crime.

The Republic is divided for judicial purposes into 193 comarcas; in every comarca there is a court of first instance. There are two courts of appeal (Tribunaes de Relação) at Lisbon and Oporto, and a Supreme Court in Lisbon.

Finance.

The revenue and expenditure for six years were in pounds sterling:—

Years	Revenue	Expenditure	Years	Revenue	Expenditure
	£	£		£	£
1915-16	14,750,297	25,011,685	1918-19	10,247,441	14,235,099
1916-17	14,315,966	21,887,988	1919-20	29,443,625	52,921,863
1917-18	11,186,527	22,671,385	1920-21	26,913,445	52,802,831

The latest available budget figures are for the year 1919-20 (see STATESMAN'S YEAR BOOK for 1921, p. 1197).

On June 30, 1921, the external debt of Portugal was as follows:—New external 3 per cent. converted debt of 1902, 33,085,707*l.*; 4½ per cent. tobacco loan, 1891 and 1896, 2,745,600*l.*; total 35,831,307*l.*

The internal debt on June 30, 1920, amounted to 1,862,815,897 escudos.

Defence.

The Army of Portugal is a militia raised by conscription. It is in three categories, the active army, the reserve and the territorial army. All adult males are liable to be called out from the age of 17 to 45, but, practically, service only begins at the age of 20. 10 years are passed in the active army, 10 in the reserve, and 8 in the territorial army, which latter also includes surplus men from other categories. In the active army, recruits undergo from 15 to 30 weeks' preliminary training, according to the arm of the service; afterwards there is a fortnight's training during the annual mobilisation. The country is divided into 8 territorial districts, each supposed to produce a division. The active army consists of 35 regiments of 3 battalions, 11 cavalry regiments of 4 squadrons, 8 field artillery regiments, comprising 63 batteries, 2 horse batteries, 9 mountain batteries, 20 garrison batteries, and engineer units. Batteries have 4 guns.

The peace establishment of the active army in 1921 was 35,000 men. There are about 2,800 officers, all told.

The reserve army was to consist of 35 regiments of infantry, 8 squadrons of cavalry, and 24 field batteries, with other units.

The territorial army has no cadres.

The Republican Guard, and the Fiscal Guard, are civil corps recruited from the army, the men of which can be employed in the field in war time. The Republican Guard is a military police, numbering about 5,000 men,

of whom about 800 are mounted. The Fiscal Guard is a preventive service about 5,200 strong.

The arm of the Portuguese infantry is the Mauser-Vergueiro, a magazine weapon, calibre 6·5 mm. The field artillery is armed with 7·5 cm. Schneider Canet guns.

With regard to over-sea garrisons, 2 line regiments of infantry (of 2 battalions) are normally stationed in the Azores, and 1 at Madeira. The latter has also a battalion of garrison artillery, and there are 2 in the Azores. Besides these troops, the Portuguese have a separate Colonial Army, partly European and partly Native, which garrisons their possessions on the West Coast of Africa, in Mozambique, India, &c. The force consists of about 700 officers, about 3,000 European non-commissioned officers and men, and 9,000 natives, the Europeans being enlisted voluntarily, the natives compulsorily.

The navy of Portugal comprises:—3 protected cruisers, *Almirante Reis* (4,253 tons), *Adamastor* (1,757 tons); *São Gabriel* (1,772 tons); four gunboats for Mozambique, a variety of old gunboats, a mine-layer, 4 transports, 2 training ships, the former royal yacht, 5 *de Outubro* (1,365 tons), 6 sloops, bought from the British Navy in 1920, 5 destroyers, 7 torpedo boats, 4 submarines, 1 steamer for torpedo and mine service; also 6 ex-Austrian torpedo boats for police duties.

The naval personnel is about 6,000.

Production and Industry.

Of the whole area of continental Portugal 26·2 per cent. is annually cultivated under cereals, pulse, pasture, etc.; 3·5 per cent. is under vineyards; 3·9 per cent. under fruit trees; 17·3 per cent. under forest; 43·1 per cent. is waste. In Alemtejo and Estremadura and the mountainous districts of other provinces are wide tracts of waste lands, and it is asserted that many hectares, now uncultivated, are susceptible of cultivation.

The chief cereal and animal produce of the country are:—In the north, maize and oxen; in the mountainous region, rye and sheep and goats; in the central region, wheat and maize; and in the south, wheat and swine, which fatten in the vast acorn woods. The production of wheat in 1919 was 4,767,665 bushels; of rye, 1,785,838 bushels; of oats, 3,037,831 bushels; of barley, 1,009,780 bushels. Throughout Portugal wine is produced in large quantities. The area of vineyards in 1917 was 781,000 acres (720 acres in 1916), and the vintage for 1919 amounted to 96,641,160 gallons. Olive oil (area covered by olive trees about 825,000 acres; annual production about 12,760,000 gallons of oil); figs; tomatoes are largely produced, as are oranges, onions, and potatoes. The production of wool in 1918-19 amounted to 6,244,684 pounds.

The forests cover 19 per cent. of the total area of the country; pines extending to 1,909,663 acres; oaks, 898,833 acres; corks, 817,081 acres; chestnut, 210,345 acres; Pyrenean oak, 169,150 acres: total, 4,005,072 acres. Cork is one of the principal sources of wealth; the annual production is estimated at 176,368,000 pounds.

Portugal possesses considerable mineral wealth, but coal is scarce, and, for want of fuel and cheap transport, valuable mines remain unworked. The most important mineral is wolfram; others are iron, copper, manganese, antimony, lead, tin, and gold.

Portugal had in 1918, 36,673 persons and 11,922 vessels of 37,609 tons engaged in fishing. The exports of sardines and tunny fish are considerable.

The centre of the sardine industry is at Setubal, about 10 miles south of Lisbon. The value of the fisheries in 1918 was 20,205,996 escudos, including sardines, 13,018,082 escudos.

A characteristic industry of Portugal is the manufacture of *azulejos* or porcelain tiles. This was inherited from the Moors, and tiles are used extensively for interior and exterior decoration of public and private buildings. At Sacavem, near Lisbon, a large factory makes tiles and chinaware. In Peniche, an old fishing village on the coast north of Lisbon, there is a local pillow lace industry, and at Guimaraes famous embroidery is made.

Commerce.

Imports* for consumption and exports (exclusive of coin and bullion) for six years:—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1913	17,986,222	8,152,222	1916	28,839,766	12,548,000

¹ Tons.

² Litres.

Wine is the staple article of import from Portugal into the United Kingdom, the quantity amounting in 1920 to 5,739,672 gallons, valued at 4,141,155*l*.

Total trade between Portugal and the United Kingdom in thousands of pounds for five years (Board of Trade Returns):—

	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Portugal into U. Kingdom	3,856	9,747	10,797	6,899	4,194
Exports to Portugal from U. Kingdom	3,132	3,744	6,434	10,555	3,396

Shipping, Navigation, and Internal Communications.

The commercial navy of Portugal on January 1, 1911, contained 66 steamers of 70,193 tons in the aggregate, and 259 sailing vessels of 43,844 tons.

In 1916, 7,284 vessels of 9,778,211 tons entered the ports of Portugal.

Portugal has two State-owned railways, 733 miles in length, and five privately owned lines, 1,314 miles in length; total railway mileage on December 31, 1918, 2,047; and on December 31, 1920, 2,128 miles. The railways have a gauge of 5ft. 5½in., except two lines, one of which has a 3ft. 3¼in. gauge, and the other a 2ft. 11¼in. gauge.

The number of post-offices at the end of 1913 was 4,266; the number of letters, newspapers, &c., carried in the same year was: letters, 54,623,000; post-cards, 23,667,000; printed matter, circulars, &c., 47,549,000. The number of telegraph offices at the end of 1915 was 628. There were at the same date 5,945 miles of line and 13,415 miles of wire. The number of telegrams in 1915 was: internal, 1,412,040; international, 706,569; transit, 2,146,629; service, 184,731; total, 4,449,969.

Money, Weights, and Measures.

The Government financial institution is the Bank of Portugal. The cash on hand of the bank on January 18, 1922, was: Gold, 8,577,180 escudos. The notes in circulation amounted on January 18, 1922, to 734,388,164 escudos.

There are 18 other banks registered in the Republic with a nominal capital of 47,000,000 escudos, and total deposits on December 31, 1919, of 331,465,000 escudos.

The gold coinage of Portugal issued since 1854 amounts to the nominal value of 7,967,002, and the silver coinage to 37,934,523 escudos.

The Decree of the Provisional Government of May 22, 1911, established a new monetary system. The unit is the gold *escudo*, of 100 *centavos*, which is equivalent to the 1-milreis gold piece, and is worth normally about 4s. 5½d. (but the rate varies; average for 1918, 2s. 7d.); 1,000 escudos are called a *conto*. Gold coins are 2, 5, and 10-escudo pieces; silver coins are 1-escudo (0.835 fine) and 50, 20, and 10-centavos pieces; there are bronze and nickel coins of 4, 2, 1, and ½-centavo. The gold coins and the silver escudos are .900 fine; the other silver coins are .835 fine. The English sovereign and half-sovereign are legal tender for 4½ and 2¼ escudos respectively.

Owing to the disappearance of practically all gold and silver in Portugal, the country is on a paper basis. New notes of 5, 10, and 50 centavos have been issued by the Bank of Portugal. Small coins of 1 and 4 centavos have been placed in circulation to relieve the scarcity of small change.

On January 1st, 1912, the legal time for Portugal was placed in accordance with the Greenwich meridian.

The metric system of weights and measures is the legal standard. The chief old measures still in use are:—

The <i>Libra</i>	.	.	.	=	1.012	lb.	avoirdupois.
„ <i>Almude</i>	{	of Lisbon	=	3.7	imperial	gallons.	
	{	„ Oporto	=	5.6	„	„	
„ <i>Alqueire</i>	.	.	.	=	0.36	„	bushel.
„ <i>Moio</i>	.	.	.	=	2.78	„	quarters.

Diplomatic Representatives.

1. OF PORTUGAL IN GREAT BRITAIN.

Ambassador.—Senhor Manuel Teixeira Games, G.B.E. (appointed 1920).

Counsellor.—Joao A. de Bianchi, O.B.E.

Second Secretaries.—José de Lima Santos and Gabriel da Silva.

Consul-General in London.—Oscar George Potier.

There are Consular representatives at Cardiff, Newcastle, Liverpool, and Consular agents at Cork, Dublin, Dundee, Leith, Glasgow, Hull, Southampton.

2. OF GREAT BRITAIN IN PORTUGAL.

Ambassador.—Hon. Sir Lancelot D. Carnegie, G.C.V.O., K.C.M.G., appointed September 30, 1913.

Secretary.—H. A. Grant-Watson.

Military Attaché.—Major-General the Hon. Sir C. Sackville-West, K.B.E., C.M.G.

Commercial Secretary.—Geoffrey Salis.

Consul-General at Lisbon.—G. B. Beak.

There are Consular representatives at Lisbon (C.G.), Belem, Faro, Setubal, Figueira, Leixões, Oporto, &c.; Funchal (Madeira), St. Michael's (Azores), St. Vincent (Cape Verde).

Consul-General at Lourenço Marques.—H. Hall-Hall (Acting).

There are Consuls or Vice-Consuls at Bissau (Guinea), Chinde, Inhambane, Mozambique, Tete, Quilimane, Lobito, and São Thomé, Consul at Marmagao (Gôa).

Dependencies.

The colonial possessions of Portugal, situated in Africa and Asia, are as follows:—

Colonial Possessions	Area : English sq. miles	Popula- tion	Colonial Possessions	Area : English sq. miles	Popula- tion
Possessions in Africa:			Possessions in Asia :		
Cape Verde Islands			In India—Goa (1910)	1,469	515,772

Total Africa .	927,292	7,734,701	Total, Colonies .	936,264	8,735,854

On August 15, 1914, partial autonomy was granted by the Home Government to all Portuguese colonies, giving each the right to establish its own code of laws for civil and financial Government.

Portuguese India consists of Gôa, containing the capital, Panjin, or Nova-Gôa, on the Malabar coast; Damão, on the coast about 100 miles north of Bombay; and Diu, a small island about 140 miles west of Damão. In 1915 there were 142 schools with 9,546 pupils (6,066 boys and 3,480 girls). In Gôa

there are 501 salt works employing 1,968 men, the annual production amounting to about 12,200 tons. In Damão there are 11 salt works, and in Diu 5. In 1906 deposits of manganese were discovered near Mormugão and about 6 concerns with about 20 mines are at work. The military force consists of not less than 1,082 men (786 natives). The Mormugão railway (51 miles) connects this port with the lines of British India. The estimated revenue of Gôa, &c., in 1920-21 was 1,651,140 escudos; expenditure, 2,086,697 escudos. The trade is largely transit. In 1920 the imports by sea and land amounted to 4,751,746 escudos, the exports to 1,401,833 escudos. Chief exports are: coco-nuts, fish (fresh and salted), spices, caju-nuts, salt, and copra. There are in Portuguese India 18 telegraph offices and 167 miles of telegraph line.

Macao, in China, situated on an island of the same name at the mouth of the Canton River, forms with the two small adjacent islands of Taipa and Colôane, a province, the city being divided into two wards, one inhabited by Chinese and the other by non-Chinese, each having its own administrator. The population, according to the census of December 31, 1910, is 74,866 (42,263 males and 32,603 females). There are 2,171 Portuguese, 71,021 Chinese and 244 of various nationalities. Estimated revenue in 1921-22, 2,665,476 escudos and expenditure 2,519,973 escudos. The military force contains at least 488 men (164 natives). The trade, mostly transit, is in the hands of Chinese. Imports in 1920, 9,519,068 escudos; exports, 7,016,973 escudos.

Portuguese **Timor** consists of the eastern portion of the island of that name in the Malay Archipelago, with the territory of Ambeno and the neighbouring isle of Pulo Cambing. By treaty of 1859 the island was divided between Portugal and Holland; by convention of October 1, 1904, ratified in 1908, a boundary arrangement was made between the two Governments, certain *enclaves* being exchanged and the possession of other territories settled. This possession, formerly administratively joined to Macao, was in 1896 made an independent province. Population in 1915, 377,815 (201,121 males and 176,694 females). Estimated public revenue and expenditure for 1921-22, 378,125 escudos. Military force not less than 323 men (212 natives). Imports (1920), 814,612 escudos; exports, 365,595 escudos. Chief exports are: coffee, sandal-wood, sandal-root, copra, and wax. The port is Dilly.

The **Cape Verde Islands**, fourteen in number, are administered by a Governor, whose seat is at Praia, the capital. The population according to the census of December 31, 1912, is 149,793 (69,001 males and 80,792 females) including 295 foreigners, and its distribution is as follows: whites, 4,799; coloured, 87,621; negroes, 51,509. Military force not less than 264 men (168 natives). The chief products are coffee, medicinal produce, hides, and millet. The estimated public revenues and expenditures in 1921-22, 2,783,196 escudos; imports in 1919, 8,493,802 escudos; exports, 749,709 escudos.

Portuguese **Guinea**, on the coast of Senegambia, is bounded by the limits fixed by the convention of May 12, 1886, with France, and is entirely enclosed on the land side by French possessions. It includes the adjacent

archipelago of Bijagoz, with the island of Bolama, in which the capital of the same name is situated. Estimated population, 289,000. The chief commercial products are rubber, wax, oil seeds, ivory, hides. Estimated public revenue for 1919-20, 1,045,474 escudos, and expenditures, 1,045,474 escudos. Military force not less than 247 (143 natives). Imports in 1920, 15,659,751 escudos; exports, 9,540,517 escudos. The chief port is Bissau. There are 100 miles of telegraph lines.

The islands of **S. Thomé** and **Príncipe**, which are about 125 miles off the coast of Africa, in the Gulf of Guinea, were discovered in 1471, and now constitute a province under a Governor. In 1914 the population of the two islands was 58,907 in S. Thomé and 4,938 in Príncipe, and its distribution was as follows: whites, 1,570; natives, 57,337. The islands are hilly, the soil volcanic, and the vegetation rich and various. The chief commercial products are cacao, coffee, rubber and cinchona. Area of cacao plantations, 125,000 acres; production in 1916, 629,450 bags (of between 132 to 140 pounds). Estimated revenue for 1920-21, 1,718,895 escudos, and expenditure, 1,728,660 escudos. Military force, at least 240 men (181 natives). Imports at S. Thomé and Príncipe (1920), 12,398,237 escudos; exports, 17,490,648 escudos. On S. Thomé a railway of 9 miles is open for traffic.

Angola (Portuguese West Africa), with a coast-line of over 1,000 miles, is separated from French Congo by the boundaries assigned by the convention of May 12, 1886; from the Congo by those fixed by the convention of May 25, 1891; from British South Africa in accordance with the convention of June 11, 1891, and from South-west Africa in accordance with that of December 30, 1886. The colony has belonged to the Portuguese since 1575, with the exception of the years 1641 to 1648, when it was held by the Dutch. It is under a High Commissioner, who resides at Loanda, and is vested with large powers; it is divided into eleven districts: Loanda, Congo, Guanza-Norte, Guanza-Sul, Benguella, Mazico, Mossamedes, Huila, Cubango, Malanje, and Lunda. The capital is S. Paulo de Loanda, other important towns being Cabinda, Ambriz, Novo Redondo, Benguella, Mossamedes, and Port Alexander. The indigenous population numbered 2,124,361 in 1914. There are said to be 52 Government schools, and 7 municipal and 2 private schools, with altogether about 2,410 pupils. Various missions are at work in the country. The military force varies between 2,721 men (1,976 natives) and 4,731 (3,602 natives). Estimated revenue in 1921-22, 53,507,000 escudos, and expenditure 53,537,000 escudos. The chief products are coffee, rubber, wax, sugar (for rum distilleries), vegetable oils, coco-nuts, ivory, oxen and fish. Rubber supplies are now becoming exhausted; cotton-growing, formerly remunerative, has been neglected but is now increasing; tobacco is grown and manufactured for local consumption; petroleum and asphalt are worked by a British syndicate. The province contains large quantities of malachite and copper, iron, petroleum, and salt. Gold has also been found. Imports, exclusive of Congo (1920), 22,294,371 escudos; exports exclusive of Congo, 18,392,882 escudos. The chief imports of the province are textiles, and the chief exports are coffee and rubber. Dried fish are exported in considerable quantities. The trade is largely with Portugal. The Portuguese National Navigation Company has most of the

carrying trade to and from Europe; the steamers of 3 British lines and one German line visit ports of the Colony. The length of railways open for traffic, is 818 miles, made up as follows: Loanda-Lucalla line, 226 miles (metre gauge); Lucalla-Malanje line, 149 miles (metre gauge), which it is intended should link up with the Central African Railway; Canhoca-Golungo Alto, 9 miles; Lobito-Chinguar, 323 miles; and Mossamedes-Chela Mountains, 111 miles. In July, 1918, the Government purchased the Trans-African railway. Angola is connected by cable with East, West, and South African telegraph systems.

Mozambique (Portuguese East Africa) is separated from British Central and South Africa by the limits of the arrangement between Great Britain and Portugal in June, 1891. It is separated from late German East Africa, according to agreements of October and December, 1886, and July, 1890, by a line running from Cape Delgado at 10° 40' S. lat. till it meets the course of the Rovuma, which it follows to the point of its confluence with the 'Msinje, the boundary thence to Lake Nyasa being the parallel of latitude of this point. In accordance with the Treaty of Versailles the Peace Conference on September 23, 1919, allotted to Portugal 'as the original and rightful owner' the territory south of the Rovuma, known as the "Kionga Triangle" (formerly part of German East Africa).

Portuguese East Africa, with an area of 428,132 square miles, comprises three distinct entities: (1) the Province of Mozambique (295,000 square miles); (2) the Companhia de Moçambique (59,840 square miles), and (3) the Companhia do Nyasa (73,292 square miles). The first, which is ruled by a High Commissioner, with his seat at Lourenço Marques, is divided into 6 districts: Lourenço Marques, Gaza, Inhambane, Quilimane, Tete and Mozambique, each with its own Governor. Lourenço Marques (population 13,154 in 1912) is the capital of the Province. There is a Government Council composed of officials and elected representatives of the commercial, industrial and agricultural classes, and a Provincial Council with the attributions of an administrative and account tribunal. The existing organisation of the province is that which was established by decree of May 23, 1907, with some modifications. The Manica and Sofala region is administered by the Mozambique Company, which has a royal charter granting sovereign rights for 50 years from 1891. Under the Company's administration the country on the Zambezi has become settled, there is convenient transport by river, and facilities are granted for securing titles and working mines. The Nyasa Company, with a royal charter, administers the region between the Rovuma, Lake Nyasa, and the Lurio. Estimated population, about 3 million natives, 10,500 whites, and 1,100 Asiatics and half-castes. The military force of the Colony varies between 2,250 men (1,379 natives) and 3,904 men (2,468 natives). For 1921-22 the estimated revenue was 13,749,636 escudos.

The chief products of the Colony are sugar, coco-nuts, bees-wax, and mining products. Important gold-bearing reefs have been discovered on the Upper Zambezi, and extensive coal deposits in the Tete region.

The principal ports are Mozambique (population, 1910, 472 Europeans, 895 Asiatics, and about 361,367 natives), Ibo, Quilimane, Chinde (population 1,690, of whom 218 European), Beira (population, 3,420, of whom 738 white), Inhambane (population, 3,330, of whom 100 European and 250 Asiatic), and Lourenço Marques (9,849, of whom 4,691 European).

As the result of a cyclone on February 24, 1922, Chinde was practically destroyed.

The trade registered (exclusive of coin and bullion) at the following ports in 1919 is given below :—

—	Imports	Exports	Re-exports	Transit	Total
	Escudos	Escudos	Escudos	Escudos	Escudos
Lourenço Marques	12,905,487	3,386,362	7,890,582	26,951,467	51,133,968
Inhambane	972,267	193,861	181,769	2,600	1,350,497
Chinde	2,121,104	663,360	2,807,203	2,743,510	8,335,177
Quelimane	2,348,004	1,099,093	4,256	—	3,451,353
Moçambique	4,255,828	1,997,126	2,142,253	—	8,395,207
Tete	642,389	35,028	—	140,943	818,360
Beira	3,939,782	3,869,891	17,160,552	6,432,873	31,403,098
Ibo	738,311	485,663	5,810	10	1,229,824
Grand Total	27,923,142	11,730,384	30,192,555	36,271,403	106,117,484

The chief articles imported into the colony are cereals, foodstuffs, cement, cotton, alcoholic liquors, and animals. The exports are mainly sugar, rubber, various ores, wax, and ivory. The Zambeze is navigable for stern-wheelers as far as Tete. At the port of Lourenço Marques there entered, in 1920, 611 vessels and cleared 590 vessels. At the port of Beira 340 vessels arrived and 336 departed in 1919. At the port of Ibo, 2,104 vessels arrived in 1919, and 2,100 departed.

The Delagoa Bay railway has a length of 57 miles in the colony, and is continued for 290 miles to Pretoria. The commercial relations and transit of goods by this railway between the Portuguese and British possessions are regulated by the agreement signed April 1, 1909. A new line from Lourenço Marques to the Swaziland border is under construction, 44 miles being open for traffic, including the Umbeluzi branch. The Gaza railway, from Chai-Chai to Manjacaze has 32 miles open for traffic, and the line from Mutamba to Inharrime 25 miles. The Beira railway has a length of 204 miles in the colony, and is continued from the British frontier to Bulawayo.

The Government has been working on a definite plan, and the finished scheme for the Province south of parallel 22, the southern boundary of the Mozambique Co.'s territories, embraces the following lines: Moamba to Xinavane, 55 miles (completed); Xinavane via Chissane to Chai-Chais 70 miles (not yet begun); Chai-Chai via Manjacasse to Chigomo, 51 miles, (completed); Chigomo via Jinagai to Inharrime, 51 miles, projected; Inharrime to Mutamba, 40 miles (completed); Mutamba to Inhambane, 15 miles (under construction). Activities north of the Mozambique Co. are represented by two lines of penetration, one from the port of Quelimane, which will tap what is said to be the richest region on the whole coast and whose interior terminal will connect with the existing railway in British Nyasaland, and the other from the port of Mozambique, capital of the district of that name and formerly capital of the Province.

Beira is connected by telegraph with Salisbury in Mashonaland, and Lourenço Marques with the Transvaal system. Quilimane has telegraphic communication with Chiromo. In 1915 there were 3,397 miles of telegraph line.

The Portuguese coinage is little used; the official value of the escudo is 4s. 5d., or 4·5 escudos to the £. At Mozambique the currency is chiefly British-Indian rupees, on which an import duty of 10 per cent. is levied. At Lourenço Marques English gold and silver coins are chiefly used.

ROME, SEE AND CHURCH OF.

For many ages until Pius IX.'s reign, with some comparatively short breaks, the Popes or Roman Pontiffs bore temporal sway over a territory stretching across Mid-Italy from sea to sea and comprising an area of some 16,000 square miles, with a population finally of some 3,125,000 souls. Of this dominion the whole has been incorporated with the Italian Kingdom. Furthermore, by an Italian law dated May 13, 1871, there was guaranteed to His Holiness and his successors for ever, besides possession of the Vatican and Lateran palaces and the villa of Castel Gandolfo, a yearly income of 3,225,000 lire or 129,000*l.*, which allowance still remains unclaimed and unpaid.

Supreme Pontiff.—Pius XI. (Achilles Ratti), born at Desio, May 30, 1857; Archbishop of Milan, September 1921; Cardinal, June 13, 1921; elected Supreme Pontiff, as successor of Benedict XV., February 6, 1922.

The election of a Pope ordinarily is by *scrutiny*. Each Cardinal in conclave writes on a ticket his own name with that of the Cardinal whom he chooses. These tickets, folded and sealed, are laid in a chalice which stands on the conclave altar; and each elector approaching the altar repeats a prescribed form of oath. Thereupon the tickets are taken from the chalice by scrutators appointed *ad hoc* from the electing body; the tickets are compared with the number of Cardinals present, and when it is found that any Cardinal has two-thirds of the votes in his favour he is declared elected.

From the accession of Innocent IX., 232nd in the usual list of Roman Pontiffs, to Pius XI., 261st, the Popes (all Italian) have been as follows:—

Name and Family of Pontiff	Year of Election	Name and Family of Pontiff	Year of Election
Innocent IX. (<i>Faccinetti</i>) .	1591	Benedict XIII. (<i>Orsini</i>) .	1724
Clement VIII. (<i>Aldobrandini</i>)	1592	Clement XII. (<i>Corsini</i>) .	1730
Leo XI. (<i>Medici</i>) . . .	1605	Benedict XIV. (<i>Lambertini</i>)	1740
Paul V. (<i>Borghese</i>) . . .	1605	Clement XIII. (<i>Rezzonico</i>) .	1758
Gregory XV. (<i>Ludovisi</i>) . .	1621	Clement XIV. (<i>Ganganelli</i>)	1769
Urban VIII. (<i>Barberini</i>) . .	1623	Pius VI. (<i>Braschi</i>) . . .	1775
Innocent X. (<i>Pamphily</i>) . .	1644	Pius VII. (<i>Chiaramonti</i>) . .	1800
Alexander VII. (<i>Chigi</i>) . . .	1655	Leo XII. (<i>della Genga</i>) . .	1823
Clement IX. (<i>Rospigliosi</i>) .	1667	Pius VIII. (<i>Castiglioni</i>) . .	1829
Clement X. (<i>Altieri</i>) . . .	1670	Gregory XVI. (<i>Cappellari</i>) .	1831
Innocent XI. (<i>Odescalchi</i>) . .	1676	Pius IX. (<i>Mastai-Ferretti</i>) .	1846
Alexander VIII. (<i>Ottoboni</i>) .	1689	Leo XIII. (<i>Pecci</i>) . . .	1878
Innocent XII. (<i>Pignatelli</i>) . .	1691	Pius X. (<i>Sarto</i>)	1903
Clement XI. (<i>Albani</i>) . . .	1700	Benedict XV. (<i>della Chiesa</i>)	1914
Innocent XIII. (<i>Conti</i>) . . .	1721	Pius XI. (<i>Ratti</i>)	1922

The Roman Pontiff (in orders a Bishop, but in jurisdiction held to be by divine right the centre of all Catholic unity, and consequently Pastor and Teacher of all Christians) has for advisers and coadjutors the Sacred College of Cardinals, consisting, when complete, of 70 members, namely, 6 Cardinal-Bishops (holders of the suburbicary sees), 50 Cardinal-Priests, and 14 Cardinal-Deacons but hardly ever comprising the full number. In March, 1922, the Sacred College consisted of 6 Cardinal-Bishops, 45 Cardinal-Priests, and 9 Cardinal-Deacons.¹ The following list gives the names, dates, and offices of these 60 Cardinals:—

Name	Office or Dignity	Nationality	Year of Birth	Year of Creation
Cardinal-Bishops:—				
Vincenzo Vannutelli	Bishop of Palestrina, Arch- priest of the Patriarchal Liberian Basilica, Datary of His Holiness	Italian . .	1836	1889
Gaetano de Lai	Bishop of Sabina	„ . .	1853	1907
Antonio Vico	Bishop of Porto and Santa Rufina	„ . .	1847	1915
Gennaro Granito Pignatelli di Belmonte	Bishop of Albano	„ . .	1851	1915
Basilio Pompili	Vicar General of His Holiness Cardinal Bishop of Velletri .	„ . .	1858	1917
Giovanni Cagliero	Bishop of Frascati	„ . .	1838	1915
Cardinal-Priests:—				
Michael Logue	Archbishop of Armagh	Irish . .	1840	1893
Giuseppe Prisco	Archbishop of Naples	Italian . .	1836	1896

¹ The terms Cardinal-Priest and Cardinal-Deacon have for centuries ceased to imply severally the particular orders of priest or deacon. Nowadays in the Sacred College a presbyteral title is freely given to one in episcopal or diaconal orders, and a diaconry to a priest or even to a simple clerk.

Camillo Laurenti . . .	{ Secretary of the Congregation De Propaganda Fide . }	Italian	1842	1921

Though primarily belonging to the local Roman Church, the Cardinals, drawn from every nation of Christendom, are now regarded as Princes of the Church at large. Originally they were simply the parish rectors of Rome, or the deacons of Roman deaneries. In 1586 their number was finally settled by Sixtus V. at seventy. The Cardinals compose the Pope's Senate or Council and the various Sacred Congregations, govern the Church while the Apostolic See is vacant, and elect the deceased Pontiff's successor. They received the distinction of the red hat under Innocent IV., during the first General Council of Lyons, in 1246; and the title of Eminence from Urban VIII., in 1630.

The central administration of the Roman Catholic Church is carried on by a number of permanent committees called Sacred Congregations, composed of Cardinals, with Consultors and Officials. There are now eleven Sacred Congregations, viz., Holy Office, Consistorial, Discipline of the Sacraments, Council, Religious, Propaganda Fide, Index, Rites, Ceremonial, Extraordinary Ecclesiastical Affairs, Seminaries and Universities. Besides these there are several permanent Commissions, for example, one for Biblical Studies, another for Historical Studies, another for Preservation of the Faith in Rome, another for Codification of Canon Law. Furthermore, the Roman Curia contains three tribunals, to wit, the Apostolic Penitentiary, the Supreme Tribunal of the Apostolic Signature, and the Sacred Roman Rota; and, lastly, various offices, as the Apostolic Chancery, the Apostolic Datary, the Apostolic Chamber, the Secretariate of State, etc.

The States wherewith the Holy See maintains diplomatic relations are Austria, Bavaria, Belgium, Czecho-Slovakia, France, Germany, Hungary, Yugo-Slavia, Monaco, the Netherlands, Poland, Portugal, Rumania, Russia, Spain, and the United Kingdom (1914), together with most of the American Republics, except the United States and Mexico.

Within the British Empire the present number of Roman Catholic residential sees is 213, viz., 38 archbishoprics and 112 bishoprics, besides 54 apostolic vicariates (mostly held by Bishops of titular sees), and 9 apostolic prefectures: while the Roman Catholic population subject to King George V. is estimated at 13,814,404 souls, of whom 5,923,738 are in Europe; 2,316,054 in Asia; 582,943 in Africa; 3,761,914 in British America; and 1,229,755 in Australasia. Throughout the world the Roman Catholic population is reckoned at 316,888,975 souls, of whom 309,718,779 are of the Latin Rite (*Catholic Directory*, London).

British Envoy Extraordinary and Minister Plenipotentiary.—Count de Salis, K.C.M.G., C.V.O. (Appointed December 2, 1916.)

Secretary to the British Mission.—H. H. Thynne.

RUMANIA.

(ROMÂNIA)

Reigning King.

Ferdinand I. King of Rumania, born August 24, 1865, nephew of the late King Carol, whom he succeeded on October 11, 1914. Married, January 10, 1893, to Princess Marie, daughter of the Duke of Saxe-Coburg and Gotha, born October 29, 1875.

Children of the King:—(1) Carol, born October 15, 1893, Crown Prince, married March 10, 1921, to Princess Helen of Greece; offspring: Michel, born October 25, 1921; (2) Elisabeth, born October 11, 1894; (3) Marie, born January 8, 1900; (4) Nicholas, born August 18, 1903; (5) Ileana, born January 5, 1909.

The King has, in addition to revenues from certain Crown lands, an annual allowance of 2,500,000 lei, or 100,000*l.* The heir to the crown has an annual donation of 300,000 lei (12,000*l.*).

The union of the two Principalities of Wallachia and Moldavia was publicly proclaimed at Bucharest and Jassy on Dec. 23, 1861, the present name being given to the united provinces. The first ruler of Rumania was Colonel Cuza, who had been elected 'Hospodar,' or Lord, of Wallachia and of Moldavia in 1859, and who assumed the government under the title of Prince Alexandru Joan I. A revolution which broke out in February 1866 forced Prince Alexandru Joan to abdicate, and led to the election of Prince Carol I. The representatives of the people, assembled at Bucharest, proclaimed Rumania's independence from Turkey, May 21, 1877, which was confirmed by Art. 43 of the Congress of Berlin, signed July 13, 1878. King Carol I. reigned as Prince from 1866 to 1881, and as King from 1881 to 1914. In March, 1918, Bessarabia was joined to Rumania; Bukovina in November, 1918; and Transylvania in December, 1918.

Constitution and Government.

The Constituent Assembly elected in May and June, 1920, for United Rumania by universal, direct, and secret suffrage will have to unify the different constitutions of the Old Kingdom, Bessarabia, Bukovina, and Transylvania. The constitution of the Old Kingdom, which was voted in 1866 and twice modified, once in 1879 and again in 1884, provided for a Legislature of two Houses. The Senate consists (March, 1920) of 170 members (Old Kingdom, 82; Transylvania, 45; Bessarabia, 24; and Bukovina, 19), including 4 for the Universities and 19 Bishops. The Heir to the Crown is also a Senator. The Chamber of Deputies consists of 347 members (Old Kingdom, 168; Transylvania, 112; Bessarabia, 51; and Bukovina, 16). A Senator must be 40 years of age, and a Deputy 25. Members of either House must be Rumanians by birth or naturalisation,

in full enjoyment of civil and political rights, and domiciled in the country. All citizens of 21 years, paying taxes, are electors. Both Senators and Deputies receive 160 lei per each day of actual attendance, besides 2000 lei per month and free railway passes. The King has a suspensive veto over all laws passed by the Chamber of Deputies and the Senate. The executive is vested in a council of Ministers.

The elections held on June 6, 1920, resulted in the return of the following parties:—Peoples' Party, 215; Federal Democrats, 34; Bessarabian Peasants, 25; Transylvanian Nationalists, 21; Socialists, 19; Independent Democrats, 6; other parties, 12.

The Cabinet (appointed January 19, 1922) is composed as follows:—

Prime Minister and Minister for War.—Jon Bratiano.

Minister of the Interior.—General Vaitoiano.

Minister of Foreign Affairs.—Jon Duca.

Minister of Agriculture.—A. Constantinesco.

Minister of Public Instruction and ad interim of Communications.—Dr. Angelesco.

Minister of Finance.—Vintila Bratiano.

Minister of Labour.—G. Marzesco.

Minister of Public Worship and ad interim of Public Works.—C. Bano.

Minister of Justice.—J. Floresco.

Minister of Industry and Commerce.—B. Sasso.

Secretary of State for Bessarabia.—J. Inculetz.

Secretary of State for Bukovina.—J. Nestor.

LOCAL GOVERNMENT.

For purposes of local government Wallachia is divided into 17 districts, Moldavia into 13, the Dobrudja into 4, Bessarabia into 8, Bukovina into 11, and Transylvania (with Banat, Crisana and Maramuresh) into 24 districts, each of which has a prefect, a receiver of taxes, and a civil tribunal. In Rumania (1919) there are 735 districts and 5,864 communes, 129 urban and 5,735 rural. In the rural communes there are 15,593 villages and 1,048 hamlets. The appellations 'urban' and 'rural' do not depend on the number of inhabitants, but is given by law.

Area and Population.

As a result of the Treaties of Peace of 1919 Rumania was enlarged, and the area and population of the New Kingdom is shown as follows:—

Country.	Area in sq. miles	Population.		
		Males	Females	Total
Old Rumania	53,489	3,989,606	3,914,498	7,904,104 ¹
Bessarabia	17,146	1,198,900	1,145,900	2,344,800
Bukovina	4,030	395,963	404,135	800,098
Transylvania	22,312	1,850,480	1,327,887	2,678,367
Crisana	8,038	659,836	657,145	1,316,981
Maramuresh	9,258	378,205	388,461	766,666
Banat	11,009	789,102	793,931	1,582,133
Total	122,282	8,762,092	8,631,057	17,393,149

¹ Estimate for 1915.

The four historic divisions of Old Rumania were populated (1912) as follows:—Moldavia, 2,145,464 (area, 14,710 square miles); Grand Wallachia (Muutenia), 3,298,394 (area, 29,810 square miles); Oltenia, 1,413,897; Dobrudja, 381,306 (area, 8,969 square miles.)

By the Treaty of Bucharest (August 7, 1913) between Bulgaria and Rumania, the former ceded to the latter 2,969 sq. miles of territory, with a population of 273,090, mostly Turks. The new land was formed into two departments, Durostor and Caliacra.

Among Rumanians there are racial differences of which the Rumanian census takes no account. In Central Moldavia and East Transylvania there are thousands of habitants of Magyar descent (Changer and Szeklers); in South Transylvania and in the Banat there are thousands of Saxons and Swabes. In Bukovina and Bessarabia there are some German and Ruthenian colonies. The communes along the Danube have some inhabitants of Bulgarian and Serbian origin; in the Dobrudja there are many foreign elements—Bulgars, Russians, Germans, but the greatest part of them are Turks and Tartars.

The number of births, deaths, and marriages, with surplus of births over deaths, was as follows (for the Old Kingdom) for three years:—

Years	Births	Deaths	Marriages	Surplus of Births over Deaths
1915	319,544	193,574	56,314	125,970
1918	103,072	297,310	57,354	—194,238
1919	285,579	261,107	72,580	24,472

In 1909 there were 2,651 divorces: in 1912, 2,998; in 1913, 3,217; in 1914, 3,433; in 1919, 865.

The principal towns in Greater Rumania are (population 1914):—Bucharest, the capital and seat of Government, 345,628 (on January 6, 1917, 308,987—119,958 males and 189,029 females); Chisinau, 114,100; Cernauti, 87,128; Ismail, 85,600; Iasi (Jassy), 76,120; Galatz, 73,512; Timisoara, 72,223; Braila, 65,911; Oradea Mare, 64,169; Arad, 63,166; Cluj, 60,808; Ploesti, 57,376; Craiova, 51,877; Brasov, 41,056; Tughina, 36,400; Satul Mare, 34,892; Cetatea Alba, 33,600; Sibiu, 33,419; Botosani, 32,874; Buzeu, 29,483; Constantza, 27,662; Berlad, 25,367; Focsani, 25,287.

Religion, Instruction, Justice, &c.

Of the total population of Rumania (in 1918) 9,695,714 belonged to the Orthodox Church, 1,156,147 were Greek Catholics, 1,483,929 were Roman Catholics, 1,344,970 Protestants, 17,596 Armenians, 834,344 Jews and 44,087 Mahometans. The government of the Orthodox Church rests with the four archbishops, the first of them styled the Primate of Rumania, the second the Archbishop of Moldavia, the third of Transylvania, and the fourth of Bukovina. Besides, there are, ten bishops of the National Church. In Transylvania there is a Greek Catholic archbishop and three bishops. In Rumania there are three Roman Catholic Bishops, two Protestant and one Unitarian. The clergy of the National Orthodox Church are paid by the State. The clergy of the other denominations are subventioned by the State. Full liberty of religion is assured to every creed or sect.

Education is free and compulsory 'wherever there are schools,' and it is improving from year to year. In 1909, according to a special census return, 60.16 per cent. of the population over 7 years of age could neither read nor

write; in 1909, 43·12 per cent., and in 1910, 41 per cent. of the army recruits could neither read nor write. In 1918-19 there were 5,764 elementary schools with 11,088 teachers and 692,896 pupils.

The secondary schools in 1918-19 were, for boys, 56 (38 State and 18 private) lyceums, 13 gymnasiums and 7 seminaries, these 76 institutions having 1,287 teachers and 44,983 pupils; for girls 66 (12 State and 54 private) high schools with 1,051 teachers and 9,584 pupils; 12 normal schools for men with 181 teachers and 2,425 students, and 4 for women with 93 teachers and 1,435 students; 75 professional schools for boys with 334 teachers and 3,221 students, and 54 for girls with 535 teachers; 25 commercial schools with 216 teachers and 4,656 pupils; 25 agricultural schools with 59 teachers and 669 pupils; 11 schools of domestic economy for girls with 35 teachers and 201 pupils. There are 4 universities: at Bucharest, founded in 1864 (239 professors and 4,644 students), Iasi (Jassy), founded in 1860 (172 professors and 952 students), Cluj (Kolozsvár), in Transylvania, founded in 1919 (1,980 students in 1920), and Cernauti (Czernowitz), in Bukovina, founded in 1920.

Justice is administered by a court of cassation, 11 appeal courts, 64 tribunals, and 494 justices of the peace. The prison population in 1920 numbered 15,536 (11,699 men, 1,618 women, 2,160 boys, and 59 girls). Assistance is given to the sick in 168 hospitals and *hospices* (departmental, communal, rural, and private).

Finance.

The following table shows (in sterling converted at pre-war parity) the estimated revenue and expenditure for years ending March 31 (old style):—

—	1918-19	1919-20	1920-21	1921-22	1922-23
	£	£	£	£	£
Revenue	16,760,000	45,600,000	244,636,800	308,339,091	419,920,000
Expenditure	65,840,000	165,080,000	241,446,878	308,339,091	419,920,000

The main items of the Budget for 1921-22 were as follows:—

Revenue	Lei	Expenditure	Lei
Direct taxes	722,737,902	Ministry of War	925,019,042
Indirect taxes	2,214,000,000	„ „ Finance	1,926,600,000
Stamps and fees	564,000,000	„ „ Education	996,000,000
State monopolies	1,350,000,000	„ „ the Interior	6-5,000,000
Public services	2,340,239,304	„ „ Public Works	2,462,155,457
State domains	185,000,000	„ „ Justice	224,724,580
Subventions	23,000,000	„ „ Agriculture	238,560,596
Special revenues	309,500,000	„ „ Commerce and Industry	93,784,715
		„ „ Foreign Affairs	32,251,600
		Cabinet	3,102,200
		Special expenditure	61,249,106
Total	7,708,477,296	Total	7,708,477,296

The public debt of Rumania amounted on April 1, 1921, to 20,311,293,312 lei, of which 3,733,862,452 lei is the consolidated debt, and 121,500,000

lei the floating debt. This is exclusive of the proportions of the public debts of Austria-Hungary and Russia which have been assumed by Rumania, the total of which is estimated at 10,000,000,000 lei.

Defence.

Military service in Rumania is compulsory and universal from the ages of 21 to 46. The normal terms of service are 2 years in the infantry and 3 years in the other arms, followed by 5, or 4, years in the reserve of the first line. The men then pass to the second line, or reserve force, for 10 years, after which they are transferred to the territorial force at the age of 38, and remain in it 4 years, thus completing 21 years' service. Young men exempted from service in the ranks, and those surplus to the annual contingent, are posted to a supplementary reserve.

By the Treaty of Bucharest the army was reduced to 30,000 men, whilst material, &c., was controlled by the Germans. A partial mobilisation was ordered on November 9, 1918; on the 10th an ultimatum was handed to the German commander demanding evacuation of occupied territory within 24 hours; and on the 18th the Allies entered Bucharest, which had fallen to the Germans on December 6, 1916. Some 400,000 men were again placed under arms. A gradual reduction of this number was begun in 1919, and by January, 1922, the approximate strength of the army was 230,000. These were organised in 7 army corps. Each army corps was composed of 3 divisions and army corps troops. The division consisted of 2 brigades, each of 2 regiments of 3 battalions, and a battalion of chasseurs, 13 battalions in all; an artillery brigade of 2 regiments of field artillery and a group of howitzers; divisional cavalry and divisional engineers.

There are 2 cavalry divisions in the army each composed of 2 brigade of 2 regiments, and 2 batteries of horse artillery.

The infantry is armed with the Mannlicher rifle; the Rumanian artillery is still largely armed with guns of the Krupp type, but a considerable number of batteries have the French type of 75 mm. field guns and French medium and light howitzers, which date from the reorganisation of the army, with French assistance, during the war.

The navy consisted of a small cruiser and a few other vessels, including 6 destroyers, but 2 Italian scouts and 4 French gunboats have been acquired. The Danube force now comprises 12 gunboats (including 3 ex-Hungarian), 9 sloops, 4 river monitors, and 8 destroyers, also 7 ex-Austrian torpedo boats for police duties. A naval base has been established at Sulina, on the Black Sea.

Production and Industry.

According to an estimate by Dr. Colesco, the distribution of the soil of Rumania with respect to agriculture in 1914 was as follows:—

	Acres		Acres
Ploughed lands	13,074,922	Water	2,018,250
Fallow lands	1,299,382	Other lands	5,581,842
Vineyards and orchards	468,670	Annexed territories	1,931,500
Meadows	1,436,960		
Pastures	2,948,472	Total	<u>34,475,750</u>
Forests (less clearings)	5,705,750		

About 80 per cent. of the population are engaged in agriculture. Of the

cultivable land (arable, meadow, plantation, and orchard land) the distribution with respect to ownership is as follows :—

Size of Properties	Proprietors	Area	Per cent. of area
Acres	Number	Acres	
24·7 and under	1,015,302	8,199,647	41·66
Over 27·4 „ „ „ 123·5 .	36,318	1,719,104	8·73
„ 123·5 „ „ „ 247 .	2,381	408,676	2·08
„ 247 . „ „ „	4,471	9,354,364	47·53
Total	1,058,172	19,681,791	100·00

In 1919 and 1920 the chief agricultural crops were as follows :—

Crop	Area cultivated		Production	
	1919	1920	1919	1920
	Acres	Acres	Tons	Tons
Wheat	2,949,983	2,095,590	1,320,000	630,000
Rye	218,224	183,675	87,000	52,000
Barley	584,357	1,053,736	257,000	460,000
Oats	594,322	971,102	207,000	425,000
Maize	4,837,625	4,051,494	2,597,000	1,773,000

The tobacco area in Transylvania in 1920 was 11,250 acres (7,500 acres in 1919) and the yield 5,000 tons.

The forests of Rumania have an aggregate area of 18,750,000 acres, of which 6,820,000 acres are in the Old Kingdom, 5,500,000 acres in Transylvania, 1,700,000 acres in Maramuresh, and 1,500,000 acres in the Banat.

In 1919, Rumania had 1,444,232 horses, 4,771,812 cattle, 6,159,982 sheep, and 2,444,791 swine.

The principal minerals are salt, lignite, iron and copper ores, and petroleum. Petroleum springs, both government and private, are worked at Prahova, Dambovitza, Bacau, and Buzau. The total output reached in 1900, 250,000 metric tons; in 1915, 1,673,145; in 1916, 1,244,093; in 1917, 517,491; in 1918, 1,214,219; in 1919, 919,847; in 1920, 1,034,022; in 1921, 1,160,885. The salt mines are situated in the region of the lower Carpathians, from Bakovina to the west of Oltenic, a stretch of over 250 square miles. Salt mining has been a state monopoly since 1863.

Industries of some importance are flour milling, brewing, and distilling. In 1919 there were 2,747 industrial establishments, with a capital of 2,837,296,627 lei, and employing 157,423 workmen.

Commerce.

The values of the imports into and exports from Rumania, exclusive of gold and silver (in sterling) were :—

Years	Imports	Exports	Years	Imports	Exports
	£	£		£	£
1911	22,789,801	27,668,816	1914	19,969,922	17,896,666
1912	25,516,220	25,684,148	1915	13,185,828	22,581,469
1913	28,600,504	26,823,212	1919	143,817,825	4,115,647

A Treaty of Commerce and Navigation providing for the most-favoured-nation treatment between Rumania and Great Britain was signed at Bucharest on October 31, 1905.

Imports and exports are estimated in accordance with values settled by a Commission appointed from time to time.

In 1919 the chief imports and exports were as follows :—

Classes.	Imports		Exports	
	Tons	Lei	Tons	Lei
Live stock	778	9,055,845	1	2,300
Alimentary animal products	16,101	246,588,667	142	1,231,735
Non-alimentary animal products	490	7,140,248	—	—
Hides, articles thereof	3,543	253,928,028	73	2,242,680

Total	893,472	3,582,945,633	104,879	103,891,198

Total trade between Rumania and United Kingdom for five years (Board of Trade Returns) in sterling :—

—	1917	1918	1919	1920	1921
Imports from Rumania to U. Kingdom .	—	—	2,742	3,231,892	3,350,386
Exports to Rumania from U. Kingdom .	701,040	—	5,585,085	7,112,462	5,432,855

Shipping and Communications.

In 1919 the merchant navy of Rumania consisted of 158 vessels of 71,158 tons, including 17 steamers of 29,441 tons. Number of vessels entering Rumanian ports in 1919 was 10,546 of 2,991,095 tons.

The European Commission of the Danube, called into being in 1856, consisted before the war of 8 delegates, one representing each of the following powers: Austria-Hungary, France, Germany, Great Britain, Italy, Rumania, Russia, and Turkey. By article 346 of the Treaty of Versailles, only representatives of Great Britain, France, Italy and Rumania constitute the Commission at present. It has its seat at Galatz. Since November 24, 1904, it has existed, or will exist, for successive periods of 3 years unless denounced by one of the contracting powers a year before the conclusion of any such period. By the operations of the Commission the Danube below Braila and along the Sulina branch has been deepened and corrected, so that at Sulina the depth has been increased from 9 ft. to 24 ft., and of the Sulina branch the minimum depth has been increased from 8 ft. to 13½ ft., while by canalisation and other works the navigation has been shortened from 45½ to 33½ nautical miles. The income of the Commission is derived entirely from taxes levied on shipping leaving the river.

Railway history in Rumania commenced in 1860. In 1920 Rumania had 7,240 miles of railway. The State has the working of all the lines, and has besides, under the general railway direction, a commercial navigation service on the Danube and Black Sea. Several additional lines are projected or in course of construction.

Within Rumania there were 27,635 miles of metalled roads in 1915.

In 1915-16 there were 4,700 post-offices, through which there passed 21,965,098 letters, 31,969,461 post-cards, and 76,606,141 newspapers, samples, &c. In 1915-16 there were 8,612 miles of telegraph lines, and 18,801 miles of wire, on which 3,864,825 messages were forwarded. The number of offices was 3,143. In 1913-14 there were 7 urban telephone systems with 1,004 miles of line and 24,605 miles of wire, and 7,966 inter-urban systems with 24,168 miles of line and 45,378 miles of wire. On the urban systems during the year there were 24,360,479 conversations, and on the inter-urban 1,689,596.

Money, Weights, and Measures.

The National Bank of Rumania, with capital and reserves of 39,402,565 lei, had, on April 16, 1921, deposits amounting to 3,761,722,000 lei, and its notes in circulation were of the value of 10,979,085,000 lei. Other public credit institutions are Savings Bank, a Deposit and Consignment Bank, an Agricultural Loan Bank, 1,849 Popular Banks, a Rural *Crédit Foncier*, 2 Urban *Crédit Fonciers* (at Bucharest and Jassi), an Agricultural Bank, and a *Cassa Rurala*, an institution whose purpose is to buy properties and sell them in lots to peasants. There are also three private banking institutions.

Until August 1, 1920, there were four kinds of paper currency circulating in Rumania, viz., notes of the Rumanian National Bank (4,523,863,506 lei), notes issued during the German occupation by the Banque Générale (2,104,725,000 lei), Austro-Hungarian banknotes (in the territories formerly part of the Dual Monarchy) (3,972,000,000 kronen), and Russian roubles (in Bessarabia) (1,000,000,000 roubles). A unified paper currency came into use on August 1, 1920.

The decimal system was introduced into Rumania in 1876, the unit of the monetary system being the *leu* (of 100 *bani*), equivalent to the franc. The gold *leu* is the monetary unit. Silver is legal tender up to 50 lei only. Gold coins are 20-, 10-, and 5-lei pieces. Nickel is coined in 5-, 10-, and 20-centime (*bani*) pieces. The metric system has been introduced, but Turkish weights and measures are, to some extent, in use by the people.

Diplomatic and Consular Representatives.

1. OF RUMANIA IN GREAT BRITAIN.

Envoy and Minister.—Nicholas Titulesco. (Appointed December 1921.)

Secretaries.—Radu T. Djuvara, Frederic C. Nano, Viorel Virgil Tilea, Constantin Constantinesco, Nicolas Mishu and Nicolas Michel Vladesco.

Military Attaché.—Lt.-Col. Douglas Capitaneano, D.S.O.

Commercial Attaché.—G. Michaelso.

Consul-General in London.—Sir Albert Rollit, K.C.M.G.

2. OF GREAT BRITAIN IN RUMANIA.

Envoy and Minister.—Sir Herbert Guy Dering, K.C.M.G., K.C.I.E., K.V.O. (Appointed August 28, 1920.)

First Secretary.—J. H. E. Millington-Drako.

Third Secretary.—H. L. Baggallay.

Military Attaché.—Col. F. J. Duncan, C.B., C.M.G., D.S.O.

Commercial Secretary.—A. A. Adams.

Consul at Bucharest and Danube Commissioner.—E. Keyser.

There are Vice-Consuls at Braila, Cluj, Czernowitz, and Galatz.

Statistical and other Books of Reference concerning Rumania.

RUSSIA

(RUSSIAN SOCIALIST FEDERAL SOVIET REPUBLIC.)

ON March 12, 1917, a revolution broke out, as a result of which the Emperor Nicholas II abdicated. A Provisional Government under Prince George Lvoff was set up by the Duma, which held office until May 16, 1917, when it was reorganised. On August 6, 1917, a new Cabinet under M. Alexander Kerensky was formed. This too was reorganised on October 8, 1917, and maintained itself until November 7, 1917, when the Military Revolutionary Committee of the Petrograd Soviet seized the government authority, and handed it over the next day to the All-Russian Congress of the Councils of Workmen's, Soldiers', and Peasants' Deputies. On November 10, 1917, the following manifesto was issued:—"The All-Russian

Congress of the Councils of Workmen's, Soldiers' and Peasants' Deputies decrees the form of the administration of the country pending the meeting of the Constituent Assembly. The Provisional Workers' and Peasants' Government is to be called the Council of People's Commissaries. The administration of the individual branches of State life is to be entrusted to Boards, the composition of which is to secure the carrying out of the programme proclaimed by the Congress in close contact with the organisations of workers, sailors, soldiers, peasants, and employees. The Government authority belongs to the Board and chairmen of these Commissariats, that is to the People's Commissaries, and the right of systematising them belongs to the All-Russian Congress of the Councils of Workmen's, Peasants', and Soldiers' delegates, and its Central Executive Committee."

The Government (Council of People's Commissaries) is controlled by the Central Executive Committee of Soviets (elected by the All-Russian Congress). The Central Executive Committee, as well as the members of the Government, are elected for a period of 12 months, but the Commissaries can be recalled or superseded at any time by the Central Executive Committee. The Chairman of the Central Executive Committee is M. Kalinin.

The following is the constitution of the Council of People's Commissaries (April, 1922):—

1. *President*.—M. Vladimir Ilich *Ulianov-Lenin*.
2. *Foreign Affairs*.—M. *Chicherin*.
3. *War and Marine*.—M. *Trotsky*.
4. *Finance*.—M. *Krestinsky*.
5. *Health*.—M. *Semashko*.
6. *Posts and Telegraphs*.—M. *Dovgalevsky*.
7. *Ways and Communications*.—M. *Dzerzhinsky*.
8. *Supreme Economic Council*.—M. *Bogdanov*.
9. *Agriculture*.—M. *Yakovenko*.
10. *Food*.—M. *Brivkhanov*.
11. *Justice*.—M. *Kursky*.
12. *Social Welfare*.—M. *Vinokurov*.
13. *Labour*.—M. *Schmidt*.
14. *Education*.—M. *Lunacharsky*.
15. *Nationalities*.—M. *Stuin*.
16. *Workers and Peasants Inspection*.—M. *St lin*.
17. *Home Affairs*.—M. *Dzerzhinsky*.
18. *Foreign Trade*.—M. *Krassin*.

On December 10, 1917, the Soviet Government abolished private ownership of land, declaring all real estate the property of the state, and on February 10, 1918, it issued a decree declaring all state loans, internal and foreign, contracted by previous governments to be null and void as from December 1, 1917; confiscating all maritime enterprises and all private banks to the state, and nationalising foreign trade (April 23, 1918).

On March 14, 1918, the People's Commissaries left Petrograd for Moscow, which thus became the centre of Government.

For the late Imperial Family and list of Tsars, see STATESMAN'S YEAR-BOOK for 1917, p. 1227.

The flag of the Russian Socialist Federal Soviet Republic is a red flag with the legend "R.S.F.S.R." in gold letters.

The British Government has concluded a Trade Agreement with the Soviet Government (March 16, 1921), but has not recognised it *de jure*.

Constitution and Government.

The greater part of the former Russian Empire (including Siberia up to Lake Baikal) is under the rule of the Soviet Government. But a number of States have gradually evolved and are maintaining themselves on the borders of the old Empire. Five have received formal recognition and are properly established, viz., Finland, Poland, Esthonia, Latvia, and Lithuania. A number of other independent Republics, which have adopted the Soviet form of Government, are federated with the Government of Russia. These include: White Russia, the Ukraine, Armenia, Georgia, Azerbaidjan, Daghestan and Turkestan. The territory from Lake Baikal to Vladivostok (composed of the former Russian provinces of Trans-Baikal, Amur, the maritime provinces and the island of Sakhalin) has been constituted as the Far Eastern Democratic Republic, governed by a Cabinet of Ministers (Premier, M. Medvediev), with its seat at Chita. The Republic has concluded a treaty of amity with the Soviet Government.

So far as the Russian Socialist Federal Soviet Republic is concerned, a Constitution was adopted by the fifth All-Russian Soviet Congress, the text of which was published on July 19, 1918, and amended and amplified by the seventh, eighth and ninth Soviet Congresses in December 1919, December 1920, and December 1921. According to the Constitution, which has been declared a 'fundamental law' of the Republic, Russia is a Republic of Soviets of Workers, Soldiers, and Peasants' Deputies; and all central and local authority is vested in these Soviets. Private property in land is abolished, all land being the common property of the people; all forests, mines, waters having a national importance and all livestock and fixtures, model estates and agricultural concerns are all national property. The State owns all factories, mines, railways, and other means of production and transport, but may, according to recent legislation, lease them to private individuals, corporations, or State trusts.

The Russian Republic is a free Socialist community of all the labouring masses of Russia. Freedom of conscience, of opinion, of the press, and of meeting are guaranteed by the Constitution. In order to protect the conquests of the revolution, universal military service is incumbent on all citizens. The privilege of defending the Revolution with arms is, however, reserved for the labouring classes only; the non-labouring sections of the population will discharge other military duties. The political rights of Russian citizenship will be granted without any formalities to foreigners residing on the territory of the Russian Republic for purposes of labour.

The highest authority in the State is the All-Russian Congress of Soviets, which consists of representatives of town Soviets on the basis of one delegate for every 25,000 inhabitants, and of Provincial Congresses of Soviets on the basis of one delegate for every 125,000 inhabitants. The Congress elects an All-Russian Central Executive Committee, consisting of 300 members, which constitute the supreme legislative, administrative, and controlling body in the Republic, and meets not less frequently than once in two months, current affairs being administered by a Standing Committee (Presidium). The Central Executive Committee also forms a Council of People's Commissaries for the general administration of the affairs of the Republic, to consist of 18 People's Commissariats, viz., Foreign Affairs, War and Marine, Interior, Justice, Labour, Social Welfare, Education, Posts and Telegraphs, Nationalities, Finance, Ways and Communications,

Agriculture, Food, Supreme Economic Council, Health, Workers' and Peasants' Inspection, and Foreign Trade. Each People's Commissary has a Board attached to him under his chairmanship.

The franchise is enjoyed irrespective of religion, nationality, residence, sex, etc., by all citizens over 18 years of age who earn their livelihood by productive labour, and soldiers and sailors in the Red Army and Navy.

Provision is also made in the Constitution for Local Government by means of local Soviets in villages and towns, with district, provincial and territorial Congresses.

Area and Population

I. PROGRESS AND PRESENT CONDITION.

The old Empire of Russia comprised one-seventh of the ~~land~~^{land}-surface of the globe. Its area, without internal waters, was, since the Treaty of Portsmouth, 8,417,118 English square miles (19,155,587·7 square versts).

Until 1897 there have been but various enumerations of the population called *revisions*. On January 28 (February 9), 1897, a census was taken over the whole of the country. The rapidity of growth of the population of the country (its acquisitions being included in the figures of population) is seen from the following :—

Year	Population	Year	Population
1722	14,000,000	1859	74,000,000
1796	36,000,000	1897	129,209,297
1815	45,000,000	1914	178,378,800
1835	60,000,000	1915	182,182,600

Of the total in 1915, 131,796,800 were in European Russia, 13,229,100 in the Caucasus, 10,377,900 in Siberia, and 11,254,100 in the Central Asiatic Provinces.

Considerable alterations in the territory and population of Russia were brought about by the revolutions of 1917, which were first revealed in the results of the census taken on August 20, 1920. The total area of the Soviet Federation, together with the closely allied Far Eastern Republic, is given as 8,166,130 square miles, with a population of 131,546,045.

As the census did not completely cover all areas of the R.S.F.S.R. and the associated republics, it was necessary in some cases to supplement the returns with estimates based on the most recent statistics available. The final census of 1920, therefore, is not completely precise; but it nevertheless provides an accurate enough basis for practical purposes. The following are the main statistics of area and population of the R.S.F.S.R., distinguishing the various autonomous areas and associated Republics.

1. *European Russia.*

Three distinct nationalities inhabit this territory :—

	Territory (square miles).	Population (both sexes).
Great Russians (thirty-nine provinces, the Don area, and three provinces of N. Caucasus)	1,290,440	65,751,898
Ukraine (nine provinces)	174,510	26,001,802
White Russia	23,290	1,634,223
Total	1,488,240	93,387,923

2. *Minor Areas.*

On the north, south, and east of the central nucleus of Russia lie other areas forming different administrative and political units, the population of which is often mixed, but with preponderating elements which are the basis of their political divisions. All of these territories under the Soviet régime have complete local autonomy. The following table shows the area and population of the various territories :—

	Territory (square miles).	Population (both sexes).
<i>Labour Communes.</i>		
Karelia	28,890	144,392
German Volga Commune	7,680	454,368
<i>Autonomous Areas.</i>		
Votjak	11,300	686,049
Ziranian	107,060	186,878
Kalmuk	38,440	126,256
Mari	6,040	300,069
Chuvash	6,720	758,161
<i>Autonomous Republics</i>		
Bashkir	40,420	1,268,132
Tartar	25,960	2,852,135
Crimoan	15,060	761,660
Mountain (N. Caucasus)	17,420	898,420
Dagestan	13,730	798,181
Kinghiz	843,640	5,058,553
Turkestan	577,400	7,201,551
Total	3,739,760	21,401,745

3. *Siberia.*

In Siberia there are nine provinces with a territory of 4,210,420 square miles and a population of 9,257,825.

The total area of the R.S.F.S.R. is thus 7,438,420 square miles, and the population 124,050,553.

4. *Associated Republics.*

The following Republics are closely connected by agreements of a permanent character with the R.S.F.S.R. :—

Republics.	Area (square miles).	Population.
Azerbaijan	33,970	2,096,973
Armenia	15,240	1,214,391
Georgia	25,760	2,372,403
Far East	652,740	1,811,725
Total	727,710	7,495,492

5. Countries detached from Russia.

Outside the lines traced out above lie the countries and peoples which became detached from Russia after the war :—

	Area (square miles).	Population.
Finland	127,330	3,348,000
Estonia	16,000	1,750,000
Latvia	27,110	2,500,000
Lithuania	22,890	2,246,000
Poland	97,110	16,022,000
Bessarabia (to Rumania)	17,330	2,213,000
Kars area	7,780	492,000
Total	315,550	28,571,000

These countries, which have not entered into permanent and close political relations with the R.S.F.S.R., form in area 3·8 per cent. of present Russia and 21·7 per cent. of its population.

6. New Asiatic Connections.

Bokhara, Khiva, and Mongolia have made agreements of a permanent character with the R.S.F.S.R. The area and population of these countries is as follows :—

Country.	Area (square miles).	Population.
Bokhara	79,440	3,600,000
Khiva	24,310	519,438
Mongolia	5,556,000	645,000
Total	5,659,750	4,164,438

The principal towns of Soviet Russia with their population for the years given are :—Petrograd (1915), 2,318,645 ; Moscow (1920), 1,050,011 ; Odessa (1912), 631,040 ; Kharkov (1913), 258,360 ; Kazan (1913), 195,300.

Religion.

The Soviet Government has disestablished the Church and appropriated certain categories of its property. Since the revolution of March, 1917, all religions may be freely professed in the Empire. The prevailing religion of the country is the Græco-Russian, officially called the Orthodox Faith. It has its own independent synod, but maintains the relations of a sister Church with the four Orthodox patriarchates of Constantinople, Alexandria, Antioch, and Jerusalem. The Holy Synod, the board of government of the Russian Church, was established in 1721 ; to it was committed the superintendence of

the religious affairs of the Empire. It was composed of the three metropolitans (Petrograd, Moscow, and Kiev), the archbishop of Georgia (Caucasus), and several bishops sitting in turn.

It is estimated that there are more than 12,000,000 dissenters in Great Russia alone. The affairs of the Roman Catholic Church are entrusted to a Collegium, and those of the Lutheran Church to a Consistory, both settled at Petrograd. Roman Catholics are most numerous in the former Polish provinces, Lutherans in those of the Baltic, and Mohammedans in Eastern and Southern Russia, while the Jews are almost entirely settled in the towns and larger villages of the western and south-western provinces.

Before the Revolution, Russia was divided into 66 bishoprics (*eparchiya*), which were under 3 metropolitans, 14 archbishops, and 50 bishops; the latter had under them 37 vicars; all of them were of the monastic clergy. The management of Church affairs was in the hands of 62 'consistoria.' For Roman Catholics there was an Archbishop of Warsaw and another of Mohilev, each with six suffragan bishoprics. Of the suffragans of Mohilev one was of the Græco-Ruthenian rite, of which rite there was another bishop immediately subject to Rome.

Instruction.

According to official Soviet information, the highest educational authority in the country is centred in the Commissariat for Education, which has replaced the former Ministry of Popular Education and enlarged its scope so as to cover the whole field of popular education, having taken over (1) the State theatres, the Academy of Arts, the Imperial Musical Society, and various art and musical schools and institutions; (2) the educational institutions of a more or less specialised type which had been conducted by various other ministries and State departments; and (3) municipal and *zemstvo* schools. The Commissariat consists of three 'sections' and a few special 'departments,' the 'sections' being: (1) The Pedagogical Section, which includes departments of 'the Unified Labour School,' 'school reform,' technical schools, pre-school education, out-of-school education, and training of teachers; (2) the Scientific Section, which includes departments of scientific societies, higher educational institutions, and libraries; and (3) the Art Section, which includes departments of representative arts, preservation of monuments, music, theatres, and kinema.

The Budget of the Commissariat for the first nine months of 1922 has been fixed at 123,000,000 gold roubles, or 6.5 per cent. of the general Budget.

One of the principal reforms carried out by the Commissariat of Popular Education has been the introduction of 'the Unified Labour School,' which has superseded the various types of elementary and secondary schools of the pre-revolutionary period. The labour school has two grades, one for children from 8 to 12, and the other for children from 13 to 16.

Education is made obligatory and is provided by the State in all its schools and institutions free of charge. Children are also provided with hot lunches and all the necessary books and appliances. Co-education has been adopted in all schools. The principle of 'labour' education is applied differently in the schools of each grade; in the first grade children are taught to make their school self-supporting; in the second technical work is conducted as a part of the general industrial life of the country.

A feature of the educational work of the Commissariat is the establishment of a large number of kindergarten, children's clubs and colonies.

The following table shows the growth of the number of schools and pupils in Russia :—

Year	Elementary and Secondary Schools	Number Pupils
1911	47,855	3,060,000
1919	63,317	4,796,000
1921 (Jan. 1)	91,500	7,200,000

Previous to the revolution universities existed in the following places in the territory now included in the Soviet Republic and administered by the People's Commissariat for Education: Moscow (2), Petrograd, Kazan, Saratov, Tomsk, Perm, Irkutsk. The Universities of Dorpat and Warsaw, evacuated during the war, were reorganised in 1918 as the Voronezh and Don Universities, and in the same year another was set up at Nizhni-Novgorod. In 1919 universities were established at Yaroslav, Smolensk, Kostroma, Tambov, Astrakhan, Tashkent, Samara, Simbirsk, Orel; in 1920, at Ekaterinburg, Ekaterinodar, and Veliki Ustiug.

In addition to the institutes of various descriptions—medicine, economic, archaeological, veterinary, philological—existing before the revolution in various larger towns, others have been established for the study of medicine (Moscow, Petrograd), economics (Petrograd, Moscow), archaeology (Caucasus and Don), veterinary science (Petrograd, Saratov, Moscow, Novo-cherkassk), geography (Petrograd), philology (Petrograd), and radiology (Petrograd).

At the end of 1920 there existed in the Soviet Republic 57 higher pedagogical institutions with 10,305 students, 154 three-year pedagogical courses (35 provinces) with 18,410 students, and 90 one-year pedagogical courses (27 provinces) with 5,400 students. Of these 34,000 students, over 25,000 are maintained by the State.

In 1914 there existed 1,600 places of technical education, elementary and advanced, with 170,000 students; in 1919, 2,300, with 200,000 students; on Feb. 1, 1921, 3,758 schools with 293,263 students. These include 326 higher schools and polytechnics and 34 'workers' faculties' (preliminary courses attached to higher technical institutions) with 17,000 students.

The decree for the liquidation of illiteracy issued at the beginning of 1920 had resulted up to November, 1921, in the teaching to read and write of approximately 5,000,000, out of an estimated total of 30,000,000 illiterates. Only 15 per cent. of the Red Army are illiterate, as against the pre-war figure of 85 per cent.

In 1914 there existed about 1,700 secondary schools, with approximately 400,000 pupils; in 1920 there were (37 provinces) about 4,000 schools with 550,000 pupils. This represents about nine per cent. of the children of 'middle-school' age.

Justice and Crime.

All judges are elected by direct vote. Local courts consist of one permanent judge (elected) and two assessors (elected) on rotation from a list prepared by the Soviet. Appeals are made to the District and Government Congress of Local Judges.

The All-Russian Extraordinary Commission, which during the first four years of the Revolution was invested with special powers for combating

counter-revolution and sabotage, was abolished by decree in February, 1922, its *investigating* functions being handed over to the State Political Department of the Commissariat for Home Affairs. No extraordinary procedure in actual prosecution of offenders now exists. Major crimes are dealt with by provincial revolutionary tribunals, which are of a permanent character.

A recent decree institutes a Public Procurer of the Republic, with provincial procureurs directly subordinated to him. The function of this organisation is to supervise the correct working of the judiciary and the application of the laws.

Finance.

The current Budget is for a period of nine months ending September 30, 1922. In order to secure definite monetary values throughout the estimates, all receipts and expenditure have been converted into their equivalents in pre-war values.

The Budget totals are :—

	Gold roubles
Expenditure	1,878,000,000
Revenue	1,648,000,000
Deficit	230,000,000

The estimated revenue is therefore 87·7 per cent. of the expenditure, and the deficit, which will be met by note issues, is 12·3 per cent. It is hoped that if the harvest for 1922 is moderately good, the Budget for 1922-23 will mark the end of the issues of paper currency to meet deficits.

Details of expenditure for the first nine months of 1922 are shown as follows :—

Government Department	Million gold roubles	Per cent. of total
Commissariat for Home Affairs	60·0	3·2
" " Nationalities	1·4	0·1
" " Finance	40·0	2·1
" " Justice	23·2	1·2
" " Foreign Affairs	2·0	0·1
" " Education	123·0	6·5
" " Transport	278·0	14·8
" " Agriculture	53·0	2·8
" " War	556·0	29·6
" " Marine	72·0	3·8
" " Workers' and Peasants' Inspection	2·5	0·1
" " Labour	3·8	0·2
" " Health	118·0	6·3
" " Social Welfare	48·8	2·6
" " Food	140·0	7·4
" " Foreign Trade	142·0	7·5
" " Posts and Telegraphs	26·0	1·4
A.R.C.E.C. and Council of Peoples' Commissaries	6·5	0·3
Supreme Economic Council	154·0	8·2
Central Statistical Board	4·8	0·3
Pensions and Insurance	14·0	0·7
Reserves of Council of People's Commissaries	12·0	0·6

The following table shows the estimated revenue for the first nine months of 1922 (in millions of gold roubles):—Taxes and customs duties, 75 ;

transport, posts and telegraphs, 99; timber, 78; state industries, 903; food tax, 426; deficit—to be met by note issues, 230. The more important industries are expected to yield (in millions of gold roubles):—Timber, 78; coal, oil, and paint, 159; gold, salt ores, 16; metals, 139; textiles, 149; chemical, 49; leather, 93.

On September 1, 1917, the total indebtedness of Russia amounted to 32,300 million roubles, made up as follows:—Pre-war debt, 8,800 million roubles; seven internal war loans, 10,500 million roubles; loans contracted abroad, 8,000 million roubles; short-dated loans, 5,000 million roubles. On March 31, 1921, the indebtedness of Russia to Great Britain was £561,402,000 (excluding interest since December 31, 1918).

Defence.

I. ARMY.

In the declaration issued by the Chairman of the Council of the People's Commissaries on November 15, 1917, it was stated that 'soldiers and sailors are delivered from the power of autocratic generals, because from henceforth generals will be elected and can be changed.' All rank, outward distinction and titles have been abolished and all officers are to be elected.

By a decree of February 1, 1918, the Government established a Workers and Peasants Red Army of volunteers, and under the pressure of military events the organisation and discipline of that army steadily improved. A large number of regular officers of the old Russian army joined the Red Army either voluntarily or under compulsion, an efficient general staff was organised for planning and executing military operations, and most of the former rules of military discipline were gradually reintroduced. Wherever former officers were suspected of lukewarm sympathies with their new position, a civilian 'political Commissary' was attached to them to supervise their work and organise political propaganda in the unit for which he was responsible. Many officers in the course of the civil war by their activities justified the withdrawal of the Commissary, in other cases the Commissary himself acquired the necessary military experience to enable him to take over command. There are still a large number of units, however, with the dual organisation in the Red Army.

The Red Army is supplemented by the militia, organised on a basis of universal military service. Training begins at the age of 18, consisting of a preliminary course of 96 hours, lasting 1½ months, and a supplementary course of 280 hours, lasting 28 days. For militia purposes the territory of the Republic is divided into 93 regimental districts, sub-divided into battalion, company, and platoon subdistricts. Each of the latter consists of several 'training points,' usually an urban centre or a factory: there are 28,000, of these in all.

In December, 1920, according to M. Trotsky's report at the Ninth Soviet Congress (December, 1921), the strength of the Red Army was 5,300,000. More peaceful conditions have permitted its reduction to a strength of 1,595,000, of whom 225,000 are on guard and base duties. The Red Army at present comprises (peace footing) 95 infantry divisions and 49 cavalry brigades, only the 1899, 1900, and 1901 classes being actually with the colours. About two-thirds of the officers come from the worker and peasant class, 43 per cent. have had no specialist military training, and 10 per cent. have passed through Soviet training schools and courses.

II. NAVY.

It is not possible to say much that is definite concerning the Russian Navy. Certainly it is not a negligible force. The Soviet Government has shown so much ability in reconstructing its Army, that the Fleet may yet be made effective. Some construction and reconstruction of the flotillas has gone on both in the Baltic and the Black Seas. Possibly the Dreadnoughts, *Gangut* and *Poltava*, in the Baltic may be maintained in condition. With two others they appeared in the Admiralty Return 164, without comment. There are also four battle-cruisers, two launched in 1915 and two in 1917, upon which the Admiralty say work has been 'stopped temporarily,' but they are probably of a more useful type than the battleships, and may yet be completed. In addition were 3 older battleships, 5 armoured cruisers, 8 light cruisers (4 not completed), and about 80 destroyers, 30 of them built since 1914. Of the pre-war submarines only 5 remain, but 14 were built between 1914 and 1917.

In the Black Sea practically nothing remains. In April, 1919, by the action of secret hostile agents the main machinery was wrecked by explosive means in five of the battleships, and General Wrangel's force, comprising one Dreadnought, one pre-Dreadnought, 2 cruisers, 10 destroyers, and 4 submarines arrived at Bizerta to be placed under French protection. In addition there are in the Black Sea several light cruisers building, and some destroyers and modern submarines. The battleship *Demokratiya* at Nikolaieff has not been completed.

State dockyards were at Nevsky, New Admiralty and Galernyi Ostrov, Petrograd; Kronstadt, Sevastopol, and Vladivostok. A semi-private yard existed at the Baltic works (Petrograd). Guns were made at the Putiloff steel works.

The following table gives the ships remaining of the armour-clad fleet and principal cruisers of the Baltic and the Black Sea Fleets, the new names being inserted.

BALTIC FLEET.

Date of Launch	Name	Displacement	Horse-power	Speed	Officers and Men	Main armament
<i>Dreadnoughts.</i>						
1911	{ <i>Sevastopol</i> <i>Poltava</i> <i>Gangut</i> <i>Petropavlovsk</i> }	23,000	42,000	23	59—1,006	12 12in.; 16 4·8in.

The Sevastopol and Petropavlovsk suffered serious damage, and they probably possess no value to the Fleet.

Battle Cruisers.

1915	{ <i>Borodino</i> <i>Navarin</i> <i>Ismail</i> <i>Kinburn</i> }	32,200	66,000	27	—	12 14in.; 21 5·1in.
------	--	--------	--------	----	---	---------------------

These ships have not been completed, and building was temporarily suspended.

Pre-Dreadnoughts

1907	<i>Respublika</i>	17,400	17,000	18	33—900	4 12in.; 14 8in.; 12 4·8in
1901	<i>Grazhdanin</i>	12,912	15,300	18	29—745	4 12in.; 20 6in.

Date of Launch	Name	Displacement	Horse-power	Speed	Officers and Men	Main armament
----------------	------	--------------	-------------	-------	------------------	---------------

Armoured Cruisers.

1906	Rurik . . .	16,933	20,856	21	29—870	8 8in. ; 20 4.8in.
1899	Gromobol . .	13,265	14,500	19	23—840	4 8in. ; 22 Cin.
1896	Rossia . . .	13,060	14,500	20.4	23—805	4 8in. ; 22 6in.
1906	Adm. Makaraff .	7,890	16,500	21	23—870	2 8in. ; 8 6in.
1907	Bayan . . .	7,901	16,500	21	23—545	2 8in. ; 8 6in.

Light Cruisers.

1901	Bogatyr . . .	7,428	19,500	23	23—545	12 6in.
1900	Aurora . . .	6,731	11,610	19	23—550	10 6in.
1899	Diana . . .	5,905	20,420	22.5	23—475	12 6in.
1900	Askold . . .					
	Adm. Boutakoff .					
1915	Adm. Spicidoff .	7,600	55,000	30	—	16 5.1in.
	Adm. Greig . . .					
	Sciutlana . . .					

Destroyers, 82 ; Submarines, about 40.

BLACK SEA FLEET.*Dreadnoughts.*

1914	Volya . . .	22,600	26,500	21	—	12 12in. ; 20 5.2in.
1916	Demokratia . .	27,300	29,700	21	—	12 12in. ; 20 5.2in.

*Pre-Dreadnoughts.*¹

1906	Evstafy . . .	12,840	10,600	16	32—847	4 12in. ; 4 8in. ; 12 6in.
1906	Ioann Zlatoust .					
1900	Zoretza Svobodu	12,582	10,600	16	26—715	4 12in. ; 16 6in.

Light Cruisers.

1915	Admiral Lazareff	7,600	55,000	32	—	16 5.1in.
1917	„ Nakhimoff					
1917	„ Istomine					
1917	„ Korniloff					

Destroyers, 6, and 10 now interned at Bizerta ; submarines, about 10.

The Dreadnought *General Alexeieff* escaped from the Black Sea and was taken under French protection at Bizerta with other vessels indicated above.

Production and Industry.

The economic system inaugurated by the Soviet Government is based on the conception of State ownership and control of the principal means of production, distribution and exchange. During the first eight months after the November revolution the nationalisation of various industrial and trading enterprises was effected largely by local Soviets, which followed no definite plan. This led to a number of working undertakings being brought to a standstill, as the necessary administrative machinery was either entirely lacking or inadequate for coping with the immense task of setting up a public organisation of industry. To remedy the situation and introduce

¹ All these ships are ineffective, also the *Tri Sviatitelia*, their engines having been destroyed by explosion.

a greater unity and efficiency of method the Soviet Government issued a decree, dated June 28, 1918, which specified the conditions governing the nationalisation of private enterprises. Thus, only large and well-equipped factories and works were to be taken over by the State, the smaller undertakings being left in the hands of their owners. But even those liable to nationalisation were not to be taken over until a proper organisation for running them had been established. On April 1, 1920, out of 6,775 industrial establishments on the territory of Soviet Russia, employing 1,185,542 workpeople, there had been nationalised 4,141, employing 983,049 workpeople.

The following table shows the extent of production in 1913 and 1920 :—

	1913	1920		1913	1920
Coal (thousands of poods)	1,738,469	4,64,499	Lamps (thousands)	2,564	258
Oil " " "	564,300	233,900	Accumulators (poods)	297,748	25,924
Peat " " "	55,000	92,803	Sulphuric Acid "	7,688,128	691,387
Ores " " "	638,400	10,400	Caustic Soda "	2,633,875	2,532
Salt " " "	121,822	37,256	Sulphates "	3,821,880	662,066
Cast Iron " " "	257,400	6,230	Cotton Yarn (thousands of poods)	16,000	825
Copper " " "	2,057	—	Woolen Yarn (thousands of poods)	2,400	560
Cement " " barrels	12,167	363	Hides (thousands)	16,000	6,132
Bricks (thousands)	2,000,000	43,000	Paper (thousands of poods)	9,100	2,260
Locomotives . . .	609	90	Sugar " " "	82,806	5,542
Trucks	20,492	854	Tobacco " " lb.	21,943	9,294
Ploughs	667,000	88,838			
Electrical Machines, Dynamos, &c.	678,600	36,700			

All industry was controlled through the Supreme Economic Council, with about 50 industrial departments and its local organs.

Side by side with this policy was developed that of compulsory requisitioning of grain from the peasants, to meet the primary requirements of the town population and the Army. Beginning as an organised series of requisitions to meet the food shortage in 1918, it was rapidly developed through the Food Commissariat into a regular series of *corn levies*, distributed amongst provinces according to harvest statistics, and redistributed amongst the several villages, which were made collectively responsible for their quotas. In 1917-18, 47·5 million poods were collected; in 1918-19, 107·9 millions; in 1919-20, 212·5 millions; in 1920-21, 283·8 millions.

The cultivated area by the end of this period had contracted considerably, as is shown by the following figures, covering European and Asiatic Russia (excluding the Ukraine):—

	1913	1916	1920
Thousands of Dessiatines.			
Rye	19,782·4	17,094·4	13,053·6
Wheat	16,442·4	14,930·3	11,518·1
Barley	5,781·1	5,562·3	2,324·6
Oats	13,339·8	13,025·3	8,407·4
Potatoes	2,268·9	1,850·9	990·1
Flax	1,208·4	1,288·5	609·8
Hemp	472·4	429·1	132·6
Fodders	1,260·4	1,253·3	732·8

The number of cattle had also considerably decreased :—

	1916	1920	1921
Horses	18,791,900	14,732,500	—
Cows	17,000,000	16,500,000	13,500,000
Sheep	28,700,000	20,400,000	18,200,000
Pigs	13,000,000	7,800,000	6,500,000

In March, 1921, there was introduced the 'new economic policy,' as it is popularly called, although in essence it amounts to the relaxation of most of the restrictions imposed by the military conditions between 1918 and 1920. Its main features are (1) the replacement of the corn levies (423 million poods) by a much smaller food tax (240 million poods), collected from the individual producer; (2) the authorisation of free trading in food and other necessities within the territory of the Republic; (3) the concentration of State control on the most important of the nationalised enterprises, and their combination for the most part into State autonomous trusts (over 60), under the general direction of the Supreme Economic Council; (4) the leasing of the vast majority of nationalised and State-controlled enterprises. (Out of 10,276 enterprises leased up to the end of 1921, 58 per cent. were taken by private individuals, 36·5 per cent. by co-operatives and workers 'astels,' and 5·5 per cent. by local Soviet institutions.) (5) The reduction of the number of persons on the State rationing list (from 38 millions in March, 1921, to 8 millions in November), and the conclusion of a number of agreements for 'collective payment' of the remaining employees and workers, the basic ration adopted being that of the living wage, and the total varying with output; (6) the encouragement of co-operation, locally and nationally, and the institution of a State Bank.

The statistics of the autumn sowing campaign of 1921, carried out after approximately six months of the new economic policy are shown as follows :—

	1919	1920	1921
Thousands of Dessiatines			
Famine area	4,622·4	4,227·2	3,056·0
Partial famine area	1,249·5	1,157·5	1,183·3
Producing non-famine area	2,242·4	2,080·7	2,560·7
Consuming area	1,059·7	986·0	1,217·4

In 1921, the harvest of Soviet Russia yielded 20,636,000 tons of grain, 8,611,000 tons of potatoes, and 31,299,000 tons of hay.

In 1921, 1,080,000 acres were sown with flax, and the yield was 95,000 tons.

Salt production: 1918, 445,000 tons; 1919, 163,000 tons; 1920, 350,000 tons.

Commerce.

The following table gives the exports and imports of Russia for six

years in the trade with Europe, Asia, and Finland (bullion not included), in millions of roubles :—

Years	Imports	Exports	Years	Imports	Exports
1911 .	1,161·7	1,591·4	1914 .	1,098·0	956·1
1912 .	1,171·8	1,518·9	1915 .	1,114·0	397·2
1913 .	1,374·0	1,520·1	1916 .	2,750·0	575·0

After three years, in which there was no foreign trade, Russia's trade began again early in 1920, following the conclusion of peace with Esthonia. The principal imports were agricultural machinery, railway spare parts, drugs, cloth, and foodstuffs. The principal exports were timber, flax, hemp, and platinum.

The total value of Russian exports for 1921, calculated in pre-war prices, was 20 million gold roubles. The following is an analysis of the total exports for 1921 :—

Category	Exports in tons	Per cent. of total exports	Value in roubles at 1913 prices	Percentage value of total exports
Foodstuffs	9,700	4·5	1,771,400	8·7
Raw and partially manufactured material	205,700	95·3	17,994,700	88·7
Mineral products	100	0·0	18,500	0·1
Manufactured articles	500	0·2	498,600	2·5
Total	216,000	100·0	20,283,200	100·0

The chief market for Russian exports was Great Britain, with 47·9 per cent. of total exports ; 22·7 per cent. went to Latvia ; 12·9 per cent. to Norway ; and 5 per cent. to Germany.

The imports in 1921 amounted to 920,000 tons, valued at 248,551,000 gold roubles.

For pre-war trade of Russia, see THE STATESMAN'S YEAR-BOOK for 1920, pp. 1208 and 1209.

The chief articles of import from Russia into the United Kingdom and of export (domestic produce and manufactures) from the United Kingdom to Russia in 1920 were, according to the Board of Trade Returns :—Imports : Barley, 194,928*l.* ; tobacco, 1,460,254*l.* ; flax, 4,090,005*l.* ; manganese ore, 844,162*l.* ; paper, 3,398,818*l.* ; sawn timber, 11,873,033*l.* ; pit props, 2,739,216*l.* Exports : Fish, 358,168*l.* ; coal, 410,178*l.* ; boots, 327,443*l.* ; cotton, 1,234,079*l.* ; woollens, 2,693,200*l.*

Total trade between Russia and the United Kingdom in thousands of pounds for 5 years (Board of Trade returns) :—

	1917	1918	1919	1920	1921
Imports from Russia into U. Kingdom	17,936	6,711	16,370	33,522	2,700
Exports to Russia from U. Kingdom	48,736	298	12,993	11,792	2,173

Internal Communications.

Russian railway history began in 1836. In European Russia there are 153,782 miles of rivers, canals and lakes, 20,670 miles being navigable for steamers, 7,482 for small sailing vessels, 88,739 for rafts. In Asiatic Russia there are 86,422 miles of rivers, canals, and lakes, 21,421 miles being navigable for steamers, 8,678 for small sailing vessels, 33,224 for rafts.

The railway-net open for traffic on January 1, 1913, had a length of 46,573 miles, of which 35,987 miles were in European Russia, 10,586 miles in Asiatic Russia. On January 1, 1921, the length of the railways was 29,909 miles.

Banking.

The current accounts of the State Bank on January 23, 1922, showed balances amounting to 1,324,535,000 roubles, which compares with 1,839,000,000 roubles on November 16, 1921, when the bank began operations. The greater part of the balances at January 23 belonged to State departments and enterprises, which accounted for 1,287,468,000,000 roubles. Other important groups were :—

	Roubles
Co-operative Organisations.	11,315,000,000
Trade Unions	5,872,000,000
Private Businesses, &c.	19,769,000,000

The growth of the account of private businesses and individuals was as under (in million roubles) :—

	Number of Accounts	Amount of Balances	Average Balance
December 16, 1921	157	6,859	43.7
January 23, 1922	231	19,769	81.6

Money, Weights, and Measures.

MONEY.

The legal unit of money is the silver *Rouble* of 100 *Kopecks*. It was of the value of 2s. 1¹/₂d., but in official calculations 9.46 roubles were taken as equal to the pound sterling. Exact equivalents: 1,000,000 roubles = £105,735 7s.

WEIGHTS AND MEASURES.

- | | |
|--|--|
| 1 <i>Verst</i> (500 <i>sajènes</i>) | = 3,500 ft., or two-thirds of a statute mile (0.662879). |
| 1 <i>Sajène</i> (3 <i>arshins</i>) | = 7 feet English. |
| 1 <i>Arshin</i> (16 <i>vershoks</i>) | = 28 inches |
| 1 <i>Square verst</i> | = 0.439408 square mile. |
| 1 <i>Dessiatine</i> | = 2.69972 English acres. |
| 1 <i>Pound</i> (96 <i>zolotniks</i> = 32 <i>lots</i>) | = $\frac{1}{16}$ of a pound English (0.0625 lb.). |
| | { = 36 lbs. English. |
| 1 <i>Pood</i> (40 <i>pounds</i>) | { = 0.32243578 cwt. |
| | { = 0.016121789 tons. |

1 *Vedro* (8 *shloffs*) . . . = 2½ imperial gallons (2·7056).

1 *Chetvert* (8 *Chetveriks*) . . = 5·7719 imperial bushels.

The Soviet Government issued a decree adopting the Gregorian Calendar as from February 14, 1918.

RUSSIAN DEPENDENCIES IN ASIA.

Bokhara and Khiva in Central Asia were before the Revolution under the suzerainty of Russia:—

BOKHARA.

(BOKHARAN PEOPLE'S SOVIET REPUBLIC.)

A State in Central Asia, lying between N. latitude $41^{\circ} 30'$ and $36^{\circ} 40'$, and between E. longitude $61^{\circ} 40'$ and 73° , bounded on the north by the Russian provinces of Syr-Daria and Samarkand, on the east by the province of Ferghana, on the south by Afghanistan, and on the south-west by the Russian Trans-Caspian province and the Khanat of Khiva.

The modern State of Bokhara was founded by the Usbegs in the fifteenth century, after the power of the Golden Horde had been crushed by Tamerlane. The dynasty of Manguts, to which the present ruler belongs, dates from the end of the 18th century. Mir Muza'far-ed-din in 1866 proclaimed a holy war against the Russians, who thereupon invaded his dominions, and forced him to sign a treaty ceding the territory now forming the Russian district of Syr Daria, to consent to the demand for a war indemnity, and to permit Russian trade. In 1873 a further treaty was signed, in virtue of which no foreigner was to be admitted to Bokhara without a Russian passport, and the State became practically a Russian dependency.

Amirs of Bokhara.—Sayid Ameer Hyder, 1799–1826; Mir Hussein, 1826; Mir Omir, 1826–27; Mir Nasrulla, 1827–60; Muza'far-ed-din, 1860–85; Amir Sayid Abdul Ahad, 1885–1911. Sayid Mir Alim Khan, 1911–1919.

On August 30, 1919, a revolution took place, the Amir being expelled and a Soviet Government (Council of People's Nazirs) being set up, of which the Chairman is M. Hodjaye'v. The Government has concluded a military and political agreement with the Russian Government.

Area 79,000 square miles, population about 3,000,000. Chief towns: Bokhara, about 75,000; Karshi, 25,000; Khuzar, Shahr-i-Zabz, Hissar, 10,000; Charjui, Karakul, Kermine.

The religion is Mahomedan.

Bokhara produces corn, fruit, silk, tobacco, cotton, and hemp; and breeds goats, sheep, horses, and camels. Gold, salt, alum, and sulphur are the chief minerals found in the country.

The yearly imports of green tea, mostly from India, are said to amount to 1,125 tons. The imports from India also include indigo, Dacca muslins, drugs, shawls, and kincohs. Bokhara exports raw silk to India, the quantity exported in one year being estimated at 34 tons. By the treaty of 1873 all merchandise belonging to Russian traders, whether imported or exported, pays a duty of 2½ per cent. *ad valorem*. No other tax or import duty can be levied on Russian goods, which are also exempt from all transit duty.

The Russian Trans-Caspian Railway runs through Bokhara from Charjui, on the Oxus, to a station within a few miles of the capital, and thence to Tashkent; the distance from Charjui to the Russian frontier station of Katty Kurghan being about 186 miles. There is steam navigation on the Oxus.

There is a telegraph line from Tashkent to Bokhara, the capital.

Russian paper roubles are current everywhere. The Bokhara silver tenga is valued at 5d.

KHIVA.

(KHORASMIAN PEOPLE'S SOVIET REPUBLIC.)

A State in Central Asia, lying between N. latitude 43° 40' and 40°, and E. longitude 57° and 62° 20'. Bounded on the north by the Aral Sea, on the east by the river Oxus, on the south and west by the Russian Trans-Caspian province.

Russian relations with the Khanate of Khiva—an Usbeg State, founded, like that of Bokhara, on the ruins of Tamerlane's Central Asian Empire—date from the beginning of the 18th century, when, according to Russian writers, the Khivan Khans first acknowledged the Tsar's supremacy. In 1872, on the pretext that the Khivans had aided the rebellious Kirghiz, an expedition advanced to the capital, bombarded the fortifications, and compelled the Khan to sign a treaty which put the Khanate under Russian control. A war indemnity of about 274,000*l.* was also exacted.

A Soviet Government is in power, and concluded a treaty of amity with the Russian Government on September 30, 1920.

Area, 24,000 square miles; population estimated at 519,000, including 400,000 nomad Turcomans. Chief towns: Khiva, 4,000–5,000; New Urgenj, 3,000; Hazar'Asp, and Kungrad.

The religion is Mahomedan. Army, about 2,000 men.

The chief commercial products are cotton and silk.

ARMENIA.

(SOCIALIST SOVIET REPUBLIC OF ARMENIA.)

Constitution and Government.—The Armenian Republic of Erivan was constituted in May, 1918, having, in common with the Georgians and the Tartars, persuaded the Turks and the Germans to recognise their independence. The territory of the Russian Armenian Republic consists of the south-eastern frontier districts of Transcaucasia, which formerly belonged to the Russian Empire.

In November, 1917, Transcaucasia refused to recognise the Bolsheviks and constituted a Transcaucasian Commission as the Supreme Authority in the country. In February, 1918, the 'Seim,' or Diet, of Transcaucasia, convoked in the city of Tiflis, formed a Provisional Government. On April 22, 1918, the Transcaucasian Diet declared its *de jure* independence of Russia and called itself the Federal Democratic Republic of Transcaucasia. The three main peoples in Transcaucasia—the Armenians, the Georgians, and the Tartars—were parties to this Federation, each holding their own respective territories. This Federal Republic lasted only five weeks owing, mainly, to the divergent political tendencies of these three nationalities. On May 26, 1918, the Transcaucasian Republic was dissolved and Georgia declared its independence, as also did Armenia. Its *de facto* independence was recognised by the Allies in January, 1920, and its *de jure* recognition was embodied in the Treaty of Sévres signed in August, 1920, between the Allied Powers and Turkey.

On April 2, 1921, Armenia was proclaimed a Soviet Republic. The Chairman of the Council of People's Commissaries is M. Miasnikoff, and the People's Commissary for Foreign Affairs M. Mravian.

Area and Population.—The area of the State is 15,240 square miles and the population 1,214,391. Erivan is the Capital; population, 90,000.

By an agreement between the Caucasian States in the summer of 1921, Batum has been declared a free port.

Defence.—The Armenian Red Army at present is formed on the Russian system; it consists of all branches of service.

Books of Reference concerning Armenia.

AZERBAIJAN.

(AZERBAIJAN SOCIALIST SOVIET REPUBLIC.)

In October, 1917, the peoples of Transcaucasia, Azerbaijan, Georgia, and Armenia united to form a federation of republics under one Government, with a House of Representatives, or *Seim*. Serious disagreement arose and the federation broke up, Azerbaijan declaring its independence on May 28, 1918. The National Council or Constituent Assembly formed a Government of twelve Ministers. The British Government recognised this Government as a *de facto* administration in January, 1920. In April, 1920, the Bolshevik party overthrew the existing Government and broke off all relations with the Entente and 'other enemies of Soviet Russia.' On September 30, 1920, a military and economic treaty was concluded between Azerbaijan and Russia.

The Chairman of the Azerbaijan Soviet Government is **M. Narimanov**.

It is claimed for Azerbaijan that it consists mainly of the two former Russian provinces of Baku and Yelisavetpol, and that as at present constituted the territory is bounded on the east by the Caspian Sea, on the north by Daghestan, Northern Caucasus and Georgia, on the west by Georgia and Armenia, on the south by Persia. The area is 33,970 square miles, and the population, according to official Russian statistics, is estimated at 2,096,973. Moslems represent about 75 per cent. of the population.

The capital of Azerbaijan is Baku (population 250,000) the centre of the great petroleum industry.

One of the most important industries of Azerbaijan is the petroleum industry of which Baku is the centre. Other industries capable of development are cotton, sericulture, fisheries, viticulture, cereals, cattle breeding.

There are railways crossing the country westward and northward from Baku, and others under construction to the south-west.

Reference.

Statements of Claims with accompanying documents, maps, &c., presented by the Azerbaijan Peace Delegation to the Peace Conference at Paris.

UKRAINE.

(UKRAINIAN SOCIALIST SOVIET REPUBLIC.)

It is claimed that the first Ukrainian State was founded in Kieff in the ninth century. In the fourteenth century the eastern portion was conquered by the Lithuanians and the western portion by the Poles. Eventually the whole of the Ukraine was incorporated with Poland. In 1648 the Ukrainians threw off the Polish yoke, and in 1654 Chmelnitzki concluded the Treaty of Pereyaslav with the Muscovite Tsars, according to which Ukraine east of the Dnieper was united to Muscovy, while Galicia passed over to Austria in 1795. The Treaty of Pereyaslav formed the constitution of the Ukrainian State until the death of the Hetman Daniel Apostol in 1734.

The independence of Russian Ukraine was proclaimed on November 21, 1917, and that of Austrian Ukraine on November 19, 1918. On December 14, 1918, the Government of Ukraine, a Directory of five members, was established as a Provisional Government, with a Ministerial Cabinet of 14, until a Parliament representing the whole nation has been elected; and on January 3, 1919, the union of 'Eastern' (Russian) and 'Western' (Austrian) Ukraine took place.

In the Treaty of Riga (March 19, 1921), between Soviet Russia and Poland, both sides agreed to recognise the independence of the Ukraine. In 1920 a Soviet Government was established, which concluded a military and economic alliance with Russia on December 28, 1920, establishing Joint People's Commissariats for Transport, Industry, Foreign Trade, Finance, Labour, War and Marine, and Posts and Telegraphs.

The Chairman of the Council of People's Commissaries is M. Rakovsky.

Area and Population.—The area of the Ukraine is 174,510 square miles, and the population 26,000,000.

Religion.—The overwhelming mass of the people belong to the Ukrainian-Orthodox Church, which differs but slightly from the Russian-Orthodox.

Production and Industry.—The land may be divided as follows:—Arable land, 65 per cent.; forests, 10 per cent.; pasturage, 12 per cent.; other productive soil, 6 per cent.; and sterile soil, 6 per cent. The country produces wheat, barley, rye, oats, beet, and potatoes. The principal industry in the Ukraine is the manufacture of sugar.

Commerce.—Of the exports, cereals amounted to 64 per cent. and sugar to 22 per cent. Almost the entire stock of corn is exported to Western Europe.

Manufactured goods (textiles) form more than half of the total of products imported into the Ukraine.

Internal Communications.—There are approximately 11,070 miles of railway lines in the Ukraine. About two-thirds of the railway system belongs to the State. About 2,500 miles are under construction.

SALVADOR.

(REPUBLICA DE EL SALVADOR.)

Constitution and Government.—In 1839 the Central American Federation, which had comprised the States of Guatemala, Salvador, Honduras, Nicaragua, and Costa Rica, was dissolved, and Salvador became an independent Republic. Efforts were made in 1921 to re-establish the Central American Republic but these failed (*see* Introductory pages to this volume). The Constitution of San Salvador, proclaimed in 1824 under the Federation, and modified in 1859, 1864, 1871, 1872, 1880, 1883, and 1886, vests the legislative power in a Congress of 42 Deputies, 3 for each department. The election is for one year, and by universal suffrage. The executive is in the hands of a President, whose tenure of office is limited to four years.

President of the Republic.—Jorge Meléndez. Term of office, from March 1, 1919, to March 1, 1923. Born April 15, 1871.

Vice-President.—Dr. Alfonso Quinóniz Molina.

The administrative affairs of the Republic are carried on, under the President, by a ministry of four members, having charge of the departments of:—Foreign relations, Justice, and Instruction; War and Marine; Interior, Government and Agriculture; Finance, Charities, and Public Credit.

Area and Population.—The area of the Republic is 34,155 square kilometres, or 13,183 English square miles, divided into 14 departments. Estimated population (Jan. 1, 1922), 1,501,000. Aboriginal and mixed races constitute the bulk of the population, Ladinos or Mestizos being returned as numbering 772,100, and Indians 234,648. The capital is San Salvador, with 80,756 inhabitants. Other towns are Santa Ana, population 60,679; San Miguel, 30,406; Nueva San Salvador, 23,291; San Vicente, 26,831; Sonsonate, 14,752.

On June 7, 1917, an earthquake and volcanic eruption did much damage to the capital, and partially destroyed the towns of Nájapa (6,012 inhabitants), Quetzaltepeque (15,804 inhabitants), and Armenia (13,291 inhabitants). A still greater earthquake overtook the city of San Salvador on April 28, 1919.

The number of births in 1920 was 54,775; the number of deaths 31,440; the number of marriages, 3,596. Of the births in 1920, 27,999 were males, and 26,976 were females. Of the births, 41·3 per cent. were legitimate, and 58·7 per cent. illegitimate. Of the deaths, 16,495 were males and 14,975 females.

Religion, Instruction and Justice.—The dominant religion is Roman Catholicism. There is an archbishop in San Salvador and a bishop at Santa Ana and San Miguel respectively. Education is free and obligatory. There were in Salvador, in 1920, 805 primary schools, with 1,613 teachers and 49,406 enrolled pupils. There were also 27 higher schools (including 2 normal and 3 technical schools) with 2,345 pupils in 1916, and a National University with faculties of jurisprudence, medicine, pharmacy, dentistry, and engineering. Expenditure on public instruction in 1919, 134,8507.

Justice is administered by the Supreme Court of Justice, one court of third instance (in the capital) and several courts of first and second instance, besides a number of minor courts. All judges of second and third instance are elected by the National Assembly for a term of 2 years, while the judges of first instance are appointed by the Supreme Court for a similar period. In 1918, 2,005 crimes of all kinds were committed in the Republic.

Finance.—Revenue and expenditure for five years :—

	1917-18	1918-19	1919-20	1920-21	1921-22 ¹
	£	£	£	£	£
Revenue	1,998,810	1,382,644	1,829,035	2,945,234	1,793,000
Expenditure . . .	1,013,342	1,874,079	1,671,990	3,245,516	1,793,000

¹ Estimates.

The total outstanding debt on December 31, 1920, was 29,232,313 colones, of which 15,793,913 colones were internal debt, and 13,348,400 colones external debt.

Defence.—The army may be divided into three parts : (1) available force, 78 officers, 512 petty officers, and 15,554 men ; (2) forces that can be made available at short notice, 49 officers, 356 petty officers, and 4,000 men ; (3) reserve force, 251 officers, 1,743 petty officers, and 15,554 men. Total, 378 officers, 2,611 petty officers, and 75,705 men. In case of war, military service is compulsory from 18 to 50 years of age.

Production and Commerce.—The population of Salvador is largely engaged in agriculture. The chief product is coffee, under which in 1920 there were about 183,332 acres, with some 100,000,000 trees. Other agricultural products are cheese, cacao, rubber, tobacco, sugar. Efforts are made towards wheat cultivation. In 1908 there were 284,013 head of cattle, 74,336 horses, 21,457 sheep and 422,980 pigs. In the national forests are found dye woods and such hard woods as mahogany, cedar, and walnut. Balsam trees also abound. The mineral wealth of the Republic includes gold, silver, copper, iron, mercury. Mining operations of gold and silver are growing in importance, especially in the departments of Morazán, San Miguel, and La Unión.

The imports subject to duty and the exports have been as follows in five years (in pounds sterling) :—

	1916	1917	1918	1919	1920
	£	£	£	£	£
Imports	461,035	1,873,854	1,228,539	1,876,025	3,297,000
Exports	2,176,000	2,140,053	2,479,960	2,115,521	4,621,100

The trade is chiefly with the United States, the United Kingdom, and France. The chief imports in 1919 were cottons, hardware, flour, drugs and chemical products. The chief exports in 1919 were coffee, 33,052,910 kilos, valued at 10,467,715 gold dollars; indigo 325,627 kilos, valued at 769,054 gold dollars; sugar, 3,768,756 kilos, valued at 771,490 gold dollars. Other exports are silver, balsam, hemp, hides, rubber and *henequén*. Of the total coffee exported, 53·3 per cent. went to the United States; 4·51 per cent. to Norway; 2 per cent. to Holland; 29 per cent. to France; and 1·65 per cent. to Great Britain.

Total trade between Salvador and the U.K. (Board of Trade Returns) for 5 years:—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Salvador to U. K.	48,475	12,432	62,889	234,069	45,846
Exports to Salvador from U. K.	429,783	291,756	249,877	685,491	256,309

Shipping and Communications.—In 1920, 520 steamers entered at the ports of the Republic, with a tonnage of 657,396.

A railway connects the port of Acajutla with Santa Ana and La Ceiba; with this system San Salvador, the capital, is connected—a distance of 65 miles. Another line (the International Railways of Central America) runs from the eastern to the western boundary of Salvador. The first section (La Union to San Miguel, 40 miles), was completed in 1912; the second (San Miguel to Zacatecoluca and San Vicente) in 1915; the third (San Vicente to Cojutepeque) in 1920. The length of the line is at present 133 miles; when completed it will be 151 miles. Another short railway connects the capital with Santa Tecla. Total length of railway open (1918), 213 miles all of narrow gauge. There are 1,476 miles of good road in the Republic.

In 1919 there were 162 post offices, which received 3,035,718 pieces of mail matter and despatched 4,318,139 pieces. In 1919 there were 229 telegraph offices and 2,351 miles of telegraph wire, over which passed 1,516,333 telegrams. There are 220 telephone stations and 1,321 miles of telephone line. Three wireless stations are in operation in San Salvador.

Money, Weights, and Measures.

MONEY.

There are 3 banks of issue, the Banco Salvadoreño (paid-up capital, 3,500,000 pesos silver), Banco Occidental (paid-up capital, 4,000,000 pesos silver), and Banco Agricola Commercial (paid-up capital, 1,300,000 pesos silver). On December 31, 1920, they had notes in circulation to the value of 8,219,410 colones.

In August, 1897, a law was passed adopting the gold standard. The import of debased silver coin is prohibited. In October, 1899, the Salvador mint, formerly the property of a company, was transferred to the Government.

According to the law of July 16, 1920, the theoretical monetary unit of Salvador is the *colon*, a coin containing 836 milligrams of gold·900 milésimos fine. The colon, which represents 100 centavos, will be issued in denominations of 5, 10, 20, and 40 colones. Auxiliary silver coins are to be minted in denominations of 20, 50, and 100 centavos each, and nickel coins in denominations of 1, 3, 5, and 10 centavos each.

National gold coins and gold coins of the United States of all denominations are unlimited legal tender, the United States coins having a fixed value of 2 colones to the dollar. National and United States silver coins are legal tender in an amount representing up to 10 per cent. of each payment, and national nickel coins in amounts up to 2 per cent. of each payment.

The coinage of silver must not exceed 10 per cent of the total fiduciary circulation, and that of nickel must not be in excess of 5 per cent. of said circulation, and in no case shall nickel be coined in an amount exceeding 1,000,000 colones.

With the exception of United States gold and silver coin, foreign money is not a legal tender in the Republic, and payments contracted for in such money shall be liquidated by the equivalent of the money in question tendered in United States gold, or in colones, at the rate of exchange of the place of payment on the date of settlement.

By a Decree of February 12 1920, an Exchange office was established for San Salvador.

WEIGHTS AND MEASURES.

On January 1, 1886, the metric system of weights and measures was made obligatory. But other units are still commonly in use, of which the principal are as follows —

<i>Libra</i>	.	.	= 1·043 lb. av.		<i>Arroba</i>	.	.	= 25·35 lb. av.
<i>Quintal</i>	.	.	= 104·3 lb. av.		<i>Fanega</i>	.	.	= 1·5745 bushel.

Diplomatic Representatives.

1. OF SALVADOR IN GREAT BRITAIN.

Chargé d'Affaires and Consul-General.—Dro Arturo Ramon Avila. Appointed May 9, 1912.

There are consular agents at London, Liverpool, Glasgow, Southampton, Newport, Brighton and Birmingham.

2. OF GREAT BRITAIN IN SALVADOR.

Minister and Consul-General.—Hugh William Gaisford. Appointed January 17, 1920.

Consul.—A. F. Hastings Medhurst.

Vice-Consul at San Salvador.

SANTO DOMINGO.

(REPÚBLICA DOMINICANA.)

Constitution and Government.—The Republic of Santo Domingo, founded in 1844, is governed under a Constitution bearing date November 18, 1844, re-proclaimed, with changes, at various dates down to 1908. By the Constitution of 1908 the legislative power of the Republic is vested in a National Congress, consisting of a Senate of 12 senators and a Chamber of Deputies of 24 members. These representatives are remunerated at the rate of 480*l.* per annum each. Each province is represented by one senator and (in practice) by two deputies. Senators are elected for six years, one-third retiring every two years, and deputies for a period of four years, one-half retiring every two years. But the powers of the National Congress only embrace the general affairs of the Republic.

United States Military Governor.—Rear-Admiral Samuel S. Robinson.

The President is chosen by an electoral college for the term of six years, and receives a salary of 9,600 dollars per annum. There is no Vice-President. In case of death or disability of the President, Congress designates a person to take charge of the executive office.

The executive of the Republic is vested in a Cabinet composed of the President and seven Ministers, who are the heads of the departments of the Interior and Police, Finance and Commerce, Justice and Public Instruction, War and Marine, Agriculture and Immigration, Foreign Affairs, and Public Works and Communications.

This system of Government has been in abeyance since November 29, 1916, when a Military Government by United States naval officers was proclaimed. The Military Governor combines, for the time being, the functions both of the President and Congress. United States naval officers are administering the different Government departments. On January 1, 1920, a new Department of State for Sanitation and Beneficence was created.

Area and Population.—The area of Santo Domingo, which embraces the eastern portion of the island of Quisqueya or Santo Domingo—the western division forming the Republic of *Haiti*—is estimated at 19,332 square miles, with 1,017 miles of coast line and 193 miles of frontier line with Haiti, and a population, according to the census of 1921, of 897,405. The population of each of the 12 provinces was as follows: Santo Domingo, 146,446; San Pedro de Macoris, 43,612; Seybo, 58,408; Azua, 100,577; Barahona, 48,180; Samaná, 16,915; La Vega, 105,820; Pacificador, 77,620; Espaillat, 50,956; Santiago de los Caballeros, 122,773; Puerto Plata, 59,025; and Monté Cristi, 67,073.

The population contains some creoles of Spanish descent, but is mainly composed of a mixed race of European, African and Indian blood; there are, however, many Turks and Syrians, especially in Santo Domingo City, where the dry goods trade is mainly in their hands. The language used by the populace is Spanish, but on the Samaná Peninsula there are a few hundred farmers, descended from American negro immigrants of 1828, who speak corrupt English. The Haitian patois is spoken to a considerable extent along the frontier.

The capital, Santo Domingo, founded 1496 by Bartolomeo Colombo, brother of the discoverer, on the left bank of the river Ozama, was destroyed in 1502 by a hurricane, and subsequently rebuilt on the right bank of the same river. According to the census of 1921 the City of Santo Domingo had 45,021 inhabitants and the City of Puerto Plata 26,073; Santiago de

Los Caballeros 71,956; San Pedro de Macoris, 25,226; La Vega, 58,041; Samaná, 8,919; Sanchez, 4,889; Azua, 19,439; Monte Cristi, 8,539; San Francisco de Macoris, 42,432; and Moca, 38,089.

Religion and Instruction.—The religion of the State is Roman Catholic, other forms of religion being permitted. There is a Catholic Archbishopric with one suffragan see, viz., Porto Rico, now belonging to the United States. The Archbishop has been appointed Apostolic Delegate to both these countries (Santo Domingo and Porto Rico) and to Cuba.

Primary instruction is gratuitous and obligatory, being supported by the communes and by central aid. Expenditure on public instruction 1919–20, 943,880 dollars. The public or state schools are primary, secondary, technical schools, and normal schools. The Professional Institute was formed into a University by Presidential decree on November 29, 1914. In 1920 there were 972 public schools in the Republic (6 being secondary) with 105,000 pupils (51,585 in 1918), and 1,544 teachers. Under the Military Government steps have been taken to reform the system of public instruction, and some form of manual training or agricultural instruction is being introduced into the curriculum of the public schools.

Justice.—The chief judicial power resides in the Supreme Court of Justice, which consists of a president and 6 justices chosen by Congress, and 1 (Procurador General de la Republica) appointed by the executive; all these appointments are only for 4 years, but may be prolonged indefinitely. The territory of the Republic is divided into 12 judicial districts, each having its own civil and criminal tribunal and court of first instance, and these districts are subdivided into 60 communes, each with a local justice (alcalde), a secretary and bailiff (alguacil). There are three appeal courts, at Santiago de los Caballeros, at Santo Domingo City, and at La Vega.

Finance.—The receipts and disbursements for 6 years were, in United States dollars:—

—	Revenue	Expenditure	—	Revenue	Expenditure
	Dollars	Dollars		Dollars	Dollars
1916 . .	4,709,518	4,104,998	1919 . .	8,717,252	7,922,229
1917 . .	6,663,214	4,974,462	1920 . .	9,529,800	11,780,000
1918 . .	7,111,818	4,971,275	1921 ¹ . .	11,631,400	5,839,698

¹ Estimates.

Customs collections for the calendar year 1920 amounted to 7,577,244 dollars; for 1919, 4,457,393 dollars.

A Treaty between the Dominican Republic and the United States of America, ratified February 8, 1907, authorised the issue of 20,000,000 dollars in 5% bonds, secured as to principal and interest by a first lien on the customs revenues of the Republic. Under the Treaty the President of the United States of America appoints the General Receiver of Dominican Customs; a sinking Fund is provided for the service of the loan which is in the hands of the Guaranty Trust Company of New York as Fiscal Agent; assets in the Sinking Fund December 31, 1919, 8,309,038 dollars; bonds drawn for redemption are held in the Sinking Fund until all have been redeemed; date due 1918–1958; interest dates February and August;

interest and principal payable at New York, London, Paris, Brussels and Amsterdam.

Under authority of an Executive Order dated August 2, 1918, by the Military Governor of Santo Domingo, bonds under the title 'Dominican Republic 5% Bonds Issue of 1918' were issued for the purpose of settling claims and indebtedness, both foreign and domestic, accumulated prior to the establishment of the Military Government; authorised amount of issue 5,000,000 dollars; actually issued, 4,161,300 dollars; bonds are issued to claimants in settlements of awards as they are made by the Dominican Claims Commission; they are secured as a second lien on the customs revenue of the Republic; from January 1, 1918, a sinking fund is provided for, to be applied to the retirement of bonds as drawn for redemption on each interest date; the sinking fund is in the hands of the Designated Depositary for the Dominican Government, at present the International Banking Corporation of New York; date due 1918-1938; interest dates, January and July; interest and principal payable at the offices of the Designated Depositary in the Dominican Republic and in New York City.

On July 31, 1920, the Public Debt of the Dominican Republic was as follows:—1908 issue of bonds due in 1958, 20,000,000 dollars; redeemed bonds held in the amortisation fund, 9,174,750 dollars; cash in the amortisation fund on July 31, 1920, 618,221 dollars; amortised total, 9,792,971 dollars; leaving an unsettled balance of 10,207,029 dollars. Issue of bonds in 1918 due in 1938, 4,161,300 dollars; redeemed bonds, 1,113,200 dollars; cash in the amortisation fund, 154,342 dollars; total amortised, 1,267,542 dollars; leaving an unsettled balance of 2,893,757 dollars, which, added to the above-mentioned sums, leaves a total balance of 13,100,786 dollars unpaid.

Defence.—Native constabulary officered by Americans is the only defence, apart from the American marine forces in the Republic, which consist of 1,150 men, divided into 14 companies.

The Republic has no navy.

Production and Industry.—Agriculture is the principal source of wealth; and cattle-raising is a promising industry. Of the total area, about 15,500 square miles is cultivable, and about 3,000,000 acres suitable for grazing. Tobacco is grown in the northern part and cacao in the eastern. Sugar-growing is a flourishing industry; production of sugar in 1920-21, 1,326,438 bags (of 320 pounds each); 1919-20, 1,230,150 bags; and 1918-19, 1,166,761 bags. Cacao area in 1920 was 110,000 acres; yield, 51,457,795 pounds. Tobacco production in 1918, 33,439,648 pounds; in 1921, 8,000,000 pounds. The forest area of the Republic is 9,500,000 acres.

The live-stock census taken on May 15, 1921, showed 360,155 cows, 87,876 oxen, 199,127 calves, 162,800 horses, 64,860 mules, 674,232 pigs, 705,000 goats and 2,949,053 fowls.

Minerals of almost every kind are found at various places in the Republic, principal among which are gold and copper. Iron is found in the form of black magnetic oxide of iron, and petroleum has been found in the Azua region. Coal of the lignite variety of little commercial value is found in considerable quantities, as well as some anthracite coal. Silver, platinum, and traces of quicksilver have been found, and rock salt near Neiba is found in inexhaustible quantities, there being several hills of native salt covered with only a thin layer of soil. For building purposes there is a large variety of limestone and sandstone.

Commerce.—The total imports into and exports from the Dominican Republic for 5 years were valued as follows in pounds sterling :—

—	1916	1917	1918	1919	1920
	£	£	£	£	£
Imports	2,332,885	3,580,260	3,947,227	4,403,825	11,631,460
Exports	4,370,278	4,618,226	4,474,469	7,920,378	14,682,810

The foreign trade for 2 years was distributed as follows :—

Country	Imports				Exports			
	1919		1920		1919		1920	
	£	Per cent.	£	Per cent.	£	Per cent.	£	Per cent.
United States	3,622,661	82·26	8,962,198	77·05	4,808,012	60·70	12,778,497	87·03

Other countries	82,893	1·56	403,851	3·47	2,017,406	25·47	696,538	4·74
Total	4,403,825	—	11,631,469	—	7,920,378	—	14,682,810	—

In 1920 the chief imports were: cotton goods, 3,178,340*l.*; iron and steel manufactures, 835,593*l.*; foodstuffs, 2,961,056*l.*; manufactured vegetable fibres (bags, sacks, &c.), 258,810*l.*; chemical products and drugs, 254,639*l.*; soap, 175,371*l.*; agricultural implements, 63,159*l.* The bulk of the sugar and cacao are shipped for order to the U.S.A., and a large part is transhipped to Europe and Canada, the latter taking a good proportion of the sugar.

Total trade between Santo Domingo and the United Kingdom for 5 years (Board of Trade Returns) :—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Santo Domingo to U.K.	166,744	352,634	68,309	118,148	44,996
Exports to Santo Domingo from U.K.	118,865	90,848	55,120	440,024	89,262

Shipping and Communications.—The merchant marine of the Republic consists of 1 steamer of 263 tons, 8 schooners between 73 and 193 tons, and 20 schooners of less than 50 tons. These vessels are principally engaged in the coastwise trade.

In 1920, 555 steamers of 777,699 tons entered with cargo, 159 steamers of 180,127 tons in ballast, entered in the foreign trade of the Republic, and 474 steamers of 666,530 tons with cargo, and 174 steamers of 199,275 tons in ballast, cleared.

The interior is not well supplied with roads, though good roads are in course of construction between the principal cities of the Island, both on the north side and on the south side. A road is under construction

from the capital, on the south side to La Vega, and Santiago on the north side. On the north side there is a road 165 kilometres long (103 miles) from Monte Cristi to La Vega, *vid* Santiago and Moca. South of La Vega to Sonador, which is part of the road across the island, the road is finished for a distance, 52 kilometres (32 miles). On the south side there is a road 60 kilometres long (37 miles) from San Pedro Macoris to Seybo, *vid* Hato Mayor. From Santo Domingo City (the capital) there is a road running east to San Isidro 16½ kilometres (10 miles), which will be continued to San Pedro de Macoris. One running west to San Cristóbal 32 kilometres (20 miles) long; another running west through Bani to Azua 130 kilometres (81 miles) long; and one running north from the capital, eventually to connect with La Vega 61 kilometres (37 miles), have been completed. There is a road running from Azua north-west to San Juan 92 kilometres (58 miles), and another running south-west from Azua to Barahona 80 kilometres (55 miles).

There are two railway lines in the Republic: (1) Samaná-Santiago line, belonging to an English company, runs from Sanchez on the Bay of Samaná to La Vega (73 miles); it has two branch lines (under the same management, but different ownership) from La Jina to San Francisco de Macoris (8½ miles), and from Las Caballas to Salcedo (8 miles); this last has been extended to Moca (7 miles) in order to join the other system; (2) a Government line, the Dominican Central railway, runs from Puerto Plata to Santiago and Moca (60 miles). Total length of line (1919) 153 miles. There are, besides, about 255 miles of private lines on the large estates.

On January 1, 1919, the postal and telegraph services were unified. For year ending June 30, 1920, number of offices (postal and telegraph) 57; number of post offices, 32; total pieces of mail handled, 5,952,595.

The telegraph, in the hands of a French Telegraphic Company (Compagnie Française des Cables Telegraphiques), is in operation between Santo Domingo, Puerto Plata, and Santiago, from Santiago to Monte Cristi, and along the railway from Sanchez to La Vega; total length, 311 miles. Several other inland lines are in project. There is an inter-urban telephone system owned and operated by the Dominican Government, with 918 miles of line in operation on June 30, 1920. Number of messages transmitted and received (1919-20), 543,978. Submarine cables belonging to the same French Company connect in the north Puerto Plata with New York and Puerto Rico, and in the south Santo Domingo with Puerto Rico and Curaçoa. The telephone system of the Republic is connected with that of Haiti.

Two small wireless stations are in existence at Santo Domingo and La Romana (a new port in the province of Seybo, declared open to foreign commerce in August, 1912) which can communicate with Porto Rico. There is another small station at San Pedro de Macoris which is only used for local transmission. Number of radiograms sent (1919-20), 10,134: number received, 13,087.

The Military Government has established other wireless stations for its own use.

Money, Weights, and Measures.—On July 1st, 1897, the United States gold dollar was adopted as the standard of value. A small amount of debased silver coin circulates as small change at the ratio of 5 to 1, viz., 1 peso = 20 cents United States currency. There are no Dominican gold coins or paper money in circulation.

In 1912 the National Bank of Santo Domingo was established with a paid up capital of 500,000 dollars. The Royal Bank of Canada has branches at Santo Domingo City, San Pedro de Macoris, Santiago, Sanchez and

Puerto Plata. The International Banking Corporation, of New York, has branches at Santo Domingo, and other places. There are also at Santo Domingo and San Pedro de Macoris branches of the Banco Territorial y Agrícola de Puerto Rico. The National Bank of Santo Domingo, the American Foreign Banking Corporation, and the Banco Territorial y Agrícola de Puerto Rico have all closed their offices and are in liquidation.

The metric system was adopted on August, 1, 1913. But English and Spanish units are quite common in ordinary commercial transactions.

Diplomatic and Consular Representatives.

1. OF SANTO DOMINGO IN GREAT BRITAIN.

Consul-General.—Eduardo Cazeaux.

Consul.—Octavio Ventura.

Vice-Consul.—Albert M. Ventura.

There are consular representatives at Cardiff, Southampton, Grimsby, Liverpool, Birmingham, Glasgow, Leeds, Manchester, Nottingham.

2. OF GREAT BRITAIN IN SANTO DOMINGO.

Chargé d'Affaires in Santo Domingo.—W. C. Randolph Rose.

There is also a Vice-Consul at San Pedro de Macoris, Sanchez, and Puerto Plata.

SERB, CROAT, AND SLOVENE STATE.

(KRALJEVINA SRBA, HRVATA, I SLOVENACA.)

„Reigning King.

Alexander I, born December 4 (O.S.), 1844, son of King Peter I and Duchess Zorka, daughter of the late Nicholas I, ex-King of Montenegro; Prince Regent from June 24, 1914 to August 16, 1921, when his father died. On November 6, 1921, he swore to the constitution and received full royal rights.

Brother of the King.—Prince George, born September 8, 1887; on March 27, 1909, he renounced his right of succession to the throne.

Sister of the King.—Princess Hélène, born November 4, 1884; married, September 3, 1911 to Prince Ivan Constantinovitch, son of the Grand Duke Constantine Constantinovitch of Russia.

The founder of the dynasty was Kara-George (*i.e.* Black George) Petrovitch, who, in 1804, was proclaimed Commander-in-Chief in Serbia, but was murdered in 1817, leaving two sons—Alexis, born 1801, and Alexander, born 1806. In 1842 Alexander was chosen reigning Prince by the Skupshtina or National Assembly, and the title was confirmed by the Porte, but the dignity was not hereditary. In 1858 Alexander had to abdicate and was banished, and in 1885 he died in exile. King Peter was the third of his house who have ruled in Serbia. He succeeded to the throne on the murder of King Alexander of the Obrenovitch dynasty; was elected King by the Skupshtina June 2 (O.S.), and assumed royal rights and duties June 12 (O.S.), 1903.

The independence of Serbia from Turkey was established by Article 34 of the Treaty of Berlin, signed July 13, 1878, and was solemnly proclaimed by Prince (afterwards King) Milan at his capital, August 22, 1878. The King's civil list amounts to 1,880,000 dinars.

After the Revolution in Austria-Hungary, Slovenia, Croatia, Dalmatia, and Bosnia declared their independence, and a movement commenced for the formation of the State of Serbs, Croats, and Slovenes (Yugo-Slavia) by the union of the Austro-Serbian, Croatian, and Slovenian parts of the former Austro-Hungarian monarchy with Serbia. In regard to Montenegro there was some doubt as to her position, but on the death of King Nicholas on March 1, 1921, the country was definitely joined to Greater Serbia.

On December 29, 1918, the first Ministry of the Kingdom of the Serbs, Croats, and Slovenes was formed, representing all the Yugo-Slav provinces, and the Allied Governments were informed of the creation of the new State, which has received recognition. By the Treaty of Rapallo the boundaries of the new State on the side of Italy were definitely determined.

Constitution and Government.

The Constitution of the Kingdom of Serbs, Croats, and Slovenes, adopted on June 28, 1921, provides for a single chamber called Narodna Skupshtina, consisting of 419 representatives. The King is Commander-in-Chief of the Forces, and can declare war should the country be attacked or war be declared against it; he can also make peace. He summons Parliament and has the right of dissolving it. Parliament is elected for four years on the basis of one deputy for every 40,000 inhabitants.

The elections for the Constituent Assembly, held on November 28, 1920, resulted as follows:—96 Radicals, 94 Democrats, 54 Communists, 49 Croatian Agrarians (Raditch Party), 30 Serb Agrarians, 27 Mahomedans, 25 Catholic People's Party, and 43 members of other parties; total 417.

The Cabinet, which took Office on December 24, 1921, is composed as follows :—

Prime Minister.—N. Pashitch (Radical).
Minister of Foreign Affairs.—Momtchilo Ninčitch (Radical).
Minister of the Interior.—Dr. N. Marinkovitch (Democrat).
Minister for the Unification of Laws.—M. Trifkovitch (Radical).
Minister of Justice.—Dr. L. Marcovitch (Radical).
Minister of Posts and Telegraphs.—Z. Mylutinovitch (Radical).
Minister of Agrarian Reform.—Křta Miletitch (Radical).
Minister of Finance.—J. Kumanudi (Democrat).
Minister of Education.—S. Pribitchevitch (Democrat).
Minister of Social Policies.—Dr. C. Zeriuv (Democrat).
Minister of Religions.—Dr. I. Krstel (Democrat).
Minister of Mines and Forests.—M. Rafajlovitch (Democrat).
Minister of Public Health.—Dr. H. Karamehmedovitch (Moslem).
Minister of Commerce and Industry.—Dr. Mehmed Spaho (Moslem).
Minister of Agriculture.—Dr. Ivan Pucelj (Slovene Peasants).
Minister of War.—Gen. Milosh Vasitch (No party).
Minister of Public Works.—Velya Vukitchevitch (Radical).
Minister of Communications.—Andrea Stunitch (Radical).

Area and Population.

The estimated area and population of the Kingdom of the Serbs, Croats, and Slovenes (1920) are shown as follows :—

District	Area in sq. miles	Population
Serbia	42,008	4,955,681
Montenegro	8,535	238,423
Croatia	17,405	2,715,237
Bosnia and Herzegovina	20,709	1,931,502
Dalmatia	5,090	621,503
Slovenia	6,790	875,090
Total	95,623	11,337,686

According to another estimate the population is given at 11,406,628 and is distributed as to nationality as follows: Serbs, Croats, and Slovenes, 9,546,000; other Slavs, 190,181; Germans, 508,494; Hungarians, 494,163; Albanians, 479,890; Rumanians, 178,315; Italians, 9,585.

The principal towns (1919) are: Belgrade (Beograd) (the capital) with 120,000 inhabitants; Zagreb (Agram), 80,000; Ljubliana, 60,000; Sarajevo, 50,000; Novi Sad, 40,000; Spert, 30,000; Nish (1910), 24,949; Kragujevatch, 18,376; Sabac, 11,541; Bitolj, 48,370; Pristina, 18,174; Piroi, 10,737; Skoplyé, 47,384; Prizren, 21,244; Novi Pazar (1913), 13,433; Ohrid, 11,038; Debar, 10,199.

Religion.

The State religion of Yugo-Slavia is Serbian-Orthodox. According to the census of 1920 there were of the total population:—Greek-Orthodox, 5,459,212 (47 per cent.); Roman Catholics, 4,474,867 (35 per cent.); Moslems 343,370 (6 per cent.); other religions, 12 per cent.

In the new territories are a large number of Roman Catholics; there are Roman Catholic bishops in Prizren and Skoplyé. In May, 1914, Serbia concluded a concordat with Rome. Under the concordat a Roman Catholic Archbishopric of Belgrade is to be established, with jurisdiction over Roman Catholics within the old frontiers of Serbia. After the union of all the Orthodox Serbs in the kingdom, the Church became a Patriarchate under the rule of the Patriarch and Holy Synod for ecclesiastical purposes.

The Serbian Orthodox Church is governed by the Synod of Bishops. All the ecclesiastical officials are under the control of the Minister of Public Worship. There is unrestricted liberty of conscience.

Instruction.

Elementary education is compulsory, and, in all the primary schools under the Ministry of Education, it is free. In 1920 there were 5,974 elementary schools with 12,758 teachers and 800,868 pupils. The number of secondary schools was 139 with 2,794 teachers and 55,636 pupils. There were also 32 training colleges for elementary school teachers with 433 instructors and 5,603 students. Of civil schools there were 52, with 335 teachers and 4,892 pupils. There were also 22 commercial schools with 272 teachers and 3,910 pupils. In Zagreb (Agram) there was 1 veterinary school (founded in 1919), with 4 teachers and 62 pupils; an engineering school with 30 teachers and 325 pupils. The number of schools for girls was 62 with 518 teachers and 10,625 pupils.

There are three Universities in the Kingdom: At Belgrade, founded in 1838, with (1921) 127 professors and 7,668 students; at Zagreb (Agram), with 133 professors and 3,249 students; and at Ljubliana, founded in 1920, with 73 professors and 769 students; a Law School at Subotica with 10 professors and 433 students; and a Philosophical Faculty at Skoplje with 10 professors and 106 students.

The Government has a Military Academy with 250 cadets, and 10 schools for non-commissioned officers. There are several private schools, elementary and other, and several orphanages supported by voluntary contributions.

For elementary schools the State pays the teachers' salaries, and the municipalities provide for all other expenditure. The cost of the other public schools is borne entirely by the State.

Justice, Crime, and Pauperism.

For the present justice is administered as of old in each of the areas of the new kingdom, viz. Serbia, Montenegro, Croatia, Slavonia and Syrmia, Bosnia and Herzegovina, the Banat, Batchka and Baranja, and Slovenia and Dalmatia.

In Serbia the judges are appointed by the king and are irremovable. There is a court of cassation in Zagreb.

There is no pauperism in the sense in which it is understood in the West; the poorest peasants have some sort of freehold property, which cannot be sold. There are a few poor people in the large towns, but neither their poverty nor their number has necessitated an institution like a work-house. There are free municipal hospitals.

Finance.

State receipts and expenditure for 6 years as follows :—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1914	8,572,840	8,572,840	1920 ¹	49,925,664	49,925,664
1918 ¹	16,905,007	16,905,007	1921 ¹	38,841,777	39,913,663
1919 ¹	19,434,703	19,431,703	1922 ¹	17,878,793	17,878,793

¹ Estimates.

The budget estimates for 1922 are shown as follows in dinars (par value of dinar, 25 to the £; present value, 345-355 to the £) :—

Revenue.	Dinars.	Expenditure.	Dinars.
Customs	417,310,000	Department of Education	459,924,493
Town taxes	390,000,000	Treasury	829,266,858
Excess profits taxes	597,112,982	War and Navy	1,489,356,637
Import and export dues	810,000,000	Public works	273,093,217
Navigation dues	905,750	Communications	831,081,743
Direct taxes	1,806,162,550	Post and telegraphs	238,254,235
State properties	1,295,305,593	Agriculture	114,156,188
		Forests and mines	206,464,051
Total (including all items)	6,257,577,805	Total (including all items)	6,257,577,805

On January 1, 1921, the public debt of Yugo-Slavia was as follows :—Pre-war debt, 880,668,500 dinars and 328,176,931 kronen; war debt, 1,998,195,466 dinars; post-war debt, 357,200,000 dinars. The total debt, including internal debt incurred since the war, amounts to 3,564,240,897 dinars. To the United Kingdom the new kingdom owes 23,122,969% together with interest from January 1, 1920.

Defence.

In 1919 the organisation of the army of the Kingdom of the Serbs, Croats, and Slovenes was commenced. In peace time the strength of the army is 150,000. Compulsory service is in force for men between the ages of 21 and 45, and, as a last defence, men can be taken as fit to carry arms from the ages of 18 to 21 years and from 45 to 50 years.

The kingdom is divided into four army districts and 16 divisional districts; each divisional district has 3 infantry regiments of 3 battalions and 1 artillery regiment. Each army district has, besides, 1 cavalry regiment, 1 howitzer artillery regiment, and 1 heavy artillery regiment, and also 1 engineers' command composed of all engineering branches. For the whole army there is 1 cavalry division of 2 brigades and 2 regiments, and 1 railway transport command, 1 air force command, and 1 motor transport command. The total strength of the army at end of 1921, was approximately 250,000 men, which is excess of the normal peace strength of 170,000, in consequence of disputes with Albania and the uncertain position in Hungary.

The infantry is armed with quick-firing rifles of French pattern and those taken as booty from Austria-Hungary; the artillery with French quick-firing guns (Schneider-Canet system) and those taken as booty from Austria-Hungary, which are of various models.

The Yugo-Slav State possesses 12 former enemy torpedo-boats to be used solely for police purposes, as also some old Austrian vessels left at Cattaro and on the Danube.

Production and Industry.

Serbia is an agricultural country, where almost every peasant cultivates his own freehold. The holdings vary in size from 10 to 30 acres mostly. Of the total area (11,930,740 acres), 21 per cent. is arable land; 4 per cent. is devoted to fruit and vine production and to gardens; 6·3 per cent. is forest land, 11 per cent. meadow, and the remainder is State property (mostly forest). Fruit products formed 13 per cent. of the total exports before the war. The country produces wheat, barley, oats, maize, rye and beetroots. Plum marmalade and also fresh plums are exported in large quantities, spirits are distilled from plums, and various fruits are grown. Tobacco production of Greater Serbia in 1919, 15,000 tons. Silk culture employs a large number of persons. The total production of wheat in Yugo-Slavia in 1919 was 24,694,726 cwts.; of barley, 4,251,692 cwts.; and of oats, 6,164,247 cwts.; maize, 36,575,315 cwts.; and potatoes, 15,136,749 cwts. In 1920 the output of sugar was 35,000 metric tons.

There were in Yugo-Slavia 1,458,326 horses, mules and asses; 5,496,531 head of cattle; 9,771,985 sheep; 4,849,457 pigs; and 2,447,949 goats.

Almost half the total area of Yugo-Slavia is forest. The State forests of Serbia had an area, 1910, of 1,375,000 acres; parish forests, 1,625,000; church and monastery, 42,500; private, 750,000. The forests consist largely of beech, oak, and fir, but are less profitable than, with proper management, they might be.

Yugo-Slavia has considerable mineral resources, including coal and lignite, iron, copper ore, gold, and cement. Copper and coal are the leading mineral products in Serbia. The best coal is to be found near Vrška Tchuka and in Varandona, near Rashka, and Kniajevatz. The State mine of Senj furnishes the greatest production (nearly 200,000 tons per annum). It may be expected that the coal mines in Serbia that have been already opened, after the reparation of the damage sustained during the war, will yield about 600,000 tons of coal per annum, of the value of 9,000,000 francs. Gold, lead, silver, antimony, iron ore, and pyrites are also mined. A capital of about 70,000,000 francs has been invested in Serbian mines up till now, with about 5,000 miners employed.

In Bosnia, coal and iron are mostly exploited. During recent years an average of 860,000 tons of coal were extracted from 11 mines. The most important iron undertaking is in Varash; average of 165,000 tons of ore. Among the other mines the most important are manganese and salt.

In Croatia and Slavonia only the coal mines are of special importance.

Coal, lead, and zinc are mined in Slovenia. Its brown coal yields 2,000,000 tons per annum, valued at 25,000,000 francs (pre-war prices). The lead mines produced in recent years about 17,000 tons of pure lead, valued at 9,000,000 francs (pre-war prices).

The total production of coal in Yugo-Slavia was 2,494,258 metric tons; in 1913 it was 3,587,432 tons.

Of the industries, flour milling is one of the most important; there are 50 large flour mills in the country, especially in Bačka; brewing and distilling are extensively carried on, as are also weaving, tanning, boot-making, pottery, and iron-working. Carpet weaving is one of the oldest industries in Serbia. The product is manufactured principally at Pirot, in south-eastern Serbia, and the carpets are named after that place. The

chief characteristics of these carpets are that they are made of pure wool, dyed with natural colours by local dyers, who pride themselves that the process of dyeing and colour mixing is a secret transmitted by father to son, and is known only to the inhabitants of Pirot. Meat-packing is also becoming important.

Commerce.

According to official reports, the imports to Yugo-Slavia in 1920 amounted to 3,487,996,150 dinars, and exports to 1,320,905,955 dinars.

The principal imports are agricultural products (133,472,120 dinars in 1920), animal products (43,095,349 dinars), chemicals (225,016,465 dinars), metals and machinery (363,375,588 dinars). Exports: Maize (150,603,803 dinars in 1920), corn (126,748,378 dinars), cattle and other animals (43,464,838 dinars), prunes (63,792,219 dinars); timber, (113,746,060 dinars). The trade is mainly with Austria and Italy.

The Treaty of June, 1893, provides for 'the most-favoured-nation' treatment in commerce and navigation between the United Kingdom and Serbia. A new Treaty, signed February 17, 1907 (for 10 years), provides for tariff reductions and for 'most favoured nation' treatment as regards commercial travellers, the acquisition and possession of property, and other matters.

Total trade between Yugo-Slavia and the United Kingdom for five years (Board of Trade Returns):—

	1917 ¹	1918 ¹	1919 ¹	1920 ¹	1921
	£	£	£	£	£
Imports from Serbia into U. K.	—	—	—	10,000	759,542
Exports to Serbia from U. K.	—	—	828,308	610,759	1,045,705

¹ Figures are for Serbia alone.

Communications.

Yugo-Slavia has (1920) 5,684 miles of railway, of which 3,732 miles are of normal gauge, and 1,952 miles of narrow gauge. With the exception of about 509 miles belonging to a private company, all the lines are State owned.

Of highways there are 3,495 miles, many of them in a ruinous condition. Total length of waterways, principally the Danube, the Save, the Drave, and the Tisa, 1,697 miles. The navigation on the Danube and Save is in the hands of the Navigation Syndicate of the Kingdom of the Serbs, Croats and Slovenes.

There were (1920) 11,430 miles of telegraph line and 16,030 miles of telephones.

There were 1,591 State post-offices and 2,195 communal post offices in 1919. In 1919 Yugo-Slavia had 854 telegraph stations, 726 telephone stations, and 452 railway telegraph stations.

Money and Credit.

The principal bank is the National Bank of the Kingdom of the Serbs, Croats and Slovenes, in Belgrade, with the nominal capital of 50,000,000 dinars. To cover the issue of new bank notes the State has deposited with the Bank 30,000,000 dinars. The Bank may issue notes equal to three times the amount of the metallic deposits it holds. Notes in circulation on

November 1, 1921, 4,495,400,000 dinars. The Export Bank, with agencies abroad, assists in the exportation of Serbian produce. The Uprawa Fondowa or Mortgage Bank, the only large State institution of the kind in Serbia, makes advance to a large amount for agricultural operations.

Money, Weights, and Measures.

Serbia accepted, by the law of June 20, 1875, the French decimal system for its moneys, weights, and measures. The Serbian dinar is equal to one franc. In circulation are bank notes of 1, 5, 10, 20, and 100 dinars, and 10 kronen (4 kronen = 1 dinar).

The decimal weights and measures (kilogram, metre, &c.) have been in practical use since the commencement of 1883.

Diplomatic and Consular Representatives.

1. OF THE KINGDOM OF THE SERBS, CROATS, AND SLOVENES IN GREAT BRITAIN.

Minister Plenipotentiary.—Michailo Gavrilovitch, appointed April, 1919.
Secretaries.—Dr. Todorovitch, Constantine Fotitch, Vladimir Milanovitch, and Slobodan Jovanovitch.

Military Attaché.—Colonel Georges Ostoitch, K.C.V.O., C.B.

Attachés.—Vidosav Andjelkovitch and Miliwoje B. Gavrilovitch.

There are Consular representatives in Manchester, Bristol, Bradford, and Glasgow.

2. OF GREAT BRITAIN IN THE KINGDOM OF THE SERBS, CROATS, AND SLOVENES.

Envoy Extraordinary and Minister Plenipotentiary.—Sir Charles Alban Young, K.C.M.G., M.V.O., appointed September 3, 1919.

Secretaries.—W. Strang and E. A. Walker.

Military Attaché.—Brigadier-General E. Hoare-Nairne, C.B., C.M.G.

Commercial Secretary.—E. Murray Harvey.

Consul at Zagreb.—C. T. Maclean.

Statistical and other Books of Reference concerning Serbia.

1. OFFICIAL PUBLICATIONS.

Sluzbene Novine (Official Gazette), Statistički godišnjak Kraljevine Srbije (Annuaire Statistique du Royaume de Serbie), and the publications issued by the various Departments of Government. Belgrade.

SIAM.

(SAYAM, OR MUANG-THAI.)

Reigning King.

Chao Fa Maha Vajiravudh, born January 1, 1881, eldest son of the late King Chulalongkorn I., succeeded to the throne on the death of his father. October 23, 1910, and was crowned on December 2, 1911. He is now styled

King Rama VI, being the sixth sovereign of the present reigning dynasty. The royal dignity is nominally hereditary, but does not descend always from the father to the eldest son, each sovereign being invested with the privilege of nominating his own successor. On November 24, 1910, it was officially announced that until the new King has male issue, the succession will pass presumptively through the line of the Queen Mother's sons.

Government.

The executive power is exercised by the King advised by a Cabinet consisting of the heads of the various departments of the Government: Foreign Affairs, Interior, Justice, Finance, Public Instruction, Public Works, War, Marine, Local Government, &c. Many of the portfolios are held by the King's half-brothers and uncles. The law of May 8, 1874, constituting a Council of State, has now been superseded by the Royal Decree of January 10, 1895, creating a Legislative Council. The latter is composed of the Ministers of State (Senabodi) and others, not less than 12 in number, appointed by the Crown. The total membership is now 40. In the preamble of the Royal Decree it is stated that the object of this body is to revise, amend, and complete the legislation of the kingdom. It is to meet at least once a week, and it may appoint committees of 3 or 4 members, with the addition of competent outsiders who must not outnumber the members. An important article gives the Legislative Council power to promulgate laws without the Royal assent in the event of any temporary disability of the Crown. At other times the Royal signature is indispensable. This Council has shown considerable legislative activity.

The Siamese dominions are divided into 18 circles (Monthons), of which 17 have each a Lord-Lieutenant, deriving authority direct from the King, and having under him subordinate governors over the various parts of his circle. These Lords-Lieutenant and their subordinate governors and other officials have now complete administrative control even in the North and South-West where local hereditary chiefs formerly held sway. The circle of Bangkok (which includes the capital) is under the control of the Minister of Local Government. The 18 circles are subdivided into 78 provinces (Changwats), 409 districts (Ampurs), and 5,042 communes (Tambons).

Area and Population.

Siam is called by its inhabitants Thai, or Muang-Thai, which means 'free,' or 'the kingdom of the free.' The word Siam is probably identical with Shan, applied in Burma to the Lao race, as well as to the Shan proper and the Siamese.

The limits of the Kingdom of Siam have varied much at different periods of its history, most of the border lands being occupied by tribes more or less independent. The boundary between Burma and N. W. Siam was delimited in 1891. By the Anglo-French Convention of April, 1904, the agreement of 1896 was confirmed, and its provisions more clearly defined, the territories to the west of the Menam and the Gulf of Siam being recognised as in the British sphere, and those to the east in the French. In 1904, the Luang Prabang territory to the west of the Mekong was acknowledged by Siam to belong to France, and the provinces of Maluprey and Barsak (west of the Mekong) were also transferred to French rule, so that an area of about 7,800 square miles passed from Siamese possession. On March 23, 1907, a new boundary in this region was accepted by Siam whereby the provinces of Battambang, (Siamese, Pratabong) Siem Rap, and Sisophon were ceded to

France, while the strip of coast to the south with the port of Krat returned to Siam. At the same time a rectification of the boundary was made in the Luang Prabang region, whereby a tract of the Laos country was restored to Siam. It was agreed also that four ports on the Mekong are to be held by France on perpetual lease. By these arrangements the territory of Cambodia is increased by about 7,000 square miles. The treaty also provides for the future jurisdiction of the Siamese courts over all French Asiatic subjects and protégés in Siam, under certain conditions.

A treaty for a modification of British extra-territorial rights in Siam and for the cession of the Siamese tributary States of Kelantan, Trengganu and Kedah to Great Britain was signed at Bangkok on March 10, 1909. The three states have an area of about 15,000 square miles, and a population estimated at over 600,000, of whom about 300,000 are in Kelantan.

The area of Siam is now about 198,900 square miles, about 45,000 being in the Malay Peninsula. The first detailed census in Siam was taken in 1905, but included only 12 of the circles or Monthons. The first census of the whole country was taken in 1909.

The revised census figures for 1911-12 gave a population of 8,266,408, of whom 4,122,168 were males, and 4,144,240 females.

Monthon.	Population (1911-12).	Monthon.	Population (1911-12).
1. Krung Tep (Bangkok)	931,171	11. Nisanulok	249,856
2. Ayutaya	548,165	12. Bayab	1,223,761
3. Chantaburi	136,463	13. Petchaburi	74,077
4. Chumpara	166,402	14. Puket	230,037
5. Nakorn Chaisi	287,631	15. Rajaburi	426,825
6. Nakorn Rachasina	502,218	16. Isan	1,455,497
7. Nakorn Sawan	287,668	17. Udorn	666,405
8. Nakorn Sritamarat	478,266		
9. Patani	276,695		
10. Phachinburi	325,271	Total	8,266,408

Of the total population the 'Thai' number well over 7,000,000.

The estimated population for 1920-21 is 9,121,000.

The population of Bangkok and district is put at 931,171, but the difficulties encountered in enumerating the population of the capital were such that the figure must be accepted with caution. The population of the island of Puket is put at 37,276.

In 1920-21 the Deck Passengers arriving in Bangkok by sea numbered 70,252, mostly from Hong Kong and China; those departing numbered 37,583.

In recent years the results of Western civilisation have to a considerable extent been introduced. Much excellent work has been done by a General Adviser of American nationality (now styled Adviser in Foreign Affairs) and with the assistance of a British Judicial Adviser a French Legislative Adviser and Legal Advisers of various nationalities important progress has been made in the administration of justice in the native courts and in the International Court in which British and French Advisers assist in the trial of cases brought by Siamese against subjects of Treaty Powers and *vice versa*. The Penal Code has been completed, and came into force on September 21, 1908; work on other codes is being proceeded with. The Consular Courts exercise jurisdiction over their nationals, subject, in the case of Great Britain, France, Denmark, and the United States to the Treaty modifications. The police administration of the Provinces is entrusted to the Provincial Gendarmerie, a force which includes a body of Danish

instructors. The Provincial Gendarmerie and Metropolitan Police Forces have now been amalgamated and placed under the supervision of one central department at Bangkok. The European officers, both British and Danish, are no longer employed in an executive, but only in an advisory, capacity. For commercial purposes English is in general use.

Religion and Instruction.

The prevailing religion is Buddhism. In 1918-19 there were 13,616 Buddhist temples, and 87,538 priests.

The Minister of Education is responsible for education throughout the country, with the exception of certain Departmental Schools, such as the Military, Naval, and Law Colleges, and the Police School, and of certain schools under direct Royal Patronage.

In 1918-19 Government primary schools numbered 402, teachers 1,026, pupils 35,045; non-Government primary schools 2,416, teachers 2,819, pupils 113,793; Government secondary schools numbered 135, teachers 506, pupils 10,913; non-Government secondary schools 7, teachers 6, scholars 78; Government special schools, numbered 26, with 569 pupils. The non-Government schools include, in addition to numberless Temple schools, certain educational establishments connected with American, French, and English missions. The latest census showed that there were in the Provinces of Siam, not including that of Krung Tep (Bangkok), 833,972 literate males and 88,756 literate females.

The Chulalongkorn University was inaugurated at Bangkok, in 1917, for medicine, political science and literature, and engineering and natural science.

The Hospital service under the Red Cross Society of Siam includes a Pasteur Institute.

Finance.

Revenue and Expenditure for three years:—

—	1919-20	1920-21 ¹	1921-22 ¹
	£	£	£
Revenue	8,005,580	6,041,666	6,483,333
Expenditure against Revenue ...	6,879,096	6,844,177	6,836,048
Extraordinary Expenditure against Capital Account ²	1,305,042	1,330,252	1,429,011

¹ Estimates.

² Including Expenditure from Loans.

The principal sources of revenue in 1919-20 were: opium, 1,935,131*l.*; land revenue and capitation tax, 1,394,751*l.*; excise, 911,939*l.*; railways, 854,828*l.*; mines, forests &c., 725,151*l.*; custom duties, 592,317*l.*

On March 31, 1920, the total national debt amounted to 6,633,960*l.*, made up as follows:—3,130,000*l.*, out of the Federated Malay States loan of 4,750,000*l.* arranged for in 1911; 2,654,769*l.*, out of the 1907 European loan of 3,000,000*l.*; and 849,200*l.*, out of the 1905 European loan of 1,000,000*l.* All these loans were made for, and spent on, works of public utility.

A British officer occupies the position of Financial Adviser, and there are numerous other British officers holding high advisory positions under the Government, more especially in the Finance and Audit, Revenue, Forests, Survey, Police, Justice, Customs, Mining, Mint, and Education depart-

ments. There are also a number of Europeans of other nationalities in various Departments. The financial position of the kingdom is favourable, the revenue is steadily increasing, and the expenditure is less than the revenue, and well under control.

Defence.

Under the Military Service Act of 1917 every able-bodied man is liable to serve (a) two years with the colours; (b) seven years in the first reserve, with a maximum service of two months per annum; (c) ten years in the second reserve, with a maximum service of 30 days per annum; (d) five years in the third reserve, with a maximum service of 15 days per annum.

The army is divided into 10 Divisions, grouped into 3 Army Corps, and 1 independent division. Each division consists of 2 regiments of infantry, 1 regiment of either cavalry or chasseurs, 1 group of artillery, 1 company of machine guns, and 1 Ambulance Corps. The engineers and transport troops are grouped into special regiments. Aviation schools were started in 1914, and a Flying Corps has been formed.

To the small naval force, which includes a light cruiser and some gunboats, three modern despatch vessels and the ex-British destroyer *Radiant*, renamed *Phra Ruang*, have been added. There are 5,000 men available for service afloat, besides a reserve of 20,000.

At the mouth of the Mönam River are the Paknam forts. The bar prevents ships of more than 13 feet draught from ascending to Bangkok. The naval arsenal dock has recently been reconstructed.

The military and naval expenditure for 1919-20 amounted to 1,650,964*l*.

Production and Industry.

Forced labour is still exacted from the rural population, but recent enactments have made calls for it far less frequent, and a poll-tax, varying in amounts in the different districts, is now levied on all adult males with practically no exemptions. The cost of labour is probably higher than in any other Oriental country. Chinese coolies do the chief part of both skilled and unskilled labour in the south, especially in the mills and in mining; while in the north forest work is confined almost entirely to Laos, Burmese, Karens, and Khamus.

To the north of Bangkok, large tracts of land, formerly lying waste, have been opened up by an Irrigation Company, which has connected by a canal the Menam and Bangpakong rivers, and has constructed numbers of smaller canals. In 1916 the Government, acting on the advice of an irrigation expert lent by the Government of India, started work on the Prasak Canal Project. Actual irrigation from these works should commence in 1922. The area to be protected is estimated at 100,000 hectares.

The chief produce of the country is rice, which forms the national food and the staple article of export. The cultivated area under rice in 1919-20 was given as 6,151,200 acres. For the Siamese Year (Buddhist Era) 2463 (April 1, 1920, to March 31, 1921), the export of rice amounted to 277,410 tons, an exceptionally low figure due to the existence of the Government Control. The average annual export is 1,071,000 tons. In Bangkok and district there are some 80 rice mills.

The live-stock on March 31, 1920, consisted of 6,294 elephants, 132,675 horses and ponies, 2,620,682 bullocks, and 2,508,164 buffaloes.

Much of Upper Siam is dense forest, and the cutting of teak is an important

industry, almost entirely in British hands. Siam teak wood is mainly produced in the north of Siam, the dry logs being floated by river to Bangkok during the rainy months of the year. In 1920-21 the exports of teak amounted to 71,617 tons, valued at 1,289,115 $\frac{1}{2}$. The forests are under the control of a British conservator, aided by several British officers. The export of rubber is now negligible, but planting of rubber trees is proceeding in the Malay Peninsula.

The mineral resources of Siam are extensive and varied, including tin, tungsten, wolfram, coal and iron, zinc, manganese, antimony, probably quicksilver. Tin mining on a considerable scale is pursued on the island of Phuket (or Junk Ceylon) and also in the northern portion of the province of Phuket at Renong on the mainland, and the ore is found in ever-increasing quantities in other parts of the Siamese portion of the Malay Peninsula, where also wolfram is now being extracted in considerable quantity. The total output of metallic tin in 1918-19 was 148,425 piculs (8,831·8 tons), and in 1919-20, 143,506 piculs (8,542 tons). The total amount exported in 1920-21 was 103,887 piculs (6,183·75 tons).

Commerce.

Over 85% of all Siam's foreign trade passes through the capital. The following figures refer only to the port of Bangkok.

Imports and exports for five years :—

	1916-17	1917-18	1918-19	1919-20	1920-21
	£	£	£	£	£
Imports	6,746,894	7,456,040	7,917,956	12,272,968	15,379,106
Exports	9,330,551	9,508,068	12,414,811	15,718,170	6,903,760 ¹

¹ Export of rice prohibited.

The distribution of trade by principal countries was as follows :—

Imports from	1919-20	1920-21	Exports to	1919-20	1920-21
	£	£		£	£
United Kingdom	2,101,394	4,741,623	Singapore, Penang, and British Malay States	6,993,461	1,837,681
Hong Kong	2,978,648	3,167,411	Hong Kong	3,135,608	2,893,230
Singapore	2,564,488	2,172,465	United Kingdom	1,062,110	821,343
India and Burma	1,360,983	1,011,906	India and Burma	480,906	465,282
China	917,460	1,205,827	Netherlands India and Holland	1,108,312	150,581
Japan	542,847	683,042	China	333,065	215,052
United States	798,117	643,866	Japan	310,456	112,686
Netherlands India and Holland	634,470	766,335	Indo-China and France	86,988	84,703
Indo-China and France	116,175	262,703	United States	57,050	81,907
Switzerland	56,860	203,310	Port Said (for orders)	317,438	—
Germany	3,176	105,873	Belgium	254,174	6,475
			Denmark	283,780	45,202
			Portugal	163,065	—
			Sweden	117,077	—
			Germany	3,491	50,685

The principal imports in 1920-21 were: cotton goods, 3,406,503 $\frac{1}{2}$; food-stuffs, 1,899,972 $\frac{1}{2}$; metal manufactures, 1,068,961 $\frac{1}{2}$; cotton yarn, 620,953 $\frac{1}{2}$; tobacco, cigarettes, etc., 571,077 $\frac{1}{2}$; machinery, 442,711 $\frac{1}{2}$. The principal exports were: rice, 3,024,620 $\frac{1}{2}$, and teak, 1,289,115 $\frac{1}{2}$.

There is a considerable trade on the northern frontiers with the British Shan States and Yunnan, carried on by hawkers.

Total trade between Siam and United Kingdom for 5 years (Board of Trade Returns):—

	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Siam into U. Kingdom .	1,289,411	56,074	1,419,383	795,437	1,946,661
Exports to Siam from U. Kingdom .	1,247,899	1,618,555	1,747,770	4,074,881	2,061,659

Shipping and Communications.

In 1920-21, 571 vessels of 492,812 tons entered the port of Bangkok. Regular connection with Hong Kong, and the Southern China ports, and with Singapore and the ports of the Malay Peninsula, is maintained by the China Navigation Co., Ltd. (Butterfield & Swire), the Straits Steamship Co., Ltd., the British India Steam Navigation Co., Ltd., the Siamese Steamship Co., Ltd., and the Siam Steam Navigation Co., Ltd. There are also a number of Japanese, Norwegian, French and other vessels which visit the port with more or less frequency.

At the end of March, 1920, 1,376 miles of State Railways were open to traffic. The Northern Line (591 miles, standard gauge) runs through Nakorn Lampang to a point not far south of Chiangmai, with branches to Koiat and Petriew. Communication with Chiangmai will be established shortly, and the line is later to be converted to metre gauge. The Southern Line (785 miles metre gauge) runs from Bangkok down the Peninsula to the frontier station of Padang Besar, where it connects with the Federated Malay States Railway from Penang, and to Sungei Golok, where it connects with a still incomplete Federated Malay States Line, which will later give direct communication with Singapore. There are branches to Singora, Nakorn, Sitamarat and Trang. All State railways are under one management. Private lines include those (worked by companies) from Bangkok to Paknam at the mouth of the Menam, and from Bangkok to Tachin and Meklong on the coast to the west of the Menam, together with a tramway connecting the Northern Line (northern branch) with Phrabat.

In 1920 there were 379 post offices and agencies. The inland mail matter received at the different offices for delivery consisted (1919-20) of 1,821,058 letters, 552,071 post cards, 1,159,483 pieces of other postal matter. For foreign countries the returns of mails dispatched were 354,859 letters, 33,475 post cards, 84,175 pieces of other postal matter; foreign letters received 755,430, post cards 64,428, other postal matter 527,683.

There were (1920) 89 telegraph offices. Number of inland telegrams 164,044, of foreign telegrams, 180,333. Length of line, 4,657 miles; length of wire, 6,530 miles.

There were (1920) two telephone exchanges, and 1,228 instruments were installed at the premises of subscribers. A complete set of new instruments from Sweden for the telephone exchange in Bangkok were installed in 1919.

Two wireless stations on the Telefunken system have been erected, one at Bangkok and one at Senggora. They are both under the control of the Siamese naval authorities.

Money, Weights, and Measures.

In Bangkok there are branches of the Hong Kong and Shanghai Bank, the Chartered Bank of India, the Banque de l'Indo-Chine, and the Bank of Taiwan, besides an agency of the Mercantile Bank of India. A number of Chinese Banks have established branches here during recent years. There is also a branch of the Chartered Bank of India, Australia and China at Puket. A Siamese bank, formerly with a German but now with a British manager, was established under Royal Charter in 1906, with the name of the Siam Commercial Bank, Limited. The Government in 1902 began to issue currency notes (5, 10, 20, 100 and 1,000 ticals, and since October, 1918, 1 tical notes). On March 31, 1903, there was 181,203*l.* worth of currency notes in circulation; on March 31, 1920, 9,049,724*l.* The currency notes are temporarily inconvertible.

In 1914 the Siamese Treasury Savings Bank was opened with 530 depositors. By March 31, 1920, the number was 6,271, with a total deposit of 126,939*l.*

The unit of the monetary system is the silver *tical* (officially called *bahr*), weighing 15 grams, .900 fine. Its value (formerly varying with the price of silver) was, by the Gold Standard Act of 1908, fixed at 1*s.* 6½*d.* or 13 ticals = 1*l.*, the gold value of the tical being equal to that of 55.8 centigrams of pure gold. The law also provided for a 10-tical gold piece, or *Dos*, weighing 6.2 grams, .900 fine, and thus containing 5.58 grams of pure gold, but this has not yet been issued. By an amendment to the Act, dated Sept. 4, 1919, the value of the tical has been fixed at 1*s.* 8*d.*, or 12 ticals = 1*l.* sterling, the gold value of the tical being equal to 61 centigrammes of pure gold. This will correspondingly increase the pure gold content of the *Dos*, when issued, to 6.10 grams. In addition to the tical, the following coins are now actually in use:—(silver), the *Salung* = ½-tical; the 2-*Salung* piece = ¼-tical; (nickel), the 10-*Satang* piece, = 1/10 of a tical; the 5-*Satang* piece, = 1/20 of a tical; and (bronze) the *Satang*, = 1/100 of a tical. The fineness of the subsidiary silver coins (2-*Salung* and 1-*Salung* pieces) was, by the Gold Standard Act, fixed at .800, but in July, 1919, the fineness was reduced to .650.

There are no standard weights and measures in Siam. But the metric system has been adopted in many of the Government departments and on the royal railways. The customary measures of weight are:—1 *Tical* = 15 grams or approximately .53 oz.; 4 *Ticals* = 1 *Tamlung* (60 grams or 2.1 oz.); 20 *Tamlungs* = 1 *Chang* (1.2 kilograms or 2 lb. 10.3 oz.); 1 *Picul* or *Hâp* = 60.48 kilogrammes = 133½ lb. = 100 *Catties* of 1½ lb., which is the catty usually used in commerce.

The unit of length is the *Wah*. The measures of length are:—1 *Niew* = .83 inches; 12 *Niew* = 1 *Kcub* (10 inches); 2 *Kcub* = 1 *Sawk* (20 inches); 4 *Sawk* = 1 *Wah* (80 inches); 20 *Wah* = 1 *Sen* (133 feet); 400 *Sen* = 1 *Yote* (10 miles, roughly). For square measure the unit is the *Rai* = .39 acres.

Diplomatic and Consular Representatives.

1. OF SIAM IN GREAT BRITAIN.

Envoy and Minister.—Phya Buri Navarasth (appointed March 31, 1919).
Counsellor of Legation.—W. J. Archer, C.M.G.

First Secretary.—Prince Damras.

Second Secretary.—Lewis C. Bateman.

Third Secretary.—Luang Bhides.

Attachés.—Luang Chara Naovides and Luang Sundara Vachana.

Military Attaché.—Major Prince Pridi.

2. OF GREAT BRITAIN IN SIAM.

Envoy Extraordinary and Minister Plenipotentiary.—R. H. Greg (appointed 1921).

Consul-General at Bangkok.—T. H. Lyle, C.M.G.

There are consular representatives at Chiangmai, Senggora, and Nakawn-Lampang and Puket.

SPAIN.

(ESPAÑA.)

Reigning Sovereign.

Alfonso XIII., son of the late King Alfonso XII. and Maria Christina, daughter of the late Karl Ferdinand, Archduke of Austria; born after his father's death, May 17, 1886, succeeding by his birth, being a male, his eldest sister; married, May 31, 1906, to Princess Victoria Eugénie, daughter of the late Prince Henry of Battenberg and Princess Beatrice (daughter of the late Queen Victoria) of Great Britain and Ireland.

Children of the King.—(1) Prince *Alfonso*, born May 10, 1907; (2) Prince *Jaime*, born June 23, 1908; (3) Princess *Beatriz*, born June 22, 1909; (4) Princess *Maria Cristina*, born December 12, 1911; (5) Prince *Juan*, born June 20, 1913; (6) Prince *Gonzalo*, born October 24, 1914.

Sisters of the King.—I. *Maria-de-las-Mercedes*, Queen till the birth of her brother, born September 11, 1880; married February 14, 1901, to Prince Carlos of Bourbon, son of the Count of Caserta; died October 17, 1904; offspring, Alfonso, born November 30, 1901; Isabel, born October 16, 1904; II. *Maria Teresa*, born November 12, 1882; married January 12, 1906, to Prince Ferdinand of Bavaria; died September 23, 1912; offspring, Luis Alfonso, born December 12, 1906; José Eugenio, born March 26, 1909; Maria de las Mercedes, born October 3, 1911.

Aunts of the King.—I. Infanta *Isabel*, born December 20, 1851; married May 13, 1868, to Gaetan, Count de Girgenti; widow, November 26, 1871. II. Infanta *Maria-de-la-Paz*, born June 23, 1862; married, April 2, 1883, to Prince Ludwig, eldest son of the late Prince Adalbert of Bavaria; offspring, Fernando Maria, born May 10, 1884; married January 12, 1906, the Infanta Maria Teresa (*see above*), married again, October 1, 1914, Luisa de Silva y Fernández de Henestrosa (Duchess of Talavera de la Reina); Adalberto Alfonso, born June 3, 1886; Maria del Pilar, born March 13, 1891. III. Infanta *Eulalia*, born February 12, 1864; married to Prince Antoine, son of Prince Antoine d'Orléans, Duc de Montpensier, March 6, 1886; the marriage was dissolved July, 1900; offspring, Alfonso Maria, born November 12, 1886; married July 15, 1909, Princess Beatrice of Saxe-Coburg Gotha; Luis Fernando Maria, born November 5, 1888. (All sisters of the late King.)

The King, Alfonso XIII., has a civil list, fixed by the Cortes, 1886, of 7,000,000 pesetas, or 280,000*l.*, exclusive of allowances to members of the royal family. The annual grant to the Queen is fixed at 450,000 pesetas (18,000*l.*), and, should the King predecease her, 250,000 pesetas (10,000*l.*) during widowhood. The annual grant to the mother of the King was fixed at 250,000 pesetas. To the Prince of Asturias, heir to the throne, 500,000 pesetas have been assigned, and to the Infante Don Jaime and Infanta Doña Beatriz, 150,000 pesetas each. The Infantas, the King's aunts, receive 550,000 pesetas.

The following is a list of the sovereigns and rulers of Spain, with dates of their accession, since the foundation of the Spanish Monarchy by the union of the crowns of Aragon and Castile.

<i>House of Aragon.</i>		<i>House of Bonaparte.</i>	
Ferdinand V., 'The Catholic'	1479	Joseph Bonaparte . . .	1808
<i>House of Habsburg.</i>		<i>House of Bourbon.</i>	
Charles I.	1516	Ferdinand VII., restored . .	1814
Philip II.	1556	Isabella II.	1833
Philip III.	1598	Provisional Government . .	1868
Philip IV.	1621	Marshal Serrano, Regent . .	1869
Charles II.	1665	<i>House of Savoy.</i>	
<i>House of Bourbon.</i>		Amadeo	1870
Philip V.	1700	<i>Republic 1873-75.</i>	
Ferdinand VI.	1746	<i>House of Bourbon.</i>	
Charles III.	1759	Alfonso XII.	1875
Charles IV.	1788	Maria Cristina (<i>pro tem.</i>) .	1886
Ferdinand VII.	1808	Alfonso XIII.	1886

Government and Constitution.

I. CENTRAL GOVERNMENT.

The present Constitution of Spain, drawn up by the Government and laid before a Cortes Constituyentes, elected for its ratification, March 27, 1876, was proclaimed June 30, 1876. It enacts that Spain shall be a constitutional monarchy, the executive resting in the King, and the power to make laws 'in the Cortes with the King.' The Cortes are composed of a Senate and Congress, equal in authority. There are three classes of senators—first, senators by their own right, or *Senadores por derecho propio*; secondly, life senators nominated by the Crown—these two categories not to exceed 180; and thirdly, 180 senators, elected by the Corporations of State—that is, the communal and provincial States, the church, the universities, academics, &c.—and by the largest payers of contributions. Senators in their own right are the sons, if any, of the King and of the immediate heir to the throne, who have attained their majority; Grandees who are so in their own right and who can prove an annual *renta* of 60,000 pesetas, or 2,400*l.*; captain-generals of the army; admirals of the navy; the *Patriarca de las Indias* (the 'Patriarch of West Indies'), *i.e.*, the Primate of Spain (the Bishop of Sion, head chaplain of the Royal Household) and the archbishops; the presidents of the Council of State, of the Supreme Tribunal, of the Tribunal de Cuentas del Reino, and of the Supreme Council of War and of the Navy after two years of office. The elective senators must be renewed by one-half every five years, and by totality every time the Monarch dissolves that part of the Cortes. The Congress is formed by deputies 'named in the electoral Juntas is the form the law determines,' in the proportion of one to every 50,000 souls of the population. According to a law of August 8, 1907, voting is compulsory for all males over the age of 25: with a few unimportant exceptions. This law further enacts that all such voters must be registered on the voting list, possess full civil rights, and must have been residents of a Municipal district for at least 2 years. Members of Congress must be 25 years of age; they are re-eligible indefinitely, the elections being for five years. Deputies to the number of 98 are elected by *scrutin de liste* in 28 large districts in which minorities may be duly represented. There are in all 417 deputies. The deputies cannot take State office pensions, and salaries; but the ministers and State officials of a salary higher than 15,003 pesetas are exempted from this law. Since April 1, 1920, senators and

deputies are paid 6,000 pesetas (240*l.*) a year. Both Congress and Senate meet every year. The Monarch has the power of convoking them, suspending them, or dissolving them; but in the latter case a new Cortes must sit within three months. The Monarch appoints the president and vice-presidents of the Sénate from members of the Senate only; the Congress elects its own officials. The Monarch and each of the legislative chambers can take the initiative in the laws. The Congress has the right of impeaching the ministers before the Senate.

State of the parties in the Senate (elected January 2, 1921):—Liberals, 58; Conservatives, 90; Regionalists, 6; Catholics and Jaimistas, 5; Reformists, 2; Republican, 1; Independents, 18.

State of parties in the Congress (elected Dec. 19, 1920):—Liberals, 111; Conservatives, 223; Republicans, 16; Socialists, 3; Reformists, 8; Regionalists, 20; Catholics and Jaimistas, 8; Independents, 11.

The Constitution of June 30, 1876, further enacts that the Monarch is inviolable, but his ministers are responsible, and that all his decrees must be countersigned by one of them. The Cortes must approve his marriage before he can contract it, and the King cannot marry any one excluded by law from the succession to the crown. Should the lines of the legitimate descendants of the late Alphonso XII. become extinct, the succession shall be in this order—first, to his sisters; next to his aunt and her legitimate descendants; and next to those of his uncles, the brothers of Fernando VII., ‘unless they have been excluded.’ If all the lines become extinct, ‘the nation will elect its Monarch.’

The executive is vested, under the Monarch, in a Council of Ministers (constituted March 8, 1922) as follows:—

President of the Council.—Sanchez Guerra.

Minister of Foreign Affairs.—Fernandez Prada.

Minister of Justice and Worship.—Senor Ordonez.

Minister of War.—General Olaguer.

Minister of Marine.—Admiral Riera.

Minister of Finance.—Senor Bergamin.

Minister of the Interior.—Senor Pinies.

Minister of Public Instruction.—Senor Montejo.

Minister of Public Works.—Senor Arquelles.

Minister of Labour.—Senor Calderon.

II. LOCAL GOVERNMENT.

The various provinces and communes of Spain are governed by the provincial and municipal laws. Since January 1, 1918, every commune has its own elected *Ayuntamiento*, consisting of from five to fifty *Regidores*, or *Concejales*, and presided over by the *Alcalde*, at whose side stand, in the larger towns, several *Tenientes Alcaldes*. The entire municipal government, with power of taxation, is vested in the *Ayuntamientos*. Half the members are elected every two years, and they appoint the *Alcalde*, the executive functionary, from their own body. Members cannot be re-elected until after two years. Each province of Spain has its own Assembly, the *Diputacion Provincial*, the members of which are elected by the constituencies. The *Diputaciones Provinciales* meet in annual session, and are permanently represented by the *Comision Provincial*, a committee appointed every year. The Constitution of 1876 secures to the *Diputaciones Provinciales* and the *Ayuntamientos* the government and administration of the respective pro-

vines and communes. Neither the national executive nor the Cortes have the right to interfere in the established municipal and provincial administration except in the case of the action of the *Diputaciones Provinciales* and *Ayuntamientos* going beyond the locally limited sphere to the injury of general and permanent interests. In the Basque provinces self-government has been almost abolished since the last civil war, and they are ruled as the rest of Spain. Notwithstanding the provisions of the Constitution pressure is too frequently brought to bear upon the local elections by the Central Government.

Area and Population.

Continental Spain has an area of 190,050 square miles, but including the Balearic and Canary Islands and the Spanish possessions on the north and west coast of Africa, the total area is 194,783 square miles. The growth of the population has been as follows:—

Census year	Population	Increase	Rate of annual increase
1857	15,464,340	—	—
1860	15,655,467	191,127	0·44
1877	16,631,869	976,402	0·37
1887	17,560,352	928,483	0·56
1897	18,121,472	561,120	0·32
1900	18,607,674	486,202	0·89
1910	19,950,817	1,343,143	0·72

Area and population of the forty-nine provinces:—

Province	Area in square miles	Estimated Population, Dec 31, 1919	Pop. per sq. mile	Province	Area in square miles	Estimated Population, Dec. 31, 1919	Pop. per sq. mile.
Alava	1,175	96,922	82·5	Logroño	1,946	182,389	93·7

Lérida	4,690	292,423	62·1	Total	194,783	20,788,844	106·6

For the population of each of the provinces according to the 1910 Census see STATESMAN'S YEAR-BOOK, 1914, p. 1300.

The population of Ceuta (23,907) is included in that of Cádiz. Besides Ceuta, Spain has, on the African Coast, the Alhucema isles (pop. 406), the Chafarinas (736), Melilla (42,592), Peñon de la Gomera (400), Rio de Oro (495), and Nador (2,740). The North African possessions are no longer used as convict stations, the centuries old 'Presidios' having been suppressed by a recent Decree and the prisoners brought back to the Peninsula. The Basques in the North, numbering some 400,000, differ in race and language from the rest of Spain; there are 50,000 gipsies, and a small number of Jews.

The following were the estimated populations of the principal towns on December 31, 1918, viz. :—

Town	Pop.	Town	Pop.	Town	Pop.
Madrid . . .	608,793	Palma ¹ . . .	67,544	Coruña . . .	61,219
Barcelona . . .	582,240	Cádiz . . .	63,101	Linares ¹ . . .	37,039
Valencia . . .	236,447	Córdoba . . .	66,492	Badajoz . . .	34,450
Sevilla . . .	150,631	Santander . . .	69,068	Alcoy ¹ . . .	33,896
Málaga . . .	136,365	S. Cruz (Canaries). . .	63,649	Vitoria . . .	24,115
Murcia . . .	123,936	Las Palmas . . .	70,233	Castellon . . .	31,913
Zaragoza . . .	117,742	Jerez ¹ . . .	62,628	Burgos . . .	30,460
Cartagena ¹ . . .	102,542	Alicante . . .	55,730	Salamanca . . .	28,931
Bilbao . . .	98,904	Gijon ¹ . . .	55,218	Pamplona . . .	29,215
Granada . . .	77,477	Oviedo . . .	55,160	Jaén . . .	30,135
Valladolid . . .	69,799	San Sebastian . . .	52,997	Huelva . . .	30,443
Lorca ¹ . . .	70,807	Almeria . . .	49,707		

¹ Population Census, 1910.

The movement of population for 3 years was as follows :—

Years	Marriages	Births	Deaths	Surplus of births
1917	142,065	602,192	465,819	136,283
1918	141,294	612,555	695,619	- 83,064
1919	166,716	585,352	482,030	103,322

Emigration figures for 4 years as follows :—

Year	Male	Female	Total	Year	Male	Female	Total
1917	33,976	9,075	43,051	1919	76,086	25,894	101,980
1918	26,377	9,877	36,254	1920	147,918	—	—

Emigration from Spain is chiefly to Argentina, Cuba, Brazil, Uruguay and Mexico.

Religion.

The national Church of Spain is the Roman Catholic, and the whole population of the kingdom adhere to that faith except about 30,000, Protestants (about 7,000), Jews (about 4,000), Rationalists, etc. Within the Peninsula, apart from Portugal, there are 9 metropolitan sees and 47 suffragan sees, the chief being Toledo. The Constitution requires the nation to support the clergy and the buildings, &c., of the Church, and for this purpose the State expends annually about 47,000,000 pesetas. Efforts are being made for a reduction of

the Church estimates. The relations between Church and State are regulated by the Concordat of May 6, 1851, and although it is laid down in this that only the orders of San Vicente de Paul, and Felipe Neri, with one other to be subsequently named, should be permitted in Spain, many other orders have been allowed to establish themselves. The third order referred to above, has never been named, and the conditions of this Concordat have never been rigidly adhered to. A law known as the 'Padlock Bill' was passed in December, 1910, prohibiting the establishment of any more religious houses, without the consent of the Government. This law lapsed on December 31, 1912, but its effect was prolonged by an order from the Pope to the Spanish Bishops. This temporary measure will be replaced by a definite arrangement which is at present being negotiated with Rome. Liberty of worship is now allowed to Protestants and all other religious bodies. The communities of the religious orders are numerous and influential in Spain. Many of them have schools, and about 5,000 of their members are engaged in teaching boys of the upper and middle classes, while, within many of their establishments, industries of all kinds are carried on. The number of religious houses in Spain is about 3,419, of which 768 are for men and 2,681 for women. Of those for men, 628 are devoted to education, 73 to charity, and 67 to the training of priests. The total number of monks is about 9,827 (including 1,294 foreigners). The orders for women comprise 1,406 for education, 887 for charity, and 378 for a contemplative life. The number of nuns is about 37,849 (including 2,418 foreign women). In 1919 there were in Spain 66 cathedrals, 19,926 parish churches, and 17,813 chapels and sanctuaries.

Instruction.

The latest census returns show that a large proportion of the inhabitants are illiterate. In 1860 19·97 per cent. of the population could read and write; 4·50 per cent. could read only; and 75·52 per cent. could neither read nor write. In 1910, 38·59 per cent. could read and write, 1·77 per cent. could read only, and 59·35 per cent. could neither read nor write.

By a law of 1857 an elaborate system of primary education was ordained: education was to be compulsory, there was to be a primary school for every 500 inhabitants, and instruction was to be on a rigidly uniform plan. This system has not been rigidly enforced, but various improvements have been effected, especially by a law of June 9, 1909, which made education obligatory. The country is divided into eleven educational districts, with the universities as centres. The public and primary schools are since 1902 supported by Government, the total sum spent in 1919 was 52,249,373 pesetas. Most of the children are educated free. The Royal Decree of July 1, 1902, regulates all schools, whether belonging to corporations or private persons, whether self-supporting or in receipt of Government or municipal subventions. It requires schools to be authorised by Government authority, and provides for their periodical inspection, for the enforcement of rules respecting sanitation and discipline, and for the appointment of properly qualified teachers.

There are 26,108 public schools, and 5,669 private schools, the total number of pupils being 2,604,308. Secondary education is conducted in 'institutions,' or middle-class schools, there must be at least one of them in every province. There are at present 58 institutions with 51,815 pupils. These institutions prepare for the universities, of which there are eleven, attended by 24,501 students. The universities are at Barcelona, Granada, Madrid, Murcia, Oviedo, Salamanca, Santiago, Sevilla, Valencia, Valladolid, and Zaragoza. Each university has two or more

of the faculties of philosophy and letters, law, sciences, medicine, and pharmacy. There are, besides, a medical faculty at Cádiz in connection with the University of Seville, and in the Canary Islands an educational establishment dependent on the University of Seville. Government also supports various special schools. In 1919-20 the total sum expended on education and the fine arts was 107,123,205 pesetas.

Since 1902 the Government has sent scholars, teachers, and professors to foreign countries to study. Since 1910 there has existed a Board of Scientific Research (*Junta para ampliación de estudios*), which connects the work done abroad with the organisation of new laboratories in Spain, and publishes sets of books which show the results obtained. Since 1910 this Board has started the foundation of Halls of Residence for students where an important educational and a certain amount of scientific work is done. The total expenditure of this Board is 800,000 pesetas per annum.

Justice and Crime.

Justice is administered by *Tribunales* and *Juzgados* (Tribunals and Courts), which conjointly form the *Poder Judicial* (Judicial Power). Judges and Magistrates cannot be removed, suspended or transferred except as set forth by law.

The Judicature is composed of:—1 *Tribunal Supremo* (Supreme High Court); 15 *Audiencias Territoriales* (Divisional High Courts); 50 *Audiencias Provinciales* (Provincial High Courts); 522 *Juzgados de Primera Instancia* (Courts of First Instance); and 9,345 *Juzgados Municipales* (District Court, or Court of Lowest Jurisdiction held by Justices of the Peace).

The *Tribunal Supremo* consists of a President, three Courts of Justice and one for administrative purposes; it is empowered with disciplinary faculties; is Court of Cassation in civil and criminal trials; decides in first and second instance disputes arising between private individuals and the State; and hears criminal causes against Princes of the Royal Family, Cabinet Ministers, and Presidents of the Senate and Congress.

The *Audiencias Territoriales* have power to try in second instance sentences passed by judges in civil matters, and in first instance all criminal trials of the province.

The *Audiencias Provinciales* are Courts competent to try and pass sentence in first instance on all cases filed for delinquency. In the most important ones evidence is taken by a jury composed of twelve lay judges.

The *Juzgados de Primera Instancia* are presided over by one Judge acting in civil matters as Judge of First Instance, and in criminal matters as *Juez de Instrucción* (examining Magistrate).

The *Juzgados Municipales* are constituted of a Judge and two Deputy Judges. This Court is competent to try small civil cases not exceeding 500 pesetas (£20) in value, and petty offences.

Old Age Pensions.

By a law dated February 27th, 1908, the 'Instituto Nacional de Previsión' was created for the purpose of granting Old Age Pensions, and administering a system of social insurance. The funds of the Institution are made up of an endowment, annual State subsidy, and private and public donations. The maximum annual pension obtainable is 1,500 pesetas (£60). The number of old-age pensions granted up to December 31, 1919, was 87,953. and 141,422 for infants, a total of 229,375 pensions.

Finance.

Revenue and expenditure for five years :—

—	1917	1918	1919-20	1920-21 ¹	1921-22 ¹
	1,000 Pesetas	1,000 Pesetas	1,000 Pesetas	1,000 Pesetas	1,000 Pesetas

Expenditure	1,615,600	1,846,754	3,074,959	2,403,730	2,550,794

¹ Estimates.

The budget for the fiscal year 1921-22 is made up as follows :—

Revenue	Pesetas	Expenditure	Pesetas
Direct taxes	731,728,000	Royal household	9,415,000
Indirect Taxes	711,560,000	Legislature	8,166,000
Monopolies	448,545,000	Public Debt	571,584,000
State properties—		Pensions	87,700,000
Income	27,714,000	Presidency of the Council	
Sales	621,000	of Ministers	955,000
Resources of the Treasury	56,495,000	Ministry of Foreign Affairs	11,681,000
		“ „ Grace & Justice	91,756,000
		“ „ War	374,134,000
		“ „ Marine	76,225,000
		“ „ Public Instruct-	
		ion & Fine Arts	132,051,000
		“ „ Food	8,173,000
		“ „ the Interior	228,844,000
		“ „ Finance	34,948,000
		Cost of collecting Revenue	216,135,000
		Spanish Possessions in the	
		Gulf of Guinea	2,387,000
		Expenditure in Morocco	135,890,000
		Total Ordinary	2,189,279,000
		Total Extraordinary	361,515,000
Total	1,976,663,000 (70,595,107.)	Grand Total	2,550,794,000 (91,099,785.)

The National Debt of Spain on January 1, 1922, amounted to 11,963,084,525 pesetas (478,523,381*l.*), composed as follows :—

<i>External Debt</i> :—	Pesetas.
3 per cent. and 4 per cent. perpetual exterior debt—	
scaled bonds	910,761,400
<i>Internal Debt</i> :—	
4 per cent. perpetual internal debt	8,385,521,528
5 per cent. redeemable debt (1900)	1,420,002,500
5 per cent. redeemable debt (1917)	1,003,812,500
4 per cent. redeemable debt (1908)	141,980,000
Non-interest bearing debt due to officials	1,006,597
‘ Pagarés ’ of the Ministry of the Colonies	100,000,000
	11,963,084,525

Defence.**ARMY.**

Military service in Spain is compulsory. The total term of service is or 18 years. The law in force (1912) divides this period into the following :—
1 year, recruits in deposit (*‘ Reclutas en Caja ’*); 3 years, active army (1st

standing); 5 years, active army (2nd standing); 6 years, reserve; and 3 years, territorial reserve. There is at present no organisation for the 'territorial reserve.'

In January, 1916, a central general staff of the army was appointed. The country is divided up into 8 territorial districts, each under a 'Captain-General.' The 1st to 6th inclusive each furnish to the field army 2 divisions, the remaining two, 1 division. A division consists of 2 infantry brigades, each consisting of 2 regiments of 3 battalions, but the third battalion is only a cadre in peace time, 1 regiment of cavalry, 1 regiment of field artillery of 6 batteries. The regiments of engineers have no fixed distribution. They consist of 6 regiments of sappers, 1 of telegraphy and 1 of railways; all of which are irregularly distributed among the different army corps. There are also 3 independent brigades of chasseurs, each of 6 battalions, 4 regiments of mountain artillery, making 16 batteries, and 1 regiment of horse artillery of 6 batteries, and a railway regiment of 8 active and 8 dépôt companies. Batteries have 4 guns. There is 1 permanent cavalry division of 2 brigades, and there are 3 permanent cavalry brigades. The Aeronautical Service consists of headquarters at Guadalajara, a balloon section, an aeronautic section and a dépôt. The peace establishment for the year 1921-22 was fixed at 189,745 men of all ranks, and the total strength of the field army would probably be about 300,000 combatants. The army is organised in 16 divisions, each of 2 brigades of infantry, and 1 of artillery.

For the units of the second line, or reserve troops, there are at present 116 battalion cadres, 14 squadron cadres, and 14 battery cadres. The second line troops are intended to provide 7 divisions of about 13,000 combatants each. Total about 90,000.

There are also the Guardia Civil and the Carabineros. The former is a constabulary, and the latter a military police used as Customs guard on frontier. Both are recruited from the army and under military discipline. The total strength of the Guardia Civil for 1921 is as follows:—Infantry, 17,968; cavalry, 2,414. Carabineros: Infantry, 13,426; cavalry 604.

Outside the Spanish peninsula, there are the 3 military commands of Melilla, Ceuta and Larache on the coast of Morocco, also the Balearic Islands and the Canary Islands, each of which forms a military district. The troops in the Balearic and Canary Islands are mostly recruited from the islanders. In Africa the troops are Spanish, and are always on a war footing. In June, 1921, operations in Spanish Morocco were in progress against the Chieftain Raisuli. On July 24, the Spaniards sustained a serious disaster in the Rif, the losses to the Spanish and native troops in killed, wounded and missing amounting to 20,000. The Spanish forces fell back on Melilla, where a new force of 20,000 was organised, while 30,000 more were assembled at Tetuan and Larache. The main Spanish advances began in the middle of September and made good progress, but operations were not concluded at the end of 1921.

The Spanish infantry is armed with the Mauser rifle, model 1893. Calibre .275. The cavalry have the Mauser carbine. The field artillery gun is a Schneider Canet 14½ pr. of 19106.

A corps of aviators has recently been created. The military school of aeronautics is at Cuatro Vientos, 5½ miles from Madrid. In the last year large orders for aeroplanes have been placed abroad, and many French, British and Italian machines are now arriving. The service of military aviation is being reorganised on a large scale, and no official figures are obtainable for the number of machines now in use. The following wireless stations, Telefunken

system, have been erected and are in charge of the military. Central station at Carabanchel, range 540 miles; Barcelona, range 430 miles; Melilla, Ceuta, Tetuan, Bilbao, Valencia, range 320 miles; Almeria, Larache, range 220 miles; also at Mahon (Balears) and Coruña.

Spain has several fortresses which guard the frontiers and the coast. On the Western Pyrenees, Oyarzun and Pamplona. On the central Pyrenees, Jaca; and on the eastern Pyrenees, Girona. On the Portuguese side, Badajoz (an old fortification). And finally on the coast, Ferrol, Cádiz, Cartagena, Mahon (Balearic Islands) and Ceuta (Africa).

The old battleship *Pelayo* has now no value.

There are 13 destroyers, 26 modern torpedo boats, 12 gunboats, and submarines as indicated below.

A programme covering 6 years (approved in February, 1915) was as follows:—4 cruisers, 6 destroyers, 28 submarines, 3 gunboats, 18 coast defence vessels, and the acquisition of submarine mines. The work has been delayed, and the programme is subject to variation. Two light cruisers, 4,820 tons, are building at Ferrol, as also at Cartagena three gunboats. As part of this programme, 3 submarines were built in Italy and 6 additional, 610–740 tons, are in hand at Cartagena, giving Spain a submarine flotilla comprising 10 boats. At Cartagena also three destroyers, 1,140 tons, 34 knots, are building.

The dockyard at Ferrol is worked by a British syndicate, employing Spanish workmen.

A naval wireless telegraphic station, Telefunken system, with a range of 300 miles, is situated at San Fernando (Cadiz). There are also wireless stations at Cartagena and Ferrol.

For 1921 the strength of the navy was fixed at 11,340 sailors and 4,106 marines. Total number of officers in active service in the navy, including all departmental corps: 1,592. Reserve: 202.

Production and Industry.

Spain is a preponderatingly agricultural country. Of the total number of inhabitants engaging in economic activities, 24·61 per cent. are engaged in agriculture, 0·23 per cent. in hunting and fishing, 0·42 per cent. in mining, 5·02 per cent. in manufacture, 0·73 per cent. in transport, 0·74 per cent. in commerce, and 3·16 belong to the labouring classes.

Of the soil of Spain 88·45 per cent. is classed as productive; of this 35·5 per cent. is devoted to agriculture and gardens, 2·5 vineyards, 2·9 olive culture, 25·3 natural grass, 22·2 fruits.

The soil is subdivided among a very large number of proprietors. Of 3,426,083 recorded assessments to the property tax, there are 624,920 properties which pay from 1 to 10 reales; 517,666 from 10 to 20 reales; 642,377 from 20 to 40 reales; 788,184 from 40 to 100 reales; 416,546 from 100 to 200 reales; 165,202 from 200 to 500 reales; while the rest, to the number of 279,188, are larger estates, charged from 500 to 10,000 reales and upwards. The subdivision of the soil is partly the work of recent years, for in 1800 the number of farms amounted only to 677,520, in the hands of 273,760 proprietors and 403,760 farmers.

The area under the principal crops and the yield (for 3 years) were as follows:—

	Area.			Yield.		
	1919	1920	1921	1919	1920	1921
	Acres.	Acres.	Acres.	Cwts.	Cwts.	Cwts.

Vetches	157,955	164,842	164,147	1,027,252	1,148,398	1,643,846

In 1920, 3,289,714 acres were under vines (3,300,965 acres in 1919) and produced 9,576,528,864 pounds of grapes (7,914,252,192 pounds in 1919), yielding ordinary red and white wines to the extent of 706,756,116 gallons (543,904,788 gallons in 1919). Sherry, malaga, and generous wines were exported. 3,881,096 acres (1920) under olives yielded 1,662,384 tons of olives and 316,963 tons of oil. Other products are esparto, flax, hemp, pulse; oranges and hazel nuts are largely exported, and Spain has important industries connected with the preparation of wine and fruits. Silk culture is carried on in Valencia, Murcia, and other provinces. There are 30 (cane) sugar factories and 43 (beet-root) sugar factories in Spain. The production in 1920 of the former was 5,976 metric tons and of the latter 211,674 metric tons. In 1918, the total number of resinous pine-trees amounted to 5,970,833.

The number of farm animals in 1921 was estimated as follows:—Horses, 722,183; mules, 1,294,912; asses, 1,137,980; cows, 3,718,189; sheep,

20,521,677; goats, 4,298,056; pigs, 5,151,988; camels (Canary Islands), 4,268; poultry, 25,102,973.

Spain is rich in minerals. Iron is abundant in the provinces of Vizcaya, Santander, Oviedo, Navarra, Huelva, and Seville; copper in the provinces of Seville, Córdoba, and Huelva; coal is found in Oviedo, Leon, Gerona, Valencia, and Córdoba; zinc in Santander, Murcia, Guipúzcoa, and Vizcaya; cobalt in Oviedo; lead in Murcia, Jaen, and Almería; manganese in Oviedo, Huelva, and Seville; quicksilver in Ciudad Real and Oviedo; silver in Guadalajara; sulphate of soda in Burgos; salt in Guadalajara; sulphur in Murcia and Almería; phosphorus in Cáceres and Huelva. Platinum is reported to have been discovered in Spain in 1915.

In 1920 workers employed in connection with the mining industries were as follows: 104,918 men, 2,952 women, and 17,970 boys and girls under 18. The total value of the mineral output in 1920 was 500,984,695 pesetas at the pit mouth, there being 3,145 productive mining concessions covering an area of 319,144 hectares. Mining accidents caused 259 deaths. The quantities and values of the more important minerals in 1920 were as follow:—

Minerals	Metric tons	Value, Pesetas	Minerals	Metric tons	Value, Pesetas
Anthracite . . .	491,715	22,388,617	Coal . . .	4,928,989	305,456,023
Asphalt . . .	4,222	27,644	Lignite . . .	552,425	21,071,853
Mercury . . .	17,479	11,922,348	Manganese . . .	21,256	400,438
Sulphur . . .	77,039	1,940,038	Silver . . .	213	160,240

Copper . . .	852,193	14,420,723	Argentiferous lead . . .	10,313	560,839
Tin . . .	144	104,250	Salt . . .	62,647	608,001
Phosphorite . . .	42,896	2,748,610	Wolfram . . .	62	46,900
Iron . . .	4,767,693	54,240,401			
Iron pyrites . . .	711,823	6,581,929			

Spain has considerable manufactures of cotton goods, principally in Catalonia. In 1910 there were 742 undertakings employing about 68,300 looms, with 2,614,500 spindles; in woollen manufactures there are 8,800 looms with 662,000 spindles. There are in Spain about 144 paper mills (likewise in Catalonia) making writing, printing, packing and cigarette paper. There are 37 glass-making factories. Corks are manufactured to a large extent; in 1913, 46,320 tons, of a value of 1,970,420*l.*; in 1917, 59,073 tons, of a value of 2,303,847*l.*

In the Spanish fisheries the total number of boats employed was in 1918 about 24,907, of which 811 are steamers; fishermen, 104,999; and the value caught about 228,832,842 pesetas, representing a total weight of 141,914 tons. The most important catches are those of sardines, tunny fish, and cod. In Spain there are 677 factories, with 19,320 workmen, for the preparation of sardines and fish-preserved. The value of their output in 1918 was 87,521,002 pesetas.

Commerce.

Imports and exports in pounds sterling:—

Year	Imports	Exports	Year	Imports	Exports
	£	£		£	£
1916	51,238,860	55,109,889	1919	43,375,120	52,448,472
1917	53,135,596	52,831,257	1920	57,714,486	40,994,690
1918	24,394,077	37,917,084	1921	50,455,600	32,497,000

The foreign trade was distributed as follows in regard to classes of commodities:—

	Imports		Exports	
	1920	1921	1920	1921
	<i>Pescetas</i>	<i>Pescetas</i>	<i>Pescetas</i>	<i>Pescetas</i>
Raw material	424,140,000	388,280,000	213,040,000	150,960,000
Manufactured goods	630,120,000	507,640,000	322,780,000	224,600,000
Foodstuffs	329,690,000	359,360,000	473,100,000	421,130,000
All other	21,700,000	6,110,000	16,560,000	15,750,000
Total	1,405,650,000	1,261,390,000	1,025,480,000	812,440,000

The following table shows the various classes of imports and exports for two years:—

Description	1919		1920	
	Imports	Exports	Imports	Exports
	£	£	£	£

In 1920 the total value of wine exported was 6,287,621*l*.

The following table shows the distribution of the commerce of Spain (general and special imports, and general exports) in 1918 and 1919, in thousands of pesetas:—

Country	Imports from		Exports to	
	1918	1919	1918	1919
	1,000 Pesetas	1,000 Pesetas	1,000 Pesetas	1,000 Pesetas
United Kingdom	66,711	182,816	167,556	206,217
France	87,692	111,289	942,623	492,142
Germany	74	3,824	—	4,567
United States	142,024	391,566	49,872	98,420
Cuba	12,011	14,173	42,771	44,167
Porto Rico	9,009	6,057	1,220	1,565
Philippine Islands	25,915	19,424	3,246	1,327
Morocco	3,622	7,330	23,806	22,544
Other countries	303,125	397,393	406,007	501,913

The customs receipts and post dues in 1915 amounted to 5,339,147*l.*; in 1916, 6,001,733*l.*; in 1917, 5,475,660*l.*; in 1918, 4,787,051*l.*; in 1919, 10,478,684*l.*; in 1920, 14,418,672*l.*

There is no formal treaty providing for 'most favoured nation treatment' between Great Britain and Spain, but, under an Act passed by the Spanish Cortes in 1894, imports from the United Kingdom into Spain are subject to the minimum tariff, and British merchants have all the advantages conceded to those of any European State. Under notes exchanged on December 28, 1894, there is an understanding that commercial relations between the two countries will continue on this basis, subject to six months' notice on either side.

The special commercial treaty with Portugal was denounced on September 30, 1912, all franchises suppressed, and ordinary tariff rates will be henceforth applied to Portuguese exportations to Spain.

The quantities and value of wine imported into the United Kingdom from Spain were as follows in each of the last five years (Board of Trade returns):—

—	1916	1917	1918	1919	1920
Quantities (gallons)	3,300,310	1,774,794	1,575,054	5,423,448	3,378,085
Value (£)	552,385	425,937	613,867	2,342,133	1,444,395

Besides wine, the following were the leading imports from Spain into the United Kingdom in the two years:—

—	1919	1920	—	1919	1920
	£	£		£	£
Iron ore	7,667,618	10,493,059	Oranges	8,658,008	7,111,199
Silver ore	133,076	145,890	Raisins	533,941	965,685
Pyrites	876,650	2,001,455	Esparto, &c.	621,387	1,122,904
Zinc ore	52,757	30,957	Onions	2,013,400	1,839,250
Quicksilver	684,225	243,438	Cork	213,759	420,517
Lead	1,288,881	2,059,128			

The chief British exports to Spain in 1920 were machinery, of the value of 2,854,110*l.*; iron and steel manufactures, 2,892,134*l.*; coal, 1,351,422*l.*; medicines and drugs, 67,604*l.*; cotton goods, 2,268,010*l.*; woollen goods, 624,610*l.*

Total trade between Spain and the United Kingdom, in thousands of pounds for five years:—

	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Spain into U. Kingdom	22,165	30,649	34,646	37,296	21,823
Exports to Spain from U. Kingdom	4,779	3,860	11,092	19,273	13,458

Shipping and Navigation.

The merchant navy of the Kingdom contained on January 1, 1922, 621 steamers of 912,817 tons net, and 581 sailing vessels of 101,285 tons net. Bilbao and Barcelona are the chief maritime centres.

The shipping entered and cleared at Spanish ports in two years was as follows:—

	1919		1920	
	No.	Tons	No.	Tons
Entered:				
With cargoes	7,509	3,197,973	10,408	8,503,928
In ballast	7,002	4,791,171	6,714	7,316,424
Total	14,511	7,989,144	17,122	15,820,352
Cleared:				
With cargoes	14,148	7,360,050	12,849	10,957,654
In ballast	1,220	943,519	1,760	2,038,001
Total	15,368	8,303,569	14,609	12,995,655

Of the vessels entered in 1920, 9,519 vessels of 5,426,611 tons (entered) and 8,357 vessels of 4,485,709 tons (cleared) were Spanish; and in 1919, 10,270 vessels of 3,494,034 tons (entered) and 10,969 vessels of 2,309,065 tons (cleared) were Spanish.

Internal Communications.

In 1917 the total length of highways and roads in Spain was 74,149 kilometres (45,972 miles).

The total length of the railways in Spain in 1919 was 15,727 kilometres (9,436 miles), of which 11,529 kilometres (6,917 miles) are of normal gauge (1·67 metres, or 5·48 feet), and 4,186 kilometres (2,512 miles) are of varying gauges, chiefly 1 metre (3·28 feet). The remaining 12 kilometres (7 miles) are cogwheel and funicular lines. In 1919, 83,568,702 passengers were carried on the different lines, and 35,148,638 tons of goods transported. In October, 1919, the first underground electric railway service in Spain (on the model of the London 'tubes') was inaugurated in Madrid, covering a distance of 5 kms. (3 miles). In 1920 the total length of electric tramways in Spain was 611 miles.

The whole of the Spanish railways belong to private companies, but nearly all have obtained guarantees or subventions from the Government. These amounted in 1919 for all the different lines to 7,238,997 pesetas. The State tax on tickets and merchandise for the year 1919 amounted to 49,584,491 pesetas. The most important companies are those in the North, with 3,681 kilometres (2,209 miles); Madrid-Saragossa-Alicante (system Antigua and Catalana), 3,664 kilometres (2,198 miles); Andaluces, 1,305 kilometres (783 miles); Madrid-Caceres-Portugal and West, 777 kilometres (467 miles); South of Spain, 397 kilometres (238 miles); La Robla to Valnaseda and Luchana (narrow gauge), 312 kilometres (187 miles); Medina-Zamora-Orense and Vigo, 299 kilometres (179 miles); and Calatayud-Teruel-Valencia (Central de Aragon), 299 kilometres (179 miles). The official gauge of the principal Spanish railways has hitherto, for strategical reasons, been purposely kept different from that of France, and in consequence of this passengers are obliged to change trains at the frontier stations. The attempt made in 1882 to remedy this state of affairs was not successful. In January, 1914, however, a scheme was ordered to be drawn up for the construction of a standard-gauge railway with a double track from Madrid to the French frontier.

The Post Office carried in 1920, in the inland service, 226,973,864 letters and post-cards, and 223,058,906 printed papers and samples; in the international service, 68,508,269 letters and post-cards, and 18,405,836 printed

papers and samples. There were 8,495 post-offices. Receipts, 57,516,085 pesetas; expenses, 44,641,683 pesetas.

The length of lines of telegraphs in Spain in 1920 was 70,728 miles; the total number of interior messages sent and received was 23,475,105. International messages sent 1,299,475, received 1,377,502, transit 146,415. The number of telegraph offices was 2,808.

In 1920 there were 192 urban telephone systems and 109 interurban circuits; the total number of telephone stations was 70,824.

The 'Compañía Nacional de Telegrafía sin Hilos' holds the Government concession for the Public Service with ships, and between the Peninsula and the Canary Islands, and the International Service with England, Italy, Austria and Germany. They have 10 wireless stations of the Marconi system: one at Aranjuez equipped with two sets: one with 430 miles range for communication with the shore stations, and another with 1,000 miles range designed to carry out international commercial service with England and other countries. Three stations situated at Cadiz, Tenerife, and Melanara (Las Palmas), equipped with two sets each: one of 860 miles range to carry out the service between Spain and the Canary Islands, and another of 250 miles range for ship and shore traffic. One station at Barcelona with two sets: one of 600 miles range to carry out international commercial service with Italy and Austria, respectively, and another of 250 miles range for ship and shore traffic. One station at Soller (Majorca) with 500 miles range to carry ship and shore traffic. Finally, four stations with a range of 400 miles to communicate with ships at sea and with the central station at Aranjuez, which are installed respectively at Vigo, Santander, Cabo de Palos, and Cabo Finisterre.

A royal decree ordains that all Spanish merchant vessels carrying passengers or mails, or subsidised by the Government, must be fitted with wireless telegraphy. Since February, 1917, wireless telegraphy has been made compulsory by Royal Order, for all vessels from 500 tons upwards, excepting those in the coasting trade. All Spanish men-of-war built in Spain since 1911 are also fitted up with Marconi wireless. Lately the stations at Aranjuez and Barcelona have been equipped with a 15 kw. Valve Transmitter of the latest Marconi pattern and special receiving installations of the most sensitive and up-to-date design. These improvements have been developed in order to cope with the increasing volume of the International Public Service. Automatic transmission at high speed will be carried out in the near future from Aranjuez, which will help to the development of the Public Wireless service between France and Spain, besides the other services already established.

The Wireless Stations aboard the ships of the Cia. Trasatlántica are being modernized and equipped with the latest type of valve and quenched spark transmitters, valve receivers and direction finders. These new arrangements will enable the ships to be permanently in communication with the shore stations throughout the whole voyage.

Money and Credit.

On December 31, 1921, the existing contract between the Bank of Spain and the Government ended. On January 1, 1922, new regulations came into force, according to which the Government will participate in the net profits of the Bank, up to certain limits. The note issue was prorogued for another 25 years, up to December 31, 1946. The capital of the Bank was increased from 150,000,000 pesetas to 177,000,000 pesetas. After 5 years the Bank is authorised further to increase the capital, up to the limit of 250,000,000 pesetas.

On January 28, 1922, the position of the Bank was as follows:—

	1,000 Pesetas		1,000 Pesetas
Cash in hand	<div> <div> gold . . . 2,515,542 silver . . . 631,216 bronze . . . 1,681 </div> </div>	Property.	8,894
Portfolio	2,045,235	Capital and reserve	228,000
Public Treasury	106,681	Notes in circulation	4,200,876
Advances to Treasury	150,000	Deposits and Accounts current	1,092,814
		Discounts	994,287

Savings bank deposits in Spain, December 31, 1919, 876,544,497 pesetas, distributed over 1,361,860 accounts. Post Office Savings Banks, which were created under the law of June 4, 1909, were opened on March 12, 1916. In 1919 there were 844 offices in operation, covering a total of 305,239 current accounts, representing 65,327,443 pesetas.

The nominal value of the money coined in Spain from 1868 to 1907 was : gold, 920,613,935 pesetas ; silver, 1,330,589,807 pesetas. In 1905-07 no gold was coined ; in 1906-07, no silver was coined. No coinage was struck during the years 1908 and 1909. In 1910, money coined to the value of 1,976,180 pesetas in 50 centime pieces (silver) to replace money retired from circulation. In 1911, 286,843 pesetas of 50 centime pieces were coined, as well as 60,286 pesetas of bronze centime pieces. In 1913, 1,429,149 pieces of 1 centime and 1,639,500 pieces of 2 centimes were coined. No new coins have been struck since 1914.

Money, Weights, and Measures.

The *Peseta* of 100 *Centimos* is of the value of a franc, $9\frac{1}{2}d.$, or 27 to 28 pesetas to the pound sterling, but the actual value is about $9d.$

Gold coins in use are 25, 20, 10, and 5-peseta pieces. Silver coins are 5-peseta, 2-peseta, 1-peseta, and 50-centime pieces.

Both gold and silver coins are of the same weight and fineness as the corresponding French coins. Under a law of July 29, 1908, the Government is withdrawing from circulation the spurious 5-peseta pieces which had become common. Gold coinage is not in general circulation.

Theoretically, there is a double standard of value, gold and silver, the ratio being $15\frac{1}{2}$ to 1. But of silver coins only the 5-peseta piece is legal tender, and the coinage of this is restricted.

On January 1, 1859, the metric system of weights and measures was introduced in Spain. But, besides these, the old weights and measures are still largely used. They are:—The *Quintal* = 220·4 lb. avoirdupois ; the *Libra* = 1·014 lb. avoirdupois ; the *Arroba*, for wine = $3\frac{1}{2}$ imperial gallons ; for oil = $2\frac{1}{2}$ imperial gallons ; the *Square Vara* = 1·09 vara = 1 yard ; the *anega* = $1\frac{1}{2}$ imperial bushel.

Diplomatic and Consular Representatives.

1. OF SPAIN IN GREAT BRITAIN.

Ambassador.—Alfonso Merry del Val (appointed March 16, 1913).

Minister-Counsellor.—Manuel Gomez y Garcia Barzanallana.

First Secretary.—Alberto Aguilar.

Second Secretary.—Vizconde de Mambblas.

Third Secretary.—Luis de Silva.

Attachés.—Eduardo M. Peña, Marquis de Murrieta, and Pedro de Zulueta.

Military Attaché.—Lieut.-Colonel Fernando Rich y Font.

Naval Attaché.—Captain Manuel Vierna.

Consul-General in London.—José Congosto (appointed February 6, 1913).

There are Consular representatives at Cardiff, Glasgow, Liverpool, Newcastle, and Southampton ; and Consular agents in all the principal towns.

2. OF GREAT BRITAIN IN SPAIN.

Ambassador.—The Rt. Hon. Sir Esme Howard, K.C.B., K.C.M.G., C.V.O. (appointed September 3, 1919).

Counsellor.—C. J. Wingfield.

Secretaries.—Hon. M. Herbert, W. E. Houstoun-Boswall, and J. V. Perowne.

Military Attaché.—Major-General the Hon. Sir. C. Sackville West, K.B.E., C.M.G.

Commercial Secretaries.—U. de B. Charles, and Stanley Gordon Irving.

Consul-General (at Barcelona).—A. L. S. Rowley.

There are Consular representatives at Bilbao, Cadiz, Coruña, Madrid, Seville, Malaga, Almeria, Valencia, and other places.

Colonies.

The area and population of the colonial possessions of Spain are approximately as follows:—

Colonial Possessions	Area: English square miles	Population
Possessions in Africa:		
Rio de Oro and Adrar	109,200	495
Ifni	965	20,000
Spanish Guinea	2,470	200,000
Fernando Po, Annobon, Corisco, Great Elobey, Little Elobey	814	23,844
Spanish Morocco ¹	7,700	600,000
Total, Africa	128,14	814,339

¹ See Morocco.

For administrative purposes the Canary Islands are considered part of Spain. The area of the islands is 3,342 square miles, and their population 506,414.

Rio de Oro and Adrar, stretching from the Wadi Draa 29° N. and 11° 4' W. to Cape Blanco 20° 46' N. and 17° 3' W. Politically there are three zones:—(1) Colony of Rio de Oro, 26° N. to 20° 46' N., an area of 65,500 square miles; (2) the Protectorate, between 27° 40' N. and 26° N. bordered on the East by 8° 40' W., an area of 34,700 square miles; (3) the occupied territory, between 27° 40' N. and the Wadi Draa, an area of about 9,000 square miles, settled by various treaties, 1900 to 1912. The Colonies are under the governorship of the Canary Islands, with a sub-governor resident at Rio de Oro. The capital of this colony is Villa Cisneros (lat. 23° 46' 55" N., long. 18° 11' 13" west of Paris). There is no town called Rio de Oro, the name being applied to the arm of the sea and the colony generally.

Ifni was ceded to Spain by Morocco in 1860. By the Franco-Spanish agreement of 1912 it extends along the West Coast of Morocco to the north of Wadi Draa, from Wad Nun on the south to Wad Bu Sedra on the north, and a distance of 15 miles inland from the coast. The occupation is purely nominal. Area, 965 square miles, population, 20,000. There are several small harbours and villages; the population is engaged in fishing, and in cultivating dates and garden produce.

The Spanish territory on the Gulf of Guinea, extends from the Muni to the Campo river and the Cameroons, its eastern boundary being

on the meridian of $11^{\circ} 20'$ E. of Greenwich. The capital is Santa Isabel, in the Island of Fernando Poo, which has an area of 1,185 square miles. The principal mountain is known as the Pico de Santa Isabel, or Clarence Peak (10,190 feet). The island is considered one of the most fertile spots on the West Coast of Africa. The other possessions of Spain in the Gulf of Guinea comprise the Islands of Annobon ($6\frac{1}{2}$ square miles), Little Elobey (35 acres), Great Elobey ($\frac{3}{4}$ square mile) and Corisco ($5\frac{1}{2}$ square miles), and the district of Rio Muni on the mainland (9,470 square miles), the principal town of which is Bata. The coast region is low and marshy and contains vast forests. The vegetation is luxuriant and at places along the coast there are Spanish, French, and English factories. But there are no harbours and the rivers are all inaccessible to vessels. The population of Fernando Poo is 12,108. There are about 250 to 300 Europeans in the island, about 30 of these being British. The population of Little Elobey is 222. Great Elobey is covered with bush; its population is 123. Corisco has a population of 845 and Annobon of 1,313, while the population of Rio Muni territory is estimated at 130 whites and 89,000 natives. All the colonies are under the control of a Governor-General, resident at Santa Isabel. A Sub-Governor is appointed to the district of Bata and another to the district of Elobey, which includes the Islands of Corisco and Annobon. The aborigines of Fernando Poo are called Bubis. Those of Elobey and Corisco are mostly of the Benga tribe, but like the people of Annobon they take the names of their respective islands. In Bata the Pamwes are the principal tribe. There are Catholic and American Presbyterian missions at work among the natives. Spain has given to France the right of pre-emption in case of the sale of any of these African colonies or the adjacent islands. Imports in 1917 from Fernando Poo to Spain, 6,261,379 pesetas, exports from Spain to Fernando Poo, 3,137,750 pesetas.

SWEDEN.

(SVERIGE.)

Reigning King.

Gustaf V., born June 16, 1858. Succeeded to the throne on the death of his father, Oscar II., December 8, 1907. Married, Sept. 20, 1881, to Princess Victoria, born August 7, 1862, daughter of Friedrich, Grand Duke of Baden.

Children of the King.

I. The Crown Prince *Gustaf Adolf*, Duke of Skåne, born Nov. 11, 1882, married, June 15, 1905, to Princess Margaret Victoria, born January 15, 1882 (died May 1, 1920), daughter of Prince Arthur, Duke of Connaught; offspring, Prince Gustaf Adolf, born April 22, 1906; Prince Sigvard, born June 7, 1907; Princess Ingrid, born March 28, 1910; Prince Bertil, born Feb. 28, 1912; Prince Carl Johan, born Oct. 31, 1916.

II. Prince Wilhelm, Duke of Södermanland, born June 17, 1884, married, May 3, 1908, to Grand Duchess Maria Pavlovna, born April 19, 1890, daughter of Grand Duke Paul Alexandrovitch of Russia, divorced March 17, 1914. Issue, Prince Lennart, born May 8, 1909.

Brothers of the King.

I. Prince *Oscar* Bernadotte, Count of Wisborg, born Nov. 15, 1859. Renounced his succession to the throne and married, March 15, 1888, Ebba Munck of Fulkila, born Oct. 24, 1858.

II. Prince *Carl*, Duke of Västergötland, born Feb. 27, 1861. Married August 27, 1897, to Princess Ingeborg, born Aug. 2, 1878, daughter of King Frederik of Denmark. Issue, Princess Margaretha, born June 25, 1899 (married May 22, 1919, to Prince Axel of Denmark); Princess Märtha, born March 23, 1901; Princess Astrid, born Nov. 17, 1905; and Prince *Carl*, born Jan. 10, 1911.

III. Prince *Eugen*, Duke of Närke, born Aug. 1, 1865.

King Gustaf V. is the fifth sovereign of the House of Ponte Corvo and great-grandson of Marshal Bernadotte, Prince of Ponte Corvo, who was elected heir-apparent of the crown of Sweden by the Parliament of the Kingdom, Aug. 21, 1810, and ascended the throne Feb. 5, 1818, under the name of Carl XIV. Johan. He was succeeded at his death, March 8, 1844, by his only son Oscar. The latter died July 8, 1859, and was succeeded by his eldest son Carl XV., at whose premature death without male children, the crown fell to his next surviving brother, the late King.

The royal family of Sweden have a civil list of 1,333,000 kronor. The sovereign, besides, has an annuity of 300,000 kronor, or 16,520%, voted to King Carl XIV. Johan and his successors on the throne of Sweden.

As to the dissolution of the Union with Norway, see under *Norway*.

The following is a list of the kings and queens of Sweden, with the dates of their accession, from the accession of the House of Vasa:—

<i>House of Vasa.</i>			
Gustaf I.	.	.	1521
Eric XIV.	.	.	1560
Johan III.	.	.	1568
Sigismund	.	.	1592
Carl IX.	.	.	1599
Gustaf. II. Adolf	.	.	1611
Christina	.	.	1632
<i>House of Pfaltz.</i>			
Carl X.	.	.	1654
<i>House of Vasa.</i>		Carl XI.	1660
		Carl XII.	1697
		Ulrika Eleonora	1718
		<i>House of Hesse.</i>	
		Fredrik I.	1720

		Adolf Fredrik	1751
		Gustaf III.	1771
		Gustaf IV. Adolf.	1792
		Carl XIII.	1809

House of Riksdagen.

Carl XIV. Johan.	1818
Oscar I.	1844

Carl XV.	1859
Oscar II.	1872
Gustaf V.	1907

Constitution and Government.

The fundamental laws of the Kingdom of Sweden are:—1. The Constitution or *Regerings-formen* of June 6, 1809; 2. The amended regulations for the formation of the Diet of June 22, 1866 (modified by acts passed in 1909, 1919 and 1921); 3. The law of royal succession of September 26, 1810; and 4. The law on the liberty of the press of July 16, 1812. The King must be a member of the Lutheran Church. His Constitutional power is exercised in conjunction with the Council of State or (in legislation) in concert with the Diet, and every new law must have the assent of the crown. The right of imposing taxes is, however, vested in the Diet. This Diet, or Parliament of the realm, consists of two Chambers, both elected by the people. The First Chamber consists of 150 members. Their election takes place by the members of the 'Landstings,' or provincial representations, and electors of six towns, not represented in the 'Landstings.' The Constituencies are 19, arranged in 8 groups, in one of which an election takes place in September every year. The manner of the election is proportional and regulated by a special election law. All members of the First Chamber must be above 35 years of age, and must have possessed for at least three years previous to the election either real property to the taxed value of 50,000 kronor (2,777*l.*), or an annual income of 3,000 kronor (166*l.*). They are elected for the term of eight years. The Second Chamber consists of 230 members elected for 4 years by universal suffrage, every man and woman over 23 years of age, and not under legal disability, having the right to vote. The country is divided into 28 constituencies, in each of which one member is elected for every 230th part of the population of the Kingdom it contains. The method of election is proportional, and the voter must indicate on the ballot paper the name of a party, or the occasional designation of a group of voters in the constituency. On the voting paper the names of the candidates must appear in vertical succession and these names may not exceed in number the number to be elected by more than two. In the counting of votes, the ballots are grouped according to parties and the order of candidates within each group determined. The places to be given to the different groups of voting papers are decided according to the d'Hondt rule. The members of both Chambers obtain salaries, free of income tax, for their services, at the rate of 3,400 kr. (24 kr. a day) and 4,500 kr. (32 kr. a day) for members living in or outside the capital, for each ordinary session, or, in the case of an extra session, 24 or 32 kr. a day, besides travelling expenses. The salaries and travelling expenses of the deputies are paid out of the public purse.

The executive power is in the hands of the King, who acts under the advice of a Council of State, the head of which is the Minister of State. The Ministry, appointed October 13, 1921, is composed as follows:—

Minister of State (Premier) and Minister for Foreign Affairs.—Hjalmar Branting.

Minister of Justice.—A. E. Akerman.

Minister of Defence.—P. A. Hansson.

Minister for Social Affairs.—H. Lindqvist.

Minister of Communications.—A. E. Örne.

Minister of Finance.—F. W. Thorsson.

Minister of Education and Ecclesiastical Affairs.—O. Olsson.

Minister of Agriculture.—S. Linders.

Minister of Commerce.—C. E. Srensson.

Ministers without Portfolio.—M. Sandler, M. Nothin, and K. J. D. Schlyter.

All the members of the Council of State are responsible for the acts of the Government.

The second chamber, elected 1921: 62 Moderates, 21 of the Agrarian Party, 41 Liberals, 93 Socialists and 13 of the Socialistic Lefts. The upper chamber (totally renewed 1921): 41 Moderates, 18 of the Agrarian Party, 38 Liberals, 50 Socialists, and 3 of the Socialistic Left.

The provincial administration is entrusted in Stockholm to a High Governor, and in each of the 24 governments to a prefect, who is nominated by the King. As executive officers of the prefects there are 491 sub-bailiffs (*Landfiskaler*). The right of the people to regulate their own local affairs is based on the communal laws of March 21, 1862. Each rural parish, and each town, forms a *coramune* or municipality in which all men and women over 23 years of age, and not under legal disability, who have paid the local taxes for at least one of the preceding three years are voters. In small communes and towns the communal assembly may itself decide on all questions of administration, police and communal economy. It may, however, elect a communal council to decide on the questions, and all communes with 1,500 inhabitants and over do so. These councils are named *Kommunalfullmäktige* in the country, and *Stadsfullmäktige* in the towns. Ecclesiastical affairs and questions relating to primary schools are dealt with by the parish assemblies, presided over by the pastor of the parish. Each government has a county council (*Landsting*) elected by men and women who enjoy municipal suffrage, but they must have completed their 27th year. The county council regulates the internal affairs of the government, meeting annually for a few days in September under a president elected by and from the members. Towns having a population of at least 1-150th of the total population of the realm, and towns already separated from the 'Landstings,' and where the number of inhabitants is not fallen below that which caused their separation, are administered separately by their municipal councils: these towns are Stockholm, Göteborg, Malmö, Norrköping, Hålsingborg and Gävle. As in elections for the Diet, so in the communal elections of municipal representatives, of members of the 'Landstings,' &c., the method of election is proportional. Women are eligible for communal offices.

Area and Population.

I. PROGRESS AND PRESENT CONDITION.

The first census took place in 1749, and it was repeated at first every third year, and subsequently, after 1775, every fifth year. At present, a general census is taken every ten years, besides which there are annual numerations of the people.

The area and population of Sweden, according to the censuses taken on December 31, 1910, and on December 31, 1920, are as follows:—

Governments (Län)	Area: English square miles	Population Dec. 31, 1910	Population Dec. 31, 1920 ¹	Pop. per square mile 1920
Stockholm (city)	53	342,323	419,429	7913.8
Stockholm (rural district)	2,987	229,181	243,193	81.4
Uppsala	2,051	128,171	136,719	66.7
Södermanland	2,629	178,568	190,473	72.5

Norrbottn	40,731	161,132	182,949	4.5
Lakes Vänern, Vättern, Mälaren, Hjälmaren	3,512	—	—	—
Total	173,035	5,522,403	5,903,762	34.1

¹ Provisional figures.

In 1920 there were 2,899,671 males and 3,004,091 females.
The growth of the population has been as follows:—

Year	Population	Increase per ct. per annum	Year	Population	Increase per ct. per annum
1880	4,565,668	0.95	1910	5,522,403	0.73
1900	5,136,441	0.71	1920	5,903,762	0.69

With the exception of (1910) 25,290 Finns, 7,168 Lapps, and some thousands others, the Swedish population is entirely of the Scandinavian branch of the Aryan family.

On December 31, 1910, there were 21,708 foreigners in Sweden, including subjects of Finland 5,538, Norway 4,537, Germany, 3,400, Denmark 2,900, Russia 2,900, the United States 816, the United Kingdom 238, other states 1,329.

The population was divided as follows in 1910:—

—	Male	Female	—	Male	Female
Unmarried	1,690,813	1,686,141	Widowed	105,170	221,816
Married	900,340	910,345	Divorced	2,906	5,372

MOVEMENT OF THE POPULATION.

1. *Births, Deaths, and Marriages.*

Year	Total living Births	Of which Illegitimate	Stillborn	Marriages	Deaths exclusive of Stillborn	Surplus of Births over Deaths
1916	121,679	18,126	3,087	35,021	77,771	43,908
1917	120,855	18,060	2,811	35,521	77,385	43,470
1918 ¹	117,739	—	—	38,626	104,183	13,556
1919 ¹	114,505	—	—	40,327	84,247	30,258
1920 ¹	133,505	—	—	42,829	78,112	60,393

¹ Provisional.2. *Emigration.*

Year	Immigrants	Total Emigrants	To U. S. of America	Year	Immigrants	Total Emigrants	To U. S. of America
1913	8,407	20,346	16,329	1917	5,811	6,440	2,462
1914	8,036	12,960	9,589	1918	4,932	4,853	1,416
1915	6,357	7,512	4,538	1919	7,809	7,337	3,777
1916	6,713	10,571	7,268	1920	10,841	10,242	6,691

II. PRINCIPAL TOWNS.

In 1860 the town population numbered only 431,519, in 1900 1,103,951, and at the beginning of 1921, 1,744,797, showing an increase of from 11 per cent. of the whole population of Sweden (in 1860) to 30 per cent. (in 1921).

Towns over 10,000 inhabitants at the beginning of 1921 :—

Stockholm . . .	419,429	Borås . . .	28,223	Uddevalla . . .	13,753

Eskilstuna . . .	30,253	Sundsvall . . .	16,776	Ystad . . .	11,336
Jönköping . . .	29,284	Södertälje . . .	14,964	Söderhamn . . .	11,262
Uppsala . . .	28,897	Trollhättan . . .	14,763	Luleå . . .	10,545

Religion and Instruction.

The mass of the population adhere to the Lutheran Protestant Church, recognised as the State religion. There are 12 bishoprics (Uppsala being the metropolitan see) and 2,588 parishes at the beginning of 1921. At the census of 1910, the number of 'Evangelical Lutherans' was returned at 5,497,689, the Protestant Dissenters, Baptists, and Methodists, numbering 14,715. Of other creeds, there were 3,070 Roman Catholics (under a Vicar Apostolic resident at Stockholm), 6,112 Jews, and 817 others. No civil disabilities attach to those not of the national religion. The clergy are chiefly supported from the parishes and the proceeds of the Church lands.

The Kingdom has two universities, at Uppsala (founded in 1477) and Lund (founded in 1668), the former having 2,493 and the latter 1,423 students in the autumn of 1920. There are also a State faculty of medicine in Stockholm (founded in 1810), with 926 students, and private universities in Stockholm (founded in 1877), philosophical and law faculties, with 868 students, and Göteborg (founded in 1889), philosophical faculty, with 201 students. In Stockholm there is also an academy of commerce with 197

students. In 1921 there were 77 public secondary schools, with 28,562 pupils; 51 people's high schools, 2,944 pupils (1921); 15 normal schools for elementary school teachers, 2,695 pupils; 2 high and 7 elementary technical schools, about 4,000 pupils; 5 navigation schools, 378 pupils (1920); military schools, agricultural schools, veterinary and other special schools; besides institutions and schools for deaf mutes and the blind. Public elementary instruction is gratuitous and compulsory (since 1842), and children not attending schools under the supervision of the Government must furnish proofs of having been privately educated. The school age is 7 to 14 years. In 1920 there were in the elementary schools, 24,833 teachers and 708,821 pupils. Among the recruits (Beväring) of 1916 only 0.16 per cent. were unlettered, only 0.32 per cent. unable to write.

Justice and Crime.

The administration of justice is entirely independent of the Government. Two functionaries, the Justitie-Kansler, or Chancellor of Justice, and the Justitie-Ombudsman, or Attorney-General, exercise a control over the administration. The former, appointed by the King, acts also as a counsel for the Crown; while the latter, who is appointed by the Diet, has to extend a general supervision over all the courts of law. The Kingdom, which possesses one Supreme Court of Judicature, is divided (beginning of 1921) into 3 high court districts and 216 district courts divisions, of which 91 are urban districts and 125 country districts.

In town these district courts (or courts of first instance) are held by the burgomaster and his assessors; in the country by a judge and 12 jurors—peasant proprietors—the judge alone deciding, unless the jurors unanimously differ from him, when their decision prevails. In Sweden trial by jury only exists for affairs of the press.

Pauperism.

According to the Poor-law ordinances issued in 1918 the communes are bound to assist children under 16 years of age, if their circumstances require it, and all who from age, disease, or infirmity (physical or mental) are unable to support themselves. Each commune and each town (borough) constitutes a poor district, and in each is a board of public assistance. In 1919 these districts possessed workhouses and similar establishments to the number of 1,942, capable of lodging 63,828 people. There were besides 1,626 smaller cottages for the poor, assigned as dwellings for 5,967 paupers.

The total of those in receipt of relief was, in 1919, 251,618, of which 142,134 belonged to country parishes and 109,484 to towns. Recipients of relief amounted relatively to the mean population to 3.43 per cent. in the country, 6.44 in towns, and 4.30 on the average for the whole kingdom.

Finance.

Revenue and Expenditure for six years are shown as follows:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1917	54,861,908	35,070,174	1920	63,063,246	52,018,077
1918	111,518,316	94,620,317	1921 ¹	61,579,480	61,579,480
1919	70,356,058	46,748,944	1922 ¹	51,759,398	51,759,398

¹ Estimates.

The budget of revenue and expenditure for the year 1922 was as follows (18·16 kronor = 1L):—

REVENUE		EXPENDITURE			
			Ordinary expenses	Extra-ordinary expenses	Total
	Kronor	(a) Actual Expenses :	Kronor	Kronor	Kronor
(a) State revenues :					
Taxes :					
Capitation tax	900,000	Royal Household	1,333,000	434,600	1,767,600
Tax on incomes and property, &c.	189,800,000	Justice	10,655,248	2,255,352	12,910,600

Interest on outstanding loans	6,678,100	Temporary regulation of wages to certain officials	—	—	4,000,000
Fund from intoxicating liquor revenue	400,000	Unexpected expenses, m.m.	—	—	501,697
(c) Shares in the profits of Bank of Sweden	3,500,000				
(d) Shares in the profits of the Central Liquor Co., Ltd.	10,000,000	(b) Improvement of State property and reduction of debt :			
(e) Capital assets taken into use	87,786,395	Business of the State	67,206,900	1,000,000	68,206,900
(f) Loans	80,633,900	Loans to private railways, &c.	12,670,000	4,500,000	17,170,000
		Amortization of the national debt	—	7,159,200	7,159,200
		Fund from intoxicating liquor revenue	—	35,100,000	35,100,000
		Repayment of temporary loans	—	4,000,000	4,000,000
		Shares of the State	750,000	—	750,000
Total revenue	795,990,900 (43,833,305L.)	Total expenditure	—	—	795,990,900 (43,833,305L.)

To this must be added (for the year 1922) a supplementary budget for extraordinary expenses, calculated by the Ministry of Finance at 143,933,887 kronor (7,926,093L.).

The value of the land and house property of Sweden is thus returned for 1921 :—

		Kronor
Taxed : Agricultural land in the country	.	5,936,171,310

The expenditure for the Church is chiefly defrayed by the parishes and out of the revenue of landed estates belonging to the Church, and the amounts do not appear in the budget estimates. The expenses for public instruction are in great part defrayed by the parishes.

On January 1, 1922, the public liabilities of the Kingdom, contracted principally for productive purposes (railways, &c.), were as follows :—

	Kronor		Kronor
Funded loan of 1880 with 3½ int.	41,621,580	Funded loan of 1913 with 4½ int.	72,000,000
" " 1886 " 3½ "	51,797,333	" " 1914 " 5 "	163,100,000

" " 1911 " 4 "	72,000,000	Total (Jan. 1, 1922)	1,423,464,853
		Total (Jan. 1, 1921)	1,270,440,927

¹ These bonds may be redeemed by the National Debt Board at six months' notice. Out of this loan, the amount of 85,656,390 kronor was sold between 1887 and 1914.

The debt amounts to about 270 kronor per head of the population (at the end of 1910 it was only 96 kronor per inhabitant); but as the receipts from business undertakings and outstanding loans in ordinary times exceed the whole interest, the charge per head is nominal. The assets entered in the State register on January 1, 1921, amounted to 2,919,302,000 kronor. To this sum may be added at least 550,000,000 kronor, representing other assets that have not been booked. Thus the financial situation of the State shows a surplus of assets of about 2,199,000,000 kronor.

The income of the communes in 1917 was 337,070,558 kronor, and the expenditure 378,157,765 kronor. Their assets amounted to 1,207,806,233 kronor, and their debts to 817,701,249 kronor. The revenue of the provincial representative bodies (landsting) was 31,148,233 kronor, and expenditure 30,904,845 kronor; their assets 81,210,905 kronor, and debts 36,333,892 kronor.

Defence.

* ARMY.

The military forces are recruited on the principle of universal service, but aided by a voluntarily enlisted *personnel* which forms the permanent cadres for training purposes.

Liability to service commences at the age of 20, and lasts till the end of the 42nd year. The men belong to the first 'uppbåd' of the active army or

Beväring for 11 years; then for 4 years to the second 'uppbåd'; and finally for 8 years to the Landstorm. The initial period of training is 250 days for the infantry. It is 281 days for cavalry, horse and field artillery, and heavy field artillery, and 295 days for garrison artillery and engineers. The infantry is called up for exercise 4 times, 3 in the first period of their service, for 30 days each time, and once later for 15 days. The cavalry and artillery have 3 trainings, 2 of 42 days and 1 of 25 days. The garrison artillery and garrison engineers have two trainings of 35 days and one of 15 days, other engineers have two trainings of 35 days and one of 25 days.

The field army is likely to consist, in the first instance, of 6 divisions, each of 2 brigades of 2 regiments (12 battalions and 4 machine gun companies), with a regiment of cavalry (4 squadrons and 1 machine gun section), a regiment of field artillery (11 batteries of 4 guns each), 1 or 2 companies of engineers, a pontoon train, a telegraph detachment, 1 or 2 field searchlight sections, a supply company, a bearer company, ammunition column and train. There would be also a cavalry division of 4 regiments and the horse artillery division (16 squadrons and 3 batteries). The total would amount to about 100,000 combatants. The first 'uppbåd' of the Beväring would be able (as far as numbers go) to furnish a nearly equal number of reserve troops, while the second 'uppbåd' would provide a sufficient reserve to make good the losses on field service, but it is not known at present what is to be the organisation of the considerable reserves which will be available.

The table below shows the peace establishment in 1921:—

Troops	Officers	Non-Com. Officers	Rank and File		Total
			Cadres (Voluntary Enlistment)	Conscripts (Contingent on the Repeti- tion exercise, 1916)	
Army Staff, &c.	79	—	—	—	79
Infantry, 28 regiments (84 battalions)	1,488	1,090	7,126	55,300	65,004
Cavalry, 8 regiments (50 squadrons)	266	158	3,245	3,600	7,269
Field Artillery, 6 regiments and 1 corps (70 batteries) and 2 Horse Artillery batteries	454	399	2,708	7,500	11,061
Heavy Artillery, 1 regiment and 1 bat- tery (7 batteries)					
Garrison Artillery, 1 regiment and 1 corps (12 companies)					
Engineers, 5 corps (35 companies)	173	147	867	2,400	3,587
Train and Medical Service, 6 corps and 1 company (19 companies)	84	99	407	3,400	3,990
Intendance (4 companies)	116	97	25	500	735
Total Peace establishment	2,660	1,987	14,378	72,700	91,725

The total number of horses is about 11,000.

The total numbers on the rolls amount to about 655,000.

The strength of the reserve of officers and voluntarily enlisted men amounts to about 28,500, that of the Beväring to about 400,000.

The Landstorm amounts to about 195,000 of all ranks.

The Swedish infantry are armed with the Mauser rifle (calibre 6.5 mm.); the horse and field artillery have the Krupp 7.5 cm. Q. F. gun. The military budget for 1921 amounted to 85,846,865 kronor for the army,

29,189,235 kronor for the navy, and on the supplementary budget respectively 34,677,195 and 5,864,486 kronor, as well as for supplementary pay to the personnel of the army and the navy, 43,648,000 kronor.

NAVY.

The Swedish Navy is maintained entirely as a coast-defence force. Between 1913 and 1915 three ships of greater speed and gun-power were put in hand, and in 1922-24 the sum of 15,000,000 kronor is to be expended solely on submarines.

The following is a list of the principal ships:—

Laid down	Name	Displacement tons	Maximum armour		Armament	Torpedo tubes	Indicated horse power	Maximum speed knots
			On belt	On guns				
1894	Oden							
1896	Thor	3,700	10	10	2 10-in. ; 6 4·7-in. .	1	5,300	17
1896	Njord							
1899	Dristigheten	3,600	8	8	2 8·2-in. ; 6 6-in. .	2	5,600	17
	Aran							
1900	Vasa	3,750	7	7½	2 8·2-in. ; 6 6-in. .	2	5,500	17
	Tapperheten							
1902	Manligheten							
1904	Oscar II. . . .	4,660	6	7½	2 8·2-in. ; 8 6-in. .	2	9,000	18
1904	Fylgia	4,810	4	5	8 6-in.	2	12,400	22
1903	Sverige	7,180	8	8	4 11-in. ; 8 6-in. .	2	20,000	22·5
1913	Gustaf V. . . .							
1915	Drottning Victoria	7,180	8	8	4 11-in. ; 8 6-in. .	2	20,000	22·5

There are 10 destroyers, 4 old torpedo-gunboats, 27 torpedo boats, and about 14 submarines. The future of the Navy is under discussion. A Minister of Defence now controls the naval and military services.

The personnel of the Royal Navy is divided into three classes, viz. : 1. The Active List ; 2. The Reserve ; 3. The *Beväring*. On the active list are 5 flag-officers, 9 commodores, 44 captain-commanders, 123 captains, 103 lieutenants, 54 sub-lieutenants, 1,413 warrant officers, and 3,725 petty officers and men, while about 340 commissioned officers belong to the Reserve.

On the active list of the Royal Coast Artillery are 1 general, 2 colonels, 4 lieutenant-colonels, 8 majors, 52 captains, 49 lieutenants, 24 sub-lieutenants, 383 warrant officers, and 1,105 petty officers and men.

Production and Industry.

I. AGRICULTURE.

Sweden has always been an agricultural country. In 1751 only 9·5 per cent. of the population depended for a livelihood on the various industries and commerce ; in 1840 the percentage had risen to 10·75, in 1870 it had advanced to 19·6, in 1900 to 38·8, and in 1910 to 45·8 per cent., so that to-day the population of Sweden is about equally divided in the pursuit of agriculture on the one hand and commerce and industries on the other.

The number of farms in cultivation in 1919 was 428,026 ; of these there were of 2 hectares and under, 119,899 ; 2 to 20 hectares, 270,625 ; 20 to

100 hectares, 34,926 ; above 100, 2,576. Of the total land area of Sweden 9·4 per cent. is under cultivation, 2·3 per cent. under natural meadows, and 59·8 per cent. under forests, the products of which form a staple export.

The following table shows the area and yield of the chief crops for 3 years :—

Crop	Acreage (hectares)			Produce (tons)		
	1919	1920	1921	1919	1920	1921
Wheat . . .	140,563	144,728	145,645	254,500	280,917	342,293
Rye . . .	372,370	369,735	369,607	574,255	569,850	706,445
Barley . . .	167,882	161,053	161,974	276,963	273,320	268,361
Oats . . .	712,635	709,181	711,045	1,075,475	1,014,809	1,111,828
Mixed corn . .	261,850	263,299	263,235	467,592	450,868	493,889
Leguminous crops ¹	44,680	43,962	44,747	65,335	66,470	67,417
Potatoes . . .	163,111	147,421	147,582	2,001,373	1,627,520	1,864,974
Roots ² . . .	127,356	131,812	136,752	3,915,449	3,533,888	4,402,773
Hay ³ . . .	1,355,906	1,355,775	1,354,877	4,168,596	5,146,447	4,268,166

¹ Peas, beans, and vetches.

² Sugar-beet and fodder-roots.

³ And fodder plants.

The value of all crops was estimated in 1921 at 1,384 million kronor, and in 1920 at 2,016 million kronor. On June 1, 1919, the live-stock was as follows : Horses, 715,681 ; head of cattle, 2,550,828 ; sheep and lambs, 1,563,651 ; pigs, 716,783.

II. MINES AND MINERALS.

Mining has been from time immemorial the leading industry of Sweden, which was the biggest producer of iron in Europe until the use of coal for the manufacture of pig-iron revolutionized that industry. The lack of fossil fuel is the reason why at present mining in Lappland merely concerns itself with the raw products, though experiments made in recent years have carried the problem of electric production of iron ore a good step forward. There were raised in the year 1920, throughout the Kingdom, 4,519,112 tons of iron ore. The pig-iron produced amounted in 1921 to 308,600 tons, and in 1920 to 470,550 tons ; the ingot iron 230,900 tons in 1921, and 437,474 tons in 1920. Of iron ore, in 1919, 2,416,856 tons, and in 1920, 3,736,329 tons, were exported ; of pig-iron, 81,573 in 1919, and 115,417 in 1920. There were also raised in 1920, 2,901 tons of silver and lead ore, 1,136 tons of copper ore, 47,674 tons of zinc ore, 14,926 tons of manganese ore, and 107,326 tons of sulphur pyrites. The gold produced amounted to 7·610 kilograms, the silver to 360, the lead to 862,850, the copper to 1,288,874, the zinc to 5,759,500. There are not inconsiderable veins of coal in the southern parts of Sweden, giving 439,584 tons of coal in 1920. In 1920 there were 44,401 persons (3,653 young people under 18) engaged in mining.

III. INDUSTRIES.

The industries of Sweden are spread fairly well over the whole country. The mining of iron ore has reached its highest perfection north of the Polar circle, and the most important sawmills are located along the shores of the Gulf of Bothnia. The production of iron and steel has taken place in central Sweden since the earliest times in Swedish history ; pig iron is produced chiefly in Sandviken, Domnarvet, Uddeholm, and Fagersta. Cream separators, lighthouse apparatus, telephone supplies, motors, and many kinds of electrical machinery are among the highly specialised products

of the metallurgical industries. The porcelain factories of Rörstrand and Gustavsberg and the glass factories of Kosta and Rejmyre produce wares that have achieved a high reputation in the markets of the world. Innumerable factories for the production of finished products are scattered all over the countryside. Of the workmen employed in the industries of Sweden, those who reside in the country exceed in number the workmen who live in towns.

The timber and wood-work industries of Sweden are of great importance. The public forests have an area of 9,594,978 hectares, of which crown and ecclesiastical forests extend to 7,278,024 hectares. The latter yielded, in 1920, 4,098,332 cubic metres of timber. In 1919 there were in Sweden 1,410 sawmills and planing mills with 43,296 workpeople who turned out sawn or planed timber to the value of 522,839,601 kronor; 625 factories for joinery and furniture with 12,604 workpeople, the output for the year being valued at 86,626,592 kronor; 106 factories for wood-pulp with 14,887 workpeople, output 241,138,663 kronor; and 71 paper and pasteboard mills with 11,969 workpeople, output 188,667,845 kronor. The extent of some other Swedish industries in 1919 is shown in the following table:—

Branch of industry	Factories	Workpeople	Value of output
			Kronor
Bar-iron and steel works	115	22,348	339,972,937
Iron and steel-goods factories	400	15,500	174,959,519

Needle-works	144	7,905	103,187,953
Tanneries	178	2,331	94,896,340
Shoe factories	103	6,966	117,244,668
Match factories	18	7,392	51,586,739
Other chemical industry works	113	10,079	272,848,627
Electric-power work	463	3,730	95,195,261

¹ Manufacture of metals other than iron. ² Production of refined sugar and syrup.

In 1919, 291,777 men, 54,744 women, 34,611 boys, and 11,779 girls (under 18 years of age) were employed in factories.

Commerce.

The total customs-duties levied in 1919 amounted to 100,899,715 kronor, and in 1920 to 146,056,057 kronor.

The imports and exports of Sweden, unwrought gold and silver and coin not included, have been as follows (18·1595 kronor = £1):—

—	1917	1918	1919	1920	1916
	£	£	£	£	£
Imports	41,774,845	67,915,419	139,540,033	182,500,144	69,728,654
Exports	74,316,545	74,365,076	86,760,886	125,760,233	60,424,240

The following were the values of the leading imports and exports for two years, unwrought gold and silver and coin not included :—

	Imports 1920	Exports 1920	Imports 1921 ¹	Exports 1921 ¹
	Kronor	Kronor	Kronor	Kronor
Textile manufactures	368,272,874	23,271,218	114,729,927	20,525,351

Other articles	557,085,401	186,036,347	273,327,734	90,570,639
Total	3,314,111,361	2,278,295,098	1,266,237,485	1,097,273,992

¹ Provisional figures.

Since Jan. 1, 1914, returns as to value of imports and exports are given by the importers and exporters themselves for all goods exported and for most import goods (the so-called declared value). Imports are recorded as from the country of consignment, and exports as to the country of ultimate destination.

A national Swedish trade-mark was introduced (1911) by Sveriges Allmänna Handelsförening (General Commercial Association of Sweden). The upper half of the mark shows the three royal Swedish crowns, on a light-blue ground, and the words 'Svensk Tillverkning' (Swedish manufacture) are shown on a light-yellow ground below.

The following table shows the value of the trade with the principal countries with which Sweden deals :—

Country	Imports from (1918)	Exports to (1918)	Imports from (1919)	Exports to (1919)	Imports from (1920)	Exports to (1920)
	Kronor	Kronor	Kronor	Kronor	Kronor	Kronor

Exports to Sweden from U.K.	3,074	2,619	24,483	39,327	9,626

Shipping and Navigation.

The Swedish mercantile marine engaged both in the home and foreign trade on January 1, 1920, was as follows :—

January 1, 1920	Sailing		Steam and Motor		Total	
	No.	Gross Tonnage	No.	Gross Tonnage	No.	Gross Tonnage
20-500 tons	1,255	107,602	793	132,171	2,048	239,773
500-1,000 „	9	7,111	127	89,144	136	96,255
1,000-2,000 „	10	14,424	226	326,340	236	340,764
Above 2,000 tons	5	10,734	124	398,933	119	409,667
Total Jan. 1, 1920	1,279	139,871	1,260	946,588	2,539	1,086,459

On January 1, 1922, Sweden's mercantile marine possessed 1,310 vessels of over 100 tons, with a total tonnage of 1,090,000.

The port of Göteborg had the largest shipping in the beginning of 1920—namely, 343 vessels of 394,771 tons; and next to it came Stockholm, possessing 371 vessels of a total burthen of 278,216 tons.

Vessels entered from and cleared for foreign countries, with cargoes and in ballast, in 1919, as follows :—

1919	With Cargoes		In Ballast		Total	
	No.	Net Tonnage	No.	Net Tonnage	No.	Net Tonnage

Internal Communications.

In 1919 149,657 ships and boats passed through the canals of Sweden.

At the end of 1920 the total length of railways in Sweden was 9,420 miles, of which 3,459 miles belonged to the State. The receipts of the State railways in 1920 were 344 million kronor, and expenses 314 million kronor. The total cost of construction for the State railways to the end of 1920 was 851,240,000 kronor, and for private railways, in 1919, 654,516,000 kronor. The total number of passengers on the State railways in 1920 was 32,141,000; weight of goods, 14,137,000 tons; private railways in 1920, 24,734,000 tons of goods, and 52,775,000 passengers. The line between Gatheborg and Stockholm is about to be electrified.

The length of the wires of the telegraph at the end of 1920 was 49,680 miles, 22,173 miles of which belonged to the railways. The wires of the State telephone had a length of 401,732 miles, the wires of the private telephone lines a length of only 6,280 miles. There were 3,434 telegraph offices. The number of messages sent in the year 1920 was 9,222,255, including 876,693 in transit. In 1920 there were 389,830 instruments (in Stockholm 121,397) employed in the telephone service, including only 5,023 private telephones.

The Swedish Post Office carried 663,255,000 letters, post-cards, journals, &c., in the year 1920. The number of post-offices at the end of the year was 3,672. The total receipts of the Post Office in 1920 amounted to 64,706,700 kronor, and the total expenditure to 69,480,700 kronor.

Money and Credit.

The Riksbank, or National Bank of Sweden, belongs entirely to the State and is managed by directors elected for three years by the Diet, except one, the president, who is designated by the King. It is a bank of exchange to regulate financial relations with foreign countries; it accepts deposits of money, and on sufficient security it lends money for purposes in which there is no speculative element. The Bank is under the guarantee of the Diet, its capital and reserve capital are fixed by its constitution, and its note circulation is limited by the value of its metallic stock and its assets in current accounts at home and abroad; but its actual circulation is kept far within this limit.

The following table gives statistics of the National Bank, and private banks (joint-stock banks included) in Sweden for December 31, 1921 (18'1595 kronor = 1*l.*). There are 11 conjointly responsible private banks and 27 joint-stock banks (December 1921). Since December 31, 1903, only the Riksbank has the right to issue notes:—

Assets	The Riksbank	Other Banks	Total
	Kronor	Kronor	Kronor
Real estate and furniture	—	87,092,460	87,092,460
Cash ¹	286,059,792	117,591,908	403,651,700

Total	1,054,280,304	7,234,425,139	8,288,705,443

The savings-banks statistics (exclusive of Post Office) are as follows:—

—	1917	1918	1919	1920
Number of depositors at end of year	1,987,194	2,106,880	2,200,267	2,270,318
Deposits at end of year, kronor	1,381,713,301	1,623,660,373	1,870,771,907	2,023,953,608
Capital and reserve fund, ditto	97,351,541	101,766,842	107,118,607	112,680,230

At the end of 1920 the Post Office Savings Bank had 661,686 depositors and 84,356,039 kronor of deposits.

The Private and Joint-Stock Banks also act as Savings Banks. Their statistics of depositors and deposits are as follows:—

—	1918	1919	1920	1921
Number of depositors at end of year	1,651,000	1,833,762	1,941,343	2,001,013
Deposits at end of year, kronor	887,120,922	960,571,800	959,701,792	910,920,072

Money, Weights, and Measures.

By a treaty signed May 27, 1873, with additional treaty of October 16, 1875, Sweden, Norway, and Denmark adopted the same monetary system.

The Swedish Krona, of 100 öre, is of the value of $\text{£s. } 1\frac{1}{2}d.$, or about 18 kronor to the pound sterling.

The gold 20-kronor piece weighs 8.960572 grammes, .900 fine, containing 8.0645 grammes of fine gold, and the silver krona weighs 7.5 grammes, .800 fine, containing 6 grammes of fine silver. Iron coins were issued in 1917, 1918, and 1919; nickel coins in 1920.

The standard of value is gold. National Bank notes for 1, 5, 10, 50, 100, and 1000 kronor are legal means of payment, and the Bank is bound to exchange them for gold on presentation. The 1 kronor notes have been issued since September, 1914.

No gold coins were made at the Swedish mint during 1919, but 15,113,140 bronze and nickel coins, with a nominal value of 776,173 kronor, were issued in 1920. It is intended gradually to withdraw the iron coins.

The metric system of weights and measures is obligatory.

Diplomatic Representatives.

1. OF SWEDEN IN GREAT BRITAIN.

Envoy Extraordinary and Minister Plenipotentiary.—Baron E. K. Palmstierna (appointed November, 1920).

Counsellor.—C. R. P. de Reuterswärd.

Second Secretary.—L. M. J. Sager.

Military Attaché.—Colonel E. Mossberg, C.B.E.

Naval Attaché.—Commander A. H. de Bahr.

Special Attaché for Financial, Social and Labour Questions.—Dr. E. R. Sjöstrand.

Chancellor.—J. Stille.

Consul-General in London.—E. G. Sahlin.

There are Consular representatives at the following places:—Aberdeen, Belfast, Birmingham, Bradford, Bristol, Cardiff, Cork, Dublin, Dundee, Glasgow, Hartlepool, Hull, Leith, Liverpool, Manchester, Newcastle, Plymouth, Southampton, Sunderland, and many other places.

2. OF GREAT BRITAIN IN SWEDEN.

Envoy and Minister.—Sir Colville A. de R. Barclay, C.B., C.B.E., M.V.O., K.C.M.G. (September 9, 1919).

Secretaries.—P. W. M. Ramsay and J. C. S. Bennett, M.C.

Naval Attaché.—Captain J. Wolfe Murray, D.S.O.

Military Attaché.—Colonel W. Robertson, D.S.O.

Commercial Secretary.—Herbert Kershaw.

Consul-General at Gothenburg.—H. M. Grove.

Consul at Stockholm.—Sir E. Kay.

There are also Consular representatives at Gävle, Hälsingborg, Kalmar, Luleå, Malmö, Norrköping, Sundsvall, Söderhamn, Varberg, Visby, &c.

SWITZERLAND.

(SCHWEIZ.—SUISSE.—SVIZZERA.)

Constitution and Government.

I. CENTRAL.

ON August 1, 1291, the men of Uri, Schwyz, and Lower Unterwalden entered into a defensive League. In 1353 the League included eight members, and in 1513 thirteen. Various allied and subject territories were acquired either by single cantons or by several in common, and in 1648 the League became formally independent of the Holy Roman Empire, but no addition was made to the number of cantons till 1798. In that year, under the influence of France, the unified Helvetic Republic was formed. This failed to satisfy the Swiss, and in 1803 Napoleon Bonaparte, in the Act of Mediation, gave a new constitution and out of the lands formerly allied or subject increased the number of cantons to nineteen. In 1815 the perpetual neutrality of Switzerland and the inviolability of her territory were guaranteed by Austria, Great Britain, Portugal, Prussia, and Russia and the Federal Pact which had been drawn up at Zürich, and which included three new cantons, was accepted by the Congress of Vienna. The Pact remained in force till 1848, when a new constitution, prepared without foreign interference, was accepted by general consent. This, in turn, was on May 29, 1874, superseded by the constitution which is now in force.

The constitution of the Swiss Confederation may be revised either in the ordinary forms of Federal legislation with compulsory *referendum*, or by direct popular vote, a majority both of the citizens voting and of the cantons being required, and the latter method may be adopted on the demand (called the *popular initiative*) of 50,000 citizens with the right to vote. The Federal Government is supreme in matters of peace, war, and treaties; it regulates the army, the railway, postal and telegraph systems, the coining of money, the issue and repayment of bank notes, and the weights and measures of the Republic. It legislates on matters of civil capacity, copyright, bankruptcy, patents, sanitary police in dangerous epidemics, and it may create and subsidise, besides the Polytechnic School at Zürich, a Federal University and other educational institutions. There has also been entrusted to it the authority to decide concerning public works for the whole or great part of Switzerland, such as those relating to rivers, forests, and the construction of railways.

The supreme legislative and executive authority are vested in a parliament of two chambers, a 'Ständerat,' or State Council, and a 'Nationalrat,' or National Council. The first is composed of forty-four members, chosen and paid by the twenty-two cantons of the Confederation, two for each canton. Their remuneration depends on the wealth and liberality of the cantons, the average being about 20 francs (16s.) per day; representatives from the canton of Geneva receive 30 francs (25s.), from Uri and from Unterwalden 15 francs (12s. 6d.) per day. The mode of their election and the term of membership depend

entirely on the canton. Three of the cantons are politically divided—Basel into Stadt and Land; Appenzell into Ausser Rhoden and Inner Rhoden; and Unterwald into Obwald and Nidwald. Each of these parts of cantons sends one member to the State Council, so that there are two members to the divided as well as to the undivided cantons. The 'Nationalrat' consists of 189 representatives of the Swiss people, chosen in direct election, at the rate of one deputy for every 20,000 souls. The members are paid from Federal funds at the rate of 25 francs for each day on which they are present, with travelling expenses, at the rate of 20 centimes (2d.) per kilometre, to and from the capital. Members employed on commissions receive additional pay at the same rate. On the basis of the general census 1910, the cantons are represented in the National Council as follows:—

Canton	Number of Representatives	Canton	Number of Representatives
Zürich (Zurich)	25	Appenzell—Exterior and Interior	4
Bern (Berne)	32	St. Gallen (St. Gall)	15
Luzern (Lucerne)	8	Graubünden (Grisons)	6
Uri	1	Aargau (Argovie)	12
Schwyz	3	Thurgau (Thurgovie)	7
Unterwald—Upper and Lower	2	Ticino (Tessin)	8
Glarus (Glaris)	2	Vaud (Waadt)	16
Zug (Zoug)	1	Valais (Wallis)	6
Fribourg (Freiburg)	7	Neuchâtel (Neuenburg)	7
Solothurn (Soleure)	6	Genève (Genf)	8
Basel (Bâle)—town and country	11	Total	189
Schaffhausen (Schaffhouse)	2		

At the elections held in November, 1919, the following parties were returned:—Liberals, 61; Social Democrats, 41; Catholics, 41; Agrarian, 29; Liberal Democrats, 9; other parties, 8.

A general election of representatives takes place by ballot every three years. Every citizen of the Republic who has entered on his twenty-first year is entitled to a vote; and any voter, not a clergyman, may be elected a deputy. Both chambers united are called the 'Bundes-Versammlung,' or Federal Assembly, and as such represent the supreme Government of the Republic. The first step towards legislative action may be taken by means of the *popular initiative*, and laws passed by the Federal Assembly may be vetoed by the popular voice. Whenever a petition demanding the revision or annulment of a measure passed by the Legislature is presented by 30,000 citizens, or the alteration is demanded by eight cantons, the law in question must be submitted to the direct vote of the nation. For the decision of the question submitted a majority both of the cantons and of the voters is required. This principle, called the *referendum*, is frequently acted on. The chief executive authority is deputed to a 'Bundesrat,' or Federal Council, consisting of seven members elected for three years by the Federal Assembly. The members of this council must not hold any other office in the Confederation or cantons, nor engage in any calling or business. It is only through this executive body that legislative measures are introduced in the deliberative councils,

and its members are present at and take part in their proceedings, but do not vote. Every citizen who has a vote for the National Council is eligible for becoming a member of the executive.

The President of the Confederation and the Vice-President of the Federal Council are the first magistrates of the Confederation. Both are elected by the Federal Assembly in joint session of the National and State councils for the term of one year, January 1 to December 31, and are not re-eligible to the same offices till after the expiration of another year. The Vice-President, however, may be, and usually is, elected to succeed the outgoing President.

President of the Confederation for 1922.—Dr. Robert Haab (Zürich). Born 1865.

Vice-President of the Federal Council for 1922.—Charles Scheurer (Berne).

The seven members of the Federal Council—each of whom has a salary of 1,000*l.* per annum, while the President has 1,080*l.*—act as ministers, or chiefs of the seven administrative departments of the Republic. These departments are :—1. Foreign Affairs. 2. Interior. 3. Justice and Police. 4. Military. 5. Finance and Customs. 6. Agriculture and Industry (*Economie publique*). 7. Posts and Railways. The city of Bern is the seat of the Federal Council and the central administrative authorities.

II. LOCAL GOVERNMENT.

Each of the cantons and *demi-cantons* of Switzerland is sovereign, so far as its independence and legislative powers are not restricted by the federal constitution; each has its local government, different in its organisation in most instances, but all based on the principle of absolute sovereignty of the people. In a few of the smallest cantons, the people exercise their powers direct, without the intervention of any parliamentary machinery, all male citizens of full age assembling together in the open air, at stated periods, making laws and appointing their administrators. Such assemblies, known as the *Landsgemeinden*, exist in Appenzell, Glarus, Unterwald, and Uri. In all the larger cantons, there is a body chosen by universal suffrage, called the *Grosse Rath*, which exercises all the functions of the *Landsgemeinden*. In all the cantonal constitutions, however, except that of Freiburg and those of the cantons which have a *Landsgemeinde*, the *referendum* has a place. This principle is most fully developed in Zurich, where all laws and concordats, or agreements with other cantons, and the chief matters of finance, as well as all revision of the constitution, must be submitted to the popular vote. In many of the cantons, the *popular initiative* has also been introduced. The members of the cantonal councils, as well as most of the magistrates, are either honorary servants of their fellow-citizens, or receive a merely nominal salary. In each canton there are districts (*Amtsbezirke*) consisting of a number of communes grouped together, each district having a Prefect (*Regierungstatthalter*) representing the canton. In the larger communes, for local affairs, there is an Assembly (legislative) and a Council (executive) with a president, *maire* or *syndic*, and not less than 4 other members. In the smaller communes there is a council only, with its proper officials.

Area and Population.

I. PROGRESS AND PRESENT CONDITION.

Area and population, according to the census held on December 1, 1910, and that held on December 1, 1920. The cantons are given in the official

order, and the year of the entrance of each into the league or confederation is stated :—

Canton	Area : sq. miles	Population		Pop. per square mile, 1920
		Dec. 1, 1910	Dec. 1, 1920	
Zürich (Zurich) (1351) . . .	666	503,915	538,602	823
Bern (Berne) (1353) . . .	2,657	645,877	674,394	254
Luzern (Lucerne) (1332) . . .	579	167,223	177,073	306
Uri (1291)	415	22,113	23,973	58
Schwyz (1291)	351	58,428	59,731	170
Obwalden (Unterwalden-le- Haut) (1291)	183	17,161	17,567	96
Nidwalden (Unterwalden-le- Bas) (1291)	112	13,788	13,956	125
Glarus (Glaris) (1352) . . .	267	33,316	33,834	127
Zug (Zoug) (1352)	92	28,156	31,569	343
Fribourg (Freiburg) (1481) .	644	139,554	143,055	222
Solothurn (Soleure) (1481) .	302	117,040	130,617	433
Basel-Stadt (Bâle-V.) (1501) .	14	135,918	140,708	10,050
Basel-Land (Bâle-C.) (1501) .	163	76,488	82,390	505
Schaffhausen (Schaffhouse) (1501)	114	46,097	50,428	442
Appenzell A.-Rh. (Ext.) (1513)	101	57,973	55,354	548
Appenzell I.-Rh. (Int.) (1513) .	61	14,659	14,614	240
St. Gallen (St. Gall) (1803) .	779	302,896	295,543	379
Graubünden (Grisons) (1803) .	2,773	117,069	119,854	43
Aargau (Argovie) (1803) . . .	542	230,634	240,776	444
Thurgau (Thurgovie) (1803) .	381	134,917	135,933	357
Ticino (Tessin) (1803)	1,088	156,166	152,256	139
Vaud (Waadt) (1803)	1,244	317,457	317,498	255
Valais (Wallis) (1815)	2,027	128,381	128,246	63
Neuchâtel (Neuenburg) (1815) .	312	133,061	131,349	421
Genève (Genf) (1815)	108	154,906	171,000	1,583
Total	15,976	3,753,293	3,880,320	243

The German language is spoken by the majority of inhabitants in 19 of the 25 cantons, the French in five (Fribourg, Vaud, Valais, Neuchâtel and Genève), the Italian in one (Ticino). In 1910, 2,594,298 spoke German, 793,264 French, 302,578 Italian, 40,122 Romansch, and 23,031 other languages.

The number of foreigners resident in Switzerland in 1920 was 412,306.

II. MOVEMENT OF POPULATION.

Years	Total Births	Stillbirths	Marriages	Deaths and Stillbirths	Surplus of Births over Deaths
1916	75,885	2,225	22,251	52,848	23,037
1917	74,125	2,060	23,254	55,366	18,759
1918	74,884	2,226	26,117	77,260	- 2,376
1919	74,205	2,080	30,731	57,012	17,193
1920	83,623	2,433	34,973	58,427	25,196

In 1920 the illegitimate births numbered 3,591, or 4.2 per cent. The number of divorces was 2,241.

The number of emigrants in five years was:—1917, 656; 1918, 304; 1919, 3,063; 1920, 9,276; 1921, 7129.

III. PRINCIPAL TOWNS.

On December 1, 1920, the census population of the principal towns was as follows:—Zürich, 207,161; Bâle, 135,976; Geneva, 135,059; Bern, 104,626; St. Gallen, 70,437; Lausanne, 68,533; Winterthur, 49,069; Luzern, 44,029; La Chaux-de-Fonds, 37,708; Biel, 31,599; Neuchâtel, 23,152; Fribourg, 20,649; Schaffhausen, 20,064; Montreux, 16,721; Chur, 15,600; Herisan, 15,015; Thun, 14,162; Lugano, 13,440; Solothurn, 13,065; Vevey, 12,768; Le Locle, 12,463; Rorschach, 11,582; Olten, 11,504; Aarau, 10,701; Bellinzona, 10,232.

Religion.

There is complete and absolute liberty of conscience and of creed. No one is bound to pay taxes specially appropriated to defraying the expenses of a creed to which he does not belong. No bishoprics can be created on Swiss territory without the approbation of the Confederation. The order of Jesuits and its affiliated societies cannot be received in any part of Switzerland; all functions clerical and scholastic are forbidden to its members, and the interdiction can be extended to any other religious orders whose action is dangerous to the State, or interferes with the peace of different creeds. The foundation of new convents or religious orders is forbidden.

According to the census of December 1, 1920, the number of Protestants amounted to 2,218,589 (57 per cent. of the population), of Roman Catholics to 1,586,826 (41 per cent.), and of Jews to 20,955 (2 per cent.). Protestants are in a majority in twelve of the cantons, and Catholics in ten. Of the more populous cantons, Zürich, Bern, Vaud, Neuchâtel, and Basel (town and land) are mainly Protestant, while Luzern, Fribourg, Ticino, Valais and the Forest Cantons are mainly Catholic. The Roman Catholic priests are much more numerous than the Protestant clergy, the former comprising more than 6,000 regular and secular priests. They are under five bishops, viz., of Basel and Lugano (resident at Solothurn), Chur, St. Gallen, Lausanne and Geneva (resident at Freiburg), and Sitten (Sion), all of them immediately subject to the Holy See. The government of the Protestant Church, Calvinistic in doctrine and Presbyterian in form, is under the supervision of the magistrates of the various cantons, to whom is also entrusted, in the Protestant districts, the superintendence of public instruction.

Instruction.

In the educational administration of Switzerland there is no centralization. Before the year 1848 most of the cantons had organised a system of primary schools, and since that year elementary education has steadily advanced. In 1874 it was made obligatory (the school age varying in the different cantons), and placed under the civil authority. In some cantons the cost falls almost entirely on the communes, in others it is divided between the canton and communes. In all the cantons primary instruction is free. In the north-eastern cantons, where the inhabitants are mostly Protestant, the proportion of the school-attending children to the whole population is as one to five; while in the half-Protestant and half-Roman Catholic cantons it is as one to seven; and in the entirely Roman Catholic cantons as one to nine. The compulsory law has hitherto not always been enforced in the Roman Catholic cantons, but is rigidly

carried out in those where the Protestants form the majority of inhabitants. In every district there are primary schools, and secondary schools for youths of from twelve to fifteen. Of the contingent for military service in 1912, 0·3 per thousand could not read.

The following are the statistics of the various classes of educational institutions for 1919:—Kindergarten, 495; 4,222 primary schools with 16,753 teachers (8,034 men and 8,719 women), and 545,135 pupils (272,760 boys and 272,385 girls); the 516 secondary schools had 25,856 boys and 23,836 girls with 1,753 men and 518 women teachers; 156 middle schools had 21,097 boys and 9,396 girls with 1,939 men and 266 women teachers. There are also commercial schools, technical schools, schools for the instruction of girls in domestic economy and other subjects; agricultural schools, schools for horticulture, for viticulture, for arboriculture, and for dairy management. There are also institutions for the blind, the deaf and dumb, and the feeble-minded. In the 35 reformatories of Switzerland in 1919, there were 1,637 children under instruction. In 1920 the State spent on primary education 2,377,529 francs.

There are seven universities in Switzerland. These universities are organised on the model of those of Germany, governed by a rector and a senate, and divided into four 'faculties' of theology, jurisprudence, philosophy, and medicine. There is a Polytechnic School, maintained by the Federal Government, at Zürich, with a teaching staff of 281 and 2,267 matriculated students, in 1920. The academy of Neuchâtel was transformed into a university in May, 1909, but without the faculty of medicine. The following table shows the year of foundation of each university, the number of teaching staff and of matriculated students in the various branches of study in each of the seven universities in the winter of 1920-21:—

—	Theology	Law	Medicine	Philosophy and Science	Total	Teaching Staff 1918
Basel (1460)	88	90	299	557	1,034	130
Zürich (1832).	36	418	622	541	1,615	163
Bern (1834)	62	618	505	588	1,773	162
Geneva (1500 ¹ & 1873) ²	12	233	373	294	912	155
Lausanne (1537 ¹ & 1890) ²	20	175	297	475	907	108
Fribourg (1889)	192	134	—	191	517	72
Neuchâtel (1866 ¹ & 1909) ²	14	72	—	105	191	67

¹ As an Academy.

² As a University.

These numbers are exclusive of 'hearers,' but inclusive of 851 women students.

In 1911 there were 5,798 libraries with 9,385,000 volumes.

Justice and Crime.

The 'Bundes-Gericht,' or Federal Tribunal, which sits at Lausanne, consists of 24 members, with 9 supplementary judges, appointed by the Federal Assembly for six years and are eligible for re-election; the President and Vice-President, as such, for two years and cannot be re-elected. The President has a salary of 22,000 francs a year, and the other members 20,000 francs. The Tribunal has three sections, to each of which is assigned the trial of suits in accordance with regulations framed by

the Tribunal itself. It has original and final jurisdiction in suits between the Confederation and cantons; between cantons and cantons; between the Confederation or cantons and corporations or individuals, the value in dispute being not less than 3,000 francs; between parties who refer their case to it, the value in dispute being at least 3,000 francs; and also in such suits as the constitution or legislation of cantons places within its authority. There are also many classes of railway suits which it is called on to decide. It is a Court of Appeal against decisions of other Federal authorities, and of cantonal authorities applying Federal laws. The Tribunal also tries persons accused of treason or other offences against the Confederation. For this purpose it is divided into four chambers: the Chamber of Accusation, the Criminal Chamber (Cour d'Assises), the Federal Penal Court, and the Court of Cassation. The jurors who serve in the Assize Courts are elected by the people, and are paid ten francs a day when serving.

Each canton has its own judicial system for ordinary civil and criminal trials.

On December 31, 1919, the prison population (condemned) of Switzerland consisted of 3,187, of whom 400 were women.

Capital punishment exists in Appenzell-I.-Rh., Obwalden, Uri, Schwyz, Zug, St. Gallen, Luzern, Wallis, Schaffhausen, and Freiburg.

Social Insurance.

The Swiss Federal Insurance Law (insurance against illness and accident), as passed by both Chambers on June 13, 1911, was accepted by the electors of the Republic with a small majority. The total number of votes cast was 523,731, of which 285,037 were for and 238,694 against the measure.

All Swiss citizens are entitled to insurance against illness, and foreigners also may be admitted to the benefits of the law. Compulsory insurance against illness does not exist as yet, but cantons and communities are entitled under the act to declare obligatory insurance for certain classes or, in general, to establish public benefit (sick fund) associations, and to make employers responsible for the payment of the premiums of their employees.

Insurance against accident is compulsory for all officials, employees, and workmen of all the factories, trades, &c., which are under the Federal liability law. Every person above the age of 14 can insure voluntarily at the Federal insurance administration (or at any insurance corporation). The Swiss Accident Insurance Institution commenced operations on April 1, 1918. In 1919 the 891 societies insuring against illness had 342,611 members.

Finance.

The entire net proceeds of the Federal alcohol monopoly (301,380*l.* in 1920) are divided among the cantons, and they have to expend one-tenth of the amount received in combating alcoholism in its causes and effects. Of the proceeds of the tax for exemption from military service, levied through the cantons, one-half goes to the Confederation and the other to the cantons.

Revenue and expenditure for six years:—

Year	Revenue	Expenditure	Year	Revenue	Expenditure
	£	£		£	£
1917	7,426,236	9,456,150	1920	13,742,254	17,723,723
1918	8,868,203	11,343,990	1921 ¹	14,333,600	20,937,600
1919	11,475,171	15,301,398	1922 ¹	16,886,800	21,142,800

¹ Estimates.

The following table gives the budget estimates for 1922 :—

Source of Revenue	Francs	Branch of Expenditure	Francs
Capital invested	22,772,973	Debt, Total Charge	113,498,095
General administration	250,300	General administration	3,743,656
Departments:—		Departments:—	
Political	2,432,500	Political	6,612,922
Interior	1,311,360	Interior	26,695,456
Justice and Police	2,472,600	Justice and Police	6,658,934
Military	1,999,357	Military	31,560,319
Finance and Customs	170,314,115	Finance and Customs	24,984,923
Commerce, Industry, and		Commerce, Industry, and	
Agriculture	4,007,230	Agriculture	36,188,877
Posts and Railways	210,945,885	Posts and Railways	225,099,301
Miscellaneous	5,693,880	Miscellaneous	3,527,517
Total	422,170,000	Total	523,570,000
	(16,886,800L.)		(21,142,800L.)

The public debt of the Confederation (exclusive of the railway debt) amounted, on January 1, 1921, to 64,234,264L., mostly at 5 per cent. The floating debt (January 1, 1921) was 10,280,000L. The total debt was thus 74,514,264L. The value of the National Properties was 9,118,664L.

Defence.

There are fortifications on the south frontier for the defence of the St. Gothard pass; others have been constructed at St. Maurice and Martigny in the Rhone Valley.

Switzerland depends for defence upon a *national militia*. Service in this force is compulsory and universal, with few exemptions except for physical disability. Those excused or rejected pay certain taxes in lieu. Liability extends from the 20th to the end of the 48th year. The first 12 years are spent in the first line, called the 'Auszug,' or 'Elite'; the next 8 in the Landwehr; and the remaining 8 in the Landsturm. For cavalry, however, service is 11 years in the Auszug, and 12 in the Landwehr. The Landsturm only includes men who have undergone some training. The unarmed Landsturm comprises all other males between 20 and 50 whose services can be made available for non-combatant duties of any description.

The initial training of the Swiss militia soldier is carried out in recruits' schools, and the periods are 65 days for infantry, engineers, and foot artillery, 75 days for field artillery, and 90 days for cavalry. The subsequent trainings, called 'repetition courses,' are 11 days *annually*; but after going through seven courses (8 in the case of the cavalry) further attendance is excused for all under the rank of sergeant. The Landwehr men are only called out once for training, also for 11 days.

The country is divided into 6 divisional districts. The field army, formed of the Auszug, consists of 6 divisions and 4 cavalry brigades. A division consists of 3 brigades each of 2 regiments consisting of 2 or 3 battalions, 1 cyclist company, 1 machine gun detachment, 12 batteries of field artillery, 2 howitzer batteries, 2 squadrons of cavalry, and 1 battalion of sappers. A cavalry brigade consists of 2 regiments. A mountain brigade consists of 2 regiments of 3 battalions, 2 mountain batteries, and 1 company of sappers. Altogether there are 106 battalions, 72 field batteries, 12 howitzer batteries, 9 mountain batteries, and 8 cavalry regiments (each of 3 squadrons), besides 12 squadrons of divisional cavalry (guides). There

is a staff organisation for three army corps. There are the usual departmental troops, pontoon and railway corps, telegraph troops, &c. The total number of combatants in the field army may be taken at 140,000.

There are also *separate* forces, mostly Landwehr, for manning the fortifications which close the St. Gothard Pass and the Rhone Valley to a possible invader from the south. They amount to about 21,000 men. The Landwehr is organised in 56 battalions and 36 squadrons. Altogether Switzerland can mobilise nearly 200,000 men (combatants), irrespective of the organised Landsturm, who may amount to another 60,000.

The administration of the Swiss army is partly in the hands of the Cantonal authorities, who promote officers up to the rank of captain. But the Federal Government is concerned with all general questions, and makes all the higher appointments.

The Swiss infantry are armed with the Swiss repeating rifle. The field artillery is armed with a Q. F. shielded Krupp 7.5 cm. calibre. The 'position' artillery has batteries of 8.4 and 12 cm. guns. The Swiss Government inaugurated an aviation service in 1919.

Production and Industry.

The soil of the country is very equally divided among the population, it being estimated that there are nearly 300,000 peasant proprietors.

Of the total area 28.4 per cent. is unproductive; of the productive area 35.8 per cent. is under grass and meadows, 29 per cent. under forest, 18.7 per cent. under fruit, 16.4 per cent. under crops and gardens. Wheat (111,275 acres, producing 97,282 tons in 1921), rye (50,000 acres, producing 39,599 tons in 1921), oats (53,075 acres, producing 44,063 tons in 1921), and potatoes are the chief crops, but the bulk of food crops consumed in the country is imported.

The chief agricultural industries are the manufacture of cheese and condensed milk. Wine is produced in five of the cantons, tobacco in three. On April 21, 1920 (last census), there were in Switzerland, 129,269 horses, 3,581 mules, 891 donkeys, 1,382,116 cattle, 729,999 cows, 240,553 sheep, 546,112 pigs, 333,852 goats.

The Swiss Confederation has the right of supervision over the police of the forests, and of framing regulations for their maintenance. The entire forest area of Switzerland is 3,290 square miles, or 2,105,214 acres in extent (comprising 91,587 acres of cantonal forest, 1,403,772 acres belonging to municipalities and other corporations, and 609,855 acres of private forests). The district over which the Federal supervision extends lies to the south and east of a tolerably straight line from the eastern end of the Lake of Geneva to the northern end of the Lake of Constance. It comprises about 1,119,270 acres, and the Federal forest laws apply to all cantonal, communal, and municipal forests within this area, those belonging to private persons being exempt, except when from their position they are necessary for protection against climatic influences. In 1876 it was enacted that this forest area should never be reduced; servitudes over it, such as rights of way, of gathering firewood, &c., should be bought up; public forests should be surveyed, and new wood planted where required, subventions for the purpose being sanctioned. In the year 1920, 16,466,785 trees (chiefly coniferous) were planted. The free forest districts comprise 1,477 square miles.

There were, in 1920, 208 establishments for pisciculture, which produced fry of various species to the number of 118,131,000. In 1918 there were 29,377 bee-keepers, possessing an aggregate of 205,934 bees.

Switzerland though in the main an agricultural country, has a strong tendency to manufacturing industry. There are 5 salt-mining districts; that at Bex (Vaud) belongs to the Canton, but is worked by a private company; that at Schweizerhalle (Basel) is worked by the Glenck family; those at Rheinfelden, Ryburg, and Kaiseraugst (Aargau) are worked by a joint-stock company, in virtue of a concession from the Canton. The output of salt of all kinds in 1919 reached 591,558 quintals (800,953 in 1918). In 1920 there were 8,787 factories in Switzerland (9,074 in 1919). Watch and clock making is an important branch of manufacture; number of clocks exported in 1920, 13,729,870. The number of persons employed in factories (1918) was 381,170; the motive machinery had 526,098 horse-power. In 1920, 93 breweries produced 1,062,888 hectolitres (23,383,536 gallons) of beer.

On January 1, 1914, there were 1,859 Swiss embroidery establishments operating 8,090 embroidery machines.

Commerce.

The special commerce, including precious metals, was as follows in five years:—

	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports . . .	94,206,580	96,073,360	111,335,427	163,708,822	91,851,420
Exports . . .	92,918,320	78,526,840	181,923,509	131,084,150	85,605,431

The following table (in thousands of francs) shows the value of special commerce in 1920 and 1921:—

Merchandise	Imports		Exports	
	1920	1921	1920	1921
	1000 Francs	1000 Francs	1000 Francs	1000 Francs
Cereals . . .	352,705	323,610	15,485	8,309
Fruits and vegetables . . .	58,697	60,580	23,182	2,622
Colonial produce . . .	295,927	180,085	97,166	58,004
Animal food substances . . .	208,928	183,220	62,284	77,712
Tobacco . . .	76,876	13,532	23,905	6,222
Beverages . . .	138,962	105,160	859	1,530
Animals, living . . .	42,892	39,863	4,143	3,113
Hides and skins . . .	71,442	31,923	80,677	50,117

In Switzerland, for the majority of imports, the values are fixed by a commission on Exports nominated by the Customs department. Up to 1891 a single value was fixed for each class of goods, but the Commission now takes into account the difference of prices in different countries of origin. For values of exports declarations are, in general, considered

sufficient. Returns show the net weight, though the gross weight also is declared. It is sought to record as the country of origin the country of production, and as the country of destination that where the goods are to be consumed. When exact information is not available the most distant known points of transit are recorded. In accordance with this system, Swiss returns show, as far as can be ascertained, the trade between the Confederation and Great Britain, though, since direct commercial intercourse is impossible, the name of Switzerland does not occur in the trade returns of the United Kingdom. The treaty of 1855 provides for the most favoured nation treatment in respect of commerce, residence and other matters affecting Swiss and British interests.

The customs duties amounted in 1918, to 44,021,036 francs; in 1919, to 67,611,442 francs; in 1920, to 98,033,074 francs; in 1921, to 117,096,025 francs.

The following table, in thousands of francs, shows the distribution of the special trade of Switzerland (including bullion but not coin) among the principal countries. Much of the trade with the frontier countries is really of the nature of transit trade:—

	Imports		Exports	
	1920	1921	1920	1921
	1,000 Francs	1,000 Francs	1,000 Francs	1,000 Francs
Germany	808,620	440,172	252,474	194,610
France	603,249	329,678	521,514	238,603
Italy	325,223	199,597	166,141	74,222
Austria	71,531	32,345	105,773	87,810
United Kingdom	465,735	156,123	645,521	349,294
United States	864,695	385,189	283,307	585,720 1
Denmark	97,703	70,122	43,879	17,804

¹ Including 357 million francs bars of gold.

Total trade between Switzerland and the United Kingdom (in thousands of pounds) for five years (Board of Trade returns):—

	1917	1918	1919	1920	1921
Imports from Switzerland into U.K. . .	11,309	13,073	14,860	36,996	19,963
Exports to Switzerland from U.K. . .	6,446	8,621	13,657	12,610	5,543

Internal Communications.

In 1920 the State railways of Switzerland had a length of 3,881 miles. There are also 34 miles of foreign railways within the Confederation. The cost of construction of the railways up to the end of 1918 was 2,476,247,157 francs. The receipts from traffic of all the Swiss railways amounted (1920) to 510,716,000 francs (20,428,640*l.*), of which 198,611,000 francs (7,944,440*l.*) was for passenger traffic. The state railways are gradually being electrified. The traffic on the Swiss waters in 1919 was carried on by 153 boats or barges belonging to 22 companies.

In 1920 there were in Switzerland 3,941 post-offices. By the internal service there were forwarded 213,245,501 letters, 81,732,420 post-cards, 71,532,946 packets of printed matter, 461,837 samples, 277,841,543 newspapers, and 8,520,185 registered parcels, &c. In the international service there were forwarded 27,689,530 letters, 12,594,999 post-cards, 9,178,601 packets of printed matter, 1,501,450 samples, 1,836,253 newspapers, and 3,694,098 registered parcels, &c. Internal post-office orders were sent to the value of 2,068,760,029 francs (82,750,400*l.*). Receipts,

1921, 108,660,387 francs (4,846,415*l.*); expenditure, 126,988,883 francs (5,079,555*l.*).

Switzerland has a very complete system of telegraphs, consisting (1920) of 1,664 miles of line with 20,145 miles of wire. There were transmitted 2,525,617 inland telegrams, 4,608,190 international, and 844,020 in transit through Switzerland. Number of offices, 2,404. There were 941 telephone systems with 13,917 miles of line and 272,667 miles of wire; conversations, 122,856,732. The telegraph and telephone receipts in 1919 amounted to 49,335,070 francs (1,993,402*l.*); the expenditure to 46,532,450 francs (1,861,298*l.*).

Money and Credit.

On December 31, 1920, the coin minted in Switzerland was as follows:—10,880,000 gold coins of the nominal value of 202,600,000 francs; 69,376,000 silver coins of the nominal value of 67,900,000 francs; 165,700,000 nickel coins of the nominal value of 15,970,000 francs; and 113,000,000 copper coins of the nominal value of 1,490,000 francs; total (including other token coins), 373,956,000 coins of the nominal value of 299,790,000 francs.

There were in Switzerland in 1915, 1,047 savings banks of all kinds, with 2,025,491 depositors having to their credit 61,643,239*l.*; in 1917, the total was 82,248,000*l.*

The National Bank, with headquarters divided between Bern and Zurich, opened its doors on June 20, 1907. It has the exclusive right to issue bank-notes in Switzerland. On March 7, 1922, the condition of the bank was as follows:—

Assets	Francs	Liabilities	Francs
Bullion (gold and silver)	654,982,266	Other assets	33,795,012
Bills	276,394,129	Notes in circulation	819,026,265
Advances	61,359,792	Current and deposit accounts	176,179,605
Securities	8,779,453	Other securities	33,061,317

Money, Weights, and Measures.

The international metric system is the sole legal standard of weights and measures in Switzerland. It was made compulsory in the country by the Federal law of July 3, 1875, and since January 1, 1887, no other units than the metric units have been legal. By the Federal law of June 24, 1909, the international electric units were also adopted. By that law, copies of the French standards, deposited at the International Office for Weights and Measures at Sèvres (France), were adopted as the legal standards for Switzerland.

The *Franc* of 10 *Batzen*, and 100 *Rappen* or *Centimes*, is the monetary unit. The average rate of exchange is 25·22½ francs = £1 sterling.

The 20-franc piece is ·900 fine, the 5-franc silver piece is ·900 fine, the silver 2-franc, franc, and half-franc are ·835 fine. Switzerland belongs to the Latin Monetary Union; but since Italy is exonerated from taking back its exported fractional coin in case of the dissolution of the Union, the importation into Switzerland of 2 franc, 1 franc, and ½ franc pieces is prohibited by decree of February 21, 1899, on pain of confiscation. By a Convention of November 15, 1902, with the other States within the Union, Switzerland may coin, exceptionally, 12,000,000 francs in fractional silver pieces, but the issues must be spread over at least six years.

Before the war 50-franc National Bank notes were the smallest paper currency, but in consequence of the war, notes of lesser denominations have been issued, viz., 20-franc notes (by law of July 30, 1914), 5-franc notes (August 3, 1914), and 25-franc notes (September 9, 1914).

The *Centner*, of 50 *Kilogrammes* and 100 *Pfund* = 110 lbs. avoirdupois. The *Quintal* = 100 *Kilogrammes* = 220 lbs. avoirdupois. The *Arpent* (Land) = 8-9ths of an acre.

The *Pfund*, or pound, chief unit of weight, is legally divided into decimal *Grammes*, but the people generally prefer the use of the old halves and quarters, named *Halbpfund*, and *Viertelpfund*.

Diplomatic and Consular Representatives.

1. OF SWITZERLAND IN GREAT BRITAIN.

Envoy and Minister.—Charles R. Paravicini, appointed October 13, 1919.

First Secretary.—Francis J. Borsinger.

Counsellor of Legation specially attached.—Charles Corragioni d'Orelli.

Attachés.—Emile Stutz, William Preiswerk, Paul Ritter and Emile Fontanel.

Commercial Attaché, Counsellor of Legation, and Consul-General.—Henri Martin.

2. OF GREAT BRITAIN IN SWITZERLAND.

Envoy Extraordinary and Minister Plenipotentiary.—The Hon. Theo Russell, C.V.O., C.B. (born 1870). Appointed September 3, 1919.

Secretaries.—O. A. Scott, D.S.O., and N. B. Ronald.

Military Attaché.—Lt.-Col. L. C. Oppenheim.

Commercial Secretary.—J. Pictou Bagge.

Consul-General at Zürich.—E. G. B. Maxse, C.M.G.

There are Consuls at Bâle, Bern, Geneva, Lausanne, Lucerne, Davos, and St. Moritz; Vice-Consuls at Zürich, Montreux, St. Gall, and Neuchâtel.

TURKEY

(MEMALIK I OSMANIE—OTTOMAN EMPIRE.)

Reigning Sultan.

Mohammed VI., born January 27, 1861, son of Sultan Abdul Medjid; succeeded to the throne on the death of his elder brother, Sultan Mohammed V., July 3, 1918.

Children of the Sultan.

- I. Princess *Ulvia* Sultana, born September 12, 1892; married August 10, 1916, to Ismail Hakki Bey.
- II. Princess *Rukia Sabiha* Sultana, born April 1, 1894, married to Prince *Omer Faruk* Effendi, son of the Heir Apparent.
- III. Prince *Ertogrul* Effendi, born October 5, 1912.

The Heir Apparent is *Abdul Medjid* Effendi, cousin of the Sultan; born May 25, 1868. Offspring: (1) Prince *Omer Faruk* Effendi, born February 28, 1898; (2) Princess *Durri Chahvar*, born January 28, 1914.

Sisters of the Sultan.

- I. *Senihé* Sultana, born November 16, 1852; married the late Mahmud Pasha, son of Halil Pasha, in 1877; widow, 1903.
- II. *Medihé* Sultana, born July 26, 1856; married (1) 1879, to Nedjib Pasha; widow 1885; (2) April 30, 1886, to Férid Pasha.

The present sovereign of Turkey is the thirty-sixth, in male descent, of the house of Othman, the founder of the Empire, and the thirtieth Sultan since the conquest of Constantinople. By the law of succession obeyed in the reigning family, the crown is inherited according to seniority by the male descendants of Othman, sprung from the Imperial Harem. All children born in the Harem, whether offspring of free women or of slaves, are legitimate and of equal lineage. A Council presided over by the Heir Apparent and comprising several State dignitaries, the Grand Vizier, the Sheykh-ul-Islam, and others, was instituted in January, 1914, to regulate all matters relating to the Imperial family, including the Damads or persons married to Imperial princesses, under the theoretical supervision of the Sultan.

It has not been the custom of the Sultans of Turkey for some centuries to contract regular marriages. The inmates of the Harem come, by purchase

or free will, mostly from districts beyond the limits of the empire, the majority from Circassia. From among these inmates the Sultan designates a certain number, nowadays very limited, to be called *Kadin*, or full wives. The title is only given after a child has been born to the Sultan. Ladies of inferior standing on whom the Sultan has looked with favour are called *Ikbal*, and girls in course of training in the Harem are called *Odalik*. The superintendent of the Harem, always an aged Lady of the Palace, and bearing the title of 'Haznadar-Kadin,' has to keep up intercourse with the outer world through the Guard of Eunuchs.

The following is a list of the names, with date of accession, of the thirty-six sovereigns who have ruled Turkey since the foundation of the empire and of the reigning house:—

House of Othman.

Othman	1299	Murad IV., 'The Intrepid'	1623
Orkhan	1326	Ibrahim	1640
Murad I.	1359	Mohammed IV.	1648
Bayezid I., 'The Thunderbolt'	1389	Suleiman II.	1687
Interregnum	1402	Ahmed II.	1691
Mohammed I.	1413	Mustafa II.	1695
Murad II.	1421	Ahmed III.	1703
Mohammed II., Conqueror of Constantinople	1451	Mahmud I.	1730
Bayezid II.	1481	Othman III.	1754
Selim I.	1512	Mustafa III.	1757
Suleiman I., 'The Magnificent'	1520	Abdul Hamid I.	1773
Selim II.	1566	Selim III.	1789
Murad III.	1574	Mustafa IV.	1807
Mohammed III.	1595	Mahmud II.	1808
Ahmed I.	1603	Abdul-Medjid	1839
Mustafa I.	1617	Abdul-Aziz	1861
Othman II.	1618	Murad V. (May 30)	1876
		Abdul-Hamid II. (Aug. 31)	1876
		Mohammed V. (April 27)	1909
		Mohammed VI. (July 3)	1918

The civil list of the Sultan is variously reported at from one to two millions sterling. To the Imperial family belong a great number of crown domains, the income from which contributes to the revenue.

Constitution and Government.

Forms of constitution, after the model of the West European States, were drawn up at various periods by successive Ottoman Governments, the first of them embodied in the 'Hatti-Humayoun' of Sultan Abdul Medjid, proclaimed November 3, 1839, and the most recent in a decree of Sultan Abdul-Hamid II., of November 1876. The latter provided for the security of personal liberty and property; for the administration of justice by irremovable judges; the abolition of torture, the freedom of the Press, and the equality of all Ottoman subjects. Islam was declared to be the religion of the State, but freedom of worship was secured to all creeds, and all persons, irrespective of religion, were declared eligible to public office. Parliament should consist of two Houses, a Chamber of Deputies and a Senate. Senators should be at least 40 years of age, and would be appointed by the Sultan from among those who have rendered distinguished service to the State. Deputies must be at least 30 years of age,

and are elected in the proportion of one for every 50,000 male inhabitants. The mode of election is not laid down in the Constitution, but is the subject of a separate law under which the deputies are chosen by colleges of secondary electors for each Sanjak. Secondary electors must be at least 25 years of age. They are elected from communes and urban wards in the proportion of one for every 500 primary electors. Subject to certain minor disqualifications, all male Ottoman subjects of not less than 25 years of age are primary electors, provided they pay direct taxes to the State. Civil or military officials may offer themselves for election, but must immediately resign their posts on being returned.

This constitution became for all practical purposes a dead letter in 1878, and Abdul-Hamid II. proceeded to build up an autocracy more complete than that of his predecessors, but in 1908 the prevailing discontent, especially in the army, caused by corruption and misgovernment compelled him to issue an Imperial decree for the convocation of a new Parliament, and constitutional government was restored July 23, 1908. The Constitution now theoretically in force is that of 1876, somewhat modified in its details by legislation subsequent to 1908.

The Senate is a permanent body, but can only sit concurrently with the Chamber of Deputies. The Chamber in existence at the time of the Armistice with Turkey was dissolved on December 21, 1918. A new Chamber, which assembled on January 12, 1920, was dissolved on April 11, 1920, by a decree which ordained that new elections should be held within 4 months, as laid down in the Constitution. The abnormal situation has rendered this impossible. The Constantinople Government has governed without a Parliament since April, 1920, but the 'Great National Assembly' sitting at Angora exercises the functions of a Parliament, besides those of supreme Executive authority, in the *de facto* Government set up by Mustafa Kemal Pasha at that place.

The present Cabinet is presided over by Tewfik Pasha, who took office on October 21, 1920, but whose Government has since been considerably remodelled. Its present composition (April 1922) is as follows:—

Grand Vizier.—Tewfik Pasha.

Sheikh-ul-Islam.—Nouri Effendi.

Minister of Foreign Affairs.—Marshal Izzet Pasha.

Minister of Justice.—Kiazim Bey.

Minister of Interior (Acting).—Marshal Ali Riza Pasha.

Minister of War.—General Zia Pasha.

Minister of Marine.—Marshal Salih Pasha.

Minister of Finance.—Faik Nuzhet Bey.

Minister of Public Instruction.—Said Bey.

Minister of Public Works (Acting).—Marshal Ali Riza Pasha.

Minister of Commerce and Agriculture.—Sefa Bey.

Minister of Pious Foundations (Acting).—Said Bey.

President of Council of State.—Tewfik Bey.

Subjects of Western Powers resident in Turkey enjoyed ex-territorial privileges from time immemorial, under treaties called Capitulations. The greatest single change introduced in 1914 was the abolition by a decree of the Sultan of these Capitulations (September 9, 1914). It had long been felt that these privileges needed revision, especially in so far as they exempted foreigners from the fiscal burdens of Ottoman subjects, but their abolition by an unilateral act gave rise to an unanimous protest of the Powers, and no Power had, at any rate publicly, assented to it up to November, 1914. This step, which included the suppression of foreign Post Offices and that

of the International Board of Health, was taken in September, after the outbreak of the European War, and the condition of Europe made the protest of the Powers academic rather than effective for the time being. During the war the Central Powers recognised the *fait accompli* and entered into new Treaty arrangements with the Porte. The other Powers have, however, maintained their attitude. The Treaty of Peace with Turkey makes express provision for the revival of the capitulations in favour of *all* Allied Powers, but aims at the eventual establishment of a judicial and fiscal system under which the capitulations will disappear.

LOCAL GOVERNMENT.

The whole of the empire is divided into Vilayets, or governments, these subdivided into Sanjaks, or minor provinces, these into Kazas, or districts, with occasional subdivision into Nahiés, or sub-districts. A Vali, or governor-general, representing the Sultan, and assisted by a provincial council, is placed at the head of each Vilayet. The minor provinces, districts, &c., are subjected to interior authorities (Mutesarrifs, Kaimmakams and Mudirs) under the superintendence of the Vali. Prior to 1918, the division of the country into Vilayets had been frequently modified for political reasons. For similar reasons several of the Sanjaks of the empire were governed by Mutesarrifs reporting direct to the Ministry of the Interior. The tendency was to increase the number of these so-called 'independent' Sanjaks by detaching ordinary Sanjaks from the Vilayets to which they have heretofore belonged. All subjects, however humble their origin, are eligible to, and may fill, the highest offices in the State.

An entirely abnormal situation has come into existence as a result of the growth of the 'National Movement' in the interior, which culminated in the convocation of a Grand National Assembly at Angora in April, 1920, under the auspices of Mustafa Kemal Pasha and those associated with him in the movement. Immediately after coming into existence, this Assembly declared itself invested with all power, both legislative and executive, without, however, throwing off its allegiance to the Sultan. It deputed its executive power to a body of Commissioners, forming what is practically a Cabinet. The Angora Government claims to be the sole lawful Government of Turkey, and it exercises *de facto* all the functions of government in the whole of Asia Minor not in foreign occupation. It has broken off all normal relations with Constantinople. The policy of the present Central Government is to bring this dualism to an end by peaceful means, but no progress has been made in this direction up to the present (February, 1922). The Angora Government has materially altered the administrative system described in the previous paragraph, but the division of the territories controlled by them into Vilayets has been maintained.

Area and Population.

The Ottoman Empire before the war was made up of (1) Turkey in Europe, (2) Turkey in Asia (Anatolia, Arabia, Syria, Palestine, Mesopotamia, and Kurdistan), and (3) certain Islands in the Mediterranean. After the conclusion of the 1st Balkan war (November, 1913), which commenced in October, 1912, the Turkish possessions in Europe were considerably lessened, Turkey in Europe being in part divided among the Allied States (Bulgaria, Serbia, Montenegro, and Greece), and in part created into an independent state of Albania. Cyprus and Egypt, which were formerly under the suzerainty of the Sultan, were, the one, annexed to the British Empire and the other declared a British Protectorate in November, 1914, and January, 1915, respectively.

According to the Treaty of Peace with Turkey (signed at Sèvres on August 10, 1920, but not yet ratified by any of the parties), the Empire is reduced still further. Turkey cedes (1) Thrace, west of the Chatalja line, and excepting only the Derkos water supply area, to Greece, as well as Tenedos and Imbros, and the Islands in the Aegean occupied by Greece; (2) Smyrna with the surrounding strip, comprising Tireh, Odemish, Magnisa, Akhissar, Bergama and Aivali, is to be administered by Greece, under Turkish sovereignty, for 5 years, after which the territory may annex itself to Greece by plebiscite; (3) Mesopotamia, Palestine, Syria, Armenia and the Hejaz become independent, the first three under mandates; (4) Kurdistan has autonomy conferred upon it; (5) Castellorizo and the Dodecanese are ceded to Italy. Turkey retains Constantinople, but the coastal area of the Dardanelles, the Marmora and the Bosphorus are placed for certain purposes under the control of a 'Commission of the Straits' to be composed of representatives of various Powers. At a Conference held in London in March 1921, Turkey was offered certain concessions intended to make the Treaty more acceptable, *e.g.* a considerable reduction of the demilitarised zone in the Straits, compromise on the question of Smyrna, a substantial rearrangement of the financial clauses of the Treaty, and an increase in the armed forces which Turkey was to be allowed to maintain. Shortly after these new proposals were put forward, active military operations were resumed between Greece and Kemalist Turkey. This rendered it impossible for the Great Allied Powers to proceed with their efforts to bring about a general settlement. These efforts have recently been resumed, but up to the present (April 1922) no definite result has been achieved. The most important political development in the interval has been the conclusion in October 1921 of a separate agreement of limited scope between the French and Kemalist Governments.

Turkey will be deprived of a probable area of 438,750 square miles, and of a population of about 12,000,000. The area of New Turkey will thus be 174,900 square miles, and the population about 8,000,000.

In the following table the area and population of Old Turkey are shown:—

Vilayets ¹	Area Sq. Miles	Population	Population per Sq. Mile
Europe:—			
Constantinople	1,505	1,203,000	99
Chatalja ("Independent" Sanjak)	733	78,000	82
Adrianople	8,644	610,000	77
Total	10,882	1,891,000	187
Asia Minor:—			
Ismid ("Independent" Sanjak)	3,130	222,700	71
Brussa	25,400	1,026,800	64
Bigha ("Independent" Sanjak)	2,559	129,500	51
Smyrna, or Aidin	25,801	2,500,000	64
Kastamuni	19,570	961,200	49
Angora	27,370	932,800	34
Konia	39,410	1,069,000	27
Adana	15,400	422,400	27
Sivás	23,970	1,057,500	44
Trebizond	16,671	1,265,000	76
Total	199,272	10,186,900	52

¹ This table does not take account of the most recent administrative changes, by which several Sanjaks have been detached from the Vilayets named in it and made "Independent"; nor of the erection in 1914 of the Nejd, including the coast district of El-Hassa into a so-called Vilayet as the result of a political arrangement with the real ruler Abdul-Aziz Bin Saud, who was formally appointed Vali.

Vilayets	Area Sq. Miles	Population	Population per Sq. Mile

Yemen	73,800	750,000	10
Grand Total	613,724	20,973,900	—

In the small European territory now remaining under Turkish rule Moslems preponderate. Other races represented are Greeks, Bulgarians, Armenians, Gipsies, Jews. In Asiatic Turkey there is a large Turkish element, with some four million Arabs, besides Greeks, Syrians, Kurds, Circassians, Armenians, Jews, and numerous other races.

The population of the chief towns still remaining under Turkey is approximately as follows :—

Constantinople	1,000,000	Sivâs (Sebasteia)	65,000
Brûssa	110,000	Bitlis	40,000
Kaisarîfeh	54,000	Trebizond	55,000
Konia	45,000	Diarbekr	38,000

Religion.

Mahommedanism is the established State religion. The Sultan as Caliph is Supreme Head. The chief ecclesiastical dignitary is the Sheikh-ul-Islam, but his functions are judicial and legal rather than spiritual. He is a member of the Cabinet.

Mahommedans form the vast majority of the population in Asiatic Turkey, but only one-half of the population in the provinces which constituted European Turkey before the Balkan War of 1912-13. Recognised by the Turkish Government are a number of non-Mahommedan native communities or 'millets,' namely: 1. Latins or Catholics, who use the Roman Liturgy, consisting of the descendants of the Genoese and Venetian settlers in the Empire, and other native Catholics of the Latin rite; 2. Orthodox Greeks under various separately recognised Patriarchs, of whom the principal is the Œcumenical Patriarch at Constantinople; 3. Armenians, under their

Patriarch at Constantinople, but under the supreme spiritual control of a Catholicos at Echmiadzin, in the Russian Caucasus. In 1903, the old dignity of Catholicos of Sis, in Cilicia, was restored and a new appointment made. There still remains in abeyance the seat of the Catholicos of Akhtamar (Van), an ancient dignity; 4. Armenian Catholics, under a Patriarch at Constantinople; 5. Chaldean Catholics, under a Patriarch at Mosul; 6. Protestants, consisting of converts chiefly among the Armenians; 7. Syrian Catholics, under a Patriarch at Mardin; 8. Syrian Jacobites, under a Patriarch at Mardin; 9. Melchites, under a Patriarch at Damascus; 10. Jews of two rites, now separately recognised; 11. Bulgarian Catholics; 12. Maronites, chiefly in the Lebanon; and 13. Nestorians, or Assyrian Christians, under the Patriarch Mar Shimun of Koghannes. The last two are, however, only semi-officially recognised as independent communities. These religious denominations are invested with the privilege of possessing their own ecclesiastical rule. The spiritual heads of the recognised communities possess in varying degrees civil functions, which in some cases, and more especially in that of the Greek Patriarch, are of considerable importance.

In Constantinople about half the settled inhabitants are Mussulman, the other half being made up mostly of Orthodox Greeks, Armenians, Roman Catholics, Armenian and other Uniates, and Jews. There is, besides, a very large foreign population of various professions. In the Islands of the *Ægean* Sea the population is mostly Christian.

A priesthood in the strict sense of the term cannot be said to exist in Mahommedan Turkey. The Ulema, however, or persons connected in one way or another with the official ministrations of Islam, form a separate class. The principal charges in connection with mosques, theological schools, &c., are to a large extent hereditary.

The number of mosques in the Turkish Empire is 2,120, of which 379 are in Constantinople. The number of the clergy is 11,600. Connected with the mosques are 1,780 elementary schools, where education is supplied gratis. The temporalities of the Church are controlled by the Ministry of Pious Foundations or *Evkaf* which has a separate Budget of its own. The department of the Sheikh-ul-Islam, however, and the whole semi-religious semi-legal organisation subordinate to him are not provided for in this Budget, but in that of the State. The revenue of the *Evkaf* is principally derived from charges on and reversionary interests in real property which has at one time or another been made the subject of consecration to religious or benevolent purposes, and which is known as *Vakuf*. A very large proportion of the urban property of the Empire is of this description, and though it can be for practical purposes owned, alienated, and within certain limits transmitted by inheritance as if it were the property of the holder, the ultimate ownership theoretically resides in God, and the pious foundation, to the use of which it was consecrated, retains in it a perpetual interest, represented by annual rents and rights of reversion in certain cases.

Instruction.

In Turkey, elementary education is nominally obligatory for all children of both sexes. According to the Provisional Law of October 6, 1913, all children from 7 to 16 are to receive primary instruction, which may, however, be given in State schools, schools maintained by communities, or private schools, or, subject to certain tests, at home. The State schools are under the direct control of the Ministry of Public Instruction, which also provides for the inspection of schools maintained by the non-Moslem

communities, &c. Besides these there survive a large number of Medressés or theological seminaries, connected with religious foundations. There are middle-class schools for boys from 11 to 16 years of age, and according to the Bill introduced in January, 1918, similar institutions for girls (*Unes Sultaniyessî*) are to be introduced. Already the five in Constantinople have 2,000 pupils. In Aleppo there are 4 Moslem, 250 Christian, and 30 Jewish schools, with respectively, 19,000, 8,000, and 2,000 pupils. The schools of various descriptions within the empire number about 36,230, and contain about 1,331,200 pupils, or one to twenty-four of population. Training schools for teachers also exist, but the general level of efficiency of the State schools is low. There are a large number of foreign schools, mostly conducted by French, English and American missionaries.

The university, which was nominally founded at Constantinople in 1900, is being reorganised by a Bill introduced in the Chamber in January, 1918. It now comprises 5 Faculties, viz., Arts, Theology, Law, Medicine, and Science. The Faculty of Medicine is installed, together with the Military Medical School, in a modern building which occupies an imposing site on the Scutari shore of the Bosphorus. There are numerous special schools belonging to the State or to the recognized communities, e.g., an Imperial art school, a Great National School (Greek) of old foundation with 400 students, and a Greek theological seminary with 80 students.

Justice.

Turkey being essentially a Moslem State the laws of the Empire rest in principle on the basis of all *Sunni* Moslem law, i.e., the Korân, the Hadith or traditions of Muhammad, and the reported sayings and actions of his immediate successors, all of which are considered binding upon the sovereign as upon all Moslems. This religious law, called as a whole the *Sheri* law, has to some extent been codified, as in the *Mejelle* or Civil Code which was drawn up in 1869—1876, and embodies the prescriptions of the religious law in regard to certain specified matters, like sale, &c. The bulk of modern legislation, however, has no such connection with the *Sheri* law, but consists of statutes enacted by successive Sultans in virtue of their absolute authority, measures adopted by Parliament, and 'provisional' laws, made under an Article of the Constitution, which empowers the executive, when Parliament is not sitting, to enact laws of a pressing nature subject to subsequent ratification, and on which the widest possible construction has been put. Much of this statute law, including the great Codes of Criminal and Commercial Law and the Codes of Procedure, dates from the 30 or 40 years following the *Hatt-i-Sherif* of 1839. The Codes just mentioned were based almost entirely on French models, and, though not a little modified by subsequent measures, they still remain in force in all their main lines. The enactment of laws and regulations on European models has continued since the middle of the nineteenth century, and received an enormous impetus with the renewal of the Constitution in 1908, since which date a very great number of new laws and regulations of every kind have been enacted. Corresponding (though only roughly, because the *Mejelle*, for instance, is applied by the lay courts also) to the double variety of law there is a double system of law courts. The lay courts, called in Turkish *Nizamié*, date like the Codes from the middle period of the nineteenth century and are modelled closely on the French system. Dealing as they do with all criminal, commercial, and ordinary civil business they are now of preponderating importance, but side by side with them there continue to exist the religious or

Sheri Courts which take cognisance of certain specified matters, notably those relating to the title to certain categories of real property, and all matters relating to the personal status of Moslems.

Experiments have been made in connection with the judicial system of the Empire. The most notable of these has been the institution of *juges de paix* by a law promulgated in April, 1913, and that of 'Single-judge' Courts of first instance to replace the ordinary Courts on the French model in the Vilayet of Adrianople, October, 1913. But the system of *juges de paix* has had only a very limited application outside Constantinople.

In February, 1917, a law was enacted placing all the courts, civil and religious, under the jurisdiction of the Ministry of Justice, but the religious courts were in 1920 replaced under the control of the Sheikh-ul-Islam.

Finance.

In the Treaty of Peace with Turkey (Treaty of Sèvres, August 10, 1920), it is provided that the Turkish Finances, from the imposition and collection of taxes to the Budget, and the expenditure of Government moneys, shall be controlled by a Finance Commission composed of representatives of Great Britain, France and Italy.

The revenue is derived from tithes, land and property taxes, Customs, sheep and cattle tax, monopolies, and other sources; the largest portions of the expenditure are for military purposes and for debt charges.

No regular Budget existed before the restoration of the Constitution in 1908. Since that year a Budget and a Finance Law have been voted, or enacted by the executive in the absence of Parliament, each year.

The ordinary Estimates for 5 years ending March 31 are shown as follows:—

	1914-15	1915-16	1916-17	1917-18	1918-19
	£T	£T	£T	£T	£T
Revenue . . .	31,921,163	26,836,438	25,612,572	23,584,165	34,016,698
Expenditure . .	34,007,619	35,657,545	39,724,720	53,304,511	51,969,711

The main items of expenditure in the budget for 1918-19 were:—Public Debt, £T17,427,425; Ministry of Finance, £T10,755,219; Posts Telegraphs and Telephones, £T1,218,981; Ministry of Interior, £T1,279,353; 'Tribes' and Refugee Department, £T2,057,004; Gendarmerie, £T2,564,757; Justice, £T1,073,051; Public Instruction, £T1,051,287; Ministry of Commerce and Agriculture, £T1,582,839; Ministry of War, £T6,044,107; and Ministry of Marine, £T1,704,057.

The Public Debt Administration functions independently of the Ministry of Finance, though the Turkish Government has made it a practice to include the Debt figures in the State Budget. No regular budget has been voted since that for 1918-19. The budget for that financial year has been adapted to current requirements. Since the Armistice the whole financial system of the Central Government has fallen into the utmost disorder, and on October 1, 1920, the Allied Powers entitled to representation on the future Financial Commission instituted a provisional system of control which is exercised by their Delegates on the Public Debt Administration. The budget for 1921 of the *de facto* Government of Angora estimates revenue at £T79,333,440 and expenditure at £T86,519,650.

The Ottoman Government, when unable to meet its liabilities, made an arrangement with its creditors, confirmed by the Iradé of December 8/20, 1881, supplemented and modified by that of September 1, 1903. A Council of Administration at Constantinople was appointed, and to it were handed over for distribution among the bondholders the funds derived from the excise duties, and certain other funds. Of the total foreign debt, 60 per cent. is due to France, 14 per cent. to England and 21 per cent. to Germany.

The external debt of Turkey on August 31, 1921, was placed at £171,527,034

Defence.

According to the records of the Ministry of War at Constantinople, the Turkish army in August, 1914, consisted of 39 divisions. Few of these divisions were up to strength, and the total combatant strength of the Turkish army did not exceed 150,000 men. During the war the army was expanded to a maximum strength of 70 divisions, and up to the time of the armistice nearly 2,700,000 men had been recruited for military service. The maximum combatant strength of the army during the war was approximately 650,000, and this figure was reached in the middle of 1916.

After the collapse of the Turkish army in consequence of its defeats in Palestine and Mesopotamia, no systematic reorganisation was attempted until the rise of the National Movement in the interior. At the end of 1921 the position of the armed forces of the Central Government were negligible, but the *de facto* Government at Angora possessed an efficient army, organised in 12 divisions. The army successfully withstood the advance of the Greek forces in Angora in the summer of 1921. The strength of the Kemalist Army was early in 1921 estimated at upwards of 100,000 men, but it has probably increased since that time. Constantinople is occupied by Allied troops, mainly British and French; the Dardanelles by British troops at Chanak; and French troops at Gallipoli; the Smyrna and Broussa areas, and the whole of Thrace up to the Chataldia lines by Greek troops; Syria by French troops; and Palestine and Mesopotamia by British troops. Considerable progress has been made in the direction of setting up regular civil administrations under French and British auspices in Syria and Palestine. In Mesopotamia the Emir Faisal has been installed as King and an Arab Government formed, with a British High Commissioner to represent the Mandatory Power.

By the Treaty of Peace, which was signed at Sévres on August 10, 1920, Turkey agreed to the dismantlement of all fortresses, including the defences of the Dardanelles and Bosphorus; and to the reduction of her armed forces to an Imperial bodyguard of 700 men, a gendarmeri of 35,000 men and 'special elements' of 15,000 men. Compulsory service is abolished, Turkish soldiers have to serve for a period of 12 years, the number of officers is limited to 2,500 and they must serve for 25 years. All measures of mobilisation are prohibited and no reserve forces are permitted. The Turkish air force is also abolished. The execution of the military clauses of the treaty is placed under the control of Allied Commissions, one of which is to include in its task the organisation of the future armed forces, including the gendarmeri. The gendarmeri is to be partly staffed with officers supplied by the various Allied or Neutral Powers. The police, which is to be independent of the armed forces contemplated in the Treaty, and is to form part of the civil administration, is also to include Allied or neutral officers.

III. NAVY.

By the terms of the Treaty of Sèvres the Ottoman navy is abolished. A few gunboats and torpedo boats are permitted to be retained for fishery and police duties.

Production and Industry.

Agriculture.—Land in Turkey is held under 3 different forms of tenure—namely, 1st, as ‘Miri,’ or Crown lands; 2nd, as ‘Yakuf,’ or pious foundations; and 3rd, as ‘Mülk,’ or freehold property. The first description, the ‘miri,’ or Crown lands, which form the largest portion of the territory of the Sultan, are held direct from the Crown. The Government grants the right to cultivate an unoccupied tract on the payment of certain fees, but continues to enjoy rights of seigniority over the land in question. The second form of tenure, the ‘Yakuf,’ comprises property dedicated for religious or charitable purposes (see under Religion and Education), and is the subject of a complicated and difficult system of law. The third form of tenure, the ‘mülk,’ or freehold property, does not exist to a great extent. Some house property in the towns and of the land in the neighbourhood of villages is ‘mülk.’ The law also recognises two other categories of land—*i.e.*, land set aside for the general use of the whole community or section of it (metruké) and ‘dead’ or unutilised land (mevat). The whole law of Real Property is in urgent need of reform and modernisation. A commencement in this direction was made by a series of Provisional Laws promulgated in 1913 and continued by legislative measures in 1918. This new landed property code provides for a general survey and revaluation of all landed property in the Empire, together with a readjustment of taxes; for corporations to hold real estate in the name of the corporation; for the mortgaging of property as security for debts; for the suppression of guedik (guild) property; and for the extension of the right of inheritance.

A large portion of the State revenue is derived from tithes on agricultural produce. The system of levying this is burdensome and oppressive, the general practice being to farm it out to contractors. Experiments have been made in the direction of commuting the tithe to a fixed money payment.

Agriculture is most primitive. The soil for the most part is very fertile; the principal products are tobacco, cereals of all kinds, cotton, figs, nuts, almonds, grapes, olives, all varieties of fruits. Coffee, madder, opium, gums are largely exported. Wool and mohair are the two principal products of Anatolia. Flour-milling in Smyrna is being improved and extended. Coffee is grown in the Hgdeida region; opium is an important crop in Konia. Tobacco is grown both in European and Asiatic Turkey. The principal tobacco districts are Samsun, Bafra and Charchambe; in 1918 the total tobacco crop amounted to 2,640,000 kilos grown on 55,103 acres. The area in 1919 was 59,943 acres; the crop, 4,273,000 kilos. The principal centres for silk production are Brusa and Constantinople; in 1921 the production of cocoons was estimated at 1,350,000 kilos. The production of olive oil, mainly confined to the Vilayet of Arden, is very important.

The forest laws of the empire are modelled on those of France, but restrictive regulations are not enforced, and the country is being rapidly deprived of its timber. About 21 million acres are under forest, of which 3½ million acres are in European Turkey. The most wooded Sanjaks are those of Kastamouni (3,290,000 acres), Aidin (2,322,500 acres), Broussa (2,270,000 acres), Bolu (1,500,000 acres), and Trebizond (1,250,000

acres. The forests consist of pine, fir, larch, oak, cedar and other timber trees.) Extensive mulberry plantations have been founded both in European and Asiatic Turkey, and about 250,000 plants are annually distributed to the peasants.

Turkey in 1919 had 4,118,000 horned cattle (6,531,927 in 1913); horses, 630,000 (1,050,580 in 1913); mules, 85,000 (144,600 in 1913); asses, 825,000 (1,373,700 in 1913); sheep, 11,200 (18,721,550 in 1913); goats, 2,065,000 (16,463,180 in 1913); camels, 95,000 (314,000 in 1913).

Mining.—The Turkish provinces, especially those in Asia, are rich in minerals, which are little worked. Chrome ore is worked in Smyrna, Brusa, Adana and Konia. The Government silver mines at Bulgan Maden, Konia, produce annually about 2,600 kilos of silver and 400 tons of silver-lead; zinc is found at Karasu on the Black Sea and in Aidin; manganese ore in Konia and Aidin; antimony ore, 308 tons; copper ore is found in the Armenian Taurus, at Tereboli, near Trebizond, at Arghana Maden, near Diarbekr, said to be one of the largest and most productive mines in the world; borax from 6,000 to 8,000 tons exported annually from the Marmora; meerscham at Eskishehr; chrome at Mersina; emery at Smyrna, in Aidin, Konia, Adana, and the Archipelago; asphalt in Syria, and on the Euphrates; coal and lignite (400,000 tons annually) at Heraclea on the Black Sea and in the Smyrna district; petroleum in the Middle Tigris valley and various isolated places in Asia Minor, also on the north coast of the Sea of Marmora. The salt mines at Salif in the Yemen yield a large output. There are salt works also at Aleppo, Erzeroum, Samos, and other places. Both gold and silver are found in the Smyrna sanjak; gold and silver and argentiferous lead at Bulghar Maden (Konia); mercury near Smyrna and at Sisma near Konia; kaolin in the island of Rhodes; arsenic in Aidin; iron in Aleppo and in Kossaro (not worked), in Adana (output, 40,000 tons a year). Near Brussa quarries of lithographic stone are now extensively worked. There is a good deal of brass-turning and beating of copper into utensils for household purposes.

Fisheries.—The fisheries of Turkey are important; the fisheries of the Bosphorus alone represent a value of upwards of 250,000*l.*, though the fishery methods are antiquated. The coast of the Mediterranean produces excellent sponges, the Red Sea mother-of-pearl, and the Persian Gulf pearls.

Manufactures.—Industries in Turkey are mostly quite primitive. There is a tendency to start factories on a small scale, but the supply of labour seems likely to prove a difficulty. At Panderma there is a woollen yarn spinning mill belonging to the Oriental Carpet Manufacturers' Company, which produces 2,750,000 lbs. annually, and employs 140 hands. Cotton spinning is carried on in the vilayets of Aidin and Adana, and in the capital. There are five main establishments, two in Constantinople, two in Smyrna, and one in Magnesia, and four factories of lesser importance in Adana. The latter have a total of 10,000 spindles, the former 40,800 spindles, making 50,800 spindles for the cotton manufacturing industry of the country.

Commerce.

The total trade of Turkey in various years ending March 13 has been as

follows (£T1 of 100 piastres = 18 shillings, or £T10 = 9*l.*, or 10*l.* = £T11):—

Years	Imports	Exports	Years	Imports	Exports
	£T	£T		£T	£T
1912-18	43,551,035	23,921,326	1919	92,762,376	38,427,872
1913-14	40,809,680	21,436,120	1920	169,396,267	47,625,882
1916-17 ¹	22,105,304	34,058,581	1921 ²	73,237,199	19,756,524

¹ September, 1916, to February, 1917.

² First nine months.

Turkish trade for 2 years was distributed among the principal countries as follows:—

Country	Imports		Exports	
	1919	1920	1919	
	£T	£T	Kilos	£T
United Kingdom	26,693,264	48,685,406	12,650,105	6,539,431
Austria	598,282	2,324,411	1,027,328	298,414
France	7,848,413	20,294,215	7,171,157	3,478,570
Germany	1,150,304	57,795	1,121,596	254,039
Russia	2,286,868	5,846,799	8,172,081	6,220,863
Bulgaria	791,901	1,450,307	2,665,379	1,382,800
Rumania	361,260	2,504,017	5,044,682	2,521,390
Greece	5,703,193	4,438,273	2,388,989	732,373
Italy	18,465,968	25,696,202	2,145,561	1,933,833
Netherlands	818,433	5,444,126	4,291,721	3,392,007
United States	8,035,062	25,953,810	5,405,380	4,981,477

During 1920, 8,035,557 kilos of petroleum, valued at 94,767,812 piastres, were imported from the United States and 2,249,748 kilos, valued at 27,532,325 piastres, from Batum. Sugar was mainly imported from the United States (4,710,832 kilos, valued at 203,967,454 piastres), Austria (1,153,419 kilos, valued at 54,433,550 piastres), Bulgaria (1,339,378 kilos, valued at 24,131,500 piastres), Egypt (4,257,877 kilos, valued at 190,406,967 piastres), Italy (1,057,213 kilos, valued at 48,424,780 piastres), and Japan (2,922,987 kilos, valued at 125,032,635 piastres). The United Kingdom furnished over one-half the tea (142,267 kilos, valued at 13,758,522 piastres), while coffee was furnished chiefly by France (1,189,386 kilos, valued at 59,415,569 piastres), the United Kingdom (319,517 kilos, valued at 17,071,180 piastres), and the United States (297,105 kilos, valued at 15,950,003 piastres).

The principal imports from Asiatic Turkey into the United Kingdom and exports to Asiatic Turkey from the United Kingdom (according to Board of Trade Returns) in two years were:—

Imports from Turkey	1919	1920	Exports to Turkey	1919	1920
	£	£		£	£
Opium	163,323	121,144	Coal, coke	59,883	75,529
Raisins	2,132,036	874,579	Cotton yarn	467,404	674,497
Dried Fruit	234,004	2,366,871	Cottons	6,817,602	11,445,201
Wool	344,588	383,010	Woollens	585,101	1,358,456
Carpets	469,880	1,626,128	Iron goods	87,126	420,357
Tobacco	1,047,791	683,793	Machinery	70,877	254,506

The value of the commercial intercourse between the whole of the Turkish

Empire in Europe and Asia and Great Britain during the last five years, according to the Board of Trade Returns, is shown in the following table:—

—	1917	1918	1919	1920	1921
Imports into U. K. from Turkey	£ 467,556	£ 694,715	£ 9,071,080	£ 12,159,799	£ 1,064,399
Exports of British produce to Turkey	921,993 ¹	1,811,784	22,109,713	31,311,578	4,704,332

¹ Exported to ports and places in territory formerly Turkish, but now occupied by other Powers.

Shipping and Navigation.

The mercantile navy of the Turkish Empire in 1911 consisted of 120 steamers of 66,878 tons, and 963 sailing vessels of 205,641 tons.

Internal Communications.

The length of railway line in European and Asiatic Turkey on November 1, 1914, not including the most recently opened sections of the Bagdad Railway, was 2,865 miles.

The Bagdad Railway was intended to extend the Anatolian line from Konia to Adana, Mosul, Bagdad, and Basra with many branch lines. It has been constructed continuously as far as Kara Bunar in Cilicia. Further on the following sections have been completed: Dorak to Bagtché on the Adana side of the Taurus Mountains; Radjun via Muslimié to Jerablus on the Euphrates with branch from Muslimié to Aleppo; Jerablus to El-Abiad in the direction of Nisibin (the Euphrates being spanned by a wooden bridge); and Bagdad to Samara, a stretch of about 80 kilometres. A branch line has also been completed from Alexandretta to Toprak Kalé on the Dorak-Adana-Bagtché section. Of the distance from Konia to Bagdad, 1,509 miles, 1,117 miles (with gaps) are already working. In January, 1919, the British military authorities took over the administration of the Bagdad railway, while the French took charge of the Oriental railways of European Turkey. Total railway mileage in Turkey in 1916, 3,720 miles.

Electric tramways are working in Constantinople, Smyrna, Damascus, and Beyrouth.

There are 1,814 Turkish post-offices in the Empire. In the year 1917-18 the inland service transmitted 20,377,837 letters and 4,685,049 post-cards, and 21,997,149 samples and printed papers; the international service transmitted 1,853,961 letters and 767,744 post-cards, and 691,696 samples and printed papers. A parcel-post system has been introduced into Turkey, and works fairly well. Foreign post-offices have ceased to exist since Oct. 1, 1914.

The length of telegraph lines in Turkey is about 28,890 miles, and the length of wire about 49,200 miles; there are 1,017 telegraph offices; messages in the year 1914-15, 5,533,501.

Money, Weights, and Measures of Turkey.

In January, 1917, the Turkish Government issued a Charter for a new National Bank, to be styled the Ottoman National Credit Bank (Osmanlı İtibar milli Bancassı). Its capital is 4 million Turkish pounds (3,600,000*l.*).

After the expiration of the privileges of the Imperial Ottoman Bank (1925) the new institute is to become the State Bank with the right to issue bank-notes.

The Imperial Ottoman Bank, with a capital of £T10,000,000, had, on Nov. 30, 1910, a note circulation of £T941,250, and cash on hand amounting to £T3,586,834. The bank's note issue consisted up to 1914 of notes of £T5 and upwards, secured of a gold reserve of not less than one-third of the value of the issue. Other important banks are the National Bank of Turkey, the Arch-Levantine Banking Company, the Crédit Lyonnais, Banco di Roma, and the Bank of Athens.

Up to December 31, 1921, the total amount of currency in circulation was as follows:—treasury bonds, £T5,147,919; notes, £T153,859,936; pre-war metallic money, £T38,000,000; other money, £T20,000,000.

On April 17, 1916, an order was issued reforming the currency. A gold standard, with the piastre as the unit, is henceforth to be general all over Turkey, and the piastre equals 40 para. The piastres, as well as the half piastre (20 para), quarter piastre (10 para) and eighth piastre (5 para) pieces are to be of nickel. Silver coins are 2, 5, 10, and 20 piastres; and gold coins 25, 50, 100, 250, and 500 piastres. Silver is legal tender up to 300 piastres, and nickel up to 50 piastres.

At present, however (April, 1922), the only money in general circulation, with the exception of 20 para pieces, is paper issued during the war. This forced currency is very depreciated, the Turkish paper lira being worth about one-sixth of the gold coin of the same denomination.

The gold 100-piastre piece (which is equivalent to £T1) weighs 7·216 grammes, ·916 fine, and thus contains 6·6147 grammes of fine gold. The silver 20-piastre piece weighs 24·055 grammes, ·830 fine, and therefore contains 19·965 grammes of fine silver. £T11 equals £10 approximately (pre-war).

Weights and measures are as follows:—

The <i>Oke</i> , of 400 drams.	. . . = 2·8326 lbs. avoirdupois.
„ <i>Kileh</i>	. . . = 0·9120 imperial bushel.
44 <i>Okes</i> = 1 <i>Cantar</i> or <i>Kintal</i>	. . . = 125 lbs. avoirdupois.
39·44 <i>Okes</i>	. . . = 1 cwt.
180 <i>Okes</i> = 1 <i>Cheke</i>	. . . = 511·380 pounds.
1 <i>Kile</i> = 20 <i>Okes</i>	. . . = 0·36 imperial quarter.
816 <i>Kilehs</i>	. . . = 100 imperial quarters.
The <i>Endazé</i> (cloth measure).	. . . = 27 inches.

For land measurement there is the 'old *dunam*' and the 'new *dunam*.' The first is used extensively for land measurement in the interior of Anatolia, as well as throughout Asia Minor. The second, which is based on the metric system and is employed in all Government departments and townships of any size, is the official Government unit. The old *dunam* is measured roughly by the peasant, who steps off 40 steps, each equal to approximately one *arshin* (about 75 centimetres), and this length squared is reckoned as 1 *dunam*. The *evlek* is equivalent to 400 square *arshin*, or one-fourth of an old *dunam*. In English equivalents, 1 old square *arshin* = 6·1794 square feet; 1,600 square *arshin*, or 1 old *dunam* = 9,887·04 square feet, or 0·22698 acre; 1 new square *arshin* (1 square meter) = 1·74 old square *arshin* = 10·764 square feet; 1 new *dunam* = 2·7216 old *dunam* = 0·61778 acre.

The *kile* is the chief measure for grain, the lower measures being definite weights rather than measures. 100 *kiles* are equal to 12·128 British imperial quarters, or 35·266 hectolitres.

In 1889 the metric system of weights was made obligatory for cereals;

metric weights were decreed obligatory in January 1892, but the decree is not yet enforced. In 1915 the metric system was made the official standard of weights and measures.

On March 1, 1917, the Gregorian calendar was introduced into Turkey, to be used side by side with the Hegira calendar.

Diplomatic and Consular Representatives.

1. OF TURKEY IN GREAT BRITAIN.

Unofficial Turkish Representative in London.—Mustafa Reshid Pasha. (Appointed December, 1920.)

2. OF GREAT BRITAIN IN TURKEY.

High Commissioner and Ambassador Designate.—The Rt. Hon. Sir H. G. M. Rumbold, Bart., P.C., K.C.M.G., M.V.O.

Acting Counsellor.—N. M. Henderson.

Chief Dragoman.—A. Ryan, C.M.G.

Secretaries.—G. G. Knox, H.F.C., Crookshank, J. D. Greenway and W. H. B. Mack.

Head of Consular Section and Consul-General Designate.—A. T. Waugh, C.M.G.

Military Attaché.—Col. A. W. F. Baird, C.B., C.M.G., D.S.O.

Commercial Secretary.—C. H. Courthope-Munroe.

ARABIA.¹

Large areas in Arabia consist only of desert and steppe, occupied by Bedouin tribes, who are forced to adopt a nomadic existence. Considerable portions of the Nefud, or Northern Sand-belt, and the whole of the Ruba el-Khali, or great Southern Desert of soft sand, are quite uninhabitable, although they supply good grazing at certain seasons. There are many tribal communities, settled, half settled, and nomadic, who give effective allegiance only to their own chiefs while admitting the loose overlordship of one of the greater Emirs *e.g.* Ibn Saud, Ibn Rashid, or the King of Hejaz. They are to be found mainly in the Hinterland of Yemen, in the Asir Highlands, in the interior of Oman, and all round the northern fringe of the Nefud desert, which divides Arabia proper from the Syrian Desert or Hamad. But the oases of Central Arabia and most of the fertile coastal districts are occupied by settled communities, under eight independent systems of government. The total area is approximately 1,000,000 square miles, with a population roughly estimated at five or six millions.

1. **The Kingdom of Hejaz**, which has attained its independence during the course of the war, has an estimated area of 170,000 square miles, and an estimated population of about 900,000. Its frontiers are not delimited except on the west. On the south the line runs inland from Hali Point so as to include the territories of the Zahran, Ghamid and Bisha tribes. On the east, Khurma and Kheilar are in Hejaz, but the former is claimed also by Nejd, and the line between is very uncertain. On the north the recognised boundary runs inland from north of Akaba to about Muaddham, on the Hejaz Railway, and thence to Teima, which was taken from Ibn Rashid in the war. Hejaz is barren or semi-barren in almost its entire area. It may be regarded as the most important principality in Arabia in virtue of its possession of Mecca (70,000 inhabitants) and Medina (before the war, 35,000, now reduced under 10,000 inhabitants), the Holy Places of Islam. Formerly included in the Turkish Vilayet of Hejaz, which extended from Akaba in the north to Asir in the south (but latterly, only from Medina Salih in the north), it was the chief centre of Ottoman influence in Arabia; and by means of the Hejaz railway, with its terminus at Medina, the Turks were enabled to maintain garrisons in the ports and the chief towns of the

¹ See Map in THE STATESMAN'S YEAR-BOOK, 1917

interior. But the Grand Sherif, or Emir of Mecca, wielded great influence throughout the Moslem world. Ottoman control was largely maintained in the past by the payment of an annual subsidy, but the presence of the Turks and their maladministration was always resented. Early in the were the British Government guaranteed the autonomy of the Hejaz, in the event of a successful revolt, and on June 5, 1916, HUSEIN IBN ALI, the present Emir, proclaimed his independence. In November, 1916, the Emir Husein issued a proclamation assuming the title King of Hejaz. The Treaty of Peace with Turkey recognises the Hejaz as a free and independent State. The capital is Mecca, and the chief port is Jidda, in the Red Sea, population about 20,000. The chief product is dates, of which the large crop gathered from the Medina oasis ranks highest: but all are consumed locally. Hides, wool, and gum are the principal exports, but the volume is never large, and less now than before the war. Imports are mainly foodstuffs and building materials. Taxation is light, but irregular requisitions and customs dues at the ports are often heavy and furnish the bulk of the King's revenue. Great Britain pays him a considerable subsidy to enable him to maintain independence and provide for the Pilgrimage.

2. **The Emirate of Nejd and Hasa**, the more powerful of the two Central Arabian principalities, has its capital at Riyadh, whence the Saud dynasty exercises jurisdiction over the neighbouring groups of oases. It is the modern representative of the Wahabite Empire founded about 1745 by Mohammed Ibn Saud, Sheikh of Dariyah. The present Emir of Riyadh, ABD EL-AZIZ ES-SAUD, who maintains an intermittent conflict with the neighbouring Emirate of Jebel Shammar, expelled the Turks from Hasa in 1913, and has extended his influence to include Hofuf in the region of the Persian Gulf. Estimated population about 300,000. (South Nejd—south of Riyadh—has about 100,000 inhabitants, Central Nejd about 100,000, Kasim 50,000, and Hasa 50,000.) Nejd produces nothing for export; but Kasim collects and exports hides and *ghi* (butter); and Hasa produces and exports dates, textiles, hides and live-stock.

3. **The Emirate of Jebel Shammar**, which lies to the north of Nejd, was formerly within its jurisdiction; but since the middle of last century it has maintained its independence under the Rashid dynasty. It has its capital at Hail, and is far more Bedouin in character than its southern rival. The present Emir of Hail is ABDULLAH IBN MITAH, born in 1907, who succeeded on the assassination of his father, SAUD IBN RASHID, in May, 1920. Estimated population, including the Shammar, 200,000. No products for export, and everything except bare necessities has to be imported.

4. **The Principate of Asir**, on the west coast of Arabia, between Hejaz and Yemen, has its capital at Sabiyah in Southern Asir. The principate is in the hands of the Idrisi family, the present ruler being MOHAMMED IBN ALI EL-IDRISI. This principate, however, has no effective jurisdiction over *Highland Asir*, where the power is chiefly in the hands of the head of the Aidh family, chiefs of the Beni Mugheid tribe. Estimated population of all Asir, whether under Idrisi or not (the great majority are independent of him), under 1,000,000. Considerable export of hides and live-stock chiefly the Eritrean ports.

5. **The Imamate of Yemen**, which is centred at Sana, is of considerable antiquity, the Imam tracing his descent to the Prophet's daughter Fatimah, and being credited by his Zeidist followers with infallibility and esoteric

knowledge. Considerable areas are devoted to agriculture, cereals and coffee; great tracts of mountain-land are extensively cultivated. The present Imam is YAHYA MOHAMMED HAMID ED-DIN. Area, 75,000 square miles; estimated population, one million. Capital, Sanaa; population about 25,000. Chief port, Hodeida, population 40,000. The chief agricultural products are consumed locally, coffee being the only item exported in any bulk. This goes out now more by Aden than Hodeida, while Mocha no longer counts. No figures are available since the war, but beyond doubt coffee export has declined seriously. Hides are now the largest export.

6. The British Protectorate of Aden (*see page 99*).

7. The Sultanate of Oman (*see page 1172*).

8. The Sultanate of Koweit, on the north-western coast of the Persian Gulf, acquired considerable importance during the discussion of the Baghdad Railway. The Sultan is subsidized by the British Government, which maintains a Political Agent at his Court. The present Sultan, AHMED IBN JOBAR, succeeded his uncle in March, 1921. Estimated population, 50,000.

9. Emirate of Kerak.—Kerak is Transjordanian, and the Emir is Abdullah, second son of King Hussein. His seat of government is at Amman.

MESOPOTAMIA.

(IRAQ.)

King.—**Feisal**, third son of the King of the Hejas.

Mesopotamia was conquered by Indian and British troops during the Great War. The town of Basra was occupied on November 22, 1914, and Baghdad on March 11, 1917. In the Treaty of Peace with Turkey, Mesopotamia is recognised as an independent State, to be placed under a Mandatory Power. The Supreme Council has allotted the mandate to Great Britain.

Government.—In 1920 a Council of State was formed, as a provisional measure, to conduct the administration of the country, under the Mandate of Great Britain. On August 23, 1921, the High Commissioner proclaimed the Emir Feisal King of the Iraq, by election of the people, as the result of a plebiscite in which 96 per cent. of the inhabitants of the country voted in his favour. H.H. the Naqib of Baghdad, who had acted as President of the Council of State, was entrusted by H.M. King Feisal with the duty of forming his first Cabinet, which was composed as follows:—

Premier: H.H. the Naqib of Baghdad.

Minister of Interior: Haji Ahmad Ramzi.

Minister of Defence: Ja'far Pasha al 'Askari.

Minister of Finance: Sasun Effendi.

Minister of Justice: Naji Beg al Suwaidi.

Minister of Public Works: 'Izzat Pasha.

Minister of Education: Saiyid Hibat al Din Shahrastani.

Minister of Health: Dr. Hanna Khayat.

Minister of Commerce: 'Abdul Latif Pasha Mandil.

Minister of Auyaqf: Saiyid Muhammad 'Ali al Fadhl.

It was reported in April 1922 that five of these ministers had resigned.

Area and Population.—The country has an area of 143,250 square miles (the vilayets respectively of Baghdad, 54,540 square miles, Basra, 53,580 square miles, and Mosul, 35,130 square miles), and a population, according to the Census of 1920, of 2,849,282. The following are the detailed figures of the census results:—

Division	Sunni	Shi'ah	Jewish	Christian	Other Religions	Total
Baghdad	130,000	54,000	50,000	15,000	1,000	250,000
Samarra	66,455	14,215	300	—	—	80,970
Diyalah	54,953	46,097	1,689	397	900	104,036
Kut	8,573	98,712	381	127	—	107,798
Diwaniyah	1,000	192,300	6,000	5,000	200	204,500
Shamiyah	445	189,000	530	20	5	190,000
Hillah	15,983	155,897	1,065	27	23	173,000
Dulaim	247,000	200	2,600	200	—	250,000
Total Vilayet of Baghdad	524,414	750,421	62,565	20,771	2,133	1,360,304
Basra	24,408	130,494	6,928	2,221	1,549	165,600
Amara	7,000	284,700	3,000	300	5,000	300,000
Mutafik	11,150	306,220	160	30	2,440	320,000
Total Vilayet of Basra	42,558	721,414	10,088	2,551	8,989	785,600

Division	Sunni	Shi'ah	Jewish	Christian	Other Religions	Total
Mosul	244,713	17,180	7,635	50,670	30,180	350,378
Arbil	96,100	—	4,800	4,100	1,000	106,000
Kirkuk	85,000	5,000	1,400	600	—	92,000
Suleimani	153,900	—	1,000	100	—	155,000
Total Vilayet of Mosul	579,713	22,180	14,835	55,470	31,180	703,378
Grand Total	1,146,685	1,494,015	87,488	78,792	42,302	2,849,282

Instruction.—There are numerous Government schools of all types. Several new schools have been opened and others are under construction (1921). Secondary Schools are receiving special attention, as also technical education.

Justice.—Under the British régime, a Court of Appeal, and courts of various grades have been established, the country adapting as far as possible Mohammedan law to Western ideas of justice.

Finance.—Revenue, 1918-19, 2,080,000*l.*; expenditure, 1,177,000*l.* Revenue, 1919-20, 3,437,000*l.*; expenditure, 3,692,000*l.*

Defence.—The use of the local forces is placed in the hands of the Government, to be employed solely for the maintenance of order and the defence of the territories "except with the consent of the Mandatory."

Production.—Mesopotamia is a land of great potentialities, oil being its chief product. Petroleum wells are being worked at Qaiyarah, near Mosul, and at Mandali, north-east of Baghdad. At Hit, on the Euphrates, are asphalt deposits. The soil of the country is rich, and agriculture is being developed, especially by means of irrigation. Wheat, barley, cotton, dates, and ground nuts are produced.

Commerce.—Imports and exports in 1920 were as follows:—

—	Imports	Exports
	Rupees	Rupees
Basra	123,112,111	44,393,556
Baghdad	109,638,104	59,413,601
Total	233,750,215	103,807,157

Customs revenue in 1920-21, 2,13,94,320 rupees (£1,426,288); in 1921-22, 2,43,33,483 rupees (£1,622,232).

Cotton goods form nearly 50 per cent. of the imports of the country; sugar is next in importance. Large quantities of both commodities were re-exported into Persia. Carpets and grain were the principal exports.

Communications.—The principal seaport for Mesopotamia is Basra, situated 70 miles up the Shatt-el-Arab, at the head of the Persian Gulf. Before the war the rivers Tigris and Euphrates

formed the only means of through communication to Baghdad and other parts of the country. There were caravan routes across the desert, and a few poor roads; the Baghdad railway, built on the European 4ft. 8½ in. gauge, was in course of construction, the section from Baghdad to Samarra, 75 miles in length, having been opened just before the war. During the war metre-gauge railways were built from Basra to Nasiriyah on the Euphrates, 140 miles, Basra to Amara, on the Tigris, 109 miles, and Kut-el-Amara to Baghdad, 105 miles, leaving a break of 120 miles between Amara and Kut-el-Amara. Metre-gauge lines were also built from Baghdad to near Khanikin, 103 miles, and on to the Persian frontier, 30 miles. The standard-gauge railway from Baghdad to Samarra (75 miles) was extended to beyond Tekrit (53 miles), and branches were made from Baghdad to Hilla on the Euphrates, 58 miles, and to Dhiban, beyond Fallujah, 48 miles. There has also been laid a 2ft. 6in. gauge from Hilla on the Euphrates to Kifl, 21 miles. Since the Armistice the sections between Basra and Amara, between Baghdad and Dhiban and between Hitlah and Kifl have been taken up, but Basra and Baghdad have been linked by a line up the Euphrates, and the line to Tekrit has been extended to Qalat Sharqat. There is a train ferry connecting the right and left banks.

The length of telegraph lines is 2,995 miles and of wire 7,845 miles; of telephone lines, 265, and of telephone wire, 3410 miles. Number of telephone exchanges, 32; number of offices, 1,551.

High Commissioner.—Sir P. Z. Cox, G.C.I.E., K.C.S.I., K.C.M.G.

Commander in Charge of British Forces.—Lt.-General Sir J. A. L. Haldane, K.C.B., D.S.O.

PALESTINE.

THE natural and historic boundaries of Palestine run from the desert on the east, along the slopes of Mount Hermon over to the Litani on the west, where the Lebanon and Anti-Lebanon first break into a series of elevated plateaux, and thence over to the Mediterranean coast, and on the south from the Gulf of Akaba across the Desert of Sinai.

The present political boundaries are: West, the Mediterranean; South, a line running from just west of Rafa to east of Taba at the head of the Gulf of Akaba, the territory below this line being Egyptian and Hejaz; North, as settled by the Franco-British Convention of December 23, 1920, but not yet entirely delimited, a line running from just south of Ras-el-Nakura on the coast, half way between Tyre and Acre, eastwards and northwards to Metulla (British Mandate) and across the Upper Jordan Valley to Banian

(French Mandate), thence southwards along the foot-hills to the eastern shore of Lake Huleh and down the left bank of the Jordan and eastern shore of Lake Tiberias to Wady Samakh, and so to El Hamme in Yarmuk Valley, from which point it follows the river.

Government.—After its conquest in 1917-18, by the British Forces, the country remained under British Military Administration till July 1, 1920, when, with the appointment of Sir Herbert Louis Samuel as High Commissioner, a Civil Administration was set up.

High Commissioner.—Rt. Hon. Sir Herbert L. Samuel, P.C., G.B.E. (Appointed July 1, 1920.)

Under the Treaty of Sevres, signed on August 10, 1920, Turkey renounced her sovereignty over the country, and under the draft Mandate submitted in December, 1920, to the Council of the League of Nations, the Mandate for Palestine was to be entrusted to Great Britain, as had already been agreed on April 25, 1920, by the Supreme Council of the Allied Powers at San Remo. To be embodied in the Mandate was the object of establishing there a National Home for the Jewish People, according to the Balfour Declaration of November 2, 1917, which has been embodied in the Peace Treaty with Turkey. The Balfour declaration was in these terms:—‘His Majesty’s Government view with favour the establishment in Palestine of a national home for the Jewish people, and will use their best endeavours to facilitate the achievement of that object, it being clearly understood that nothing shall be done which may prejudice the civil and religious rights of existing non-Jewish communities in Palestine, or the rights and political status enjoyed by Jews in any other country.’

The object of the British Administration in Palestine is to provide for the establishment of the Jewish National Home, without, however, prejudicing the civil and religious rights of the non-Jewish communities in Palestine. The High Commissioner has appointed an Advisory Council, which is composed of the heads of the principal Government Departments and 10 ‘un-official’ members, (4 Moslems, 3 Christians, and 3 Jews), representing the various communities. This Council is regarded as the first step towards the establishment of self-governing institutions in Palestine.

The Jewish population of Palestine have perfected their internal organisation by convening an Elected Assembly, which elected a National Committee, to represent the Jewish population of Palestine in its dealings with the Administration. English, Hebrew, and Arabic are the recognised official languages of the country.

The British Government and Palestine Administration recognise the World Zionist Organisation, which in Palestine is represented by the Palestine Zionist Executive, as the Agency of the Jewish people in all matters pertaining to the upbuilding of the Jewish National Home.

Area and Population.—Palestine under British Mandate is about 9,000 square miles in extent, and includes only that part of Historic Palestine which lies to the west of the Jordan. The population of this territory on July 1, 1921, was approximately 770,000 of whom 600,000 were Moslems, 80,000 Jews, 84,500 Christians, 5,700 Druzes, and 170 Samaritans.

The country is at present divided into seven districts, administered by Governors: Jerusalem, Jaffa, Phœnicia (Haifa), Galilee (Nazareth), Samaria (Nablus), Gaza, Beersheba.

The chief town, Jerusalem, which had been in Moslem hands since 1244, and under Turkish rule since 1517, surrendered to General Allenby on

December 9, 1917. Its population is estimated at 64,000. The Church of the Holy Sepulchre is visited annually by large bands of Christian pilgrims, principally of the Orthodox and Coptic Churches. The site of Solomon's Temple is occupied by the Mosque of Omar, which contains a relic of Mahomet and the reputed sacrificial stone of Abraham. Bethlehem, the scene of Christ's Nativity and the birthplace of King David, is five miles south of Jerusalem. The Church of the Nativity, at the east end of the present village, is said to be the oldest Christian Church in existence. The population figures for the other principal towns are: Jaffa, 45,100; Gaza, 15,000; Haifa, 39,000; Nazareth, 9,000; Nablus, 20,000; Tul-Keram, 3,000; Safed, 14,000; Tiberias, 6,000; Jenin, 4,000; Hebron, 16,000; Ramleh, 10,000.

The Jewish Colonies are grouped in four districts as follows:—In Judea there are 21, viz., Mikveh Israel, Rishon le Zion, Ber-Yacob, Ness Zionah, Rechoboth, Ekron, Gederah, Ber Tobia, Ruchamah, Petach-Tikvah, Ein Ganin, Kfar Mlal, Kfar Saba, Ben Shemen, Hulda, Kfar Urieh, Artuf, Mozah, Dilb, Kalandiah, and Nachlath Jehudah. In Samaria there are 10, viz., Hederah, Hefzi-Bah, Kerkur, Gan Shmuel, Zichron Jacob, Marah, Shvejah, Bath Shlomoh, Shuni and Atlit. In Lower Galilee there are 20, viz., Nahalul, Merhaviah, Sedsherah, Balfouriah, Ein-Harod, Giv'eath-Yecheskiel, Tel-Yossef, Kfar Tabor (Meshia), Jabneel (Jemma), Beth-Gan, Rama (Sarona), Poriah, Mizpah, Kinereth, Daganiah, Hittin, Migdal, Tel Adas, Bethaniah, and Menahemia. In Upper Galilee there are 10, viz., Rosh Pinah, Pekiin, Ayeleth Hashachar, Machnayim, Mishmar Hayarden, Yessod-Hamaalah, Ein Zeitim, Kfar Gileadi, Tel Hai, and Metullah. The Jewish Colonies are governed by *Va'adim* or councils elected by the male and female residents who own registered holdings or pay taxes. Each colony has one or more schools, a synagogue, public library, town hall, hospital, pharmacy and public baths.

The total population of these settlements is about 17,000. Of the above-mentioned the following settlements belong to the Jewish National Fund, which was established by the Zionist Organisation for the purpose of acquiring lands to remain the national property of the Jewish people:—Ben Shemen, Hulda, Kfar Mlal, Dilb, Nahlath Jehuda, Nahalul, Merhaviah, Ein-Harod, Giv'eath-Yecheskiel, Tel Yossef, Kinereth, Daganiah and Hittin. The Palestine Land Development Company, also organised by the Zionist Organisation, owns the lands of Tel Adas, Kalandiah, some lands on the Carmel, at Jaffa, Jerusalem, &c. The other colonies were mostly founded by Baron Edmund de Rothschild and by the Jewish Colonisation Association, which administers all the properties of Baron de Rothschild. The total area of the Jewish settlements is 652,653 dunams or about 163,163 acres. There are 37,500 dunams (about 9,375 acres) of plantations, and among them: 15,000 dunams (about 3,750 acres) vineyards, 33,825 dunams (about 8,456 acres) almond groves, 13,322 dunams (about 3,330 acres) olive plantations, 12,456 dunams (about 3,114 acres) orange groves, and 6,000 dunams (about 1,500 acres) eucalyptus plantations. There are two agricultural schools, at Mikveh-Israel and Petach-Tikvah respectively. The Hebrew High School in Jaffa has 30 teachers and 750 pupils. The Jewish Agricultural Experiment Stations at Atlit and Zichron Jacob carry on agricultural and botanical research work.

Instruction.—The approximate number of children under 14 in Palestine is as follows: Moslems 110,000, Christians 12,500, Jews 12,000. The schools maintained by the Government number 246, and contain about 15,500 children; the scholars are mostly Moslems. There are also 53 schools

partly maintained by the Government. A general extension of village education is being carried out by the Government: 75 new schools have been opened since January, 1921. The Training Colleges for teachers have 75 men students and 50 women students. Technical education has been widely introduced, teachers' examinations have been held throughout the country, and all Government teachers are now civil servants. A Law School has been opened in Jerusalem, and a School of Pharmacy is in process of organisation. The Christian students communities provide, to a very large extent, for their own children.

The Zionist Organisation, through the Department of Education attached to the Palestine Zionist Executive, controls 135 educational institutions in Palestine, with a staff of 523 teachers, and attended by 12,830 pupils. These institutions include Gymnasias at Jerusalem and Jaffa, Teachers' Training Colleges (General, Orthodox, Women's and Kindergarten), Schools of Music in Jerusalem, Jaffa, and Haifa, an Agricultural School, an Arts and Crafts Institute (Bezalel), Commercial Evening Classes, and a Technical College. In all these schools Hebrew is the medium of instruction.

Justice.—The Courts in Palestine are either civil or religious courts. The former have jurisdiction over local subjects in all matters save those of personal status and *Wakfs* of charitable endowments, and over foreign subjects in all matters, subject to the provisions mentioned below.

There is a Magistrate Court in every sub-district, and in the larger towns such as Jerusalem, Jaffa, and Haifa, two such courts. The magistrate is in every case a Palestinian and has jurisdiction in first instance in minor criminal cases of which the punishment is not more than one year's imprisonment, and in civil cases where the subject-matter does not exceed £100. He has also jurisdiction in actions for the recovery of the possession of land.

There are four District Courts, each composed of a British President and two Palestinian members. They serve respectively the District of Jerusalem, the Districts of Jaffa and Gaza, the District of Phenicia, and the Districts of Samaria and Galilee, and go on circuit within the area of their jurisdiction. A District Court has jurisdiction in first instance in all crimes and civil cases not within the jurisdiction of a magistrate, and also hears appeals from the decisions of magistrates both in civil and in criminal cases, except in cases for the recovery of the possession of land.

The Court of Appeal, from which no appeal lies, is composed of a British Chief Justice, a British Vice-President, and four Palestinian members. A division of this court normally consists of the Chief Justice or the Vice-President and two Palestinian members. It has appellate jurisdiction in civil and criminal matters decided in first instance by the District Courts, and in actions for the recovery of the possession of land decided by magistrates. It also hears appeals from the Land Courts.

A Bench of honorary magistrates has been established in Jerusalem, Jaffa, and Haifa, who try contraventions for which the maximum penalty does not exceed £25 fine and 15 days imprisonment.

Special arrangements exist in the Beersheba District, where minor cases are disposed of according to tribal custom by the Court of Sheikhs. A British Judge visits Beersheba every month to hear appeals from the local courts and to try more serious criminal cases.

Two Land Courts have been established in the Districts of Jaffa and Samaria respectively, and a third will shortly be established in Jerusalem. These courts, which are composed of a British President and a Palestinian Judge, hear all cases in which the ownership of land is in issue.

All matters of personal status affecting Moslems are within the jurisdiction of the Sharia Courts. A Sharia Court consists of a Kadi, and appeals from his decision lie to the Moslem Court of Appeal, which is composed of a President and two members.

Jewish Religious Courts have exclusive jurisdiction in certain matters of personal status of Jews, and jurisdiction by consent in other matters. An appeal from the decision of the Jewish Religious Courts lies to the Rabbinical Council.

Other religious communities (such as the Latin and Orthodox) retain the courts and jurisdiction which they enjoyed in the Turkish régime.

Special Rules of Court exist with regard to the trial of foreigners. The general effect of these rules is that where a foreign subject is charged with an offence more serious than a contravention, he may claim to be tried by a British magistrate or by a court containing a majority of British judges.

The official languages of the Courts are English, Arabic and Hebrew.

Finance.—For the year 1921–22 the receipts were estimated at £E2,214,074, and the expenditure at £E2,286,133.

The main heads of revenue for 1921–22 were customs, £E449,000; house and land tax, £E120,000; annual tax, £E34,000; tithes, £E375,000; State domains, £E24,000; and stamp duties, £E15,000.

Production and Industry.—Palestine comprises four zones of country. On the west, along the shores of the Mediterranean, which are deficient here in good natural harbours, is the maritime plain, which varies in width from 15 to 20 miles at Gaza to about 2 miles at Acre, and which at the Plain of Esdraelon stretches for a considerable distance into the interior, and separates the highlands of Galilee from those of Samaria and Judæa. From the coastal plain the country rises into a plateau intersected by deep wadis or valleys, which drop steeply to the east to the third zone, formed by the great depression down which the river Jordan runs to the Dead Sea, and which is prolonged for another 100 miles to the Red Sea as the Wadi Araba. This depression reaches a depth below sea-level of 2,600 feet in the deepest portion of the Dead Sea, the surface of which is about 1,300 feet below sea-level. The Dead Sea is 46 miles long and has an average width of $8\frac{1}{2}$ miles; it receives the waters of the Jordan and of six other rivers and has no outlet, the surplus being carried off by evaporation. It is intensely salt, with a specific gravity one-sixth greater than water, and with 24 per cent. of salt. East of the Jordan Valley the country rises again steeply to a plateau and merges into the Arabian desert.

Palestine is essentially an agricultural country. In 1920–21 the area under British Administration, exclusive of Trans-Jordania, produced:—Wheat, 71,153,192 kilos; barley, 51,869,168 kilos; millet, 30,352,916 kilos; grapes, 5,490,306 kilos; olive oil, 6,706,059 kilos; melons, 16,351,022 kilos; and lentils, 3,211,385 kilos. In 1920–21 there were in the country 262,400 sheep, 271,750 goats, and 9,000 camels.

Limestone is found all over the country; sandstone abounds on the coast; gypsum of good quality is found at Mount Usdum and at Mount Gipsia near Melhamia (Galilee). Rock salt abounds in the Jordan Valley and on the shores of the Dead Sea, where also sulphur is obtainable. Mineral oil is said to have possibilities, but pending the ratification of the mandate no work on concessions is permitted. The Dead Sea is about 1,292 ft. below the sea-level, and contains cooking salt, carnallite, and bromide. There are medicinal springs near Tiberias.

The only industries of export importance are those of wine-making in the Jewish Colonies, especially Zichron Jacob, Rishon le Zion, and Petach-Tikvah; soap-boiling in Nablus and Haifa; olive oil in Nablus, Akka, and the district round Jaffa. Oranges grown chiefly in the Jaffa district are exported to Egypt and Europe; in the year ending March 31, 1921, 830,959 cases, valued at £2,200,475, were exported.

The Government is making efforts to re-afforest the country; in 1918-19 369,000 trees were planted, and the budget for 1919-20 provides for the planting of 1,820,000 more.

Commerce.—Trade for 2 years (year ending March 31) was as follows:—

	1919-20	1920-21
	£E	£E
Imports	4,191,060	5,216,633
Exports	773,443	771,701

The trade was distributed as follows in 1920-21:—

Countries	Imports	Exports	Countries	Imports	Exports
	£E	£E		£E	£E
Great Britain	1,696,629	94,244	Japan	118,651	—
Egypt	569,456	534,295	United States	497,626	11,682
France	243,502	14,327	Australia	179,101	16
Italy	223,649	9,299	Other countries	786,851	56,390
Greece	1,500	3,863	By parcels post	227,265	46,766
Netherlands	265,920	630			
India	406,583	169	Total	5,216,633	771,701

The principal articles of import in 1920-21 were rice, £E241,769; sugar, £E403,172; petroleum, £E173,921; and cottons, £E679,055. The principal articles of export were melons, £E64,903; peas, £E36,290; apricot paste, £E36,005; oranges £E200,475; wine, £E50,409; and soap, £E132,169.

Shipping and Communications.—The most important ports of Palestine are Jaffa and Haifa; the two ports of lesser significance are Acre and Gaza. For the year ending March 31, 1921, 603 steamers of 779,521 tons and 2,688 sailing vessels of 29,578 tons arrived at Palestinian ports.

A regular passenger service to Palestinian ports is provided by 17 shipping lines, of which the following run regular services:—Khedivial, Lloyd Triestino, Servizi Maritimi, and Affrèteurs Réunis (weekly); Messageries Maritimes, Fabre Line, Dutch Oriental, Dutch Levant, and Maritimi Italiani (bi-monthly), and the Prince Line (monthly).

The following railways are being worked:—Kantara-El-Arish-Rapha-Ludd-Tulkaram-Haifa, 257 miles; Jaffa-Ludd-Jerusalem, 54 miles; Rapha-Beersheba, 37 miles; Haifa-Afulah-El Hamme, 60 miles; Haifa-Acre, 11 miles; Afulah-Jenin-Nablus-Tulkaram, 61 miles; making a total of 480 miles (625 miles on January 1, 1921). The section Kantara to Rapha (124 miles) is being worked by the Palestine Railways on behalf of the War Office, and is known as the 'Sinai Military Railway.'

The length of public highways in the country is 523 miles.

Banking and Currency.—The most important bank in Palestine is the Anglo-Egyptian Bank with branches at Jerusalem, Jaffa, Haifa, and

Gaza. The Anglo-Palestine Company has its head office in Jaffa, with branches in Jerusalem, Haifa, Tiberias, Safed, and Hebron. In addition there are branches in Jerusalem of the Banco di Roma, the Crédit Lyonnais and the Imperial Ottoman Bank.

At present Egyptian currency is legal tender. 1 Egyptian pound (£E) = 100 piastres or 1,000 milliemts. £E1 = £1 0s. 6d., and £1 = £E0·975.

Weights and Measures.

(1) LENGTH AND AREA.

- 1 draa or pic = 67 centimetres = 26·38 inches. Cloth measure.
 1 draa = 75 centimetres = 29·53 inches. Building and land measure.
 1 dunam = 1,600 sq. pics = 919 sq. metres = 23 acres. Land measure
 (1·4 dunams to the acre).

(2) WEIGHTS.

- 1 dirhem = 49·459 grains.
 1 okka = 400 dirhems = 1·248 kilograms = 2·751 lb.
 1 kantar (South) = 100 rotls = 225 okkas = 288 kilograms = 634 lb.
 (North) = 100 rotls = 200 okkas = 256 kilograms = 564 lb.
 1 rotl = (South) = 12 okkias = 2·25 okkas = 900 dirhems = 2·88 kilograms = 6·34 lb.
 (North) = 12 okkias = 2 okkas = 800 dirhems = 2·56 kilograms = 5·64 lb.

(3) CAPACITY.

- (Wheat) 1 tebboh (South) = 2 mid = 4 sa'a = 8 ruba'ia = 23 kilos = 50·6 lb.
 (Barley) 1 tebboh (South) = 16 okkas = 20 kilograms = 44 lb.
 1 Galilee kele (North) = 50 okkas = 62·4 kilograms = 137·28 lb.
 1 jarra (oil measure) = 16 okkas = 22 litres = 20·2 kilograms (olive oil).

The metric system is followed by the Government, and its use regulated by Ordinance, but the local weights and measures are still commonly employed.

SYRIA.

Syria, a province of Turkey-in-Asia, has, by the Treaty of Peace with Turkey, August 10, 1920, been recognised as an independent State to be placed under a Mandatory Power. By decision of the Supreme Council of the Allied Powers at San Remo (April 25, 1920), France has been assigned the Mandate for Syria.

It is intended that the country shall become a federative State (of the four Syrian States of Aleppo, Damascus, Alaouite, and Lebanon) under the supervision of a French High Commissioner representing the Foreign Office.

High Commissioner.—General Gouraud.

Area and Population.—Syria under the Mandate is bounded by the Mediterranean on the west, by the northern boundary of Palestine on the south, by Mesopotamia on the east; and on the north, according to the Franco-Turkish agreement of March 21, 1921, modifying the boundary set forth in the Treaty of Sévres, the Baghdad railway between Chobanbeg and Nisibin.

The Anglo-French agreement of December 23, 1920, defines the frontier between Syria and Mesopotamia as running from Intar, at the south-eastern corner of the Hauran, north-east across the Syrian Desert, of which the northern portion falls to France. Thence the frontier crosses the Jezira (the land between the Euphrates and Tigris) so as to leave the Western Khabar

river to France and Sinjar, which is 65 miles west of Mosul, to Mesopotamia. From Rumeilan Keui the frontier goes direct to the Tigris, and then up that river to the new southern boundary of Turkey.

According to the same agreement the southern boundary of Syria begins at Ras Nakura; then follows the watershed between the Farah, Kurn, and Kerbera Wadis on the south and the Duhleh-el-Ayon and Zerka Wadis on the north; then follows the watershed between the Litany and the Jordan as far north as Metullah, the most northern Jewish Colony, then turns eastward, leaving Banias and its "source of the Jordan" in Palestine; then passes down the Wadi Jeraba to the Sea of Galilee, then crosses the Sea of Galilee, leaving the country of the Gadarenes to France. From Semakh to the east of the outflow of the Lower Jordan from the Lake it runs to the south of the Yarmuk so as to include Deraa and Bosrah in Syria. From Deraa the frontier runs to Nasib, thence to Intar and north-east to the nearest point of the Euphrates at Abu Kemal, 50 miles west of Anah; then it runs to Rumeilan Keui so as to leave all the western Khabur to Syria and Sinjar to Mesopotamia, and thence to the nearest point of the Tigris, about 70 miles north-west of Mosul. The eastern frontier of Syria runs up the Tigris as far as Jeziret-Ibn-Omar, when it joins the Turkish frontier laid down in the Treaty of Sévres.

The country has been organised into 4 Governments or territories, viz. :—

(1) Government of Aleppo, from the region of the Euphrates to the Mediterranean (Vilayet of Aleppo, Sanjak of Alexandretta); (2) Territory of the Alaouite (region of Mount Ansariéh); (3) Government of the Great Lebanon from Tripoli (included) to Palestine with Bekaa; (4) Government of Damascus (Hama, Hems, Damascus, and the Hauran).

The Great Lebanon was proclaimed a State on September 1, 1920. It will have the following frontiers:—North, the Dahr-el-Chodib; south, the frontier of Palestine; west, the coast; and east, the heights of Anti-Lebanon. Beirut is to be the seat of the new Government. The national flag will be the French Tricolour with a cedar superimposed on the white ground.

The total area of Syria subject to the French Mandate may be estimated at 60,000 square miles. The total population of this area is probably under 3,000,000. The population of the Lebanon is about 400,000. The bulk of the population of Syria is of Arabic origin, and Arabic is the prevailing language, with many dialectical varieties. But there is a large influx of foreign elements, including Turks, Turkomans, Kurds, Circassians, Armenians, Persians, Jews, and a certain number of Europeans. The principal towns are Aleppo and Damascus, population 250,000; Beirut, 180,000; Hems, Hama, and Aintab, between 60,000 and 80,000; Tripoli, Latakia, and Antioch on or near the Northern Coast, 20,000 to 40,000; Zahlah in Lebanon 14,000. There are no statistics of births and deaths.

Religion and Education.—The population of Syria is mainly Sunni Moslems, with a certain number of Shia sects. The Druses number about 150,000. There have been Christians in Syria since the earliest times. There are now three Uniat Patriarchs and one Orthodox Patriarch of Antioch.

There are about 500 French schools with 50,000 pupils. The Greek Catholics have a seminary at Ain Traz, near Beirut, and a Patriarchal College in Beirut. The Maronites also maintain their own schools. British Missionary Societies supported 19 educational institutions with close on 1,000 pupils, and about 120 elementary schools with about 9,000 pupils, over two-thirds being girls. There is a girls' training college at Beirut and high grade schools at Aleppo, Damascus, and Brumana, in the Lebanon. American Missions have a number of educational institutions throughout

Syria, including a college at Beirut, which includes schools of medicine, pharmacy, dentistry, commerce, and arts and sciences. Roman Catholic agencies have numerous schools, with over 20,000 pupils. The Jesuit University in Beirut is empowered to grant degrees to various faculties.

Finance.—In 1914 the revenue was £T3,841, and the expenditure £T1,953,855.

Defence.—A French army is in occupation of the whole country.

Production and Industry.—Syria is essentially an agricultural country, the bulk of the population being engaged in the cultivation of the soil and in cattle breeding; the total area normally under crops is roughly 6,000 square miles, or about 10 per cent. of the whole area, but might be considerably extended. Cereals, vegetables, and fruit trees are produced in profusion; tobacco, cotton, and hemp are successfully cultivated, and there are some wild plants of value. Wheat is the chief cereal, the average crop being upwards of a million tons. The normal crop of barley is about 500,000 tons; durra (Indian millet), 200,000 tons; maize, oats and rye are of minor importance. Sesame, from which oil is produced, is one of the most valued crops, but is very uncertain, the annual crop being about 30,000 tons, a third being exported. Chickpeas, lentils, beans, vetches, and lupins are largely cultivated, the annual crop of chickpeas being estimated at 500,000 tons. About 4,700 acres in Latakia, Aleppo, Beirut, and Damascus produce about 3,000,000 lb. of tobacco, valued at 200,000%. There is a limited amount of cultivation of cotton, hemp, and sugar-cane. The most important fruit trees are the olive, vine, mulberry, and orange. Olives are widely cultivated and the annual output before the war was estimated at 158,000 tons, value 2,200,000%. Vines are also widely distributed, yielding before the war about 345,000 tons. Only a small proportion of this is converted into wine. The white mulberry is largely cultivated in Northern Syria for feeding silk-worms. The cultivation of oranges and lemons has greatly increased in recent years, and the fruit of these and other trees is largely exported.

It is estimated that in 1914 the country contained about 270,000 horses, mules, and donkeys; cattle 500,000, sheep and goats 4,800,000, camels 200,000, valued at about 10,000,000%.

Syria is poorer in minerals than in other resources, but this may be due to insufficient exploration. Northern Lebanon has been worked for iron in ancient and modern times. At Majerba the ore is rich, and the iron good. There is a comparatively rich mine of lignite in South Lebanon. There are indications of petroleum in various places, but the attempts to work it so far have not been successful. There are indications of phosphates, lead, copper, antimony, nickel, chrome; gypsum is widely distributed. There is abundance of marble and good building stone.

The industries of Syria are on a very small scale; by the introduction of Western methods they might be considerably developed. Flour, oil, soap, and silk thread are the most important. Wine and tobacco are produced; the output might be much increased.

Commerce.—Before the war the average annual trade amounted to about 3,636,000% for exports and 6,653,000% for imports, mainly through Alexandretta and Beirut. The main exports from Syria (pre-war figures) are raw silk 420,000%, cocoons 292,000%, sheep, goats and cattle 260,000%, oranges and lemons 226,000%, soap 206,000%, wool 188,000%, tobacco 160,000%, sesame 126,000%. The leading imports into Syria are

(1911) cotton fabrics 1,400,000*l.*, cotton yarn 400,000*l.*, sugar 400,000*l.*, rice 287,000*l.*, flour 190,000*l.*, coffee 105,000*l.*, metals and articles of metal 620,000*l.*, engines, carriages, agricultural machines 190,000*l.*, petroleum 215,000*l.*, timber 12,000*l.* Of the exports (average 1908-13) 750,000*l.* went to France, 570,000*l.* to Egypt, about 250,000*l.* to the United Kingdom. Of the imports an average of 1,786,000*l.* came from the United Kingdom, Austria 418,000*l.*, France 370,000*l.*, Turkey 475,000*l.*

Communications.—Most of the ports of Syria are visited regularly by the steamers of various shipping companies. The total tonnage entered and cleared at the leading ports in 1913 amounted to 5,256,000; of this 1,150,600 tons were British, 1,087,800 Austrian, 1,049,300 Russian, 985,400 French, 620,100 Italian, 361,700 German.

Under the Turkish administration there were three classes of roads, the main roads being metalled, but rough. Syria is now comparatively well provided with railways, and new lines and branches are proposed. A line traverses the interior from north to south, with branches to the chief ports. About 190 miles of the Bagdad railway runs through Syria, and about 850 miles of other companies. Of the Hejaz railway about 620 miles traverse Syria.

The official currency as from May 1, 1920, is the Syrian Bank Note, issued by the Bank of Syria, under French Treasury control. The monetary unit is the Syrian pound, divided into 100 piastres (1 piastre = 20 centimes), which are exchangeable in Paris at the fixed rate of 20 francs to the pound.

URUGUAY.

(REPÚBLICA ORIENTAL DEL URUGUAY.)

Constitution and Government.

THE Republic of Uruguay, formerly a part of the Spanish Viceroyalty of Rio de la Plata, and subsequently a province of Brazil, declared its independence August 25, 1825, which was recognised by the Treaty of Montevideo, signed August 27, 1828. The Constitution of the Republic was last amended on January 3, 1918, and came into force on March 1, 1919. The franchise is universal for males over 18 years of age; voting is secret,

and the principle of proportional representation operates. The legislative power is vested in a Parliament of two Houses, the Senate and the Chamber of Representatives, which meet in annual session, extending from March 15 to December 15. In the interval of the session, a permanent committee of two senators and five members of the Lower House assumes the control of the executive power. The representatives are chosen for three years, in the proportion of 1 to every 12,000 inhabitants of male adults who can read and write. The senators are chosen by an Electoral College, whose members are directly elected by the people; there is one senator for each department, chosen for six years, one-third retiring every two years. There are 90 representatives and 19 senators.

The executive is divided between the President of the Republic and a National Administrative Council. The President is elected for four years by the direct vote of the people, and may be re-elected after an interval of 8 years since his last holding office. The National Administrative Council consists of nine members, six of the majority party, and three of the largest minority; three retiring every two years. The election is by direct popular vote. The President appoints the Ministers of Foreign Affairs, of War and Marine, and of the Interior, and has supreme control of these departments. The other ministers—of Finance, Public Works, Industry and Education—are appointed by the Council, which is the controlling power of these departments. The President receives a salary of 24,000 pesos per annum.

President of the Republic.—Dr. Baltasar Brum (March 1, 1919, to February 28, 1923):

President of the Administrative Council.—Señor José Batlle y Ordóñez.

Area and Population.

The following table shows the area and the estimated population of the departments (capitals in brackets) on December 31, 1920 :—

Departments	Area, square miles	Population Dec. 31, 1920	Pop. per square mile
Artigas (Artigas)	4,394	40,065	9.1
Canelones (Guadalupe)	1,834	122,022	66.5
Cerro-Largo (Melo)	5,763	60,658	10.5
Colonia (Colonia)	2,193	90,206	41.1
Durazno (Durazno)	5,525	58,543	10.5
Flores (Trinidad)	1,744	24,873	14.8
Florida (Florida)	4,673	65,678	14.0
Maldonado (Maldonado)	1,587	43,071	27.1
Minas (Minas)	4,819	71,848	14.9
Montevideo	256	393,267	1,535.8
Paysandú (Paysandú)	5,115	76,018	12.9
Rio Negro (Fray Bentos)	3,269	39,041	11.9
Rivera (Rivera)	3,793	48,340	13.7
Rocha (Rocha)	4,280	50,013	11.6
Salto (Salto)	4,865	80,639	16.7
San José (San José)	2,688	64,173	23.8
Soriano (Mercedes)	3,560	59,245	16.6
Tacuarembó (San Fructuoso)	8,112	63,984	7.8
Treinta y Tres (Treinta y Tres)	3,682	43,389	11.7
Total	72,153	1,494,953	20.7

The departments enjoy ample autonomy, each having its Local Government Board and Representative Assembly, with extensive control over local expenditure, taxation, and public works.

In 1914 the Uruguayan and Brazilian Boundary Commissions drew up the documents respecting three islands belonging to Uruguay, to be called Socorro, Jacinto, and Denis.

The results of the census of October, 1908, showed a population of 1,042,686 (530,508 males and 512,178 females). Of this total, 181,222 were foreigners, 62,357 being Italian, 54,885 Spanish, 27,789 Brazilian, 18,600 Argentine, 8,341 French, 1,924 British, 1,406 Swiss, 1,112 German, and 5,408 of other nationalities.

The population of Montevideo City on November 30, 1920, was 361,950. Of the other cities, Paysandu had 26,000 inhabitants; Salto, 30,000; Mercedes, 23,000.

Births, deaths, and marriages for three years. The births and deaths are exclusive of still-births.

Years	Living-Births	Still-Births	Marriages	Deaths	Surplus of Births over Deaths
1918	38,914	1,391	6,843	20,009	18,905
1919	39,307	1,291	7,532	18,904	20,403
1920	39,335	1,370	8,355	19,041	20,294

Of the living births in 1920, 11,426 were illegitimate. Divorces: 195 in 1918; 191 in 1919; 250 in 1920.

For five years the arrivals and departures by sea at Montevideo were:—

—	1916	1917	1918	1919	1920
Immigrants . .	229,527	173,421	180,687	153,186	137,639
Emigrants . .	204,525	161,586	177,254	145,287	125,867

Of the immigrants landing in Montevideo in 1920, 9,542 were Spanish; 4,912 Italian; 4,493 Brazilian; 2,173 French; 2,000 German; and 2,740 English.

Religion and Instruction.

State and church are separated; and there is complete religious liberty. The religion professed by the majority of the inhabitants is Roman Catholic. The archbishopric of Montevideo has 2 suffragan bishops in Salto and Melo. The 1908 census showed 430,095 Catholics, 12,232 Protestants, and 45,470 unspecified.

Primary education is obligatory. In 1920 there were 1,005 public schools with 102,889 enrolled pupils. There were also 195 private schools with 21,228 pupils. In 1920 there were 6,060 pupils in attendance at the Secondary Schools. Evening courses for adults were attended (1920) by 5,982 pupils (1,302 illiterates).

There is at Montevideo a university, with 4,165 students and 344 teachers in 1920. There are also a preparatory school and 22 other establishments for secondary and higher education with 4,943 pupils in 1919. There are normal schools for males and for females, and a school of arts and trades supported by the State where 185 pupils receive instruction gratuitously. At the military college, with 8 professors, there are 46 pupils. There are also many religious seminaries throughout the Republic with a considerable number of pupils, a university for women, a school for the blind, and one for the deaf and dumb, and a school of domestic science.

For the relief of poverty there are a charity hospital, an hospital for the

insane, an isolation hospital, an asylum for beggars, an orphan asylum, and 3 infant schools. The Asistencia Pública is an institution which has general charge of hospitals, asylums, dispensaries, and similar relief works all over the country. For 1919-20 its budget was fixed at 3,711,173 pesos.

Justice.

The judicial power rests with the High Court of Justice, consisting of 5 judges elected by the General Assembly of the Chambers. The President is chosen annually by the members of the Court from amongst themselves. This court has original jurisdiction in constitutional, international, and admiralty cases, and will hear appeals in cases in which the decision has been modified or altered in other appeal courts, of which there are 2 each with 3 judges. In Montevideo there are also 3 courts for ordinary civil cases, 2 for commercial cases, 1 for Government, 2 for criminal cases, 2 correctional courts, and 3 for criminal investigation. Each departmental capital has a departmental court, and each of the 214 judicial sections into which the Republic is divided has a justice of peace court; further, each section is divided into districts, in which deputy judges (alcaldes) try cases involving small amounts.

In September 1907 the death penalty was abolished, penal servitude for a period of 30 to 40 years being put in its place.

Finance.

The receipts and expenditure for recent years are stated as follows:—

—	Receipts	Expenditure	—	Receipts	Expenditure
	£	£		£	£
1915-16	7,034,698	6,890,125	1918-19	7,474,959	6,281,204
1916-17	5,643,401	5,942,489	1920-21	8,137,015	8,746,614
1917-18	6,266,261	6,281,205	1921-22	7,777,388	9,202,871

The estimates of revenue and expenditure for 1921-22 were (4·7 dollars = £1):—

Revenue	Dollars	Expenditure	Dollars
Customs	15,500,000	Legislature	994,368
Property tax	4,238,000	Presidency	63,032
Trade licences	1,850,000	National Administrative Council	157,680
Stamped paper and stamps	1,370,000	Ministry Foreign Affairs	886,932
Surtaxes on imports and exports	900,000	„ Interior	4,788,814
Internal revenue taxes	5,000,000	„ Finance	2,796,980
Other receipts	7,695,495	„ Industries	1,416,916
		„ Public Works	1,400,044
		„ War and Marine	7,741,893
		Public instruction	6,040,178
		Justice	565,430
		National obligations	16,401,728
Total	36,558,495	Total	43,253,495

The amount of the public debt of Uruguay on January 1, 1921, is officially given as 172,202,766 dollars. Of the total 43,468,692 dollars ranks as internal, 126,598,574 dollars as foreign, and 2,135,500 dollars as international.

Defence.

The army of Uruguay consists of a small standing army, and the National Guard. Service in the standing army is voluntary, lasting from 2 to 5 years, with re-engagement up to the age of 44. It consists of 21 line battalions, 4 rifle companies, 10 cavalry regiments, 5 field artillery regiments of 3 batteries each, a fortress artillery company and machine gun company, 1 engineers' battalion, and 1 bearer company with a peace strength of 10,400 officers and men, and a nominal war strength of 50,000.

The National Guard is a militia, service in which is compulsory. It is divided into three classes, or 'bans.' The first 'ban,' or 'mobile' national guard contains all the young men fit for military duty between the ages of 17 and 30, and forms a more or less organized force of 15,000 to 20,000 men. It would take the field with the standing army. The second ban, consisting of men fit for service between 30 and 45, is the 'departmental,' or provincial, national guard. Its units do not move out of their own departments, but the men can be drafted to make good the losses of the mobile units in time of war. The third ban, containing all the men between 19 and 45, is the 'territorial' force, and is only liable to garrison duty in its own districts. The total strength of the National Guard (all three bans) is, nominally, about 100,000 men and 120 guns.

There is also a police force, with an establishment of 5,000.

The infantry of the active army is armed with the Mauser rifle, the field batteries have either Schneider or Krupp 7.5 cm. guns. The National Guard is mainly armed with the Remington rifle and old de Bange guns.

The fleet consists of an armoured cruiser *Montevideo*, the yacht *18 de Julio*, and the *Uruguay*, 1,400 tons, speed 23 knots, launched at Kiel in 1910.

Production and Industry.

In Uruguay the agricultural industries are extending. The number of people engaged in agriculture in 1914-15 was 98,301; in 1918-19, 93,187; and in 1919-20, 88,083. The principal crops and their yield for two years were as follows:—

	Area		Yield	
	1919-1920	1920-1921	1919-1920	1920-1921
	Acres	Acres	Metric tons	Metric tons
Wheat	688,407	758,762	161,891	303,505
Barley	4,610	—	1,646	—
Oats	81,145	76,780	21,462	28,871
Linseed	83,645	94,250	23,671	26,811

In 1916 there were within the Republic 7,802,442 head of cattle, 567,154 horses, 11,472,852 sheep, 16,663 mules, 12,218 goats, and 303,958 pigs.

Wine is produced chiefly in the departments of Montevideo, Canelones, Salto, Colonia, and Paysandú. In 1920 there were 2,998 properties (2,355 in 1919), of 17,482 acres, producing 56,482,000 kilos. of grapes, and 7,919,000 gallons of wine. Tobacco and olives are also cultivated.

In the northern departments several gold mines are worked, and silver, copper, lead, magnesium, and lignite coal are found. The supply of electricity for light, power, and traction is a State monopoly (Bill passed October 20, 1912).

There were in 1918, 16,017 industrial and commercial establishments, with a capital of 134,383,782 pesos.

Commerce.

The foreign trade was as follows (4·7 dollars l.) :—

—	1916	1917	1918	1919	1920	1921 Jan.-June
	£	£	£	£	£	£
Imports . . .	7,442,446	7,917,495	13,776,941	8,420,793	9,632,982	4,099,450
Exports . . .	13,503,255	21,962,943	23,124,863	27,457,991	16,150,344	8,806,057

In 1920 the customs receipts amounted to 15,779,561 gold pesos.

The principal exports were (in gold pesos) as follows :—Agricultural produce, 1,316,497 in 1920 ; live animals, 1,653,065 in 1920 ; wool, 31,848,376 in 1920 ; and hides, 15,199,076 in 1920.

The imports and exports for 1919 and 1920 were distributed as follows (in gold pesos) :—

Countries	Imports from		Exports to	
	1919	1920	1919	1920
	Pesos	Pesos	Pesos	Pesos
Argentina	8,615,288	10,457,821	7,110,362	3,633,217
Brazil	5,507,710	4,529,740	2,068,263	2,487,903
France	1,341,741	2,484,803	39,011,519	12,794,656
Italy	539,784	1,139,809	3,636,524	4,257,513
Spain	2,979,518	2,469,145	2,755,115	1,197,973
United Kingdom	7,512,506	8,299,030	28,168,248	17,794,018
United States	15,571,451	14,702,053	44,602,767	20,269,211

Total trade between Uruguay and the U.K. for 5 years (Board of Trade Returns) :—

—	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Uruguay into U.K.	5,455,519	6,541,015	10,514,967	7,053,206	6,241,634
Exports to Uruguay from U.K.	2,276,895	3,150,612	3,328,724	5,916,430	3,093,727

Shipping and Communications.

In 1921 Uruguay had 22 steamers of a total net tonnage of 42,114 tons, and 254 coasting vessels of a total net tonnage of 18,061.

The following table shows the vessels entered and cleared at the ports of Uruguay for 3 years :—

Year	Entered				Cleared			
	Steamers		Sailing Vessels		Steamers		Sailing Vessels	
	No.	Tonnage	No.	Tonnage	No.	Tonnage	No.	Tonnage
1918 . . .	6,417	8,545,355	3,050	475,988	6,332	8,417,097	2,991	469,802
1919 . . .	5,671	7,708,863	2,401	375,346	5,648	7,694,495	2,356	368,523
1920 . . .	5,731	8,355,932	3,996	513,986	5,760	8,880,302	3,954	512,563

There were besides, in 1920, 9,727 barques of 8,869,918 tons that entered and 9,714 vessels of 8,692,820 tons that cleared all the ports. The port of Montevideo is visited by the steamers of 20 different companies, of which 12 are British, 2 German, 3 French, 2 Italian, and 1 Spanish.

The National roads of Uruguay have a total length of 2,240 miles, and there are about 3,100 miles of departmental roads, of which about 300 miles are macadamised. River transport is also very extensive.

The three principal railway systems are the Central (Combined System, (988 miles), the Midland (320 miles), North Western (113 miles), Northern (73 miles), all British owned. The East Coast Railway (78 miles) and 3 minor lines are controlled by the State. During the financial year ended June 30, 1921, the gross receipts of the railways were: Central (Combined System), 1,879,630*l.*; Midland, 205,654*l.*; North-Western, 75,215*l.*; Northern, 23,522*l.* From January 1 to December 31, 1920, the receipts on the State Railways amounted to 496,220 dollars. On June 30, 1921, the railway system of Uruguay open for traffic had a total length of 1,625 miles of standard gauge, of which 1,060 miles are under State guarantee. There are 170 miles of tramway in operation; the tramway lines of two Companies in Montevideo have been electrified, but on another line in the capital, owned by the State, horse traction is still used. In Salto and Paysandu the trams are drawn by horses.

The telegraph lines in operation have a total length of 4,819 miles; in 1919, 258 offices through which 1,505,705 telegrams passed. Two telephone companies of Montevideo have 26,872 miles of wire, and in the Republic, 29 companies have 37,390 miles of wire. Number of subscribers, 18,188. The Government will take over the whole of the postal services as soon as arrangements have been completed.

In 1919 there were 995 post offices. The correspondence movement (internal) comprised 95,404,951 letters, packets, &c., and external, 12,026,807.

Money and Credit.

The Bank of the Republic had a paid-up capital on June 30, 1921, of 20,335,955 dollars. This bank has the exclusive right to issue notes. The president and directors are appointed by the Government. On September 30, 1921, notes to the value of 64,932,995 dollars were in circulation, and its stock of gold amounted to 55,013,943 dollars in bullion and 55,013,943 dollars in gold coin.

In August, 1921, the gold reserve in the banks of the country amounted to 53,263,383 pesos, distributed as follows: 55,013,943 pesos in the Bank of the Republic, 1,404,010 pesos in other Uruguayan banks, and 1,845,430 pesos in foreign banks.

In 1912 the Government created a National Insurance Bank (Banco de Seguros del Estado) with a monopoly of insurance business of all kinds. No new insurance companies may now be established. The Insurance Bank opened its doors on March 1, 1912. The business of the bank is divided into the following departments: Fire insurance; automobile insurance; workmen's accident insurance; hail insurance; life insurance; animal insurance; marine insurance; and insurance for window panes and mirrors. In 1919 the volume of business transacted by the insurance bank amounted to 120,942,523 pesos, and the profits were 2,212,612 pesos. In 1920 the premiums collected amounted to 3,256,179 dollars, and the claims settled 1,075,314 dollars.

The British Banks operating in Uruguay are: Anglo South American, British Bank of South America, London and River Plate Bank, London and Brazilian, and Royal Bank of Canada.

Money, Weights, and Measures.

There is no Uruguayan gold coin in circulation, but the monetary standard is gold, the theoretical gold coin being the *peso nacional*, weighing 1·697 grammes, ·917 fine. The law of June 23, 1862, authorised the coinage of the *doblon*, or 10-peso gold piece, but, as yet, only foreign gold is in circulation and is legal tender. (4·70 pesos=£1).

The silver *peso* or *dollar*, of 100 centesimos, weighs 25 grammes, ·900 fine. Other silver pieces are 50 centesimos and 20 centesimos. Nickel coins are 5, 2, and 1 centesimo pieces.

The metric system of weights and measures was adopted by a law of May 20, 1862, and came into force on January 1, 1867, replacing the old Spanish weights and measures which were current with slight modifications. By a law of October 2, 1894, the metric system was made compulsory in all civil and commercial transactions. The strict requirements concerning weights and measures were reinforced by a decree of February 8, 1918.

Diplomatic and Consular Representatives.

1. OF URUGUAY IN GREAT BRITAIN.

Envoy and Minister.—Senor Federico R. Vidiella (1920).

First Secretary.—Carlos de Santiago.

Consul-General.—Don José Barboza Terra.

2. OF GREAT BRITAIN IN URUGUAY.

Envoy Extraordinary, Minister Plenipotentiary and Consul General.—Sir Claude Coventry Mallet, C.M.G. Appointed March, 1919.

Naval Attaché.—Commander C. L. Backhouse.

Acting Vice-Consul.—E. A. Cleugh.

There are also Vice-Consuls at Fray Bentos, Maldonado, Paysandú, and Salto.

VENEZUELA.

(ESTADOS UNIDOS DE VENEZUELA.)

Constitution and Government.

THE Republic of Venezuela was formed in 1830 by secession from the other members of the Republic of Colombia. The Constitution in force is that of June 13, 1914. Legislative authority is vested in a Congress of 2 chambers, the Senate and the Chamber of Deputies. The former consists of 40 members elected for 3 years, 2 for each State, Venezuelans by birth and over 30 years of age. The latter is constituted as follows: Each State chooses by direct election for 3 years one deputy, a Venezuelan by birth and over 21 years of age, for every 35,000 inhabitants, and one more for an excess of 15,000. A State with fewer than 35,000 of population will have one deputy. The Federal District and the Territories which have, or may reach, the population fixed by law will also elect deputies.

The executive power is exercised by the President of the Republic in conjunction with the Cabinet Ministers through whom he acts. The President is elected by Congress for 7 years, must be a Venezuelan by birth and over 30 years of age; by the new Constitution (1914) there is no restriction as to re-election. Failing the President, temporarily, the President can nominate any member of the Cabinet to act in his place.

President of the Republic.—General Juan Vicente Gómez, elected May 3, 1915, for the period 1915 to 1922.

The President-Elect has not yet taken office, retaining his post of Commander-in-Chief. Accordingly the Provisional President, Dr. V. Marquez Bustillos, elected April 19, 1914, continues to act as head of the State.

The Cabinet consists of 7 Ministers: the Ministers of the Interior, of Foreign Affairs, of Finance, of War and Marine, of Fomento, of Public Works, and of Public Instruction. The seat of the General Powers of the Nation is at the City of Caracas, but, when any unforeseen circumstance requires, the Executive Power may fix its residence at any other point of the Federal District.

The States are autonomous and politically equal. Each has a Legislative Assembly, whose members are chosen in accordance with their respective Constitutions. Each State has a President and a general Secretary. The States are divided into districts and municipalities. Each district has a municipal council, and each municipio a communal junta. The Federal District and the Territories are administered by the President of the Republic through Governors, who in turn appoint secretaries.

Area and Population.

Venezuela has an area of about 398,594 square miles. According to the census of January, 1921, the population was 2,411,952, the density for the entire country being 6 persons to the square mile. The country is now divided into a Federal District, 20 States and 2 Territories, as follows:—

State	Capital	Pop. Dec. 31, 1920	State	Capital	Pop. Dec. 31, 1920
Anzoátegui .	Barcelona	103,573	Portuguesa .	Guanare	52,549
Apure . .	San Fernando		Sucre . .	Cumana	150,211
	de Apure	39,187	Táchira .	San Cristobal	147,076
Aragua . .	Maracay	95,902	Trujillo .	Trujillo	178,942
Bolívar . .	Ciudad Bolívar	65,852	Yaracuy .	San Felipe	108,022
Carabobo .	Valencia	125,514	Zamora .	Barinas	55,055
Cojedes . .	San Carlos	81,850	Zulia . .	Maracaibo	119,458
Falcón . .	Coro	128,255	Ter. Amazonas	San Fernando	
Guárico . .	Calabozo	122,190		de Atabapo	48,940
Lara . .	Barquisimeto	219,816	„ Delta-	Tucupita	13,474
Mérida . .	Mérida	123,232	Amacuro		
Miranda .	Ocumare	174,266	Federal Dist.	Caracas	140,132
Monagas .	Maturín	64,421			
Nueva Esparta	La Asunción	56,035		Total .	2,411,952

Some of the more important cities with their population according to the census of 1920, are:

Caracas . .	92,212	Ciudad Bolívar .	19,712	Mérida . . .	14,082
Maracaibo .	46,706	Cumana . . .	16,342	Trujillo . .	12,415
Valencia . .	29,446	Caro . . .	15,533	Barcelona .	10,883
Barquisimeto	28,943	Maturín . . .	15,465	Ocumare . .	10,048
San Cristobal	21,385	San Felipe . .	15,506	Maiguetia .	8,637

The movement of population, according to official statistics, is shown as follows:—

Year	Marriages	Births	Deaths	Immigrants	Emigrants
1918	12,691	75,882	67,886	6,153	5,841
1919	17,170	83,055	62,019	12,433	12,879
1920 .	12,874	74,174	54,715	11,178	11,883

Religion and Instruction. .

The Roman Catholic is the State religion, but there is toleration of all others. The Archbishop of Caracas has 5 suffragan bishops.

Instruction is given both in public and private schools, and teaching is entirely free. But under a new scheme introduced in 1915, all pupils whether of elementary, professional or high schools, must pass the requisite State examination. The State also prescribes the courses of study for all grades of schools. Great stress is laid on practical instruction, and accordingly in 1915 the Government established practical courses in medicine, and began to build laboratories for all grades of schools. Elementary instruction is free, but backward, and from the age of 7 to the completion of the primary grade, compulsory. At Caracas is the central University (it has been closed since October, 1912), and in Mérida is the University of Los Andes. Superior instruction is divided into schools, viz.: Philosophy and Letters; Physical, Mathematical, and Natural Sciences; Medical Science; Political Science; and Ecclesiastical Science. These schools can be established separately or can

unite to form Universities. There are at present in activity, the University of Los Andes, eight schools of Political Science and of Ecclesiastical Science, and in Caracas Schools of Medical Science and of Ecclesiastical Science, besides private schools of Political Science. Steps are being taken for the establishment of other schools and institutes for superior instruction. The University Faculties have teaching members (professors), ordinary members (doctors), and honorary members. The Government supports also the following Institutes for special instruction: a School of Plastic Arts, another of Music and Elocution, two of Arts and Trades (one for men and the other for women), and three of Commerce. Total expenditure on education 1921-22, 4,425,587 bolivars (2,493,538 bolivars for elementary education).

Justice.

Federal judicial authority resides in the Court (which is also Court of Cassation) and in various tribunals and courts established by special laws. The Federal Procurator-General is appointed for 3 years.

The States have each a Supreme Court with 3 members called respectively President, Relator, and Chancellor. Each State has also a superior court, courts of first instance, district courts, and municipal courts. The States' judicial officers hold their posts for 3 years. In the Territories there are civil and criminal judges of first instance, and also judges in the municipalities.

Finance.

The revenue and expenditure for five years were as follows:—

—	1917-18	1918-19	1919-20	1920-21 ¹	1921-22 ¹
	£	£	£	£	£
Revenue . . .	2,333,560	3,759,700	4,045,377	2,360,871	2,504,316
Expenditure . .	2,372,254	3,085,003	2,722,621	2,318,360	2,504,316

¹ Estimates.

The following table shows (in bolivars) the principal items of the budget for the fiscal year ending June 30, 1922:—

Items	Revenue	Items	Expenditure
	Bolivars		Bolivars
Customs	11,550,000	Department of Interior . .	12,186,438
30 per cent. contribution .	3,465,000	Department of Foreign Affairs . .	2,407,513
Tax of 25 per cent. on import duties	2,877,500	Department of Finance . .	16,894,448
Transit tax	306,000	Department of War and Navy . .	12,324,556
Liquor tax	7,500,000	Department of Internal Development . .	6,099,459
Tobacco	8,600,000	Department of Public Works . .	8,270,820
Salt revenue	6,700,000	Department of Public Instruction . .	4,425,567
Stamps	6,000,000	Budget rectifications . .	625,178
Other revenue	16,225,500		
Total	63,234,000	Total	63,234,000
	(2,504,816L)		(2,504,316L.)

The public debt on Dec. 31, 1920, was 131,627,351 bolivars (5,212,964*l.*). Of the total the internal debt at 3 per cent. amounted to 45,175,169 bolivars. The 3% Diplomatic debt of 1908 amounted to 75,097,035 bolivars (2,974,140*l.*). On December 31, 1921, the public debt was 124,859,319 bolivars.

Defence.

In 1920 a law was promulgated according to which all Venezuelans have to serve two years with the active forces of the army, and to remain in the reserve until the age of 45. The active army consists of infantry, 20 battalions, each of 400 men; artillery, 8 batteries, each of 200 men, and 1 naval battalion. The naval force contains one battalion distributed among the vessels of the navy, which consists of an unarmoured cruiser (acquired in September, 1922), 3 gunboats, a transport, a tug, a torpedo boat, and several coastguard vessels.

Production and Industry.

The surface of Venezuela is naturally divided into 3 distinct zones—the agricultural, the pastoral, and the forest zone. In the first are grown coffee, cocoa, sugar-cane, maize, cotton, beans, &c.; the second affords runs for cattle; and in the third tropical products, such as caoutchouc, balatá (a gum resembling rubber), tonka beans, copaiba, vanilla, growing wild, are worked by the inhabitants. The area under coffee is estimated at from 180,000 to 200,000 acres. The coffee plantations number about 33,000, and those of cocoa 5,000. There are about 11,000 sugar plantations. The annual production of sugar may be estimated at 60,000 tons.

One-fifth of the population is engaged in agriculture. The live-stock in Venezuela is estimated as follows:—2,077,684 oxen, 113,439 sheep, 2,154,716 goats, 167,708 horses, 51,565 mules, 200,439 asses, 512,086 pigs. In the agricultural and cattle industries about 60,000 labourers are employed.

Venezuela is rich in metals and other minerals. One of the principal mining industries is the production of gold in the region to the south-east of Ciudad Bolívar. In 1920, 585,977 grammes of gold were produced, apart from about 250,000 grammes of placer gold, and 805,076 grammes exported. Copper ore production was 29,708 tons in 1918. Coal is worked at Coro, in Falcon State, and at Naricual; total production in 1919, 25,559 tons; 1920, 29,708 tons. Salt mines in various States are now worked by the Government. The gross revenue during the first year of Government administration was 6,377,259 bolivars, and the net revenue exceeded 5,000,000 bolivars. Petroleum is found in many places, the production in 1920 amounted to 69,539 tons. Asphalt from Lake Bermúdez is exported to the United States; output in 1920, 23,452 tons. Round the island of Margarita and neighbouring islets off the north coast of Venezuela pearl fishing is carried on. Government revenue in 1920 from mining royalties was 1,709,757 bolivars, and from pearl-fishery licences, 433,640 bolivars.

Venezuela has few industries, most manufactured materials required being imported. There are two cotton mills at Valencia, one at Caracas, and one at Cumana, producing textiles which compete with imported Manchester goods in the cheaper qualities. Coarse fibre sacks are manufactured locally. There is also a cement and a glass factory at Caracas. Salt and matches are Government monopolies; the latter is farmed by a British Company.

Commerce.

The value of the imports into and exports from Venezuela in the last 5 years was :—

—	1915-16	1916-17	1917-18	1918-19	1919-20
	£	£	£	£	£
Imports	3,542,883	5,316,722	3,382,759	5,243,147	10,927,762
Exports	4,993,746	4,794,670	3,920,866	9,724,268	8,925,148

Principal domestic exports in 1919-20 and 1918-19 were ;—

—	1918-19	1919-20	—	1918-19	1919-20
	Bolivars	Bolivars		Bolivars	Bolivars
Coffee	125,093,198	101,723,718	Hides	13,733,396	23,364,226
Cocoa	27,352,829	46,454,182	Cattle	1,840,506	4,005,520
Balata & rubber	6,319,435	9,673,187	Gold	2,289,531	2,757,135

The distribution of the commerce in 1918-19 and 1919-20 was mainly as follows :—

—	Imports		Exports	
	1918-19	1919-20	1918-19	1919-20
	£	£	£	£
United States	3,640,157	6,502,886	4,361,957	4,482,727
United Kingdom	1,094,951	2,635,502	582,437	632,561
Spain	171,358	428,127	742,660	774,785
France	108,149	513,310	2,200,756	1,020,162
Netherlands	3,349	214,082	204,958	411,711
Italy	46,609	212,247	56,241	72,436

Of the imports in 1919-20, the United States furnished 56 per cent. and the United Kingdom 24 per cent. ; and of the exports the United States took 47 per cent. and the United Kingdom 13 per cent.

Total trade between Venezuela and the United Kingdom (according to the Board of Trade returns) for 5 years :—

	1917	1918	1919	1920	1921
	£	£	£	£	£
Imports from Venezuela to U. Kingdom	215,335	423,050	976,008	904,735	315,693
Exports to Venezuela from U. Kingdom	943,793	1,025,139	1,359,987	3,380,500	723,274

Shipping and Communications.

The number of vessels which entered ports of Venezuela in 1919-20 was 1,120 of an aggregate tonnage of 1,124,261 (British vessels, 78 of 206,673 tons). Foreign vessels are not permitted to engage in the coasting trade, except by special concessions or by contract with the Government.

Venezuela had in 1918, 11 steamers of 5,298 tons, and 15 sailing vessels of 2,432 tons.

The roads of the country have recently been much improved. There are now good carriage roads from Caracas to La Guaira and Macuto, from Caracas to Valencia and Puerto Cabello, eventually to be continued to San Cristobal (683 miles), and from Caracas to Guatire, projected as far as Ciudad

Bolivar; from Maracay two new roads have been opened to Ocumare de la Costa, and to Villa de Cura and the Llanos of Apure; in remoter parts, away from the rivers, traffic is carried on by means of pack animals and small mule-carts. A new road has also been constructed in the western part of the country from Uraca, the present terminus of the Tachira Railroad, southward of the mountains of San Cristobal. Two great new roads are under construction, the Gran Carretera Oriental (626 miles), and the Gran Carretera Occidental (540 miles). Total mileage of roads on December 31, 1919, 1,636.

In Venezuela there are 12 lines of railway (5 national and 7 foreign—the latter including 4 British and 1 German) with a total length of (January 1st, 1921) 644 miles. The Great Railway of Venezuela, 113 miles in extent, is one of the longest lines in the Republic, running between Caracas and Valencia. Other lines are the La Guaira and Caracas line (22 miles), the Venezuela Central Railway (45 miles), the Puerto Cabello and Valencia Railway (34 miles), the Bolivar Railway (143 miles), the oldest line in operation in the country, and which runs from the port of Tucucas to Barquisimeto; Great Tachira Railway (74 miles); Great Railway of La Ceita (52 miles); Carenero Railway (33 miles); Guanta to Barcelona Railway (22 miles); and Santa Barbara to El Vigia Railway (37 miles). In 1920 gross railway receipts amounted to 18,007,600 bolivars, and working expenses to 11,672,993 bolivars. In Caracas electric tramways are worked by a British Company.

There are about 11,160 miles of navigable water in Venezuela. The Compañia Venezolana de Navegacion has a virtual monopoly of the navigation of the river and its tributaries and the Lake of Maracaibo.

The telegraph system has (1921) a network of 6,409 miles; 219 telegraph offices; messages 983,883. Receipts amounted to 1,154,883 bolivars in 1920). A British company supplies telephonic communication in most parts of the settled country in the neighbourhood of Caracas. Length of telephone lines in the Republic (December, 1914) 12,511 miles. There are 359 post-offices (1920), which handled 8,407,524 letters and official communications, 656,598 postcards, and 8,749,154 pieces of printed matter.

There are wireless stations at Caracas, Maracay, Puerto Cabello, Maracaibo, San Cristobal, Porlamar, La Guaira, and Barquisimeto.

Money, Weights, and Measures.

The Bank of Venezuela (capital 12,000,000 bolivars) had on December 31, 1920, a reserve fund of 2,674,907 bolivars; cash holdings of 59,285,094 bolivars. The Bank of Caracas has a capital of 6,000,000 bolivars, with reserve amounting (December 31, 1920) to 1,259,835 bolivars. There are also two other banks, the Bank of Maracaibo with a capital of 1,250,000 bolivars, and the Commercial Bank of Maracaibo with a capital of 400,000 bolivars.

The new Venezuelan banking law (1918) authorises the free establishment of banks in Venezuela, which, provided they are incorporated as native companies, shall have power to issue notes to bearer convertible on presentation. Two British banks, the Royal Bank of Canada and the Commercial Bank of Spanish America, have established branches at Caracas; the former has also branches at Maracaibo and Ciudad Bolivar, and the latter a branch at Puerto Cabello. American banks with branches at Caracas are: the National City Bank of New York and the Mercantile Bank of America. The former has also opened branches at Maracaibo and Ciudad Bolivar. A Dutch bank, the 'Hollandsche Bank voor West-Indie,' has opened a branch at Caracas.

The official monetary unit is the *Bolivar* (equivalent to 0.293280

grammes fine gold), which corresponds to the franc. It is divided into 100 céntimos. The face value of £1 is 25·25 bolivars. According to the monetary law of June 15, 1918, it is intended to coin pieces of gold (100, 20, and 10 bolivars), silver (5, 2, and 1 bolivar, and 50 and 25 céntimos), and nickel (12½ and 5 céntimos).

The bank notes in circulation are as follows (the figures in brackets showing their values at par): 1,000 bolivars (£39 11s. 8d.); 800 bolivars (£31 13s. 4d.); 500 bolivars (£19 15s. 10d.); 400 bolivars (£15 16s. 8d.); 100 bolivars (£3 19s. 2d.); 50 bolivars (£1 19s. 7d.); 20 bolivars (15s. 10d.); and 10 bolivars (7s. 11d.). Notes actually in circulation on December 31, 1920, were: Bank of Venezuela, 23,759,860 bolivars; Bank of Caracas, 6,347,150 bolivars; and the Bank of Maracaibo, 1,780,300 bolivars.

Gold coins are the old Spanish *onza* (80 bolivars—very rare) and 20 bolivars. Silver coins are 5-bolivar pieces, commonly called *fuerte* (3s. 11½d.); 2½ bolivars (1s. 11¾d.); 2 bolivars (1s. 7d.); 1 bolivar (9¾d.); ½-bolivar, called a *real* (4¾d.); and ¼ bolivar, called a *medio* (2½d.). Nickel coins are 0·125 bolivar, commonly called a *cuartillo* or a *locha* (1¼d.), and 0·05 bolivar, called a *centavo* (½d.).

A decree of May 18, 1912, provided that the official system of weights and measures shall be the metric system.

Diplomatic and Consular Representatives.

1. OF VENEZUELA IN GREAT BRITAIN.

Envoy Extraordinary and Minister.—Dr. Diogenes Escalante.

Secretary.—Julio F. Mendez.

Commercial Attaché.—Guillermo Todd.

Consul in London (Honorary).—Senor Pablo Heyden.

There are Consular representatives at Cardiff, Liverpool, Manchester, Glasgow, Newport, and Southampton.

2. OF GREAT BRITAIN IN VENEZUELA.

Envoy Extraordinary and Minister.—H. H. D. Beaumont, appointed May 1st, 1916.

Naval Attaché.—Lt.-Commander Lloyd Hirst, R.N.

Vice-Consul at Caracas.—C. A. Edmond.

There are a Consul at Bolivar, Vice-Consuls at La Guaira, Maracaibo, Puerto Cabello, and Consular-Agents at San Felix, Barrancas, Cristóbal-Colon, and Carupano.

Statistical and other Books of Reference concerning Venezuela.

UNIVERSITY OF EDINBURGH.

The University offers facilities for POST-GRADUATE STUDY AND RESEARCH in all the Faculties, and is prepared to receive applications for admission as Research Students.

The New DEGREE OF DOCTOR OF PHILOSOPHY (Ph.D.) was opened to students beginning their Post-Graduate Course in October, 1920, but any Research Student admitted during the five years preceding that date may count for the Degree his period of Research Study in the University.

Applicants, who must be over 21 years of age, must satisfy the University. Authorities that their previous training has been suitable; that the line of Special Study or research which they propose is a fit and proper one; that they are qualified to prosecute the same; and that they propose to do so during a period to be approved, which shall be not less than two academical years. No applicant will be admitted unless he is a graduate of an approved University, or satisfies the Senatus that he possesses other qualifications which entitle him to admission.

A special programme of Post-Graduate Courses in all the departments, and the regulations for the Ph.D. Degree, may be obtained on application to the Secretary.

Applications from those desirous of entering upon a course of Advanced Study or Research should be addressed to the Secretary to the University.

WILLIAM WILSON,

•Secretary to the University.

UNIVERSITY OF BIRMINGHAM.

Chancellor: THE RT. HON. LORD ROBERT CECIL, K.C., M.P.

Vice-Chancellor: SIR GILBERT BARLING, Bart., C.B., C.B.E., F.R.C.S.

Principal: C. GRANT ROBERTSON, M.A., C.V.O.

Vice-Principal: SIR WILLIAM ASHLEY, F.R.D., M.Com.

Dean of the Faculty of Science: PROFESSOR F. W. BURSTALL, M.Sc., M.A.

Dean of the Faculty of Arts: PROFESSOR ERNEST DE SELINCOURT, M.A., D.Litt.

Dean of the Faculty of Medicine: W. F. HASLAM, F.R.C.S.

Dean of the Faculty of Commerce: SIR WILLIAM ASHLEY, Ph.D., M.Com.

The University has fully-staffed Faculties in Science, Arts, Medicine (including Dental Surgery and Public Health), and Commerce, and grants Degrees in all these subjects.

Main subjects in the Faculty of Science are:—Pure and Applied Science; Mining; Metallurgy; Mechanical, Civil, and Electrical Engineering; Mathematics; Geology; Chemistry; Physics; Zoology; Botany; Brewing; with fully-equipped Departments and Laboratories. The Mining Department of the University includes a specially endowed branch for Petroleum Engineering and Research.

In the Faculty of Arts the University has Chairs in all the subjects commonly recognised as humane studies, and it has established Honour Schools in Classics, Mathematics, Philosophy, English, Modern History, the chief Modern Languages, and Music.

The Faculty of Medicine provides a five-year course for men and women students, and works in close connection with the two large general hospitals and the numerous special hospitals in the city. It also includes a School of Dental Surgery, working in close connection with the Dental Hospital.

The course in the Faculty of Commerce is specially designed to equip students with a scientific and practical training for Commerce, Industry, and Business generally. Students in this Faculty have the opportunity of receiving some training in Pure and Applied Science and Engineering practice.

The University grants, under defined conditions, Higher Degrees in the subjects of all its Faculties.

It has recently established a Joint Standing Committee of Council and Senate, to frame a policy of Research and to promote and organise Research in the subjects of all the Faculties.

There is also an organised Department of Social Study, with a two-years' course of study and a Diploma, for Training in Public and Social Work.

The Department of Education is under a Director, who is Professor of Education, and it has organised Departments for Training in Primary and Secondary Schools. It also has a Master's degree in Education.

Professor of Education, and Director of the Department of Education:
C. W. VALENTINE, M.A., D.Phil.

The University has a Joint Committee with the Workers' Educational Association for the provision of Higher Education, through Tutorial Classes, Preparatory Classes, and Lectures, to working men and women unable to attend the University in the daytime.

The University has various Scholarships and Prizes, Research and otherwise, awarded annually.

Full information, with Syllabuses, Regulations, etc., as to Courses and facilities for study, research, and entrance, can be obtained from either the Secretary (G. H. Morley, M.Com.) or the Registrar (J. H. Costain).

TWO RECENT BOOKS

BY

VISCOUNT BRYCE

Modern Democracies

2 vols. 8vo. 50s. net.

"The book is a storehouse of useful information on the laws, customs, and actual working of democracy in the six countries with which it deals. . . . Almost an encyclopædia of the whole subject of democracy."—*The Times*.

"Lord Bryce's remarkable book deserves close study and will always be valued as a faithful picture of Democracy on the eve of the Great War."—*The Spectator*.

"It is idle to seek to comprehend in the space of a review any measure of the scope of Lord Bryce's book. One can only say that each will find there what he seeks. . . . And each will find his theme simply treated in an easy flowing style which carries him gently along, without paradox or epigram, from conviction to conviction. And ever and again some little footnote will remind him of the range of memory and vision that lies behind what he reads."—*The Observer*.

International Relations

Eight Lectures delivered in the United States
in August, 1921

Crown 8vo. 10s. 6d. net.

LONDON: MACMILLAN & CO., LTD.

School of Oriental Studies, **LONDON INSTITUTION.**

(UNIVERSITY OF LONDON)

Special facilities for research and post-graduate work in all Departments.

Prospectuses giving full information concerning all courses, residence, etc., will be forwarded free upon application to the Registrar.

TWO RECENT BOOKS

A Revision of The Treaty

Being a Sequel to "The Economic Consequences of the Peace"

BY

JOHN MAYNARD KEYNES, C.B.

8vo. 7s. 6d. net.

"The sequel, like the earlier book, is a brilliant performance regarded as economic argument and compact analysis, and it also has the advantage of dealing in sardonic and sometimes pitiless humour."—*The Spectator*.

"Mr. Keynes' book is a masterly contribution."—*The Westminster Gazette*.

"Mr. Keynes has the gift of interesting his readers in problems that are at once vital and obscure."—*The Times*.

"The new book is likely to cause as much discussion as the last."—*The Daily Express*.

India Old and New

BY

Sir VALENTINE CHIROL

8vo. 10s. net.

"A survey of India in transition which, we may be sure, will have an important effect on the educated public at home."—*The Observer*.

"During the past quarter-century of rapid and vital change not half-a-dozen English publicists have cared to master the modern Indian problem. . . . The practical consequence is that, as an expositor of the contemporary Indian movement, Sir Valentine Chirol is in possession of the field."—*The New Statesman*.

"A fearless and on the whole impartial survey of the political conditions of to-day and the causes which led up to them."—*The Times Literary Supplement*.

LONDON : MACMILLAN & CO., LTD.,

The Spectator

A WEEKLY REVIEW OF
POLITICS, LITERATURE, THEOLOGY AND ART
ESTABLISHED 1828.

EVERY SATURDAY, PRICE 9d., POSTAGE 1d.

THE news of the week is compressed into an animated narrative, and thus readers of the paper are insured against missing the true bearing and the essential details of current events.

The leading articles deal in an independent and unconventional spirit with the chief matters of political, economic, and general interest.

Books of special interest and importance are dealt with in the long reviews, while the shorter notices give in a condensed form the judgment of equally competent critics on contemporary literature.

In the weekly review of novels, readers of fiction may find a useful guide for making out their lists for the circulating libraries.

TERMS OF SUBSCRIPTION

(payable in advance)

For one year, including postage to any part of the United Kingdom: £2 3 4

"SPECTATOR" Ltd., 13 York St., Covent Garden, London, W.C.2.

SOME RECENT BOOKS

THE POLITICAL ECONOMY OF WAR. By A. C. PIGOU, M.A., Professor of Political Economy in the University of Cambridge. Crown 8vo: 8s. 6d. net.

"Professor Pigou, in 'The Political Economy of War,' has made the most concise and yet the most complete diagnosis of our present financial disease that has yet been propounded."—*The Fortnightly Review*.

"A book that should be read by everyone who wishes to understand existing economic conditions and the manner in which they arose."—*The Westminster Gazette*.

THE ENGLISH PRISON SYSTEM. By Sir EVELYN RUGGLES-BRICE, K.C.B., Chairman of the Prison Commission for England and Wales, and President of the International Prison Commission. 8vo. 7s. 6d. net.

"The number of books on prison reform since the days of Howard is beyond counting, and yet not one of them until now has given a succinct account of the evolution of penal discipline or the state of prisons as they are; nor has any writer stopped to consider what the system is intended to achieve, and how far it is successful. The present modest little book of 250 pages fills the gap."—*The Times*.

AUSTRALIA: Economic and Political Studies. By Various Writers. Edited by MEREDITH ATKINSON, M.A., Director of Tutorial Classes, and Head of the Department of Sociology in the University of Melbourne. Crown 8vo. 12s. 6d. net.

A HISTORY OF TRADE UNIONISM IN AUSTRALIA. By J. F. T. SUTCLIFFE, Secretary to the Federal Government Basic Wage Commission, 1920. Crown 8vo. 6s. net.

LONDON: MACMILLAN & CO., LTD.

SOME RECENT BOOKS

A SHORT HISTORY OF BRITISH EXPANSION.

By JAMES A. WILLIAMSON. With 21 Maps (8 in colour). 8vo. 25s. net.

"Mr. Williamson has produced a book of exceptional merit and with all the making of a standard work. He has brought to his task a vast amount of research, great accuracy, clear narrative, and sane judgments, often happily expressed, on men, movements, and eras."—*The Times Literary Supplement*.

THE ISLAND OF ROSES AND HER ELEVEN SISTERS, or THE DODECANESE : from the Earliest Time down to the Present Day.

By MICHAEL D. VOLONAKIS, Litt.D., Ph.D., formerly General Secretary to the Greek Ministry of Education and Cults. With an Introduction by J. L. MYRES, M.A., Wykeham Professor of Ancient History, Oxford. With numerous Maps and Illustrations. 8vo. 40s. net.

"The author vividly illuminates his pages with a wealth of picturesque episode and anecdote."—*The Times*.

A HISTORY OF PERSIA. By Brigadier-General Sir PERCY SYKES, K.C.I.E., C.B., C.M.G. *Second Edition, thoroughly Revised and Enlarged.* With 7 Maps and 193 Illustrations. 2 vols. 8vo. £3 10s. net.

"Ought to find a place in the library of everyone who is interested in Persia."—*Nature*.

"A book of great value which supplies information not elsewhere obtainable by the general public or the student of history."—*The Daily Telegraph*.

P. S. KING & SON'S ANNOUNCEMENTS

WEALTH AND TAXABLE CAPACITY. By Sir JOSIAH STAMP, K.B.E., D.Sc., Guy Medallist of the Royal Statistical Society and late of the Inland Revenue Department. Being the Newmarch Lectures of 1920-21. 10s. 6d. Postage 9d.

In the House of Commons during the Debate on Taxation and the Budget these Lectures were referred to by several Members, and the Chancellor of the Exchequer stated that he understood they would be published. Sir Josiah Stamp has revised them and they are now published in book form.

THE STORY OF THE AGRICULTURAL CLUB, 1918-21.

By Sir HENRY REW, K.C.B. With Foreword by LORD BLEDISLOE, K.B.E. 10s. 6d. Postage 9d.

The Agricultural Club was formed of members of the Agricultural Wages Board. Their discussions give a history of Agricultural and Government Policy in recent times.

SOCIALISATION IN THEORY AND PRACTICE.

 By HEINRICH STRÖBEL. Translated by H. J. STENNING.

The Author is an eminent German Socialist, who was a minister in the Revolutionary Government of Prussia; he summarises the attempts made to put Socialist principles into practice in Russia, Hungary and Germany.

The book is a mine of information upon Sociological experiments.

THE PRINCIPLE OF OFFICIAL INDEPENDENCE.

 By R. MACGREGOR DAWSON, M.A., D.Sc. (Econ.). *In the Press.*

This book is an attempt to analyse the conception of independence in the Modern State—an idea which, though it finds expression in a multitude of practical forms, has been ignored by the majority of writers on Politics. In order to make the discussion more concrete, the Author has thought it wiser to confine himself to Canadian Government, and has only enlarged this sphere when comparison with some other country demanded it.

PRINCIPLES OF COMPARATIVE ECONOMICS.

 By RADHAKAMAL MUKERJEE, M.A., F.D., Professor of Economics and Sociology, Lucknow. With Preface in French by RAPHAEL GEORGES LÉVY, with English Translation. Vol. II, 364 pp., 15s. Vol. II., *Ready very shortly*, 452 pp., 18s.
